**CERTIFIED MAIL**

7002 0510 0003 6615 1308

March 19, 2003

Mr. Scott Isaacson  
Glacier Northwest  
PO Box 1730  
Seattle, WA 98111-1730

Dear Mr. Isaacson:

Thank you for submitting the results of your independent remedial action for review by the Washington State Department of Ecology (Ecology). Ecology appreciates your initiative in pursuing this administrative option under the Model Toxics Control Act (MTCA).

Ecology's Toxics Cleanup Program has reviewed the following information regarding cleanup activities at Glacier Northwest Vancouver Facility, located at 18516 SE 1<sup>st</sup> Street, Vancouver, WA 98684-7509:

- Sweet-Edwards/EMCON, **Lone Star Diesel Investigation Status Report**, December 4, 1987.
- Sweet Edwards/EMCON, **Draft Status Report Revision Camas Diesel Spill**, December 4, 1987.
- Sweet Edwards/EMCON, **Lone Star Diesel Spill Investigation Status Report**, January 18, 1988
- Sweet Edwards/EMCON, **Detection of Free Diesel in Lone Star Sampling Well W-3**, April 20, 1988.
- Sweet Edwards/EMCON, **Lone Star Diesel Spill Investigation Status Update**, January 13, 1989.
- G-Logics, **Subsurface Soil and Groundwater Sampling Concrete-Batch Plant, Diesel Fuel Spill**, March 12, 2002.
- G-Logics, **Well Resampling Report for Possible Diesel Contamination Aggregate Operations, Diesel Fuel Spill**, June 12, 2002.

- G-Logics, VCP Review and No Further Action Request Glacier Northwest Vancouver Facility, October 25, 2002.
- G-Logics, Well Resampling, February 13, 2003 Aggregate Operations, Diesel Fuel Spill, February 26, 2003.

The above-listed reports will be kept in Central Files of the Southwest Regional Office (SWRO) of Ecology for review by appointment only. Appointments can be made by calling the SWRO Resource Person at (360) 407-6365.

Based upon the above listed information, Ecology has determined that, at this time, the release of Total Petroleum Hydrocarbons as diesel into the soil and groundwater no longer poses a threat to human health or the environment.

Therefore, Ecology is issuing this determination that no further remedial action is necessary at this site under MTCA, Chapter 70.105D RCW. However, please note that because your actions were not conducted under a consent decree with Ecology, this letter is written pursuant to RCW 70.105D.030(1)(i) and does not constitute a settlement by the state under RCW 70.105D.040(4) and is not binding on Ecology.

Ecology's no further action determination is made only with respect to the releases identified in the reports listed above and applies only to the area of the property affected by the release of diesel, as identified in the reports. It does not apply to any other release or potential release at the property, any other areas on the property, nor any other properties owned or operated by Glacier Northwest, Scott Isaacson or G-Logics.

At the conclusion of this process, Ecology will update its databases and your site will not appear in future publications of the Confirmed and Suspected Contaminated Sites List (previously known as the Affected Media and Contaminants Report).

The State, Ecology, and its officers and employees are immune from all liability and no cause of action of any nature may arise from any act or omission in providing this determination.

If you have any questions about any of the information presented in this letter, please contact me at (360) 407-6261.

Sincerely,

Lisa Pearson  
Project Engineer  
Toxics Cleanup Program  
Southwest Regional Office
