**GROUNDWATER ANALYTICAL RESULTS SUMMARY - SITE CONSTITUENTS OF CONCERN (VOCs)
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON**

Notes:

- (1) Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- (2) Groundwater Cleanup Levels per Table 4.8.
- BGS Below ground surface.
- MLLW Mean lower low water.
- NGVD National geodetic vertical datum.
- COCs Constituents of concern.
- µg/L Microgram per liter.
- MS/cm Milliseimens per centimeter.
- s.u. Standard units.
- Deg C Degree Celsius.
- ntu Nepheletic turbidity units.
- NV No cleanup level has been established for this parameter.
- * Cleanup Level established at a concentration equal to the practical quantitation limit for that chemical in accordance the WAC 173-340-700 (6)(d). Value may decrease with improvements in analytical methods.
- 500** Concentration exceeds the Groundwater Cleanup Level.
- Not analyzed.
- U Not detected at associated concentration.
- J Estimated concentration.
- R Rejected.

**GROUNDWATER ANALYTICAL RESULTS SUMMARY - SITE CONSTITUENTS OF CONCERN (SVOCs)
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON**

Notes:

- (1) Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- (2) Groundwater Cleanup Levels per Table 4.8.
- BGS Below ground surface.
- MLLW Mean lower low water.
- NGVD National geodetic vertical datum.
- COCs Constituents of concern.
- µg/L Microgram per liter.
- MS/cm Milliseimens per centimeter.
- s.u. Standard units.
- Deg C Degree Celsius.
- ntu Nepheletic turbidity units.
- NV No cleanup level has been established for this parameter.
- * Cleanup Level established at a concentration equal to the practical quantitation limit for that chemical in accordance the WAC 173-340-700 (6)(d). Value may decrease with improvements in analytical methods.
- 500** Concentration exceeds the Groundwater Cleanup Level.
- Not analyzed.
- U Not detected at associated concentration.
- J Estimated concentration.

**GROUNDWATER ANALYTICAL RESULTS – SITE PESTICIDES
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON**

Notes:

- (1) Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- (2) Groundwater Cleanup Levels per Table 4.5.
- BGS Below ground surface.
- MLLW Mean lower low water.
- NGVD National geodetic vertical datum.
- COCs Constituents of concern.
- µg/L Microgram per liter.
- MS/cm Milliseimens per centimeter.
- s.u. Standard units.
- Deg C Degree Celsius.
- ntu Nepheletic turbidity units.
- NV No cleanup level has been established for this parameter.
- * Cleanup Level established at a concentration equal to the practical quantitation limit for that chemical in accordance the WAC 173-340-700 (6)(d). Value may decrease with improvements in analytical methods.
- 500** Concentration exceeds the Groundwater Cleanup Level.
- Not analyzed.
- U Not detected at associated concentration.
- J Estimated concentration.
- R Rejected.

HC-N11-8	WG-081612-TS-HC-N11-8-507			ND 0.010	

Notes:

- (1) Calculated from PCB aroclors measured using Method SW-846 8082.
- (2) Calculated from the concentrations of 32 congeners using the methodology developed by Frame et al (1998), Spongberg (2001) and Woolcott (2004).
- BML Below mudline.
- BGS Below ground surface.
- NGVD National geodetic vertical datum.
- µg/L Micrograms per liter.
- PCB Polychlorinated biphenyl.
- ND Not detected at associated concentration. Concentration shown is the maximum of various non-detect concentrations available for the sample.
- * Indicates samples were not field-filtered.
- Due to the collection point of these samples, depths and elevations are not applicable.
- Exceeds Groundwater Cleanup Level of Total PCBs (0.00017 µg/L).

Notes:

⁽¹⁾ See Appendix U for TEC calculations.

BGS Below mudline.

BML Below ground surface.

NGVD National geodetic vertical datum.

pg/L Picograms per liter.

TEC Toxicity Equivalency Concentration.

* Indicates samples were not field-filtered.

-- Due to the collection point of these samples, depths and elevations are not applicable.

**GROUNDWATER ANALYTICAL RESULTS – SITE METALS
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON**

Notes:

- (1) Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- (2) Groundwater Cleanup Levels per Table 4.8.
- BGS Below ground surface.
- MLLW Mean lower low water.
- NGVD National geodetic vertical datum.
- COCs Constituents of concern.
- µg/L Microgram per liter.
- MS/cm Milliseimens per centimeter.
- s.u. Standard units.
- Deg C Degree Celsius.
- ntu Nepheletic turbidity units.
- NV No cleanup level has been established for this parameter.
- * Cleanup Level established at a concentration equal to the practical quantitation limit for that chemical in accordance the WAC 173-340-700 (6)(d). Value may decrease with improvements in analytical methods.
- 500** Concentration exceeds the Groundwater Cleanup Level.
- Not analyzed.
- U Not detected at associated concentration.
- J Estimated concentration.
- R Rejected.

**GROUNDWATER ANALYTICAL RESULTS – FIELD PARAMETERS
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON**

Notes:

- (1) Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- (2) Groundwater Cleanup Levels per Table 4.8.
- BGS Below ground surface.
- MLLW Mean lower low water.
- NGVD National geodetic vertical datum.
- COCs Constituents of concern.
- µg/L Microgram per liter.
- MS/cm Milliseimens per centimeter.
- s.u. Standard units.
- Deg C Degree Celsius.
- ntu Nepheletic turbidity units.
- NV No cleanup level has been established for this parameter.
- * Cleanup Level established at a concentration equal to the practical quantitation limit for that chemical in accordance the WAC 173-340-700 (6)(d). Value may decrease with improvements in analytical methods.
- 500** Concentration exceeds the Groundwater Cleanup Level.
- Not analyzed.
- U Not detected at associated concentration.
- J Estimated concentration.
- R Rejected.

**SEDIMENT ANALYTICAL RESULTS SUMMARY - SITE CONSTITUENTS OF CONCERN
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON**

Notes:

- (1) Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- (2) Sediment Cleanup Level as per Table 4.5.
- COC Constituent of concern.
BML Below mudline.
MLLW Mean lower low water.
NGVD National geodetic vertical datum.
ug/kg Microgram per kilogram.
NV No cleanup level has been established for this parameter.
500 Concentration exceeds the respective criteria.
-- Not analyzed.
U Not detected at associated concentration.
J Estimated concentration.
R Rejected Data.
Cs Saturated soil criteria.

Notes:

(1) Calculated from the concentrations of 32 congeners using the methodology developed by Frame et al (1998), Spongberg (2004), and Woolcott (2001).

(2) Calculated from PCB aroclors using Method SW-846 8082.

PCB Polychlorinated biphenyl.

BML Below mudline.

BGS Below ground surface.

NGVD National geodetic vertical datum.

µg/kg Microgram per kilogram.

ND Not detected at associated concentration. Concentration shown is the maximum of various non-detect concentrations available for the sample.

 Exceeds cleanup level/criteria for Total PCBs (Sediment: 300 µg/kg)

SEEPAGE MONITORING PROGRAM
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON

Notes:

- (1) Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- (2) Groundwater Cleanup Levels per Table 4.8.
- COCs Constituents of concern.
- ORP Oxidation-reduction potential.
- µg/L Microgram per liter.
- mS/cm Milliseimens per centimeter.
- s.u. Standard units.
- Deg C Degree Celsius.
- % Percent.
- NV No cleanup level has been established for this parameter.
- * Cleanup Level established at a concentration equal to the practical quantitation limit for that chemical in accordance the WAC 173-340-700 (6)(d). Value may decrease with improvements in analytical methods.
- 25** Corrected concentrations exceeds Groundwater Cleanup Level.
- * The corrected concentrations are equal to the lab concentration divided by the discharge fraction.
- Not analyzed.
- U Not detected at associated concentration.
- J Estimated concentration.

TABLE 4.41

SEEP AND POREWATER ANALYTICAL RESULTS - SITE CONSTITUENTS OF CONCERN
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON

Notes:

- (1) Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- (2) Groundwater Cleanup Levels per Table 4.8.
- BML Below mudline.
- MLLW Mean lower low water.
- NGVD National geodetic vertical datum.
- COCs Constituents of concern.
- µg/L Microgram per liter.
- mS/cm Milliseimens per centimeter.
- s.u. Standard units.
- Deg C Degree Celsius.
- ntu Nepheletic turbidity units.
- NV No cleanup level has been established for this parameter.
- * Cleanup Level established at a concentration equal to the practical quantitation limit for that chemical in accordance the WAC 173-340-700 (6)(d). Value may decrease with improvements in analytical methods.
- 500** Concentration exceeds the Groundwater Cleanup Level.
- Not analyzed.
- U Not detected at associated concentration.
- J Estimated concentration.

LEACHATE ANALYTICAL RESULTS - SITE CONSTITUENTS OF CONCERN
OCCIDENTAL CHEMICAL CORPORATION
TACOMA, WASHINGTON

Notes:

- ⁽¹⁾ Site COCs per Tables 3.1 and 3.2 of the Statement of Work (January 2005). Additional non-COC analytical results are presented in the eDAT located in Appendix F.
- ⁽²⁾ Groundwater Cleanup Levels per Table 4.8.
- BML Below mudline.
- MLLW Mean lower low water.
- NGVD National geodetic vertical datum.
- COCs Constituents of concern.
- ug/L Microgram per liter.
- NV No cleanup level has been established for this parameter.
- * Cleanup Level established at a concentration equal to the practical quantitation limit for that chemical in accordance the WAC 173-340-700 (6)(d). Value may decrease with improvements in analytical methods.
- 500 Concentration exceeds the Groundwater Cleanup Level.
- Not analyzed.
- U Not detected at associated concentration.
- J Estimated concentration.

Notes:

- (1) Partitioning coefficient, Henry's Law Constant and Solubility values are taken from USEPA Region 9 Regional Screening Levels (November 2013)
- (2) The generic Kd is based upon using a site-specific TOC value of 0.0057 g/g, which is based upon the mean of TOC data obtained from soil samples collected at the Site. A discussion of pH-dependent, Site-specific Kd values is presented in the University of Washington's report, included in Appendix W
- H^{*} Henry's Law Constant, unitless form
- K_{oc} Organic Carbon Partitioning Coefficient
- K_d Partitioning Coefficient
- PCB Polychlorinated Biphenyl
- TOC Total Organic Carbon
- L/kg liters per kilogram
- mg/kg milligrams per kilogram
- µg/L micrograms per liter
- µg/kg micrograms per kilogram

Appendix A

Historical Aerial Photographs

Appendix B

Summary of Information Regarding Occidental Site Chemistry Resulting from Past Shipyard Activities

Appendix C

Sample Collection and Analysis Tables

Appendix D

Bathymetric Plots

Appendix E

Regional Stratigraphic Logs

Appendix F

Site Stratigraphic Logs

Appendix G

Analytical Database e:Dat™

Appendix H

MVS/EVS Detailed and Simplified 3-D Stratigraphic Models

Appendix I

Simplified Stratigraphic Model Approach

Appendix J

Naturally Occurring Fresh Groundwater/Salt Water Distribution Evaluation

Appendix K

Groundwater Density Distribution

Appendix L

Evaluation of Site-Wide Hydraulic Data

Appendix M

Evaluation of 709-721 Alexander Avenue Hydraulic Data

Appendix N

Single-Well Response Tests Technical Memorandum

Appendix O

3-D Chemistry Visualization Models

Appendix P

List of Data Validation Reports

Appendix Q

Dioxin, Furan, and PCB Congener Data

Appendix R

Vapor Investigation Report (May 2014)

Appendix S

DNAPL Assessment

Appendix T

Weston Cross-Sections Drawings

Appendix U

Natural Attenuation Evaluation

Appendix V

Exposure Pathway Assessment Report

Appendix W

University of Washington Report on Site-Specific Partition Coefficients of Heavy Metals
