Sign-off Sheet & Signatures of Environmental Professionals

This document entitled, **Phase I Environmental Site Assessment Report** was prepared by Stantec Consulting Services Inc. (Stantec) for the account of City of Kent and Brown Dog, LLC. The material in it reflects Stantec's best judgment in light of the information available to it at the time of preparation. Any use which a third party makes of this report, or any reliance on or decisions made based on it, are the responsibilities of such third parties. Stantec accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I Environmental Site Assessment have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 Summary

Stantec Consulting Services (Stantec) has completed a Phase I Environmental Site Assessment (ESA) of property located at 7730 South 202nd Street in Kent, Washington (Property), on behalf of the City of Kent and Brown Dog, LLC. The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) E1527-13 and the Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) Final Rule (40 Code of Federal Regulations [CFR] 312). The Phase I ESA was performed according to Stantec's proposal dated March 9, 2015. City of Kent and Brown Dog, LLC have been designated as the Users of this report. Stantec understands that the majority lienholder, Brown Dog, LLC is interested in selling or redeveloping the Property. The City of Kent is interested in returning the Property to productive reuse. Funding for assessments that will remove obstacles to cleanup and redevelopment is being jointly provided by City of Kent and Brown Dog, LLC.

The Property is identified as King County Parcel Number 631500-0300. The Property location is shown on Figure 1. The 12.05-acre Property is developed with an approximately 45,000 square-foot building (constructed in 1981) with an asphalt-paved parking lot located between the building and the northern Property boundary. The Property is zoned for industrial (M2) use, and is currently vacant. The surrounding area is predominantly industrial properties. The Property layout is shown on Figure 2.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of property located at 7730 South 202nd Street in Kent, Washington, the Property. Any exceptions to, or deletions from, this practice are described in Sections 2.3 and 7.2 of this report. This assessment has revealed evidence of the following recognized environmental conditions (RECs) in connection with the Property.

- There are an estimated 20,000 tons of black dross present in stockpiles primarily south and east of the Property building. The presence of the black dross on the Property represents an REC.
- There are multiple segregated waste piles and containers (55-gallon drums) located within the Property building. These wastes are believed to include black dross, KBI dross, metal oxide, and baghouse dust. The presence of these wastes represents an REC.
- Groundwater sampling conducted at the Property has documented the presence of elevated concentrations of aluminum, arsenic, barium, chromium, lead, chloride, and fluoride in groundwater. However, only arsenic concentrations exceeded its MTCA Method A Cleanup Level for Groundwater (no cleanup levels have been published for barium, chloride, or fluoride).
- Prior environmental investigations, and the reconnaissance visit conducted in completing this Phase I ESA have documented that dross has eroded into the streams that bisect the Property. Furthermore, sediment sampling conducted by Ecology & Environmental, Inc. (E&E) confirmed the presence of black dross in streams near the black dross stockpile, and immediately downstream of the Property. Dross-impacted sediment in streams represents an REC.

Summary

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

- A release from a 35,000 gallon diesel underground storage tank (UST) was identified during decommissioning and removal of the UST in 1995. Diesel concentrations remaining in soil associated with this release represents an REC.
- Piping that delivered diesel from the UST to furnaces located within the building remains in place. The material threat of a release from these pipes constitutes a REC.
- Releases documented at two nearby properties have the potential to migrate via groundwater to the Property and are considered RECs. These include: 1) the Colonial Cedar Company site located at 7800 S 206th Street; and 2) the Boeing Kent Benaroya site located at 8118 S 208th Street.
- The potential for a release to have historically occurred from the five ASTs located on the east side of the Property building represents an REC.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

2.0 Introduction

The objective of this Phase I ESA was to perform appropriate inquiry into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by ASTM in "Standard Practice for Environmental Property Assessments: Phase I Environmental Property Assessment Process", Designation E1527-13. The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), and controlled recognized environmental conditions (CRECs).

ASTM defines a REC as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

- (1) Due to any release to the environment;
- (2) Under conditions indicative of a release to the environment; or
- (3) Under conditions that pose a material threat of a future release to the environment.

ASTM defines an HREC as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required engineering or institutional controls. ASTM defines a CREC as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

This Phase I ESA was conducted in accordance with our proposal to the City of Kent and Brown Dog, LLC. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform any independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or Environmental Professional is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

- (1) Information that is publicly available;

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

- (2) Information that is obtainable from its source within reasonable time and cost constraints;
and
- (3) Information that is practicably reviewable.

2.1 Site Description

The Property is a 12.05-acre parcel located at 7730 South 202nd Street in Kent, Washington. The Property is developed with an approximately 45,000-square-foot building. An asphalt-paved parking lot is located between the building and the northern boundary of the Property. The Property is zoned for industrial development, and is currently vacant. The surrounding area also is predominantly industrial.

2.2 Special Terms, Conditions and Significant Assumptions

It is assumed that the purpose of this Phase I ESA is to qualify the Users, in part, for landowner protection from Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability and to facilitate the sale or redevelopment of the Property. The possible contaminants of concern considered in this assessment include those hazardous compounds listed under CERCLA and petroleum products. There were no special terms, conditions, or significant assumptions associated with the Phase I ESA.

2.3 Exceptions and Limiting Conditions

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the client. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the identified property.

This report provides an evaluation of selected environmental conditions associated with the Property at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information. All information received from the Client or third parties in the preparation of this report has been assumed by Stantec to be correct. Stantec assumes no responsibility for any deficiency or inaccuracy in information received from others.

If a service is not expressly indicated, do not assume it has been provided. If a matter is not addressed, do not assume that any determination has been made by Stantec in regards to it.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report, and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the Property's environmental condition.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

This report relates solely to the specific project for which Stantec was retained and the stated purpose for which this report was prepared and shall not be used or relied upon by City of Kent and Brown Dog, LLC for any variation or extension of this project, any other project or any other purpose.

This report has been prepared for the exclusive use of the City of Kent and Brown Dog, LLC. Any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities or claims, howsoever arising, from third party use of this report.

Project-specific limiting conditions are provided in Section 2.2.

The locations of any utilities, buildings and structures, and property boundaries illustrated in or described within this report, if any, including pole lines, conduits, water mains, sewers and other surface or sub-surface utilities and structures are not guaranteed.

The conclusions of this Phase I ESA are based on Property conditions encountered by Stantec at the time of the assessment. Accordingly, additional studies and actions may be required. As the purpose of this report is to identify selected conditions that may pose an environmental risk, the identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment. The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations or policies of Federal, state, provincial or local governmental agencies. Issues raised by the report should be reviewed by client legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the Property subsequently change.

2.4 Personnel Qualifications

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an Environmental Professional. The credentials of the Environmental Professionals and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix A.

3.0 User-Provided Information

3.1 ASTM 1527-13 Questionnaire

The ASTM E1527-13 standard and the AAI rule require that the User conduct specific inquiries regarding the environmental status of the Property, and provide the results of those inquiries to the Environmental Professional preparing the Phase I ESA. To assist the User in meeting this requirement, Stantec provided Brown Dog, LLC with a questionnaire which was completed by Ladd Moore representing Brown Dog, LLC.

Mr. Moore's responses to the questionnaire indicate the presence of one or more RECs for the Property. The responses to questions required by ASTM 1527-13 are summarized below. The completed questionnaire is provided in Appendix B.

1. Mr. Moore reported that Brown Dog, LLC is aware of environmental liens against the Property.
2. Mr. Moore reported that Brown Dog, LLC is not aware of activity or use limitations at the Property.
3. Mr. Moore reported that Brown Dog, LLC does not have specialized knowledge or experience related to the Property or nearby sites.
4. Mr. Moore reported that the Property is currently in bankruptcy and that a purchase price has not been established. It is therefore unknown if the sale price of the Property represents fair market value and does not indicate a reduced price due to environmental site conditions.
5. Mr. Moore reported that the Property historically was used as an aluminum smelter in the 1980s. Mr. Moore is aware of a former oil storage tank that was removed in the mid-1990s. Mr. Moore is not aware of any releases at the Property.
6. Mr. Moore reported that there are obvious indicators of the presence or likely presence of releases at the Property in the form of the dross stockpiles in the interior and exterior of the building.

3.2 Preliminary Title report

Stantec was not provided a Preliminary Title Report for the Property by either the City of Kent or Brown Dog, LLC. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Property, the absence of this information did not affect the ability of the Environmental Professionals to identify RECs, HRECs, CRECs, or de minimis conditions.

3.3 Previous Environmental Reports

There is a long list of previous environmental reports that have been prepared for the Property. Key reports provided to Stantec have been reviewed and are summarized below.

3.3.1 Ecology & Environment Site Assessment, 1987

The work described or completed by Ecology & Environment, Inc. (E&E) is summarized below. The locations for samples collected as part of this investigation are shown on Figure 2.

- E&E reported that Maralco had analyzed samples of black dross, baghouse dust, and aluminum oxide in July 1986. Sample results indicated the following:
 - Extraction Procedure Toxicity (EP-Tox) testing of the black dross, baghouse dust, and aluminum oxide yielded metal concentrations that did not exceed hazardous waste criteria contained within 40 CFR 261.
 - Static acute fish toxicity testing of various sampling media indicated the following:
 - Baghouse dust sample mortality was 96% and 100% at the 100 parts per million (ppm) and 1,000 ppm levels (it is presumed that the ppm levels indicated in the E&E report were in error as this testing method requires levels of 10 ppm and 100 ppm), respectively, indicating that it was an State of Washington extremely hazardous waste;
 - Kawecki-Berylco, Inc.(KBI) dross sample mortality was 90% and 100% at the 100 ppm and 1,000 ppm levels (it is presumed that the ppm levels indicated in the E&E report were in error as this testing method requires levels of 10 ppm and 100 ppm), respectively, indicating that it was an State of Washington extremely hazardous waste; and
 - Surface water sample mortality was 100%.
- Five surface soil samples (S1 through S5) collected by E&E indicated appreciable airborne migration of black dross or aluminum oxide.
- Black dross (C1 and C2), KBI dross (C3), and baghouse dust (C4) samples were tested for leachable metals using the EP-Tox test method. Metal concentrations in the extract did not exceed hazardous waste criteria.
- Sediment samples collected from within the stream that transects the Property adjacent to the black dross pile (B2) and immediately downstream of the Property (B1) yielded results indicating impact by black dross material. None of the sediment samples (B1 through B4) yielded EP-Tox extract concentrations exceeding hazardous waste criteria.
- Surface water samples co-located with sediment samples B1 and B2 were collected. As no background surface water samples were collected (the stream was not flowing at the time of sample collection), the significance of concentrations of metals detected in the samples could not be evaluated.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

- A sample of brine collected from one of the three Property holding ponds yielded antimony and arsenic concentrations exceeding Clean Water Act water quality criteria.
- Samples collected from a pile of grey sandy material located east of the former farm house (G1) and from a portion of the black dross pile that was yellow in color (G2) indicated metal concentrations similar to those detected in black dross samples.

3.3.2 MKE Phase I Remedial Investigation Report, 1991

Stantec was not provided a copy of the Phase I Remedial Investigation Report prepared by Moreson-Knudson Environmental Services, Inc. (MKE), so our summary below has been prepared using summaries contained in other documents. Work completed by MKE is summarized below. The locations for samples collected as part of this investigation are shown on Figure 2.

- Assessment activities completed by MKE included: 1) characterization of the exterior dross piles, 2) installation, development, and sampling of four monitoring wells, 3) surficial soil sampling in the former dross storage area located in the eastern portion of the site, and 4) sediment sampling in the holding pond located in the northwest corner of the property.
- Near surface soil samples collected by MKE indicated elevated concentrations of metals and chloride near the dross piles, in site drainage areas, and within the yard of the former farmhouse.
- Groundwater sampling indicated impacts in the form of elevated metal concentrations in monitoring wells MW-1, MW-3, and MW-4.
- The investigation showed that dross was entering on-site streams and that surface water was transporting the material off-site.
- A survey completed by MKE indicated the following waste types and volumes:
 - 19,325 cubic yards (20,781 tons) of black dross; and
 - 1,074 cubic yards (1,160 tons) of washed oxides.
- Testing of 13 black dross samples for leachable metals indicated that the black dross was not a characteristic hazardous waste.

3.3.3 MKE Interim Action Completion Letter Report, 1991

Stantec was not provided a copy of the *Interim Action Completion Letter Report* prepared by MKE, so our summary below has been prepared using summaries contained in other documents. Work completed by MKE is summarized below.

- The following interim actions were completed by MKE in October 1991:
 - The exterior black dross piles were covered with plastic sheeting;
 - The Property was graded to eliminate standing water and direct drainage to the storm sewer system;
 - The fence surrounding the property was replaced;

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

- Source control measures including washing of lot surfaces, cleaning of storm drains, and the removal of black dross from the holding pond located in the northwest corner of the Property.

3.3.4 EnviroS UST Decommissioning Report, 1995

The work described or completed by EnviroS, Inc. (EnviroS) on behalf of the Washington Department of Ecology (Ecology) and contained in the report *Underground Storage Tank (UST) Decommissioning at the Maralco Aluminum Site*, is summarized below.

- The report documents the removal of a 35,000-gallon diesel UST.
- Visual inspection of the UST following its removal indicated it was generally in good condition, but did have three pin-point holes near its west end.
- Diesel was not detected in soil samples collected from the base, north sidewall, and east sidewall of the excavation.
- Diesel was detected at concentrations of 96 milligrams per kilogram (mg/kg) and 6,300 mg/kg in the west and south sidewalls, respectively.
- Diesel concentrations in three soil stockpile samples ranged from 1,200 mg/kg to 2,100 mg/kg.
- Following UST removal, all stockpiled soils were returned to the UST excavation.

3.3.5 URS Black Dross Pile Characterization, 2000

The work described or completed by URS Corporation (URS) on behalf of Brown Dog, LLC, and contained in the *Black Dross Pile Characterization Report*, is summarized below.

- URS collected and analyzed one discrete black dross sample and four composite black dross samples. Testing included evaluation of toxicity using the Toxicity Characteristic Leaching Procedure (TCLP) and fish bioassay test methods. Results indicated that based on TCLP testing the black dross was not a characteristic hazardous waste and that based on fish bioassay testing, the black dross was not a State of Washington dangerous waste.

3.3.6 EMR Former UST Investigation, 2003

In 2003, Environmental Management Resources, Inc. (EMR) conducted additional site characterization activities in the former UST area of the Site. Sampling activities were documented in a memorandum prepared on behalf of Dale Frank Jr. and Brown Dog, LLC. Work completed by EMR and described in this report is summarized below.

- Two 1.5-inch copper pipes extended from the UST area to the southeast toward the main building suggesting that diesel may have been used to fuel one or more of the furnaces within the building. These pipes were only removed to the edge of the UST excavation, where pipe left in place was capped.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

- Soil and groundwater samples were collected from two direct-push borings: SB-1 located in the center of the former UST cavity and SB-2 located along the southern edge of the former UST cavity.
- Soils samples indicated no evidence of petroleum exceeding cleanup levels.
- Petroleum concentrations in the groundwater sample collected from boring SB-1 exceeded cleanup levels.

3.3.7 EMR Remedial Investigation/Feasibility Study, 2003

The work described or completed by EMR on behalf of Brown Dog, LLC, and contained in the *Remedial Investigation/Feasibility Study for the Former Maralco Site*, is summarized below. The locations for samples collected as part of this investigation are shown on Figure 2.

- Assessment activities completed by EMR included: 1) the installation, development, and sampling of one new monitoring well (MW-5), 2) sampling of three of the four existing monitoring wells (MW-2 through MW-4), 3) the collection of 22 dross samples from four soil borings (DP-1 through DP-4), and 4) the collection of soil samples from boring DP-5, located in the area of the former dross storage area in the eastern portion of the Property.
- Depth to groundwater measurements collected by EMR and others indicates that groundwater occurs at a depth of approximately 5 feet below the ground surface, and that groundwater migration is generally to the north-northwest.
- EMR RI findings included the following:
 - Elevated concentrations of aluminum, arsenic, barium, chromium, lead, chloride, and fluoride are present in groundwater, but only arsenic exceeded its MTCA Method A Cleanup Level for Groundwater (no cleanup levels have been published for barium, chloride, or fluoride).
 - Site soils do not contain elevated levels of metals or other contaminants.
 - The black dross piles contain aluminum, copper, barium, and mercury above levels of concern, but leachability testing has indicated that the black dross is not a characteristic hazardous waste.
- The remedial alternative recommended by EMR included the on-site containment of all black dross.

3.3.8 URS Draft Cleanup Action Plan, 2004

The work described or completed by URS on behalf of Brown Dog, LLC, and contained in the *Draft Cleanup Action Plan, Maralco Redevelopment Project*, is summarized below.

- URS completed an inventory of stockpiled wastes located inside the building. Seven cribbed stockpiles were noted. The total estimated volume of material in these stockpiles was 1,100 cubic yards. Also noted by URS were five 55-gallon drums of waste located in the southeast corner of the building. Further characterization of these wastes was recommended by URS.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

- URS identified removal and disposal of all black dross and other wastes at an off-site disposal facility as the preferred remedial action. The cost estimated by URS to implement this option was \$1.1M and assumed that the black dross is deemed a solid waste and not a hazardous or dangerous waste.
- URS recommended the following supplemental RI assessment activities:
 - The collection of black dross samples from 17 test pits. Testing was to include salt content testing of 34 soil samples (two from each test pit), and testing of four composite black dross samples for hazardous waste criteria.
 - The collection of composite samples from each discrete waste pile area within the warehouse, and testing of the composite samples for hazardous waste criteria.
 - Collection of up to 12 soil samples and four groundwater samples from six borings located in the former UST area.
 - Collection and analysis of groundwater samples from each of the five existing monitoring wells at the Site for total and dissolved metals.

3.3.9 Ecology Fish and Rat Bioassay Testing Correspondence, 2006

Stantec obtained from Ecology several emails regarding fish and rat bioassay testing of samples collected from the black dross pile. The emails are dated March 21, 2006. An email exchange between URS and Ecology indicates no mortality with either fish or rat bioassay testing. An email from Ecology indicates that these findings, if confirmed, document that the black dross is not classified as a State of Washington dangerous waste.

4.0 Records Review

The objective of consulting historical sources of information is to understand the history of the Property and surrounding area to evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify Property uses from the present to its first developed use. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 Physical Setting

A summary of the Property's physical setting is provided in the following subsections

4.1.1 Property Topography

The Property is located at approximately 29 feet above mean sea level. The topography of the Property vicinity is generally flat. The surface of the Property slopes gently downward to the north toward Lake Washington.

4.1.2 Regional and Property Geology

The Property is located in the lower Green River Valley. The Valley runs north from Auburn to Renton. The Valley is located within the Puget Sound Lowland. The physiography of this area has been dominated by the advance and retreat of continental glaciers during the Vashon Glaciation period.

Advance of the glaciers into western Washington carved out the Kent Valley while depositing outwash chiefly composed of sand and gravel, and dense compacted glacial fill in the upland areas. Retreat of the glaciers left the valley as a deep marine embayment. The Green, White, and Cedar rivers deposited a thick accumulation of fluvial sediments, which were eroded from the glacial drift uplands, into the Valley. The remaining sediments consist of coarse sand and gravel near the mouth of the rivers at Auburn and Renton, and become finer toward the Kent area.

During subsurface investigation of the Property, native unconsolidated sediments described from the surface to the maximum depth explored of approximately 15 feet below ground surface (bgs) are generally silty fine sand, with some interbeds of fine and medium sand.

4.1.3 Regional and Property Hydrogeology

The Property is located with the Duwamish (Green) River Basin. Regional groundwater in the area of the Property is dominated by the Green River. Five distinct hydrogeological units comprise the aquifer system and are (from youngest to oldest, and shallowest to deepest), the White River Alluvium, the Vashon glacial deposits, the Salmon Springs deposit, the Older Undifferentiated Glacial and Interglacial deposits, and the Bedrock of the Puget Group.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

The water table occurs at the Property at a depth of approximately 5 feet bgs. Mapping of the potentiometric surface of the water table has historically indicated groundwater migration to the north-northwest. Groundwater on the Site is likely influenced by the streams that cross the Site.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report for the Property and surrounding area was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix C.

Stantec evaluated the database report relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. As described in Section 4.1.3, the inferred shallow groundwater flow direction is likely to be to the north-northwest. Observations about the Property and surrounding areas made during the reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for the Property

There are multiple environmental listings associated with the Property, which are summarized in the table below.

Phase I Environmental Site Assessment*Former Maralco Aluminum Site*

Environmental Listing	Explanation
RCRA NonGen/NLR	RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste.
FINDS	Washington Facility/Site Identification System (WA-FSIS) provides a means query and display data maintained by Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
WA CSCSL	The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from Ecology's Confirmed & Suspected Contaminated Sites List.
WA ALLSITES	Information on facilities and sites of interest to Ecology.
WA HSL	The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method.
WA LUST	The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from Ecology's Leaking Underground Storage Tanks Site List.
WA UST	The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act. The data come from Ecology's Statewide UST Site/Tank Report.
WA Brownfields	A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

The individual listings for the Property were reviewed by Stantec, but provided no information relevant to the identification of RECs that was not already provided in the environmental reports summarized in Section 3.3.

4.2.2 Listings for Nearby Sites with Potential to Impact the Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on nearby properties that could pose an REC, CREC, or HREC for the Property.

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Property. The basis for why each of the following listed databases creates an REC for the Property is also provided.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Colonial Cedar Company, Inc. 7800 S 206 th Street	WA CSCSL WA ALLSITES WA LUST WA UST WA VDP	Adjacent and south (upgradient)	YES
<p>Various listings indicate that a release from a petroleum UST has impacted soil and groundwater at this facility at concentrations exceeding cleanup levels. Status has been listed as "cleanup started" and a no further action determination has not been issued for this facility. The potential for impacted groundwater to migrate from this facility to the Property is considered to be high, and this listing is therefore considered to be an REC.</p>			
Boeing Co. Kent Benaroya 8118 S 208 th Street	WA CSCSL WA ALLSITES WA MANIFEST	0.32 miles south-southeast (upgradient)	YES
<p>Contaminants identified at this facility include halogenated and non-halogenated solvents, priority pollutant metals, petroleum, and PCBs. Based upon limited data available in the EDR report (no information was available on the Ecology website) the potential for impacted groundwater to migrate from this facility to the Property is unknown, and therefore this listing is considered to be an REC.</p>			
Univar USA Inc Kent 8201 S 212 th Street	RCRA-TSDF CORRACTS RCRA-LQG RAATS WA CSCSL WA ALLSITES WA MANIFEST WA NPDES US FIN ASSUR 2020 COR ACTION	0.61 miles south-southeast (upgradient)	NO
<p>Beginning in the 1990s, contamination from waste management activities and accidental chemical releases was investigated at the site. Studies revealed that soil in two areas of the eastern portion of the site are contaminated with organic chemicals and chlorinated compounds. Groundwater is also contaminated. Most of the groundwater contamination remains located beneath the property. Some contaminants in the deeper part of the aquifer have flowed north under 212th Street and beneath an adjacent industrial property. Based on lateral extent of the groundwater plume described, the potential for impacted groundwater to migrate from this facility to the Property is considered to be low, and this listing is therefore not considered to be an REC.</p>			

The remaining listings in the database search report provided in Appendix C do not constitute a potential REC for the Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

4.3.1 Fire Department

Agency Name Contact Information	Finding
Kent Office of the City Clerk Public Disclosure Administrator Alyne Hansen 220 Fourth Avenue South, Kent, WA 98032 Phone: 253-856-5724 Searched: 05/11/2015	Stantec conducted a Public Records Request of hazardous substance incidents from 1980 to present. No hazardous substance responses were recorded for the Property. A permit for the removal of an approximately 35,000-gallon UST dated 6/23/1995 was obtained by Stantec.

4.3.2 Local Building and/or Planning Department Records

Agency Name, Contact Information	Findings
Kent Office of the City Clerk Public Disclosure Administrator Alyne Hansen 220 Fourth Avenue South, Kent, WA 98032 Phone: 253-856-5724 Searched: 05/11/2015	Stantec conducted a Public Records Request of Building and Planning Department records for the Property on May 11, 2015. Several building permit applications pertaining to the Property were identified. The permits identified included electrical, plumbing, sewer, construction, site cleanup, excavation and grading, a business license, and UST removal. A few permit details related to Property environmental conditions are listed below. <ul style="list-style-type: none"> • An Existing Site Conditions drawing date stamped 11/16/2004 indicating the following: <ul style="list-style-type: none"> ○ An existing sewer connection from the main building to a sanitary sewer line located in S. 202nd Street. ○ An existing domestic water connection from the main building to a water supply line in S. 202nd Street. ○ An existing electrical/telephone connection from the main building to lines located in S. 202nd Street. • A Site Plan dated 3/6/81 indicating the following: <ul style="list-style-type: none"> ○ Both a "furnace pump" and "fuel pump" associated with the 35,000-gallon diesel UST. ○ A "gas meter" located near the northeast corner of the main building. ○ A "transformer" located near the northeast corner of the main building. ○ A restroom located in Trailer 2 near the northeast corner of the main building. • A 1966 assessor card for the abandoned residence indicating a "hot air furnace oil burner" as a heating source. • A 1979 assessor card for the main building with fire sprinklers, but no plumbing fixtures listed. Also indicated space heaters as a heating source.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

King County Department of Assessment online records indicate that the Property lot size is 524,695 square feet, and that a 45,000 square-foot masonry building was constructed on the Property in 1981. The current owner of the Property is listed as Nace Halpin. A note on a property record dated 9/28/2011 states “called Nace Halpin, owner of record, who stated he lost rights to the property through bankruptcy, and is content to let it go to the county for unpaid back taxes.” Jill Smith of the King County Treasury Division reported in a phone conversation with Stantec on 5/11/2015 that the total back taxes owed on the Property as of that date were \$989,001.01.

The former operator of the facility (Maralco) filed for bankruptcy in May 1983 and ceased operations in November 1986. The company’s creditors, Union Labor Life Insurance Company (ULLICO), Seattle-First National Bank, and Leasco Washington, Inc. and the State of Washington entered a tri-party agreement, which was approved by the U.S. Bankruptcy Court for the Western District of Washington, at Seattle, case numbers 83-01372 and 83-01373 on August 9, 1989. The Property was subsequently managed by a bankruptcy examiner, Quentin Steinberg, appointed by the Court. A letter from Mr. Steinberg dated March 23, 2006, indicated that the bankruptcy case had been closed by Judge Overstreet to be reopened when the Property was ready to sell, with Mr. Steinberg directed to “monitor the situation” while there were funds available to pay for his services. The March 23, 2006 letter stated that funds had been fully expended, and that he would not be doing any further work related to the Property and was closing his files.

Brown Dog, LLC is a real estate investment company owned by Chad T. Moore, Ladd Moore, and Mackenzie L. Moore, which became involved with the Property circa 2000 in anticipation of clean up and use of the Property. Brown Dog, LLC gained a measure of control of the Property by purchasing the paper position of ULLICO. By 2004, Brown Dog had also acquired the perfected secured lien position on the remainder of the Property held originally by Seattle-First National Bank, Sea-First Leasing Company, and Leasco Washington, Inc., but acquired at some point by Independent Financing Services in California.

Ecology holds an outstanding environmental lien on the Property for over \$1 million in state funds expended on interim actions to secure the Property and to partially mitigate significant threats to human health and the environment. An Ecology Draft Memo dated 10/24/2006 identifies \$1,094,964.26 in past costs for interim actions completed by Ecology. Email correspondence dated May 17, 2011 from David South of Ecology to Ladd Moore of Brown Dog, LLC discussed the issue of Ecology’s outstanding lien on the Property and the bankruptcy settlement and final order that contemplated Ecology would clean up the Site and receive a portion of the sale proceeds from the Property if the remediated property was then sold.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs of the Property and surrounding area provided by EDR. General land use can often be discerned from the type and layout of structures visible in

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

aerial photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs. Copies of the aerial photographs are provided in Appendix D.

Photo Year	Observations
1943	The Property appears to be developed as a rural agricultural property. A residence and outbuildings are present in the north-central portion of the Property. The remainder of the Property is relatively devoid of trees and in apparent agricultural use. Streams are visible in the same configuration as the streams present at the Property today. Railroad tracks border the western boundary of the Property.
1956	There are no notable differences in the apparent configuration of the Property and surrounding sites in this aerial photograph as compared to the 1943 aerial photograph.
1965	There are no notable differences in the apparent configuration of the Property and surrounding sites in this aerial photograph as compared to the 1943 and 1956 aerial photographs, with the exception of a large building now present northeast of the Property.
1968	While there are no notable differences in the apparent configuration of the Property, significant development of nearby sites to the north, east, and south has occurred. However, adjacent sites to the north, east, south, and north remain in apparent agricultural use.
1977	Again, no notable differences in the configuration of the Property are apparent. Development in surrounding areas continues, including development on the adjacent property to the north, property across 80 th Avenue South to the east, the property adjacent and both south and east of the Property, and across the railroad tracks west of the Property.
1980	It appears that recent grading of the western portion of the Property has taken place, but the residence and outbuildings remain the only visible structures present on the Property.
1985	The present day building is now visible on the Property in its present-day configuration. In addition, a smaller building is present east of the northeast corner of the main building. Potential ground disturbance as light areas are visible west of the building, on the adjoining parcel to the north of the Property, and west, southwest, and east of the residence. Also visible are what is inferred to be piles of dross both south and west of the main building. There are numerous vehicles and stored equipment in what appears to be an asphalt-paved parking lot north of the main building, indicating that the facility is actively operating.
1990	The Property appears much as it did in 1985, but the absence of vehicles parked at the facility indicates that operations have ceased.
2009	The Property appears much as it did in 1985 and 1990, but dimensional lumber and other building materials are stored in the surface parking lot located in the northwest corner of the Property.
2011	No notable changes from 2009
2015	Google® imagery indicates that wood products are no longer being stored in the parking lot, but otherwise, the Property appears unchanged.

4.4.3 City Directories

Stantec obtained a search of historical city telephone directory listings on S 2002nd Street between railroad tracks and the Interurban Trail located west of the Property and roughly 96th Avenue S east of the Property. EDR provided directory listings from 1969 to 2013, at approximate five year

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

intervals. The directory listings provide addresses and business names (or names in the case of residential properties). A summary of our review of directory listings for the Property and adjoining properties is provided below. Copies of the city directories provided by EDR are included in Appendix E.

Directory Year	Directory Listing Information
1974 & 1979	On the Property: No listing. Across S 202 nd Street from Property (7816 S 202 nd Street): No listing. West on S 202 nd Street (across railroad tracks): No listing. East on 202 nd Street: Only residential listings.
1985	On the Property: Maralco Aluminum. Across S 202 nd Street from Property (7816 S 202 nd Street): No listing. West on S 202 nd Street (across railroad tracks): Only residential listings. East on 202 nd Street: Only residential listings.
1992 & 1995	On the Property: No listing. Across S 202 nd Street from Property (7816 S 202 nd Street): No listing. West on S 202 nd Street (across railroad tracks): No listing. East on 202 nd Street: Bert-Well Industries, Inc. and residential listings.
1999	On the Property: No listing. Across S 202 nd Street from Property (7816 S 202 nd Street): Puget Sound Pipe & Supply Company. West on S 202 nd Street (across railroad tracks): Only residential listings. East on 202 nd Street: Bert-Well Industries, Inc. and residential listings.
2003	On the Property: No listing. Across S 202 nd Street from Property (7816 S 202 nd Street): Puget Sound Pipe & Supply Company, & Timberline Process & Controls. West on S 202 nd Street (across railroad tracks): A&R Auto Sales and residential listings. East on 202 nd Street: Osmonics, Visionary Builders, and residential listings.
2008	On the Property: No listing. Across S 202 nd Street from Property (7816 S 202 nd Street): Puget Sound Pipe & Supply Company. West on S 202 nd Street (across railroad tracks): Only residential listings. East on 202 nd Street: Bert-Well Industries, Inc., Kisses Cuddles Daycare, and residential listings.
2013	On the Property: No listing. Across S 202 nd Street from Property (7816 S 202 nd Street): No listing. West on S 202 nd Street (across railroad tracks): Only residential listings. East on 202 nd Street: Only residential listings.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

4.4.4 Historical Fire Insurance Maps

Stantec requested fire insurance maps from EDR; however, no maps that include the Property were found. The Sanborn® Map Search Report indicating “no coverage” is presented in Appendix F.

4.4.5 Historical Topographic Maps

Stantec reviewed historical United States Geological Survey (USGS) 7.5-Minute Topographic Maps of the Renton, Washington Quadrangle to help identify past Property use and areas of potential environmental concern. Maps dated 1900, 1949, 1968, 1973, 1983 and 1994 were reviewed. The Property building was observed only in the 1994 map. The Property residence and/or outbuildings were observed on the 1949, 1968, 1973, and 1983 maps. No RECs were noted during our review of the topographic maps. Copies of the historical topographic maps are provided in Appendix F.

5.0 SITE RECONNAISSANCE

A reconnaissance visit was conducted at the Property by Nate Magnusson and Greg McCormick of Stantec on June 26, 2015. Stantec was accompanied by Ladd Moore of Brown Dog, LLC and Bill Ellis of the City of Kent during portions of the reconnaissance. Photographs collected during the reconnaissance visit are included in Appendix G.

5.1 SITE RECONNAISSANCE METHODOLOGY

The Property reconnaissance focused on observation of current conditions and observable indications of past uses and conditions that may indicate the presence of RECs. The Property reconnaissance was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Property boundary.
- Traverse transects across accessible portions of the Property.
- Traverse the periphery of all accessible structures on the Property.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces.

Weather conditions during the reconnaissance visit were clear and sunny. There were no weather related Property access restrictions encountered during the reconnaissance visit.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property is located at 7730 South 202 nd Street in Kent, Washington. The Property is zoned for industrial development, and is currently vacant. The surrounding area also is predominantly heavy industrial.
Property Operations:	The Property is currently mostly vacant, however; portions of the parking lot are utilized for storage of steel pipe. The Property historically was operated as an aluminum can recycling/ smelting facility from 1980 – 1986.
Structures, Roads, Other Improvements:	The Property is developed with an approximately 45,000-square-foot main building that was utilized for recycling activities. The building appeared to be in fair-to-poor condition. The Property also contains a former farm house and several out-buildings that appear to be in very poor condition. An asphalt-paved parking lot is located between the main building and the northern boundary of the Property. The far western portion of the Property contains a railroad spur that abuts the west side of the main building.
Property Size (acres):	The Property is 12.05 acres in size.
Observed Evidence of Past Property Use(s):	No evidence of uses other than the historical aluminum recycling/smelting and farming activities was observed during the reconnaissance visit.
Sewage Disposal Method (and age):	No sewage management structures of any kind were observed associated with either the main building or abandoned residence located on the Property.
Potable Water Source:	No water supply structures of any kind were observed associated with either the main building or abandoned residence located on the Property.
Electric and Gas Service:	No natural gas or electrical infrastructure of any kind was observed associated with either the main building or abandoned residence located on the Property.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the reconnaissance visit.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	One 55-gallon drum labeled "Diesel" was observed in the main building near the former furnace. For safety reasons Stantec was unable to further investigate or verify the contents of the drum during the reconnaissance visit.
Drums (≥ 5 gallons):	Numerous 55-gallon drums were observed throughout the interior of the main building. Most were in poor condition and appeared likely to be empty. One drum located on a lowered platform east of the former furnace was labeled "Diesel" and approximately ten (10) drums were located in a steel storage/shipping container located in the southeast corner of the building and appeared to contain dross material. Drums were only visually inspected due to their location in unsafe areas.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	Three former holding ponds located adjacent to the east side of the main building were full of water presumed to be rain water.
Unidentified Substance Containers:	Numerous 55-gallon drums of unknown content with no labels were observed throughout the interior of the building.
PCB-Containing Equipment:	None observed.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	Five cribbed areas (three along the interior west wall of the building, one along the western wall near the center of the building, and one near the southeast corner of the building) located within the main building contained what appeared to be dross and/or baghouse dust. Numerous empty spray-paint cans were observed throughout the interior of the main building.

The presence of the containers observed at the Property in the described condition represents an REC.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

5.4 INTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of the building interiors and/or identified the following information during the interview or records review portions of the assessment. Stantec was unable to access the interior of the abandoned residence so all observations described below are for the main building.

Observations	Description
Heating/Cooling Method:	No indications of current or former heating systems were observed in the Property building.
Surface Stains or Corrosion:	None observed.
Floor Drains and Sumps:	None observed.
Other Interior Observations:	Piles of a white, fibrous material were observed in and near the former furnaces. Insulating bricks were observed inside of the former furnaces. Visual inspection of these materials did not indicate whether or not they contain asbestos.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the reconnaissance visit of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment.

Observations	Description
On-site Pits, Ponds, or Lagoons:	Three holding ponds were observed adjacent to the east-central side of the building. The holding ponds were full of water that is presumed to be rainwater.
Stained Soil or Pavement:	Sediments in the stream located adjacent to the dross stockpile showed evidence of staining due to dross erosion into the stream. Staining appeared to be either a white or orange-brown film.
Stressed Vegetation:	Stressed vegetation was observed along the stream adjacent to the east side of the dross stockpile.
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	No dumpsters were observed on the Property. Portions of the Property south and east of the building contain stockpiles of black dross material. Plastic tarps that were placed over the stockpiles during previous environmental activities at the Property have deteriorated. As a result, they no longer prevent infiltration of precipitation or wind transport of dross.
Potential Areas of Fill Placement:	The elevation of the ground surface at the Property is relatively flat with a gentle slope to the north with the exception of two streams that flow off of the Property to the northwest. The east approximately one-half of the Property is currently overgrown with heavy brush (blackberry) and was therefore not investigated during the reconnaissance visit.
Wastewater:	None observed.
Stormwater:	Four stormwater catch basins were observed in the asphalt-paved parking lot on the northwest portion of the Property. Roof drains leading from the roof to the parking lot and unpaved areas were observed on the Property.
Wells:	A groundwater monitoring well (MW-3) was observed in the southwest corner of the property near the railroad spur.
Septic Systems:	None observed.

The staining and stressed vegetation along the stream is consistent with the dross-impacted sediment in streams previously identified as an REC, and therefore is not referenced as a separate REC but considered a component of the previously identified REC related to dross in the stream.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches) that would indicate the presence of USTs was observed during the Property reconnaissance.
Former USTs:	A surface patch indicative of a UST removal was observed in the western portion of the parking lot. This patch correlates with diagrams from previous reports (Enviros, 1995) with the location of the removal of an approximately 35,000-gallon UST in 1995.
Other Underground Structures:	A former electrical service vault was observed near the northeast corner of the building. A catch-basin type vault also was observed near the northeast corner of the building.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	Five ASTs were observed along the east side of the building, between the building and holding ponds. It is suspected that these ASTs were used for water storage as part of the system that recovered salts from black dross. The tanks appear in very poor condition. The content of the tanks was not investigated during the reconnaissance visit due to access and safety issues. Because the use of the ASTs could not be confirmed, and the fact that they are in poor condition, the ASTs represent an REC.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining properties.

NORTH	Puget Sound Pipe & Supply and an Unknown business.
SOUTH	Walman Optic and Knight Transportation.
EAST	Western Equipment Distributors Inc. (landscaping equipment sales), Young Ocean (food distributor).
WEST	Stericycle (chemical recycling) and Unknown bark/woodchip yard.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining properties providing indications of past use and activities, if any, are described below.

NORTH	None observed.
SOUTH	None observed.
EAST	None observed.
WEST	None observed.

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjoining properties.

NORTH	None observed.
SOUTH	None observed.
EAST	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The topography of the Property vicinity is generally flat. The surface of the Property slopes gently downward to the north toward Lake Washington. There are two streams transecting the Property, one from the southwest and one from the northeast, that join into a single stream near the center of the Property. Once joined, the single stream continues toward the northwest corner of the Property.
---	---

INTERVIEWS

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

6.0 INTERVIEWS

Stantec conducted interviews with the following individuals:

Name and contact information	Relationship to Property	Key findings:
Jill Smith, King County Treasury Division (206-263-2649)	Lien Holder	Reported that total delinquent property taxes owed on the Property as of 5/11/2015 were equal to \$989,001.01

7.0 EVALUATION

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and a property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

Finding 1: There is an estimated 20,000 tons of black dross present in stockpiles primarily south and east of the Property building. Waste characterization testing has indicated that the black dross is neither a characteristic hazardous waste nor a State of Washington dangerous waste, although these findings should be confirmed with Ecology as the published record on this issue is incomplete. Soil testing indicated the potential presence of black dross at E&E soil sampling location G1, located southeast of the former residence, and in the yard of the residence by MKE (exact location is unknown as Stantec was not provided a copy of the 1991 MKE report).

Opinion 1: It is our opinion that black dross present at the Property represents an REC.

Finding 2: There are multiple segregated waste piles and containers (55-gallon drums) located within the Property building. These wastes are believed to include black dross, KBI dross, metal oxide, and baghouse dust. Further characterization of these wastes was recommended by URS in 2004, but no documentation that this recommendation was carried-out has been identified.

Opinion 2: It is our opinion that these wastes represent an REC.

Finding 3: Groundwater sampling conducted at the Property has indicated elevated concentrations of aluminum, arsenic, barium, chromium, lead, chloride and fluoride in groundwater. However, only arsenic concentrations exceeded its MTCA Method A Cleanup Level for Groundwater (no cleanup levels have been published for barium, chloride, or fluoride). Based upon these findings, it would appear that dross stored at the Property is an on-going source of groundwater contamination.

Opinion 3: Dross-impacted groundwater present at the Property represents an REC.

Finding 4: Prior environmental investigations, and the reconnaissance visit conducted in completing this Phase I ESA, have documented that dross has eroded into the streams that bisect the Property. Further, sediment sampling conducted by E&E confirmed the presence of black dross in stream sediments near the black dross stockpile, and immediately downstream of the Property.

Opinion 4: Dross-impacted sediment present in streams both on the Property and downstream of the Property represents an REC.

EVALUATION

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

- Finding 5: A release from a 35,000 gallon diesel UST was identified during decommissioning of the UST by removal in 1995. Diesel concentrations as high as 6,300 mg/kg were detected in soil samples collected from the UST cavity, and composite soil samples containing diesel at a concentration of up to 2,100 mg/kg were used to backfill the UST cavity. Piping was noted extending to the south from the UST excavation and were not investigated.
- Opinion 5: It is our opinion that diesel in soil associated with a release from a former UST system represents an REC.
- Finding 6: Two copper pipes presumed to have delivered diesel from the 35,000-gallon UST to furnaces located within the building remain in place, and have not been adequately assessed.
- Opinion 6: The material threat of a release from these fuel delivery lines is considered a REC.
- Finding 7: A facility listed on multiple Ecology environmental databases designated as Colonial Cedar Company is located adjacent and upgradient of the Property. Groundwater impacts above cleanup levels have been documented at the facility. The potential for impacted groundwater to migrate from the facility onto the Property is considered to be high. A second facility listed on multiple Ecology environmental databases and designated as Boeing Co. Kent Benaroya is located 0.32 miles upgradient of the Property. Little information was available regarding the type and magnitude of contaminants at this facility.
- Opinion 7: It is our opinion that the potential for hazardous substances or petroleum from these two nearby facilities to migrate to the Property via groundwater represents an REC.
- Finding 8: Five ASTs in poor condition were observed between the Property building and three holding ponds formerly used to recover salts from dross. Based upon their location, and our understanding of former Maralco salt recovery operations, it is suspected that these ASTs were used to store water. However, this could not be confirmed.
- Opinion 8: Because the substances formerly stored in these ASTs could not be confirmed, and because the ASTs are in poor condition, the AST system is considered an REC.

7.2 DATA GAPS

The federal AAI rule [40 CFR 312.10(a)] and ASTM E1527-13 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Phase I Environmental Site Assessment*Former Maralco Aluminum Site*

Gap	Discussion
Deletions or Exceptions From Scope of Work Referenced in Section 2.3:	None
Weather-Related Restrictions To Property Reconnaissance:	None
Facility Access Restrictions to Property Reconnaissance:	None
Other Property Reconnaissance Restrictions:	Heavy overgrowth of trees/shrubs/blackberries prevented access to the northwest corner and eastern one-half to two-thirds of the Property. Unsafe conditions (loose debris piles, unsound structures, etc.) prevented access to portions of the interior of structures.
Data Gaps From Environmental Records Review:	None
Data Gaps From Historical Records Review:	None
Data Gaps From Interviews:	None
Other Data Gaps:	None

7.3 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of property located at 7730 S. 202nd Street, in Kent, Washington, the Property. Any exceptions to, or deletions from, this practice are described in Sections 2.3 and 7.2 of this report. This assessment has revealed the following evidence of RECs in connection with the Property.

- There is an estimated 20,000 tons of black dross present in stockpiles primarily south and east of the Property building. The presence of the black dross at the Property represents an REC.
- There are multiple segregated waste piles and containers (55-gallon drums) located within the Property building. These wastes are believed to include black dross, KBI dross, metal oxide, and baghouse dust. The presence of these wastes represents an REC.
- Groundwater sampling conducted at the Property has documented the presence of elevated concentrations of aluminum, arsenic, barium, chromium, lead, chloride, and fluoride in groundwater. However, only arsenic concentrations exceeded its MTCA Method A Cleanup Level for Groundwater (no cleanup levels have been published for barium, chloride, or fluoride).
- Prior environmental investigations, and the reconnaissance visit conducted in completing this Phase I ESA have documented that dross has eroded into the streams that bisect the Property. Further, sediment sampling conducted by E&E confirmed the presence of black

EVALUATION

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

dross in stream sediments near the black dross stockpile, and immediately downstream of the Property. Dross-impacted sediment in streams represents an REC.

- A release from a 35,000 gallon diesel UST was identified during decommissioning of the UST by removal in 1995. Diesel concentrations remaining in soil associated with this release represents an REC.
- Piping that delivered diesel from the UST to furnaces located within the building remains in place. The material threat of a release from these pipes constitutes a REC.
- Releases documented at two nearby properties have the potential to migrate via groundwater to the Property and are considered RECs. These include: 1) the Colonial Cedar Company site located at 7800 S 206th Street; and 2) the Boeing Kent Benaroya site located at 8118 S 208th Street.
- The potential for a release to have historically occurred from the five ASTs located on the east site of the Property building represents an REC.

NON-SCOPE CONSIDERATIONS

Phase I Environmental Site Assessment

Former Maralco Aluminum Site

8.0 NON-SCOPE CONSIDERATIONS

The scope of work completed was limited solely to those items in the ASTM E1527-13 standard. No ASTM E1527-13 non-scope services were performed as part of this Phase I ESA.

Personnel Qualifications

Leonard Farr Jr. is a senior associate with Stantec Consulting Services, Inc. Mr. Farr has worked as an environmental consultant in Portland, Oregon for 25 years. Mr. Farr regularly assists clients with complex regulatory issues, with particular emphasis in the areas of environmental due diligence, brownfield redevelopment, remedial investigation/feasibility study (RI/FS), and cleanups of contaminated land. Mr. Farr has considerable experience in risk-based corrective action for a wide variety of environmental media including sediment, soil, groundwater, and soil vapor. He has routinely negotiated site closures with state (Oregon and Washington) and federal environmental regulatory agencies.

REPRESENTATIVE WORK

- Managed more than 500 due diligence projects (Phase I and II Environmental Site Assessments) for a variety of Portland-based local government and commercial clients.
- Assisted a variety of clients in the acquisition, assessment, cleanup, and redevelopment of brownfield properties. Two brownfield projects managed by Mr. Farr have received national awards for excellence in brownfield redevelopment. Mr. Farr also has assisted local government clients in preparing U.S. Environmental Protection Agency brownfield grant applications that since 2012, has resulted in \$2.2 M in funding to Oregon communities.
- Managed numerous complex RI/FS projects within state and federal regulatory programs. These projects have involved the collection of thousands of samples, the assessment of risk associated with contaminants detected in the samples, and the analysis of corrective action alternatives to mitigate contaminants detected at concentrations exceeding acceptable risk levels.
- Completed a wide variety of cleanup projects utilizing a myriad of cleanup technologies including dig & haul, pump & treat, soil vapor extraction, and air sparging. Mr. Farr also has substantial experience in the application of institutional and engineering controls.

EDUCATION

BS, Geology, Portland State University, 1987

MS, Geology, Portland State University, 1989

40-Hour Hazardous Waste Worker (29 CFR 1910.120),
1989

REGISTRATIONS

Registered Geologist, Oregon, #1169

Licensed Geologist, Washington, #1849

Mr. Holmes has more than 28 years of professional consulting experience performing and managing environmental assessment, investigation, and cleanup projects and helping public and private sector clients to secure funding to implement these projects. David has worked on hundreds of brownfield sites on behalf of local government and developer clients throughout the US. He has exceptional experience securing state and federal grants to support brownfields redevelopment (more than \$20 million in grant to date) as well as water resources and habitat restoration projects (more than \$8 million in grants to date).

EDUCATION

Master of Science Geology, University of Wisconsin, Milwaukee, Wisconsin, 1988

Bachelor of Science Geology, University of Wisconsin, Milwaukee, Wisconsin, 1984

Doctoral Program Coursework, University of Wisconsin, School of Freshwater Science, Milwaukee, Wisconsin, 2014

OSHA, Health & Safety for Hazardous Waste Operations, 40-hour, 2011

REGISTRATIONS

Professional Geologist #2301, State of Indiana

Professional Geologist #887-13, State of Wisconsin

PROJECT EXPERIENCE

Brownfields

Redevelopment Projects at the Historic Pabst Brewery Complex, Milwaukee, Wisconsin

David is assisting Blue Ribbon Management LLC in procuring funding and implementing cleanup activities in support of three planned developments at the historic brewery complex (at one time, the world's largest brewery). The developments include a \$12 million office building (completed in 2014), a \$4 million micro-brewery, and a \$44 million residence to house 400 international university student residence in the historic bottling plant. David is assisting with securing local, state, and federal funding for assessment, cleanup, abatement, and infrastructure improvements in association with these projects.

Environmental Site Assessments Phase I, II, III

City of Milwaukee Redevelopment Authority*, Milwaukee, Wisconsin

David managed Phase II environmental assessment activities on behalf of the Redevelopment Authority of the City of Milwaukee throughout an approximate 5-1/2 block area located within an inner city area of Milwaukee. The project site contained more than 300 parcels that were developed for a variety of commercial, industrial, and residential uses in the late 1800's. Most of the project site was cleared in the 1960's and 1970's for a freeway project that was later abandoned. At the time of the assessment, the site consisted of more than 50 parcels with approximately 30 individual owners. Approximately 20 of the parcels contained buildings at the time of the assessment ranging in size from single family residences to four story commercial and multi-family residential buildings. Project activities included performance of a magnetometer survey and search for underground storage tanks (USTs) throughout all open areas of the site, performance of Phase II ESA soil and groundwater sampling on 20 parcels, excavation of test pits at approximately 50 suspected UST locations, performance of asbestos and pre-demolition surveys for seven commercial buildings.

City of Milwaukee Redevelopment – Environmental Assessment Activities*, Milwaukee, Wisconsin

David was responsible for environmental assessment activities conducted on behalf of the City of Milwaukee for an approximate 2-1/2 block vacant inner city area. The site historically contained more than 80 commercial, industrial, and residential parcels with development dating to the 1880s. Historic land uses at the property included junk yard, chemical manufacturing, auto repair, paint mixing, car washes, miscellaneous commercial land uses, and residential. The project scope of work included performance of a Phase I ESA for the site as a whole, performance of a magnetometer survey and search for UST's throughout open areas of the property, performance of Phase II soil and groundwater sampling at 10 parcels with historic land uses of environmental concern, performance of additional soil and groundwater testing necessary to fully define the nature and extent of impacts, evaluation of remedial alternatives, and development of a remedial action plan.

* denotes projects completed with other firms

Appendix B

User Provided Information Questionnaire

OWNER QUESTIONNAIRE FOR PHASE I ENVIRONMENTAL ASSESSMENT

This questionnaire outlines those responsibilities discussed in Section 6 of the American Society of Testing & Materials (ASTM) Method E 1527-13 "Standard Practice for Conducting Environmental Site Assessments: Phase I Environmental Site Assessment Process." Stantec is requesting this information to assist our client in satisfying one of the Landowner Liability Protections (LLPs) offered by the Business Liability Relief and Brownfields Revitalization Act of 2002.

Please complete this questionnaire to the best of your ability. Upon completion of the questionnaire, please return the form via email to carrie.rackey@stantec.com. Should you have questions while completing this questionnaire, please contact Carrie Rackey at (971) 230-5203. Thank you.

CONTACT INFORMATION

PROPERTY OWNER:

Name: Brown Dog, LLC Address: PO Box 1778

PROPERTY INFORMATION/QUESTIONS

What is the Current Use of the Property? No use, waiting for redevelopment and clean up.

What are the Past Uses of Property? The sight operated primarily as an aluminum smelter in the 1980s. It was decommissioned and fell into bankruptcy in the late 1980s.

Do You Have Any Previous Environmental Reports? Yes No

If Yes, please list and provide copies I believe copies have been provided.

Do you have any knowledge of environmental liens against the property that are filed or recorded under federal, tribal, state or local law? Yes No

If Yes, Explain: I believe as a part of the bankruptcy the Dept. of Ecology has a lien for previously completed clean up/containment work.

Do you have any knowledge of activity and land use limitations (such as land use restrictions, engineering controls, or institutional controls) that are in place on the site or that have been filed or recorded in a registry under federal, tribal, state or local law? Yes No

If Yes, Explain _____

Do you have specialized knowledge or experience related to the property or nearby properties?

For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes _____ No X_____

If Yes, Explain _____

Do you have knowledge of any Recognized Environmental Conditions (RECs) associated with the Property?

The term REC means the presence or likely presence of any hazardous substances or petroleum products under conditions that indicate an existing release, past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. Yes _____ No X_____

If Yes, Explain _____

Does the purchase price of the property reasonably reflect the fair market value of the property? Yes _____ No NA_____ If No, is lower purchase price due to known or perceived contamination at the property?

Explain: The property is currently in bankruptcy and therefore a purchase price is not established. _____

To the best of your knowledge, are there currently or have there been storage tanks (above or underground) located or used on the Property? Yes X____ No _____

If Yes, Explain (location, size, contents, age, etc.): I believe an oil storage tank was removed by the Dept. of Ecology in the mid 90's.

To the best of your knowledge, are there currently or have there been petroleum products and/or hazardous substances used or stored on the Property? Yes X ____ No _____

If Yes, Explain (location, size, contents, age, etc.) See above.

To the best of your knowledge, are you aware of any spills of chemicals or petroleum products that have taken place at the Property? Yes _____ No X_____

If Yes, Explain (location, size, contents, age, etc.) _____

To the best of your knowledge, do you know of any environmental cleanups that have taken place at the Property? Yes X____ No _____

If Yes, Explain The Dept. of Ecology did some cleanup work in the 90s. _____

To the best of your knowledge, are you aware of any obvious indications of contamination at the Property? No ___ Yes _____

If Yes, Explain The previously documented contamination from the past owners is the only contamination I am aware of.

To the best of your knowledge, do you know of any environmental cleanups or environmental issues that have taken place near or adjacent to the Property? No Yes _____

If Yes, Explain _____

Who provides water to the Property? I do not know, it is not operational. Private Well? _____

Who provides sewer services to the Property? See above Private Septic? _____

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/16/2014 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard

EXECUTIVE SUMMARY

associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/10/2015 has revealed that there are 6 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/10/2015 has revealed that there are 2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>Not reported</i>	20245 77TH AVE S	SW 1/8 - 1/4 (0.191 mi.)	D20	69

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>Not reported</i>	7415 S 206TH	SW 1/8 - 1/4 (0.226 mi.)	G34	456

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/19/2015 has revealed that there are 7 WA HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 04/20/2015 has revealed that there are 26 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, and dated 03/12/2015 has revealed that there are 2 WA SWF/LF sites within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 04/20/2015 has revealed that there are 8 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 04/22/2013 has revealed that there is 1 2020 COR ACTION site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	7416 S 202ND ST	WNW 1/8 - 1/4 (0.179 mi.)	C16	49

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

- . Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

- . Waste code: F019
- . Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

- . Waste code: F027
- . Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENOL SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

- . Waste code: F032
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

- . Waste code: F034
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM

PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF PENTACHLOROPHENOL, OR OF INTERMEDIATES USED TO PRODUCE DERIVATIVES.

- . Waste code: F027
- . Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

- . Waste code: F032
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

- . Waste code: F035
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

- . Waste code: F037
- . Waste name: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

- . Waste code: K001
- . Waste name: BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

- . Waste code: K050
- . Waste name: HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

- . Waste code: K161
- . Waste name: PURIFICATION SOLIDS (INCLUDING FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS), BAG HOUSE DUST AND FLOOR SWEEPINGS FROM THE

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 11863799.2

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 2668663.6

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Corrective Action Summary:

Event date: 07/20/1988
Event: RFA Completed

Event date: 12/18/1989
Event: RFI Imposition

Event date: 12/18/1989
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 02/01/1990
Event: RFI Workplan Approved

Event date: 01/15/1991
Event: Stabilization Measures Implemented, Other Activity

Event date: 06/21/1991
Event: RFI Approved

Event date: 08/14/1991
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 11/12/1991
Event: Stabilization Measures Evaluation, This facility is amenable to stabilization activity based on the status of corrective action work at the facility, technical factors, the degree of risk, timing considerations and administrative considerations.

Event date: 01/15/1996
Event: RFA Completed

Event date: 08/20/1997
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 09/28/1998
Event: RFI Imposition

Event date: 05/22/2000
Event: RFI Workplan Approved

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE WASTE

Historical Generators:

Date form received by agency: 02/23/2012
Site name: ROTTLER MFG LLC
Classification: Conditionally Exempt Small Quantity Generator

. Waste code: WSQG
. Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
 Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Stream Comments:

Facility ID: 8070005
Data Year: 2014
Comments: The RCRA / State ID# Code, for where the spent paint filters sent to for disposal, is WAD991281767. The TSDR company name is PSC (Philip/BEI Kent) Commercial Storage, Treatment, & Recycling Facility, at the location 20245 77th Avenue S. Kent, WA 98032. Note: I believe that section B-4 is designated for the TSDR, PSC, to fill-in. I have filled in that section to the best of Generator knowledge, according to the 2014 manifests which have the management codes of H141. The TSDR will have the information for these percentages. Due to the TSDR having the knowledge of who they may send their processed waste to, the offsite management record code is repeated.

Facility ID: 8070005

Waste Stream Comments:

Facility ID: 8070005
Data Year: 2014
Comments: The RCRA / State ID# Code, for where the spent paint filters sent to for disposal, is WAD991281767. The TSDR company name is PSC (Philip/BEI Kent) Commercial Storage, Treatment, & Recycling Facility, at the location 20245 77th Avenue S. Kent, WA 98032. Note: I believe that section B-4 is designated for the TSDR, PSC, to fill-in. I have filled in that section to the best of Generator knowledge, according to the 2014 manifests which have the management codes of H141. The TSDR will have the information for these percentages. Due to the TSDR having the knowledge of who they may send their processed waste to, the offsite management record code is repeated.

Waste Stream Comments:

Facility ID: 8070005
Data Year: 2014
Comments: The RCRA / State ID# Code, for where the spent paint filters sent to for disposal, is WAD991281767. The TSDR company name is PSC (Philip/BEI Kent) Commercial Storage, Treatment, & Recycling Facility, at the location 20245 77th Avenue S. Kent, WA 98032. Note: I believe that section B-4 is designated for the TSDR, PSC, to fill-in. I have filled in that section to the best of Generator knowledge, according to the 2014 manifests which have the management codes of H141. The TSDR will have the information for these percentages. Due to the TSDR having the knowledge of who they may send their processed waste to, the offsite management record code is repeated.

Waste Stream Comments:

Facility ID: 8070005
Data Year: 2014
Comments: The RCRA / State ID# Code, for where the spent paint filters sent to for disposal, is WAD991281767. The TSDR company name is PSC (Philip/BEI Kent) Commercial Storage, Treatment, & Recycling Facility, at the location 20245 77th Avenue S. Kent, WA 98032. Note: I believe that section B-4 is designated for the TSDR, PSC, to fill-in. I have filled in that section to the best of Generator knowledge, according to the 2014 manifests which have the management codes of H141. The TSDR will have the information for these percentages. Due to the TSDR having the knowledge of who they may send their processed waste to, the offsite management record code is repeated.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Corrective Action Summary:

Event date: 09/29/1992
Event: RFA Completed, Assessment was an RFA.

Event date: 09/29/1992
Event: RFA Determination Of Need For An RFI, RFI is Not Necessary;

Event date: 10/23/1992
Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 03/29/1993
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 10/15/1996
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 27081

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 281

Waste code: D005

Waste name: BARIUM

Amount (Lbs): 33480

Waste code: D007

Waste name: CHROMIUM

Amount (Lbs): 72711

Waste code: D035

Waste name: METHYL ETHYL KETONE

Amount (Lbs): 52720

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 34160

Waste code: F005

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Stream Comments:

Facility ID: 53292855
Data Year: 2006
Comments: B-3: The waste was cured in ambient temperature inside sealed bags to polymerize halogenated hydrocarbons to below 100 ppm extractable. Treated waste was landfilled. Section B-1 will double-count the quantity if the whole weight was entered in B-3.

Waste Stream Comments:

Facility ID: 53292855
Data Year: 2006
Comments: B-3: The waste was cured in ambient temperature inside sealed bags to polymerize halogenated hydrocarbons to below 100 ppm extractable. Treated waste was landfilled. Section B-1 will double-count the quantity if the whole weight was entered in B-3.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code:	D039
Waste name:	TETRACHLOROETHYLENE
Amount (Lbs):	220
Waste code:	F003
Waste name:	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	462.9
Waste code:	F005
Waste name:	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Land type: Private
Classification: TSDF
Description: Handler is engaged in the treatment, storage or disposal of hazardous waste
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 56938

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 166

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 5

Waste code: D018
Waste name: BENZENE
Amount (Lbs): 6206

Waste code: D039

Summary Details:

Conditions at listing July 1982): The Western Processing Co., Inc., Site covers 10 acres south of Seattle in Kent, Washington. The principal operations are recovery of solvents, neutralization of acid and basic wastes, and precipitation of heavy metals. Other chemical and/or physical processes are used on a batch basis. Hazardous materials are stored directly on the ground and have entered the environment from leaks and spills. In the past, as a means of disposal, wastes were buried on-site. In 1981, and again in 1982, EPA ordered Western Processing to meet the hazardous waste requirements of the Resource Conservation and Recovery Act. The company did not comply. Status July 1983): Recent EPA studies indicate that hazardous contaminants have migrated off-site in surface water and that soil and ground water beneath the site are grossly contaminated. As a result, in April 1983, EPA ordered the company to stop accepting or processing hazardous substances and to remedy the contamination. The company stated it was unable to undertake the remedy. EPA, using 1.5 million in CERCLA emergency funds, undertook measures to

stabilize the site. Further investigation is now underway to more completely assess the extent of contamination on and off the site and to determine an appropriate remedy.

Site Description: Western Processing Company, Inc. is located at 7215 South 196th Street in Kent, King County, Washington. The facility covers approximately thirteen acres in Section 1, Township 22 North, Range 4 East (WM). The general area around the site is rapidly developing for commercial and industrial purposes although there is a limited amount of agricultural and residential use in the vicinity. One family lived across the street in a rented house until May 1984. The site is flat and lies in the flood plain of the Green River, which drains to Puget Sound. Mill Creek abuts a portion of the western boundary of the site, and eventually reaches the Green River. Surface runoff from the site reached Mill Creek both directly and indirectly, through seeps, springs and surrounding drainage ditches. Underlying the site is an aquifer, the upper limit of which ranges from three to twelve feet below the surface. Deeper portions of this aquifer underlie a discontinuous set of clay lenses, to a depth of at least 170 feet. A deeper artesian aquifer may exist below an undefined thickness of confining layers of silt and clay in the vicinity of the site. There are no wells currently used for drinking water within a one mile radius of the site, but the City of Kent (population 27,000) has drilled wells into the deeper portions of the aquifer less than a mile from the site in an attempt to develop a drinking water supply for the city. Other wells have withdrawn water for domestic use from the shallower aquifer in the past. The ground water system is complex. While the regional groundwater flow direction is generally north and west, a groundwater "mound" beneath the site creates radial, and possibly downward, flow from the site, and may have created a hydraulic head driving contaminated groundwater down into lower portions of the aquifer. The native soils are generally of moderate to low permeability, though the fill materials on the site are generally highly permeable. The facility presently consists of 10 buildings, including a small laboratory, a solvent recycling plant, a fertilizer plant, at least 72 bulk storage tanks of varying capacities, several drum storage areas which still contain at least 2,000 non-empty drums, piles of flue dust, battery chips, and over 3,600 empty drums, construction debris, a system of concrete surface impoundments, and berms and fences. The buildings and other items are in poor repair. Approximately 2 acres of the site are newly paved, covered, and bermed from Washington Department of Ecology (DOE) activity in October 1983. A two acre-feet stormwater lake has accumulated in the topographic low spot in the center of the site because the owner/operator's illegal discharges of untreated stormwater to Mill Creek have ceased. From 1953 to 1961, the site was leased from its then current owner and developed and used as a U.S. Army Nike Anti-Aircraft Artillery facility. In 1961, the property was sold to Western Processing Company, Inc. which had been founded by Garnt J. Nieuwenhuis in Seattle in 1957. Western Processing Company is still owned and operated by Mr. Nieuwenhuis, though over the years his wife, son, and at least one other person have been officers of the corporation at various times. Originally Western Processing was a reprocessor of animal byproducts and brewer's yeast. In the 1960's the business expanded to recycle, reclaim, treat and dispose of many industrial wastes, including waste oils, electroplating wastes, waste pickle liquor, battery acids, steel mill flue dust, pesticides, spent solvents, and zinc dross. Some of the Pacific

Northwest's largest industries, such as the Boeing Company, had contracts for Western Processing to handle their wastes. Operations included heavy metals recovery, waste solvent recovery, acids and caustics neutralization, chemical recombination to produce zinc chloride and lead chromate, reclamation of ferrous sulfide in fertilizer production, electrolytic destruction of cyanides, reclamation of metal finishing byproducts, and pickle liquor reprocessing. The Kent Fire Department was one of the first agencies to have contact with Western Processing when fires in the early 1970's brought the conditions at the site to their attention. The Washington State Department of Ecology (DOE), and its predecessor agency, the Pollution Control Commission, have monitored and attempted to control wastewater discharges from Western Processing for many years. Discharges were regulated by permit until late 1981. At that time Western Processing had failed to construct wastewater discharge control facilities as required by permit, and, in 1982, elevated metals concentrations were detected in Mill Creek adjacent to the site. In August 1982, the King County Superior Court, acting on a DOE motion, issued an order prohibiting further discharges of zinc contaminated water from Western Processing into Mill Creek. The company was ordered to partially close and to remove zinc-laden wastes from the site at that time. The company appealed this order and the issues are still outstanding in state courts. Several other local agencies, including the Puget Sound Air Pollution Control Agency and the Seattle-King County Health Department have or have had pending regulatory actions or concerns with the company. EPA's first major regulatory involvement with Western Processing came through the Resource Conservation Recovery Act (RCRA) program. (In the late 1970's SPCC actions had been taken by EPA against the company.) EPA inspected the site in March 1981 to determine compliance with the newly-effective regulatory scheme of RCRA. Many violations were documented. Although the company notified EPA of its hazardous waste activities pursuant to RCRA Section 3010, an administrative order in May 1981 and substantial negotiations thereafter were necessary to convince the company to submit a Part A application. (The company claimed that as a "recycler" they did not have to comply with RCRA.) Subsequent negotiations between Western Processing and EPA resulted in little progress toward correcting the violations. EPA issued a second compliance order in June 1982, after another inspection in May 1982 revealed additional significant violations and questionable site management. This second order assessed a \$210,000 civil penalty. In February 1983, EPA filed suit in Federal District Court seeking, inter alia, injunctive relief and civil penalties concerning the RCRA violations. This case has since been amended to include CERCLA counts against the owner/operator of the site. As a follow-up to the earlier State and local stream surveys for metals, in May 1982, EPA conducted a stream survey around Western Processing. Twenty-six priority pollutants were found in the surface waters around the site, all of which were subsequently found on-site. In July 1982 the site was added to the National Priorities List. In August 1982, EPA issued a RCRA 3013 order to the site owners/operators to investigate the effects of their past practices on soil, surface water and groundwater. When the owners/operators did not comply (due to alleged financial inability), EPA undertook the investigation and ordered them to reimburse the Agency for its expenses. When preliminary results of the fall 1982 investigation became available in early April 1983, EPA issued a CERCLA Section 106 order requiring the owners/operators to cease operations immediately and to provide assurances that they would and could clean up the site. When the assurances were not made, EPA used Superfund money to conduct an immediate removal. The immediate removal began in late April 1983 and was completed on July 1, 1983. The removal project cost \$1.4 million. The purpose of the project was to eliminate the extremely high hazards of the site and to stabilize the site as much as possible to prevent additional degradation of the soil and groundwater. Large

WESTERN PROCESSING CO., INC. (Continued)

1000403310

quantities (920,000 gallons plus 1,944 cubic yards) of the most hazardous substances on the site were removed. Attempts were made to find users for the materials, but most were sent to approved hazardous waste disposal sites. Many other hazardous substances were stabilized and left on the site. Once the emergency removal was completed, EPA went back to court to ensure that the owner/operator would not start up operations which could undo the work which had been done. A preliminary injunction was issued which prohibits the owner from receiving or processing materials, gives EPA and its representatives site access, and which required EPA's prior approval for all activities the owner/operator may wish to perform on the site. The judge also specifically found that the site was an imminent and substantial endangerment to the environment. Stormwater management was going to continue to be a major problem until the site was completely cleared and cleaned. Using State funds, DOE implemented a stormwater initial remedial measure involving excavation of the gypsum sludge pond, restacking and covering the material, and paving a 2 acre portion of the site. A cooperative agreement for a stormwater Initial Remedial Measure to handle stormwater control over a larger portion of the site was signed in December 1983, but the project was put on hold when the bids came in much higher than the available budget. Reports submitted by Western Processing to EPA and state agencies, as well as Western Processing business records obtained as part of the Section 106 administrative order, were used in the spring and summer of 1983 to identify over 300 generators and transporters who contributed material to Western Processing. 225 notice letters were sent in May and June 1983, with an additional 100 notice letters sent in October 1983. These letters notified the generators and transporters that they may be liable for all monies spent by the government and requested answers to five questions regarding their shipments to Western Processing within 30 days. Responses to EPA's notice/Section 104e letters gave EPA the names of some other potentially responsible parties (PRPs) as well as enlarging the information base available to EPA on specific shipments. The period following the notice letters also provided an opportunity to educate the PRPs about the seriousness of the problems at the site and their responsibilities under CERCLA as generators and transporters. The first large meeting with the PRPs took place on January 11, 1984. After the government's presentation was completed, the PRPs took the opportunity to begin to set up an organizational structure. Preliminary negotiations/talks continued with an ad hoc PRP committee until May 1984. These preliminary talks primarily concerned exchange of information, and EPA's plans. The extensive computer data base put together by EPA's contractor has been used to provide information to the PRPs. A transaction listing has been sent to individual PRPs only after EPA receives a signed affidavit stating the PRP has searched their files, has provided a summary of all relevant information to EPA, and will give EPA reasonable access to the original information. A list showing the total quantities taken to the site by each PRP has been provided to all PRPs and is being used by the PRP committee to apportion costs. This data base has also been invaluable in resolving issues of whether we have correctly identified a particular PRP. EPA's and DOE's decision to move forward and ensure that the surface of the site is cleared during the summer of 1984 was the impetus which accelerated the pace of negotiations. On April 11, 1984 a letter was sent to all PRPs stating that the PRPs had until June 18, 1984 to agree to undertake the surface clearance or the government will do it and seek cost recovery. In early May, the PRPs met among themselves and set up a coordination committee as well as special subcommittees. On May 30, 1984, a proposed plan for surface clearance, which had been approved by the PRPs technical subcommittee, was presented to the government. On June 19, 1984 agreement in principal on the consent decree was reached between the government and the participating PRPs. The PRPs intend to start work before the consent decree has been accepted by the courts in order

WESTERN PROCESSING CO., INC. (Continued)

1000403310

to take advantage of the summer's drier conditions. A Record of Decision addressing Operable Unit 1 was completed in August 1984. OU 2: The initial Record of Decision (ROD) for the Second Operable Unit at the Western Processing Superfund Site in Kent, Washington was signed by the Regional Administrator on September 25, 1985. Since then, two major actions have occurred which affect the original ROD. First, the results from the Summer 1985 groundwater field work were received by EPA in October 1985 and later summarized in a Supplemental Remedial Investigation (SRI) report dated July 1986. Second, negotiations with the potentially responsible parties (PRPs) concluded with approximately 180 parties signing the Phase II consent decree. The remedial action will now be undertaken by the consenting defendants rather than the government, and will be a final remedial action. Most of the September 1985 ROD is still relevant and appropriate. In the months since the ROD was signed, a convention has been established when identifying the Western Processing Superfund site and its component areas. The word "property" or "on-property" is used to describe the property owned by Western Processing where business operations occurred, and is synonymous with Area I (Area VII is also owned by Western Processing, but was used for a residence.). The word "site" is used to describe Area I. The boundaries of these numbered areas are considered approximate and may change if soil contamination is detected beyond the current boundaries. The word "off-property" is used to describe the entire site except Area I. Also, the word "governments" means EPA and the Washington Department of Ecology (Ecology). The September 1985 ROD states that 13 additional groundwater monitoring wells were drilled in July and August 1985 to the west of the Western Processing property. These 13 wells plus 10 existing monitoring wells were sampled to determine whether the 1,2-trans-dichloroethylene detected in Well 35 had originated at Western Processing. Prior to this investigation, EPA's consultants considered it unlikely that this contamination had migrated to Well 35 from Area I because Mill Creek appeared to act as a hydraulic barrier to near-surface groundwater flow. Chemical data from the SRI sampling of these new and previously installed monitoring wells indicate a plume of trans-1,2-dichloroethylene (and lesser amounts of trichloroethene and tetrachloroethene) is emanating from the vicinity of well 21 on the Western Processing property and is migrating northwest both into and beneath the creek. Contaminants have been detected as far west as well 35. The maximum groundwater concentration of trans-1,2-dichloroethylene detected in Well 35 has been 900 parts per billion (ppb). The area around Well 21 has been determined to be the source. The maximum concentration in Well 21 has been 380,000 ppb. The concentration decreases in the downgradient direction. The next highest concentrations have been found east of Mill Creek within the top 40 feet (area of upward vertical migration into the creek). Only traces of contaminants have been detected at depths below 80 feet on the east side of Mill Creek. There are two major transport mechanisms that could possibly carry contaminants from near the surface in the vicinity of well 21 to the depths necessary for the contaminant to flow beneath Mill Creek: (1) downward vertical groundwater flow or (2) pure contaminant density flow. Because of the extremely steep vertical descent of the contaminant and the general upward groundwater gradient, the most probable mechanism is density flow. Downgradient of the Well 45 cluster, the contaminant plume has apparently migrated in a sand zone that underlies a clay/silt layer at approximately 40 feet. This sand layer can be traced laterally as far as well 42 at depths of approximately 40 to 80 feet, though contaminants have not been detected that far from Area I. While the SRI study showed that the trans-1,2-dichloroethylene in well 35 most likely did originate at the Western Processing property, other key aspects of the generalized hydraulic conceptual model were confirmed. The capture depth effect of Mill Creek was confirmed to extend to approximately this same sand layer at approximately 40 feet (upward

flow gradients), followed by a level of predominantly horizontal flow, then, at the below 60 feet level, downward hydraulic flow. Groundwater flow directions are to the northwest. Negotiations with the PRPs concluded in May 1986 with approximately twenty PRPs signing a stipulation. This stipulation gave EPA sufficient moneys (when combined with previously committed State moneys) to have the Corps of Engineers conclude negotiations for a Corps supervised remedial design contract, while also giving the PRPs additional time to decide whether they wish to sign the consent decree. The remedial design contract was not initiated when, on July 2, 1986, over 120 PRPs submitted their signatures to the governments. By the end of July over 180 PRPs had signed the consent decree. (These 180 consenting defendants are not necessarily the same PRPs that signed the Phase I consent decree.) The governments may sue a number of the non-settling PRPs for all remaining relief. A ROD Amendment addressing Operable Unit 2 was completed in September 1986. Phase II of the remediation, the subsurface cleanup, also conducted by the PRPs under a consent decree, began in 1986 and included 1) extensive soil and waste, sampling, 2) excavation and off-site disposal of approximately 25,000 cubic yards of highly contaminated subsurface wastes; 3) installation of infiltration trenches, extraction and monitoring wells, and a slurry wall; and 4) construction of an air stripping system and a metals treatment plant. The treatment plant began continuously operating at 100 gallons per minute (gpm) in October 1988 and increased to approximately 200 gpm in November 1989. The consent decree requires operation for at least 5 to 7 years and until cleanup standards are met, followed by monitoring for approximately 30 years. In April 1990 the cleanup achieved interim goals for Mill Creek. EPA issued an Interim Close Out Report for the site in December 1991. In 1992, EPA reached cost recovery settlements with three PRPs. During the summer of 1993 the PRPs excavated contaminated soil and sediment from Mill Creek and the East Drain. In late 1993 several new extraction wells were installed to improve the removal rate efficiency. An infiltration enhancement program was also initiated. Also, the PRPs submitted a petition to cease operation of the groundwater extraction and treatment system. EPA and the Washington Department of Ecology provided extensive comments and determined that the request was premature. In 1994 the PRPs began to conduct bioremediation and soil fixation tests to determine the feasibility of implementing these supplemental controls on a few hot spot areas. Additional work was done in Mill Creek including the placement of pea gravel in certain reaches. A shallow well extraction system was constructed along the East Drain to control potential releases of contaminants to the drain. In 1995 the PRPs finished the bioremediation and soil fixation tests. Additionally, they examined the effects of rebound to determine what will happen to the remaining contamination when they turn off the extraction system. The PRPs are continuing to monitor on and off-site contamination. An Explanation of Significant Differences was completed in December 1995.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 4381

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 10975

Waste code: D004
Waste name: ARSENIC
Amount (Lbs): 701

Waste code: D005

Corrective Action Summary:

Event date: 08/20/1991
Event: RFA Completed
Event date: 10/08/1991
Event: RFA Determination Of Need For An RFI, RFI is Necessary;
Event date: 10/08/1991
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.
Event date: 09/29/1992
Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.
Event date: 08/20/2013
Event: Current Human Exposures under Control, More information is needed to make a determination.
Event date: 08/20/2013
Event: Igration of Contaminated Groundwater under Control, More information is needed to make a determination.

Facility Has Received Notices of Violations:

Regulation violated: SR - 200(1)(b)&ref630(5)(a)

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 04/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014	Source: EPA

Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/29/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 09/07/2015
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704

Number of Days to Update: 64	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/10/2015
Date Data Arrived at EDR: 03/31/2015

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/10/2015
Date Data Arrived at EDR: 03/31/2015
Date Made Active in Reports: 06/11/2015

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/10/2015

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/17/2015	Telephone: 703-603-0695
Date Made Active in Reports: 06/02/2015	Last EDR Contact: 06/01/2015
Number of Days to Update: 77	Next Scheduled EDR Contact: 09/14/2015
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/17/2015	Telephone: 703-603-0695
Date Made Active in Reports: 06/02/2015	Last EDR Contact: 06/01/2015
Number of Days to Update: 77	Next Scheduled EDR Contact: 09/14/2015
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy
Date Data Arrived at EDR: 05/29/2015	Telephone: 843-820-7326
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 05/18/2015
Number of Days to Update: 13	Next Scheduled EDR Contact: 08/31/2015
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 03/30/2015	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 03/31/2015	Telephone: 202-267-2180
Date Made Active in Reports: 06/02/2015	Last EDR Contact: 03/31/2015
Number of Days to Update: 63	Next Scheduled EDR Contact: 07/13/2015
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 02/19/2015	Source: Department of Ecology
Date Data Arrived at EDR: 03/13/2015	Telephone: 360-407-7200
Date Made Active in Reports: 03/20/2015	Last EDR Contact: 06/08/2015
Number of Days to Update: 7	Next Scheduled EDR Contact: 09/21/2015
	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/20/2015	Source: Department of Ecology
Date Data Arrived at EDR: 04/21/2015	Telephone: 360-407-7200
Date Made Active in Reports: 05/11/2015	Last EDR Contact: 04/21/2015
Number of Days to Update: 20	Next Scheduled EDR Contact: 08/03/2015
	Data Release Frequency: Semi-Annually

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 03/12/2015	Source: Department of Ecology
Date Data Arrived at EDR: 03/13/2015	Telephone: 360-407-6132
Date Made Active in Reports: 03/20/2015	Last EDR Contact: 06/04/2015
Number of Days to Update: 7	Next Scheduled EDR Contact: 09/21/2015
	Data Release Frequency: Annually

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tanks Site List

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 02/18/2015	Source: Department of Ecology
Date Data Arrived at EDR: 02/26/2015	Telephone: 360-407-7183

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

COUNTY RECORDS

KING COUNTY:

Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services
Telephone: 253-383-1735

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision: 1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

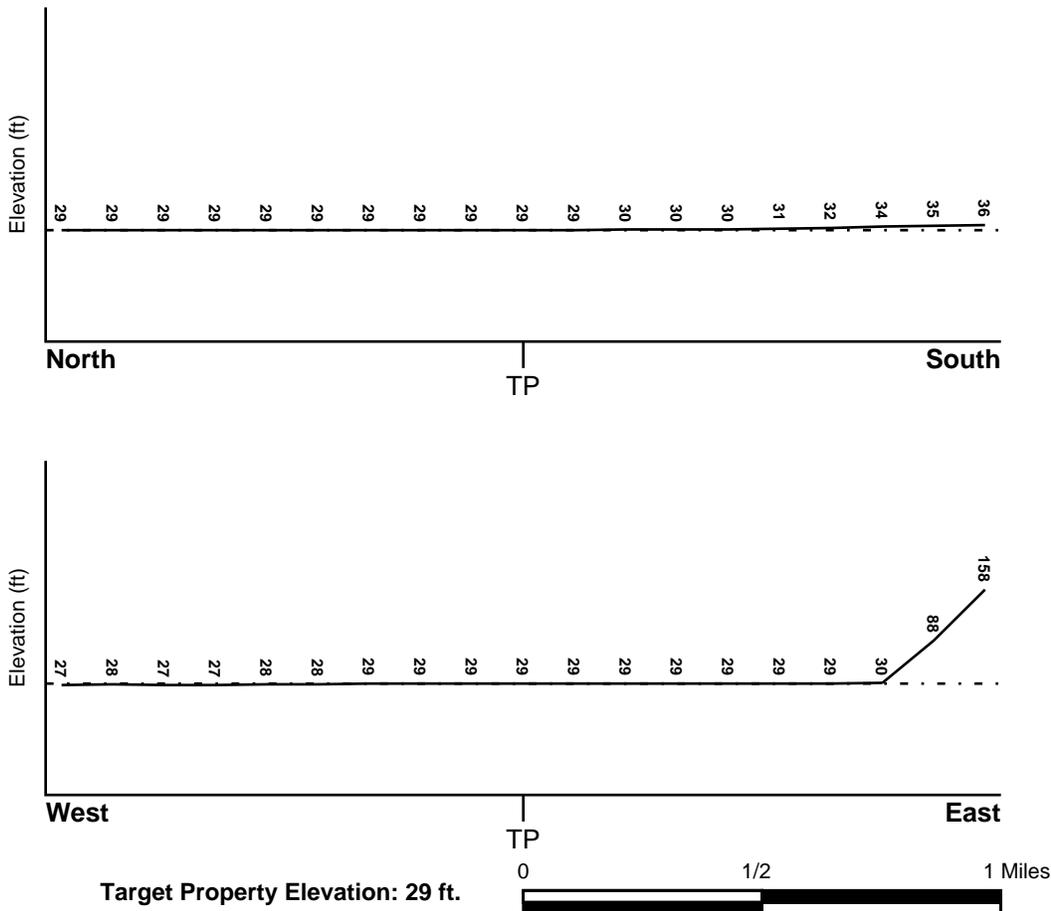

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Location Relative to TP: 1/4 - 1/2 Mile NE
Site Name: CABOT IND
Site EPA ID Number: WAD076655182
Groundwater Flow Direction: TOWARD NEARBY SHALLOW DITCHES AND STREAMS, CLOSELY FOLLOWING THE SLOPE OF THE GROUND SURFACE
Measured Depth to Water: less than 10 feet
Hydraulic Connection: The near-surface aquifer and lower aquifer are separated by a confining layer of silt and clay.
Sole Source Aquifer: No information about a sole source aquifer is available
Data Quality: Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Pilchuck

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 92 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
2	20 inches	37 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
3	37 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 705 Min: 141	Max: 7.3 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Renton

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6 Min: 5.6
2	5 inches	16 inches	stratified fine sandy loam to silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
3	16 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6.5 Min: 5.1

Soil Map ID: 3

Soil Component Name: Newberg

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 7.3 Min: 5.6
2	9 inches	59 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 5.6

Soil Map ID: 4

Soil Component Name: Puget

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

3	37 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 705 Min: 141	Max: 7.3 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 8

Soil Component Name: Oridia

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 5.6
2	9 inches	42 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.3 Min: 5.6
3	42 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.3 Min: 4.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Inquiry # 4325405.3

Contact: Leonard Farr

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Stantec (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Appendix G

Photographic Log

Former Maralco Aluminum

7730 S. 202nd Street, Kent, Washington

Looking south-southwest across the parking lot at the north side of the main building from outside of the entrance gate located on S. 202nd Street.

Looking at the entrance door located on the north side of the former farm house near the center of the north portion of the Property.

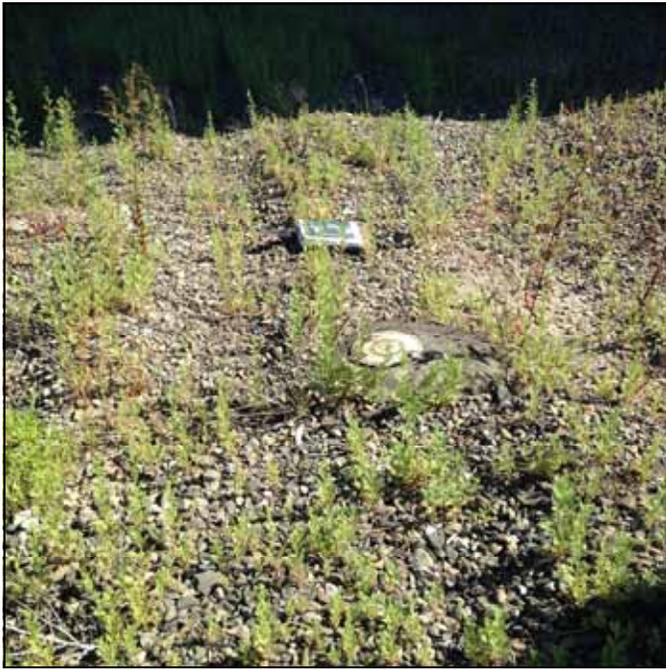

Looking west across the approximate east-west center-line of the Property from 80th Avenue S. Note dense brush in the foreground and main building in the background.

Looking north along the west side of the Property (building and railroad spur) from near the southwest corner of the Property.

Former Maralco Aluminum

7730 S. 202nd Street, Kent, Washington

Looking at existing groundwater monitoring well MW-3 located west of the railroad spur in the southwest corner of the Property.

Looking northeast across black dross stockpiles at the south side of the building.

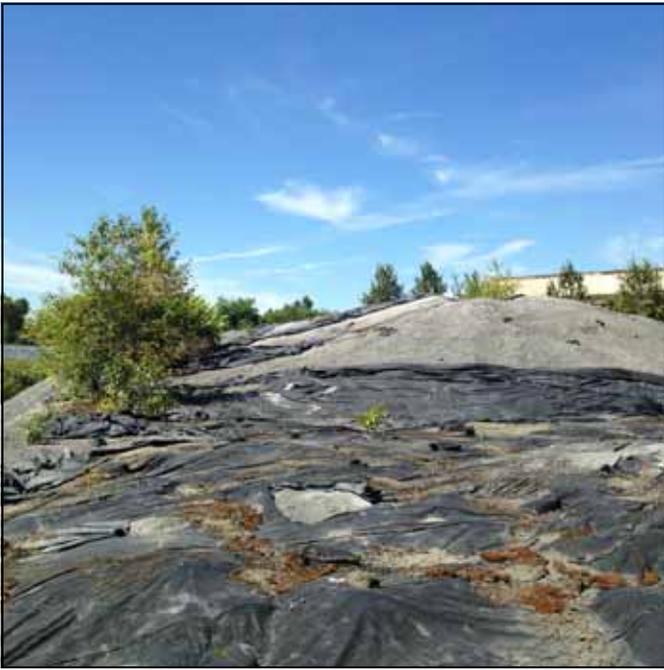

Looking east across the black dross stockpile south of the building.

Looking at typical dross impacts to plants and sediments in the drainage ditch along the east side of the black dross stockpile.

Former Maralco Aluminum

7730 S. 202nd Street, Kent, Washington

Looking south-southwest across the top of the eastern black dross stockpile. Note the building in the background.

Looking west at the former holding ponds, unknown tanks, and east side of the building.

Looking at white fibrous insulation material located near the former furnace.

Looking at a 55-gallon drum labeled "Diesel."

Former Maralco Aluminum

7730 S. 202nd Street, Kent, Washington

Looking at the interior of the former furnace.

Looking at the bag house dust collectors and cribbed stockpiles of baghouse dust and/or dross material near the southwest corner of the building.

Looking at drummed black dross? located in the shipping container in the southeast corner of the building.

Looking at the former UST excavation area in the north-west portion of the Property. Note the white circle near the center is likely the location of a soil boring advanced during previous environmental investigations at the Property.
