

New Agreed Order for PRS

The Washington Department of Ecology (Ecology) proposes to issue a draft new Agreed Order for PRS Group, Inc. (PRS). PRS is located at 3003 Taylor Way in Tacoma, Washington. PRS receives and manages wastes from off-site generators. Activities conducted on site include: storage and treatment of used oil for resale, storage of spent antifreeze for recycling, and treatment of wastewater for discharge to the local sewer utility. PRS also manages non-dangerous waste sludge for disposal at a Subtitle D landfill.

The Agreed Order requires PRS to:

- Sample and test groundwater quarterly from nine monitoring wells for one year.
- Submit a data report to Ecology after the year of sampling.
- Compile groundwater data from past sampling events into one report for submittal to Ecology.

Using the sampling results, PRS will submit a final Remedial Investigation report, final Feasibility Study report, and draft Cleanup Action Plan according to Schedule D in the Agreed Order.

We'd Like to Hear from You

We welcome your comments on the new Agreed Order. After the close of the public comment period, Ecology will consider all public comments before issuing a final Agreed Order.

Ecology will notify PRS, each person who submitted written comments, and those who requested notice of our decisions. The Agreed Order becomes effective on the date Ecology signs it.

You may send your comments by mail or email. To be considered, comments must be postmarked or received by email or hand delivery by **September 4, 2015**.

Public Hearing

Ecology will conduct a public hearing if enough members of the public request one. To request a hearing, contact Charles Hoffman by phone, letter, or e-mail. To find out if a public hearing will be held, contact him after the public comment period closes.

Public Comment Period

**August 5, 2015
through
September 4, 2015**
