Hansville Landfill CMP Addendum.docx

MEMORANDUM

TO: John Keeling, Washington Department of Ecology

FROM: Dan Venchiarutti, SCS Engineers

SUBJECT: Addendum to the Hansville Landfill Compliance
Monitoring Plan (CMP)

Thank you for your timely review of SCS Engineer's work plan (*Compliance Monitoring Plan with Sampling & Analysis Plan (SAP) and Quality Assurance Plan (QAP), Remedial Action at the Hansville Landfill, Kitsap County, Washington*, dated September 15, 2011) which was prepared for monitoring the remedial actions being implemented at the closed Hansville Landfill site. Based on your comments to the draft CMP, the following subsection (Section 3.4) is appended to the final document:

Addendum: Section 3.4 – Sample Spilts/Field Duplicates

Consistent with Section X. (B) of the final amended consent decree (dated August 5, 2011), upon request, the Washington Department of Ecology (Ecology) and/or their authorized representative(s) are authorized to collect split or duplicate samples of any primary samples collected during the normal course of monitoring at the landfill. In a similar manner, Ecology will permit representative(s) of Kitsap County and/or Waste Management of Washington, Inc. (WMW), upon request, to collect split or duplicate samples of any additional primary samples obtained by Ecology pursuant to the implementation of the amended consent decree. The parties will coordinate in advance of the monitoring event to enable the efficient collection of environmental samples.

All sample splits or duplicate samples will be obtained using the procedures presented in Section 3.1.4 (Groundwater Sampling) and Section 3.2.4 (Surface Water Sampling) of the CMP for the collection of environmental samples. Laboratory methods, analytical detection limits and data deliverables will be the same as those utilized during the analysis of the primary samples. Field and analytical laboratory results for all sample splits and duplicate samples will be shared between Ecology, Kitsap County and WMW.
