**Re: PSC-Georgetown facility - WAD 00081 2909
Class III Permit Modification and Final Permit**

Dear Mr. Beck:

Pursuant to WAC 173-303-840, a 45-day public comment period was held from May 9 to June 25, 2014, to solicit public comments on the Washington State Department of Ecology's (Ecology's) modification of the PSC Environmental Services/Burlington Environmental (PSC) – Georgetown facility dangerous waste management permit. Ecology's modification to the permit was based on PSC's January 6, 2014, Class III permit modification request. No comments were received during the recent comment period. In the absence of comments requesting changes in our draft permit, PSC's permit is effective immediately upon issuance. The permit's effective date is therefore today, June 27, 2014.

Our letter encloses the final permit, which is identical to the draft permit issued for public comment on May 9. If you have any questions about today's letter, please contact me at (425) 649-4449 or ejon461@ecy.wa.gov.

Sincerely,

Ed Jones, Environmental Engineer
Hazardous Waste & Toxics Reduction Program

Enclosure A

June 27, 2014 PSC-Georgetown Permit

STATE OF WASHINGTON
DANGEROUS WASTE MANAGEMENT PERMIT
FOR CORRECTIVE ACTION

Department of Ecology
Northwest Regional Office
3190 160th Ave. S.E.
Bellevue, Washington 98008-5452

Issued in accordance with the applicable provisions of the Hazardous Waste Management Act in Chapter 70.105 Revised Code of Washington (RCW), and the regulations promulgated thereunder in Chapter 173-303 Washington Administrative Code (WAC).

ISSUED TO:

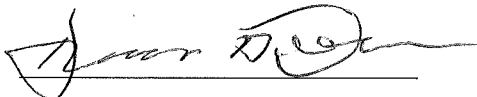

Burlington Environmental, LLC
18000 – 72nd Avenue South, Suite 217
Kent, Washington 98032

FOR:

Burlington Environmental, LLC
734 South Lucile Street
Seattle, Washington 98108

This Permit is effective as of June 27, 2010, and shall remain in effect until June 27, 2020, unless revoked and reissued, modified, or terminated under WAC 173-303-830(3) and (5) or continued in accordance with WAC 173-303-806(7). Upon becoming effective, this Permit replaces Permit No. WAD 000812909 issued by the United States Environmental Protection Agency and the Washington State Department of Ecology on August 5, 1991, under which Burlington Environmental, LLC has been continuing to operate pursuant to WAC 173-303-806(7).

ISSUED BY: WASHINGTON STATE DEPARTMENT OF ECOLOGY

Dennis B. Johnson, Section Manager
Department of Ecology
Hazardous Waste and Toxics Reduction Program
Northwest Regional Office

Date 6/27/14

INTRODUCTION

PERMITTEE: Burlington Environmental, LLC a wholly owned subsidiary of PSC
Environmental Services, LLC.

I.D. Number: WAD 000812909

Pursuant to Chapter 70.105 RCW, the Hazardous Waste Management Act of 1976, as amended, and regulations codified in Chapter 173-303 WAC, a permit is issued to Burlington Environmental, LLC, a wholly owned subsidiary of PSC Environmental Services, LLC (hereafter collectively referred to as "PSC"), to conduct corrective action at PSC Georgetown Site. The site consists of: a) the original permitted parcel consisting of approximately two acres located at 734 Lucile Street, Seattle, Washington; b) an unpermitted parcel of approximately four acres (the former Amalgamated Sugar Company or "TASCO" property), located at 5400 Denver Avenue, Seattle, Washington, adjacent and contiguous to the property described in a); and, c) areas where hazardous substances released at the parcels described in a) and b) above have been deposited, stored, disposed of, placed, or otherwise come to be located. PSC must comply with all conditions of this Permit.

Pursuant to RCW 70.105D.030(1)(d), the Washington State Department of Ecology (Ecology) is designated by the Washington State Legislature to carry out all State programs authorized by the United States Environmental Protection Agency (EPA) pursuant to the federal Resource Conservation and Recovery Act (RCRA), 42 U.S.C. Sec. 6901 et. seq., as amended. Ecology has authority to issue this Permit in accordance with RCW 70.105.130 and is responsible for enforcement of all conditions of this Permit. Anyone may appeal these permit conditions or decisions by Ecology to the Pollution Control Hearings Board in accordance with WAC 173-303-845.

PART I - GENERAL CONDITIONS

I.1 PSC shall comply with all requirements of WAC 173-303-810, which are hereby incorporated by reference into this Permit. In addition to the terms stated herein, the corrective action obligations with respect to the facility contained in Agreed Orders No. DE 7347 and DE 10402 are enforceable terms of this Permit.

I.2. Modifications to the Orders shall not require a permit modification, except when required by WAC 173-303-830, Appendix I (N)(5) to incorporate a substantial change requiring public comment under WAC 173-340-600. The Orders are not appealable to the Pollution Control Hearings Board. The Orders may be reviewed only as provided under the Model Toxics Control Act (“MTCA”), Chapter 70.105D.060 RCW.

I.3. Compliance with the terms of this Permit does not constitute a defense to any order issued or any action brought under any other state or federal laws governing protection of public health or the environment. However, compliance with the terms of this Permit does constitute a defense to any action alleging failure to comply with the applicable standards upon which this Permit is based.

I.4. Pursuant to WAC 173-303-806(6), PSC shall submit a new application for a final permit 180 days prior to the expiration date of this permit, unless Ecology grants a later date provided that such date is not later than the expiration date of the Permit. This Permit and all its conditions will remain in effect beyond the Permit's expiration date until Ecology has made a final permit determination if: (a) the Permittee has submitted a timely application for a final status permit; (b) Ecology determines that the final permit application is complete as set forth in WAC 173-303-840(1)(b); and (c) Ecology has not made a final permit determination as set forth in WAC 173-303-840.

If PSC fails to comply with the terms and conditions of the expiring or expired permit, then Ecology may take action consistent with WAC 173-303-806(7)(b). If PSC fails to submit a timely, complete application as required herein, then those permit conditions necessary to protect human health and the environment will remain in effect beyond the Permit's expiration date in accordance with WAC 173-303-815(2)(b)(ii), until Ecology terminates the conditions.

PART II - CORRECTIVE ACTION

II. Ecology is requiring that PSC fulfill corrective action responsibilities for the facility, as defined by WAC 173-303-040, using the Model Toxics Control Act (MTCA), (Chapter RCW 70.105D), as amended, and its implementing regulations (Chapter 173-340 WAC), and the Dangerous Waste Regulations [(Chapter 173-303 WAC – specifically, WAC 173-303-646]. See Section III.1, *infra*. The actions taken must meet or exceed all substantive corrective action requirements of the Resource

Conservation and Recovery Act (RCRA), the state Hazardous Waste Management Act, and the Dangerous Waste Regulations.

PSC's corrective action obligations with respect to the facility under Orders No. DE 7347, effective May 28, 2010, and DE 10402, effective April 23, 2014, are enforceable conditions of this Permit under the authority of Chapter 70.105 RCW, and its implementing regulations, Chapter 173-303 WAC.

PART III - CORRECTIVE ACTION CONDITIONS

III.1. The Orders, effective May 28, 2010, and April 23, 2014, were issued pursuant to the Model Toxics Control Act (MTCA), Chapter 70.105D RCW, as amended, its implementing regulations, Chapter 173-340 WAC, and the Dangerous Waste Regulations, WAC 173-303-646. The Orders and their attachments are incorporated by reference as fully enforceable under this Permit. Regardless of whether or not the Orders are vacated, PSC's corrective action obligations continue to be enforceable conditions of this Permit under the authority of the Hazardous Waste Management Act (HWMA), Chapter 70.105 RCW, and its implementing regulations, Chapter 173-303 WAC.

III.2. The PSC Georgetown Site has been administratively divided into two areas: a) an area east of Fourth Avenue South (the "E-4 Area" or "East of 4th"), and b) an area west of Fourth Avenue South (the "W-4 Area" or "West of 4th Site"). Ecology has selected a final cleanup remedy for the E-4 Area of the site. The final cleanup remedy for this part of the site is described in Order No. DE 7347 and its attached Cleanup Action Plan (CAP).

III.3. Ecology has named Art Brass Plating, Inc., Blaser Die Casting Co., Capital Industries, and PSC as Potentially Liable Persons (PLPs) for the West of 4th Site. The Agreed Order for the West of 4th Site (Agreed Order No. DE 10402) requires the four PLPs to perform a Feasibility Study (FS), prepare a FS Report, and draft a CAP. Order No. DE 10402 addresses PSC's obligations to conduct a FS and draft a CAP for the W-4 Area of the site for contaminants of concern (COCs) other than 1,4-dioxane.

III.4. The presence of 1,4-dioxane-contaminated groundwater in the West of 4th Site is due to the migration of contaminated groundwater originating from areas east of 4th Avenue South. Remedial

actions focused on this COC at both the West of 4th Site and areas east of 4th Avenue South will be planned and conducted under Order No. DE 7347.

III.5. When Ecology selects a final cleanup remedy for the entire site, including the W-4 Area of the site, this Permit will be modified as needed to include Ecology's selected remedies. At that time, it will incorporate by reference any additional applicable Orders or Consent Decrees, as determined by Ecology, PSC, and other PLPs (that are responsible for releases of hazardous substances in the W-4 Area of the PSC Georgetown Site).
