Proposal for Groundwater Monitoring Well Sampling**

Dear Mr. Hickey,

Regarding your request for proposal to sample the 14 groundwater monitoring wells at the referenced site, please note the following:

Glacier Environmental Services, Inc. will provide labor, equipment and analytical testing to complete the sampling for the lump sum of \$2,700.00 plus applicable sales tax. Each well will be tested for BTEX/NWTPH-G

This cost includes sampling the wells (purge each well with a submersible pump and sample with a disposable bailer), treating the purge water, and discharging it to sanitary sewer. We will sample the purge water after treatment to ensure it is within discharge limitations.

Our cost includes providing copies of field notes and, a table of analytical results, and of course, the lab data. No other reporting costs are budgeted. If you need me to provide a cost for preparation of an annual report, please let me know.

Please call if you have questions or wish to schedule the work.

Sincerely,
Glacier Environmental Services, Inc.
