DECLARATIONS

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional* as defined in "312.21 of 40 CFR part 312."

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I performed and/or developed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR part 312."

*A person who does not qualify as an Environmental Professional may assist in the conduct of all appropriate inquiries in accordance with ASTM E1527-13 if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional when conducting such activities.

Executive Summary

Robinson Noble, Inc. has prepared a Phase I Environmental Site Assessment of tax parcels 2025150011 and 2025140081 located in Pierce County, Washington. The site is located near the intersection of South 25th Street and Court G in Tacoma, Washington (Figure 1).

This Phase I Environmental Site Assessment (ESA) was prepared in general accordance with ASTM Standard E1527-13. It was prepared using generally accepted professional practices, and observations and findings generated for this project are based on information limited to "reasonably ascertainable sources." This ESA is not intended to be an exhaustive search for all possible environmental issues. It was designed to utilize reasonably ascertainable information in order to determine whether recognized environmental conditions (as defined by ASTM) warranting additional investigation are present. The Phase I ESA is intended as a step to qualify the report's user for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. The scope of services for the ESA included reviewing the physical setting of the property, reviewing government databases for potential environmental risks to the property, conducting historical research concerning the property, and conducting interviews with people knowledgeable about the property. The work was completed by, or under the direction, of an environmental professional as defined in ASTM E1527-13. We previously performed a Phase I ESA of the subject property in 2009 and have recently performed work on the neighboring Bay Terrace property in 2014.

The subject parcels are currently vacant and unoccupied. The surrounding properties are primarily residentially developed. We performed a site inspection of the subject and performed interviews with people knowledgeable about the property. A recognized environmental condition was identified for the subject site. A petroleum hydrocarbon plume affecting soils on the eastern portion of the site was identified in a recent geotechnical borehole. The property owner representative confirmed remediation of the soil contamination is currently being planned. Based on our knowledge of the neighboring Bay Terrace site, groundwater contamination is not likely. Therefore, it appears the independent cleanup actions will facilitate formal closure of the soil contamination through Ecology's VCP.

Historical sources indicate the eastern portion of the subject property was first developed in 1888 primarily for residential purposes. The western portion of the subject was first developed in 1969, also for residential purposes. The eastern portion of the site was developed into multi-family housing in the 1970's, and both properties served as multi-family housing until demolition of the structures in 2014 during the first phase of the redevelopment of the site. Our historical research did not find evidence of any historical recognized environmental conditions.

A database search was conducted to identify known sites within a radius of up to one mile from the subject property that may have the potential to impact the subject with contamination. The subject property is not listed on the databases searched. No listed sites off the subject property appear to be of concern.

Robinson Noble performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this document. This assessment has not revealed evidence of recognized environmental conditions except for:

- Soil contamination recently discovered in a geotechnical borehole located on the eastern portion of the subject. The contamination is likely gasoline and diesel-range petroleum

hydrocarbons and has a known depth of 7.5 to 16 feet below ground surface. The extent of the soil contamination is not currently known.

We recommend excavation and removal of the soil contamination surrounding the borehole. This independent cleanup action should be followed by formal cleanup review from the Washington State Department of Ecology. Based on our knowledge of the neighboring Bay Terrace property, which had a similar plume discovered during the first phase of the Bay Terrace development, groundwater is not likely to be impacted. However, it may be prudent to install a groundwater monitoring well in the vicinity of the contamination following soil removal to facilitate Ecology formal review of the work. On the adjoining property, groundwater was present at 17.5 feet below ground; however, on the subject at B6 groundwater was reported deeper, at 28.5 feet below ground.

1.0 Introduction

1.1 Scope of Services and Purpose of Report

This Phase I Environmental Site Assessment (ESA) was prepared in general accordance with ASTM Standard E1527-13 and the professional services agreement (PSA) between Robinson Noble and Tacoma Housing Authority executed on August 18. The PSA and a detailed scope of services are attached as Appendix E of this report. The noted scope of services was developed based on standard industry practices and ASTM Standard E1527-13. Unless an item is specifically addressed in the noted scope of services and discussed herein, it should be assumed that it was not included in the scope of work for this project. This Phase I ESA was prepared for the subject site (Bay Terrace Phase II Development) located at South 25th Street and Court G in Tacoma, Washington (Figure 1).

1.2 Conditions and Limitations

This project was generally completed within the standard scope defined by ASTM. The contractual agreement between the client and Robinson Noble did not contain any special conditions or limitations. As outlined in ASTM E1527-13, the observations and findings generated for this project were based on information limited to "reasonably ascertainable sources."

This report was prepared using generally accepted professional practices. The nature of the ESA process requires that information generated, managed, and/or controlled by third parties is utilized. We believe that the sources utilized are accurate; however, we cannot guarantee that the third-party information is free of error. While we warrant that the opinions and conclusions drawn from information gathered during this study are based on sound professional judgment, we reserve the right to modify any opinion, conclusion, and/or recommendation in the event new, revised or different information becomes available. Unless specifically stated herein, no other warranty, expressed or implied, is made.

This ESA is not intended to be an exhaustive search for all possible environmental issues. It was designed to utilize reasonably ascertainable information in order to determine whether recognized environmental conditions (as defined by ASTM) warranting additional investigation are present. However, according to ASTM 1527-13 "no environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property." This ESA is intended to reduce uncertainty regarding recognized environmental conditions for the subject property, but it cannot eliminate all uncertainty.

The Phase I ESA is intended as a step to qualify the report's user for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. It constitutes a portion of the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined by 42 U.S.C. §9601. The scope of services noted in Section 1.1 was completed by, or under the direction of, an environmental professional as defined in ASTM E1527-13.

1.3 Client and Right of Reliance

As outlined in the PSA governing this project, the client is Tacoma Housing Authority. An additional right of reliance is granted to Chase Bank. This report was prepared for the use of the client for the purposes outlined herein and in contract documents under which the project was completed.

Reliance by any party other than Tacoma Housing Authority or Chase Bank is strictly at their own risk. Additional entities may be granted the right to rely on this report, subject to the approval of the client and agreement by the relying party regarding the scope of services under which this report was prepared. Such additional rights-of-reliance may only be granted in writing either by specific mention in this section or in a letter of reliance prepared and signed by Robinson Noble.

2.0 Previous Reports

We performed a Phase I ESA of the subject site and surrounding Bay Terrace properties in 2009 (Robinson, Noble & Saltbush, Inc., 2009). The previous Phase I ESA did not identify recognized environmental conditions affecting the site except for arsenic and lead contamination in the topsoil. During the first phase of development of the Bay Terrace property, shallow topsoils of the subject and neighboring property were removed and properly disposed. Confirmation samples showed arsenic and lead levels in the remaining soil were below applicable cleanup levels (Robinson Noble, Inc., 2013).

During the first phase of development, a gasoline soil plume was discovered during excavation for a stormwater vault on the adjoining property (Robinson Noble, Inc., 2014). We supervised the excavation of the contaminated soils and performed confirmation sampling. One hundred and forty nine tons of petroleum-contaminated soils were removed and a monitoring well was installed where the soil contamination was identified. Following groundwater monitoring, the site achieved a "no-further-action" (NFA) status from the Washington State Department of Ecology (Ecology). Based on the NFA status and our direct knowledge of the work performed, the risk to the subject is low.

During a recent geotechnical investigation of the subject property (GeoEngineers, 2015), petroleum contamination was discovered in soil at one borehole (B6, Figure 2). The petroleum hydrocarbon contamination ranged in depth from 7.5 to 16 feet below ground surface. This represents a recognized environmental condition affecting the site. As discussed below in Section 6.0, we interviewed representative of GeoEngineers and the Tacoma Housing Authority (THA). THA indicated that it intends to address the contaminated soil in the coming months by working through Ecology's voluntary cleanup program (VCP).

3.0 Physical Setting

3.1 Site Description

3.1.1 Legal and Location

The subject site is comprised of two parcels identified by Pierce County records as parcel numbers 2025150011 and 2025140081. These properties are located south of the intersection of South 25th Street and Court G between Yakima Avenue and South G Street in Tacoma, Washington. A general location map is provided as Figure 1 in Appendix A. A site diagram, indicating

approximate parcel boundaries, is included in Appendix A as Figure 2. The subject consists of approximately1.68 acres.

3.1.2 Current Property Use

The land use of the subject currently is vacant and unoccupied. However, Figure 2 displays the previous multi-family residential development on the site prior to its demolition in 2014.

3.1.3 Structures and Improvements

There are no occupiable structures on the subject. The southeast portion is developed with an asphalt parking lot, a stormwater pond is located in the center of the eastern parcel, and a large mound of fill dirt occupies the western parcel.

3.2 Regional Characteristics

3.2.1 Current Adjoining Land Uses

The subject is situated in an area that is primarily developed with residential land uses. The directly adjoining parcels are occupied by the following:

- North: Stained glass manufacturing
- Northeast: parking lot and large warehouse
- East: multi-family residential
- Southeast: Bay Terrace property and single-family residential
- South: Bay Terrace property
- Southwest: Bay Terrace property and single-family residential
- West: single-family residential
- Northwest: multi-family residential

3.2.2 Topography, Geology, and Soils

The subject property is at an elevation of approximately 260 feet above sea level. The topography of the site slopes easterly. As noted below, there is a large mound of fill dirt on the western parcel. The fill dirt extends approximately 20 to 30 feet above the elevation of the surrounding grade. As noted in Section 6.0, this fill is to be removed and/or used as grading for part of the second phase of the Bay Terrace development.

Troost (in review) maps the surface geology of the subject and surrounding area as Quaternary Vashon till (Qvt), Quaternary Vashon advance outwash (Qva), and Quaternary Steilacoom gravel (Qvs). The Qvt generally has low permeability as it is composed of a compacted mix of sand, silt, clay, and gravels The Qva and Qvs deposits generally have higher permeability and are composed of sand and gravel deposits. Troost also maps Quaternary Vashon ice contact (Qvi) deposits just east of the subject. The ice-contact deposits are a mix of fine to coarse-grained sediments that have a moderate permeability.

On-site and adjoining off-site subsurface explorations previously completed confirm the subsurface geology is primarily a mix of fill, sand and gravel, ice-contact, and glacial till sediments.

Soils in the area of the subject have been classified as Alderwood gravelly sandy loam by the USDA (1939). These soils are generally associated with the glacial till deposits described above. This soil is typically moderately well drained.

3.2.3 Surface Water and Groundwater

There is a small surface water retention or infiltration pond located on the eastern portion of the site (Figure 2).

Based upon well and borehole logs completed on the subject and adjoining property, the depth to groundwater is generally 17.5 to 28 feet below ground surface. Shallow groundwater flow directions and depths are likely influenced by topography and primarily flow easterly.

3.3 Site and Surrounding Area Reconnaissance

Michael Brady, a Robinson Noble geologist, completed a site reconnaissance (inspection) on October 12. The purpose of the reconnaissance was to obtain readily apparent indications of potential recognized environmental conditions as defined by ASTM Standard E1527-13. Selected photographs from the reconnaissance are attached in Appendix A. The inspection included a walkthrough of the site and a review of the surrounding properties. Also included was an inspection for possible contamination sources, including those noted below, on the site and from adjoining properties.

- storage tanks (underground and above ground)
- wells (water wells, dry wells, irrigation wells, monitor wells, etc.)
- drums or chemical storage areas
- hazardous substances, petroleum products, and unidentified containers
- pools of liquid, ponds, and surface impoundments
- maintenance or shop areas
- waste water systems
- sumps or storm drains
- interior stains or corrosion
- stained soil or pavement
- potentially PCB-containing equipment
- piles of waste or trash; solid waste
- dead or dying vegetation
- unusual odors
- other observations that in the opinion of the field investigator indicate the possible presence of conditions of concern

As described in Section 3.1, the site is currently unoccupied. The western portion of the subject contains a large mound of fill dirt related to regrading of the Bay Terrace Phase I development area. The eastern portion of the subject is developed with a small asphalt parking lot and a small stormwater retention or infiltration pond.

3.3.1 Interior Observations

There are no building on the subject.

3.3.2 Exterior Observations

During the site investigation, we observed 55-gallon drums located within the small parking lot on the eastern parcel next to a recent borehole (B6, Figure 2). These drums contain the contaminated soils encountered during geotechnical drilling on the subject according to the property owner representative. The soil contamination surrounding B6 represents recognized environmental conditions affecting the site.

We observed a large mound of fill dirt on the western parcel extending approximately 40 feet in height. As described in Section 6.0, THA indicated the fill mound is from development of the Phase I Bay Terrace property and does not contain any contaminated soils. During Phase II development, THA indicated these soils will be used for grading and/or disposed of offsite as clean fill.

3.3.3 Roads

South Yakima Avenue borders the site to the west. Court G (an alley right-of-way) runs north-south and divides the subject property into the eastern and western parcels. South G Street borders the site to the east. South 25th Street borders the site to the north.

3.3.4 Utilities

Public water and sewer serve the site; however, there are no current active connections serving structures.

3.3.5 Adjoining Properties

Adjoining properties were inspected from the surrounding right-of-ways during the site visit. Neighboring properties were observed to be primarily residential. As described above, there is a groundwater monitoring well located on the adjoining Phase I development of Bay Terrace. The monitoring well was installed following remediation of a petroleum-contaminated-soil plume. That plume has a NFA status with Ecology, and therefore, no recognized environmental conditions were observed on neighboring properties.

3.3.6 Data Gaps

There are no data gaps to the site area reconnaissance.

3.3.7 Site and Surrounding Area Summary

Recognized environmental conditions are affecting the subject as observed by 55-gallon soil containment drums. The soil plume identified in 2015 has an unknown horizontal extent. However, the plume is currently planned for remediation and will be addressed through Ecology's VCP.
The visual inspection of the adjoining properties did not reveal any concerns defined by ASTM as a recognized environmental condition.

4.0 Government Agency Information

4.1 EDR Database Search

A database search was conducted through a private, third-party firm, Environmental Data Resources, Inc. (EDR), to identify sites of known or potential contamination within varying radii as defined by ASTM. These radii range from the target property only to up to one mile from the subject property. The database search results, including the search radii, are included in the EDR report, which is attached as Appendix B. A complete list and descriptions of the databases searched may be found in the Government Records Search/Data Currency Section of the EDR report. The absence of records should not be used as conclusive evidence that conditions do not exist. Sites may not have been reported or registered and/or may pre-date the requirement to report or register.

The subject site is located near the intersection of South 25th Street and Court G in Tacoma, Washington. The EDR report does not list the subject property on any of the databases searched.

The EDR report lists 202 properties/businesses with a total of 331 listed conditions falling within the ASTM standard search radii. In addition, the EDR report lists 11 unmappable (orphan) sites with listed conditions. As part of this study, where reasonably ascertainable, we determined the locations of the unmapped listed sites.

We assessed the risk to the subject property from both the mapped and unmapped listed sites. We were able to determine without further research that the listed sites pose little risk to the subject. We made this determination by reviewing site locations in relation to the estimated groundwater flow direction, reviewing the types of listings, and reviewing the reported status of the listed sites.

The adjoining Bay Terrace property was reported on several agency databases; however, as noted above we have direct knowledge regarding the resolution of previous recognized environmental conditions identified at the Bay Terrace property. Therefore, the listings for the adjoining property do not represent a potential recognized environmental condition for the subject site.

4.2 Washington State Department of Ecology File Review Information

We performed the cleanup work and characterization for the adjoining Bay Terrace listed property, and no additional file review was necessary. Copies of our reports to Ecology regarding the neighboring Bay Terrace site are attached in Appendix D.

4.3 Local Government Records

4.3.1 Health Department Records

We reviewed the Tacoma-Pierce County Health Department (TPCHD) Abandoned Commercial Tank (ACT) database. The subject and adjoining properties were not listed in the ACT database.

4.3.2 County Assessor Records

According to Pierce County Assessor's records, the owner of tax parcels 2025150011 and 2025140081 is the Tacoma Housing Authority. These records do not indicate the names of previous owners. Parcel information was reviewed on the Assessor website and is attached in Appendix C.

4.3.3 County Auditor Records

We reviewed Pierce County Auditor records for the subject property. No environmental liens or activity and use limitations were identified in the records, nor did we find other information on potential recognized environmental conditions.

4.3.4 Title Records and Environmental Liens or Activity and Use Limitations

Tacoma Housing Authority did not provide a copy of title records for the property. Title records can provide information on past owners and can potentially contain environmental liens or activity and use limitations not revealed by other sources. Without provided records, we did not review title records for the property.

4.4 Tribal Records

This property is not located within the historical boundary of an Indian reservation. Therefore, tribal records most likely do not exist. Several Tribal databases were researched through EDR. No tribal listed sites were reported in the vicinity of the subject.

4.5 Data Gaps

Title records were not reviewed for this assessment. However, the owner has indicated that they have reviewed title documents and found no liens or encumbrances related to environ-

mental conditions existing on the subject. Our review of County records also found no concerns. Therefore, we interpret this data gap to be insignificant.

5.0 Historical Research

A critical part of the ESA process is the consultation of historical sources to develop a history of the previous uses of the subject property and surrounding area. The purpose is to identify the likelihood of past uses causing recognized environmental conditions that could potentially impact the subject property. According to ASTM, the goal of historical research is to develop an assessment of chronological site and area land use from the first development. The historical information reviewed includes available sources that are reasonably ascertainable and relevant (as defined in ASTM E1527-13). Aerial photographs, fire-insurance maps, USGS 7.5-minute topographic maps, local street directories, County records, Polk's directories, and a historical building index were reviewed for this project. Relevant historical findings are given below.

5.1 Aerial Photographs

Aerial photographs (aerials) were searched through a third-party firm, EDR. A copy of the EDR Aerial Photo Decade Package is attached in Appendix B. Additionally, we reviewed aerial photographs from the City of Tacoma's govME GIS databases and Google Earth. Aerials dated from 1931, 1940, 1941, 1944, 1950, 1957, 1968, 1972, 1973, 1980, 1990, 1991, 1996, 1998, 2001, 2002, 2005, 2006, 2009, 2011, 2012, and 2014 were reviewed.

The 1931 aerials show the eastern portion of the site developed with residential while the western portion remained vacant. The western portion of the site appears vacant through the 1968 aerials, and then appears developed with multi-family residential in the 1972 aerials. The eastern portion of the site remained developed with single-family through that time. The aerials from 1990 through 2012 appear to show minimal changes to the subject site from the residential use. Aerials from 2014 show the subject property in its current configuration.

5.2 USGS Topographic Maps

A topographic (topo) map search was completed through a third-party firm, EDR. A copy of the EDR Historical Topographic Map Report is attached in Appendix B. Additionally, we reviewed topographic maps from USGS. Coverage was available for years 1900, 1944, 1949, 1961, 1968, 1973, 1981, 1994, 1997, 2011, and 2014. No details are presented in the 1900 to 1997 topographic maps other than the subject being within the City of Tacoma and being surrounded by roadways. The 2011 and 2014 topographic maps include recent aerials (2009 and 2011). These topographic maps and aerials depict the site in its prior residential use.

5.3 Sanborn Fire Insurance Maps

A Sanborn map search was completed through a third-party firm, EDR. A copy of the EDR Sanborn Map Report is attached in Appendix B. We also reviewed Sanborn maps supplied by Tacoma library. Sanborn fire-insurance map coverage is available for the subject and surrounding area dating to 1896, 1912, 1950, and 1969.

The 1896 and 1912 maps shows the eastern portion of the site developed with residential dwellings while the western portion of the site appears vacant. The 1950 map shows an auto repair shop immediately adjacent to the subject property on the neighboring Bay Terrace Ph I development, at the approximate location where a previous petroleum hydrocarbon plume was identified . The 1969 map shows that area adjacent to the subject no longer used for auto re-

pair. No specific historical recognized environmental conditions were revealed through the fire-insurance map search.

5.4 City, County, and Suburban Directories

A directory search was completed through a third party, EDR. Their report, EDR City Directory Abstract, is attached in Appendix B. This source shows available directory coverage for the area surrounding the subject property dating from 1921, 1926, 1931, 1936, 1942, 1947, 1953, 1958, 1963, 1965, 1970, 1974, 1978, 1983, 1988, 1993, 2004, 2010, and 2013. Directory listings for the subject site largely reflect residential use.

No specific historical recognized environmental conditions were revealed through the directory research.

5.5 Additional Historical Sources

5.5.1 Fire Department/Fire Marshal

The buildings on the subject property were demolished in 2014. No underground storage tanks were encountered during demolition. We performed an interview with the Tacoma Fire Prevention Bureau. No tank records were on file for the subject site.

5.5.2 Building Permits

We reviewed building permits for the subject site from the City of Tacoma's Land Use Permit History records database. Several demolition permits were identified for the single-family residential structures located on the eastern parcel dating from 1960 to 1979. Additionally, for the eastern parcel, permits related to construction of a community center in 1977 were identified.

Permits for the western parcel show an 85-unit apartment complex was constructed in 1969 and rennovated in 1977.

5.5.3 Other Historical Sources

We reviewed the Tacoma Public Library's Historical Building Index for addresses on the subject. No historical summaries were available for the western parcel addresses (2501 to 2519 Yakima Avenue). Four addresses on the eastern parcel (2500 to 2530 South G Street) have historical records. 2516 South G Street was listed as the Donovan store and residence constructed in 1888. 2520 South G Street was listed as the Westlake residence constructed in 1901. 2526 and 2530 South G Street were listed as the Moore residence(s) constructed in 1890.

No specific historical recognized environmental conditions were revealed through the research of these other historical sources.

5.6 Summary of Historical Findings

Historical research indicates the eastern portion of the subject property was first developed as early as 1888 primarily for residential purposes. The western portion was developed in 1969 with mutli-family residential apartments. The property has remained residentially used since first development until 2014, when the buildings were demolished as part of the Bay Terrace site development.

At least one neighboring property was historically used for commercial purposes as an auto-repair shop. This property is located immediately southwest of the subject on the other Bay

Terrace parcels. As noted above, a small cleanup project was implemented in 2014 due to petroleum hydrocarbon contamination identified in soils below the historical auto-repair location.

5.7 Historical Data Failure Summary

The first developed use of the subject site was determined and documented through the present. Therefore, there does not appear to be any historical data failures.

6.0 Client and Owner Provided Information and Interviews

6.1 Reason for Conducting the Phase I ESA

The Tacoma Housing Authority stated the purpose of this Phase I ESA is for financing of the second phase of development for the Bay Terrace property.

6.2 Valuation Reduction for Environmental Issues

Steve Clair, representative of the current property owner, indicated the value of the property has not been reduced due to environmental issues.

6.3 Interviews

Interviews, both actual and attempted, for this Phase I ESA were conducted by Michael Brady, a Robinson Noble geologist.

6.3.1 Agencies

Based on the information researched for this study, agency interviews were determined unnecessary and were not conducted.

6.3.2 Site Tenant(s)

There are no site tenants as the property is vacant.

6.3.3 Current Owners

We conducted an interview with Steve Clair, representative of the current property owner, THA. We also submitted a detailed questionnaire to Steve Clair. The questionnaire includes questions concerning the subject property's current use and history; whether the person answering the questionnaire has any specialized knowledge or experience, or are aware of any "commonly known information," in connection with potential environmental conditions; whether they have any actual knowledge of environmental liens or activity use limitations (AULs) for the subject; whether the value of the property has been affected by environmental issues; and concerning the reason why the Phase I ESA is needed. The questionnaire is attached in Appendix D.

Mr. Clair confirmed the presence of the soil contamination identified as petroleum hydrocarbons by the GeoEngineers geotechnical investigations completed in 2015. Mr. Clair indicated the soil plume is planned for excavation and therefore, will be addressed through an independent cleanup action and closure through Ecology's VCP program prior to February 2016. Mr. Clair also stated that the fill-dirt mound currently on the western parcel will be used for grading or removed during site development or removed.

6.3.4 Previous Owners

No previous owners were identified.

6.3.5 Others

We completed an interview with Eric Holler, representative of GeoEngineers. Mr. Holler confirmed the location of the soil contamination at boring B6 and confirmed the depths at which it was encountered. Mr. Holler indicated they did not know the nature of the contaminants other than it likely being gasoline or diesel-range petroleum hydrocarbons.

6.4 Data Gaps

No significant data gaps were found.

7.0 Findings, Conclusions, and Recommendations

7.1 Findings

The subject site is comprised of two parcels identified by Pierce County records as parcel numbers 2025150011 and 2025140081. The property is located south of the intersection of South 25th Street and Court G between Yakima Avenue and South G Street in Tacoma, Washington (Figure 1). These parcels are currently vacant and unoccupied. The surrounding properties are primarily residentially developed.

The historical research indicates the eastern portion of the subject property was first developed in 1888 primarily for residential purposes. The western portion of the subject was first developed in 1969, also for residential purposes. The eastern portion of the site was developed into multi-family housing in the 1970's, and both properties served as multi-family housing until demolition of the structures in 2014 during the first phase of the redevelopment of the site. Our historical research did not find evidence of any historical recognized environmental conditions.

We reviewed standard environmental databases and found the subject was not listed on any database searched. The database search did indicate a number of nearby properties listed. However, none of these appear to be of concern.

We submitted a questionnaire to the subject property owner and interviewed people knowledgeable about the property. This information did not provide evidence of any recognized environmental conditions except for a petroleum hydrocarbon plume affecting soils on the eastern portion of the site identified from a geotechnical borehole (B6, Figure 2). The property owner representative confirmed remediation of the soil contamination by excavation is currently being planned. Based on our knowledge of the neighboring Bay Terrace site, groundwater contamination is not likely. Therefore, it appears independent cleanup actions will facilitate formal closure of the soil contamination through Ecology's VCP.

7.2 Data Gap Summary

Significant data gaps affect an environmental professional's ability to identify recognized environmental conditions. However, data gaps in and of themselves are not inherently significant. Though data gaps were found during this study, we do not believe any of them are significant.

7.3 Conclusions

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-13 of S 25th Street and Court G in Tacoma, Washington. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this document. This assessment has not revealed evidence of recognized environmental conditions except for:

- Soil contamination recently discovered in a geotechnical borehole located on the eastern part of the subject. The contamination is likely gasoline- or diesel-range petroleum hydrocarbons and has a known depth of 7.5 to 16 feet below ground surface. The extent of the soil contamination is not currently known.

7.4 Recommendations

We recommend excavation and removal of the soil contamination surrounding the borehole B6. This independent cleanup action should be followed by formal cleanup review from the Washington State Department of Ecology. Based on our knowledge of the neighboring Bay Terrace property, which had a similar plume discovered during the first phase of the Bay Terrace development, groundwater is not likely to be impacted. However, it may be prudent to install a groundwater monitoring well in the vicinity of the contamination following soil removal to facilitate Ecology's formal review of the work. On the adjoining property, groundwater was present at 17.5 feet below ground; however, on the subject at borehole B6, groundwater was reported deeper at 28.5 feet below ground. As noted above, the property owner representative, Steve Clair, indicated the current plan is to achieve closure status by February 2016.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/10/2015 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

State- and tribal - equivalent NPL

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/19/2015 has revealed that there are 35 HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 07/21/2015 has revealed that there are 67 CSCSL sites within approximately 1 mile of the target property.

State and tribal Brownfields sites

BROWNFIELDS: A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the BROWNFIELDS list, as provided by EDR, and dated 07/21/2015 has revealed that there are 2 BROWNFIELDS sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 03/23/2015 has revealed that there are 3 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 07/21/2015 has revealed that there are 16 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there are 12 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

TACOMA COAL GASIFICA	E 22ND AND A STS	NE 1/2 - 1 (0.565 mi.)	AJ161	479

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 25 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 6 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

BRONZE WORKS LLC THE (Continued) **1011931837**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

TACOMA RESCUE MISSION (Continued) **1001031602**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

COMMERCIAL LORY UNIFORM RENT (Continued) **1000215855**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

SWC Desc:	Not reported
FWC Desc:	Not reported
Form Comm:	2007 waste was generated from the cleanup of a spill. No additional waste is anticipated. A recommendation for NFA status hab been submitted to DOE from the Tacoma Pierce County Health Dept.
Data Year:	Not reported
Permit by Rule:	False
Treatment by Generator:	False
Mixed radioactive waste:	False
Importer of hazardous waste:	False
Immediate recycler:	False
Treatment/Storage/Disposal/Recycling Facility:	False
Generator of dangerous fuel waste:	False
Generator marketing to burner:	False
Other marketers (i.e., blender, distributor, etc.):	False
Utility boiler burner:	False
Industry boiler burner:	False
Industrial Furnace:	False
Smelter defferal:	False
Universal waste - batteries - generate:	False
Universal waste - thermostats - generate:	False
Universal waste - mercury - generate:	False
Universal waste - lamps - generate:	False
Universal waste - batteries - accumulate:	False
Universal waste - thermostats - accumulate:	False
Universal waste - mercury - accumulate:	False
Universal waste - lamps - accumulate:	False
Destination Facility for Universal Waste:	False
Off-specification used oil burner - utility boiler:	False
Off-specification used oil burner - industrial boiler:	False
Off-specification used oil burner - industrial furnace:	False

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US BROWNFIELDS:

Recipient name:	Tacoma-Pierce County Health Department
Grant type:	Assessment
Property name:	2105 TACOMA AVENUE SOUTH
Property #:	2021110020
Parcel size:	.21
Property Description:	TPCHDGs historic gas station inventory lists a site in the property as the location of a former gas station in 1931 at 2105 Tacoma Ave in 1931. The current land use is listed as G6600-CONTRACTOR SERVICESG by the county assessor. Besides this, we have no other information on activities conducted on this parcel. We do know that this part of the City of Tacoma has been a mixed-use, light commercial area for decades. There are no local or state records of underground storage tank removals at the 2105 Tacoma Ave parcel.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

BROWN & HALEY INC FACTORY SITE TACOMA (Continued) **1004613541**

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

(Continued) **1000839119**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Event date: 08/29/2003
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 08/29/2003
Event: Igration of Contaminated Groundwater under Control, Unacceptable migration of contaminated groundwater is observed or expected.

Event date: 08/29/2003
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 12/14/2005
Event: Corrective Measures Design Approved

Event date: 02/03/2006

Event date:	08/01/2013
Event:	Current Human Exposures under Control, More information is needed to make a determination.
Event date:	09/29/2014
Event:	Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of

WA UW TACOMA BR CAMP (Continued) **1000179249**

significant changes at the facility.

Event date: 09/29/2014
Event: Current Human Exposures under Control, More information is needed to make a determination.

Facility Has Received Notices of Violations:
Regulation violated: SR - WAC 173-303-160-420(5)(A)
Area of violation: TSD IS-Ground-Water Monitoring
Date violation determined: 10/22/1998
Date achieved compliance: 04/27/1999
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 10/22/1998
Enf. disposition status: Not reported
Enf. disp. status date: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 12/31/2007
Site name: ALADDIN PLATING CO INC
Classification: Not a generator, verified

Date form received by agency: 07/21/2005

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 19209

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 1530.1

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 38

(Continued) **1000265719**

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 1

Waste code: D011
Waste name: SILVER
Amount (Lbs): 38

Waste code: P012
Waste name: ARSENIC OXIDE AS2O3
Amount (Lbs): 9478

Waste code: P075
Waste name: NICOTINE, & SALTS
Amount (Lbs): 9478

Waste code: U002
Waste name: ACETONE (I)
Amount (Lbs): 9478

Waste code: U010
Waste name: AZIRINO[2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA,8AALPHA,8BALPHA)]-
Amount (Lbs): 16843

Waste code: U035
Waste name: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]-
Amount (Lbs): 9478

Waste code: U080
Waste name: METHANE, DICHLORO-
Amount (Lbs): 788

Waste code: U112
Waste name: ACETIC ACID ETHYL ESTER (I)
Amount (Lbs): 129

Waste code: U129
Waste name: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA,2ALPHA,3BETA,4ALPHA,5ALPHA,6BETA)-
Amount (Lbs): 788

Waste code: U154
Waste name: METHANOL (I)
Amount (Lbs): 788

Waste code: U155
Waste name: 1,2-ETHANEDIAMINE, N,N-DIMETHYL-N'-2-PYRIDINYL-N'-(2-THIENYLMETHYL)-
Amount (Lbs): 9188.4

Waste code: U165
Waste name: NAPHTHALENE
Amount (Lbs): 788

Waste code: U205

(Continued) **1000265719**

Waste name: SELENIUM SULFIDE
Amount (Lbs): 788

Waste code: U206
Waste name: GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-, D-
Amount (Lbs): 7365

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: TSD IS-Preparedness and Prevention
Date violation determined: 10/24/2011
Date achieved compliance: 02/02/2012
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 02/02/2012
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Corrective Action Summary:
Event date: 09/04/1991
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 12/18/1991
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity because of a lack of technical data. An evaluation has been completed, but further data is necessary to determine stabilization measures, feasibility or appropriateness. This status should be changed when data becomes available.

Event date: 05/07/1992
Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 06/01/1994
Event: RFA Initiation

Event date: 07/21/1994
Event: RFA Completed, Assessment was an RFA.

Event date: 07/21/1994
Event: Stabilization Measures Evaluation,This facility is amenable to stabilization activity based on the status of corrective action work at the facility, technical factors, the degree of risk, timing considerations and administrative considerations.

Event date: 09/30/1995
Event: CA Responsibility Referred To A Non-RCRA Federal Authority, Corrective Action referred to another non-RCRA Federal Authority.

Event date: 07/01/1997
Event: CA Responsibility Referred To A Non-RCRA Federal Authority, Corrective Action referred to another non-RCRA Federal Authority.

Event date: 09/11/1997
Event: Igration of Contaminated Groundwater under Control, More information is needed to make a determination.

(Continued) **1000360944**

Event date: 09/11/1997
Event: Current Human Exposures under Control, More information is needed to make a determination.

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: TSD - Closure/Post-Closure
Date violation determined: 08/28/1987
Date achieved compliance: 04/01/1988

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

(Continued) **1000360944**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA ID:	WAD027550722
NAICS:	812320
SWC Desc:	Not reported
FWC Desc:	Not reported
Form Comm:	Farallon re-activated the WAD number to remove drums of DW soil and groundwater generated in late 2007. Ecology is currently reviewing a contained-in request for a portion of the soils generated in 2007 that contain low concentrations of PCE and/orTCE. Once the contained-in determination is issued Farallon will manage all waste soil and water per Ecology's requirements. The waste disposal activities will be the subject of the 2008 DW reporting year since no waste has been removed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/10/2015

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/21/2015

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing
A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 07/21/2015

Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 03/23/2015

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

COUNTY RECORDS

KING COUNTY:

Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985
Date Data Arrived at EDR: 11/07/1994
Date Made Active in Reports: N/A

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

North Map:	6005511 TACOMA NORTH, WA
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

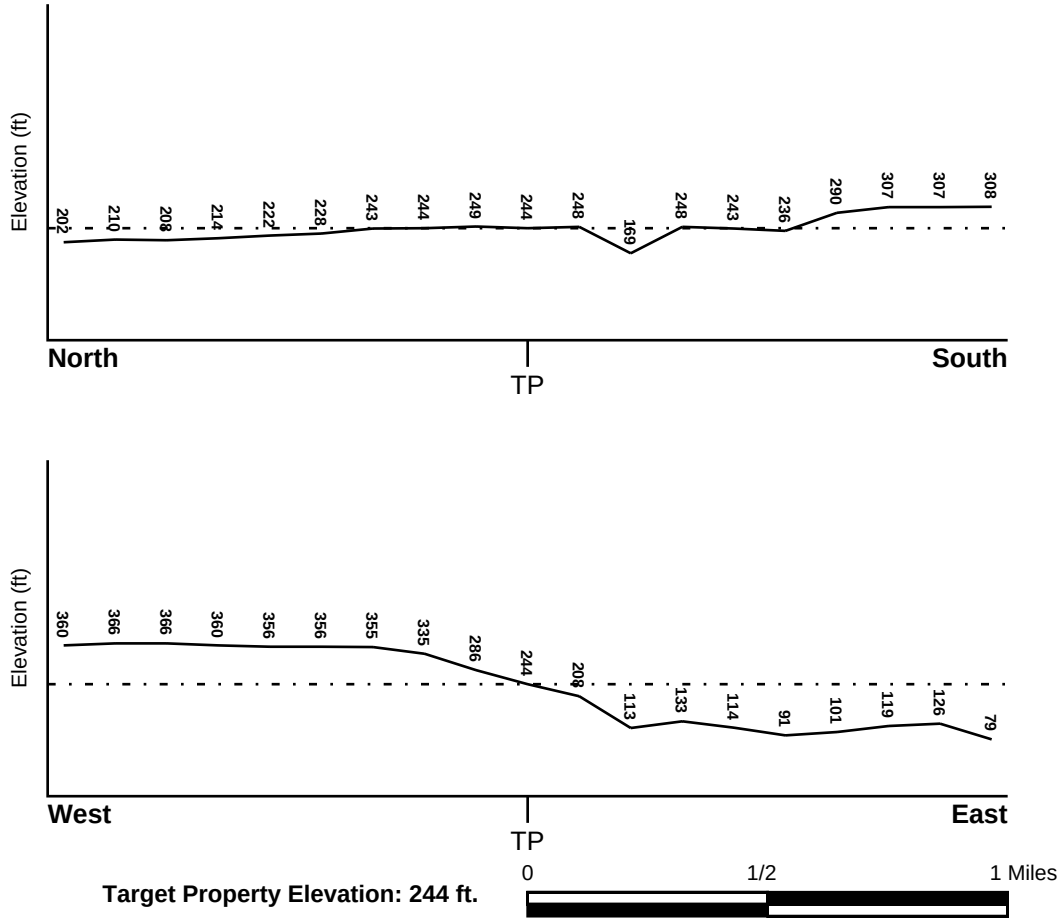
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
PIERCE, WA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property:	5301480025B - FEMA Q3 Flood data
Additional Panels in search area:	5301480020B - FEMA Q3 Flood data 5301480035B - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
TACOMA SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile ENE
Site Name:	TACOMA SPUR
Site EPA ID Number:	WAD980835789
Groundwater Flow Direction:	NE TOWARD THE CITY WATERWAY
Measured Depth to Water:	20 feet
Hydraulic Connection:	The shallow aquifer is tidally influenced. An upward hydraulic gradient exists in both the shallow and deep aquifers.
Sole Source Aquifer:	A sole source aquifer is not persent at or near the site
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
28	1/2 - 1 Mile NNE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	ALDERWOOD
Soil Surface Texture:	gravelly - sandy loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Moderately well drained. Soils have a layer of low hydraulic conductivity, wet state high in the profile. Depth to water table is 3 to 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	7 inches	gravelly - sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.10
2	7 inches	35 inches	very gravelly - loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.10
3	35 inches	39 inches	cemented	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
very gravelly - sandy loam

Surficial Soil Types: silt loam
very gravelly - sandy loam

Shallow Soil Types: very gravelly - loam

Deeper Soil Types: very gravelly - coarse sand
stratified
very gravelly - loamy sand
very gravelly - sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health
Telephone: 360-236-3148
Group A and B well locations.

Water Well Listing
Source: Public Utility District
Telephone: 206-779-7656
A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing
Source: Department of Natural Resources
Telephone: 360-902-1450
Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1800 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

Contact: Daweiler

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Robinson & Noble, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

APPENDIX D

Phase I ESA Questionnaire
Robinson Noble, Inc.
2105 South C Street
Tacoma, Washington 98402
Office: (253) 475-7711
Fax: (253) 472-5846

ROBINSON NOBLE

Project Name and Number: Tacoma Housing Authority Bay Terrace 2183-007F

Property Address: Parcel A 2505 - 2511 S Yakima Ave Parcel B 2501 – 2508 S Yakima Ave, Tacoma, WA

Parcel Number(s): Parcel A, 2025150011 and Parcel B, 2025140081

Conditional Statement for Phase I ESA User: *In order to qualify for the Landowner Liability Protection offered by the Small Business Relief and Brownfield Revitalization Act of 2001(the "Brownfields Amendments") the Phase I Environmental Site Assessment user must provide certain information requested by this questionnaire (if available) to the environmental professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.*

GENERAL INFORMATION

Instructions: *Please answer all questions to the fullest extent possible. Attach additional sheets if necessary.*

1) Please describe the subject property. Attach site diagram if available.

2025150011, Parcel A - .61 acres vacant land

2025140081, Parcel B – 1.01 acres vacant land

2) Please describe the surrounding properties as they are currently situated.

North: Commercial & Residential

South: Commercial

East: Multi-Family Residential

West: Residential

3) Please describe the history of the site and surrounding properties as far back as possible. Please indicate others (with contact information, if possible) that we may contact about the site and surrounding area's history.

The property was developed as multifamily housing in 1969. Prior to that we understand an auto service station had occupied the site.

4) Describe the type of heating and cooling used for the property, if applicable. (electric, gas, oil, or combination).

Prior to building demolition heating systems were electric wall mounted heaters

5) What types of chemicals or petroleum products are used on site? How are they stored? How are wastes disposed?

None -- property is vacant land

SITE SPECIFIC (AND SURROUNDING AREA) INFORMATION

6) Is there an on-site well or septic system?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain:

7) Have there ever been regulatory inspection, environmental or geotechnical studies conducted on the property? If yes, please describe and arrange for Robinson Noble to obtain (a) complete copy(ies).

Yes ☒ No ☐ Unknown ☐ If Yes, please explain: Geotech and environmental studies have been conducted at the site. Robinson Noble has current information

8) Is the property or adjoining properties currently used for industrial purposes?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

9) To the best of your knowledge, has the property or adjoining properties been used for an industrial purpose in the past?

Yes ☐ No ☐ Unknown ☒ If Yes, please explain: _____

10) Is the property or adjoining properties **currently** being used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

11) To the best of your knowledge has the property or adjoining properties been used **in the past** as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?

Yes ☒ No ☐ Unknown ☐ If Yes, please explain: Auto Service Station

12) Are there currently, or to the best of your knowledge, have there previously been any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19L) in volume or 50 gal. (190L) in the aggregate, stored on or used at the property or at the facility?

Yes ☐ No ☐ Unknown ☒ If Yes, please explain: _____

13) Has fill dirt been brought onto the property that originated from a contaminated site or that is of an unknown origin?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

14) Are there currently, or to the best of your knowledge, have there previously been, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?

Yes ☒ No ☐ Unknown ☐ If Yes, please explain: Geotech exploration uncovered the presence of hydrocarbon material. Location provided to Robinson Noble

15) Is there currently, or to the best of your knowledge, has there previously been, any stained soil on the property?

Yes ☒ No ☐ Unknown ☐ If Yes, please explain: Located at Geotech boring east of alley

16) Are there currently, or to the best of your knowledge, have there previously been, any registered or unregistered storage tanks (above or underground) located on the property?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

17) Are there currently, or to the best of your knowledge have there previously been, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

18) Are there currently, or to the best of your knowledge, have there previously been, any flooring drains or wells located on the property that are stained by substances other than water or are emitting foul odors?

Yes ☒ No ☐ Unknown ☐ If Yes, please explain: Same hydrocarbon substance as described above.

19) Does the property discharge waste water (other than storm water) on or adjacent to the property into a sewer system?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

20) To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the property?

Yes ☒ No ☐ Unknown ☐ If Yes, please explain: Same hydrocarbon substance as described above

21) Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?

Yes ☐ No ☐ Unknown ☒ If Yes, please explain: _____

GOVERNMENTAL OR PRIVATE RECORDS OR REPORTS

22) To the best of your knowledge, are there any environmental liens filed or recorded under federal, state, tribal or local law or any governmental notifications relating to past or recurrent violations of environmental laws with respect to the property?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain and attach copies: _____

23) To the best of your knowledge, are there any Activity and Land Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded under federal, state, tribal or local law?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain and attach copies: _____

24) In regards to environmental liens and AULs, did you retain a title company or title professional to undertake a review of reasonably ascertainable recorded land title and lien records for environmental liens and AULs relating to the property?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

25) To the best of your knowledge, has there been any past or current existence of hazardous substances, petroleum products, or environmental violations with respect to the property or any adjoining property?

Yes ☒ No ☐ Unknown ☐ If Yes, please explain: Same hydrocarbon substance as described above. See also ESA I & II reports from Robinson Noble dated 4/28/2011

26) Do you know of any environmental assessment that may have been conducted for this property that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?

Yes ☒ No ☐ Unknown ☐ If Yes, please explain: See ESA I & II reports from Robinson Noble dated 4/28/2011

27) Do you know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

PROPERTY VALUES

28) If the Phase I ESA is being completed in relation to a transaction involving the sale or purchase of a parcel of commercial real estate, to the best of your knowledge, does the purchase price for this property reasonably reflect the fair market value of the property?

Yes ☐ No ☐ Unknown ☐ Please explain: N/A

29) With regards to the question above, if you conclude there is a difference between the purchase price and the fair market value, with the purchase price being lower, have you considered whether the lower purchase price is because contamination is known or suspected to be present on the property?

Yes ☐ No ☐ Unknown ☐ Please explain: N/A

ADDITIONAL INFORMATION

30) Are there any environmental conditions that may have (or had) a potential for contamination on the property or adjacent properties that are not noted in this questionnaire? Please identify and/or advise Robinson Noble how we can obtain more information.

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

31) Do you have any specialized knowledge or experience relating to the property or nearby properties that has not been already covered by this questionnaire?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

32) Are you aware of any "commonly known" or reasonably ascertainable information concerning potential environmental conditions at or nearby the property? Are there any obvious indications of the presence or likely presence of contamination at or nearby the property?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

33) Can you provide the name of the previous property owners? When did you purchase the subject property? Do you have contact information for the previous owners?

Yes ☐ No ☒ Unknown ☐ If Yes, please explain: _____

COMMENTS

Comments: (Please include a complete explanation and include any supporting data you have. Please let us know anywhere that additional data may be obtained).

_____

Preparer represents that to the best of the preparer's knowledge, the above statements and facts are true and correct and to the best of the preparer's actual knowledge, no material facts have been suppressed or misstated. I have been associated with this property for 6 years and have knowledge of this property dating to 2009.

Notice of Segregation/Combination

TACOMA HOUSING AUTHORITY
902 S L ST
TACOMA, WA 98405-4037

7/14/2015

Parcel Number: 2025140081

Situs: 2501 TO 2508 YAKIMA AV, PIERCE COUNTY, WA

Dear Taxpayer:

A property segregation/combination has been completed resulting in a new parcel(s) of property. The new account information is summarized below. If the name and/or address is incorrect for tax purposes, please notify the office in writing. Please supply the parcel number and legal document number (excise tax affidavit number, auditor fee number, court order numbers, etc.). It is the taxpayer's responsibility to notify their lender of this segregation.

If you have any questions please contact our land segregation department at (253) 798-7264.

Legal Description
Section 08 Township 20 Range 03 Quarter 14 REEDS ADD PARCEL "A" OF CY OF TAC APPROVED COMB 5/21/15 DESC AS L 1 THRU 14 B 2514 COMB OF 001-3, 002-0, 004-1, 007-0 & 008-0 SEG 2016-0024 BB 7/14/15 BB

The values listed below are allocated from parent parcel values and may not represent true and fair market value.

APPEALS: You have the right to appeal the Assessor's determination of the allocation of value on your segregated parcels to the Pierce County Board of Equalization. Appeal forms (petitions) are provided by the Board and must be filed within 60 days of the date of this notice. Petitions received after those dates will be denied as not having been timely filed. A copy of this notice must be included in your appeal. For appeal information, contact the Board of Equalization at (253)798-7415.
