Cleanup Site ID 4728

Dear Sir or Madam:

The Washington State Department of Ecology (Ecology) is writing to inform you that the above referenced property was subject to a site hazard assessment (SHA) as required under the Model Toxics Control Act, on January 25, 2016. The site was determined to be contaminated with arsenic and lead. The site's hazard ranking, an estimation of the potential threat to human health and/or the environment relative to all other Washington state sites assessed at this time, has been determined by Ecology to be 2, where 1 represents the highest relative risk and 5 the lowest.

For your information, Ecology will be publishing ranking of this and other recently assessed sites in the February 2016 Special Issue of the Site Register. The hazard ranking will be used in conjunction with other considerations in determining Ecology's priority for future action at this site. This report is available here: <https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=4728>. To view the documentation Ecology has available electronically; on the right-hand side of the web-page, click on View Electronic Documents.

For inquiries regarding what may occur with your site now that it is on Ecology's Hazardous Sites List please contact me at (425) 649-7135 or [ptom461@ecy.wa.gov](mailto:ptom461@ecy.wa.gov).

Sincerely,

Priscilla Tomlinson  
Site Hazard Assessments
