Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility Site ID Number: 82825487
SWC Desc: WT02
FWC Desc: D001, D008, D009, D018
Form Comm: 10A-1). This site is usually a Small Quantity Generator(SQG), but due to a clean-out of various Maintenance chemicals, and a one-time disposal of contaminated gasoline, for 2008 this site was a Medium Quantity Generator (MQG). It is not expected this site to be a MQG or LQG in the coming year(s), but should retain SQG status.

Pipe Construction: Single Wall Pipe
Pipe Primary Release Detection: Automatic Line Leak Detector (ALLD)
Pipe Second Release Detection: Not reported
Pipe Corrosion Protection: Sacrificial Anode
Pipe Pumping System: Not reported
Responsible Unit: NORTHWEST
Dispencer/Pump SFC Type: Not reported

Tank Name: 4
Tag Number: Not reported
Tank Status: Removed
Tank Status Date: 08/06/1996
Tank Install Date: 00/01/1984
Tank Closure Date: Not reported
Capacity Range: Not reported
Tank Permit Expiration Date: 07/01/1993
Tank Upgrade Date: Not reported
Tank Spill Prevention: Spill Bucket/Spill Box
Tank Overfill Prevention: Automatic Shutoff (fill pipe)
Tank Material: Steel
Tank Construction: Single Wall Tank
Tank Tightness Test: Not reported
Tank Corrosion Protection: Sacrificial Anode
Tank Manifold: Not reported
Tank Release Detection: Weekly Manual Gauging
Tank SFC Type: Not reported

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/29/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 09/08/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 07/08/2014
Number of Days to Update: 151	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014
Date Made Active in Reports: 04/09/2014
Number of Days to Update: 27

Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014
Date Made Active in Reports: 04/09/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/19/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 703-603-0695
Date Made Active in Reports: 07/15/2014	Last EDR Contact: 06/05/2014
Number of Days to Update: 116	Next Scheduled EDR Contact: 09/22/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/19/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 703-603-0695
Date Made Active in Reports: 07/15/2014	Last EDR Contact: 06/05/2014
Number of Days to Update: 116	Next Scheduled EDR Contact: 09/22/2014
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2014	Source: Department of the Navy
Date Data Arrived at EDR: 05/30/2014	Telephone: 843-820-7326
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 08/14/2014
Number of Days to Update: 18	Next Scheduled EDR Contact: 12/01/2014
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/2013	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 10/01/2013	Telephone: 202-267-2180
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 07/03/2014
Number of Days to Update: 66	Next Scheduled EDR Contact: 07/14/2014
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 02/26/2014	Source: Department of Ecology
Date Data Arrived at EDR: 03/21/2014	Telephone: 360-407-7200
Date Made Active in Reports: 04/22/2014	Last EDR Contact: 06/10/2014
Number of Days to Update: 32	Next Scheduled EDR Contact: 09/22/2014
	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/22/2014	Source: Department of Ecology
Date Data Arrived at EDR: 04/24/2014	Telephone: 360-407-7200
Date Made Active in Reports: 05/05/2014	Last EDR Contact: 07/22/2014
Number of Days to Update: 11	Next Scheduled EDR Contact: 11/03/2014
	Data Release Frequency: Semi-Annually

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/25/2013	Source: Department of Ecology
Date Data Arrived at EDR: 09/25/2013	Telephone: 360-407-6132
Date Made Active in Reports: 10/16/2013	Last EDR Contact: 06/09/2014
Number of Days to Update: 21	Next Scheduled EDR Contact: 09/22/2014
	Data Release Frequency: Annually

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tanks Site List

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 05/20/2014	Source: Department of Ecology
Date Data Arrived at EDR: 05/23/2014	Telephone: 360-407-7183
Date Made Active in Reports: 06/04/2014	Last EDR Contact: 05/20/2014
Number of Days to Update: 21	Next Scheduled EDR Contact: 09/01/2014
	Data Release Frequency: Quarterly

INDIAN LUST R9: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Arizona, California, New Mexico and Nevada

Date of Government Version: 03/01/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2013	Telephone: 415-972-3372
Date Made Active in Reports: 04/12/2013	Last EDR Contact: 07/22/2014
Number of Days to Update: 42	Next Scheduled EDR Contact: 11/10/2014
	Data Release Frequency: Quarterly

INDIAN LUST R7: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Iowa, Kansas, and Nebraska

Date of Government Version: 04/28/2014	Source: EPA Region 7
Date Data Arrived at EDR: 05/01/2014	Telephone: 913-551-7003
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 04/28/2014
Number of Days to Update: 47	Next Scheduled EDR Contact: 11/10/2014
	Data Release Frequency: Varies

INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Alaska, Idaho, Oregon and Washington.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 11/06/2013	Source: EPA Region 10
Date Data Arrived at EDR: 11/07/2013	Telephone: 206-553-2857
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 04/28/2014
Number of Days to Update: 29	Next Scheduled EDR Contact: 11/10/2014
	Data Release Frequency: Quarterly

INDIAN LUST R8: Leaking Underground Storage Tanks on Indian Land
LUSTs on Indian land in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming.

Date of Government Version: 08/27/2012	Source: EPA Region 8
Date Data Arrived at EDR: 08/28/2012	Telephone: 303-312-6271
Date Made Active in Reports: 10/16/2012	Last EDR Contact: 07/22/2014
Number of Days to Update: 49	Next Scheduled EDR Contact: 11/10/2014
	Data Release Frequency: Quarterly

INDIAN LUST R5: Leaking Underground Storage Tanks on Indian Land
Leaking underground storage tanks located on Indian Land in Michigan, Minnesota and Wisconsin.

Date of Government Version: 05/12/2014	Source: EPA, Region 5
Date Data Arrived at EDR: 05/12/2014	Telephone: 312-886-7439
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 04/28/2014
Number of Days to Update: 36	Next Scheduled EDR Contact: 11/10/2014

	Data Release Frequency: No Update Planned

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 04/22/2014	Source: Department of Ecology
Date Data Arrived at EDR: 04/24/2014	Telephone: 360-725-4030

Number of Days to Update: 11	Next Scheduled EDR Contact: 11/03/2014
	Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

COUNTY RECORDS

KING COUNTY:

Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

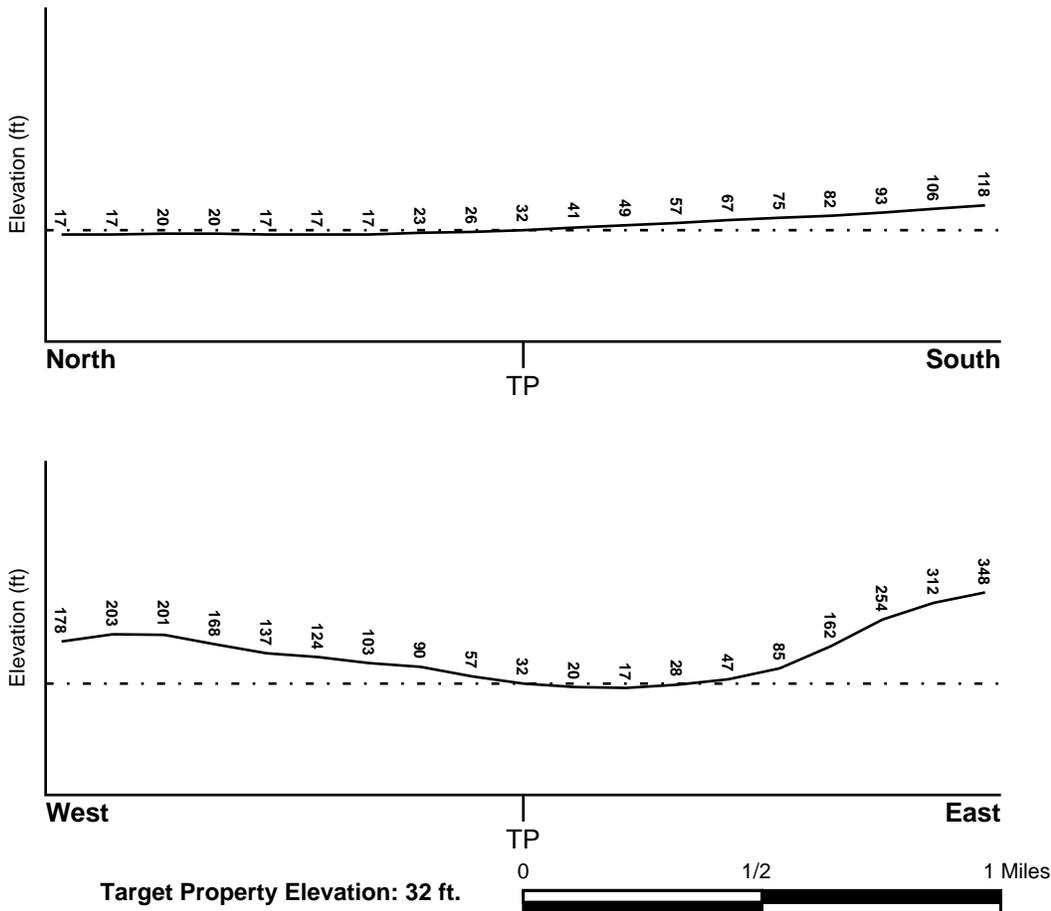

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
KING, WA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 53033C0340F - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
SEATTLE NORTH	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile NNW
Site Name:	DANS PAINTS
Site EPA ID Number:	WAD043020767
Groundwater Flow Direction:	TOWARD LAKE UNION
Inferred Depth to Water:	not available
Hydraulic Connection:	The Lawton clay formation impedes the downward migration of ground water to the lower aquifer.
Sole Source Aquifer:	A sole source aquifer is not present at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PILCHUCK

Soil Surface Texture: loamy sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.10
2	20 inches	38 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 5.60
3	38 inches	60 inches	gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 7.30 Min: 6.10
4	60 inches	70 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam
silt loam

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

PLAN APPROVED

This plan is approved, subject to Ordinance, field inspection, and providing the following corrections are made:

1. This approval is based on the quantities of flammable and combustible liquids in each control area (i.e., areas bounded by one-hour separations) for storage and dispensing not exceeding the exempt amounts allowed by 1994 Seattle Fire Code Tables 7902.5-A and 7903.2-B. Note that quantities may be increased for automatic sprinkler protection and approved storage cabinets.
2. Call 233-7106 for Seattle Fire Department permit information regarding storage and dispensing of liquids, spray painting, cutting and welding, etc.

Very truly yours,

CLAUDE HARRIS, CHIEF

RE: 739 - 9th Avenue North - MAACO Autobody, Flam. Liq. Storage Room
H-3 Occupancy; Type VN Construction; 1 Story
PLAN REVIEW NO. 96270L

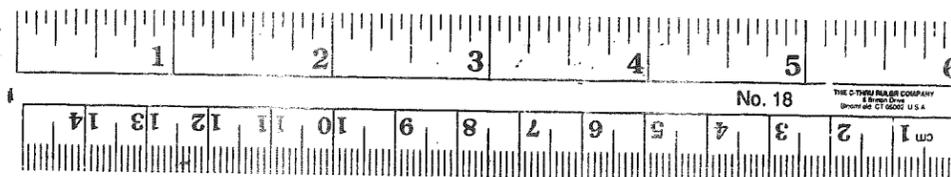

Dear Mr. Byrd:

Per your review letter and our subsequent telephone conversation regarding this project, we would like to respond to your review letter referencing item numbers as follows:

1. Use of this room is storage of Class 1-A and Class 1-B liquids and dispensing via a closed system in an H-3 Occupancy Group classification. Explosion venting is not required.
2. Flammable liquids are dispensed into, or used, or mixed in containers not exceeding 55 gallon capacity. Aggregate capacity of multiple containers will not exceed 1,000 gallons, therefore, drainage control and secondary containment are not required. Spill control is provided by the 4" high concrete sill, which is ramped at the door opening. UFG 7903.2.3.5.4.
3. The sprinkler system was installed and approved by Seattle DCEU on December 7, 1992. A copy of the approved plan is attached.
4. Please find the attached specification for the exhaust fan.
5. There is a Class 40BC fire extinguisher installed on the exterior wall of the storage room adjacent to the door.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Geo Engineers, Inc. on Aug 21, 2014.

TARGET PROPERTY

739 9th Ave N
Seattle, WA 98109

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

MAP INFORMATION

The Overview Map provides information on nearby property parcel boundaries. Properties on this map that were selected for research are listed below the map.

SELECTED ADDRESSES

The following addresses were selected by the client. Detailed findings are contained in the findings section. An "X" indicates where information was identified.

<u>Address</u>	<u>Type</u>	<u>Findings</u>

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Geo Engineers, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

MEMO

To: Bartow Fite III

September 14, 1999
Project No. T-4407

From: Chuck Lie
Terra Associates

Subject: UST Closure Contractors
739 - 9th Avenue North
Seattle, Washington

Mr. Fite:

As requested, Terra Associates, Inc. contacted several contractors who could provide permanent closure of the heating oil underground storage tank (UST) at the 739 - 9th Avenue North Building in Seattle, Washington. We sent requests for proposals to the following firms:

- Ultra Tank Services, Inc.
- PSCI Tank Services
- WT Services Company
- Basin Tank and Environmental

Each of the firms responded, with the exception of Basin Tank and Environmental.

Our Request for Bid is attached to this memo, as are the responses we have received. We initially requested cost estimates for exposing the UST, cutting an access hole, cleaning the tank, filling the UST, and patching the ground surface. The response of each firm was that it would be less expensive to perform the closure in place through the existing filler tube. Thus, each firm was requested to present their cost estimate for this second alternative.

We recommend that the UST be exposed and cut open to verify that it has been cleaned and to allow direct observation of the UST for measurements and documentation. The choice to close the UST with a remote fill entails some risk. The actual size and dimensions of the UST may not be known. Also, no visual verification of the UST cleaning can be performed with this closure option. Both methods are acceptable to the City of Seattle Fire Marshal's office.

Bartow Fite III
September 14, 1999

Based on current site observations, the UST is exempt from Washington State UST regulations because it is apparently less than 1,000 gallons in size and was used for the storage of heating fuel used on the premises. Hence, the applicable regulations are enforced by the Seattle Fire Department. The laws are contained in Sections 6106 and 6103 of the Seattle Fire Code.

For quick comparisons, the estimated prices are tabulated below.

Contractor	Closure In Place Through Filler Tube	Closure In Place By Exposing UST
PSCI Tank Services	\$1,275.47	\$2,347.66
Ultra Tank Services, Inc.	\$1,140.00	\$2,918.00
WT Services Company	\$1,800.00	NA

See
We have worked with Ultra Tank Services, Inc. and found their performance to be satisfactory and timely. We have not worked with PSCI Tank Services. If requested, we can obtain references for each of the contractors.

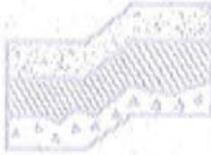

None of the proposals includes an assessment of the soils surrounding the UST. If requested, Terra Associates, Inc. can perform an assessment, as outlined in our letter to you dated August 5, 1999. Further, we can observe the UST closure operation to verify the procedures used are appropriate for the site.

We trust the information presented is sufficient for your current needs. If you have any questions or require additional information, please call.

Chuck Lie

Request for Bid
UST Closure
739 - 9th Avenue North
Seattle, Washington

August 24, 1999
Project No. T-4407

To Whom It May Concern:

On behalf of the owner of the 739 - 9th Avenue North property, we are soliciting bids for the closure in-place of an unused heating oil underground storage tank (UST). All bids should be addressed to Mr. F. Bartow Fite III, c/o Terra Associates, Inc., 12525 Willows Road, Suite 101, Kirkland, WA 98034.

The UST is located behind the building in an area used for parking and storage. The building is occupied by an auto body shop that is in operation. From measurements at the UST filler, the UST appears to have approximately 30 inches of cover. The bottom of the UST appears to be approximately six feet below the top of the existing pavement. Based on these measurements, the UST is estimated to be on the order of 500 to 1,000 gallons in size. The UST contains approximately two feet of liquid. The upper one foot has been identified as Diesel Number 2. The lower one foot appears to be water. The laboratory analysis of the residual fluids is attached to this letter.

UST closure in-place is to consist of exposing the top of the UST, cutting an access hole at least one foot square, pumping out the residual liquid, triple rinsing the UST, and filling the UST with Controlled Density Fill (CDF). The purpose of the access opening is to allow verification of the internal dimensions of the UST and to allow for positive placement of backfill materials.

Following closure in-place, the filler tube, accessible product lines, and vent will be cutoff and capped. All work must be done in accordance with City of Seattle, Washington State and Federal requirements. The contractor will be responsible for obtaining all permits and scheduling all inspections required for this project. The owner's representative, Terra Associates, Inc., will perform all site assessment activities on this project.

The contractor is responsible for verifying all site conditions prior to submitting a bid.

The bid should list line items for the following tasks:

1. Permits.
2. Saw cutting the existing pavement and exposing the top of the UST.

August 24, 1999

3. Pumping residual fluids and triple rinsing the UST. This line item should contain unit prices for the disposal of UST fluids and rinsate.
4. Inerting the UST and cutting access hole.
5. Filling the UST with CDF, cutting and capping all vent, filler, and distribution lines, and restoring the pavement surface.
6. Lawful off-site disposal of debris generated during the closure operation. This should include unit costs for the disposal of cut pipes, pavement, and soils generated during the operation.

The contractor will be responsible for off-site disposal of all debris generated in this process, including soils excavated from the UST.

It is the owners intent to minimize impacts to the existing tenant on the site. The bid should contain a narrative that explains the actual equipment to be used on-site and the timing of the in-place closure. The contractor will be responsible for maintaining the site in a safe manner throughout the execution of this process. The contractor will be responsible for the health and safety procedures for his employees in accordance with Washington State laws. The contractor will need to provide proof of insurance and all required licenses prior to acceptance of the bid. The bid should clearly state how soon the work on-site can be performed. The owner will require one week notice prior to the beginning of any site work.

The owner reserves the right to reject any proposal or bid submitted for this project.

Site visits must be arranged through Mr. Chuck Lie of Terra Associates, Inc., 425-821-7777.

We trust the information presented is sufficient for your needs. If you have any questions or require additional information, please call.

Sincerely yours,
TERRA ASSOCIATES, INC.

Re: Analytical Data for Project 9th Avenue N
Laboratory Reference No. 9908-051

Dear Chuck:

Enclosed are the analytical results and associated quality control data for samples submitted on August 9, 1999.

The standard policy of OnSite Environmental Inc. is to store your samples for 30 days from the date of receipt. If you require longer storage, please contact the laboratory.

We appreciate the opportunity to be of service to you on this project. If you have any questions concerning the data, or need additional information, please feel free to call me.

Sincerely,

David Baumeister
Project Manager

DATA QUALIFIERS AND ABBREVIATIONS

- A - Due to a high sample concentration, the amount spiked is insufficient for meaningful MS/MSD recovery data.
- B - The analyte indicated was also found in the blank sample.
- C - The duplicate RPD is outside control limits due to high result variability when analyte concentrations are within five times the quantitation limit.
- D - Data from 1: ___ dilution.
- E - The value reported exceeds the quantitation range, and is an estimate.
- F - Surrogate recovery data is not available due to the high concentration of coeluting target compounds.
- G - Insufficient sample quantity for duplicate analysis.
- H - The analyte indicated is a common laboratory solvent and may have been introduced during sample preparation, and be impacting the sample result.
- I - Compound recovery is outside of the control limits.
- J - The value reported was below the practical quantitation limit. The value is an estimate.
- K - Sample duplicate RPD is outside control limits due to sample inhomogeneity. The sample was re-extracted and re-analyzed with similar results.
- L - The RPD is outside of the control limits.
- M - Hydrocarbons in the gasoline range (toluene-naphthalene) are present in the sample.
- O - Hydrocarbons outside the defined gasoline range are present in the sample; NWTPH-Dx recommended.
- P - The RPD of the detected concentrations between the two columns is greater than 40.
- Q - Surrogate recovery is outside of the control limits.
- S - Surrogate recovery data is not available due to the necessary dilution of the sample.
- T - The sample chromatogram is not similar to a typical _____.
- U - The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
- V - Matrix Spike/Matrix Spike Duplicate recoveries are outside control limits due to matrix effects.
- W - Matrix Spike/Matrix Spike Duplicate RPD are outside control limits due to matrix effects.
- X - Sample extract treated with a silica gel cleanup procedure.
- Y - Sample extract treated with an acid cleanup procedure.
- Z -
- ND - Not Detected
MRL - Method Reporting Limit
PQL - Practical Quantitation Limit
RPD - Relative Percent Difference

PROPOSAL
PSCI-WA-99-2216
UNDERGROUND STORAGE TANK DECOMMISSIONING PROJECT
PROJECT NO. T-4407
739 9TH AVENUE NORTH
SEATTLE, WASHINGTON 98109

Dear Mr. Fite:

Pacific Specialty Construction, Inc. (PSCI Tank Services), a licensed, bonded, and insured environmental construction and consulting firm, specializing in decommissioning and installation of underground storage tanks (UST's) and remediation of petroleum contaminated soils, is pleased to submit this fee proposal to perform the following services on the above referenced project.

All work performed under this proposal is guaranteed and certified to meet or exceed the standards developed by the Department of Ecology and the Washington State Fire Code. PSCI Tank Services prides itself on timely professional service to our clients at the industries highest standards.

PROPOSED SERVICES AND FEES

It is our understanding that no potentially hazardous waste has been stored on the above listed property and that the UST located on the property has been used for the storage of #2 Fuel Oil. The fee proposals are based on the UST currently measured at 44" in diameter and an estimated 12 feet in length, indicating a 1,000-gallon tank.

FILL IN PLACE: One (1) 1,000-gallon commercial UST by concrete pump.

- Obtain all necessary permits and schedule commercial closure inspections.
- Pump and dispose of any existing product prior to decommissioning.
- Pump fuel lines clean of oil and cap.
- Inert and test UST atmosphere for oxygen and lower explosive limits.
- Clean the inside of the UST with a trisodium phosphate rinse.
- Fill the UST with a CDF consisting of *Concrete Slurry* using a concrete pump.
- Remove Fill & Vent Pipe.
- Prepare closure summary report and site certification.

ITEMIZED CHARGES:

<u>CONTAMINATED WATER DISPOSAL</u>	175 GALLONS @ \$0.45/GAL	\$ 78.75
<u>UST PUMP CLEAN & INERT</u>		\$ 85.00
<u>UST FILL W/ CONCRETE SLURRY</u>		\$ 1,235.00
<u>PERMIT</u>	SEATTLE COMMERCIAL PERMIT	\$ 98.00
<u>STATE AND LOCAL SALES TAX</u>		\$ 128.72
<u>TOTAL DUE ON INVOICE</u>		\$ 1,625.47

10230 E. RIVERSIDE DRIVE
BOTHELL, WA 98011-3709

1-800-460-2694

P: 425-488-6727

F: 425-486-6936

Or

FILL IN PLACE: One (1) 1,000-gallon commercial UST through exposed & opened top of UST.

- Obtain all necessary permits and schedule commercial closure inspections.
- Cut and remove concrete cover to approximately 2 square foot with concrete saw. – Larger area needed due to depth of UST.
- Excavate to top of UST.
- Pump and dispose of any existing product prior to decommissioning.
- Pump fuel lines clean of oil and cap.
- Inert and test UST atmosphere for oxygen and lower explosive limits.
- Cut opening in UST with electric-powered reciprocal saw.
- Clean the inside of the UST with a trisodium phosphate rinse.
- Fill the UST with a CDF consisting of *Concrete Slurry*.
- Remove Fill & Vent Pipe.
- Backfill work area to preexisting grade.
- Replace concrete cover.
- Prepare closure summary report and site certification.

ITEMIZED CHARGES:

<u>CUT & REMOVE CONCRETE</u>		\$ 200.00
<u>CONTAMINATED WATER DISPOSAL</u>	175 GALLONS @ \$0.45/GAL	\$ 78.75
<u>EXCAVATE, INERT AND OPEN TOP OF UST</u>		\$ 300.00
<u>UST CLEAN AND FILL W/ CONCRETE SLURRY</u>		\$ 1,235.00
<u>BACKFILL TO GRADE, COMPACT & REPLACE CONCRETE</u>		\$ 250.00
<u>PERMIT</u>	SEATTLE COMMERCIAL PERMIT	\$ 98.00
<u>STATE AND LOCAL SALES TAX</u>		\$ 185.91
<u>TOTAL DUE ON INVOICE</u>		\$ 2,347.66

CLARIFICATIONS & EXCLUSIONS

The items listed below are clarifications & exclusions of the contract or scope of work. PSCI will provide these services or solutions at an additional cost as needed.

1. PSCI will exercise reasonable care in performance of all work on the project site however, PSCI shall not be liable for damages to or breakage of underground pipes and/or conduits under the surface of the ground. The owner has an affirmative duty to know of and inform PSCI of any subsurface pipes/conduits located on the property.
2. PSCI shall utilize that degree of care and skill ordinarily exercised under similar circumstances by reputable members of the environmental consulting business. However, PSCI makes no express or implied warranties by its provision of services under this agreement. PSCI shall not be held liable for any actual or consequential damages arising out of or related to the provisions of services under this agreement other than actual damages caused by the negligence of PSCI or its authorized agents.
3. PSCI's "1999 Schedule of Charges and General Conditions" are made a part of this proposal.

MISCELLANEOUS

1. **Entire Agreement:** This agreement constitutes the entire agreement between the parties and no oral modifications or waivers shall be binding on the parties. All modifications and/or waivers of this agreement must be in writing.
2. **Arbitration:** All claims, disputes, and other matters in question arising out of, or relating to, the agreement or the breach of the agreement shall be decided by arbitration in accordance with the commercial arbitration procedures of the American Arbitration Association then in effect. Any decision reached by the arbitrators shall

F: 425-486-6936

be final and binding on all the parties to the dispute. The prevailing party in the dispute, as determined by the arbitrators, shall be entitled to its reasonable attorney fees.

3. Governing Law: This agreement shall be governed by, construed, and enforced in accordance with the laws of the State of Washington.

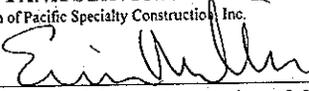

Should the terms of this proposal be acceptable please sign in the space provided below and return a copy for our files. If you have any questions or comments, please contact us at (425) 488-6727. We look forward to working with you on this project.

Sincerely,

PSCI
TANK SERVICES

1999 SCHEDULE OF CHARGES AND GENERAL CONDITIONS

Compensation to Pacific Specialty Construction, Inc. (PSCI) for our professional services is based upon the conditions set forth below. A new schedule is issued at the beginning of each year. Unless other arrangements have been made, charges for all work will be based on the latest Schedule of Charges and General Conditions:

LABOR CHARGES

Charges for employees are determined by the hourly rates listed below..

Environmental Technician	\$50.00/hour	Project Engineer	\$70.00/hour
Sr. Environmental Technician	\$55.00/hour	Principal	\$90.00/hour
Environmental Engineer	\$65.00/hour	Expert Witness	\$150.00/hour

Hours worked in excess of eight hours per day or that are worked on Saturday, Sunday, or national holidays will be billed at 130% of the regular rates when these overtime hours are requested by the Client or are reasonably necessary to meet job schedules.

MOBILIZATION

Charges for employees and mileage are listed below. All mileage will be calculated on the basis of a round trip from Bothell, Washington to the job site. Unless other arrangements have been made, charges for all travel time will be based on the actual time of travel to the job site.

Mileage	Passenger Vehicle	35¢/mile	Travel Time	\$25.00/hour
	Truck	40¢/mile		

OUTSIDE SERVICES AND MATERIALS

Charges for outside services and all miscellaneous cost are listed below.

Parking, Reproduction	At Cost	Outside Services	Cost Plus 20%
Permits, Telephone Calls	At Cost	Materials and Supplies	Cost Plus 20%

EQUIPMENT

Charges for equipment rental and PSCI owned equipment costs are listed below.

Outside Equipment Rentals	Cost Plus 20%	PSCI SRI GC	TPH-HCID	\$10.00/sample
PSCI Geo-probe	\$125.00/day	PSCI SRI GC	TPH-D	\$30.00/sample
PSCI Vertical Drilling Equipment	\$75.00/day	PSCI SRI GC	TPH-G	\$30.00/sample
PSCI Hand Auguring Equipment	\$25.00/day	PSCI SRI GC	TPH-O	\$30.00/sample

Charges associated with equipment purchased for a specific project site will be at cost plus 2% with PSCI retaining ownership of the item at the project completion.

BILLING

Invoices will be submitted once per month and are payable upon request unless otherwise agreed. Interest of 1½% per month (but not exceeding the maximum rate allowable by law) will be added to any account not paid within 30 days. It is agreed that the client shall pay attorney's fees or other costs incurred in collecting any delinquent amounts. Our hourly rates do not include a sales tax and these will be added if they become applicable in any jurisdiction.

RIGHT OF ENTRY/CLIENT FURNISHED INFORMATION

Unless otherwise agreed, we will be furnished right-of-entry on the land to make planned borings, observations, and other explorations. We will take reasonable precautions to minimize damage from use of equipment, but have not included in our fee the cost for restoration of damage which may result from our operations. If the Client desires us to restore the property to the former condition, we can accomplish this and add the cost to our fee. The Client is responsible to provide, by map or drawing, a description of the property, its location and the location of any buried utilities or structures. We shall not be liable for damage or injury arising from damage to subterranean structures (pipes, tanks, telephone lines, etc.) which are not called to our attention and correctly shown on the plans furnished by the Client in connection with work performed under this agreement.

SAMPLE RETENTION

All samples of soil or water taken from the site will be discarded 30 days after submission of our report unless the Client advises us otherwise. PSCI retains the right to return hazardous/dangerous waste samples to the Client.

OWNERSHIP OF DOCUMENTS

All designs, drawings, specifications, notes, data, sample materials, report reproducible and other work developed by us are instruments of service and as such remain the property of PSCI. The Client agrees that all reports and other work furnished to the

BOTHELL, WA 98011-3709

T: 800-460-2694
P: 425-488-6727
F: 425-486-6936

PSCI
EARTH SERVICES

Client or his agents and assigns, which is not paid for, will be returned upon demand and will not be used for any purposes whatsoever. PSCI will retain all pertinent summaries and reports relating to the services performed for a period of at least five years following submission of the report, during which period the records will be made available to the Client at all reasonable times. PSCI reserves the right at any time to discard field notes, laboratory test sheets, calculation sheets, etc., which are included or summarized in said report.

GENERAL LIABILITY INSURANCE

PSCI maintains General Liability Insurance for bodily injury and property damage with an aggregate limit of at least \$500,000 per occurrence and we will furnish certificates of such insurance upon request. In the event the Client desires additional coverage of this type, we will upon the Client's written request, obtain additional insurance (if possible) at the Client's expense. Our liability to the Client for bodily injury or property damage arising out of work performed for the Client for which legal liability may be found to rest upon us, other than the professional errors and omissions, will be limited to our General Liability Insurance coverage.

LIMITATIONS OF PROFESSIONAL LIABILITY

Our findings, recommendations, specifications or professional opinions will be presented, within the limits prescribed by the Client, after being prepared in accordance with generally accepted environmental practices. We make no other warranty, either expressed or implied. For any injury or loss on account of any error, omission or other professional negligence, the Client agrees to limit PSCI and/or its professional employees' liability to the Client and to all agents, contractors, and subcontractors arising out of the performance of our professional services, such that the total aggregate liability to all those named shall not exceed \$50,000 or our fee, whichever is greater. In the event the Client does not wish to limit our professional liability to this sum, we will waive this limitation upon the Client's written request made at the time of the initial authorization, on a given project, provided that the Client agrees to pay for the waiver an additional 5% of our total fee or \$500, whichever is greater. However, the client agrees that our maximum liability will be limited to our Professional Liability Insurance coverage. In the event the Client makes a claim against PSCI and /or its professional employees, at law or otherwise, for any alleged error, omission or other act arising out of the performance of our professional services, and the Client fails to prove such claim or prevail in an adversary proceeding, the Client shall pay all costs incurred by PSCI and/or its professional staff in defending itself against the claim.

HAZARDOUS/DANGEROUS WASTE

For services involving or relating to any hazardous or dangerous waste elements of this Agreement it is further agreed that the Client shall indemnify and hold harmless PSCI and their consultants, agents and employees from and against all claims, damages, losses and expenses, direct and indirect, or consequential damages, including but not limited to fees and charges of attorneys and court and arbitration costs, arising out of or resulting from the performance of the work by PSCI or claims against PSCI arising from the work of others, related to hazardous or dangerous waste.

The above indemnification provision extends to claims against PSCI which arise out of, are related to, or are based upon the dispersal, escape, release or saturation of smoke, vapors, soot, fumes, acids, alkalis, toxic chemicals, liquids, gasses or any other material, irritant, contaminant or pollutant in or into the surface or subsurface (a) soil, (b) water of water-courses, (c) objects, or (d) any tangible or intangible matter, whether sudden or not. In the event that unanticipated conditions are identified in the field during work associated with this agreement, we will request instructions from the Client as soon as possible.

BID PROPOSAL

PROJECT: Inground Decommission of (1) 500 to 1000 Gallon Heating Oil Tank @ 739 9th Ave N.

Includes the following :

- (1) Permits.
- (2) Saw cutting the existing pavement and exposing the top the UST.
- (3) Pumping residual fluids and triple rinsing the UST. (Fuel will be disposed of @ no charge
H2O will be disposed of @ .70 per/gal.)
- (4) Inerting the UST and cutting access hole.
- (5) Back fill & compact all excavations.
- (6) Filling the UST with CDF, cutting and capping all vent, filler, and distribution lines, and restoring
the pavement surface.
- (7) Lawful off-site disposal of debris generated during the closure operation.
- (8) Soil will be reused and compacted if not contaminated.

Ultra Tank Services, Inc will complete the above mentioned Project for \$ 2918.00 plus W.S.S.T.
Terms 30% Down to start project, Balance Due Upon Completion.

This figure does not include the following :

- (1) Water disposal @ .70 per/gal.
- (2) Excavated soil if contaminated will be disposed of @ \$ 29.90 per/ton plus trucking
\$ 70.00 per/hr.

Equipment and time frame :

- (1) Job will start and finished in to days.

Equipment:

- (1) Kx 101 Rubber Track hoe.
- (2) Plate compactor.
- (3) Concrete cutting saw.
- (4) Demo saw.
- (5) Flat bed truck.

**QUOTATION:
ULTRA TANK SERVICES, Inc.**

CONTRACTOR'S GUARANTEE:

We guarantee that all materials used on this job as specified above and that the entire job will be done in a neat workmanlike manner. Any variations from plan or alterations requiring extra labor and materials will be performed and billed in addition to the sum covered by this quote. Should rock, excessive water, sloughing, underground obstructions, or contaminated soil be encountered, Owner will be notified and job will proceed at time and material basis.

NOTICE TO CUSTOMER:

This contractor is registered with the State of Washington I.F.C.I. No's 1060046-26 & A.S.I. No. 32003819 as a Licensed decommissioning contractor for Ultra Tank Services, Inc. Contractors License No. ULTRATS033CK.

George Willett of UTS Inc
SIGNATURE OF ULTRA TANK SERVICES, INC REPRESENTATIVE.

DATE : 9-8-99

ACCEPTANCE OF PROPOSAL

The above prices, specifications, and conditions are satisfactory and are hereby accepted. You are authorized to supply the equipment and/or labor as specified. Payment will be made as outlined above. I understand that my acceptance of the quotation does not constitute an order until credit has been approved. I understand that Ultra Tank Services, Inc may file a Right to Lien against this equipment/labor.

(Print or type name of person authorized to sign acceptance of proposal.)

Mr. F. Bartow Fite III
In care of Terra Associates, Inc.
12525 Willows Road #101
Kirkland, WA

September 2, 1999

Dear Mr. Fite,

Thank you for considering WT Services Company for your tank decommissioning project. If selected, we will commence your project within 2 weeks of notification to proceed, and we will complete the work within three weeks after beginning. Impact to the tenant will be minimized. Time on site would be as follows: 1st day - Pump/vac truck to pump and rinse, approximately one hour. 2nd day- concrete pump and truck to fill tank, meet with fire marshal, approx. 4 hours. The fill pipe would be plugged at the surface, vent pipe plugged at ground surface and remainder removed, and fuel line capped where it comes in to the building.

We would notify you in advance which days we would be on site. Thanks again for your consideration. If you have any questions, please call.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan A. Wright".

September 2, 1999

Alternative Proposal:

WT Services Company proposes to complete the work described on this contract in an efficient manner with quality products and in accordance with generally accepted practices.

Site: 739 9th Ave N.

Decommission 1000 gallon tank in-place with fill.

1. Obtain city permit
2. Pump and rinse -(water charged at \$0.72 per gallon)

(Prices assume tank contains no gasoline, chlorinated solvents or hazardous materials)

3. Fill tank with CDF and plug fill.

Base bid price \$1800.00 plus tax

- Notes: - Tanks larger than 1000 gallons charged at \$1.35 per gallon
- If utilities must be repaired or replaced in order to decommission the tank, extra charges for crew time and materials may be required.

Notice to Customer: This contractor is registered with the State of Washington, Registration No. WTSERCI110CL, as a general contractor and has posted a bond of \$ 88,000 for the purpose of satisfying claims for negligent or improper work or a breach of contract. This bond may not be enough to cover a claim which might arise from the work done under your contract. If any supplier of materials used in your project or if any employee is not paid by a contractor on your job, your property may be liened to force payment. You may request "lien release" documents from the contractor. Additional information is available from the Department of Labor and Industries.

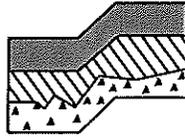

Acceptance

The above proposal is accepted and the work described is authorized. I agree to pay the amount shown on completion of the work. I understand that court costs, attorney's fees and late charges will be added if legal action is required to collect on this contract.

Signature: _____ Date: _____

For scheduling of this work, please sign and return a copy of this proposal.

Subject: Level I Environmental Assessment
739 - 9th Avenue North
Seattle, Washington

Dear Mr. Fite:

We conducted a Level I Environmental Assessment for the 739 - 9th Avenue North site located in Seattle. The purpose of our study was to provide our opinion on the probable presence or absence of site contamination by hazardous materials for your use in obtaining an appraisal of the property.

The site is occupied by an existing single-story commercial building. Based on our experience in this part of Seattle and review of historical materials, the site and vicinity have been developed with commercial and light industrial buildings since the initial development of Seattle.

There are potential off-site sources of contamination in the site vicinity. Due to distances and the local geohydrologic environment, the likelihood of significant contamination from these off-site sources is high.

Based on the information we reviewed for our study and our experience in this neighborhood, it is our opinion that past light industrial land use and unresolved contamination issues on neighboring properties exist that require soil and/or groundwater sampling to complete an assessment of the site. It is our opinion that the potential for site contamination due to past site uses or off-site sources is high.

The attached report discusses our study and findings in more detail. We trust the information presented is sufficient for your current needs. If you have any questions or require additional information, please call.

Sincerely yours,
TERRA ASSOCIATES, INC.

Charles R. Lie
Associate

Level I Environmental Assessment 739 - 9th Avenue North Seattle, Washington

1.0 EXECUTIVE SUMMARY

The results of our Level I Environmental Assessment of the 739 - 9th Avenue North site indicate that there is a high potential for environmental issues or impairment of the property.

Our review of the site and neighborhood history indicates that the area has been used for light industrial and commercial purposes since the initial development of Seattle. There are two upgradient properties with reported releases of hydrocarbons and chlorinated solvents that have not been fully documented and resolved. The site has had several past uses that included the potential for releases of solvents and hydrocarbons.

In addition, an unused heating oil underground storage tank (UST) was found during our study.

Our review of government databases indicates that there are sources of potential contamination within a one-mile radius of the site. Several of these potential contamination sites are immediately adjacent to the subject site. Based on geohydrologic conditions, previous environmental assessments, and the nature of the off-site sources, on-site impacts are expected.

This report was prepared to assist in the appraisal of the property for estate planning purposes.

2.0 SCOPE OF WORK

Our scope of work on this project included the following tasks:

- Review of a report compiled by Environmental Data Resources, Inc. (EDR), dated May 18, 1999, which consists of the following databases:

National Priorities List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Facility Index System (FINDS); Hazardous Materials Information Reporting System (HMIRS); Material Licensing Tracking System (MLTS); Resource Conservation Recovery Act Information System (RCRIS); RCRA Administration Action Tracking System (RAATS); PCB Activity Database System (PADS); Toxic Chemical Release Inventory System (TRIS); Federal Superfund Liens (NPL Liens); Corrective Action Report (CORRACTS); Records of Decisions Report (ROD); Superfund Consent Decrees (CONSENT); CERCLIS sites designated as No Further Remedial Action Planned (CERC-NFRAP); and Toxic Substance Control Act (TSCA) by the Environmental Protection Agency (EPA)

Confirmed and Suspected Contaminated Sites List (CSCSL); Leaking Underground Storage Tank (LUST) list; Solid Waste Facilities Handbook (State LF); Independent cleanup Reports (ICR) and Underground Storage Tank (UST) list by the Washington State Department of Ecology (Ecology)

Former Manufactured Gas (Coal Gas) Sites by Real Property Scan, Inc.

- Review of a 100-year chain-of-title
- Site reconnaissance to visually observe existing conditions
- Review of historic tax information available at the Washington State Archives
- Review of available historical Sanborn Fire Insurance Atlases for the site vicinity
- Review of historic City Directories at the Washington State Archives
- Review of historical aerial photographs of the area
- Review of published maps and geological information for the site vicinity
- Review of building department records for the site
- An interview with Mr. F. Bartow Fite III, the current property owner
- An interview with Mr. Dave Konkle of Maaco, the current property tenant
- Review of underground storage tank (UST) closure information provided by Ultra Tanks Services
- Review of previous studies available at the Washington State Department of Ecology and in Mr. Fite's files

We performed the research for this project and report in general accordance with American Society for Testing and Materials (ASTM) Designation E-1527-97: *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Throughout this report, we refer to the section number and the applicable ASTM standard for various aspects of the assessment being addressed.

3.0 SITE CONDITIONS

3.1 General

The site has an area of approximately 22,270 square feet and is located at 739 - 9th Avenue North in Seattle, Washington. The approximate location of the property is shown on Figure 1. Land use in the surrounding area is characterized by light industrial, retail, and commercial development. The site is located along the toe of Queen Anne Hill, one block away from the current shore of Lake Union.

Figure 2 shows the topography in the vicinity of the site. The site layout and the adjacent properties are depicted on Figure 3.

3.2 Surface

On July 23, 1999, a geologist from our office visited the site to look for evidence of past or ongoing contamination from hazardous materials.

The project site is developed with a single-story commercial building. Maaco uses the building for auto painting, collision repairs, and bodywork. A small parking area extends along the northeastern portion of the site. A fenced car storage area is located in the southwestern portion of the site. The building layout is shown on Figure 4.

The building is separated into three distinct areas, the office, the body shop, and the main paint shop. The body shop has a booth for application of primer. The paint shop has a booth where paint is applied and then baked on. An enclosed space in the paint shop contains the paints and thinners used in the process. A lean-to structure is attached to the south wall of the body shop that covers the storage area and the air compressor.

The only floor drain noted in the building was in the northwest corner of the body shop. This floor drain is reportedly connected to the oil water separator, which is located in the rear car storage area of the site.

3.3 Adjacent Development

The site is bordered by commercial properties in all directions. A single-story building is present immediately south of the site. A two-story office/commercial building is located immediately north of the site. West of the site, across an alley, is a broad parking area and a two-story commercial building. Further west, upgradient from the site, are additional commercial/light industrial buildings. East of the site, across 9th Avenue North, is a single-story commercial/retail building. Lake Union is located approximately one block east of the site.

Figure 3 shows the subject site and surrounding properties.

3.4 Geologic Conditions

Our experience in the neighborhood indicates that the site is underlain by loose fills and lacustrine soils. The fills were placed earlier this century and towards the end of the previous century. The fills are variable in nature and locally contain rubbish and/or wood debris from sawmills that existed adjacent to the site. Subsurface explorations have been performed on adjacent parcels, as discussed in Section 7.0 of this report. These off-site explorations encountered a mixture of sands and silts that comprise the fill materials. Within the fills, the off-site explorations encountered varying amounts of rubbish consisting of building materials, glass, and cinders.

3.5 Hydrogeologic Conditions

For the purpose of this study, it is reasonable to assume that near-surface groundwater gradients are strongly controlled by topography and/or surface features. Generally, in the upland area west of the site, the gradient will be towards the east. In the neighborhood southeast of the site, the gradient will be towards the north. This pattern of groundwater gradients converges radially to Lake Union. Our review of available environmental assessments for adjacent properties supports this conclusion. No site-specific hydrogeologic measurements have been made during this study.

A monitoring well is present adjacent to the southeast corner of the on-site building. Measurements in 1988 showed the depth to groundwater to be on the order of 14 feet below the elevation of the sidewalk.

In the urban environment, the near-surface groundwater flows are highly affected by utility trenches that provide preferential migration routes for groundwater and groundwater-born contamination. Thus, local variations in groundwater flow may occur.

4.0 SITE HISTORY RESEARCH

4.1 Aerial Photography Review

We reviewed aerial photographs of the site and vicinity at Walker and Associates in Seattle, Washington. Three representative aerial photographs are shown in Appendix B of this report. Our review of available photographs indicates the following activity on the site:

- 1936: The property north of the site is vacant. The car storage lot west of the site has two small buildings present. A small building is present in the southwest corner of the site. The original building is also present on the site.
- 1946: The site and vicinity resemble the existing mix of buildings.
- 1956: The site and vicinity resemble the existing mix of buildings.
- 1960: The site and vicinity resemble the existing mix of buildings.
- 1969: The site and vicinity resemble the existing mix of buildings.
- 1974: The site and vicinity resemble the existing mix of buildings.
- 1980: The site and vicinity resemble the existing mix of buildings.
- 1985: The site and vicinity resemble the existing mix of buildings.
- 1990: The site and vicinity resemble the existing mix of buildings. The rear parking area of the site is full of parked cars.
- 1995: A new building is present along the north side of Aloha Street, north of the site.

Nothing in the aerial photographs contradicted information from other sources. The aerial photographs do not show evidence that would suggest the use storage or disposal of hazardous materials, beyond the typical land uses documented in this report.

4.2 Map Review

We reviewed the *United States Geological Survey (USGS) Seattle North and South, Washington Quadrangle Map*, dated 1949, with photograph revisions dated 1968 and 1973. This map shows the site with a color overlay to indicate urban development. Due to the density of development, only larger structures are shown on the map.

In addition, we referred to older maps that depicted the City of Seattle prior to 1900. These maps consist of oblique maps drawn to resemble a birds eye view of Seattle.

The first map is entitled *Birds Eye View of Seattle, Puget Sound, Washington Territory, 1878*, printed by A. L. Bancroft and Company, Lithographers. This map shows no development along Lake Union. There are some scattered residences in a forested area.

The second map is entitled *Birds Eye View of Seattle and Environs, King County, Washington, 1891*, printed by the Hughs Litho Company. This second map shows the site vicinity as being developed with some residences. The map shows two sawmills several blocks east of the site location on Lake Union.

4.3 City Directory Review

We reviewed the City directory collections for the site, which were available at the main branch of the Seattle Public Library for the years spanning from 1940 through 1995. The research sources for this area are past editions of the Polk's City Directories. After 1939, the directories have a section that lists properties by street addresses. Prior directories for earlier years did not have the properties listed by address.

The summary of the City Directory information is presented in Appendix A of this report.

Nothing in the City Directory review contradicted information obtained from other sources.

4.4 Sanborn Map Review

Sanborn maps were created to aid in underwriting fire insurance policies. These maps were updated until the 1960s and typically show the types of buildings and their uses for the areas of coverage.

Our review of Sanborn Maps made available by our subcontractor, Environmental Data Resources (EDR), shows the following history of the site and adjacent properties:

- 1888: The only map provided by EDR is for a sawmill complex centered at the intersection of Mercer and Bismarck (currently Terry Avenue North). This suggests that the site was undeveloped. Early Sanborn Atlas coverage skipped undeveloped properties.
- 1893: The map shows the site as being undeveloped and covered by Lake Union. The area west of the site is developed with scattered residences. The sawmill complex at the intersection of Mercer and Bismarck remains.
- 1905: The map provided by EDR covers the sawmill complex at Mercer and Terry Avenue North (formerly Bismarck).
- 1917: The map shows the site as being divided by Broad Street. No buildings are shown on either the northern or southern side of Broad Street. Broad Street was subsequently vacated. West of the site, the land use is residential. The closest upgradient industrial land use is an electrical substation near the northeast corner of Dexter Avenue and Aloha Street. The next closest industrial property is Rainier Laundry at the northeast corner of Roy Street and 9th Avenue North.
- 1950: The original building is shown on the site. The adjacent Roy Street Shops building is labeled as being occupied by Puget Sound Power and Light. The yard in the northern portion of the site has several outbuildings. The adjacent buildings are present, but the text is not legible.
- 1969: The site is occupied by the existing building complex. The adjacent Roy Street Shops is labeled as being operated by Seattle City Light. The adjacent buildings are present, but the text is not legible.

The original maps were color-coded and the text does not always survive conversion to a black and white document. To obtain additional information, we referred to microfilm copies of the 1950 Sanborn Maps available at the King County Bellevue Regional Library. The 1950 Sanborn map shows the site as being occupied by a Steel Tank Manufacturing and welding company. Two small storage buildings are shown in the southern portion of the site. The original building is present on the northern portion of the site. The parking lot area west of the site has three small buildings shown as being used for storage and a garage. The building to the north is shown as being an auto/truck sales and service company. The building to the south is shown as being the Mack International Motor Truck Company.

Copies of the Sanborn maps are in Appendix B of this report.

4.5 Interview

On July 23, 1999, we conducted an on-site interview with Mr. Dave Konkle, the current tenant. Mr. Konkle told us that he has been associated with the on-site building for approximately nine years.

Mr. Konkle told us that, to the best of his knowledge, there were no underground storage tanks (USTs) on the site. Maaco, the current tenant, is a small quantity generator (SQG). The Dangerous Waste Annual Report for 1998 shows that five 55-gallon drums of waste were removed from the site. Mr. Konkle reported that the site waste consists of used paint thinner. The paint thinner is recycled off-site by Envirotech. Mr. Konkle reported that he purchased a still to allow him to recycle the paint thinner on-site in the future. Appendix C contains a copy of his 1998 annual report and a database summary for the site obtained from Ecology. Mr. Konkle told us that he has not used chlorinated (halogenated) solvents in his tenant space.

Maaco is reported to have 14 employees. The business does collision repairs, bodywork, and auto painting. No engine work is reported to occur on the site. Maaco is reported to have been a tenant for seven years.

Mr. Konkle reported that Maaco does not discharge wastes to the sewer and, hence, has no sewer discharge permits. The Seattle Fire Department is reported to have made up to six site visits per year during initial operation of the facility. Mr. Konkle reports that the inspection schedule is now twice per year. Mr. Konkle reported that he received no violation notices during the fire department visits. A small enclosed space inside the painting area of the building holds the flammable liquids and paints. We did not observe any floor drain in the paint storage locker.

Maaco has a permit from the Puget Sound Air Pollution Control Authority for venting the paint boots. The permit number is 10616.

One floor drain was reported to be present by Mr. Konkle. This floor drain is in the northwest corner of the building and is connected to the oil water separator in the western car storage area of the property.

4.6 Chain-of-Title Review

We reviewed 100-year chain-of-title documents provided to us by Pacific Northwest Title Company. We did not note any parties commonly associated with the use, storage, or disposal of hazardous wastes in these documents. This information is consistent with the other historical research we performed. A summary of the chain-of-title documents we received is attached as Appendix D.

4.7 City of Seattle Records Review

We visited the archives of the Seattle City Department of Construction and Land Use (DCLU) to review archived building permits for this site. It is our experience that the archives at the DCLU are incomplete for even new buildings. For older buildings, many of the plans are well faded prior to the micro film process. Hence, a complete overview of an older building is not always possible using this source.

Our review shows that the original building was built in 1924 as a garage for Mr. Lucius E. Marple. The plans show a wash rack in the northwest corner of the building. The notes on the plan indicate that the building is pile supported.

The next plans in the files are from 1945 and are for remodeling. In 1947, the file indicates that the building was remodeled by Truck Welding Company Incorporated. Plans dated February 2, 1955, show the Body Vehicle Shop. The permit shows that the building measured 56 by 1125 feet, and was to be used as a truck body factory. The plans have a notation that the building was to be used as a new body building shop, and that no repair of engines or garage use would occur. The author of these additional notes is not mentioned on the plans.

There were subsequent permits in the available files for the maintenance of signs, electrical, gas boiler, and the installation of gas heaters. None of the plans showed the existence or construction/installation of any underground storage tanks. Nothing in the building department archives contradicted information obtained from other sources.

The City of Seattle Sewer records show that the building was initially hooked up to the sewer on September 6, 1924. The records also show activity in 1948 and 1978. The building owner in 1924 was listed as the Stewart Construction Company. The owner in 1948, 1955, and 1978 was listed as Truck Welding Company. The sewer as-built plans show the catch basin and oil water separator in the western parking area. However, they do not show the pipe that reportedly connects the interior floor drain to the sewer. The 1924 records show the original building as 737 - 9th Avenue North. Subsequent entries are for 739 - 9th Avenue North.

The sewer records show the adjacent building to the south as having an address range of 721-701 - 9th Avenue North. The sewer as-built shows the building to be the Mack Truck Company.

The adjacent building to the north, 903 Aloha Street, has its first entry in 1948 and the owner is listed as the Hyster Company.

5.0 REGULATORY DOCUMENT REVIEW

We reviewed reports and agency documents to analyze reporting facilities situated within a selected radius of the subject site. Facilities situated within the selected radii of the site are listed in Appendix E.

5.1 EDR Search

We reviewed a report dated May 18, 1999, compiled for the subject property by our subcontractor, EDR. EDR searches EPA and Ecology databases for potential risk sites within a specified radius of a subject property. EDR conducted its search to the minimum search radius requirements given in ASTM Designation E-1527-97-7.2.1.1: *Standard Practice for Environmental Site Assessments*.

The following databases were searched by EDR in compiling their report:

Searched to One Mile:

- National Priorities List (NPL) by EPA, dated May 10, 1999
- Confirmed and Suspected Contaminated Sites List (CSCSL) by Washington State Department of Ecology, dated November 23, 1998
- Corrective Action Report (CORRACTS) by EPA, dated March 1, 1999
- Records Of Decision (ROD) by NTIS, dated January 31, 1999
- Superfund (CERCLA) Consent Decrees (CONSENT) by EPA, no date listed
- State Hazardous Sites List (HSL) by Ecology, dated February 18, 1999

Searched to One-Half Mile:

- Resource Conservation Recovery Act Information System facilities that treat, store, and/or dispose of hazardous waste (RCRIS-TSD) by EPA, dated April 26, 1999
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) by EPA, dated April 21, 1999
- Leaking Underground Storage Tank (LUST) list by Ecology, dated January 14, 1999
- Municipal Solid Waste Facilities (State LF) by Ecology, dated July 1, 1998
- Independent Cleanup Reports (WA ICR) by Ecology, dated February 19, 1999

Searched to One-Fourth Mile:

- Underground Storage Tank (UST) list by Ecology, dated March 5, 1999
- Resource Conservation Recovery Act Information System (RCRIS)-LgGen Large Generators by EPA, dated April 26, 1999
- Resource Conservation Recovery Act Information System (RCRIS)-SmGen Small Generators by EPA, dated April 26, 1999
- Emergency Response Notification System (ERNS) by EPA, dated December 31, 1998

Searched to Target Property:

- Facility Index System (FINDS) by EPA, dated April 1, 1999
- No Further Remedial Action Planned (NFRAP) by EPA, dated April 21, 1999
- PCB Activity Database System (PADS) by EPA, dated September 22, 1997
- Hazardous Materials Information Reporting System (HMIRS) by U.S. Department of Transportation, dated December 31, 1997
- RCRA Administration Action Tracking System (RAATS) by EPA, dated April 17, 1995
- Toxic Chemical Release Inventory System (TRIS) by EPA, dated December 31, 1997
- Federal Superfund Liens (NPL Liens) by EPA, dated October 15, 1991
- Toxic Substances Control Act (TSCA) by EPA, dated December 31, 1994
- Washington Emissions Data System (Air Emissions) by Ecology, dated December 31, 1996
- Material Licensing Tracking System (MLTS) by NRC, dated December 8, 1998
- Delisted NPL by EPA, dated April 23, 1999

We evaluate relative elevations and locations of listed sites based on our visual site reconnaissance and review of relevant topographic and geologic maps. The subject site did not appear in any of the databases reviewed for this report.

The EDR search found 183 sites of record. Some of these sites appear on multiple databases. In addition, 30 orphan entries were identified in the EDR search. Orphan entries are properties with insufficient detail to map in the EDR computer database system. We review orphan sites on a site by site basis.

5.1.1 *Underground Storage Tank (UST) Sites*

Section 7.2.1.1 of the ASTM Standards requires a review of State UST lists for underground storage tanks listed on the subject site or adjoining properties. EDR conducted a records search for listed UST sites within a one-fourth mile radius of the subject site. This search distance exceeds ASTM recommendations. Fourteen UST sites appeared in the EDR search within a one-fourth mile radius of the 739 - 9th Avenue North site. The UST sites closest to the property are:

- Bayside Volvo, 753 - 9th Avenue North, immediately north and crossgradient of the subject site. Three USTs are reported to have been closed in place at this site. One UST was used for the storage of gasoline, one was used for the storage of used oil, and the contents of the third are not described in the database. This site is also discussed in Sections 5.1.2 and 7.0 of this report.

- Frank Kenny Toyota-Volvo, 731 Westlake Avenue North, immediately east, across 9th Avenue North, and downgradient of the subject site. At the Kenny site, three USTs are reported to have been removed. Two USTs were for the storage of gasoline, and one UST was for the storage of used oil. This site is also discussed in Section 5.1.3 of this report.
- Roy Street Shops, 802 Roy Street, immediately west and upgradient of the subject site. At the Roy Street Shops, one UST is reported to have been closed in place. This UST was reported to have been used for the storage of gasoline. This site is also discussed in Sections 5.1.2 and 7.0 of this report.
- Puget Sound Energy, 815 Mercer Street, two blocks south and crossgradient of the subject site. This site is also on the LUST list and is discussed in Section 5.1.2 of this report. USTs are reported to have been removed from this site. The USTs were for the storage of oil and gasoline.
- Tosco No. 255353-30857, 600 Mercer Street, two blocks southeast and crossgradient of the subject site. This site is also on the LUST list and is discussed in Section 5.1.2 of this report. At this site, there are five operational USTs. Four are for the storage of gasoline and one is for the storage of used oil. This site is an operating gasoline station.
- Maryatt Industries, 771 Valley Street, one block west-northwest and upgradient of the subject site. This site is also discussed in Sections 5.1.2, 5.1.7, and 7.0 of this report. At this site, four gasoline USTs are reported to have been removed. In addition, three heating fuel USTs are listed without a specific status. One exempt UST is listed without details.
- Seattle School District, 810 Dexter Avenue North, one block west-northwest and upgradient of the subject site. Two gasoline USTs are reported to have been removed from this site. This site is also on the LUST list and is discussed in Section 5.1.2 of this report. Two gasoline USTs are reported to have been removed from this site.
- Jarvie Paint, 760 Aloha Street, one-half block northwest and potentially upgradient of the subject site. This site is also discussed in Sections 5.1.7 and 7.0 of this report. Six USTs for the storage of hazardous substances are reported to have been removed from this site.

Based on our review of existing information, the sites at 753 - 9th Avenue North, 802 Roy Street, and 771 Valley Street appear to present a significant threat to the site for migration of spilled hydrocarbons to the subject property.

5.1.2 Leaking Underground Storage Tank (LUST) Sites

Section 7.2.1.1 of the ASTM Standards requires a review of State LUST lists for possible contaminated sites within a one-half mile radius of the subject property. EDR conducted a records search for listed LUST sites within a one-half mile radius of the subject site.

Thirty-seven LUST sites appeared on the EDR search within a one-half mile radius of the 739 - 9th Avenue North site. The LUST sites closest to the property are:

- Roy Street Shops, 802 Roy Street, immediately west and upgradient of the subject site. At this site, one UST is reported to have been closed in place. This UST is reported to have been used for the storage of gasoline. This site is also discussed in Sections 5.1.1, 5.1.3, and 7.0 of this report. Cleanup of this site is in progress.
- Aloha 800 - 900 Aloha and 753 - 9th Avenue North, immediately north of the subject site. The affected media are listed as soil and groundwater. Cleanup is reported to have started at this site. The 753 - 9th Avenue North site is discussed in Sections 5.1.1 and 7.0 of this report.
- City of Seattle, Westlake, 630 Westlake Avenue North, one block southeast of the subject site. The contaminated media at this site are soils and groundwater. Remedial efforts have begun. We reviewed files at Ecology for this site. The groundwater gradient has been measured as being towards the north, placing this site crossgradient from the subject site.
- Puget Sound Energy, 815 Mercer Street, two blocks south and crossgradient of the subject site. USTs are reported to have been removed from this site. The USTs were for the storage of oil and gasoline. The affected media at this site is listed as soil. Remedial measures are reported to have begun at this site. This site is also discussed in Section 5.1.1 of this report.
- Tosco No. 255353-30857, 600 Mercer Street, two blocks southeast and crossgradient of the subject site. At this site, there are five operational USTs. Four are for the storage of gasoline and one is for the storage of used oil. This is an operating gasoline station. This is the site of a large spill approximately 20 years ago. Thousands of gallons of gasoline were spilled at this site. Remedial measures have been underway for nearly 20 years. The groundwater gradient has been measured as being towards the north, placing this site crossgradient of the subject site. This site is also discussed in Section 5.1.1 of this report.
- Maryatt Industries, 771 Valley Street, one block west-northwest and upgradient of the subject site. At the Maryatt site, four gasoline USTs are reported to have been removed. In addition, three heating fuel USTs are listed without a specific status. One exempt UST is listed without details. An interim cleanup report for this site has been submitted. This site is also discussed in Sections 5.1.1, 5.1.7, and 7.0 of this report.
- Seattle School District, 810 Dexter Avenue North, one block west-northwest and upgradient of the subject site. Two gasoline USTs are reported to have been removed from this site. The affected media is listed as soil. The site is being reported to have been cleaned up.

- Jarvie Paint, 760 Aloha Street, one-half block northwest and potentially upgradient of the subject site. This site is discussed in Sections 5.1.1 and 5.1.7 of this report. Six USTs for the storage of hazardous substances are reported to have been removed from this site. This LUST site has been remediated and has had a conditional NFA letter written for it.

Based on our review of available information, the Roy Street Shops and the 753 - 9th Avenue North sites pose a significant threat to the site for migration of hydrocarbons.

5.1.3 Resource Conservation Recovery Act Information System (RCRIS) Sites

Facilities reporting under RCRIS have filed paperwork describing their waste management practices.

EDR conducted a records search for listed RCRIS generator sites within a one-fourth mile radius of the subject site. This exceeds the ASTM recommendation for the site and the adjoining properties. Twenty-three RCRIS sites were identified within a one-fourth mile radius of the 739 - 9th Avenue North site. The RCRIS sites closest to the property are:

- Frank Kenney Toyota-Volvo, 715 - 9th Avenue North, immediately south of the subject property. This business is listed as a small quantity generator (SQG). No violations were noted in the database. This business no longer occupies the adjacent building.
- Seattle Motor Sports, 701 - 9th Avenue North, one-half block south of the subject site. This business is listed as a SQG. No violations were noted in the database. This building is now occupied by a restaurant.
- Roy Street Shops, 802 Roy Street, immediately west and upgradient of the subject site. This site is listed as a large quantity generator (LQG). The wastes from this site are listed as ignitable wastes (paint thinner), a reactive waste (caustic parts cleaner), cadmium, chromium, lead, benzene, methyl ethyl ketone, tetrachloroethene, and other halogenated solvents. In 1995, 8553.6 pounds of ignitable wastes were generated. An aggregate of approximately 400 pounds of halogenated water solvents was generated. The lead, chromium and cadmium are likely components of the water solvents or cleaners generated on-site. The database shows no violations for this site. The building is occupied by the City of Seattle.
- Seattle City Mercer Corridor, 965 Valley Street, two blocks east and downgradient of the subject site. This site is listed as a SQG. This site is a vacant service station. No violations were noted in the database.
- PSE Mercer Office, 815 Mercer Street, two blocks south and crossgradient of the subject site. This site is listed as a SQG. In 1995, this site appears to have generated 1443 pounds of used solvent or other ignitable waste and 1575 pounds of tetrachloroethene. No violations were present in the database.

- Pacific Lincoln Mercury Nissan, 601 Westlake Avenue North, one block southeast and downgradient of the subject site. This site is listed as a SQG. No violations were found in the database.
- Maryatt Industries Cintas Corporation, 773 Valley Street, one-half block west and upgradient of the subject site. This site is listed as a SQG. No violations were present in the database.
- Tube Art Displays, 808 Aloha, one-half block north and crossgradient of the subject site. This business no longer occupies that address. This site is listed as a SQG. No violations were listed in the database. This site is currently part of a larger parcel occupied by a new hotel development.

No violations were noted in the records for any of these listed sites. The violations would typically result from paperwork or procedural issues, not contaminant spillage or releases.

5.1.4 Emergency Response Notification System (ERNS) Sites

ASTM requires a search of the ERNS database for the subject site. EDR conducted a records search for listed ERNS entries at the subject site. No ERNS incidents were identified at the 739 - 9th Avenue North site.

5.1.5 Treatment Storage and Disposal (TSD) Sites

Section 7.2.1.1 of the ASTM Standards requires a review of RCRIS TSD lists to a radius of one-half mile and of RCRIS CORRACTS TSD lists to a radius of one mile.

EDR conducted a records search for listed RCRIS TSD sites within a one-half mile radius of the subject site. These are treatment, storage, or disposal sites for hazardous wastes. No TSD sites were listed as being within a one-half mile radius of the 739 - 9th Avenue North site.

EDR conducted a records search for listed CORRACTS sites within a one mile radius of the subject site. CORRACTS sites are TSD facilities that have a Corrective Action Report in their files. No CORRACTS sites were listed as being within a one-mile radius of the 739 - 9th Avenue North site.

5.1.6 Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) Sites

Section 7.2.1.1 of the ASTM Standards requires a review of federal CERCLIS lists to a radius of one-half mile. CERCLIS sites are potential hazardous waste sites that have been reported to governmental agencies pursuant to Section 103 of the Comprehensive Environmental Response Compensation and Liability Act (CERCLA). CERCLIS sites have typically been screened of possible inclusion in the NPL (Superfund) list. EDR conducted a records search for listed CERCLIS sites within a one-half mile radius of the subject site.

No CERCLIS sites were listed as being within a one-half mile radius of the 739 - 9th Avenue North site.

5.1.7 Confirmed and Suspected Contaminated Sites (CSCSL) Report

Section 7.2.1.1 of the ASTM Standards requires a review of State lists of hazardous waste sites (state hazardous waste sites - SHWS in ASTM) identified for investigation or remediation within a one-mile radius of the subject property. EDR conducted a records search for listed CSCSL sites within a one-mile radius of the 739 - 9th Avenue North site, in conformance with ASTM Standards. Seventeen CSCSL sites appeared on the EDR search within a one-mile radius of the 739 - 9th Avenue North site. The CSCSL sites closest to the property are:

- Maryatt Industries, 771 Valley Street, one block west-northwest and upgradient of the subject site. At this site, there is confirmed contamination of the groundwater with halogenated organic compounds, petroleum products, and solvents. Some remedial actions have taken place, and an interim cleanup report has been filed with Ecology.
- Auto Service Company, 630 Westlake Avenue North, south-southeast and downgradient of the subject site. At this site, there is suspected contamination with metals, petroleum products, and non-halogenated solvents. Interim cleanup reports have been submitted to Ecology for this site. The groundwater gradient of the site is towards the north.
- Jarvie Paint, 760 Aloha Street, one-half block northwest and potentially upgradient of the subject site. This site has had remedial work performed over the past several years and has received a conditional No Further Action determination (NFA). Additional monitoring of the groundwater is required by Ecology to demonstrate closure of this facility.
- Yellow Cab, 912 Dexter Avenue north, one block northwest and potentially upgradient of the subject site. This site has had remedial work done. A final cleanup report was submitted to Ecology in December of 1998.

Based on the distance and status of the listed CSCSL sites, and considering the local geohydrologic conditions, it is our opinion that the potential for significant impact on the subject site by these off-site sources is minimal.

5.1.8 Independent Cleanup Reports (ICR)

The ICR database tracks independent cleanup reports received by the Washington State Department of Ecology. These reports typically consist of interim cleanup reports, groundwater monitoring reports, and final cleanup reports. These reports are for sites that are typically listed as LUST or CSCSL sites. We list the individual ICR sites in their respective category based on the description in the database summary. No ICR sites were noted that were either LUST or CSCSL sites.

5.2 Superfund Sites

Section 7.2.1.1 of the ASTM Standards requires a review of Federal and State lists of hazardous waste sites identified as National Priority Listings (NPL or Superfund sites) within a one-mile radius of the subject property. EDR's review of the National Priority List indicates that there are no Superfund sites within a one-mile radius of the 739 - 9th Avenue North site.

5.3 Landfills

Section 7.2.1.1 of the ASTM Standards requires a review of State lists identifying landfill and solid waste disposal facilities within a one-half mile radius of the subject property. In Washington, landfill coordination is delegated to the individual counties. No active or abandoned landfills are reported to be located within a one-half mile radius of the 739 - 9th Avenue North site.

6.0 OTHER HAZARDS

6.1 PCBs and Transformers

PCBs are associated with electrical transformer fluids and older fluorescent light ballasts. The transformers that are present on poles adjacent to the site are the property of the City of Seattle. Any spillage from the transformers is the responsibility of the City of Seattle City Light. No transformers are on record as being on the site. We did not observe any transformer facilities on the site.

Given the age of the building, it is possible that older fluorescent light fixtures may be present. These older fixtures should be disposed of in accordance with appropriate laws.

6.2 Asbestos

Asbestos is a fibrous mineral that was incorporated into a wide variety of construction materials prior to 1979. Asbestos containing materials (ACMs) are typically found in a variety of building materials including insulating pipe wrap, wallboard, acoustical ceiling texturing, exterior siding, textured wall and ceiling materials, roofing materials, vinyl flooring, and pipe lagging. Given the age of the building, ACMs should be expected to be present. ACMs should be managed in accordance with appropriate regulations.

6.3 Radon

Our local experience and review of published Radon information indicate that King County is a low radon risk area. We do not believe that radon is a potential problem on this site. If requested, we can verify on-site radon levels by testing.

6.4 On-Site Tanks

We observed one UST location at the subject site. This UST was found to contain approximately 500 gallons of fluid. At the time the UST was found, no filler cap was present. The UST was closed in place by your subcontractor, Ultra Tank Services. Our review of the closure procedure indicates that the UST was closed in accordance with the applicable regulations.

The UST is estimated to have had a capacity of approximately 900 gallons. Due to the size of the UST and its use to store heating oil for on-site use, it was exempt from state and federal UST regulations requiring registration, financial responsibility, and other requirements.

On August 9, 1999, we obtained a sample of the fluids from the UST. The UST contained approximately 250 gallons of fuel and 250 gallons of water. Analysis of the fuel found it to be diesel number 2. This is the same range of hydrocarbons that is found in heating oil. The analysis of the water and the fuel found no detectable halogens or other hydrocarbons.

No other evidence of on-site USTs was noted in our site reconnaissance or review of historic records for the site.

6.5 On-Site Wells

The site is served by municipal water. No water supply wells are known or suspected to exist on the site. One monitoring well, installed in 1989 as part of the Hart Crowser study (1989), is located immediately adjacent to the southeast corner of the site. Additional monitoring wells are located in Aloha Street, several hundred feet north of the site. We did not open any of the monitoring wells. The conditions of the monitoring wells at this time are unknown.

6.6 Other Environmental Concerns

The subject site is not located in an area where concerns about documented effects of aerial fallout from off-site industries have occurred. The EDR report indicates that one Coal Gas site was found in their review of the records. This Coal Gas site is reported to have been present at 815 Mercer Street. This places the possible Coal Gas site in a crossgradient location of the project site. We have not seen any assessments of the former Coal Gas site.

As discussed in Section 7.0 of this report, the existing data suggests that the subject site may be located in a plume of chlorinated solvent contamination that is one to two blocks in size. The source of the contamination has not been clearly defined in the existing assessments. There may be multiple sources.

6.7 Imported Fills

The site is expected to be underlain by up to 15 feet of imported fills. Explorations on adjacent parcels have indicated that the fills contain a varying amount of rubbish, consisting of building debris, cinders, and glass. None of the reports for the adjacent parcels suggest that remedial action driven by the rubbish was required. However, in any area of historic uncontrolled fills, there is a risk that some materials may be encountered that could require remedial action. Site-specific characterization of soils will be required to determine the actual nature of the on-site soils.

7.0 PRIOR SITE ASSESSMENTS FOR ADJACENT PARCELS

We were provided with three reports for the three adjacent parcels. In addition, we reviewed available information at Ecology to determine if additional information was available in the public domain. No updated reports were found for the three reports discussed below.

Bayside Volvo at 753 - 9th Avenue North, adjacent and north of the subject site:

We were provided with a report entitled *Underground Storage Tank Removal and Supplemental Environmental Studies, Bayside Volvo, 753 - 9th Avenue North, Seattle, Washington*, dated September 15, 1992. This report was prepared by Geotech Consultants and documents the assessment of the soils surrounding three USTs that were removed in 1992. This report is in the files at Ecology.

This report documents existing contamination well above cleanup levels of gasoline and gasoline constituents in the soils. No groundwater testing was done. No testing for solvents or heavier range hydrocarbons is documented in the report. The report concludes that the on-site USTs were in poor condition and that releases had apparently occurred from the USTs. However, the report also concluded that some of the contamination had migrated onto the site from an off-site source. The contamination is reported to be present in the soils from 4 to 14 feet below existing grades. The assessment did not include any monitoring wells or groundwater samples.

There is no indication that the site has undergone further site assessments or that remedial actions have been performed.

Roy Street Facility, 802 Roy Street, adjacent and west of the subject site:

We were provided with a report entitled *Revised Site Characterization Report, Roy Street Facility*, dated February 1995. This report was prepared by ReTec and details the assessment and interim remedial measures undertaken at the Seattle Department of Parks and Recreation facility immediately west and upgradient of the subject site. This report also summarizes earlier site assessment activities by another firm.

This report describes the drilling of a series of new monitoring wells and the removal of approximately 6,000 tons of soils contaminated with hydrocarbons. The report discusses that additional contamination is present along the top of the static water table extending beyond the remedial excavation.

This report contains measurements of the static groundwater, including the gradient for groundwater flow. The groundwater flow is consistently east-northeast, towards the subject site. The report concludes that additional contaminated soils are present and that significant groundwater contamination is present. The report further concludes that the levels of gasoline groundwater contamination did not decrease during the monitoring period.

This report also contains testing for volatile organic compounds in one of their monitoring wells, Monitoring Well MW-2. This monitoring well is located near the northwest corner of the building at 802 Roy Street. This well has subsequently been abandoned, and no further testing in that area has been done. This test includes halogenated compounds such as trichloroethylene (TCE) and tetrachloroethene (PCE). The results of the testing indicated that significant groundwater contamination with TCE and PCE was present. In addition, degradation products of TCE were present. The levels of the TCE were 1,400 parts per billion (ppb). The levels of PCE were 170 ppb. The cleanup level for both of these compounds is five ppb. The level of vinyl chloride, a degradation product of these two compounds, was 1,100 ppb. The cleanup level for vinyl chloride is 0.2 ppb. No source of the TCE is discussed and no remedial measures for the chlorinated hydrocarbon contamination are presented.

Maryatt Industries, 771 Valley Street, upgradient of the subject site:

We obtained a copy of a 1992 assessment of the Maryatt Industries site from the WDOE. The files at central records for the WDOE had no further assessments of the site conditions. The report, prepared by Dalton Olmsted and Fugelvand, dated December 9, 1992, summarizes the testing of six monitoring wells placed on and adjacent to the Maryatt Industries property. The results of testing indicate that there are elevated levels of gasoline, diesel, and heavy oils in the groundwater. In addition, Monitoring Well MW-6, located at the northwest corner of 8th Avenue and Roy Street, had 4,500 ppb of PCE (4.5 parts per million), 920 ppb of TCE, and 240 ppb of vinyl chloride. The source of the contamination is reported in the assessment to be prior land uses. A gasoline station and a dry cleaner reportedly occupied the site prior to Maryatt Industries. We have not confirmed the conclusion in the report. A copy of this summary report is attached in Appendix F of this report.

Frank Kenny Toyota/Volvo, 800 - 9th Avenue North, adjacent and south of the subject site:

We were provided with a copy of a report entitled *Preliminary Environmental Assessment, Frank Kenney Toyota/Volvo, 800 - 9th Avenue North, Seattle, Washington*, dated December 30, 1988. This report was prepared by Hart Crowser, Inc., and contained some historic information common to contemporary Level I Environmental Assessments and some site sampling common to contemporary Level II Environmental Assessments. The study included five borings to obtain soil samples and one monitoring well. Monitoring Well B-6 was drilled on the subject property as shown on Figure 4.

The results of selective testing of soils from the explorations found some contamination with hydrocarbons. The contamination was reported to be localized. However, the data is not tabulated and most of the borings were shallow and hand excavated. No soil contamination was encountered in Monitoring Well B-6. However, the methodology used in collecting the sample is not consistent with current sample practices. No hydrocarbon contamination with gasoline was detected in the groundwater in Monitoring Well B-6. The depth to the static water level in December of 1988 was approximately 14 feet below existing grade.

The sampling methodology and testing performed for this 1988 study is not consistent with current practices. The test results and conclusions should be viewed as a screening level study only. No testing for volatile organics was done for this prior study.

8.0 SUMMARY

Our review of municipal records, regulatory agency documents, and other information revealed evidence that, in our opinion, would normally indicate storage, use, or disposal of hazardous materials on the property. In addition, significant contamination has been documented on upgradient properties and on adjacent properties.

8.1 Current Site Use

At the time of our study, an existing commercial building occupied the site. Based on the on-site practices that were described to us by the tenant, the potential for significant contamination from current site use is low.

8.2 Historical Site Use

The site has historically been used for light industrial purposes. The primary past use was the fabrication of truck bodies from steel components. Our observations of contemporary steel fabrication shops indicate that some painting is typically performed, even if it is limited to just a primer. Associated with paints are thinners and metal contamination from overspray. In addition, a vehicle repair facility was a former tenant in the past decade. The presence of a floor drain in the work area presents issues regarding possible past disposal of engine fluids or paint thinners into the floor drain. While the floor drain is reported to be connected to the sewer, older sewer lines were typically constructed without gaskets at joints, and leakage from the sewer lines should be expected.

Based on the information we reviewed for this report and our on-site observations, it is our opinion that the potential for significant contamination from past site uses is high.

8.3 Potential Off-Site Sources

Our reconnaissance of the neighboring developments and site vicinity topography indicates there are numerous potential sources of soil and/or groundwater contamination within a one-mile radius of the subject site. Based on our review of previous site assessments for adjacent properties, the proximity to possible off-site sources, the local geohydrologic environment, and the nature of the adjacent properties, it is our opinion that the potential for contamination at the subject site from off-site sources is high.

9.0 CONCLUSIONS

Based on the information we reviewed for this study, there are past incidences or current practices in the neighborhood that require soil and/or groundwater sampling in order to complete a detailed assessment of the site. Based on the information and data we reviewed and documented in this report, it is our opinion that the potential for significant hazardous contamination of the site soils and groundwater that requires site remedial actions is high.

The site has a gross area of approximately 22,200 feet square. Assuming that half of the site is contaminated from a depth of 4 to 14 feet, approximately 4,100 cubic yards of petroleum contaminated soil is present. At a differential of \$47.00 per cubic yard (\$59.00 per cubic yard for PCS disposal minus \$10.00 to \$15.00 dollars per cubic yard for general soils disposal), this results in a cost of approximately \$193,000.00 dollars for soils disposal costs. This cost does not include the cost of supplemental soil testing during remedial excavation to verify that the contaminated soils have been removed. The additional cost of the soils testing will be on the order of \$8,000.00. This cost is based on an assumed cost of \$100.00 dollars per sample for analytical testing, a total of 20 supplemental soil samples, 3 days of field observations, and a brief summary report of the activity.

Remedial Cost Summary
739 - 9th Avenue North

Task	Estimated Costs	Notes
Initial Phase II Assessment	\$16,000.00	No permanent monitoring wells installed
Permanent Monitoring and Well Installation	\$27,000.00	Cost included initial groundwater samples only
PCS Soil Disposal Costs	\$193,000.00	Based on 4,100 cubic yards with differential cost of \$47.00 per cubic yard
Remedial Excavation Monitoring and Confirmation Samples	\$8,000.00	Assumes 3 days of field observation, 20 soil samples and report of remedial excavation testing
Quarterly Sampling for One Year Following Remedial Excavation	\$28,000.00	Assumes that only one year of groundwater monitoring is required
Total Remedial Costs	\$272,000.00	Does not include cost of long-term monitoring or possible legal consultation services

Other potential costs associated with this could be a diminished value due to the contamination issues from off-site sources and possible delays in obtaining permanent financing after remedial excavations have been completed, but the first year of groundwater monitoring has not been completed. Additional groundwater monitoring and groundwater remedial measures may be needed.

Washington State allows a property owner to be held innocent of contamination caused by plumes that clearly originate from off-site sources. This could be a factor if the groundwater beneath the site is contaminated with halogenated compounds such as TCE. However, due to the past use of the property for light industrial purposes, it may be necessary to perform additional site sampling to fully document the sources of chlorinated solvents in the event they are present.

There are cases where Ecology would not allow the use of the innocent neighbor defense since there was a possibility of past solvent use based on documented site history. If an area-wide plume of halogenated compounds contamination is present, it would require remedial systems to be placed throughout the neighborhood to effect a cleanup. This would require all of the adjacent affected property owners to provide a pro rata share of cleanup costs. This cooperation of adjacent property owners may be difficult to accomplish. Thus, ongoing monitoring over a prolonged period of time may be necessary if halogenated compounds are present in the groundwater.

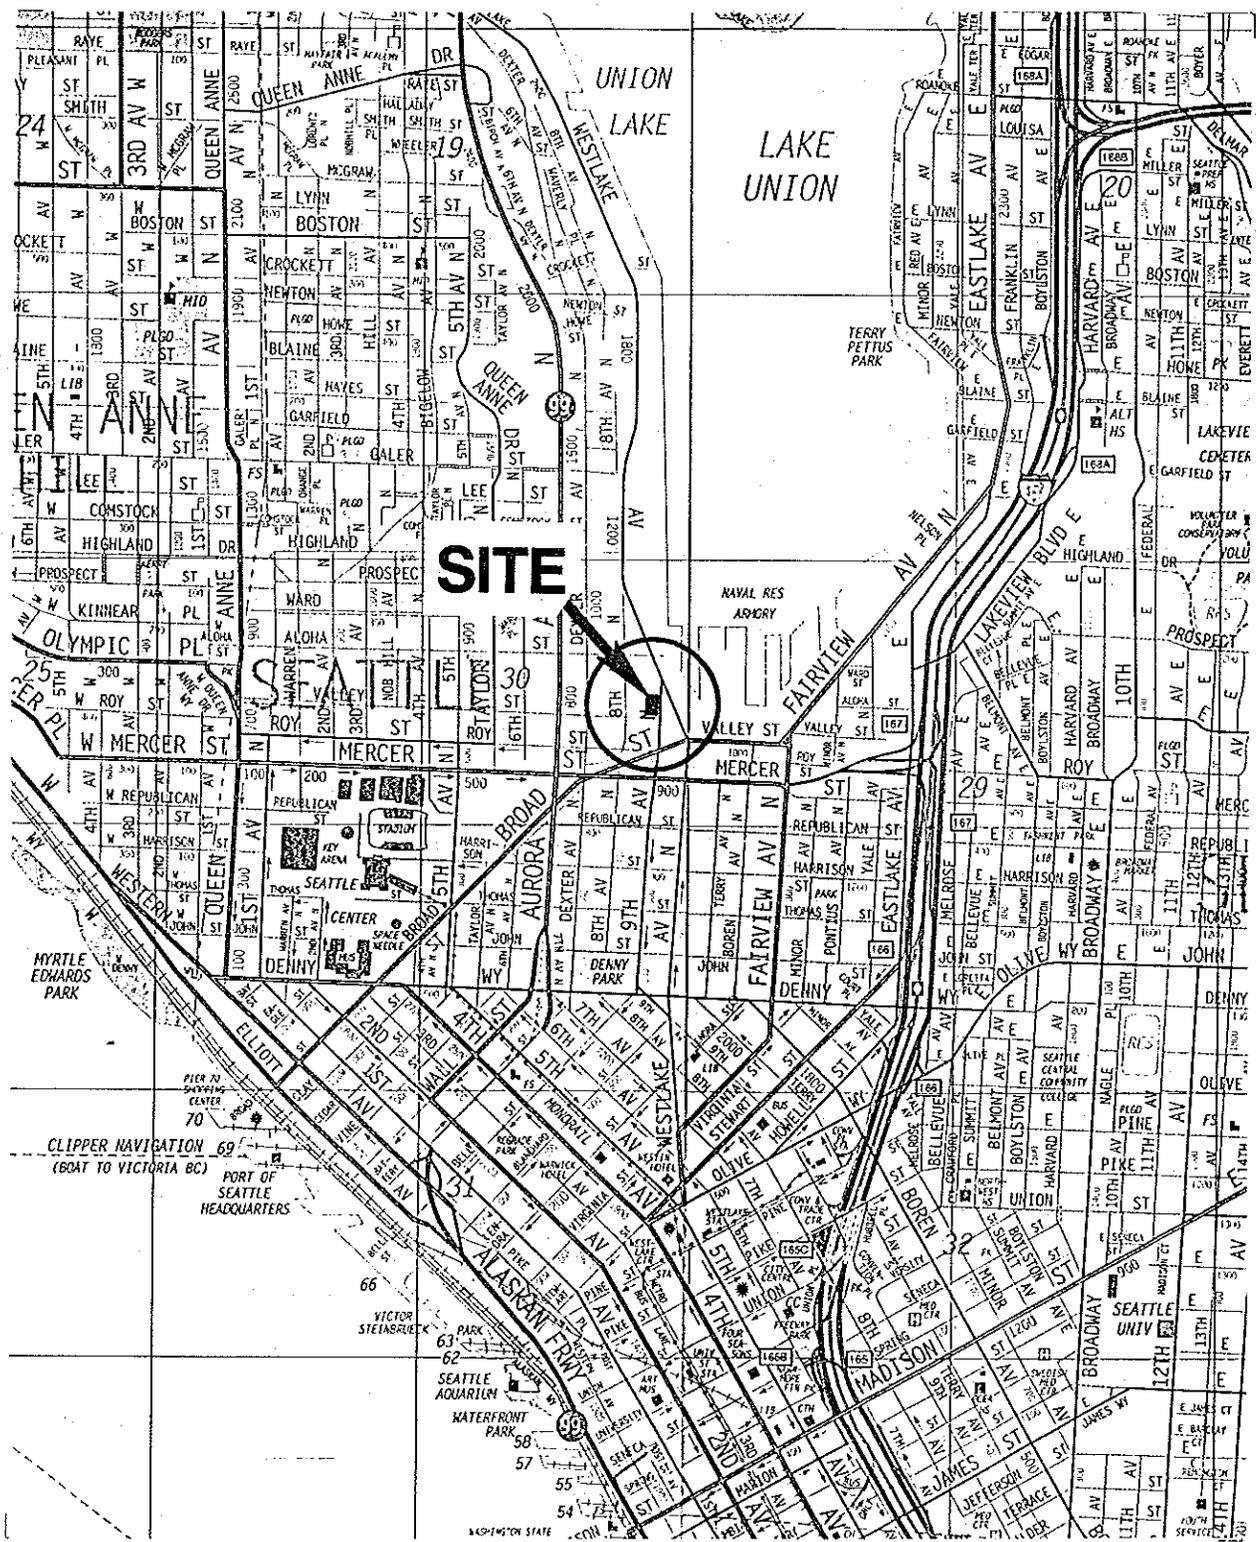

10.0 LIMITATIONS

The findings, conclusions, and recommendations presented in this report are based on our documented site observations, our review of historic information, review of regulatory information, and the referenced aerial photographs. Other information related to past site use or current site conditions may exist.

We did not perform any testing for this study. If the existing site use changes or if further information on the site becomes available, Terra Associates, Inc. should review the changes, as it may affect our conclusions.

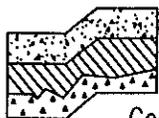

We prepared our conclusions and recommendations in accordance with generally accepted professional engineering practices. We make no other warranty, either expressed or implied. This report is prepared for planning purposes only. An assessment of the site soils and groundwater are necessary prior to any remedial actions on this site.

This report is the property of Terra Associates, Inc., and is intended for specific application to the 739 - 9th Avenue North project. This report is for the exclusive use of Mr. F. Bartow Fite III, Betts Patterson and Mines, and their authorized representatives. The findings in this report do not need to be reported to Ecology. No on-site sampling was performed. No confirmed releases of hydrocarbons or other substances were found in the course of this study.

Member - Geological Society of America and Engineers Without Borders-USA

EXPERIENCE

Dave has a broad environmental and geological consulting background spanning 20 years with GeoEngineers. Dave's experience involves groundwater quality evaluation; fate, transport and cleanup of contaminants in soil and groundwater (metals, PCBs, PAHs, VOCs, petroleum, pesticides/herbicides, dioxins/furans); geologic hazard identification; and ground source heat pump design. Through Dave's career and volunteer service he has developed skills in contaminant fate and transport, groundwater supply, field geotechnical engineering. Dave is well versed in applied science and engineering principles to solve unique problems during complex construction projects, in remote areas around the globe or in emergency situations. Dave's specific environmental expertise involves hazardous waste site assessments, property transfer/due diligence reviews, remedial investigations, emergency response, design, installation and O&M oversight of remedial systems. He also has a broad experience base for advising clients in brownfields redevelopment.

Dave also directs GeoEngineers' sustainability initiatives, with responsibility for new innovations in earth science and engineering practices as they relate to low impact development such as: land recycling through brownfields assessment and redevelopment, habitat enhancement, construction waste reduction, surface and rainwater recycling and reuse, porous pavement design and other innovative water resource impact mitigation strategies. He oversees energy reduction strategies such as directing ground source heat pump pilot studies, feasibility analyses and ground loop design. Dave is responsible for GeoEngineers' Ground Source Heat Pump Research and Development group which is leading the industry in ground loop design and efficiency through keen geologic and hydrogeologic knowledge so that first costs are reduced, long-term performance is enhanced and consideration is given to integrating absorber pipes into foundation elements.

Dave specializes in managing complex projects that require detailed budget tracking, unique technical decisions and constant communications with multiple involved parties. Dave's approach to projects involves focus on collaboration, community and technical innovation. This is exhibited in Dave's volunteer activities as a board member for Great City and Past President of the Puget Sound Professional chapter of Engineers Without Borders (EWB).

Environmental and Brownfields Expertise

Program Manager, Washington State Department of Ecology Prime Consultant for Remedial Investigations and Cleanups, Washington State.

Principal in charge of various assessment and cleanup actions of orphan sites throughout the State.

Due Diligence for Redevelopment of 22 Acre Former Boeing Facility Contaminated by Solvents (PCE, TCE, VC) for Confidential Client, Boeing Field, Seattle.

Principal in charge leading due diligence evaluation for possible acquisition and redevelopment of site with large solvent plume that is undergoing in-situ remediation. Vapor mitigation and controls will be necessary to facilitate development.

Due Diligence, Remedial Investigations, Comparative Cost Evaluations Feasibility Study and Cleanup Action, Lake Union I LLC (Vulcan/Schnitzer Partnership), Interurban Exchange 1, 2, 3, 4, 5 (3 City Block) Project, Seattle.

- Lead environmental and geotechnical due diligence for site acquisition and redevelopment planning.
- Oversaw environmental issues related to development planning, remedial cost estimating and risk management, cleanup action implementation typically as an element of construction.
- Liaison with Ecology related to independent, voluntary and agreed order cleanup actions.

ConocoPhillips Petroleum Co., Westlake and Mercer 76 Station, Service Station Bio Sparge Trench, Seattle

Dave was principal in charge where the objective was to reduce the client's long term environmental liability related to offsite gasoline plume migration.

- Designed one-of-a-kind multi-component air sparging and vapor extraction remedial system for this service station site under severe conditions.
- Remediation activities at this site had to accommodate: (1) the complexities of the subsurface facilities, (2) heterogeneous soil conditions, (3) the need to maintain business operation of the existing facility and (4) a solution to allow future downgradient development.
- The remedy managed offsite impacts from migration of the petroleum-contaminated groundwater plume and enhanced biodegradation of gasoline-contaminated groundwater. The system design included a biosparge treatment curtain trench near the downgradient site boundary, and four air sparge wells and integration of existing vapor extraction wells located on the western portion of the site. The biosparge treatment curtain trench is approximately 235 feet long, 5 feet wide 18 feet deep and contains 15 biosparge wells, 8 multipurpose wells, and shallow horizontal vapor extraction piping (used to mitigate gasoline vapors). Remediation system equipment includes an air sparge blower, four compressors, a heat exchanger and a vapor extraction blower and knockout tank.

Museum of Flight, Due Diligence, Work Plans and Remedial Investigations and Cleanup Planned Museum Expansion, Duwamish Valley - Seattle, Washington

Principal-in-charge for due diligence review, site investigation and cleanup related to 4 sites as part of a large Museum expansion. Dave balanced the following complexities of this project: (1) ensured the sufficient transfer of the properties while protecting the Museum of Flight's interest and long-term liabilities; (2) worked with The Boeing Company and Ecology to facilitate detachment of the "western property" from a larger, more contaminated Boeing property; and (3) represented the Museum in meetings with property owners, regulators and the development team. Environmental issues discovered included the presence of three former gas stations and 10 USTs in an area of a planned basement. Dave also helped secure federal grant funding for removal of these USTs through the EPA UST Fields grant program. Dave prepared environmental cost estimates to remediate contaminated soil. These estimates addressed: development scenario, need to obtain no further action status from Ecology, and long-term risk. Cleanup action has been completed at two of the four properties in concert with development activities.

CD Stimson Company – Stimson Mill Assessment and Redevelopment– Evaluation and Conceptual Design for Methane Evaluation and Mitigation for Mixed Use Redevelopment, Seattle

- Conducting historical evaluation to identify hazardous substances from historic mill operations.
- Evaluating wood fill distribution, methane generation and validating and/or refuting past environmental studies that may have incorrectly characterized methane concentrations.
- Working with legal counsel to question City designation of the site as a "landfill."
- Working with design team to facilitate a development solution that is consistent with state cleanup rules yet is practical and constructible in a reasonable timeframe.

Southeast Effective Development – National Award Winning EPA Brownfield Redevelopment for Rainier Court, Seattle

Dave has been principal in charge of the due diligence, environmental risk management and cleanup design and implementation of this award winning affordable and senior housing redevelopment project. Specifics include:

- Redevelopment of 12 acres in a depressed area of Seattle having a long history of industrial, commercial and residential use with PCB, solvent, metals, PAHs and petroleum contaminants.
- First recipient of an EPA TBA, and EPA brownfields cleanup grant and loans in the state.
- Prepared SAP and QAPP that was reviewed and accepted by EPA and Ecology on rapid basis.
- Combined RIFS/CAP, merged development plan with cleanup remedy, presented results to Ecology and EPA and reduced their review time to 6 weeks. Cleanup action and redevelopment completed in record 16 months.
- Project was the recipient of the 2005 national Phoenix Award, EPA's highest brownfield honor. Also the recipient of the 2006 ACEC Silver Award for Sustainable Design. GeoEngineers' unique remedial design saved over \$1 million in cleanup cost. Recipient of about \$1 million in EPA assessment and cleanup grants and loans.

Laird Norton Company LLC - Real Estate Portfolio Environmental Liabilities Accrual Analysis and Probability-Based Remedial Costs – 7 States

Dave was the Principal in Charge and established the strategy for a unique environmental cost analysis completed in March 2009 for Laird Norton Company's real estate holdings. The remedial cost analysis was not only used for estimating remedial costs for environmental liability accounting accrual purposes following FAS 5, FIN 47, ASTM E2137-06 and E2173-07, *Remediation Liabilities* SOP 96-1 and AICPA 96-1, but our approach allowed Laird Norton to use remedial costs for scenario planning and business prioritization. Dave is working with Laird Norton to establish a representative operational management approach using remedial cost ranges to help with property use decision-making and prioritization. The analysis consisted of 12 contaminated properties (in a portfolio of 240) with uses ranging from light industrial to Superfund designated sites.

Gates Foundation World Headquarters – Phase I ESAs, RI/FS, Cleanup Action, Vapor Barrier Design

Dave is principal in charge of the due diligence, environmental risk management and cleanup of the Gates Foundation world headquarters site in Seattle; the City of Seattle's former bus barn. Dave oversaw high profile, heavily scrutinized and very detailed construction management planning and implementation where cleanup action was incorporated into construction activities where schedule and budget were vitally important. Also oversaw waste management, cleanup action, chemical vapor barrier design and implementation oversight; Remedial cost analysis; Stakeholder management and education.

Other relevant projects under Dave's leadership:

Schnitzer West, Advanta Microsoft Campus, former Boeing Eastgate Landfill Redevelopment, Bellevue

Principal in Charge for the environmental due diligence, assessment and redevelopment of a 15 acre site on a portion of a closed municipal waste landfill. Highlights included:

- Coordinated due diligence effort, Phase I ESA, remedial investigation/feasibility study, supported PLP effort and consideration of Prospective Purchaser Consent Decree.
- Liaison with Department of Ecology.
- Prepared RI/FS and CAP and worked with project development team to modify building design to incorporate environmental remedy into final end use saving time and reducing cost.
- Designed unique barrier and passive methane vapor venting system beneath buildings.
- Oversaw construction stormwater management planning and implementation.

EPA Brownfields Cleanup, former Dry Cleaner, Bremerton Housing Authority, Bremerton, Washington. Oversaw preparation of public involvement fact sheets, QAPP, SAP, HSP, Contractor Bid Specification Work Plan, ABCA and Final Cleanup Action Report. Project completed within schedule and budget.

EPA Brownfields Assessment, former Manufactured Gas Plant, Bremerton Gas Works, Bremerton, Washington. Supported grant recipient, City of Bremerton in maximizing their grant money in association with an EPA Targeted Brownfield Assessment. Collaborated with property owners, City, EPA and other stakeholders to assess contamination at this complex and heavily contaminated site. Supported public involvement fact sheets, and oversaw preparation of QAPP, SAP, HSP, and Site Characterization Report. Project completed within schedule and budget.

EPA Brownfield Grant Management and In-situ Remedial System Design/Implementation, University of Washington Schaub-Ellison Parcel, Tacoma, Washington. Design and implementation of multi-well iSOCTM/bioventing system and long-term monitoring program.

Olympic Pipe Line Company - Emergency Response, Largest Pipeline Gasoline Spill in U.S. - Site Characterization and Remediation, Bellingham, Washington

Dave arrived on site the day after the incident, lead onsite contaminant assessment activities, participated in the incident command, collaborated, emergency response ac

- ◆ Largest gasoline release (230,000 gallons) from pipeline in U.S., where three people perished.
- ◆ Reported directly to Olympic Pipe Line executives and acted as client liaison in daily meetings with the EPA, Ecology, Fire Department and various other consultants, contractors and regulators.
- ◆ Determined lateral and vertical extent of the gasoline plume at the source area, along a 1-mile section of the tributary creek (Hannah Creek) and to evaluate and control gasoline seeps on Whatcom Creek.
- ◆ Implemented the cleanup strategy under the scrutiny of Federal, State and Local agencies.
- ◆ Coordinated installation of a unique multi-phase remedial system consisting of a 420-foot-long horizontally drilled interceptor drain (used to capture gasoline seeping into Whatcom Creek), four large diameter recovery, 15 vapor extraction, nine air sparging and 15 ground water monitoring wells.
- ◆ Dave coauthored a technical paper and was one of the keynote speakers in 2004 at the National Groundwater Associations Fractured Rock Conference related to the unique interceptor system.
- ◆ Dave also coauthored two papers in 2003 and 2005 (in press) related to microbial populations related to the injection of sodium sulfate to enhance anaerobic degradation of gasoline in a unique delivery trench. This was the first field trial in the U.S.
- ◆ GeoEngineers earned several commendations and Consultant of the Year awards for our service. Dave also received a Project Manager of the Year award from client for his work on this project.

PUBLICATIONS, PRESENTATIONS AND COMMUNITY INVOLVEMENT

Dave is heavily involved in local, regional and world community. He is an active participant in NAIOP, serving on the government affairs committee and the Downtown Seattle Association Policy Committee. He serves on the board of Great City and is a past president of Engineers without Borders-Puget Sound Professional chapter and is a mentor for the University of Washington Engineers Without Borders water projects in central Bolivia.

Dave's technical papers, community presentations and panel participation are listed below.

- Engineers Without Borders International Conference, Is Water Enough? Panel Moderator, March 2012.
- GoGreen 2011 Conference Panel Member, March 2011
- Engineers Without Borders International Conference Panel Member, March 2011.

B.A., Chemistry-
Geology, Whitman
College

REGISTRATIONS

Licensed Geologist -
Washington

Experience

Jessica has been an environmental geologist in Washington State since 2002 and has specialized in completion of Phase I ESAs since 2003, completing over 100 Phase I ESA reports since that time. She is well versed in the requirements of American Society for Testing and Materials (ASTM) Standard E 1527-05 for Phase I ESAs and the U.S. Environmental Protection Agency's (EPAs) Federal Standard 40 CFR Part 312 "Standards and Practices for All Appropriate Inquiries (AAI)." Jessica is an historical research specialist who can efficiently acquire historical information from the many different resources needed to compile a proper Phase I ESA. She is also familiar in MTCA Method A and B cleanup level methodology and UST site inspections. Jessica has performed Phase II ESAs, groundwater and soil sampling, remedial excavations and drilling explorations. Many of her projects are in the development and transportation markets, and she has completed Phase I ESAs and related tasks for a wide range of projects, including 1,000-acre undeveloped forest land parcels as well as large urban city blocks with over 100 years of industrial and commercial development history.
