Ecology has determined that no further action is necessary (at the Initial Investigation stage) due to independent remediation.

Ecology received the following reports:

- The Riley Group, Inc., 2016, Geophysical Survey and Preliminary Phase II Subsurface Investigation: Proposed Marysville Sonic, 3710, 3724, & 3806 116th St NE, Marysville, Snohomish County, Washington, 98271. February 10, 2016.

The above reports provide sufficient documentation that this cleanup was conducted to MTCA Method A cleanup levels for unrestricted land use. Mike Young, Snohomish Health District, has recommended no further action at this site, and Ecology concurs. This cleanup meets the eligibility criteria and individual provisions for Model Remedy 1, as defined in Ecology [Publication No. 15-09-043](#).
