The Department of Ecology (Ecology) is currently reviewing site files related to leaking underground storage tank sites. Ecology is requesting any updated cleanup activities information you may have on the above sites, which are owned by Philips 66, by July 19, 2002. Please submit the documents to John Bails at the Department of Ecology, Northwest Regional Office – Toxics Cleanup Program, Attn: John Bails, 3190 160th Ave SE, Bellevue, WA 98008-5452. Ecology’s objective is to facilitate the cleanup process at these sites, with the goal of moving the sites into a “Reported Cleaned Up” or “No Further Action” status.

These sites are eligible for the Voluntary Cleanup Program. The Voluntary Cleanup Program is a fee-based service that Ecology offers to parties who want a detailed review of independent cleanup activities conducted at their site, and who want a determination documented by a letter. The Voluntary Cleanup Program offers a range of opportunities for assistance on completing the cleanup of your site, including the review of plans and proposals. Eventually, after the successful review of a completed cleanup, the result is a “No Further Action” letter. The “No

mille
2002

“No Further Action” letter may be useful in the future to a buyer, seller, or financial institution in the event of a property transaction.

A “Reported Cleaned Up” status is not the same as a “No Further Action” status. It does not involve a detailed review by Ecology. The “Reported Cleaned Up” status may be based on the opinion of the site owner, consultant, or contractor as stated in the reports submitted to Ecology.

Your reports for these sites will be kept in the Central Files of the Northwest Regional Office of Ecology for public review by appointment only. Appointments can be made to review files by calling the Northwest Regional Office Records Center, at (425) 649-7190.

If you have questions about any of the information presented in this letter, please contact John Bails at (425) 649-7099.

Sincerely,

Desiree L. Wells
