APPI	ENDIX A – GLOSSARY	13

1.0 INTRODUCTION

The Washington State Department of Ecology (Ecology) has developed this public participation plan pursuant to the **Model Toxics Control Act (MTCA)**, to promote meaningful community involvement prior to implementation of remedial action at the Bothell Riverside site, located at Woodinville Drive (SR 522) and NE 180th Street, Bothell, Washington (King County Tax Parcels No. 082605-9120, 082605-9284, and 082605-9031). This site is listed in Ecology's known and suspected contaminated sites list **Facility Site number** 53578168.

This plan outlines and describes the tools and approaches that Ecology uses to inform the public about site activities and identifies opportunities for the community to become involved. This plan aims at addressing potential community concerns regarding the remedial action and defines the types of public participation activities that will take place as a part of the cleanup process. It is based on Ecology's Model Toxic's Control Act (MCTA) regulations (WAC 173-340-600 Public Participation). Ecology is committed to an open dialogue with the community to ensure that interested parties receive information as well as provide input during the decision-making process.

Ecology and the city of Bothell (Bothell) have negotiated a legal agreement called an **Agreed Order** that formally describes their working relationship and outlines the scope of work. The city of Bothell will complete the remedial action outlined in the Agreed Order. The remedial action tasks at this Site are to complete the **Remedial Investigation** (RI), to develop a **Feasibility Study** (FS), and prepare a **Draft Cleanup Action Plan** (DCAP) for the site.

Following the completion of the draft RI/FS and draft CAP, additional public involvement activities will be scheduled. The public involvement activities will be tailored based on public comments received for this site and MTCA requirements. This will include public notification and public comment period when appropriate.

Steps in the Cleanup Process

The MTCA rules detail each step in the cleanup process to ensure that cleanups are thorough and protective of human health and the environment. The chart below defines these steps and how they apply to the project site. Legal documents such as "Agreed Orders" or "Consent Decrees" further define some of the steps and associated time frames. The cleanup process is complex. During the process, issues often arise that need more scrutiny or evaluation, and may lead to changes in the scope or timing of the project. At the same time, it is in everyone's interest to complete a cleanup as quickly as possible.

1. Site Discovery and Initial Investigation: Sites may be discovered in a variety of ways including reports from the owner, an employee, or concerned citizens. Following discovery, an initial investigation is conducted to determine whether or not a site warrants further investigation.

2. Site Hazard Assessment and Hazard Ranking: This assessment is conducted to confirm the presence of hazardous substances and to determine the relative threat the site poses to human health and the environment. Sites then are ranked from 1 (highest) to 5 (lowest).

Ecology and this Site are currently at this phase of the process

4. Feasibility Study: The Feasibility Study takes the information from the Remedial Investigation and identifies and analyzes the cleanup alternatives available. As with the Remedial Investigation, a work plan will be prepared which describes how the study will be done.

3. Remedial Investigation: A Remedial Investigation is a study to define the nature, extent, and magnitude of contamination at a site. Before a remedial investigation can be conducted, a detailed work plan must be prepared which describes how the investigation work will be done.

5. Cleanup Action Plan: A Cleanup Action Plan is developed using information gathered in the Remedial Investigations and Feasibility Study. The plan specifies cleanup standards and identifies cleanup methods. It will describe the steps to be taken, including any additional environmental monitoring required during and after the cleanup, and will describe the schedule for cleanup activities.

6. Cleanup: Implementation of the Cleanup Action Plan includes design, construction, operations, and monitoring.

Schedule and Sequence of Public Involvement Activities

Activity	Public Participation/ Communications Activity
Agreed Order prepared for public notice December 2008	 Community/interest group briefings if necessary Fact sheet mailed – target week of 12/15/08
30 Day Public Comment Period	 Public comment period – draft Agreed Order including Public Participation Plan (PPP) Jan. 2-Feb. 2, 2009 Review and evaluate public comments Prepare a responsiveness summary if necessary Revise Agreed Order and PPP if recommended
Updates/Public Notifications	As needed.
30 Day Public Comment Period	 Fact Sheet for Draft Remedial Investigation and Draft Feasibility Study Report and Draft Cleanup Action Plan. Prepare a responsiveness summary if necessary Revise the RI/FS and CAP if recommended.

Site Background and Map

The City of Bothell (Bothell) owns the property at Woodinville Drive (SR 522) and NE 180th Street, Bothell (King County Tax Parcel No. 082605-9120, 082605-9284, and 082605-9031). Bothell acquired the property from Bestern Inn in 1990. The site is currently used for parking and storage of City materials.

The site contained a former gasoline service station. Petroleum impacted soil and ground water were found on-site. Solid waste including discarded containers of motor oil, anti-freeze, and transmission fluid were also found. Approximately 4,500 yards of petroleum impacted soil were excavated, treated on-site, and returned to the excavation in the early 1990s.

Based on an environmental site assessment conducted in 2008, petroleum concentrations in some of this soil may still exceed some MTCA cleanup levels. The 1991 remediation also included three months of pumping and treating ground water from the excavation, and then returning the treated water to the excavation. The 2008 environmental assessment documented the presence of petroleum contaminants in the soil as well as chlorinated solvents in the ground water at concentrations of potential regulatory concern.

Cleanup Work to be Performed

The proposed work tasks under this Agreed Order are to prepare a work plan to complete the remedial investigation (RI) and Feasibility Study (FS) and prepare the Draft Cleanup Action Plan (DCAP). These documents will be reviewed and revised if necessary for approval by Ecology. With Ecology's approval, the next step is public review of the RI/FS report and draft DCAP. Future actions may include a new proposed legal agreement for implementing the CAP.

2.0 CONTAMINANTS OF CONCERN

Petroleum hydrocarbons in soil and groundwater, and chlorinated solvents in ground water are the primary contaminants of concern at this time. The Remedial Investigation will provide additional information to identify the nature and extent of contamination at the site.

3.0 PUBLIC PARTICIPATION ACTIVITIES AND RESPONSIBILITY

The purpose of this Public Participation Plan is to promote public understanding and participation in the cleanup process for this site. This section addresses how Ecology will keep the public informed about site activity and provide opportunities for being involved in the cleanup.

Ecology will continue to use a variety of tools to facilitate public participation in the planning and cleanup of this site. These tools are:

- Formal comment periods and responsiveness summaries.
- Fact sheets.
- Public meetings (if requested by 10 or more persons).
- Information repositories.
- Site register notices.
- Web tools including a web-based Events calendar.

Ecology will consider and implement constructive input provided by the community whenever possible.

Ecology urges the public to become involved in the remedial action process. Information will be provided regularly to provide many opportunities to review materials and provide comments. This plan is intended to be a flexible working document that will be updated as community concerns emerge and/or more information becomes available during the cleanup process. To arrange for a briefing with project staff, ask questions or provide comments on the plan or other aspects of the cleanup, please contact one of the persons

listed below. This public participation plan will be a working document as the project processes.

For technical questions, please contact:

Jerome Cruz, Site Manager

Goal of this Public Participation Plan

MCTA states that public participation plans are intended to encourage coordinated and effective public involvement tailored to the public's needs at a particular site. The goals of this plan are:

- To identify people and organizations with an interest or potential interest in the site.
- To promote public understanding and to identify community concerns related to the:

- > Agreed Order
- ➤ Remedial Investigation
- > Feasibility Study
- > Draft Cleanup Action Plan
- To encourage interactive communication and collaboration between Ecology, the City of Bothell, and the community.
- To meet the public participation requirements under MCTA.

Roles and Responsibilities

Ecology maintains overall responsibility and approval authority for the activities outlined in this plan in accordance with MTCA requirements. Ecology conducts public comment periods as required by MTCA, which include receiving comments, making decisions, and preparing responsiveness summaries if necessary.

Public Outreach Activities

A 30-day public comment period will be scheduled for each major phase of the project. A formal public notice for each of the comment periods include the following:

- A fact sheet will be distributed to the impacted community and surrounding areas.
- A newspaper advertisement will be placed in the local area newspaper.
- A notice will be published in Ecology's Site Register and Ecology's Public Calendar.
- All public documents will be available on Ecology's website for public review.
- A public meeting will be held if 10 or more people request a meeting during the public comment period.

Formal Public Comment Period

Comment periods are the primary method Ecology uses to get feedback from the public on proposed cleanup decisions, which Ecology presents as draft documents. Comment periods usually last for 30 days and are required at key points during the investigation and cleanup process before final decisions are made.

During a comment period, the public can comment in writing through letters or email. Verbal comments are taken if a public hearing is held. After a formal comment period,

Ecology reviews all comments received and may respond in a document called a Responsiveness Summary.

During the public comment period, please send your written comments to:

Jerome Cruz, Site Manager
Washington State Department of Ecology
Toxics Cleanup Program – Northwest Regional Office
3190 160th Ave SE
Bellevue, WA 98008
Phone: 425-649-7094

E-mail: jcru461@ecy.wa.gov

Ecology will consider the need for changes or revisions to draft documents based on input from the public comments. If significant changes are made, then a second comment period may be held. If no significant changes are made, then the draft document(s) will be finalized.

Public Meetings and Hearings

Public meetings may be held at key points during the cleanup process. Ecology may also offer public meetings for actions expected to be of particular interest to the community. If ten or more people request a public meeting or hearing during the 30 day comment period, Ecology will hold a public meeting for the purpose of taking oral comments on draft documents.

Information Repositories

Information repositories are convenient places where the public can go to read and review site information (see below). The information repositories are often at libraries or community sites to which the public has access. During the comment period, the site documents will be available for review at each repository that is listed below. Documents remain at the repositories for the entire duration of the project.

The entire site file is available for review at Ecology's Northwest Regional Office by appointment. For special accommodations or translation assistance, please contact Nancy Lui at nlui461@ecy.wa.gov or at 425-649-4259 (TDD) and please indicate you would like assistance with the "Bothell Riverside" site.

The information repositories will be located at:

Bothell City Hall

18305 101st Ave. NE Bothell, WA 98011 Monday- Friday 8 am- 5pm

King County Bothell Regional Library

18215 98th Ave. NE Bothell, WA 98011 Monday-Thursday 10 am-9 pm Friday 10 am-6 pm Saturday 10 am-5 pm Sunday Noon-8 pm

Washington State Department of Ecology

3190 160th Ave. S.E. Bellevue, WA 98008

Call for an appointment: Sally Perkins

425-649-7190

425-649-4450 FAX

E-mail: sper461@ecy.wa.gov

Hours: Tuesday - Thursday, 8 am-Noon and 1-4:30 pm

Site Register and Public Events Calendar

Ecology's Toxics Cleanup Program uses its bimonthly Site Register and web-based Public Involvement Calendar to announce all of its public meetings and comment periods as well as additional site activities. To receive the Site Register in electronic or hard copy format, contact Linda Thompson at 360-407-6069 or by email at ltho461@ecy.wa.gov. The Public Involvement Calendar is available on Ecology's website at http://apps.ecy.wa.gov/pubcalendar/calendar.asp

Mailing List

Ecology has compiled and maintains a list of interested parties, organizations and residents living near the cleanup site. This list will be used to disseminate information via mail (fact sheets, site updates, public notices, etc.). If you are not on the mailing list for this site and wish to be added, please contact Nancy Lui at nlui461@ecy.wa.gov or at 425-649-7117. In the subject line, please indicate "Bothell Riverside Site" mailing list.

Ecology Website

Information on the cleanup is available online at Ecology's Website:

4.0 PUBLIC PARTICIPATION GRANTS AND TECHNICAL ASSISTANCE

Additionally, citizen groups living near contaminated sites may apply for public participation grants during open application periods. These grants help citizens receive technical assistance in understanding the cleanup process and create additional avenues for public participation.

NOTE: Ecology currently does not have a citizen technical advisor for providing technical assistance to citizens on issues related to the investigation and cleanup of the Site.

5.0 PUBLIC PARTICIPATION PLAN AMENDMENTS

The Plan was developed by Ecology and complies with the MCTA regulations (Chapter 173-340 WAC). It will be reviewed as cleanup progresses and may be amended if necessary. Amendments may be submitted to Ecology's site manager, Jerome Cruz, for review and consideration. Ecology will determine final approval of the Plan as well as any amendments.

APPENDIX A – GLOSSARY

Cleanup: The implementation of a cleanup action, or interim action.

Cleanup Action: Any remedial action, except interim actions, taken at a site to eliminate, render less toxic, stabilize, contain, immobilize, isolate, treat, destroy, or remove a hazardous substance that complies with WAC 173-340-350 through 173-340-390.

Chemicals of Concern (COCs): Hazardous substances that are of particular concern at this site.

Comment Period: A time period during which the public can review and comment on various documents and proposed actions. For example, a comment period may be provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans.

Consent Decree: A legal document approved and issued by a court which formalizes an agreement reached between the state and potentially liable persons (PLPs) on the actions needed at a site. A decree is subject to public comment. If a decree is substantially changed, an additional comment period is provided.

Containment: A container, vessel, barrier, or structure, whether natural or constructed, which confines a hazardous substance within a defined boundary and prevents or minimizes its release into the environment.

Contaminant: Any hazardous substance that does not occur naturally or occurs at greater than natural background levels.

Environment: Any plant, animal, natural resource, surface water (including underlying sediments), ground water, drinking water supply, land surface (including tidelands and shorelands) or subsurface strata, or ambient air within the state of Washington.

Facility: Any building, structure, installation, equipment, pipe or pipeline (including any pipe into a sewer or publicly-owned treatment works), well, pit, pond, lagoon, impoundment, ditch, landfill, storage container, motor vehicle, rolling stock, vessel, or aircraft; or any site or area where a hazardous substance, other than a consumer product in consumer use, has been deposited, stored, disposed or, placed, or otherwise come to be located.

Facility Site ID #: Site specific number assigned by Ecology for the Ecology known and suspected contaminated sites database.

Feasibility Study: The Feasibility Study takes the information from the Remedial Investigation and identifies and analyzes the cleanup alternatives available. As with the Remedial Investigation, a workplan will be prepared which describes how the study will be done.

Interim Action: Any remedial action that partially addresses the cleanup of a site. It is an action that is technically necessary to reduce a threat to human health or the environment by eliminating or substantially reducing one or more pathways for exposure to a hazardous substance at a facility; an action that corrects a problem that may become substantially worse or cost substantially more to address if the action is delayed; an action needed to provide for completion of a site hazard assessment, state remedial investigation/feasibility study, or design of a cleanup action.

Model Toxics Control Act (MTCA): Refers to RCW 70.105D approved by voters in the state of Washington in November 1988. The implementing regulation is WAC 173-340 and was amended in 2001.

Public Notice: At a minimum, adequate notice mailed to all persons who have made a timely request to Ecology and notice to persons residing in the potentially affected vicinity of the proposed action; mailed to appropriate news media; published in the local (city or county) newspaper of largest circulation; and the opportunity for interested persons to comment.

Public Participation Plan: A plan prepared under the authority of WAC 173-340-600 to encourage coordinated and effective public involvement tailored to the public's needs at a particular site.

Remedial Investigation: A Remedial Investigation is a study to define the nature, extent, and magnitude of contamination at a site. Before a remedial investigation can be conducted, a detailed workplan must be prepared which describes how the investigation work will be done.

Responsiveness Summary: A compilation of all questions and comments into a document open for public comment and their respective answers/replies by Ecology. The responsiveness summary is mailed, at a minimum, to those who provided comments, and its availability is published in the Site Register.

Site Discovery and Initial Investigation: Sites may be discovered in a variety of ways including reports from the owner, and employee, or concerned citizens. Following discovery, an initial investigation is conducted to determine whether or not a site warrants further investigation.

Site Hazard Assessment and Hazard Ranking: This assessment is conducted to confirm the presence of hazardous substances and to determine the relative threat the site poses to human health and the environment. Sites then are ranked from 1 (highest) to 5 (lowest).

Site Register: Publication issued every two weeks of major activities conducted statewide related to the study and cleanup of hazardous waste sites under the Model Toxics Control Act. To receive this publication, please call (360) 407-7200.

Underground Storage Tank (UST) area: An area at a property that contains underground storage tank or tanks and connected underground piping for the storage and containment of liquids and are defined in the rules adopted under Chapter 90.76 RCW.
