4()64

## WORKSHEET 1 SUMMARY SCORE SHEET

Site Name/Location (Street,	City, County, Sec	tion/Township/Range, TCP ID Number):
Storey Gas Station	S-25	TCP ID#C-19-2019-000
1301 E First Street	<i>T-20</i>	
Cle Elum, WA 98922	<i>R-15</i>	

Site Description (Include management areas, substances of concern, and quantities):

Storey Gas Station is a high volume distributor of gas, diesel and motor oil. The site contains nine large aboveground tanks, with a capacity of 137,000 gallons of gasoline and diesel. This site also has three underground tanks with a total capacity of 4500 gallons. The underground tanks are in a pit behind the station building. This pit is deep enough that it is filled with ground water. The aboveground tanks do not have secondary containment. The site has been cited numerous times by the Kittitas County Fire Marshall for improper equipment to store and dispense hazardous materials such as gasoline and diesel. An irrigation ditch is located on the south boundary of the site. This ditch is used to irrigate approximately 600 acres of hayland and is also used to water livestock.

Reports have been made to the Department of Ecology on February 7, 1995 and April 26, 1995 by the County Fire Marshall concerning unreported releases of petroleum based products. The site was visited by the Department of Ecology on April 26, 1995 and a determination was made that a release of a hazardous substance that may pose a threat to human health and the environment has occurred.

On November 21, 1995 a complaint was filed with Kittitas County concerning oil in the irrigation ditch. The source of the oil originated from Storey Property. The following afternoon The Department of Ecology responded and applied oil booms to contain the spill. The pictures that were taken indicated approximately 55 gallons of oil was released in the irrigation ditch.

The overall history and operation of the site indicate that the equipment is in disrepair and the handling of hazardous substances is such that numerous spills have occurred the years. The oldest documentation of the condition of the tanks and indication that spills have occurred is 1991.

Special Considerations (Include limitations in site file data or data which cannot be accommodated in the model, but which are important in evaluating the risk associated with the site, or any other factor(s) over-riding a decision of no further action for the site):

Storey Gas Station was not sampled due to heavy snow and inclement weather. The site was scored on a history of visual observation and photographic evidence of leaking and faulty equipment associated with the operation of the gas station.

**ROUTE SCORES:** 

Surface Water/Human Health: <u>29.5</u>

Surface Water/Environ.: 25.7

Air/Human Health: <u>21.2</u>

Air/Environmental: <u>29.2</u>

Ground Water/Human Health: <u>48.6</u>

OVERALL RANK: \_1\_\_

## WORKSHEET 2 ROUTE DOCUMENTATION

#### 1. SURFACE WATER ROUTE

List those substances to be <u>considered</u> for scoring:

TPH as diesel TPH as gasoline

Explain basis for choice of substance(s) to be used in scoring.

The station only dispenses gasoline, diesel fuel and motor oil. Photographs show chronic equipment failure resulting in discharge of the above.

List those management units to be <u>considered</u> for scoring:

Contaminated soils.

Explain basis for choice of unit to be used in scoring.

Visual and photographic evidence of soil staining, surface water contamination.

#### 2. AIR ROUTE

List those substances to be <u>considered</u> for scoring:

TPH as diesel TPH as gasoline

Explain basis for choice of substance(s) to be used in scoring.

The station only dispenses gasoline, diesel fuel and motor oil. Photographs show chronic equipment failure resulting in discharge of the above.

List those management units to be <u>considered</u> for scoring:

Contaminated soils.

Explain basis for choice of unit to be used in scoring.

Visual and photographic evidence of soil staining.

## WORKSHEET 4 (CONTINUED) SURFACE WATER ROUTE

### 2.0 MIGRATION POTENTIAL

2.1 Containment

Explain basis: <u>Contaminated soil at surface, no run on/off controls</u>

2.2 Surface Soil Permeability: <u>Sand/gravel</u>

2.3 Total Annual Precipitation: 22.1 inches

2.4 Max. 2-Yr/24-hour Precipitation: 2.0 - 2.5 inches

2.5 Flood Plain: 500 year

2.6 Terrain Slope: <<u>2 %</u>

#### **3.0 TARGETS**

3.1 Distance to Surface Water: 50 feet

- 3.2 Population Served within 2 miles (See WARM Scoring Manual Regarding Direction):  $\sqrt{\text{pop.}=\sqrt{0}} = \frac{1}{\sqrt{0}}$
- 3.3 Area Irrigated within 2 miles  $0.75\sqrt{\text{no. acres}} = 600$ (Refer to note in 3.2.):  $0.75\sqrt{600} = 0.75(24.5) = 18.4$
- 3.4 Distance to Nearest Fishery Resource: 2500 feet
- 3.5 Distance to, and Name(s) of, Nearest Sensitive Environment(s) <u>1100 feet to wetland</u> labeled PROC

#### 4.0 RELEASE

Explain basis for scoring a release to surface water:

Photographs documented a release of oil to surface water.

# **DEPARTMENT OF ECOLOGY TOXICS CLEANUP PROGRAM**

# SITE HAZARD ASSESSMENT DATA COLLECTION SUMMARY SHEETS FOR WASHINGTON RANKING METHOD

# SURFACE WATER, AIR AND GROUND WATER ROUTES ONLY

Site Name:
Location:1310 E First Street. Cle Elum WA 98922
Site owner/operator: <u>Mr. Earl Storey</u>
Address: 1310 E First Street, Cle Elum WA 98922
Any other known PLP (s):
Address:
Date (s) of field site hazard assessment: <u>1/17/96</u>
Samples or field measurements:
<u>No</u> soil
NoairNoground water
(Attached copies of pertinent sampling and analytical data, as well as all other supporting documentation.)
Photographs: <u>Yes</u>
Weather: <u>Rainv. snow on ground 30<sup>d</sup> F</u>
Lead inspector: Gerald L. Tousley
Other inspectors:
Signature: Herold L. Tousley

# Part I. Hazardous Substances

Note: Page number shown by "route" (e.g. SW-2, A-13) in parentheses refer to the WARM Scoring Manual. WK-numbers refer to page numbers of the worksheets at the end of the scoring manual.

# A. Hazardous substances

List specific hazardous substances, known or suspected (check k or s), currently, or that have been previously (check c or p), at the site property (WK-2, WK-3). Give an estimate, if available, of the quantity (not concentration):

Hazardous Substance K S C P	Quantity	<u>Units</u>
1. <u>TPH - Diesel</u>		
2. <u>TPH - Gasoline</u> 3		
4 5		
By which routes are these available? (WK-	-2, WK-3)	· · ·
		_

Number (from above)	Surface Water	Air	<u>Groundwater</u>
1.	X X 	 	X X

SOL	JRCES
ieck t	hose known or observed (WK-2, WK-3):
	drums or other containers
	electrical transformers
	above ground tanks
	below ground tanks
	ponds, pits, or other impoundments
	pipelines (other than water, sewer, or gas)
	floor drains
	exterior drains for rainwater, surface waters, spills, etc.
4	Other? Identify: Portable fuel pump and hoses
dditio	nal information/references:
<u> Martin</u>	
IND	ICATORS Check those known or observed (SW-5; A-8, A-9; GW-6):
X	discolored soils
	disturbed soils
	discolored standing water
	unusual or noxious odors
	sick or dead vegetation
	groundwater monitoring wells
	other? Identify: <u>Water in pit where tanks are submerged</u>
	re checked in B or C, explain details including exact locations (identify location
ap or e	drawing). See attached map
dditio	nal information/referecences: <u>Numerous photographs documenting spill</u>
- <b>-</b>	

# PART II: Releases

# A. KNOWN OR SUSPECTED RELEASES

List those hazardous substances identified (by number) in I.A. which are know, or suspected, to have been released (WK-2, WK-3):

Substance (#)	Quant. Released	<u>Units</u>	Medium Released to
	<u>Unknown</u>		<u>soil, groundwater, air</u>
2	Unknown	· · ·	<u>soil, groundwater, air</u>
	<u>.                                    </u>	·····	·
		······	
	·	<u></u>	

B. SOURCES AND IMPACTS (SW-5, SW-6; A-9, A-10; GW-6, GW-7)

List those hazardous substances identified (by number) in II. A. and identify the source and impact:

Substance No.	Source	Impacts/Affects to	<u>Area</u>
<u>1</u>		air, soil, groundwater	<u>behind gas station, tank farm</u>
2	10	air. soil. groundwater	<u>behind gas station, tank farm</u>
		·	
	<u> </u>	<u> </u>	
		<u>* *</u>

Present	? <i>N/A</i> How many?
ck those th	at apply:
	An engineered, maintained run-on/run-off control system
	An engineered/maintained cover without ponding
	Unmaintained run-on/runoff control or no cover
	No run-on/runoff control or no cover
~	Uncontaminated soil cover greater than 6" thick
	Uncontaminated soil cover less than 6" thick
	Contaminated soil used as cover
	A functioning vapor collection system
	Mixing or agitation used
	No liner
	Single clay or compacted soil liner (permeabilitycm/sec
•••	Single synthetic liner (permeability cm/sec)
	Double liner system (permeability cm/sec)
· .	Leachate collection system, maintained and functioning
	Leachate collection system, unknown condition or not functionin
· · · · · · · · · · · · · · · · · · ·	Liquid wastes may have been disposed of
	Liquid wastes were disposed of in landfill
··	Reliable evidence no liquid wastes were disposed

B. CONTAINMENT - - SURFACE IMPOUNDMENTS (SW-8; A-12; GW-9)

Present <u>N/A</u>

How many? \_\_\_\_\_

Check those that apply:

- 1. \_\_\_\_\_ The dike is apparently sound
- 2. \_\_\_\_\_ The dike is regularly inspected and maintained
- 3. \_\_\_\_\_ There is evidence of failure, erosion, slumping, or release of contents
- 4. \_\_\_\_\_ Two feet of freeboard maintained automatically
- 5. \_\_\_\_\_ The freeboard is manually controlled so that there is at least 2 feet of freeboard

6

- 6. \_\_\_\_\_ Evidence of insufficient freeboard (<2 ft.)
- 7. \_\_\_\_\_ A maintained cover
- 8. \_\_\_\_\_ Unmaintained cover, no cover
- **9**. \_\_\_\_\_ No liner
- 10. \_\_\_\_\_ Single synthetic liner
- 11. \_\_\_\_\_ Single clay or compacted soil liner
- 12. \_\_\_\_\_ Double liner
- 13. \_\_\_\_\_ Working leak detection system
- 14. \_\_\_\_\_ Evidence of loss of fluid (other than by evaporation)
- 15. \_\_\_\_\_ Mixing/agitation processes used

Present	<u>Yes</u> How many? <u>20+</u>
Check tho	se that apply:
1. <u> </u>	No functional containment
	There is secondary containment capacity for the total volume of containers
I	There is secondary containment with capacity for at least 110% of the volume of the largest container
• <u> </u>	The secondary containment is less that 110% of the volume of the largest container
5	The containers are stored in single, or double layers on pallets, or in racks
5	The containers are stored in an unstable manner
	Some containers are open or have visible liquid
l	Some containers are leaking
),	Containers are protected from weather
0	Containers showing deterioration
1	Containment surface is impervious
2	Containment surface has cracks or semi-permeable
.3	No base material/permeable base such as grave/base materials unknown
4	Evidence of containment failure

D. CONTAINMENT -- STORAGE TANKS (SW-9; A-10; GW-10)

Present? <u>Yes</u>

How many? \_\_\_\_\_16\_\_\_\_\_

Check those that apply:

- 1. \_\_\_\_\_ Secondary containment with a capacity of 110% of the volume of the tanks
- 2. \_\_\_\_\_ Secondary containment at least 50% of the volume of all tanks
- 3. \_\_\_\_\_ Containment system with capacity for at least 10% of volume of containers or tanks
- 4. X No containment, or less than 10% capacity
- 5. \_\_\_\_\_ Tank volumes maintained

6. \_\_\_\_\_ Automatic controls used for volume maintenance

- 7. \_\_\_\_\_ Tanks are covered
- 8. \_\_\_\_\_ Uncovered tanks have aeration, mixing, or heating of tank contents
- 9. \_\_\_\_\_ Containers sealed, protected
- 10. \_\_\_\_\_ Containers sealed, not protected
- 11. \_\_\_\_\_ Containers deteriorated
- 12. \_\_\_\_\_ Containers leaking
- 13. \_\_\_\_\_ Record the #s of above which apply <u>only</u> to above ground tank <u>13</u>\_\_\_\_
- 14. \_\_\_\_\_ Record the #s of above which apply <u>only</u> to below ground tanks <u>3</u>\_\_\_\_\_
- 15. \_\_\_\_\_ Record the #s of above which apply to <u>both</u> above and below ground tanks:

Additional comments/references: \_\_\_\_\_ The three below ground tanks are in groundwater \_\_\_\_\_

E. CONTAINMENT	WASTE PILES	(SW-10; A-11; GW-11)
----------------	-------------	----------------------

Present? \_<u>N/A</u>\_\_\_\_\_

How many?

# Check those that apply: Previous remediation

1. \_\_\_\_\_ Waste pile is outside, no protecting structure

2. \_\_\_\_\_ Waste pile is outside, in open structure with roof

3. \_\_\_\_\_ Waste pile is outside, with partial or unmaintained cover

4. \_\_\_\_\_ Waste pile is outdoors, with maintained cover

5. \_\_\_\_\_ No cover is present

6. \_\_\_\_\_ Waste pile is fully enclosed, intact building

7. \_\_\_\_\_ There is an engineered run-on/run-off control

8. \_\_\_\_\_ The run-on/run-off control is maintained

9. \_\_\_\_\_ Run-on/run-off control system present, unknown condition

10. \_\_\_\_\_ No run-on/run-off control system present, or unknown if present

11. \_\_\_\_\_ Liner or base present; \_\_\_\_\_ Not present

12. \_\_\_\_\_ Single clay or compacted soil liner

I3. \_\_\_\_\_ Single synthetic liner

14. \_\_\_\_\_ Double liner

15. \_\_\_\_\_ Maintained, functioning leachate collection system

16. \_\_\_\_\_ Leachate collection system; \_\_\_\_\_ Unknown condition; or \_\_\_\_\_ Not functioning

# F. CONTAINMENT - - SPILLS, DISCHARGES, AND CONTAMINATED SOIL

(SW-10; A-12; GW-12)

Check those that apply:

- 1. X Spill, discharge, or contaminated soil only in the subsurface at the site -- including dry wells, drainfields, leaking underground storage tanks
- Soil contamination that has been covered <u>partially excavated</u> and filled with at least 6 inches of clean soil

3. \_\_\_\_ Soil contamination that has been covered or partially excavated and filled with less than 6 inches of clean soil

- 4. \_\_\_\_ Uncontaminated soil cover >2 feet thick
- 5. \_\_\_\_ No cover; or \_\_\_\_\_ Cover  $\leq 2$  feet, but > 6'' thick
- 6. \_\_\_\_ Spill, discharge, or contaminated soil present at the surface in an area with <u>maintained</u> run-on/run-off control
- 7. \_\_\_\_ Spill, discharge, or contaminated soil present at the surface in an area with <u>unmaintained</u> run-on/run-off controls?
- 8. X Spill, discharge, or contaminated soil present at the surface with <u>no</u> run-on/run-off control or <u>unknown</u> controls.
- 9. \_\_\_\_ Contaminated soil has been disturbed or excavated and stored above grade
- 10. \_\_\_\_ A functioning vapor recovery system

11. <u>X</u> No vapor recovery system

Additional comments/references:

# G. CONTAINMENT - - SITE CHARACTERISTICS

(SW-11, SW-12, SW-13, SW-14; GW-12, GW-13; WK-5-9)

1. How would you evaluate the site soils? Circle predominant textural class.

X Sand, gravel, sandy gravel, well-graded sand, well-graded gravel, gravelly sand, gravelly sand loam, silty sandy loam?

\_\_\_\_\_ Poorly-graded sand with fines, silt-sand mixtures, loam, silt loam, sandy silt loam, clayey sand, clay sand loam?

Claycy sands, sand-clay mixtures, claycy gravels, clay-sand-gravel mixtures, inorganic silts, claycy silt loam, silty clay loam, porous rock outcrop, sandy silty clay, sandy clay loam?

\_ Clay (organic and inorganic), clay loam, rock outcrop, peat, peaty clay?

is the above based on personal observation, lab analysis, or professional judgment by a soil expert? (Circle)

<b>Ż</b> .	Total annual precipitation = <u>22.10</u> in./yr.	(SW-11; WK-6)
	22.5	,
3.	Max. 2-Yr./24-hr precip. = $1.5$ inches	(SW-12; WK-6)

4. Net precipitation (see 2.2, GW-12) = 26.0 in. (WK-9) 28.3 - 2.3 = 26

5. Is the site not in a flood plain? \_\_\_\_\_ (SW-12; WK-6)
 Is the site in a 500 year flood plain? \_\_\_\_\_ <u>Yes - Zone B</u>
 Is the site in a 100 year flood plain? \_\_\_\_\_ <u>No</u>\_\_\_\_\_

6. What is the terrain slope to the nearest surface water?  $\underline{<2}$  % (SW-14; WK-6)

7. What is the subsurface hydraulic conductivity?  $\geq 10^{-3}$  cm/sec (GW-13; WK-9)

8. What is the vertical depth from the deepest point of known contamination to ground water? <u>0</u> feet (GW-13; WK-9) GW at 4 feet - DOE statement

Additional comments/references: <u>The underground tanks are in groundwater and a</u> very strong smell of diesel in the pit.

# **IV.** Targets

# A. DISTANCE TO SURFACE WATER (SW-15; WK-6)

1. What surface water (s) (lake, stream, river, pond, bay, etc.) is/are within 10,000 feet (downgradient) of the site?

	<u>Dist ft.</u>	<u>Obs.</u>	<u>Meas.</u>
Irrigation ditch Yakima River	<u> </u>	<u>X</u>	<u>_X</u>
		, <u></u> ,	
one? Comm	nents/references;		

- 2. What drinking water intakes are within 2 miles of the site? (All lake intakes, river intakes downstream only) (SW-15; WK-6)
  - None?
     X

     Source
     Location
     Pop. Served
- 3. How much acreage (anywhere) is irrigated by surface water intakes (downstream only) or wells (anywhere) within 2 miles of the site? (SW-15; GW-15; WK-6, WK-10)

None?			
SURFACE WATER:	Acres <u>600</u>	(1600 acres max.)	
Source (s) <i>WRIS - su</i>	rrounding land owners	· · · · · · · · · · · · · · · · · · ·	
GROUNDWATER:	Acres <u>30</u>	(4500 acres max.)	
Reference (s) :W	RIS_ surrounding land	owners	

ì

J

4. What is the distance to the nearest fishery resource (overland flow distance to nearest surface water which is a fishery resource)? (SW-16, SW-17, SW-18; WK-6)

Over 10,000 feet? \_\_\_\_\_Distance if less than 10,000 feet? \_\_\_\_ = 2000 ft

5. What are the names of, and the distances to, the nearest sensitive environments (total of overland distances plus downgradient distances, count only overland flow distance if nearest sensitive environment is a fishery)? (SW-18; A-15; WK-6)

Over 10,000 feet? <u>No</u> Names and distances if less than 10,000 feet: \_\_\_\_\_ <u>PFOC 1100 feet: Powflx 2000 feet - from National Wetlands Inventory Maps</u>

6. Is the aguifer a federally-designated sole source aguifer? \_\_No\_\_ (GW-14; WK-9)

7. Is the ground water used for:

(GW-14: WK-10)

- $X_{x}$  private supply \_\_\_\_\_ public supply
- X\_\_\_\_\_ irrigation of human food crops or livestock
- \_\_\_\_\_ non-food (human) vegetation
- \_\_\_\_\_ not used due to natural contaminants
- \_\_\_\_\_ ground water not used, but usable
- 8. Distance to nearest drinking water well? \_\_\_\_\_ 3000\_ Feet (GW-15; WK-10)
- 9. Is there an alternate source available to groundwater for private or public water supply? (GW-14, WK-10) \_\_\_\_ves
- 10. Population served by drinking water wells within 2 miles? <u>2.500</u> (GW-115; WK-10)

11. Distance to the nearest population? <u><200 feet</u> (A-13,; WK-8) City of Cle Elum

12. Population within one-half mile radius? \_\_\_\_\_\_ (A-15; WK-8) 65 buildings X 3.0 people

Additional comments (e.g. potential for natural resource damage, or other ecological concerns, references):
