UST – Underground Storage Tank

EXECUTIVE SUMMARY

This report summarizes the results of the All Appropriate Inquiries (AAI) Phase I Environmental Site Assessment (ESA) of the South Lake Union Marriott AC property (subject property). This assessment has revealed no evidence of recognized environmental conditions (RECs)¹ in connection with the subject property except for the following:

On-Site RECs

- **Past light industrial uses at the subject property.** Truck body assembly and welding, automobile body repair and servicing, and/or vehicle or truck painting are currently conducted at the property, and have been conducted at the property since it was first developed in the early 1920s. Significant quantities of paints and automotive fluids (paints, oils, coatings) are currently and were likely historically used and stored at the subject property. Vehicle fueling is not known to have occurred on the property. Potential pathways for spills or releases to enter the subsurface include storm drains in the north building floor and in the northwest corner of the paved storage/work yard.
- **Closed-in-place heating oil underground storage tank (UST).** A 500-gallon heating oil UST was formerly in use in the northwest corner of the subject property storage yard. The UST was closed-in-place in 1999 but soil and groundwater sampling was not conducted at that time. Soil contamination may be present in the vicinity of the UST.
- **Fill material** impacted by metals, petroleum, and polycyclic aromatic hydrocarbons (PAHs) is commonly found in shallow soils in the South Lake Union area. Fill material containing fragments of glass, brick and other debris was identified in shallow soil during recent geotechnical and environmental borings at the site. Debris-containing fill material is considered a REC to the subject property.

Off-Site RECs

- **Nearby and adjacent properties.** Several properties to the north, south and west are Washington State Department of Ecology (Ecology)-listed contaminated sites. Several upgradient or cross-gradient properties present RECs to the subject property due to potential for migratory contamination. The following two sites are adjacent crossgradient to the subject property with minimal information available regarding subsurface conditions:
 - The north-adjacent **Bayside Volvo** site has a long history of automotive repair activities and three USTs were closed-in-place at the site. Petroleum hydrocarbons have been identified in site soil and groundwater.

¹ Recognized environmental conditions are defined in ASTM E 1527-13 as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.”

- Long history of truck repair at the south-adjacent property (**Frank Kenney Toyota/ 715 9th Avenue**). A 1988 site investigation reportedly identified localized shallow petroleum contamination at the site. Details regarding the nature and extent of the contamination were not included in the documents available for review.

The following two sites are located west and upgradient of the subject property and have contaminated groundwater plumes that have likely impacted the subject property.

- Benzene and petroleum contamination has been confirmed in soil and groundwater at the adjacent **Roy Street Shops** site to west. Roy Street Shops was historically a maintenance facility for City of Seattle, Puget Sound Power & Light, and a gasoline service station. The west-adjacent property is also identified in the Environmental Data Resources, Inc. (EDR) report as the “Aloha” site, with documented petroleum contamination in site soil and groundwater
- Volatile organic compounds ([VOCs] including chlorinated solvents), gasoline-, diesel-, oil-range hydrocarbons, and BTEX (benzene ethylbenzene, toluene and xylenes) contamination has been documented in soil and groundwater at the **American Linen Supply Company** (American Linen) site to the southwest. American Linen was formerly an industrial laundry that used dry cleaning solvents and is the source of a significant release to groundwater in the South Lake Union neighborhood. Contaminated groundwater has reportedly migrated from the American Linen site to the east and beneath the subject property. Significant cleanup action including electrical resistance heating has been completed at the American Linen site, but additional performance monitoring information has yet to be reviewed at Ecology.

We note that according to the Revised Code of Washington (RCW) 70.105D.020 (22)(iv), commonly referred to as the “plume clause exemption,” a property owner is exempt from environmental liability from plumes that migrate onto their property from an off-property source. Therefore, the owners and occupants of the subject property likely will not be held liable for any plume originating from the American Linen Supply Company site or other nearby contaminated sites. We note however that future construction plans at the subject property calling for excavation and/or dewatering will require appropriate handling and disposal of potentially impacted soil and groundwater.

In our opinion, there is a risk of subject property impacts of regulatory significance to subject property soil, groundwater, and/or soil vapor resulting from the conditions identified above.

This Executive Summary should be used only in the context of the full report for which it is intended.

1.0 INTRODUCTION

This report summarizes the results of our Phase I Environmental Site Assessment (ESA) of the South Lake Union Marriott AC property located at 739 9th Avenue North (King County parcel number 408880-3485) in Seattle, Washington. The property is currently owned by Double M Properties, LLC and is currently occupied by MAACO Automobile Paint and Collision Repair. The property is referred to herein as the “subject property.” The subject property is shown relative to surrounding physical features on the Vicinity Map, Figure 1. The layout of the subject property and surrounding properties is shown on the Site Plan, Figures 2 and 3. GeoEngineers, Inc. (GeoEngineers) recently completed geotechnical and environmental explorations at the subject property and numerous environmental and geotechnical studies in the immediate area.

Our study was completed at the request of Arne J. Hall with AJH Development Services, LLC (development manager for WPPI Bellevue MFS, LLC). We understand that WPPI Bellevue MFS, LLC is considering redevelopment of the subject property consisting of the construction of a new hotel building with eight stories above grade and one below grade parking level. We further understand that the results of this Phase I ESA will be used by WPPI Bellevue MFS, LLC as part of their evaluation of potential environmental liabilities associated with ownership of the subject property. This report has been prepared for the exclusive use of WPPI Bellevue MFS, LLC. Because this environmental report is not intended for use by others, no one except WPPI Bellevue MFS, LLC should rely on this report without first conferring with GeoEngineers.

1.1. Phase I Scope of Services

The purpose of this Phase I ESA is to identify recognized environmental conditions² (RECs) in connection with the subject property. Our scope of services is in general accordance with ASTM International (ASTM) Standard E 1527-13 for Phase I ESAs and the U.S. Environmental Protection Agency’s (EPA’s) Federal Regulation 40 CFR Part 312 “Standards and Practices for All Appropriate Inquiries (AAI),” which are intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser (BFPP) limitations on liability under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). The ASTM standard outlines the practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined by 42 U.S.C. §9601. Our services, described below, were completed in general accordance with our proposal dated August 4, 2014. These services were completed by, or under the direction of, an environmental professional as described in 40 CFR Part 312.

² Recognized environmental conditions are defined in ASTM E 1527-13 as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.”

Our specific scope of services for this Phase I ESA was as follows:

1. Review readily available geotechnical reports, environmental reports and/or other relevant documents pertaining to environmental conditions at the subject property.
2. Review the results of a federal, state, local and tribal environmental database search provided by an outside environmental data service for listings of properties with known or suspected environmental concerns on or near the subject property within the search distances specified by ASTM. Our database and file review search also included a review of EPA and Washington State Department of Ecology (Ecology) websites for readily available information (publications and reports) concerning areawide soil and groundwater contamination on or adjacent to the subject property.
3. Review regulatory agency files regarding listed properties of potential environmental concern relative to the subject property.
4. Identify a key site manager with specific knowledge of past and present property use and request that the key site manager meet a GeoEngineers' representative on-site for an interview during the visual site reconnaissance and/or an interview by telephone if he or she is not available during the site reconnaissance. We also identified and interviewed others familiar with the use and history of the subject property, as available and appropriate, including representatives of current occupants that likely use, store, treat, handle or dispose of hazardous substances now or in the past.
5. Interview current owners or occupants of neighboring properties as necessary to gather information or fill property use data gaps regarding the subject property.
6. Interview past owners and occupants of the subject property as necessary to gather information or fill property use data gaps regarding property use history.
7. Interview a representative of the local fire department, health department and/or Ecology (or other applicable state regulatory agency) as necessary to gather information or fill data gaps regarding the history of the subject property and surrounding properties relative to the likely presence of hazardous substances.
8. Review historical aerial photographs, fire insurance maps, building department records, city directories, chain-of-title reports, and land use and tax assessor records, as available and appropriate, to identify past development history on and adjacent to the subject property relative to the possible use, generation, storage, release or disposal of hazardous substances. We attempted to identify uses of the subject property from the present back to the time that records show no apparent structures on the subject property, back to the time that the property was first used for residential, agricultural, commercial, industrial or governmental purposes, or back to 1940, whichever is earliest.
9. Review current United States Geological Survey (USGS) topographic maps to identify the physiographic setting of the subject property and provide a statement on the local geologic, soil and groundwater conditions based on our general experience and sources such as geologic maps and soil surveys.
10. Conduct a visual reconnaissance of the subject property and adjacent properties to identify visible evidence of RECs.
11. Identify the source(s) of potable water for the subject property and current heating and sewage disposal system(s) used at the subject property, if any, and their age if readily ascertainable.

12. Identify data gaps relative to the Phase I ESA study findings.
13. Provide a written summary of the Phase I ESA results and identified RECs along with our opinion and recommendations regarding the potential for contamination by hazardous substances at the subject property and any significant data gaps identified.

1.2. Special Considerations

Our scope of services did not include an environmental compliance audit or an evaluation for the presence of lead-based paint, toxic mold, polychlorinated biphenyls (PCBs) in light ballasts, radon, lead in drinking water, asbestos-containing building materials, urea-formaldehyde insulation in on-site structures or debris or other potentially hazardous building materials. Soil, groundwater, vapor, indoor air or surface water sampling was not part of our Phase I ESA services.

We did not enter and observe all spaces within the existing subject property building during our site reconnaissance because these spaces were locked. Because this space is unlikely to contain more than *de minimis* quantities of hazardous materials use or storage, this deviation does not adversely impact the objectives or conclusions of this study and is not considered a data gap.

2.0 USER-PROVIDED INFORMATION

We did not receive any responses to a user questionnaire, a copy of which is provided in Appendix A. The questionnaire can be used to obtain user-provided information (for example, title records, environmental liens, specialized knowledge of the subject property, etc.) that may specify findings/conditions that may pose potential environmental concerns or RECs relative to the subject property. The absence of this information is a data gap that may pose an environmental concern to the subject property if the property has been subject to environmental liens, restrictive covenants, or other similar encumbrances.

2.1. Environmental Liens or Property Use Restrictions

A title document was not provided by WPPI Bellevue MFS, LLC. However, based on review of an environmental lien search provided by Environmental Data Resources, Inc. (EDR), and other Phase I ESA research findings, we did not identify recorded environmental liens in connection with the subject property.

2.2. Summary of Previous Reports Provided by WPPI Bellevue MFS, LLC

WPPI Bellevue MFS, LLC provided one previous environmental report pertaining to the subject property for our review.

- Terra Associates, Inc., 1999. Draft Level I Environmental Assessment, 739 – 9th Avenue North, Seattle, Washington. Prepared for Mr. F. Bartow Fite III, dated November 2, 1999.

The 1999 Environmental Assessment included review of historical resources, review of previous investigations at the subject property and adjacent properties, interviews with the property owner (Mr. F. Bartow Fite III) and the current occupant (Mr. Dave Konkle of MAACO), and a site visit. Terra Associates, Inc. (Terra) identified a long-term site and neighborhood history of light industrial and commercial uses, and historical subject property use as the fabrication of truck bodies. Terra noted the

presence of a floor drain in the work area that posed a possible pathway for contamination to enter soil and/or groundwater. Neighboring properties researched by Terra revealed numerous registered underground storage tanks (USTs) as well as several documented releases to soil and/or groundwater. They also provided an opinion that there was a possibility for a high potential for unregistered USTs on neighboring properties. Previous environmental investigations at adjacent properties were reviewed by Terra as part of the Level I Assessment and were briefly summarized in the 1999 report.

- Terra reviewed a 1992 Underground Storage Tank Removal Report for the north-adjacent Bayside Volvo site, which reportedly identified USTs in “poor condition” and evidence of prior releases. Gasoline and gasoline constituents above applicable cleanup levels were detected in soil in the vicinity of the USTs. Groundwater testing was not performed.
- According to Terra, a 1995 Site Characterization Report by ReTec for the west-adjacent Roy Street Shops site reportedly documented remedial excavation of approximately 6,000 tons of hydrocarbon-contaminated soils. The source of the contaminated soil was not identified in the Terra report. Additionally, monitoring wells were installed at the site and groundwater samples were submitted for chemical analysis. No other information regarding soil contamination, including specific testing results, is included in the Terra summary. The following general conclusions regarding the Roy Street Shops site are reported in the Terra report:
 - Additional contamination is present along the top of the static water table extending beyond the remedial excavation.
 - The groundwater flow beneath the site is east-northeast.
 - Gasoline concentrations in groundwater remained consistently above cleanup levels during the monitoring period.
 - “Significant groundwater contamination with TCE and PCE was present” in one monitoring well in the northwest corner of the site. Terra did not identify the source of TCE (trichloroethene) and PCE (tetrachloroethene) groundwater contamination and indicated that as of 1999, the well was abandoned and no further testing in the area was been performed.

The 1995 report reportedly concluded that “additional contaminated soils are present and significant groundwater contamination is present” at the Roy Street Shops site.

- Terra reported that a 1992 assessment by Dalton Olmsted and Fugelvand of the upgradient (200 feet west) American Linen site (identified as Maryatt Industries in the Terra report) reportedly found “elevated levels” of gasoline, diesel, heavy oils, and chlorinated solvents in groundwater from prior land uses including a gasoline station and a large industrial laundry that also conducted dry cleaning. The specific analytical results identified in the 1992 assessment were not discussed in the Terra report. It is unclear if any remedial actions were completed at that time to address the contaminated soil and groundwater.
- Terra also summarized a 1988 Hart Crowser “Preliminary Environmental Assessment” report for the south-adjacent Frank Kenney Toyota site. Terra indicated that the report identified localized petroleum hydrocarbon contamination in shallow soil. Terra noted that the 1988 borings were shallow and hand-excavated, and that the nature and extent of contamination was likely not well investigated.

Terra also identified an unregistered UST at the subject property containing approximately 500 gallons of fluid. Terra performed analytical testing on the fluid and determined that the tank contained approximately 250 gallons of Diesel Number 2 and 250 gallons of water. Terra did not conduct soil and/or groundwater sampling in the vicinity of the unregistered UST. The Terra report included documents indicating the UST as closed-in-place by Ultra Tank Services, however the closure methods used were not included in the assessment report and a UST removal report was not available for review. Terra concluded that “based on the information and data we reviewed and documented in this report, it is our opinion that the potential for significant hazardous contamination of the site soils and groundwater that requires site remedial actions is high.”

Relevant historical information obtained from this report has been integrated into subsequent portions of this report. The previous reports reviewed by Terra were not provided to GeoEngineers, and lack of specific information presented in these reports is considered a potentially significant data gap. However, we note that the information presented in the Terra report is likely outdated as to current conditions of nearby properties, and that the Terra information remains valuable in identifying suspected RECs to the subject property. The missing reports may be duplicated or superceded by information in Ecology files, which will be reviewed when it becomes available.

3.0 RECORDS REVIEW

3.1. Location and Setting

General information, property use(s) and environmental setting of the subject property area are summarized in Table I below. The location is shown relative to surrounding physical features in Figure 1. The current layout of the subject property and surrounding property uses are shown in Figure 2. Figure 3 shows the layout of the subject property. Photographs of the subject property are shown in Figure 4.

TABLE I. SUBJECT PROPERTY INFORMATION

Topographic Map	USGS, 7.5-minute Seattle, Washington topographic quadrangle map dated 1983.
Quarter/Quarter, Section, Township and Range	SW quarter of Section 29 North, Township 25, Range 4 East, Willamette Meridian
Address	739 9 th Avenue North, Seattle, King County, Washington
General Location	The subject property is in the South Lake Union neighborhood of Seattle and is bounded by commercial property to the north and south, 9 th Avenue North to the east, and a public right-of-way alley to the west.
Tax Parcel Number	King County Parcel number 408880-3485
Approximate Area	0.52 acres
Existing Use(s)	Industrial warehouse and auto service facility. Current tenant is MAACO Auto Painting and Collision Repair.
Geologic Setting	Puget Lowland glacial deposits (per Washington DNR Geologic Map of Washington, Northwest Quadrant, 2002)
Nearest Surface Water Bodies	Lake Union is located approximately 0.1 miles to the northeast.
Approximate Surface Elevation	30 feet above mean sea level (per King County iMAP)

Soil and Geologic Conditions	GeoEngineers' recent geotechnical exploration at the subject property identified up to 20 feet of sand and gravel fill overlying approximately 25 feet of native sand with silt and glacially compacted outwash deposits (sand, silt, gravel). Some fill material ranging from 5 to 10 feet below the ground surface contained organics, glass, wood, and debris.
Depth to Groundwater	GeoEngineers recently installed three monitoring wells at the subject property. Groundwater was measured between 21 and 24 feet below ground surface in these wells.
Inferred Direction of Shallow Groundwater Flow	To the east or northeast (toward Lake Union), based on surface topography, recent geotechnical borings, and information in previous reports for nearby and adjacent property.

Our knowledge of the general physiographic setting, geology and groundwater occurrence in the vicinity of the subject property is based on our review of the maps listed above (see References, Section 6.5), previous reports regarding the subject and nearby properties, and our general experience in the area.

3.2. Standard Environmental Database Search

GeoEngineers reviewed the results of a search of pertinent environmental regulatory lists and databases for current or previous facilities listed at addresses located within ASTM-specified distances from the subject property. The search was completed on August 22, 2014. The information reviewed was provided by a subcontracted regulatory list search service, Environmental Data Resources, Inc. (EDR). The EDR report is presented in Appendix B. The report includes details regarding the listed facilities identified and maps showing the approximate locations of the listed facilities relative to the subject property.

GeoEngineers reviewed the search results for listings pertaining to the subject property. GeoEngineers also reviewed EDR's listing of database entries that could not be mapped by EDR because of insufficient addresses (orphans). Off-site facilities found within the specified distances from the subject property were evaluated for potential impact to the subject property.

3.2.1. Database and Regulatory Findings for the Subject Property

The subject property address was identified on the regulatory database lists (Resource Conservation and Recovery Act – Conditionally Exempt Small Quantity Generator [RCRA-CESQG], Facility Index System [FINDS], Site Identification List [ALLSITES], Underground Storage Tank [UST]) and on EDR's proprietary databases of historic automobile service stations (EDR US Hist Auto Stat) as "MAACO Auto Painting Bodywork"

3.2.2. Screening Criteria for other Listed Facilities

We screened the listed facilities within the ASTM search distances relative to the criteria described below. The results of the screening are presented in Section 3.2.3.:

1. Adjacent Sites
 - a. If adjacent sites were listed, they were retained for additional review. Any adjacent properties identified on EDR's proprietary databases of historic dry cleaner or automotive service station sites but not on regulatory databases are discussed in Section 3.4.

2. Non-Adjacent Sites

- a. Any non-adjacent sites included in the EDR report only by virtue of being listed in the RCRA, AST, UST, HMIRS, FINDS, ALLSITES, ICIS and/or NPDES databases (see list of acronyms on page iii) were not further reviewed because these databases are not indicative of known or suspected releases at a site. Sites listed in these databases only are considered low risk of contaminant migration and not potential RECs.
- b. Sites within approximately 600 feet (approximately $\frac{1}{8}$ mile) of the subject property **and** upgradient or cross-gradient that were listed in the Federal, State or Tribal Equivalent databases of CERCLIS, NPL, Hazardous Sites List (HSL), Confirmed and Suspected Contaminated Sites List (CSCSL), CSCSL No Further Action (CSCSL NFA), Voluntary Cleanup Program (VCP), Independent Cleanup Report (ICR), Solid Waste Landfill, Leaking UST (LUST), Clandestine Drug Lab (CDL), or Institutional Control Registries were further reviewed because these databases indicate a reported known or suspected release at a site. We requested Ecology files for listed sites on these databases.
- c. Sites that were not confirmed or suspected contaminated sites, not leaking UST sites or located outside a 600-foot radius from the subject property were considered low risk of contaminant migration and not potential RECs.

3.2.3. Database and Regulatory Findings for Screened Listed Facilities

The following database-listed site(s) (Table II) met the screening criteria described above. We requested Ecology and/or EPA files for this site(s) (Section 3.3). As explained in Section 3.3.1, Ecology files for these listed facilities have not yet been provided as of the date of publication of this report.

TABLE II. LISTED FACILITIES OF POTENTIAL CONCERN FOR CONTAMINANT MIGRATION

Listed Business	Listed Address	Distance from Site and Location	Type of Database and Database Information	Environmental Professional Opinion Based on Database Information
Subject Property				
MAACO Auto Painting	739 9 th Avenue North	Subject Property	FINDS, ALLSITES, RCRA-CESQG The current site occupant (MAACO) is listed by Ecology as a conditionally exempt small quantity generator (CESQG) with no recorded violations. No releases of petroleum or hazardous materials are identified in the EDR report.	This database listing does not necessarily imply a release to the environment.

Listed Business	Listed Address	Distance from Site and Location	Type of Database and Database Information	Environmental Professional Opinion Based on Database Information
Nearby Properties Considered RECs to the Subject Property				
Bayside Volvo	753 9 th Avenue North	Adjacent North (crossgradient)	UST Three USTs of less than 1,100-gallon capacity and unspecified contents were closed-in-place at this auto repair site in 1996.	See Section 3.3 below.
Roy Street Shops (also identified in EDR report as Aloha)	802 Roy Street and 800-900 Aloha Street	Adjacent west across alley (15 feet upgradient)	ALLSITES, CSCSL, LUST, UST, FINDS, RCRA NonGen, ICR Seattle City Light (former occupant) was a historical Large Quantity Generator until at least the year 2000. In 2002, Ecology verified Seattle City Light as a Non Generator. At least one UST was removed from this site in the early 1990s. Benzene contamination was confirmed above cleanup level in groundwater and gasoline contamination was confirmed above the cleanup level in soil. The site is listed as "cleanup started."	See Section 3.3 below.
Frank Kenney Toyota Volvo	715 9 th Avenue	Adjacent south (crossgradient)	FINDS, ALLSITES, RCRA NonGen Listed in Ecology's hazardous waste database as generator in the year 1986. No releases are identified in the EDR report.	This database listing does not imply a release to the environment. However, based on proximity and long history of auto repair activities at the site, it is considered a potential REC to the subject property as discussed in Section 6.0.

Listed Business	Listed Address	Distance from Site and Location	Type of Database and Database Information	Environmental Professional Opinion Based on Database Information
American Linen Supply Co. (also known as Maryatt Industries)	700 Dexter Avenue North and 771-773 Valley Street	Approximately 200 feet southwest across 8 th Avenue North (upgradient)	Inactive drycleaners, FINDS, RCRA NonGen/NLR, ICR, UST, CSCSL, MANIFEST, VCP At least 8 USTs were removed from this former gas station and industrial laundry site. Benzene, halogenated and non-halogenated solvents and petroleum products are confirmed at concentrations above cleanup levels in site groundwater and/or soil. Cleanup was started in the 1990s and is ongoing at the site.	See Section 3.3 below.
Nearby Properties Not Considered RECs to the Subject Property				
Jarvie Paint Manufacturing Co.	760 Aloha Street	Approximately 250 feet northwest across 8 th Avenue North (crossgradient)	ALLSITES, ICR, UST, CSCSL NFA Six USTs were removed from this site in the 1990s and cleanup action was subsequently conducted. Ecology issued a No Further Action (NFA) status for the site in 2006.	Based on location and Ecology NFA status, the Jarvie Paint site is not currently considered a REC to the subject property.
Complete Automotive (aka Auto Service Europa Inc.)	717 Dexter Avenue North	Approximately 500 feet southwest across 8 th Avenue North on Dexter Avenue North (upgradient)	ALLSITES, VCP, UST, CSCSL NFA One UST was closed-in-place in the 1990s. Ecology issued a NFA status for the site in 2012.	Based on proximity and the review of the Ecology NFA letter, the Complete Automotive site is not considered a REC to the subject property. See Section 3.3 below.

3.3. Regulatory Agency File and Records Review

GeoEngineers requested reasonably ascertainable, pertinent records from Ecology and the Seattle Fire Marshal's Office. Our review of the responsive records is presented below.

3.3.1. Review of State Regulatory Agency Files

We requested Ecology files for the sites identified in Table II above. We reviewed Ecology files for the identified sites on October 16 and 23, 2014. Based on available information, several of these sites are considered RECs to the subject property at this time. Available regulatory information regarding the subject property and the most immediately upgradient and adjacent sites is presented below.

The west-adjacent (upgradient) **Roy Street Shops** property is a City of Seattle Parks maintenance facility. According to Ecology's website and file information, a series of UST and contaminated soil excavations and site assessments were conducted between 1992 and 1995. In the 1990s, two USTs (one 2,700 gallon UST and one 550 gallon UST) were removed from the central portion of the property west of the subject property. Fill material consisting of sand, silt, gravel, concrete, household debris and construction materials was identified during excavation and exploration at the site. Approximately 3,000 tons of soil contaminated with petroleum hydrocarbons and benzene, toluene, ethylbenzene, and xylenes (BETX compounds) was excavated, but contaminated soil remained to the north and east of the former UST area and into the alley adjoining the subject property. Monitoring wells were subsequently installed across the site and in the alley. Groundwater samples from wells in the alley along the shared boundary with the subject property (MW-101, MW-102, and MW-105) contained gasoline-range petroleum hydrocarbons and BTEX compounds at concentrations above Model Toxics Cleanup Act (MTCA) Method A cleanup levels in 2002, according to the most recent data included in the Ecology file. The Roy Street Shops property is a REC to the subject property.

The north-adjacent (cross-gradient) **Bayside Volvo** property has been an auto repair facility for many years. According to documents available in the Ecology file, three USTs were removed from the site in 1992: a 1,000-gallon gasoline UST, and 300-gallon used oil UST, and a 675-gallon fuel oil UST. Contaminated soil was identified during excavation, but excavated contaminated soils were reused as backfill in the excavations and presumably remain on-site. According to the 1992 UST Removal Report by Geotech Consultants, additional soil explorations and groundwater samples from monitoring wells previously installed in Aloha Street to the north contained hydrocarbon contamination, and therefore "it appears that soils proximal to the former USTs on this site were contaminated by off-site sources, most likely located upgradient to the west." Although some contamination at the Bayside Volvo site may be the result of releases at other nearby sites, in our opinion it is likely that the former USTs at the Bayside Volvo site leaked, and therefore the Bayside Volvo site remains a REC to the subject property.

We reviewed Ecology files and database information regarding **American Linen Supply Company (aka Maryatt Industries)** on Ecology's website (<https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=12004> and <https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=3167>). The American Linen site is a former large industrial laundry and gas station site one block west of the subject property. Petroleum and solvent contamination was identified at the site in the 1990s. According to the Ecology website:

"Contaminants of concern at this Site include chlorinated volatile organic compounds (CVOCs) which includes tetrachloroethylene (PCE), trichloroethene (TCE), dichloroethene (Cis 1,2-DCE), and vinyl chloride. Other contaminants include gasoline, diesel, and oil range petroleum

hydrocarbons and BTEX (Benzene, Toluene, Ethyl Benzene, and Xylene). Contamination is present in the soil and in groundwater beneath the property and has migrated in groundwater off property several hundred yards to the east.”

The property entered the Voluntary Cleanup Program (VCP) in 2012. According to an August 16, 2013 draft Feasibility Study Report by Sound Earth Strategies Inc., groundwater flows to the west beneath the American Linen site, with a plume of solvent-contaminated groundwater extending far to the east, beneath the southwest corner of the subject property, across the south-adjacent property, and as far east as properties east of 9th Avenue North. Solvent-contamination confirmed in groundwater that is migrating toward the subject property from the American Linen site includes tetrachloroethylene (PCE), trichloroethylene (TCE), cis-1,2-dichloroethene, 1,2-dichloroethane and vinyl chloride. According to the Ecology website and files, remediation began in 2013 and included installation of a thermal resistivity heating and soil vapor extraction system. This remediation phase was completed in January 2014 and further remediation is planned at the property. Currently, project status remains listed as “cleanup started.” No information regarding post-remediation groundwater monitoring is currently available. Based on this information and the west-proximity of this site to the subject property, American Linen Supply Company is a REC to the subject property.

We reviewed Ecology files and recent documents and database information regarding **Auto Service Europa, Inc. (Complete Automotive)** on Ecology’s website (<https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=11863>). One 1,000-gallon heating system UST was removed from the site in 2011. According to a 2011 Phase II ESA, contamination was limited to within property boundaries and no evidence was found that a contaminated groundwater plume extends beyond site boundaries. The property entered the Voluntary Cleanup Program in May 2012. According to a 2012 Remedial Action and Soil Management Summary, contaminated soil was successfully excavated and removed from the property for permitted disposal. Ecology granted No Further Action (NFA) status to the property in October 2012. Based on this information and distance to the subject property, the Auto Service Europa, Inc. (aka Complete Automotive) site is not considered a REC to the subject property.

3.3.2. Review of Local Regulatory Agency Files

Seattle Fire Department provided copies of an UST decommissioning permit dated 1999. This document reflects the in-place-closure of the UST located on the subject property at the existing covered parking area in the northeast corner of the work yard.

3.3.3. Areawide Contamination

We also conducted a search of Ecology and EPA websites for readily available information (publications and reports) that may concern area-wide soil and groundwater contamination on or adjacent to the subject property. Area-wide contamination reports pertaining to the subject property vicinity were not identified. However, it is GeoEngineers’ experience that this area of Seattle has the potential for variable groundwater conditions, residual concentrations of solvents in groundwater and remaining contaminated soil (and groundwater) in rights-of-ways.

3.4. Historical Resources

Our understanding of the history of the subject property is based on a review of the information from the historical resources listed in Table III. Selected historical research documents are included in Appendix C.

TABLE III. HISTORICAL RESOURCES REVIEWED

Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Comment (See Section 3.4.1 for findings)
Historical Aerial Photographs ¹	EDR Search	1943, 1956, 1965, 1969, 1977, 1980, 1985, 1990, 2006, 2009, and 2011	August 29, 2014	The subject property is not pictured on the 1956 aerial photograph provided by EDR.
Historical Aerial Photographs ¹	King County iMAP	1936, 1998, 2000, 2002, 2005, 2007, and 2009	August 29, 2014	--
Historical Fire Insurance Maps	EDR search of Sanborn maps	1893, 1905, 1917, 1950, and 1969	August 29, 2014	--
Historical Topographic Maps ¹	EDR search of USGS topographic maps	1894, 1895, 1897, 1909, 1949, 1968, and 1983	August 29, 2014	--
City Directory Search	EDR	Approximate 5-year intervals, 1920 to 2013	August 29, 2014	--
Archived Tax Assessor Records	Puget Sound Regional Archives	1930s through 1970s and 1990s to current	September 4, 2014	--
County Assessor Records	King County iMAP	Recent	August 29, 2014	--
Building Permits	EDR Building Permit Report	Recent	August 22, 2014	Available City of Seattle Building Permits for the subject property consist of permits for utility upgrades, fire protection upgrades, and renovation to the existing buildings.
City Building Permits and Records	King County Department of Planning and Development (DPD)	1940s to recent	September 3, 2014	Available King County permits and building plans for the subject property consist of permits for utility equipment installations and additions/renovations to existing buildings.

Notes:

¹ The scale of the maps/photographs reviewed allowed for an interpretation of general property development/configuration, such as identifying most structures, roadways and clearings. However, the scale of the maps/photographs did not allow for identification of specific property features, such as fuel pumps, wells or chemical storage areas on the subject property, if any.

3.4.1. Historical Property Ownership and Use Summary

The subject property was located along the Lake Union shoreline until at least 1905, according to 1893 and 1905 publications of Sanborn maps. In a 1917 Sanborn map, the subject property is shown with an 80-foot wide public right-of-way, Broad Street, running northeast-southwest across the subject property. The road was subsequently abandoned or rerouted prior to property development.

Two buildings are currently located on the subject property. The existing north building was built in 1924, according to King County assessor information. According to a 1925 city directory listing, the subject property was originally occupied by Westlake Tire Service. A 1930 city directory identifies a subject property address as occupied by Lake Union Garage. Lake Union Garage is also identified in EDR's proprietary database of historical auto repair sites. A 1936 aerial photograph shows the subject property with the existing north building at the north end of the property and a service yard at the south. Building plans from 1947 of the existing north building show a furnace located in the northeast corner.

From 1940 to 1980, the subject property was listed in city directories as occupied by truck welding companies under various names including A.D. Blackler truck equipment in the 1940s, Truck Welding and Equipment Company from the 1940s to 1960s, and Truckweld Equipment Co in 1970s. Property records obtained from the Puget Sound Archives identify an addition and remodel to the north-existing building in 1948. A 1950 Sanborn map shows the existing north building as used for steel tank manufacturing and welding as well as two general storage sheds in the southwest corner of the property. The south existing building was built in 1955, according to King County assessor information. A 1969 Sanborn map shows both the north and south buildings used for truck body manufacturing and welding. The subject property building configuration appears generally unchanged in aerial photographs dated 1965 to recent, with the remainder of the property apparently used as a storage, parking and/or work yard.

Building permits and plans dated 1979 obtained from the City of Seattle Department of Planning and Development (DPD) indicate occupancy of the subject property by Frank Kenney Toyota, a car dealership that formerly also used spaces in several nearby and adjacent buildings. Frank Kenney Toyota received permits to install forced air gas heaters at the subject property buildings and convert property use to auto repair. Additionally, the 1979 building plans identify a boiler room in the southwest corner of the north existing building. A 1980 City of Seattle Land Use permit indicates that the property was occupied by Multi-Craft Plastics Inc. and used for general storage and distribution of plastic products until at least 1984. The 1986 city directory identifies the subject property address as vacant.

The subject property is listed under the existing property occupant (MAACO) in 1996. City of Seattle installation permits dated 1993 indicate installation of pressure vessels and a pre-fabricated paint spray booth and oven by MAACO. In 1996 the City of Seattle issued a building permit for the addition of the existing paint mix and storage room, located in the northwest corner of the south existing building, for storage of Class 1-A and 1-B liquids and paint mixing.

According to King County iMAP information, Double M Properties, LLC purchased the subject property from F. Bartow and Marilyn L. Fite in 1999. Mr. Fite currently represents the property owner and is identified as the Key Site Manager for this report. Mr. Fite indicated that he has owned the property for approximately the last 20 years. According to Puget Sound Regional Archives records, Truck Welding and

Equipment Company owned the property in the 1950s. Property ownership information in the 1970s and prior to the 1950s was not included in the available records.

3.4.2. Adjacent Properties

The subject and surrounding properties were located beneath or along the Lake Union shoreline until the early 1900s. Development of the area began after the lake water level dropped after construction of the Hiram M. Chittenden Locks (Ballard Locks) in 1916. The surrounding properties were heavily commercially developed by at least the 1930s. A search of EDR's proprietary databases identified numerous historic dry cleaners and automobile repair and services facilities within ¼ mile of the subject property. The nearest of these sites on adjacent blocks are included in the discussion below and are identified in Figure 2.

North. The north-adjacent existing building at 753 9th Avenue North was built in 1949. This parcel is shown undeveloped in the 1917 Sanborn map and appears cleared in the 1936 aerial photograph. The 1950 and 1969 Sanborn maps show an auto truck sales and service facility occupying the north-adjacent property. City directories identify occupants of this building as "Hyster Company" truck manufacturers in the 1950s, "Studebaker Center" in the 1960s, "Harley Davidson of Seattle" in 1980, "Burkhart Dental Supply Company" in the 1980s, and KPG Inc. from 1996 to 2013. The north-adjacent property is identified as "Bayside Volvo" on regulatory databases; the name "Bayside Volvo" does not appear in reviewed city directory records.

A neon sign manufacturing and metal works facility is shown to the north across Aloha Street in the 1950 and 1969 Sanborn maps. A small gasoline service station is visible at the northwest corner of the intersection of Westlake Avenue North and Aloha Street in the 1936 aerial photograph. The existing hotel on this property was built in 1998.

The following businesses with addresses corresponding to properties to the north across Aloha Street are identified on EDR's proprietary database of historical auto service stations:

- Johnson S Service Station at 901 North Westlake Avenue
- Martin Reuben A JR at 901 Westlake Avenue North
- ERK and Nelson at 810 Aloha Street
- Hi Flex Products Company at 909 Westlake Avenue North
- Continuous Auto Service Co, Inc. at 935 Westlake Avenue
- Vogue French Dry Cleaners at 760 Aloha Street (identified on EDR's database of historical cleaners)

East. Existing buildings to the east across 9th Avenue North were built in the 1910s and 1920s. In the 1917 Sanborn map, the city block to the east across 9th Avenue North is shown as the Tucker-Hanford Company Lithographers, and Rainier Laundry is shown as occupying the south portion of the block. In the 1950 Sanborn map, the Tucker-Hanford Company and Rainier Laundry have been replaced by Art Marble Company stone cutting, an auto sheet metal and painting facility, and a machine shop. By the publication of the 1969 Sanborn map, an auto service facility occupied the southern portion (former Rainier Laundry/machine shop) of the block. Based on city directory records, these buildings were used by Frank Kenney Toyota for auto sales and service from the 1970s to 1980s and were subsequently

converted to restaurant and retail use. No addresses corresponding to the east-adjacent city block are identified on EDR's proprietary databases of former auto service or dry cleaner sites.

South. The south-adjacent property is shown as unoccupied in the 1917 Sanborn map. According to King County iMAP, the existing south-adjacent building was built in 1922. City directories and Sanborn maps identify Mack International Motor Truck Company as occupant from construction until the early 1950s. In the 1950s and 1960s, the building was used as a warehouse by City Light. Additional building occupants included "Jules Glass Upholstery Auto Windows" in 1966, Truckweld Equipment storage in 1970, additional showroom for Frank Kenney Toyota in 1986, "Pedersens Ski & Sport in 1996, and "Buca Inc" in 2005.

The city block to the south across Roy Street is occupied by a bakery, Commercial Sash & Door Company, and a boarding and sales facility in the 1917 Sanborn map. In the 1950 Sanborn map, the city block to the south across Roy Street was occupied by a paint store, a sign printing facility and a general storage facility. These buildings were removed for the widening of Valley Street in the 1960s. No addresses corresponding to the south-adjacent properties are identified on EDR's proprietary databases of former auto service or dry cleaner sites.

West. The existing building on the west-adjacent property was built in 1926. In the 1950 Sanborn map Puget Sound Power & Light Company occupies southwest-adjacent building and small storage buildings are shown due west of the subject property. Aerial photographs dated 1965 show a storage facility across the alley to the west and the existing parking lot to the northwest. The 1969 Sanborn map shows a gas station across the alley to the west, the city light facility, and a vacant lot (parking lot) to the northwest. The gas station building remains visible in aerial photographs dated through 1985. City of Seattle has owned the west-adjacent property since at least the 1990s and uses it for offices and maintenance by utilities and parks departments; this property is identified on regulatory databases as "Roy Street Shops".

The city blocks to the west across 8th Avenue North are currently construction sites. In the 1950s and 1960s, the city block to the northwest was occupied by carpenter and cabinet shops, and the city block to the southwest was occupied by American Linen Supply Company industrial laundry, a small gas station, and auto repair. The following businesses with addresses corresponding to properties to the west across 8th Avenue North are identified on EDR's proprietary database of historical auto service stations or dry cleaner sites:

- Maryatt Electric Laundry at 8th Avenue North and Roy Street (EDR Historical Cleaners),
- 771 Valley Street (EDR Historical Auto),
- Maryatt Electric Laundry at 770 Roy Street (EDR Historical Cleaners).
- 835 8th Avenue North (EDR Historical Auto),
- 761 Aloha Street (EDR Historical Auto)

4.0 SITE RECONNAISSANCE

4.1. Subject Property Observations

A representative of GeoEngineers performed a visual reconnaissance of the subject property on September 4, 2014. The GeoEngineers representative was accompanied by Dave Konkle (MAACO owner, current occupant with knowledge of current daily use of the subject property) and F. Bartow Fite III (property owner representative, identified as Key Site Manager for this report, with knowledge of historic uses at the subject property) during the site reconnaissance.

The subject property was accessed from east-adjacent 9th Avenue North and the west-adjacent public right-of-way alley. We entered and observed automobile service spaces within both buildings, representative office areas, the customer lobby, and the paved parking/storage lot. Our visual reconnaissance focused on areas where hazardous substance use, storage and/or disposal was likely, based on our experience. At the time of the site visit, numerous vehicles were parked inside the buildings and in the parking lot, obstructing visual observation of the building floors and paved areas in some locations.

Table IV below summarizes conditions observed during our site reconnaissance. The approximate locations of the observed features discussed in this section are shown in Figure 3. Photographs of the subject property were taken to document observations made during our reconnaissance. Selected photographs of the subject property are included in Figure 4.

TABLE IV. SUMMARY OF SITE RECONNAISSANCE OBSERVATIONS

Features	Observed		Comment
	Yes	No	
Current Uses and Existing Structures	X		The existing buildings are used by MAACO for automobile servicing, collision repair and painting. Two paint booths (one in each building) are used for vehicle painting. A paint mixing and storage room is used for storage of hazardous liquids.
Evidence of Past Uses and Former Structures		X	--
Heating/Cooling System	X		Electric heat lamps suspended from ceiling.
Floor Drains, Sumps or Drywells	X		Large floor drains were observed in north building and parking area. The Key Property Manager indicated that drainage piping runs between each drain and through a water-oil separator before connecting to the City sewer line located beneath the alley.
Aboveground Storage Tanks (ASTs)		X	--
Underground Storage Tanks (USTs) or Evidence of USTs	X		We observed an area where a former heating oil UST was abandoned-in-place in the late 1990s. No evidence of the UST was visible during the site visit.

Features	Observed		Comment
	Yes	No	
Drums or Other Containers	X		Numerous 55-gallon drums were observed throughout the subject property. The Key Site Manager stated that the drums are “generally empty.” MAACO used to receive materials inside these drums and Mr. Konkle retains the empty drums for uses around the subject property including storage, support for work counters, and barriers.
Identified Hazardous Substances and Petroleum Products (other than drums noted above or <i>de minimis</i> quantities of cleaning products)	X		A hazardous and flammable liquids storage room is located in the northwest corner of the south building. The storage room contains paint and motor oil products and other automotive fluids. The room has an exhaust system and a 4-inch concrete sill for secondary containment.
Unidentified Substances or Containers	X		Although the Key Site Manager indicated that the numerous 55-gallon drums at the subject property are empty, we did not inspect all drums and we observed only one drum label reading: “Flammable Liquids 3.” This labeled drum was empty at the time of the site visit.
Evidence of Leaks, Spills or Releases Surrounding ASTs, USTs and/or Chemical Storage Areas		X	--
Stained or Corroded Floors, Walls or Drains (other than the above or apparent water stains or minor oil stains on pavement from parked vehicles)		X	--
Hydraulic Hoists		X	--
Oil/Water Separators		X	The Key Site Manager indicated that an oil/water separator is located near the west property boundary where property drainage pipes connect to the City sewer line in the alley. We did not visually inspect the oil/water separator.
Electric or Hydraulic Equipment Containing PCBs	X		Two pole-mounted transformers are located on an electrical pole on the west property boundary at the parking area. We did not observe PCB-free stickers on or near the transformers or visible staining on or around the utility pole.
Discolored, Stained, or Stressed Soil or Vegetation Potentially from Hazardous Substances		X	--

Features	Observed		Comment
	Yes	No	
Solid Waste	X		One solid waste dumpster and several plastic refuse cans were observed in the south building near the 9 th Avenue North entrance. Housekeeping practices in this area appeared good.
On-site Septic or Sewage Disposal System		X	The current occupant indicated that the subject property is connected to the municipal sewer system. Side sewer cards show the subject property connected to combined main lines running from south to north below the alley and 9 th Avenue North.
Potable Water Supply	X		Municipal drinking water connection.
Standing Water or Other Pooled Liquids	X		Shallow standing water puddles were observed on the asphalt work yard surface near the south building north garage door. No sheen was observed on the surface of the water.
Catch Basins, Stormwater Drainage, or other Wastewater Discharges	X		Stormwater drainage pipes from each of the two building roofs were observed; one pipe for the south building near the south building north garage door, and one pipe associated with the north building on the north-facing wall. The stormwater pipes connect to combined sewer and drainage subsurface piping that passes through the oil/water separator before connecting to the City pipe line in the alley. Precipitation collected on the paved storage/work yard flows into a catch basin located near the northwest corner of the yard and then enters the same underground combined system.
Pits/Ponds/Lagoons		X	--
Strong, Pungent or Noxious Odors	X		A paint-like smell was readily noticeable inside both buildings at the subject property. Both buildings house a paint booth where vehicle exteriors are painted. We observed exhaust systems attached to each paint booth that appeared well maintained.
Water Wells (agricultural, domestic, monitoring)	X		Three monitoring wells were observed in the locations shown on Figure 3, Site Plan. These wells were installed for geotechnical purposes as described in our geotechnical report, which will be submitted under separate cover.
Other Conditions of Environmental Concern		X	--

4.2. Adjacent Property and Vicinity Observations

We viewed properties located adjacent to and surrounding the subject property on September 4, 2014 from accessible public rights-of-way and the subject property. We did not enter adjacent properties or buildings. The subject property generally is situated in an area that is heavily developed for commercial uses. Table V below outlines adjacent land uses and pertinent observations with respect to conditions that could pose a REC to the subject property. No prior uses of adjacent properties or the surrounding area were evident from the site reconnaissance except as noted below. Figure 2 shows adjacent property uses and locations in relation to the subject property.

TABLE V. ADJOINING STREETS AND ADJACENT PROPERTIES OBSERVATIONS

Direction	Adjoining Street	Position Relative to Subject Property ¹	Adjacent Property and Use	Comments
North	None	Crossgradient	Commercial/office building occupied by KPG Architects.	North-adjacent site is listed by Ecology as “Bayside Volvo”
South	None	Crossgradient	Commercial building occupied by Ducati Auto Showroom.	South-adjacent site is listed by Ecology as “Frank Kenney Toyota”
East	9 th Avenue North	Downgradient	Commercial building occupied by World’s Sports Grill.	None
West	Public alley	Upgradient	Commercial building occupied by office spaces.	West-adjacent property is Ecology listed as “Roy Street Shops”

Note:

¹ The inferred shallow groundwater flow direction in the vicinity of the subject property is toward the east or northeast, as described in Section 3.1.

5.0 INTERVIEWS

Our understanding of the history of the subject property presented in Section 3.0 is partially based on interviews with the individuals listed in Table VI. Pertinent historical findings from interviews have also been integrated into Section 4.0 above.

TABLE VI. PERSONS INTERVIEWED

Agency Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Comment
Key Site Manager /Property Owner	F. Bartow Fite, III	Owned property for last 20 years (approximate)	09/04/2014	See Section 5.1.
Current Occupant	David Konkle, MAACO Branch Owner	Occupied property late 1980s to current	09/06/2014	See Section 5.2.
Interview	Melodi Drake, Seattle Fire Department Administrative Assistant	Recent	08/22/2014	Ms. Drake provided an image of the UST decommissioning record for the subject property as discussed in Section 2.2 and 5.3.

5.1. Interview with the Key Site Manager (Owner)

A GeoEngineers representative interviewed F. Bartow Fite III, subject property owner representative, during our September 4, 2014 site reconnaissance. Mr. Fite is considered a “key site manager” for the purposes of the Phase I ESA and our interview with Mr. Fite also serves as an owner interview. Mr. Fite provided information about historic site use and historic use of adjacent properties included in Section 3.4.1 and 3.4.2. Mr. Fite indicated that the subject property was a truck welding company before he owned it, but did not know any details regarding previous ownership. Mr. Fite indicated that the neighboring property referred to as the “Roy Street Shops” is believed to be generating a contaminated groundwater plume in the area. Mr. Fite had no knowledge of USTs other than the decommissioned UST described in Section 2.2, ASTs, spills, releases, or other use or storage of hazardous materials at the subject property.

5.2. Interview with Occupants

The building is occupied by MAACO Auto Paint and Collision Repair. We interviewed David Konkle, MAACO’s branch owner, during our September 4, 2014 site reconnaissance. Mr. Konkle provided information about current and recent (since late 1980s) site use included in Section 3.4.1 and 4.1. Mr. Konkle indicated that the subject property has been used for automobile painting and collision repair since MAACO became the subject property occupant in the late 1980s. Mr. Konkle also indicated that hazardous liquids are stored in the paint mix/storage room and that vehicle painting generally occurs inside one of two paint booths located inside the subject property buildings. Mr. Konkle did not have knowledge of any spills or releases at the subject property.

5.3. Interviews with Local Government Officials

We contacted the Seattle Fire Marshal’s office regarding records regarding USTs, fuels, or hazardous materials at the subject property. Melodi Drake, Seattle Fire Department Administrative Assistant, provided an image of the decommission record associated with a UST located at the subject property. This record indicates that Seattle Fire issued a permit for in-place-closure of a less than 1,000-gallon heating oil UST in 1999. Ms. Drake did not provide any information regarding fuels or other hazardous materials related to the subject property.

6.0 EVALUATION

6.1. Findings and Opinion

The following general findings were identified in connection with the Subject Property:

- The subject property was formerly located along the Lake Union Shoreline prior to stabilization of the water level in 1916. Refuse and debris was commonly used to fill low-lying areas in the early 1900s, and fill material impacted by metals, petroleum, and polycyclic aromatic hydrocarbons (PAHs) is commonly found in shallow soils in the South Lake Union area. Fill material containing fragments of glass and brick was identified in shallow soil during recent geotechnical borings at the site. Debris-containing fill material is considered a REC to the subject property.
- The first identified developed use of the subject property is as an 80-foot wide public right-of-way, Broad Street, constructed prior to 1917 running northeast-southwest across the subject property and subsequently rerouted or abandoned.
- The existing north building was built in 1924 and was originally occupied by Westland Tire Service. Building plans of the existing north building dated 1947 show a furnace with unspecific fuel source located in the northeast corner of the building.
- From 1940 to 1980 the subject property was occupied by a variety of truck welding companies and underwent numerous additions and equipment upgrades.
 - The north building as used for steel tank manufacturing and welding in 1948.
 - The south building was built in 1955 for use by then-owner Truck Welding and Equipment Company.
 - By 1969 both buildings were used for truck body assembly and welding, automobile body repair and servicing, and/or vehicle or truck painting.
- From about 1980 to at least 1984 the property was occupied by Multi-Craft Plastics Inc. and used for general storage and distribution of plastic products. No information regarding types of materials stored at the subject property during this time was included in readily available resources.
- The existing subject property occupant (MAACO) began occupancy in the 1990s. MAACO conducts vehicle paint and body work and maintains building spaces for paint spray booths, ovens, and a paint mix and storage room.
- Multiple nearby properties are Ecology-listed sites with known subsurface contamination. Two of these properties (American Linen Supply Company and Roy Street Shops), are located upgradient to the subject property and have documented contamination of soil and groundwater. American Linen Supply Company has documented contamination extending off-site in the direction of the subject property. The north-adjacent property (Bayside Volvo) has had three USTs closed-in-place and petroleum-contaminated soil and groundwater has been identified at the site. Shallow petroleum-contaminated soils were reportedly identified at the south-adjacent property (Frank Kenney Toyota) in 1988. American Linen, Roy Street Shops, Bayside Volvo, and Frank Kenney Toyota sites are all considered RECs to the subject property based on proximity and/or cleanup status.
- The immediate subject property neighborhood is characterized by a long history of auto and truck repair and similar light industrial activities.

- One previous environmental assessment conducted at the subject property was provided for our review. The 1999 Phase I ESA by Terra Associates included the following general findings:
 - Terra Associates concluded there was a “high potential for environmental issues or impairment of the property” due to the subject property historic and site uses and neighborhood history of light industrial and commercial uses since the development of the neighborhood.
 - Terra identified an unregistered 500-gallon UST. The Terra report included documents indicating the UST as closed-in-place by Ultra Tank Services, however the methods used were not included in the assessment report and a UST Removal Report was not available for review. The subsurface condition in the vicinity of the UST is unknown.

6.2. Data Gaps

Two significant data gaps were identified by this portion of the study:

- Specifics regarding the possible use and storage of petroleum or hazardous substances on the subject property, and waste disposal practices associated with historical businesses that occupied the subject property, could not be identified during this Phase I ESA. This lack of available information is an example of “data failure,” a type of data gap. This data gap is potentially significant if previous building occupants historically used or stored large quantities of hazardous substances and spills or releases occurred that would introduce contaminants to the subsurface.
- Specifics regarding the method of closure of the UST located in the northeast corner of the subject property storage/work yard were not available for our review. Additionally, we did not find any investigations into possible releases from the UST, such as sampling in the immediate area around and/or beneath the tank. This lack of available information is considered a potentially significant data gap.

6.3. Conclusions

GeoEngineers has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 of the Seattle Marriot AC Property located at 739 9th Avenue North in Seattle, Washington. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of RECs in connection with the subject property except for the following:

6.3.1. On-Site RECs

- **Past light industrial uses at the subject property.** Truck body assembly and welding, automobile body repair and servicing, and/or vehicle or truck painting are currently conducted at the property, and have been conducted at the property since it was first developed in the early 1920s. Significant quantities of paints and automotive fluids (paints, oils, coatings) are currently and were likely historically used and stored at the subject property. Vehicle fueling is not known to have occurred on the property. Potential pathways for spills or releases to enter the subsurface include storm drains in the north building floor and in the northwest corner of the paved storage/work yard.

- **Closed-in-place heating oil UST.** A 500-gallon heating oil UST was formerly in use in the northwest corner of the subject property storage yard. The UST was closed-in-place in 1999, but soil and groundwater sampling was not conducted at that time. Soil contamination may be present in the vicinity of the UST.
- **Fill material** impacted by metals, petroleum, and PAHs is commonly found in shallow soils in the South Lake Union area. Fill material containing fragments of glass, brick and other debris was identified in shallow soil during recent geotechnical and environmental borings at the site. Debris-containing fill material is considered a REC to the subject property.

6.3.2. Off-Site RECs

- **Nearby and adjacent properties.** Several properties to the north, south and west are Ecology-listed contaminated sites. Several upgradient or cross-gradient properties present RECs to the subject property due to potential for migratory contamination. The following two sites are adjacent crossgradient to the subject property with minimal information available regarding subsurface condition:
 - The north-adjacent **Bayside Volvo** site has a long history of automotive repair activities and three USTs were closed-in-place at the site. Petroleum hydrocarbons have been identified in site soil and groundwater.
 - Long history of truck repair at the south-adjacent property (**Frank Kenney Toyota/ 715 9th Avenue**). A 1988 site investigation reportedly identified localized shallow petroleum contamination at the site. Details regarding the nature and extent of the contamination were not included in the documents available for review.
- The following two sites are located west and upgradient of the subject property and have contaminated groundwater plumes that have likely impacted the subject property.
 - Benzene and petroleum contamination has been confirmed in soil and groundwater at the adjacent **Roy Street Shops** site to west. Roy Street Shops was historically a maintenance facility for City of Seattle, Puget Sound Power & Light, and a gasoline service station. The west-adjacent property is also identified in the EDR report as the “Aloha” site, with documented petroleum contamination in site soil and groundwater.
 - Volatile organic compounds ([VOCs] including chlorinated solvents), gasoline-, diesel-, oil-range hydrocarbons, and BTEX contamination has been documented in soil and groundwater at the **American Linen Supply Company** site to the southwest. American Linen was an industrial laundry that used dry cleaning solvents that have represented a significant release to the neighborhood. Contaminated groundwater has reportedly migrated from the American Linen site to the east and beneath the subject property. Significant cleanup action including electrical resistance heating has been completed at the site, but additional performance monitoring information has yet to be reviewed at Ecology.

We note that according to Revised Code of Washington (RCW) 70.105D.020 (22)(iv), commonly referred to as the “plume clause exemption,” a property owner is exempt from environmental liability from plumes that migrate onto their property from an off-property source. Therefore, the owners and occupants of the subject property likely will not be held liable for any plume originating from the American Linen Supply Company site or other nearby contaminated sites. We note however that future construction plans at the

subject property calling for excavation and/or dewatering may require appropriate handling and disposal of potentially impacted soil and groundwater.

In our opinion, there is a risk of subject property impacts of regulatory significance to subject property soil, groundwater, and/or soil vapor resulting from the conditions identified above.

7.0 LIMITATIONS AND GUIDELINES FOR USE

These Limitations provide information to help you manage your risks with respect to the use of this report. Some clients, design professionals and contractors may not recognize that the geoscience practices (geotechnical engineering, geology and environmental science) are far less exact than other engineering and natural science disciplines. This lack of understanding can create unrealistic expectations that could lead to disappointments, claims and disputes. GeoEngineers includes these explanatory “limitations” provisions in our reports to help reduce such risks. Please confer with GeoEngineers if you are unclear how these “Report Limitations and Guidelines for Use” apply to your project or site.

7.1. Standard Limitations

This Phase I ESA has been prepared for use by WPPI Bellevue, LLC. GeoEngineers has performed this Phase I ESA of the Seattle Marriott AC at 739 9th Avenue North in general accordance with the scope and limitations of our proposal dated August 20, 2014 and ASTM International (ASTM) E 1527-13, Standard Practice for Phase I ESAs and EPA’s Federal Standard 40 CFR Part 312 “Standards and Practices for All Appropriate Inquiries (AAI).” This report has been prepared for the exclusive use of WPPI Bellevue, LLC and their clients. This report is not intended for use by others, and the information contained herein is not applicable to other properties. Our report was prepared for the exclusive use of our Client. No other party may rely on the product of our services unless we agree in advance to such reliance in writing. This is to provide our firm with reasonable protection against open-ended liability claims by third parties with whom there would otherwise be no contractual limits to their actions.

Within the limitations of scope, schedule and budget, our services have been executed in accordance with the generally accepted environmental science practices for Phase I ESAs in this area at the time this report was prepared. No warranty or other conditions express or implied, should be understood.

Any electronic form, facsimile or hard copy of the original document (email, text, table, and/or figure), if provided, and any attachments are only a copy of the original document. The original document is stored by GeoEngineers, Inc. and will serve as the official document of record.

7.2. Special Limitations

GeoEngineers structures our services to meet the specific needs of our clients. For example, an environmental site assessment study conducted for a property owner or lessee may not fulfill the needs of a prospective purchaser of the same property. Because each environmental study is unique, each environmental report is unique, prepared solely for the specific client and project property. This report should not be applied for any purpose or project except the one originally contemplated. GeoEngineers considered a number of unique, project-specific factors when establishing the scope of services for this project and report. Unless GeoEngineers specifically indicates otherwise, do not rely on this report if it was:

- not prepared for you,
- not prepared for your project,
- not prepared for the specific property explored, or
- completed before important project changes were made.

If important changes are made to the project or subject property after the date of this report, GeoEngineers should be retained to review our interpretations and recommendations and to provide written modifications or confirmation, as appropriate.

GeoEngineers makes no warranties or guarantees regarding the accuracy or completeness of information provided or compiled by others. The information presented in this report is based on the above-described research and a single recent site visit. GeoEngineers has relied upon information provided by others in our description of historical conditions and in our review of regulatory databases and files. The available data do not provide definitive information with regard to all past uses, operations or incidents at the subject property or adjacent properties.

No ESA can wholly eliminate uncertainty regarding the potential for recognized environmental conditions (RECs) in connection with a property. Performance of an ESA study is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property. There is always a potential that areas with contamination that were not identified during this Phase I ESA exist at the subject property or in the study area. Further evaluation of such potential would require additional research, subsurface exploration, sampling and/or testing.

Some substances may be present in the vicinity of the subject property in quantities or under conditions that may have led, or may lead, to contamination of the subject property, but are not included in current local, state or federal regulatory definitions of hazardous substances or do not otherwise present current potential liability. GeoEngineers cannot be responsible if the standards for appropriate inquiry, or regulatory definitions of hazardous substance, change or if more stringent environmental standards are developed in the future.

This environmental report is based on conditions that existed at the time the study was performed. The findings and conclusions of this report may be affected by the passage of time (for example, a Phase I ESA report is typically applicable for 180 days), by events such as a change in property use or occupancy, or by natural events, such as floods, earthquakes, slope instability or groundwater fluctuations. If more than six months have passed since issuance of our report or work product, or if any of the described events may have occurred, please contact GeoEngineers before applying this report so that we may evaluate whether changed conditions affect the continued reliability or applicability of our conclusions and recommendations.

The equipment, techniques and personnel used to perform an environmental study differ significantly from those used to perform a geotechnical or geologic study and vice versa. For that reason, a geotechnical engineering or geologic report does not usually relate any environmental findings, conclusions or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. Similarly, environmental reports are not used to address geotechnical or geologic concerns regarding a specific project.

GeoEngineers' Scope of Work specifically excludes the investigation, detection, prevention or assessment of the presence of Biological Pollutants. Accordingly, this report does not include any interpretations, recommendations, findings, or conclusions regarding the detecting, assessing, preventing or abating of Biological Pollutants and no conclusions or inferences should be drawn regarding Biological Pollutants, as they may relate to this project. The term "Biological Pollutants" includes, but is not limited to, molds, fungi, spores, bacteria, and viruses, and/or any of their byproducts. If Client desires these specialized services, they should be obtained from a consultant who offers services in this specialized field.

We appreciate the opportunity to be of service to WPPI Bellevue, LLC. Please call if you require more information or have questions regarding this report.

9.0 STATEMENT AND SIGNATURES OF ENVIRONMENTAL PROFESSIONAL

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Sec. 312.10 of 40 CFR Part 312."*

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."*

**A person who does not qualify as an Environmental Professional may assist in the conduct of all appropriate inquiries in accordance with ASTM E 1527-13, if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional when conducting such activities.*

Jessica Robertson, LG
Environmental Geologist

Jessica A. Smith, LG

David A. Cook, LG, CPG
Principal

9.1. Qualifications of Environmental Professional

Dave Cook is a licensed geologist (LG) in Washington (#346), a certified professional geologist (#CPG 11388) and has 20 years of experience completing and overseeing Phase I ESAs. Dave is an Environmental Professional per 40 CFR Part 312. Jessica Smith is a licensed geologist (LG) in Washington (#2897) and has more than 9 years of experience doing Phase I ESAs. Jessica is an Environmental Professional per 40 CFR Part 312. Jessica Robertson is a licensed geologist (LG) in Washington (#2570) and has more than 10 years of experience doing Phase I ESAs. Jessica is an Environmental Professional per 40 CFR Part 312.

Resumes for Dave Cook, Jessica Smith and Jessica Robertson are presented in Appendix E.

APPENDIX A
User Provided Information and
User Questionnaire

PHASE I ESA USER QUESTIONNAIRE
MARRIOTT DEVELOPMENT
739 9TH AVENUE NORTH
SEATTLE, WASHINGTON
GEI FILE NO. 20776-003-00

In order to qualify for one of the federal landowner liability protections, and to enable us to fully address the objectives of the Phase I ESA, please complete the questionnaire below to the best of your knowledge and provide the additional information requested.

1. Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, tribal and state or local law?
 YES NO DON'T KNOW Explain:
2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls, that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state or local law?
 YES NO DON'T KNOW Explain:
3. As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the subject property or nearby properties? For example are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
 YES NO DON'T KNOW Explain:
4. Does the purchase price being paid for the subject property reasonable reflect the fair market value of the property?
 YES NO DON'T KNOW Explain:
 ≠ If you conclude that there is a difference and you answered NO above, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
 YES NO DON'T KNOW Explain:
5. Are you aware of commonly known or reasonably ascertainable information about the subject property that would help us identify conditions indicative or releases or threatened releases? For example,
 - ≠ Do you know the past uses of the property?
 YES NO DON'T KNOW Explain:
 - ≠ Do you know of specific chemicals that are present or once were present on the property?
 YES NO DON'T KNOW Explain:
 - ≠ Do you know of spills or other chemical releases that have taken place at the property?
 YES NO DON'T KNOW Explain:
 - ≠ Do you know of any environmental cleanups that have taken place at the property?
 YES NO DON'T KNOW Explain:

6. Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

YES NO DON'T KNOW Explain: _____

User Questionnaire Completed By (Name and Organization): _____

Date: _____

List of Requested Information, If Available

- Names and phone numbers of key individuals with knowledge of property use history.
- A map showing the boundaries of the subject property.
- Tax ID numbers for parcels included within the subject property.
- Copies of any past environmental site assessment and/or audit reports or risk assessment studies.
- Environmental permits.
- Registrations for underground and aboveground storage tanks (if any).
- Material data safety sheets for hazardous substances used or stored on-site (if any).
- Community right-to-know plans pertaining to the subject property.
- Safety plans pertaining to on-site facilities.
- Reports regarding geotechnical and/or hydrogeologic conditions at or near the subject property.
- Notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the subject property or relating to environmental liens encumbering the property.
- Recorded Activity Use Limitations (AULs)
- Chain-of-Title or other Title Report documents

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 5 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/26/2014 has revealed that there are 27 WA HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 04/22/2014 has revealed that there are 103 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

WA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the WA LUST list, as provided by EDR, and dated 05/20/2014 has revealed that there are 19 WA LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, and dated 06/30/2014 has revealed that there are 22 WA UST sites within approximately 0.25 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 04/22/2014 has revealed that there are 37 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/11/2014 has revealed that there are 37 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 60 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 10 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 12/31/2003
Site name: UTILITIES INC
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

UTILITIES INC (Continued)

1007265609

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

Registry ID: 110005394867

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D022
Waste name: CHLOROFORM

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: P012
Waste name: ARSENIC OXIDE AS2O3

Waste code: P098
Waste name: POTASSIUM CYANIDE

Waste code: U108
Waste name: 1,4-DIETHYLENEOXIDE

Waste code: U117
Waste name: ETHANE, 1,1'-OXYBIS-(I)

Waste code: U123
Waste name: FORMIC ACID (C,T)

Waste code: U213
Waste name: FURAN, TETRAHYDRO-(I)

Waste code: WSC2
Waste name: Washington State solid or semisolid corrosive Dangerous Waste with a pH less than or equal to 2, or greater than or equal to 12.5, based upon a specific testing method.

Waste code: WT02
Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D004
Waste name: ARSENIC

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Form Comm: Manifests/Generator Names/RCRA Site ID Numbers: The Seattle Times Company (WAH000038328) undertook a site cleanup at 307 Fairview Avenue North, Seattle, WA 98109 and generated dangerous waste in 2012 as part of that remediation. The property was sold during 2012 to Touchstone SLU LLC. Manifest 009475739JJK reports Touchstone SLU LLC as the generator name, but uses the Seattle Times Company RCRA Site ID Number (WAH000038328).

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D004

Waste name: ARSENIC

Waste code: D005

Waste name: BARIUM

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D004

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transporter: No

Hazardous Waste Summary:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Violation Status: No violations found

Registry ID: 110005306695

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Date form received by agency: 12/31/2003
Site name: DAWN FOOD PRODUCTS
Classification: Not a generator, verified

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011

Waste name: SILVER

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS

Waste code: U058
Waste name: CYCLOPHOSPHAMIDE

Waste code: U150
Waste name: MELPHALAN

Waste code: U188
Waste name: PHENOL

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 11024.2

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 774

Waste code: D011

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Facility Alt.: Not reported
Program ID: 5898
Date Interaction: 01/01/1972
Date Interaction 3: 01/01/1972

Facility Id: 21844229
Latitude: 47.6188183
Longitude: -122.33331
Ecology Interest Type Code: SCS
Facility ID: 21844229
Facility Company: RED CARPET CAR WASH
Interaction: A
Interaction 1: LUST
Interaction 2: LUST Facility
Ecology Program: TOXICS
Program Data: ISIS
Facility Alt.: Not reported
Program ID: 5898
Date Interaction: 01/25/1993
Date Interaction 3: 01/25/1993

Date Interaction: 01/01/1972
Date Interaction 3: 01/01/1972

LUST:

Facility ID: 21844229
Facility Status: Cleanup Started
Cleanup Site ID: 3230
Cleanup Unit Type: Upland
Process Type: No Process
Alternate Name: RED CARPET CAR WASH
Release Status Date: 06/01/1995
Site Response Unit Code: Northwest
Lat/Long: 47.6188183 / -122.33331

UST:

Facility ID: 21844229
Site Id: 5898
UBI: Not reported
Phone Number: 2066243717
Decimal Latitude: 47.61881838
Decimal Longitude: -122.3333154

Tank Name: REG
Tag Number: Not reported
Tank Status: Removed
Tank Status Date: 08/06/1996
Tank Install Date: 00/01/1972
Tank Closure Date: Not reported
Capacity Range: Not reported
Tank Permit Expiration Date: Not reported
Tank Upgrade Date: Not reported
Tank Spill Prevention: Not reported
Tank Overfill Prevention: Not reported
Tank Material: Steel
Tank Construction: Not reported
Tank Tightness Test: Not reported
Tank Corrosion Protection: Sacrificial Anode
Tank Manifold: Not reported
Tank Release Detection: Not reported
Tank SFC Type: Not reported
Pipe Material: Steel
Pipe Construction: Not reported
Pipe Primary Release Detection: Not reported
Pipe Second Release Detection: Not reported
Pipe Corrosion Protection: Not reported
Pipe Pumping System: Not reported
Responsible Unit: NORTHWEST
Dispenser/Pump SFC Type: Not reported
