

Site Maintenance and Restoration to Prepare for Lease

Multiple requests from industrial users to lease the property – would have to do this work to lease to anyone

To prepare for lease, need to:

- Relocate stockpiled material, associated clear & grub
- Re-grade and update drainage and erosion controls
- Replace gravel surfacing across entire site
- Repair existing wharf
 - No in-water work – fixing concrete surfacing and strengthening behind the bulkhead

Lease for continued industrial use for interim period before Lakepointe development

Lease to KGM is for a 3-year period

Pioneer Towing Company, Inc.

Site Plan - Maintenance and Restoration

Important Points About Our Work

- **Extent of gravel surface is not bigger than previous industrial yard**
- **Brings the yard back to how it was, but with better environmental controls**
- **Shoreline vegetation will be protected**
 - **Continuous berm separate shoreline vegetation from industrial yard**
- **All yard area will drain to new sediment traps - drainage will infiltrate on site – not run off to lake or river**
 - **Manually controlled emergency overflows for extreme weather conditions**
- **No in-water work**

Permitting the Pioneer Towing Work

- **We (Pioneer Towing) will permit this work with the City**
- **SEPA checklist, shoreline exemption for maintenance and repair work**
- **Grading Permit**
- **Building Permit for wharf repairs**
- **Construction Stormwater General Permit from Ecology**
- **Work meets requirements of Ecology Consent Decree for Continued Industrial Use**
 - **Industrial use and access restrictions**
 - **Upgraded erosion controls**
 - **Continued groundwater monitoring**
