Re: Public Comment on City Parcel North Cook Street Remedial Investigation

An addendum to the State Environmental Policy Act (SEPA) checklist and a Fact Sheet explaining additional remedial work to be done along North Cook Street in accordance with the existing Work Plan were submitted for public review for comments on the proposed work. The North Cook Street work involves implementing the Cleanup Action Plan to remediate PCB-containing soils identified along the western fence line of the City Parcel property and along the eastern edge of North Cook Street. Comments from the public were accepted January 30 through March 2, 2015. No comments were received by Ecology.
