**Subject: Interim System Operation Report  
Former Drycleaner Location  
10610 NE 8th  
Bellevue, WA**

Dear Mr. Nielson:

This report summarizes the operational results of the air-sparge and soil-vapor extraction system installed on the subject property. This system was installed and operated in accordance with our Project Authorization letter to BV Holdings, LLC (BV), dated January 5, 2012.

### **Site Background**

The Property is located on the northeast corner of the intersection of NE 8th Street and 106th Avenue NE in downtown Bellevue (Figure 1). During the 1950s, a single structure was built on the site and used as an auto-fueling and service station. In 1976, the service station was converted to operate as a retail/commercial space. A dry-cleaning business operated on the property from 1976 to 1986. During that time, a common dry-cleaning solvent known as tetrachloroethylene (PCE) was used in the operations. After 1986, the structure was used for various commercial uses, including a pet store and toy store (Thinker Toys) until 2007. In 2007, the structure was demolished and the site was converted to its current use as a parking lot.

Several environmental investigations have been conducted on and off of the Property to evaluate contaminant impacts to soil and groundwater from release(s) of PCE. The results of a soil-vapor survey conducted in 2009 by Farallon Consulting, LLC (Farallon) indicated chlorinated solvents were present on the Property. Two subsurface investigations conducted in 2010 by Farallon confirmed that the soil and groundwater on the Property were contaminated with chlorinated solvents, specifically PCE and its associated degradation products. The exact location of the dry-cleaning equipment and disposal areas are unknown, however the highest concentrations of chlorinated solvents are located in the center of the Property (Figure 2).

In 2010/2011, Sound Earth Strategies (SES) produced a Remedial Investigation/Feasibility Study (RI/FS) and an Interim Cleanup Action Plan (ICAP) for the Property. The RI/FS and ICAP included mapping of the identified contaminants (Figures 2 & 3).

In 2012, BV Holdings and two other parties entered into a Settlement Agreement with Sterling Realty Organization (SRO), owner of the property directly across 8<sup>th</sup> Street to the south. With this agreement, a “Reasonable Interim Action” was to be conducted on the subject Property. The purpose of the Interim Action was to reduce contaminants that were migrating in groundwater to downgradient properties and to reduce concentrations of PCE in soils at the Property. Specifically, a treatment system was to be installed in order to reduce soil concentrations such that when these soils are excavated (as part of a future site development) they could be disposed as a “Contained-In” waste, subject to Ecology approval.

The treatment system included an air-sparge and soil-vapor extraction system (AS/SVE) that was installed at the former Thinker Toys property. Installation of the AS/SVE system began in October 2012 after receiving appropriate permits. This report summarizes the observed monitoring results of the system for a six-month period of operation.

### **AS/SVE System Design**

Based on the contaminant-distribution information presented in the SES ICAP, G-Logics installed the AS/SVE remediation system on the Property (Figures 2-4). The completed system consists of 3 air-sparge (AS) wells and 9 soil-vapor extraction (SVE) wells (Figure 4). Well-screen information is presented in Table 1.

During the installation of the wells, soil samples were collected and were screened for the presence of volatile organic compounds using a photoionization detector (PID). PID

readings are noted on the boring logs (Appendix B). Analytical results from submitted soil samples can be reviewed on Table 2, with updated interpretations presented on Figure 5. Sampling and field methods employed during this work can be reviewed in Appendix C.

### **AS/SVE System Components**

The AS/SVE equipment primarily consists of one regenerative blower, one rotary-vane compressor, and related electrical and moisture-control equipment. The equipment is housed in a wood-framed building identified as the Treatment Compound (Figure 6). The regenerative blower produces a vacuum and is intended to remove subsurface vapors from the vadose zone (the SVE portion of the system, completed in December 2012).

The rotary-vane compressor is intended to inject air into the subsurface to volatilize contaminants in the saturated soil and groundwater (the AS portion of the system, completed in January 2013). Several mechanical issues (compressor failures due to water backing up in the lines) plagued the AS portion of the system during the first two months of operation, thus the AS system had sporadic operation through March of 2013 when the AS system issues were resolved.

Underground piping that originates at the treatment compound directs compressed air to a manifold system installed in the “South Vault.” At this location, distribution piping extends to the 3 individual AS wells. Similarly, a vacuum line extends from the treatment compound to the South Vault, where another manifold system directs vacuum to SVE wells 5 through 9. A second vacuum line extends from the treatment compound to the “North Vault”, where a manifold system directs vacuum to SVE wells 1 through 4. A representation of the connecting lines and the vaults is shown on Figure 6. A schematic of the treatment equipment is presented on Figure 7.

### **Subsurface Vapor Sampling**

Vapor samples from the exhaust of the treatment system were collected beginning with the startup of the SVE portion of system in December 2012. Using the collected vapor samples and airflow measurements, the volume and concentration of contaminant removed was measured and recorded. All air samples were analyzed for volatile organic compounds (VOCs) by EPA Method 8260, specifically for solvents related to the former dry-cleaning operations. Additionally, vapor samples were collected from each SVE well to measure contaminant-vapor concentrations from each well. A summary of analytical results from the

collected air samples can be reviewed on Table 3. The laboratory analytical reports are attached in Appendix D.

## **Contaminant Removal**

As seen with the analytical results on Table 3, contaminant concentrations in the wells fluctuate, but the overall trend demonstrates significant concentrations of PCE remain in the wells. As shown on Table 4, it is estimated that approximately 40 pounds of PCE have been removed as of June 11, 2013.

## **Summary**

The installation of the interim AS/SVE system was completed in January 2013. With the start of system operation, vapor samples were collected periodically to assess the quantity of the contaminant removed. While remaining soil-contaminant concentrations cannot be assessed until additional soil exploration/samples are collected, continued operation of the AS/SVE system is recommended as a measure of continued contaminant removal from the on-property soils and groundwater.

## **Limitations**

The conclusions presented in this report are our professional opinions based solely upon our visual observations and field screening during the described work and the analysis of the soil and vapor samples collected. The results and conclusions are intended exclusively for the purpose outlined herein and for the site location and project indicated. Opinions and recommendations presented herein apply to site conditions existing at the time of our assessment and do not necessarily apply to future changes or other prior conditions at the site of which G-Logics, Inc. is not aware and has not had the opportunity to evaluate. Our scope of work was limited to those items specifically identified in this report. Other activities not specifically included in the presented scope of work (in a workplan, correspondence, or this report) are excluded and are therefore not part of our services.

This report is prepared for the sole use of our client. The scope of services performed may not be appropriate for the needs of other users, and re-use of this document or the findings, conclusions, or recommendations presented herein is at sole risk of said user(s). Any party other than our client who would like to use this report shall notify G-Logics of such intended use by executing the "Permission and Conditions for Use and Copying" contained in this document (Appendix E). Based on the intended use of the report, G-Logics may require that additional work be performed and that an updated report be issued. Non-

compliance with any of these requirements will release G-Logics from any liability resulting from the use of this report by any unauthorized party.

No warranty, either express or implied, is made.

## **Closing**

G-Logics appreciates the opportunity to provide our services to BV Holdings, LLC. Should you have any questions regarding this report, please contact us at your convenience.

Sincerely,  
**G-Logics, Inc.**

**Notes:**

Refer to site diagram(s) for sampling locations.

(1) Method EPA 8260B, Other 8260 Compounds not listed were not detected.

(2) Available Method A Cleanup Levels or Most Conservative Method B Cleanup Levels, MTCA, Amendments adopted in November 2007. Exceeding Cleanup Levels does not necessarily trigger requirements for Cleanup Actions under MTCA.

(a) Soil samples were field screened using a PID to measure VOCs. Headspace VOC concentrations were measured after placing the soil in a sealed plastic bag and allowing soil and air inside the bag to equilibrate.

\* Most Conservative Method B Cleanup Level

--- Not Analyzed

nd Not detected at laboratory reporting limit

27 Bold Number(s) Indicates Contaminant Detected.

160 Bold Number(s) and Shading Indicates Concentration Exceeds MTCA Cleanup Level.

# **APPENDIX A**

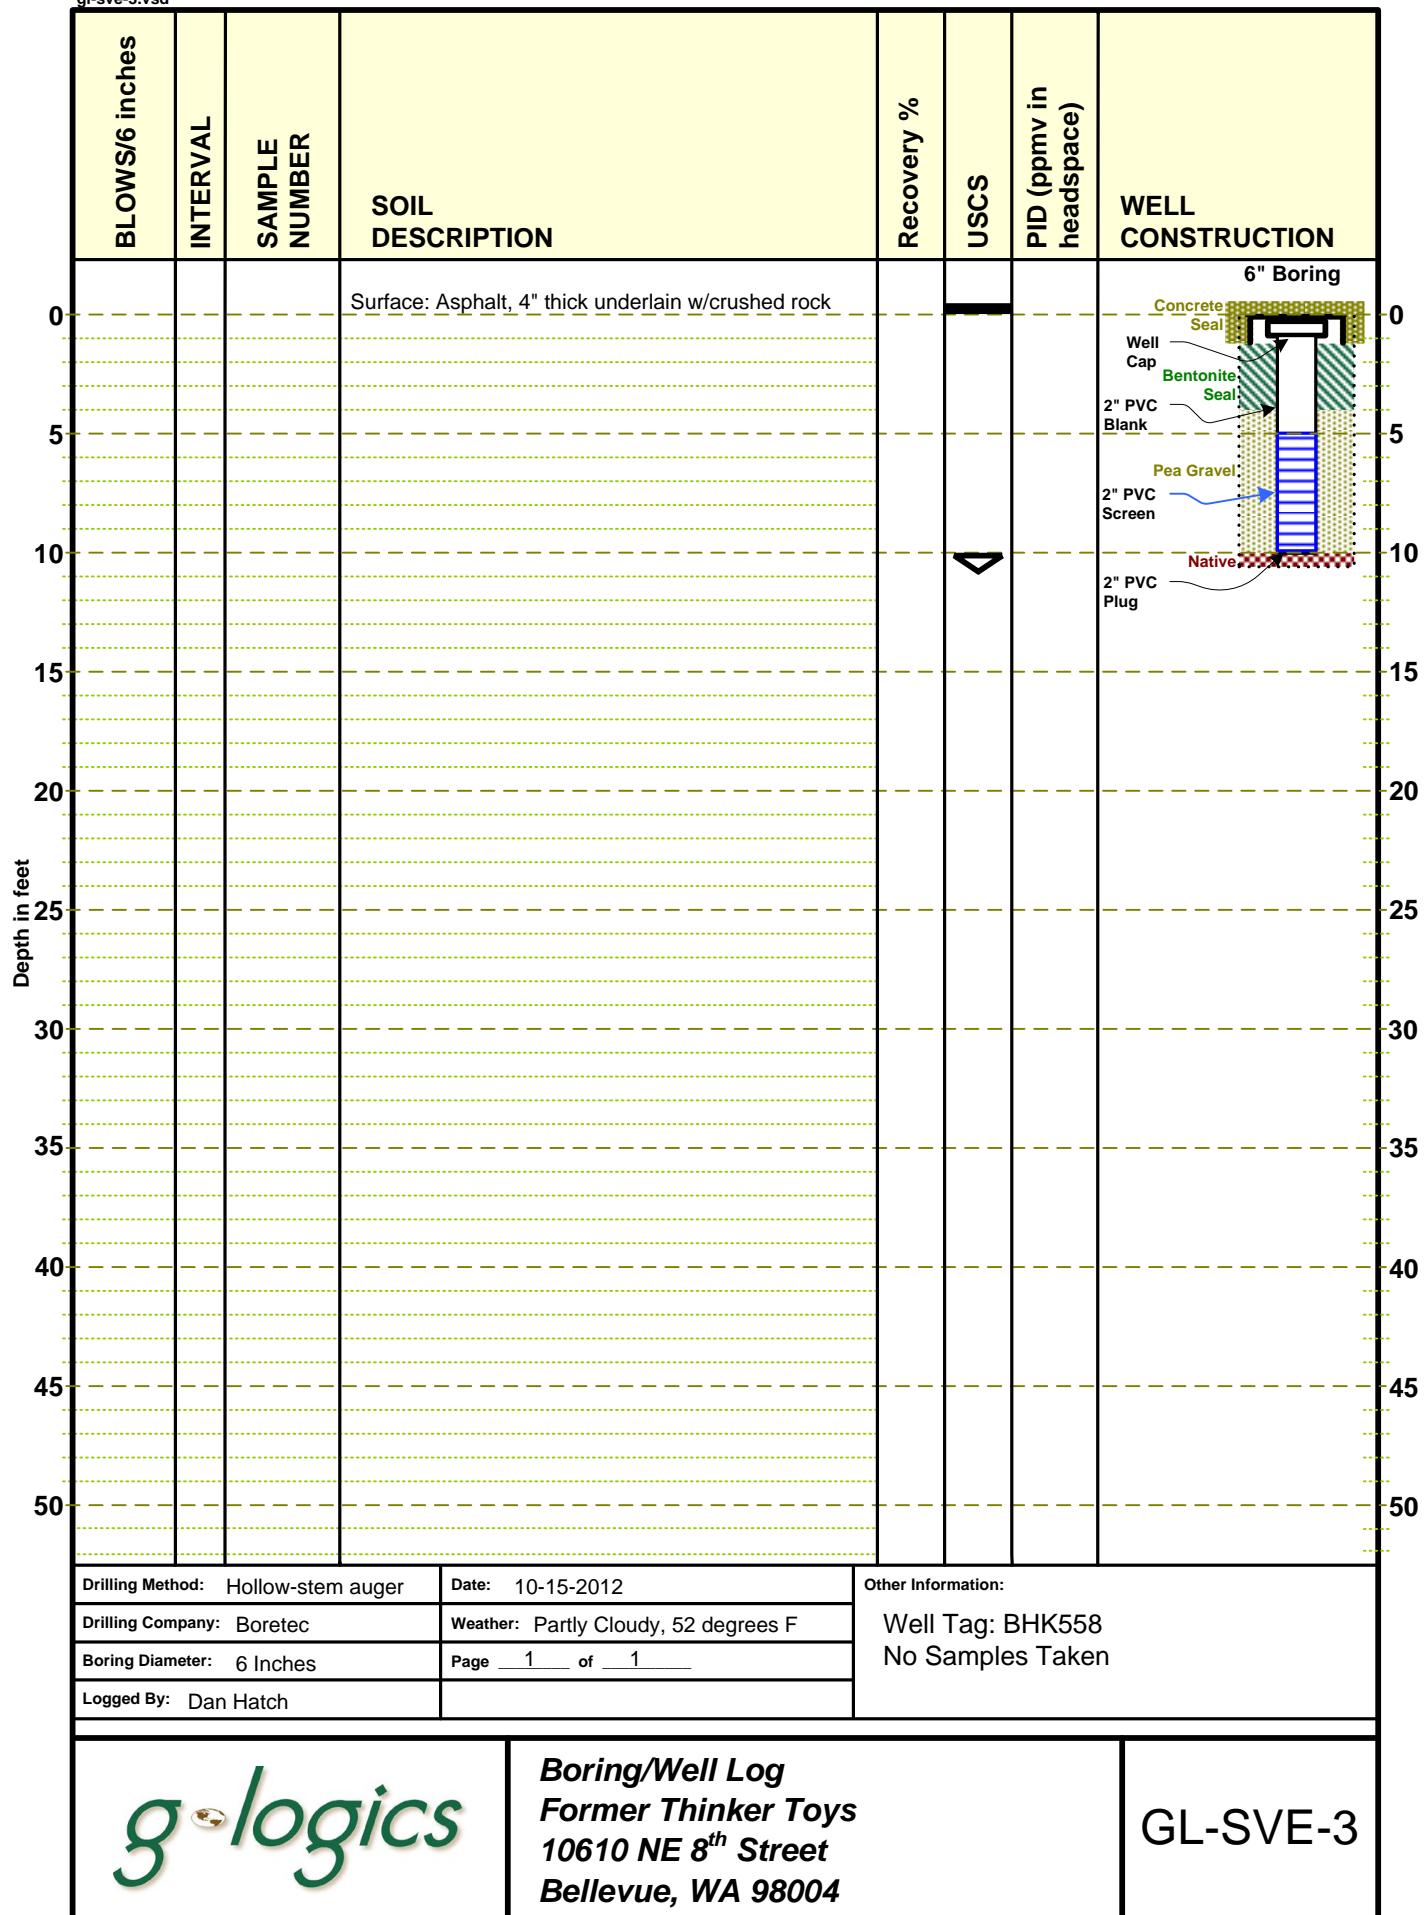

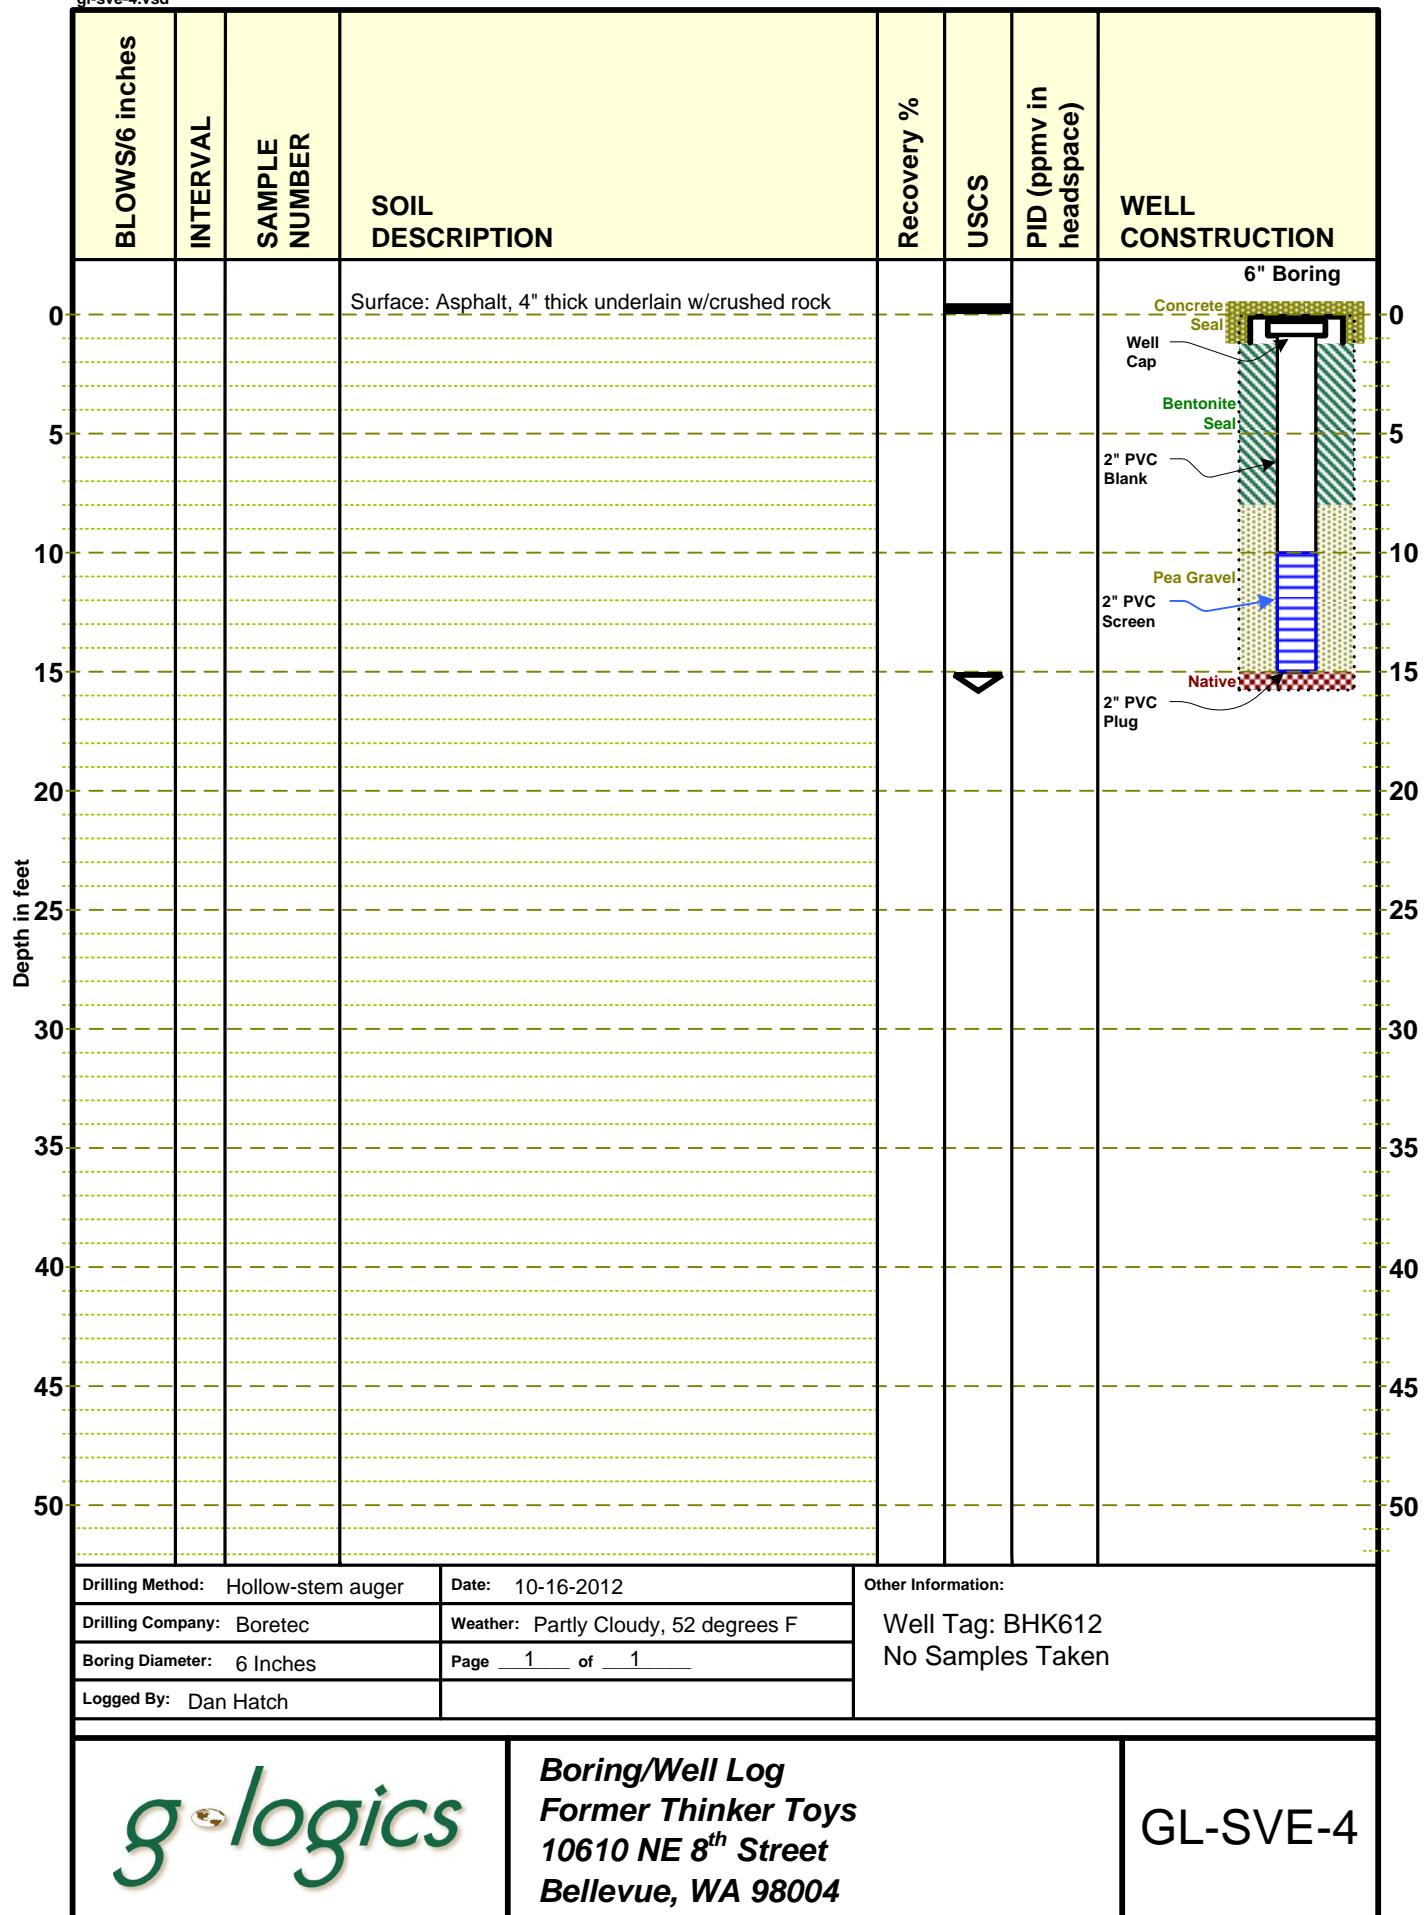

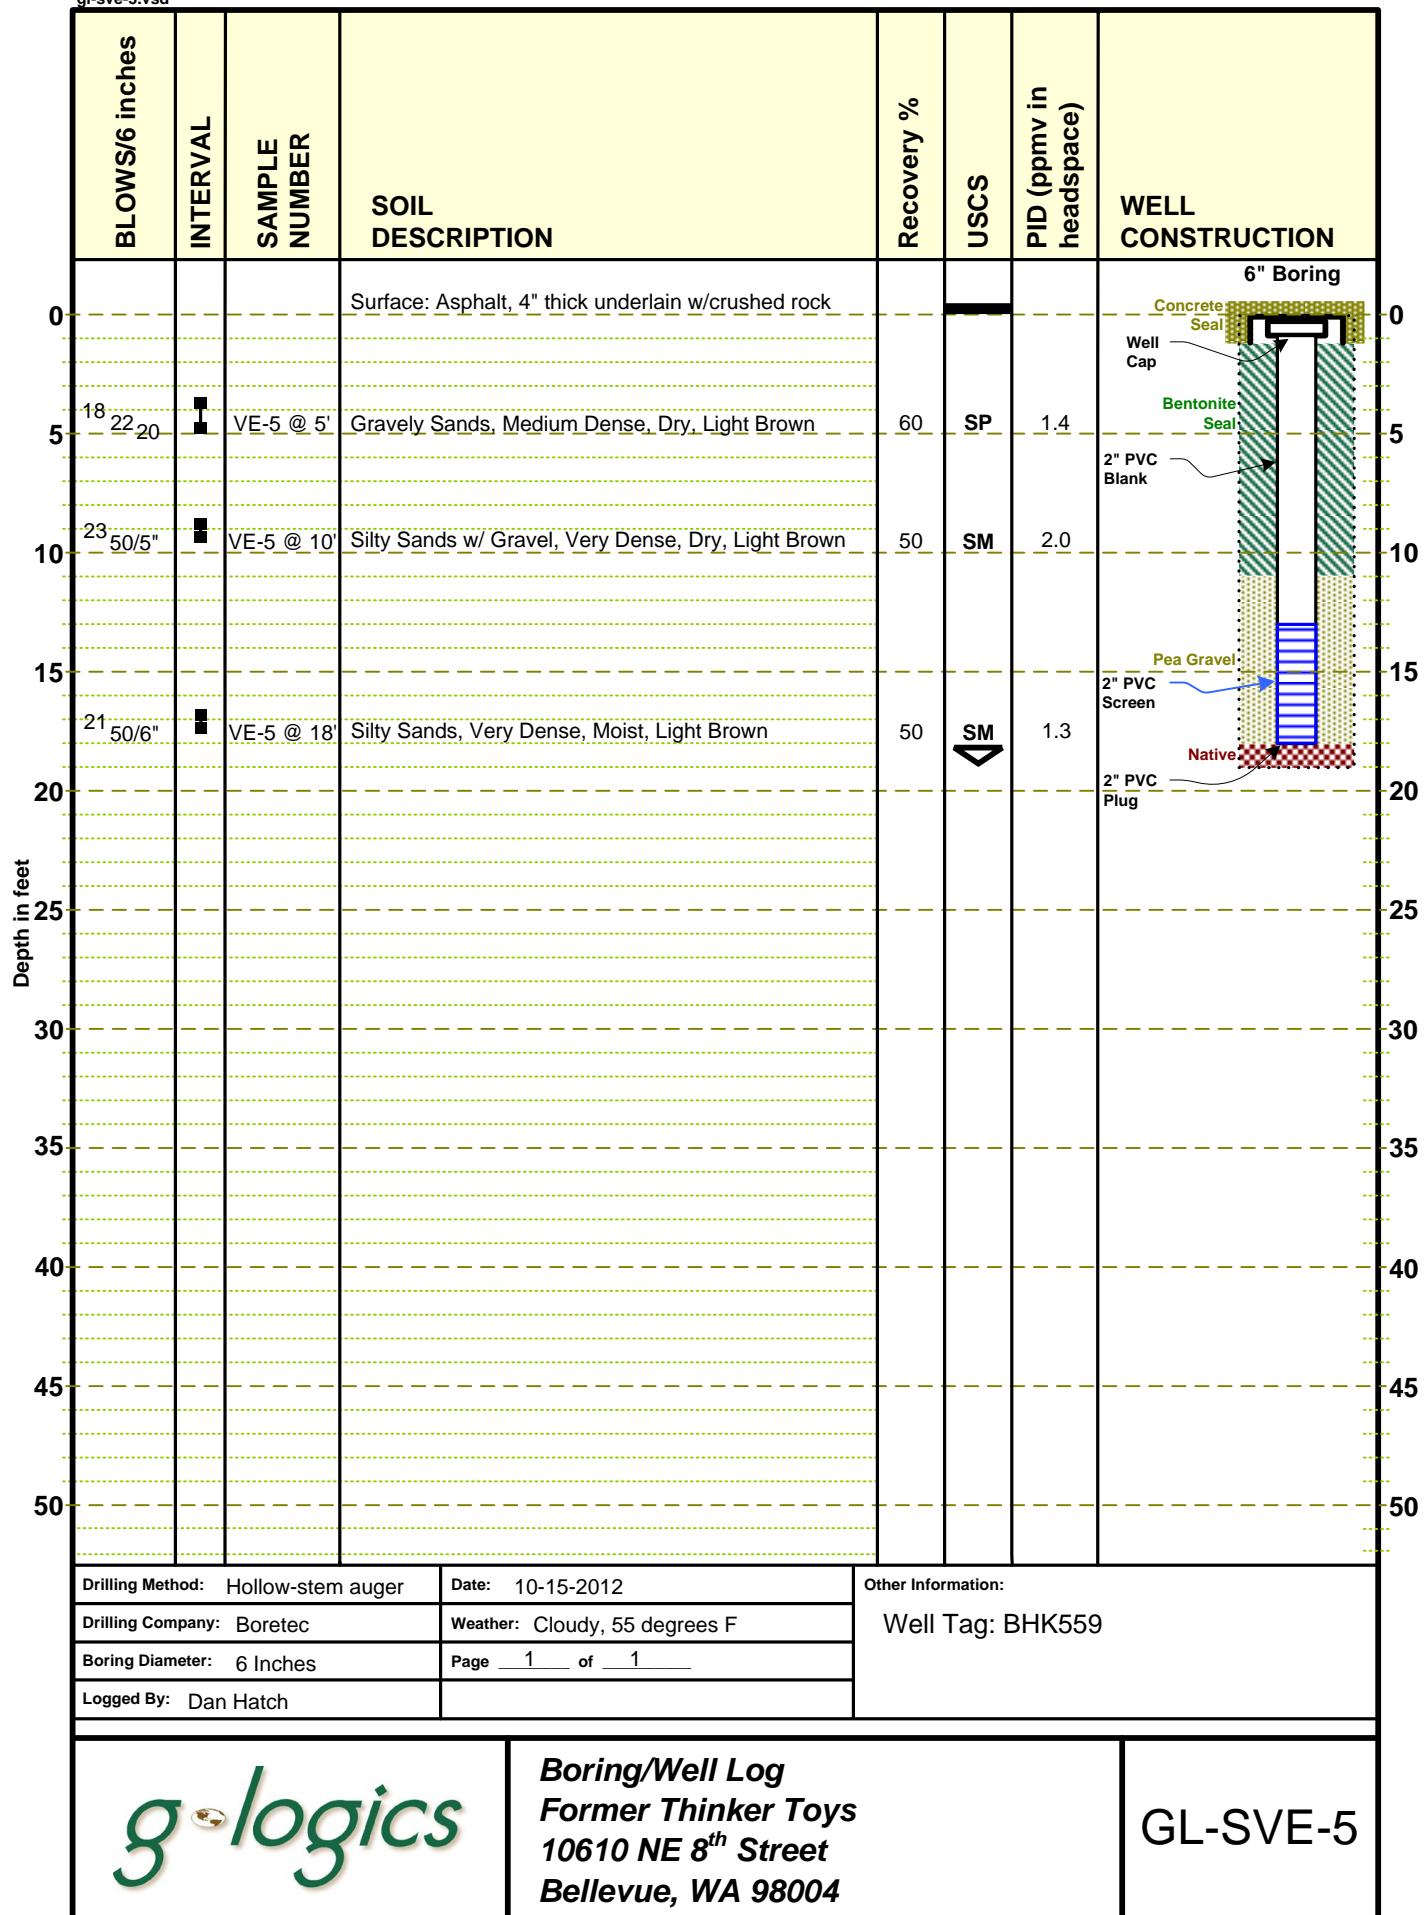

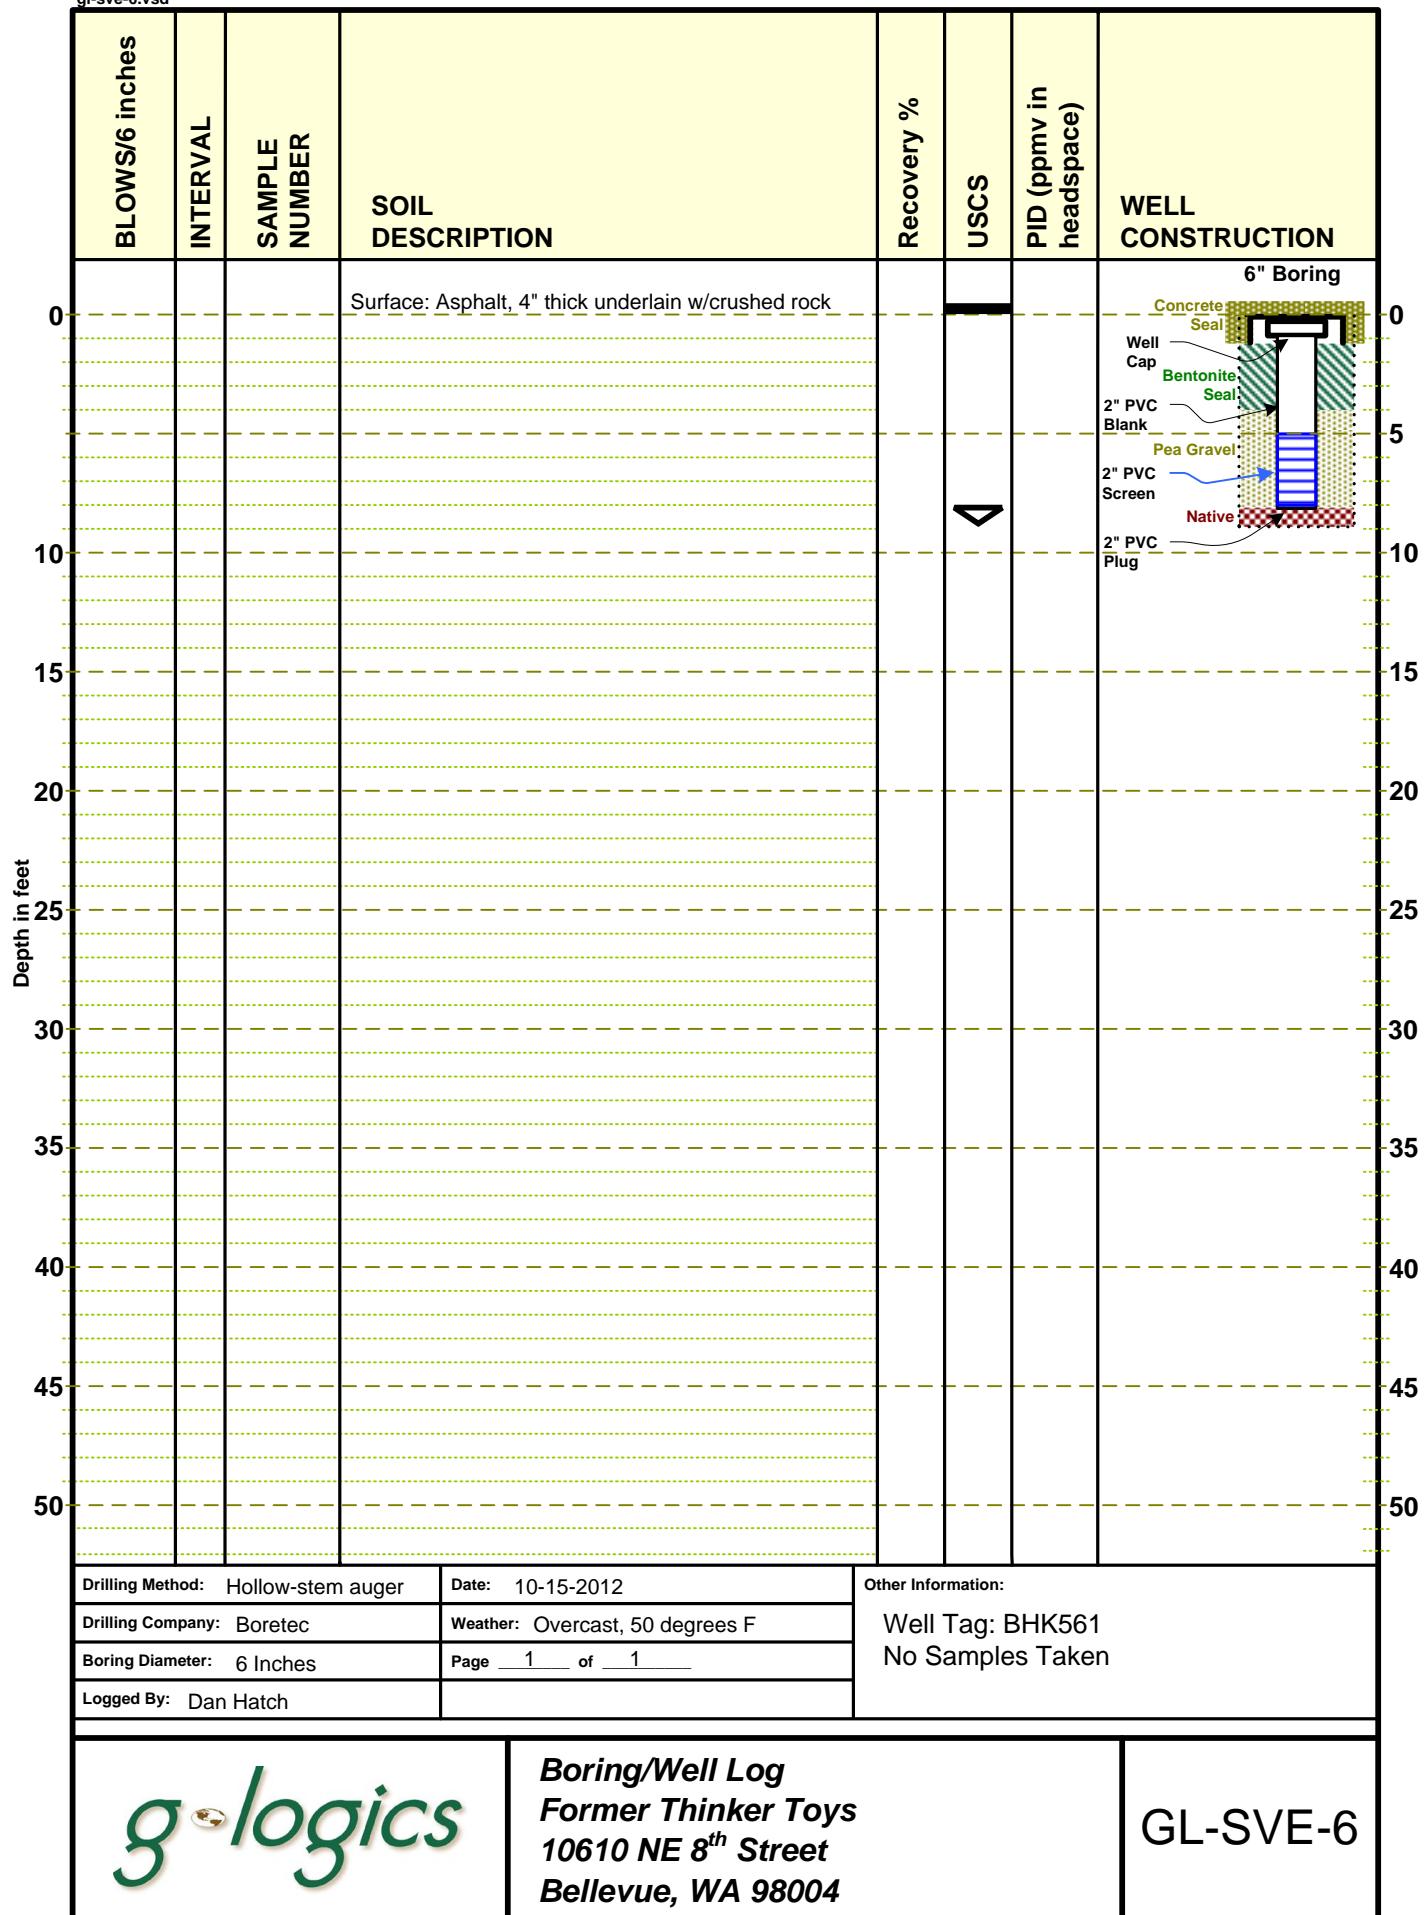

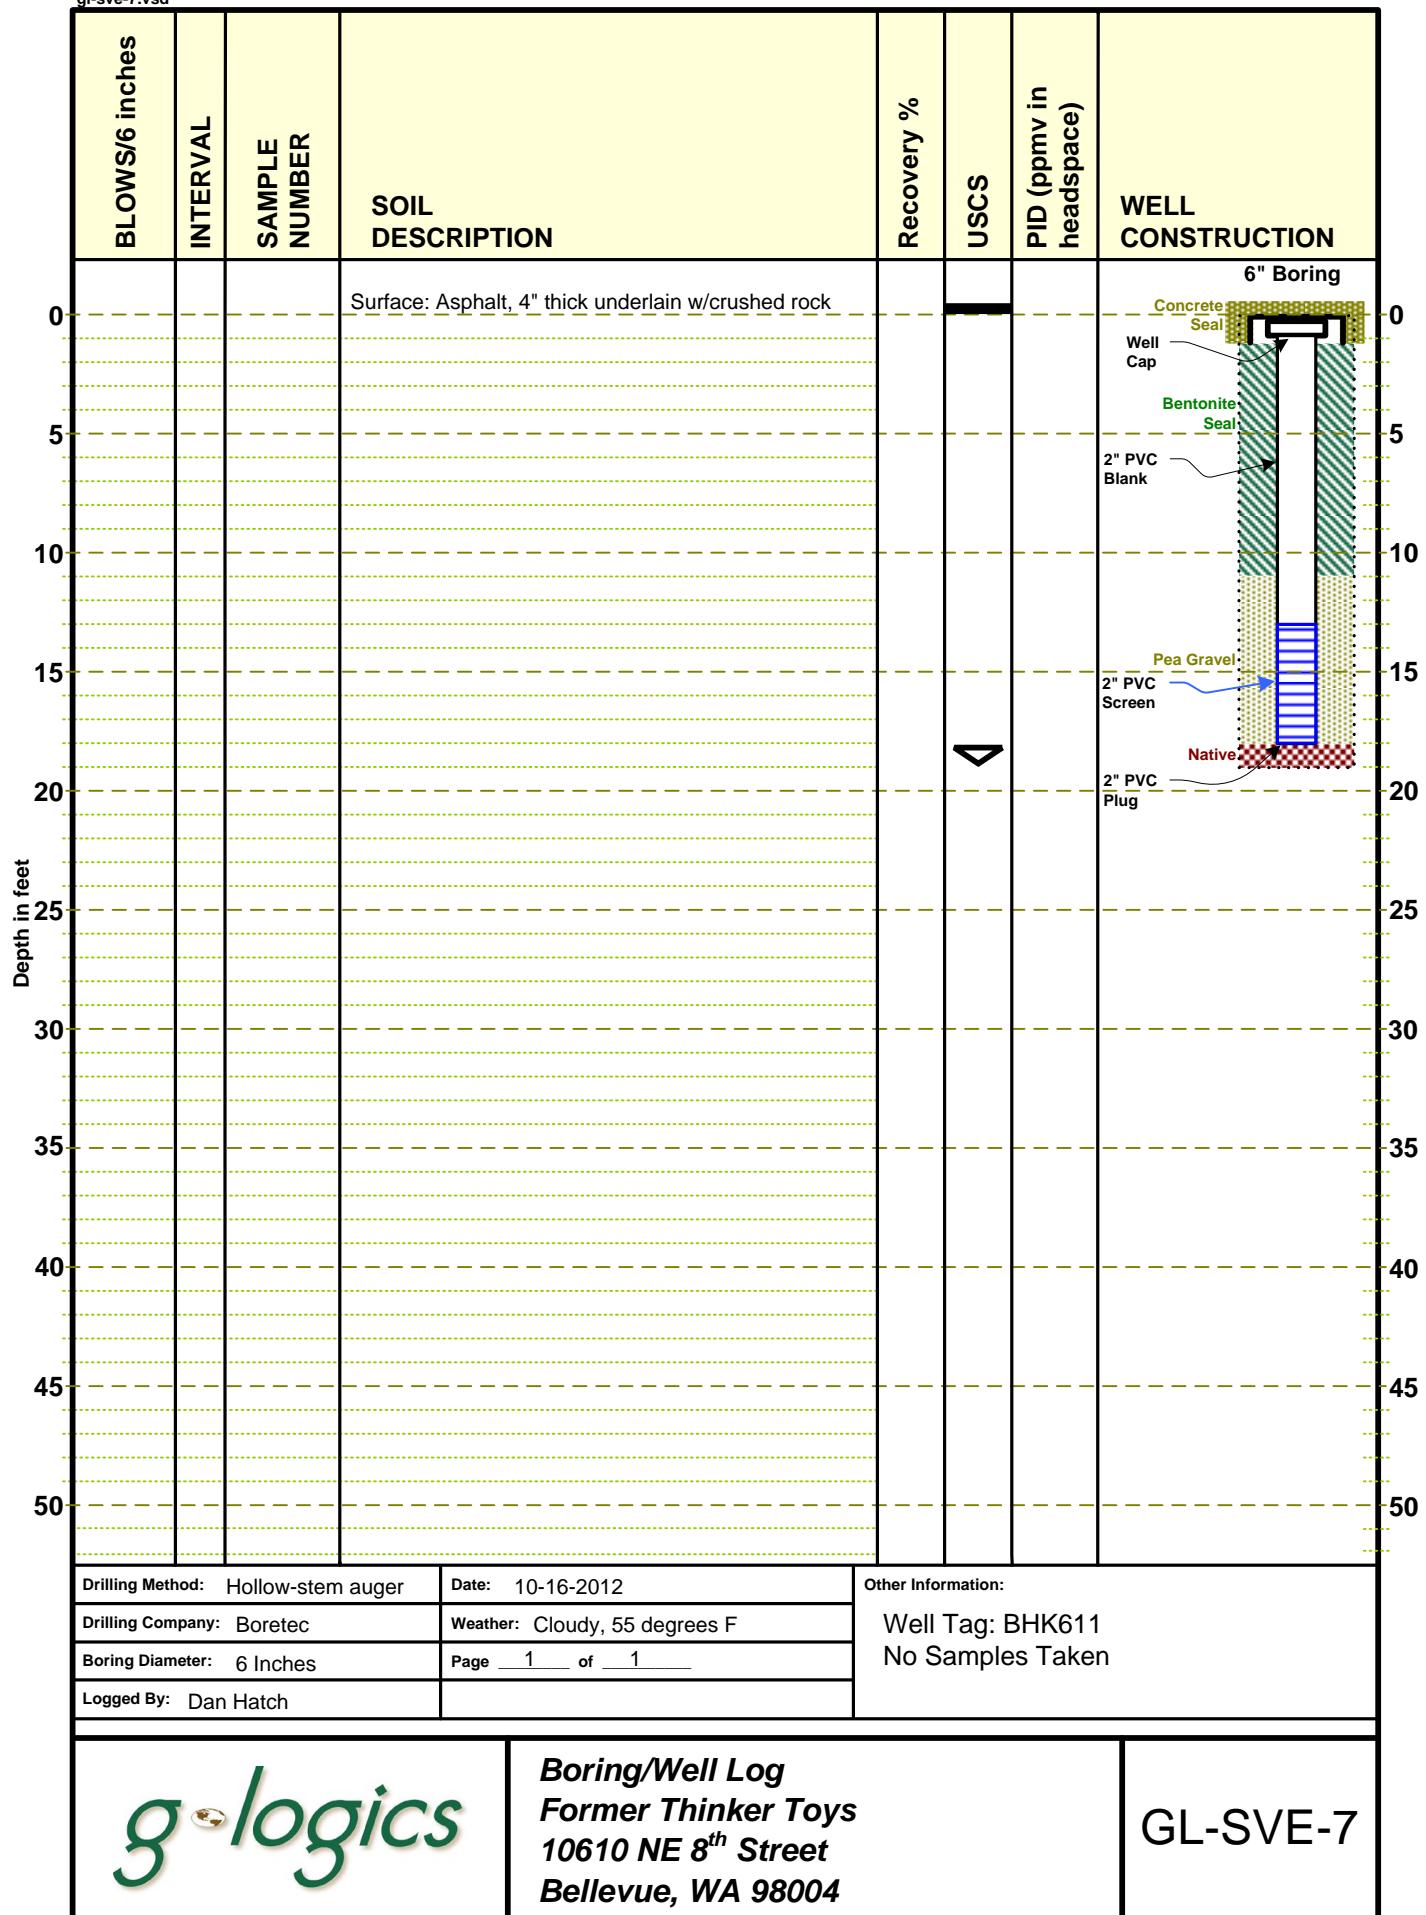

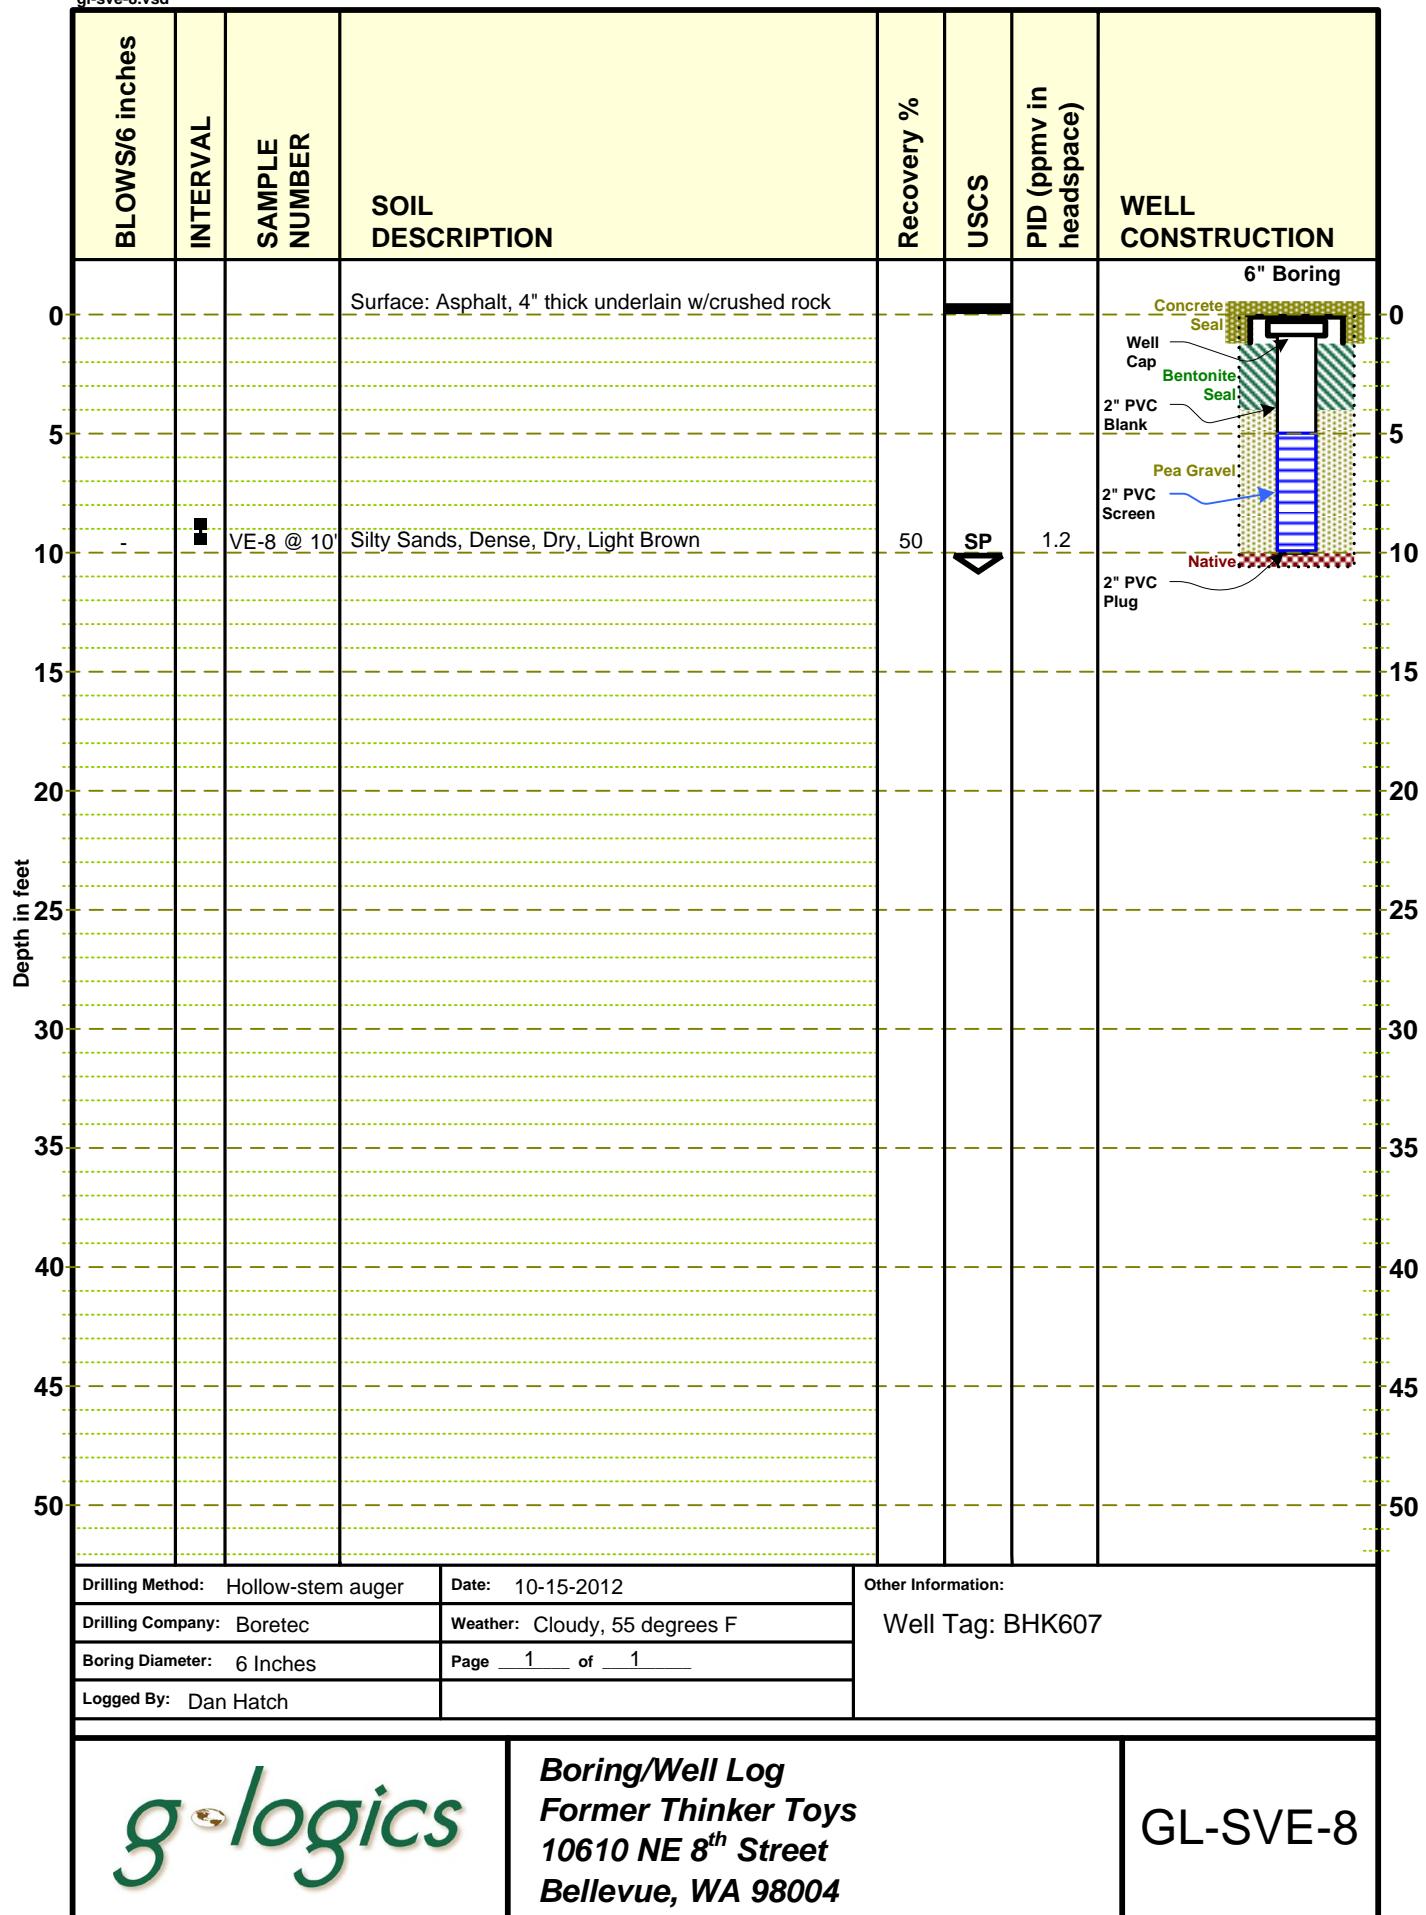

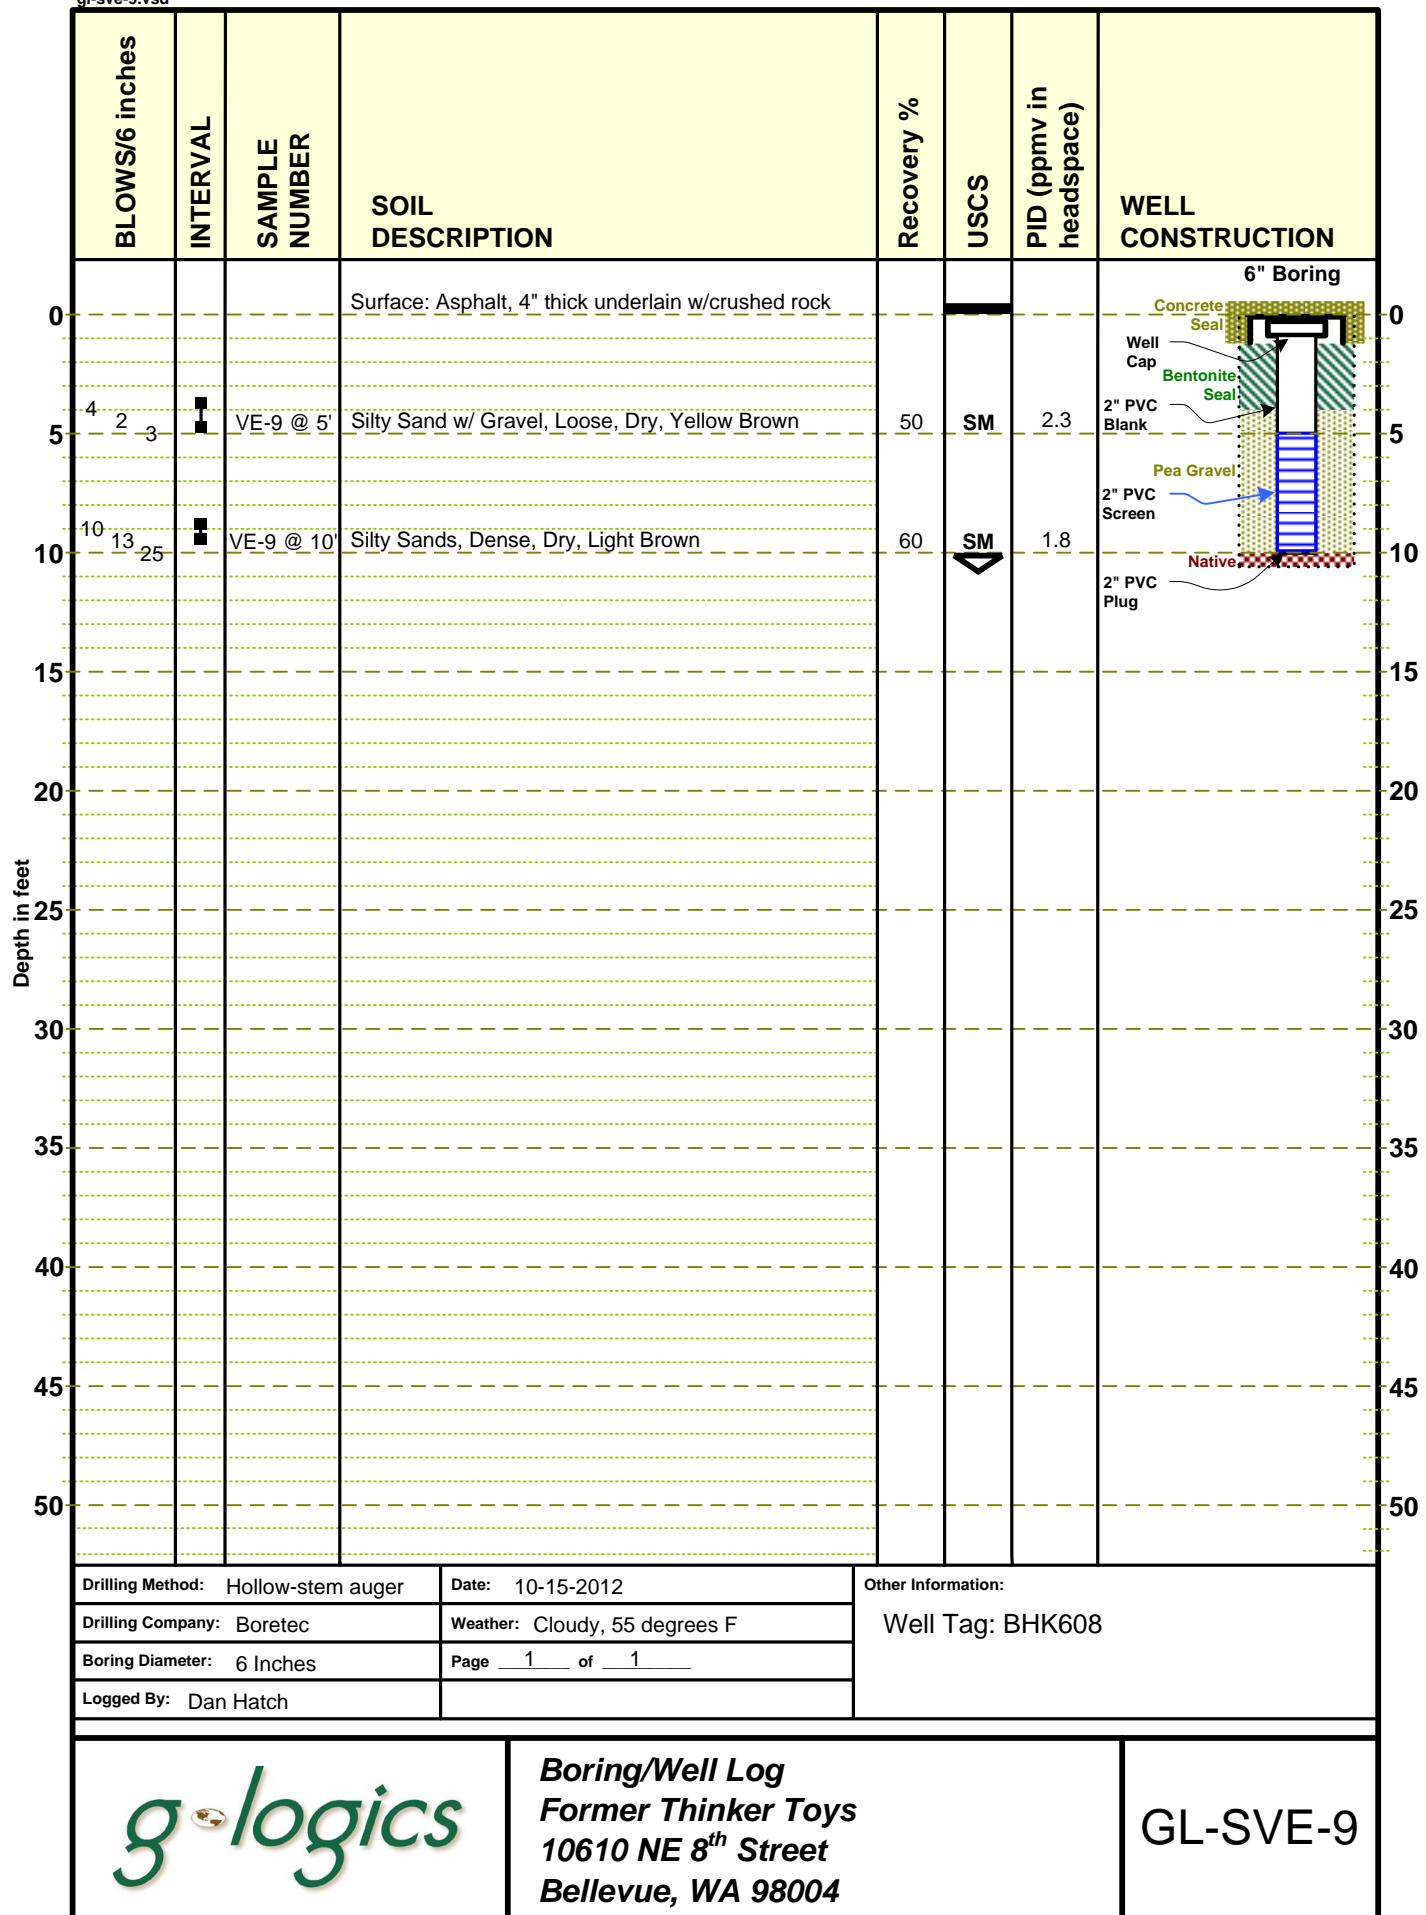

# **APPENDIX B**

## **APPENDIX D**

### **FIELD EXPLORATION METHODS**

G-Logics performed subsurface soil sampling during the installation of air-sparge and soil-vapor extraction wells on the subject property. The sampling activities were conducted in general accordance with Ecology's guidelines and regulations.

#### **Underground Utility Clearance**

Before conducting the subsurface exploration, G-Logics contacted a service that notifies public utilities of proposed subsurface investigations. Additionally, on-site private utilities were located by a private locating company to identify on-site utilities as well as specific areas of concern. Consequently, the below-grade utility locations were identified by marking their inferred location on the ground surface. This information was used to aid in identifying sampling locations. Additionally, at several boring locations, the first 5 to 7 feet of soils were removed using air-knife methods.

#### **Quality Assurance Quality Control**

Quality Assurance/Quality Control (QA/QC) for the presented scope of work included generally accepted procedures for sample collection, storage, tracking, and documentation. All sampling equipment was washed with a detergent wash and tap water rinse before the collection of the samples. All samples were labeled with a sample number, date, time, and sampler name, and were stored in an ice chest containing frozen "blue ice". Appropriate chain-of-custody documentation was completed.

#### **Hollow-Stem Auger Borings**

Soil borings were drilled using a trailer-mounted hollow-stem auger-drilling rig, provided by our drilling subcontractor. A G-Logics employee was present during the drilling and assisted in obtaining samples of the subsurface materials, maintained a log of the borings, made detailed observations of site conditions, and provided technical assistance, as required.

All drilling and sampling equipment was cleaned before mobilization and between borings to reduce the potential for cross contamination. In addition, the sampling equipment was cleaned between each sampling interval before the collection of the next sample.

### **Auger Soil Sampling, Driven Sampler**

Soil samples were collected by using a Modified California split-spoon sampler, which may have contained three 6-inch-long brass liners (sample tubes) placed end-to-end. Sample collection was attempted at five-foot depth intervals by driving the sampler approximately 18 inches with a 140-pound hammer allowed to free-fall 30 inches. The number of blows required to drive the sampler each 6-inch interval was noted and recorded on the boring logs. Soils were classified according to the Unified Soil Classification System.

Collected soil samples were evaluated for evidence of contamination by visible discoloration of the soil sample or VOCs detected by the PID. A portion of each soil sample was placed into a plastic zip-lock bag, and the vapors were drawn through the PID for qualitative screening of VOCs. The vapor readings were documented as the field screening results. A new plastic bag was used each time a sample was screened.

The collected soils were removed and placed into laboratory-provided glass jars. Samples were collected from the soil core using an Easy Draw Syringe and Powerstop Handle. The soil plug was then extruded into a laboratory-supplied 40 ml VOA Vial containing methanol preservative. The extracted sampler was washed and new liners were used for each sampling attempt.

Collected samples were labeled with a sample number, date, time, and sampler's name and stored in an ice chest containing frozen "blue ice". Chain-of-custody procedures were followed to document sample handling.

### **Well Construction, Hollow-Stem Auger Methods**

Soil borings were completed as Air-Sparge and Soil-Vapor Extraction wells in the following manner:

- The Air-Sparge well casing materials consisted of 1-inch-diameter, flush-threaded, schedule 40 PVC pipe.

- The Soil-Vapor Extraction well casing materials consisted of 2-inch-diameter, flush-threaded, schedule 40 PVC pipe.
- The screened interval of the well casing was perforated with 0.020-inch factory-cut slots.
- The filter pack for the well consisted of clean, 10/20 Colorado Silica Sand.
- The annular seal of the well consisted of granulated Wyoming Bentonite.
- All PVC casing materials were cleaned at the factory before installation.
- The bottom of the well casing was sealed with a threaded sediment cup. Blank (non-slotted) riser casing was used to extend the well from the top of the screened interval to ground surface. The length of the screened interval is identified on the boring logs.
- Well construction was accomplished by lowering the casing, into the completed boring, through the inside of the hollow-stem augers. The augers were withdrawn from the boring about three feet, and the resulting annular space around the well screen was backfilled with sand (poured through the top of the hollow-stem augers). This process was repeated until the filter pack was installed to about two feet above the top of the screened interval. The augers were completely withdrawn from the boring, and the annular space around the blank riser was backfilled with granulated bentonite to the depth shown on the boring logs.
- The well identification was stamped on a metal tag and placed inside the well box.

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 16 sample(s) on 10/15/2012 for the analyses presented in the following report.

***Sample Moisture (Percent Moisture)***

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

Michael Dee  
Sr. Chemist / Principal

Date: 10/24/2012

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys (739)  
**Lab Order:** 1210119

## Case Narrative

WO#: 1210119

Date: 10/24/2012

---

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys (739)

---

### I. SAMPLE RECEIPT:

All samples were received intact. The internal ice chest temperatures were measured on receipt and are recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

Matrix Spike (MS) and MS Duplicate (MSD) samples are tested from an analytical batch of "like" matrix to check for possible matrix effect. The MS and MSD will provide site specific matrix data only for those samples which are spiked by the laboratory. The sample chosen for spike purposes may or may not have been a sample submitted in this sample delivery group. The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples and the MS/MSD to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

 Logged by: Clare Griggs

Work Order Number: 1210119  
 Date Received: 10/15/2012 4:55:00 PM

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

**RE: Former Thinker Toys (739)**

**Lab ID: 1210136**

October 25, 2012

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 9 sample(s) on 10/16/2012 for the analyses presented in the following report.

***Sample Moisture (Percent Moisture)***

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Dee".

Michael Dee  
Sr. Chemist / Principal

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys (739)

---

### I. SAMPLE RECEIPT:

All samples were received intact. The internal ice chest temperatures were measured on receipt and are recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

Matrix Spike (MS) and MS Duplicate (MSD) samples are tested from an analytical batch of "like" matrix to check for possible matrix effect. The MS and MSD will provide site specific matrix data only for those samples which are spiked by the laboratory. The sample chosen for spike purposes may or may not have been a sample submitted in this sample delivery group. The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples and the MS/MSD to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

**G-Logics**

Dan Hatch  
40 Second Ave. SE  
Issaquah, Washington 98027

**RE: Former Thinker Toys**

**Lab ID: 1212044**

December 14, 2012

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 1 sample(s) on 12/7/2012 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method TO-15***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

Michael Dee  
Sr. Chemist / Principal

Date: 12/14/2012

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys  
**Lab Order:** 1212044

## Work Order Sample Summary

| Lab Sample ID | Client Sample ID | Date/Time Collected | Date/Time Received  |
|---------------|------------------|---------------------|---------------------|
| 1212044-001   | Ex Stack         | 12/07/2012 10:45 AM | 12/07/2012 12:10 PM |

---

Note: If no "Time Collected" is supplied, a default of 12:00AM is assigned

## Case Narrative

WO#: 1212044

Date: 12/14/2012

---

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys

---

### I. SAMPLE RECEIPT:

All samples were received intact. The internal ice chest temperatures were measured on receipt and are recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry"). Air samples are reported in ppbv and ug/m<sup>3</sup>.

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

**Client:** G-Logics

**NOTES:**

\* - Flagged value is not within established control limits.

**Qualifiers:** B Analyte detected in the associated Method Blank  
E Value above quantitation range  
J Analyte detected below quantitation limits

D Dilution was required  
H Holding times for preparation or analysis exceeded  
ND Not detected at the Reporting Limit

Date: 12/14/2012

Work Order: 1212044

CLIENT: G-Logics

Project: Former Thinker Toys

## QC SUMMARY REPORT

## Volatile Organic Compounds by EPA Method TO-15

## NOTES:

S - Outlying spike recoveries were associated with this sample. Corresponding samples are marked with an \*. 4-Methyl-2-pentanone, Heptane and Methylene Chloride are biased high and the samples are non-detect

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

January 02, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 1 sample(s) on 12/28/2012 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Dee".

## Case Narrative

WO#: 1212166

Date: 1/2/2013

---

**CLIENT:** G-Logics  
**Project:** Former Thinker

---

### I. SAMPLE RECEIPT:

All samples were received intact. The internal ice chest temperatures were measured on receipt and are recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

Client Name: GL  
 Logged by: Clare Griggs

Work Order Number: 1212166  
 Date Received: 12/28/2012 1:00:00 PM

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

January 09, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 1 sample(s) on 1/7/2013 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Dee".

Michael Dee  
Sr. Chemist / Principal

Date: 01/09/2013

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys  
**Lab Order:** 1301022

## Work Order Sample Summary

| Lab Sample ID | Client Sample ID | Date/Time Collected | Date/Time Received  |
|---------------|------------------|---------------------|---------------------|
| 1301022-001   | EX Stack         | 01/05/2013 12:20 PM | 01/07/2013 11:55 AM |

---

Note: If no "Time Collected" is supplied, a default of 12:00AM is assigned

## Case Narrative

WO#: 1301022

Date: 1/9/2013

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys

---

### I. SAMPLE RECEIPT:

All samples were received intact. The internal ice chest temperatures were measured on receipt and are recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

**RE: Former Thinker Toys**

**Lab ID: 1301061**

January 21, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 1 sample(s) on 1/14/2013 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Dee".

Michael Dee  
Sr. Chemist / Principal

**Lab Order:** 1301061

## Work Order Sample Summary

| Lab Sample ID | Client Sample ID | Date/Time Collected | Date/Time Received  |
|---------------|------------------|---------------------|---------------------|
| 1301061-001   | Exhaust Stack    | 01/14/2013 11:00 AM | 01/14/2013 11:39 AM |

---

Note: If no "Time Collected" is supplied, a default of 12:00AM is assigned

## Case Narrative

WO#: 1301061

Date: 1/21/2013

---

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys

---

### I. SAMPLE RECEIPT:

All samples were received intact. The internal ice chest temperatures were measured on receipt and are recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

 Logged by: Clare Griggs

Work Order Number: 1301061  
 Date Received: 1/14/2013 11:39:00 AM

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

**RE: Former Thinker Toys**

**Lab ID: 1301105**

January 28, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 1 sample(s) on 1/22/2013 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

Michael Dee  
Sr. Chemist / Principal

Date: 01/28/2013

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys  
**Lab Order:** 1301105

## Work Order Sample Summary

| Lab Sample ID | Client Sample ID | Date/Time Collected | Date/Time Received  |
|---------------|------------------|---------------------|---------------------|
| 1301105-001   | Ex Stack         | 01/22/2013 11:45 AM | 01/22/2013 12:15 PM |

---

Note: If no "Time Collected" is supplied, a default of 12:00AM is assigned

## Case Narrative

WO#: 1301105

Date: 1/28/2013

---

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys

---

### I. SAMPLE RECEIPT:

All samples were received intact. The internal ice chest temperatures were measured on receipt and are recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

## NOTES:

S - Outlying spike recoveries observed (Dichlorodifluoromethane; high bias). The samples were non-detect. No further action required.

## NOTES:

S - Outlying spike recoveries observed (Dichlorodifluoromethane and Hexachlorobutadiene; high bias). The samples were non-detect. No further action required.

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

February 07, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 10 sample(s) on 1/31/2013 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

Michael Dee  
Sr. Chemist / Principal

Date: 02/07/2013

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys  
**Lab Order:** 1301156

## Case Narrative

WO#: 1301156

Date: 2/7/2013

---

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys

---

### I. SAMPLE RECEIPT:

All samples were received intact. The internal ice chest temperatures were measured on receipt and are recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

## NOTES:

S - Outlying QC recoveries were associated with this sample (high bias). There were no detections of these analytes in the samples. The method is in control as indicated by the LCS Duplicate and the Continuing Calibration Verification (CCV).

## NOTES:

S - Outlying QC recoveries were associated with this sample (high bias). There were no detections of these analytes in the samples. The method is in control as indicated by the LCS and CCV.

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

March 18, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 10 sample(s) on 3/8/2013 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Dee".

Michael Dee  
Sr. Chemist / Principal

### I. SAMPLE RECEIPT:

Samples receipt information is recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

**RE: Former Thinker Toys**

**Lab ID: 1304073**

April 16, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 10 sample(s) on 4/10/2013 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Dee".

Michael Dee  
Sr. Chemist / Principal

**CLIENT:** G-Logics  
**Project:** Former Thinker Toys

---

### I. SAMPLE RECEIPT:

Samples receipt information is recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

June 13, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 10 sample(s) on 5/30/2013 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Dee".

## Work Order Sample Summary

| Lab Sample ID | Client Sample ID | Date/Time Collected | Date/Time Received |
|---------------|------------------|---------------------|--------------------|
| 1305215-001   | Exhaust Stack    | 05/30/2013 11:45 AM | 05/30/2013 1:00 PM |
| 1305215-002   | SVE-1            | 05/30/2013 12:02 PM | 05/30/2013 1:00 PM |
| 1305215-003   | SVE-2            | 05/30/2013 11:57 AM | 05/30/2013 1:00 PM |
| 1305215-004   | SVE-3            | 05/30/2013 12:05 PM | 05/30/2013 1:00 PM |
| 1305215-005   | SVE-4            | 05/30/2013 11:50 AM | 05/30/2013 1:00 PM |
| 1305215-006   | SVE-5            | 05/30/2013 12:15 PM | 05/30/2013 1:00 PM |
| 1305215-007   | SVE-6            | 05/30/2013 12:10 PM | 05/30/2013 1:00 PM |
| 1305215-008   | SVE-7            | 05/30/2013 12:05 PM | 05/30/2013 1:00 PM |
| 1305215-009   | SVE-8            | 05/30/2013 11:55 AM | 05/30/2013 1:00 PM |
| 1305215-010   | SVE-9            | 05/30/2013 12:05 PM | 05/30/2013 1:00 PM |

Note: If no "Time Collected" is supplied, a default of 12:00AM is assigned

## Case Narrative

WO#: 1305215

Date: 6/13/2013

---

**CLIENT:** G-Logics  
**Project:** Thinker Toys

---

### I. SAMPLE RECEIPT:

Samples receipt information is recorded on the attached Sample Receipt Checklist.

### II. GENERAL REPORTING COMMENTS:

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

### III. ANALYSES AND EXCEPTIONS:

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

Client Name: GL  
 Logged by: Clare Griggs

Work Order Number: 1305215  
 Date Received: 5/30/2013 1:00:00 PM

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C? Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

June 18, 2013

**Attention Dan Hatch:**

Fremont Analytical, Inc. received 10 sample(s) on 6/11/2013 for the analyses presented in the following report.

***Volatile Organic Compounds by EPA Method 8260***

This report consists of the following:

- Case Narrative
- Analytical Results
- Applicable Quality Control Summary Reports
- Chain of Custody

All analyses were performed consistent with the Quality Assurance program of Fremont Analytical, Inc. Please contact the laboratory if you should have any questions about the results.

Thank you for using Fremont Analytical.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Dee".

Michael Dee  
Sr. Chemist / Principal

Date: 06/18/2013

**CLIENT:** G-Logics  
**Project:** Thinker Toys  
**Lab Order:** 1306069

## Work Order Sample Summary

| Lab Sample ID | Client Sample ID | Date/Time Collected | Date/Time Received  |
|---------------|------------------|---------------------|---------------------|
| 1306069-001   | Exhaust Stack    | 06/11/2013 11:15 AM | 06/11/2013 12:15 PM |
| 1306069-002   | VES-1            | 06/11/2013 10:44 AM | 06/11/2013 12:15 PM |
| 1306069-003   | VES-2            | 06/11/2013 10:47 AM | 06/11/2013 12:15 PM |
| 1306069-004   | VES-3            | 06/11/2013 10:49 AM | 06/11/2013 12:15 PM |
| 1306069-005   | VES-4            | 06/11/2013 10:51 AM | 06/11/2013 12:15 PM |
| 1306069-006   | VES-5            | 06/11/2013 10:30 AM | 06/11/2013 12:15 PM |
| 1306069-007   | VES-6            | 06/11/2013 10:32 AM | 06/11/2013 12:15 PM |

## Case Narrative

WO#: 1306069

Date: 6/18/2013

---

**CLIENT:** G-Logics  
**Project:** Thinker Toys

---

**I. SAMPLE RECEIPT:**

Samples receipt information is recorded on the attached Sample Receipt Checklist.

**II. GENERAL REPORTING COMMENTS:**

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report ("mg/kg-dry" or "ug/kg-dry").

The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The LCS and the MB are processed with the samples to ensure method criteria are achieved throughout the entire analytical process.

**III. ANALYSES AND EXCEPTIONS:**

Exceptions associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s) and/or noted below.

Client Name: GL  
 Logged by: Chelsea Ward

Work Order Number: 1306069  
 Date Received: 6/11/2013 12:15:00 PM

**Chain of Custody**

1. Were custodial seals present? Yes  No  Not Required
2. Is Chain of Custody complete? Yes  No  Not Present
3. How was the sample delivered? Client

**Log In**

4. Coolers are present? Yes  No  NA
5. Was an attempt made to cool the samples? Yes  No  NA
6. Were all coolers received at a temperature of >0° C to 10.0°C Yes  No  NA
7. Sample(s) in proper container(s)? Yes  No
8. Sufficient sample volume for indicated test(s)? Yes  No
9. Are samples properly preserved? Yes  No
10. Was preservative added to bottles? Yes  No  NA
11. Is there headspace present in VOA vials? Yes  No  NA
12. Did all sample containers arrive in good condition?(unbroken) Yes  No
13. Does paperwork match bottle labels? Yes  No
14. Are matrices correctly identified on Chain of Custody? Yes  No
15. Is it clear what analyses were requested? Yes  No
16. Were all holding times able to be met? Yes  No

**Special Handling (if applicable)**

17. Was client notified of all discrepancies with this order? Yes  No  NA

**G-Logics Project Number 01-0739-B**

**July 11, 2013**

G-Logics prepared the above-identified Document only for our Client and/or other user(s), as identified in the Document, for the purposes stated and subject to any identified and contractual limitations. Regulatory agencies may make additional "fair use" copies for internal and public use based on state and federal laws that do not violate copyright laws.

All other Requestors must obtain permission from G-Logics and our Client in order to avoid copyright violations. To request authorization for a copy of the Document, please read our conditions listed below, complete the Requestor section, and fax to G-Logics at 425-313-3074 for approval review.

- I recognize that G-Logics has prepared this Document only for their Client and/or other user(s), only for the purposes stated in the Document and subject to any identified and contractual limitations.
- My intended use of the Document is for general informational purposes only.
- I understand and accept that there may be limitations to the reliability of the Document's findings due to circumstances beyond the control of G-Logics, the limited scope of funding, and/or limitations inherent in the nature of the performed services.
- I agree not to rely on the Document as being comprehensive or inclusive of all possible site hazards and agree to defend, indemnify, and hold G-Logics harmless from and against any and all claims, damages, or liability which arise from or which are alleged to arise from my use of the Document. I also will compensate G-Logics for any time spent or expenses incurred by G-Logics in defense of any such claim.
- I am advised that the Document is a qualitative evaluation of site conditions and should not be used to estimate site-remediation costs, if cleanup is necessary. Remediation cost estimates would require additional data beyond what is presented in the Document.
- I agree not to provide the Document to any other person or organizations without prior authorization from G-Logics and their Client.

I, the Requestor, have reviewed the above-identified conditions for copying/use of the Document, am familiar with the presented limitations of the provided services, and acknowledge my understanding and concurrence, as indicated by my signature below.

|                         |             |

| Requestor's Company     | <hr/>       |
| Mailing Address         | <hr/>       |
| City, State, Zip Code   | <hr/>       |
| Contact Name & Title    | <hr/>       |
| Signature & Date        | <hr/>       |
| Telephone & Fax Numbers | <hr/>       |
| Planned Use of Document | <hr/> <hr/> |

With your information and signature above, please fax to G-Logics (425-313-3074) for approval review. G-Logics will share your request with our Client for their approval.

#### **Client Review and Acknowledgment of Use and Copying Request**

Per the notification of G-Logics, I, the Client, have reviewed this request for copying/use of this Document, have discussed the request with G-Logics, and grant my consent as indicated by my signature below.

|                             |       |
|-----------------------------|-------|
| Client Company              | <hr/> |
| Client Contact Name & Title | <hr/> |
| Signature & Date            | <hr/> |
| Telephone & Fax Numbers     | <hr/> |

#### **G-Logics review and Acknowledgment of Use and Copying Request**

Based on your concurrence with the above-presented conditions, approval of our Client, and our review of the information, G-Logics allows the Requestor to copy/use the above referenced Document for purposes stated. Additional fees may apply.
