PROJECT SUMMARY TABLE

Report Section	Acceptable	Routine Solution	Phase II	REC	Estimated Cost
Historical Review	No	Yes (1)		Yes	N/A (1)
Operational Activities	Yes				
Hazardous Materials / Petroleum Products	Yes				
Wastes	Yes				
Polychlorinated Biphenyls (PCBs)	Yes				
Asbestos-Containing Materials (ACM)	Yes				
Radon Gas	Yes				
Lead-Based Paint (LBP)	Yes				
Lead in Drinking Water	Yes				
Storage Tanks / Pipelines	Yes				
Surface Areas	Yes				
Mold	Yes				
Regulatory Review	No	Yes (2)		Yes	N/A (2)
Adjacent Properties	Yes				

Conditions noted in the Project Summary Table are representative of the overall conditions of the property. There may be more detail on specific assessment components in the report text, therefore the Project Summary Table should not be used as a stand alone document. Costs depicted are for investigation/program development activities. Remediation costs, if required, will be identified as a result of the activities.

Footnotes:

- (1) The Project and surrounding area were formerly occupied by bulk tank farms for petroleum products. Several ASTs and two USTs (one reportedly removed in 1994; one reportedly closed in place in 2006) were historically located on the Project, for which no removal/closure information was available during the course of this assessment. Contaminants, including: metals, methyl tertiary-butyl ether, non-halogenated solvents, gasoline, and polynuclear aromatic hydrocarbons, have been detected in soils and groundwater at the Project as well as several surrounding properties. EMG interviewed Mr. Paul Stemen, of Stemen Environmental, via telephone. According to Mr. Stemen, the Project and surrounding area were formerly occupied by several petroleum storage facilities. Mr. Stemen further indicated that these past operations have resulted in soil and groundwater contamination in the area. Mr. Stemen has reviewed several prior Phase I and Phase II reports that have been conducted at the Project, but was unable to provide copies to EMG. According to Mr. Stemen, several USTs were removed from the Project in 1994 and no USTs remain, with the exception of the UST that was closed in place under the current Project building. Stemen Environmental has been involved with the Project since it was discovered that soil and groundwater contamination was present beneath the Project. Stemen Environmental advanced several monitoring wells at the Project prior to 2006 to investigate impacts to the Project from the former USTs and past uses, and has since conducted bioremediation in the form of microbe injections. Mr. Stemen indicated that as of early 2011, contaminant concentrations in all but two monitoring wells had been reduced to below cleanup standards; however, construction and filling activities at a neighboring site led to clogging of the on-site wells and the migration of heavy oils. Stemen Environmental subsequently screened the wells, in order to filter out the heavy oils, and injected microbes in August 2011. According to Mr. Stemen, monitoring is scheduled to resume in September 2011. Mr. Stemen stated that the Project is currently enrolled in the Washington Department of Ecology (WDE) Voluntary Cleanup Program, and Stemen Environmental is in communication with the WDE regarding all remedial activities and sampling events. EMG recommends that on-site remedial activities continue until regulatory closure is obtained.

- (2) Based on review of the regulatory database report, Columbia Square Properties at 320 North Columbia, is listed on the ALLSITES, UST, CSCSL, VCP, and LUST databases. Information in the ALLSITES database indicates that this facility is listed in the LUST, UST, and VCP databases. Information in the UST database indicates that one UST was removed from this facility in 1996. Information in the CSCSL database indicates that contaminants at this facility include metals, non-halogenated solvents, petroleum products, and polynuclear aromatic hydrocarbons. Information in the VCP and LUST databases indicates that a release at this site in 1990 impacted soil and groundwater and cleanup has been started. Based on the proximity, there is potential for this site to have adversely impacted the environmental integrity of the Project. Based on the identification of a responsible party and the ongoing remediation, EMG recommends that Project ownership remain apprised of the status of this site until regulatory closure is obtained.

1 CERTIFICATION

EMG has completed a Phase I Environmental Site Assessment of the Phoenix Inn Suites - Olympia (the "Project"), located at 415 Capitol Way N in Olympia, Washington 98501. The assessment was performed at the Client's request, using the methods and procedures consistent with good commercial and customary practice designed to conform with acceptable industry standards.

The independent conclusions represent our professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, or their representative, has been assumed to be correct and complete. The conclusions presented are based on the data provided, observations, and conditions that existed on the date of the on-site visit.

In expressing the opinions stated in this report, EMG has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time-frame, given the same or similar facts and circumstances. Documentation and data provided by the Client, designated representatives of the Client, or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, have been used and referenced with the understanding that EMG assumes no responsibility or liability for their accuracy.

If you have any questions regarding this report, please contact the Senior Environmental Consultant listed on the Cover Page of this Report.

Reviewed By: 
Justin J. Arias
Senior Environmental Consultant

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Project. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Justin J. Arias - Senior Environmental Consultant

1.1 RELIANCE

This report is exclusively for the use and benefit of the Client identified on the first page of this report. The purpose for which this report shall be used shall be limited to the use as stated in the contract between the client and EMG.

In addition to Client , the following persons are entitled to rely on the report under the same conditions, and subject to the same limitations, as the Client:

Phoenix Inns Hotel Co. LLC, a Delaware limited liability company
Merrill Lynch L.P. Holdings, Inc., a Delaware corporation
PIH Olympia LLC, a Delaware limited liability company
Bank of America, N.A., as administrative agent for the lenders

This report is not for the use or benefit of, nor may it be relied upon by, any other person or entity, for any purpose without the advance written consent of EMG.

2.0 EXECUTIVE SUMMARY

EMG performed a Phase I Environmental Site Assessment, that included on-site observations of the accessible areas of the Phoenix Inn Suites - Olympia (the "Project"), on August 12, 2011. The Project is located at 415 Capitol Way N in Olympia, Washington 98501, and consists of approximately 1.38 acres.

The Project, originally constructed in 2000, is currently a hotel. Prior to the current use, the Project uses included: warehousing and boarding (1884 to 1891), fuel storage (1908), Olympia Feed Company and Associated Oil Company (1924 to 1984), and retail stores (1988 to 1998) prior to the development of the current Project improvements in 2000. Properties in the general vicinity of the Project include commercial and residential land uses.

The following statements summarize the independent conclusions representing EMG's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representatives, has been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

The assessment was conducted utilizing generally accepted Phase I industry standards, using the American Society for Testing and Materials (ASTM) Practice E 1527-05.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of 415 Capitol Way N in Olympia, Thurston County, Washington 98501. Any exceptions to, or deletions from, this practice are described in Section 3 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) or Historic Recognized Environmental Conditions (HRECs) in connection with the Project, except for the following:

Historical Review (Section 6)

- Contaminated soil and groundwater have been identified at the Project and surrounding area, resulting from historical uses as bulk petroleum storage facilities. Refer to the **Historical Review** heading in Section 2.1 for further discussion.

Regulatory Review (Section 9.1)

- Based on review of the regulatory database report, there is a property in the immediate vicinity of the Project that is listed on the ALLSITES, UST, CSCSL, VCP, and LUST databases and is actively undergoing remediation. Refer to the **Regulatory Review** heading in Section 2.1 for further discussion.

2.1 Findings and Conclusions

Historical Review

The Project and surrounding area were formerly occupied by bulk tank farms for petroleum products. Several ASTs and USTs (reportedly removed in 1994; one reportedly closed in place in 2006) were historically located on the Project. Contaminants, including: metals, methyl tertiary-butyl ether, non-halogenated solvents, gasoline, and polynuclear aromatic hydrocarbons, have been detected in soils and groundwater at the Project as well as several surrounding properties. EMG interviewed Mr. Paul Stemen, of Stemen Environmental, via telephone. According to Mr. Stemen, the Project and surrounding area were formerly occupied by several petroleum storage facilities. Mr. Stemen further indicated that these past operations have resulted in soil and groundwater contamination in the area. Mr. Stemen has reviewed several prior Phase I and Phase II reports that have been conducted at the Project, but was unable to provide copies to EMG. According to Mr. Stemen, several USTs were removed from the Project in 1994 and no USTs remain, with the exception of the UST that was closed in place under the current Project building. Stemen Environmental has been involved with the Project since it was

discovered that soil and groundwater contamination was present beneath the Project. Stemen Environmental advanced several monitoring wells at the Project prior to 2006 to investigate impacts to the Project from the former USTs and past uses, and has since conducted bioremediation in the form of microbe injections. Mr. Stemen indicated that as of early 2011, contaminant concentrations in all but two monitoring wells had been reduced to below cleanup standards; however, construction and filling activities at a neighboring site led to clogging of the on-site wells and the migration of heavy oils. Stemen Environmental subsequently screened the wells, in order to filter out the heavy oils, and injected microbes in August 2011. According to Mr. Stemen, monitoring is scheduled to resume in September 2011. Mr. Stemen stated that the Project is currently enrolled in the Washington Department of Ecology (WDE) Voluntary Cleanup Program, and Stemen Environmental is in communication with the WDE regarding all remedial activities and sampling events. EMG recommends that on-site remedial activities continue until regulatory closure is obtained.

Operational Activities

EMG observed no circumstances of environmental concern associated with the operational activities at the Project. No further action or investigation is recommended regarding operational activities at the Project.

Hazardous Materials / Petroleum Products

The Project is involved in the use of routine janitorial/maintenance supplies. The identified materials appear to be properly stored. The materials observed do not appear to pose a hazard to the Project, provided they continue to be used as designed, are properly handled, and all regulations regarding their use are followed. No further action or investigation is recommended regarding the use of these materials.

Wastes

The Project generates non-hazardous solid and liquid wastes. These materials appear to be stored and disposed of properly. No further action or investigation is recommended regarding these materials.

Polychlorinated Biphenyls (PCBs)

EMG identified utility-owned electrical transformer equipment at the Project. This equipment appeared to be in good condition with no evidence of leaks. The transformer is designated as the property of the public utility and not classified with regards to its PCB content. The utility is the financially responsible party for maintenance of this equipment. No further action or investigation is recommended regarding the transformer equipment.

The Project contains hydraulic elevator equipment. No indication of leakage was observed in the area of this equipment. This equipment should be periodically inspected for leakage. If leakage is identified, the unit should be repaired, and any fluid or fluid-soaked waste disposed of in accordance with applicable federal, state, and local regulations. No further action or investigation is recommended regarding this equipment.

Asbestos-Containing Materials (ACM)

Suspect non-friable ACM in the form of roofing materials and vinyl floor tile identified as part of the assessment were not sampled. These materials are in good condition and should be sampled prior to repair, renovation, or demolition activities. Otherwise, no further action or investigation is recommended regarding ACM at the Project.

Radon Gas

Review of the USEPA's Radon Map, indicated that the Project is located in Zone 1, areas with a predicted average indoor radon screening level greater than 4 pCi/L (picoCuries per liter of air). However, based on the type of construction, the presence of commercial HVAC systems, and the non-residential use of the Project, there is reduced potential for the build-up of radon gas at the Project. No further action or investigation is recommended with regard to radon gas levels at the Project.

Lead-Based Paint (LBP)

Considering the date of construction (2000), LBP is unlikely to have been used at the Project. No further action or investigation is recommended regarding LBP at the Project.

Lead in Drinking Water

Based on review of local water utility's most recent Water Quality Report, the water at the Project is not expected to contain elevated levels of lead. No further action or investigation is recommended regarding lead in drinking water at the Project.

Storage Tanks / Pipelines

No evidence of storage tanks or pipelines (above or below ground) was identified. No further action or investigation is recommended regarding storage tanks or pipelines at the Project.

Surface Areas

No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Project.

Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed. No further action or investigation is recommended regarding storm water systems at the Project.

Mold

EMG performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Project. No significant suspect mold and/or evidence of moisture was observed (i.e., beyond the presence of very small quantities at commonly found locations such as grout in bathtubs, shower lines and other frequently wet areas). No further action or investigation is recommended regarding mold at the Project.

Regulatory Review

Based on review of the regulatory database report, the Project is listed on the FINDS, UST, LUST, CSCSL, ALLSITES, and VCP databases. The FINDS database is merely a cross-referencing database and points to the other Project listings. The UST database indicates that a UST was reported as "closed in place" at the Project in 2006. No information regarding size or contents was reported. In addition, a fuel oil UST was reportedly removed from the Project in 1994. Information in the LUST database indicates that a release notification was submitted on March 23, 2006, which corresponds to the date the UST was reported as "closed in place". The

LUST database further indicates that soil and groundwater were impacted and cleanup was started in 2007. The Incident remains active. The CSCSL database indicates that contaminants at the Project consist of metals, methyl tertiary-butyl ether, non-halogenated solvents, gasoline, and polynuclear aromatic hydrocarbons. The ALLSITES database indicates that the Project is a LUST and VCP site. The VCP database indicates that the Project is enrolled in the Voluntary Cleanup Program and cleanup has been started. Additional information is discussed above, under the Historical Review heading.

Based on review of the regulatory database report, Columbia Square Properties at 320 North Columbia, is listed on the ALLSITES, UST, CSCSL, VCP, and LUST databases. Information in the ALLSITES database indicates that this facility is listed in the LUST, UST, and VCP databases. Information in the UST database indicates that one UST was removed from this facility in 1996. Information in the CSCSL database indicates that contaminants at this facility include metals, non-halogenated solvents, petroleum products, and polynuclear aromatic hydrocarbons. Information in the VCP and LUST databases indicates that a release at this site in 1990 impacted soil and groundwater and cleanup has been started. Based on the proximity, there is potential for this site to have adversely impacted the environmental integrity of the Project. Based on the identification of a responsible party and the ongoing remediation, EMG recommends that Project ownership remain apprised of the status of this site until regulatory closure is obtained.

Adjacent Properties

EMG identified no current adjacent property uses that are anticipated to have a negative impact on the environmental integrity of the Project. No further action or investigation is recommended regarding the adjacent properties as they are currently used.

2.2 Recommendations

EMG recommends that on-site remedial activities continue until regulatory closure is obtained.

- **Associated cost estimate:** Not Applicable

EMG recommends that Project ownership remain apprised of the status of the Columbia Square Properties site until regulatory closure is obtained.

- **Associated cost estimate:** Not Applicable

3 SURVEY APPROACH/PURPOSE

EMG conducted a Phase I Environmental Site Assessment of the Project that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives.

The user informed EMG that the reason for the assessment is for financing purposes.

On-site activities and/or interviews were conducted by Andrew Zahurak, EMG Project Manager, with:

- Mr. Michael Davidson, On-site Point of Contact (POC) and Sales Manager

A Key Site Manager Questionnaire was completed as a part of this assessment, which is included in Appendix D. The Questionnaire was completed with the POC. Information obtained from the Questionnaire has been used in the preparation of this report.

Areas accessed included:

- Guest room unit numbers: 207, 211, 324, 339, 346, and 349
- All common areas
- All exterior areas
- The roof
- The Project boundaries
- Mechanical rooms
- Pool equipment room
- Laundry room
- Maintenance/janitorial areas

Specific areas to which access was limited include the following:

- Occupied guest rooms
- Behind walls

According to the POC, the areas not assessed were similar in construction and conditions to the areas assessed. The POC also stated that he/she is unaware of any practices in the unaccessed areas (such as the improper handling of hazardous materials or the generation of hazardous, medical, or regulated wastes) that would constitute a material threat or release to the environment, or a hazard to human health. Based on a review of tenant activities and interviews with knowledgeable personnel, it is unlikely that the operations in the unaccessed areas have had an adverse impact on the environmental integrity of the Project.

Weather conditions at the time of the Project assessment were clear, with temperatures in the 70s (F) and light winds.

EMG reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Project that could have an adverse impact on the Project. In an attempt to determine whether historical uses of the Project and the surrounding area have had an environmental impact on the Project, EMG interviewed individuals knowledgeable about the Project and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analyses of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report), as they existed at the Project. The assessment was conducted utilizing generally accepted Phase I industry standards, set forth in the American Society for Testing and Materials (ASTM) Standard Practice E 1527-05. The Scope of Work included an evaluation of:

- The Project history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Project, as identified through review of reasonably ascertainable standard historical sources.

- The physical characteristics of the Project, as identified through review of reasonably ascertainable topographic data.
- Current Project conditions (as applicable), including compliance with appropriate regulations, as they pertain to the presence or absence of: facility storage tanks, drums, containers (above or below ground), etc., transformers and other electrical equipment which utilize fluid which may potentially contain PCBs, the use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes.
- An evaluation of information contained in programs such as the NPL, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Project. This evaluation was performed to identify sites that would have the potential to impact the environmental integrity of the Project. The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search that focuses on both the Project and neighboring sites that might impact the Project. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of ASTM Standard E 1527-05. The information provided is assumed to be correct and complete.
- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Project.

In addition, at the Client's request, the assessment included a screening approach for the potential existence of:

- The physical characteristics of the Project, as identified through review of reasonably ascertainable topographic, wetlands, flood plain, soils, geology, and groundwater data.
- Mold, including the identification of visible mold growth, conditions conducive for mold growth, and evidence of moisture in accessible areas of the Project. In addition, EMG interviewed Project personnel regarding any known or suspected mold contamination, water intrusion, or mildew like odor problems. Sampling was not performed as a part of this assessment. EMG notes that this assessment does not constitute a comprehensive mold survey of the Project, and the conclusions made are based solely on observable conditions in readily accessible interior areas of the Project on the assessment date.
- Asbestos, including the identification of all suspect materials in accessible areas (interior and exterior). These materials are considered suspect, until tested and proven otherwise. Friable materials are those that can be easily crumbled or pulverized by hand pressure.

This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition/renovation purposes, but it is intended to identify the potential for an asbestos hazard in accessible areas. This screening is not intended to be used for demolition, abatement, renovation, or repair work.

The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication *Managing Asbestos in Place* (the "Green Book"). Therefore, all materials listed in the Green Book that were installed prior to 1981, are considered suspect with the exception of resilient floor tile, asbestos-cement board (transite), and roofing felt, which are considered suspect, regardless of installation date (these materials continue to be manufactured and installed in the United States).

- Radon gas propensity, through the review of the USEPA's Map of Radon Zones for all properties.
- Lead-based paint for all properties constructed prior to 1978. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. Therefore, all paint applied prior to 1978 is considered suspect.

- Lead in water, based on information provided by the municipal water provider.

3.1 DATA GAPS

Data gaps in information exist and are addressed in the appropriate sections of this report. However, because the data gaps were not determined to be material in identifying Recognized Environmental Conditions (RECs), they are not considered by ASTM standards to be *significant* and, therefore, are not individually addressed in this section.

4 USER PROVIDED INFORMATION

This Section documents whether the user reported to EMG information pursuant to the responsibilities described in Section 6 of the ASTM Standard E 1527-05.

EMG submitted a User Questionnaire to the user to assist the user and EMG in gathering information from the user that may be material to identifying RECs. A copy of the User Questionnaire is appended (Section 11).

Litigation

Question: *Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?*

Response: The user responded "Unknown/No Response". The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Administrative Proceedings

Question: *Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?*

Response: The user indicated that he/she is aware of the following pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property:

- On-going remediation and monitoring

Notices From Governmental Entities

Question: *Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?*

Response: The user indicated that he/she is not aware of any notices regarding possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Environmental Cleanup Liens

Question: *Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?*

Response: The user responded "Unknown/No Response". The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Activity and Use Limitations

Question: *Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls, that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?*

Response: The user responded "Unknown/No Response". The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Specialized Knowledge

Question: *As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or of an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?*

Response: The user indicated that he/she does not have any specialized knowledge or experience related to the property or nearby properties.

Relationship of Purchase Price

Question: *Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?*

Response: The user responded "Unknown/No Response". The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Commonly Known Information

Question: *Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user:*

- *Do you know the past uses of the property?*
- *Do you know of specific chemicals that are present, or once were present, at the property?*
- *Do you know of spills or other chemical releases that have taken place at the property?*
- *Do you know of any environmental cleanups that have taken place at the property?*

Response: The user indicated he/she is not aware of any commonly known or reasonably ascertainable information about the Project that would help to identify conditions indicative of releases or threatened releases.

Obvious Indicators of Contamination

Question: *As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?*

Response: The user indicated that there are obvious indicators that point to the presence or likely presence of contamination at the Project. The user provided the following additional information:

- There is on-going remediation and monitoring

Environmental Lien and AUL Review

The user did not engage EMG to review title and judicial records for environmental liens or Activity and Use Limitations (AULs) recorded against the Project. Furthermore, these documents were not provided to EMG for review. The lack of or inability to obtain this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

5 PROJECT LOCATION/DESCRIPTION

The Project is located at 415 Capitol Way N in Olympia, Thurston County, Washington 98501. The Project lands consist of approximately 1.38 acres.

5.1 Project Description

The Project is currently a hotel and contains 102 units. The Project was constructed in 2000. Project improvements consist of one structure, landscaping, and surface-level asphalt paved parking/drive areas.

The Project is serviced by public water and sanitary sewer systems. The Project is supplied with water from the City of Olympia Water Department. Hot water is generated by natural gas-fired water heaters.

HVAC systems observed consisted of the following:

- Heat and air-conditioning are supplied to the Project from split systems with pad-mounted condensing units and natural gas-fired furnace/air handling units. Conditioned air is distributed via thermostatically controlled, ducted supply and return systems; and
- Air-conditioning is supplied to the Project via individual wall-mounted, electrically operated units.

5.2 Miscellaneous Systems

- **Emergency Generator** - One natural-gas fired emergency generator is located at the Project. Based on the type of fuel, the presence of this equipment is not anticipated to impact the environmental integrity of the Project negatively.
- **Hydraulic Elevator** - One hydraulic elevator is located at the Project. See Section 7.4 for a further discussion.

5.3 Environmental Setting

5.3.1 Topography

Review of the Tumwater, Washington Topographic Quadrangle, published by the United States Geological Survey (USGS) and dated 1959 (photorevised in 1994), indicated the following:

- The Project has an average elevation of approximately 10 feet above mean sea level. Elevations do not vary significantly across the Project lands.
- Slope in the general area of the Project is to the west. The nearest surface water feature, West Bay, is located approximately 200 feet west of the Project.
- The Project is shown as shaded to represent a high-density developed area, and the exact site improvements are not shown.

A copy of the topographic map is included in Appendix C.

5.3.2 Wetlands

Review of National Wetlands Inventory (NWI) data provided by the United States Fish and Wildlife Service, indicated the following:

- No wetland areas are indicated at the Project or adjacent properties.

A copy of the wetland map is included in Appendix C.

5.3.3 Floodplain

Review of the Flood Insurance Rate Map (Community/Panel No. 4 of 7), published by the Federal Emergency Management Agency (FEMA) and dated February 17, 2002, indicated the following:

- The Project is located in Zone C, areas outside the 1-percent annual chance floodplain, areas of 1% annual chance sheet flow flooding where average depths are less than 1 foot, areas of 1% annual chance stream flooding where the contributing drainage area is less than 1 square mile, or areas protected from the 1% annual chance flood by levees. No Base Flood Elevations or depths are shown within this zone. Insurance purchase is not required in these zones.

A copy of the flood zone map is included in Appendix C.

5.3.4 Soils/Geology

Review of the United States Department of Agriculture Soil Conservation Service Soil Survey Geographic Database (SSURGO) data, indicated the following:

- The urban land complex indicates that 100% percent of the predominant soil type has been disturbed and covered with an impervious layer consisting of buildings, sidewalks, streets, and other structures. The undisturbed areas of the complex retain the original soil characteristics.

Review of the 1:2,500,000 scale Geology of the Conterminous United States, published by the USGS and dated 1979, indicated the following:

- The Project is located within an area consisting of Basaltic materials from the Quaternary era.

5.3.5 Groundwater Hydrology

Review of the Groundwater Atlas of the United States, published by the USGS and the Washington State Department of Ecology online database, indicated the following:

- The Project is located within the Puget-Willamette Trough aquifer system aquifer formation with estimated groundwater levels between 5 and 10 feet below ground surface (bgs).

According to Mr. Paul Stemen, depth to shallow groundwater ranges from five to six feet. Mr. Stemen further indicated that shallow groundwater flow varies from east to northeast on the northern portion of the Project and southeast to southwest on the southern portion of the Project, based on tide level and retention rate of fill materials in the area.

Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

6 HISTORICAL REVIEW

Review of online information from the Thurston County Assessor Office website indicated that the Project is shown as Assessor Parcel Number 785001001300.

A copy of the tax map is included in Appendix C.

6.1 Chain of Title

Review of online information from the Thurston County Assessor Office website identified the current owner as PIH Olympia, LLC.

No prior ownership information was available online.

6.2 Prior Use Interviews

EMG met with Mr. Michael Davidson, On-site Point of Contact (POC) and Property Manager, who was cooperative and provided information that appeared to be accurate, based upon our subsequent site observations. It is EMG's opinion that the POC was knowledgeable about the Project and about questions EMG posed during the interview process. According to the POC, the Project was developed in 2000 into the current use. The POC stated that prior to the current use, the Project was a "Yardbirds" grocery store, and part of a tank farm for an oil company. The POC has been associated with the Project since 2000.

EMG also interviewed Mr. Paul Stemen, of Stemen Environmental, via telephone. According to Mr. Stemen, the Project and surrounding area was formerly occupied by several petroleum storage facilities. Mr. Stemen further indicated that these past operations have resulted in soil and groundwater contamination in the area.

Stemen Environmental has been involved with the Project since 2006, when it was discovered that soil and groundwater contamination was present beneath the Project. Stemen Environmental advanced several monitoring wells at the Project in 2007 and has since conducted bioremediation in the form of microbe injections. Mr. Stemen indicated that as of early 2011, contaminant concentrations in all but two monitoring wells had been reduced to below cleanup standards; however, construction and filling activities at a neighboring site led to clogging of the on-site wells and the migration of heavy oils. Stemen Environmental subsequently screened the wells, in order to filter out the heavy oils, and injected microbes in August 2011. According to Mr. Stemen, monitoring is scheduled to resume in September 2011, with no additional active remediation planned. Mr. Stemen stated that the Project is currently enrolled in the Washington Department of Ecology (WDE) Voluntary Remediation Program, and Stemen Environmental is in communication with the WDE regarding all remedial activities and sampling events.

6.3 Local and/or State Government Agency Record Review/Interviews

EMG submitted a written request for information to the City of Olympia Building Department. No response has been received to date. Upon receipt and review, any environmentally significant information not identified through other sources will be provided to the Client.

EMG submitted a written request for information to the City of Olympia Fire Department. No response has been received to date. Upon receipt and review, any environmentally significant information not identified through other sources will be provided to the Client.

The following information was identified at the City of Olympia Planning Department (OPD):

- Review of the available zoning records indicates that the Project is currently zoned Urban Waterfront. Prior to the current zoning designation the Project was zoned CW1 (commercial waterfront in 1995). According to the records, no additional zoning changes were listed for the Project.
- No environmentally significant information was identified.

6.4 Historical Maps

Historical Sanborn Maps:

Historical Sanborn maps are detailed scale drawings that show the location and use of buildings and structures that occupied a given area. EMG contacted Environmental Data Resources (EDR) in an attempt to determine if there were any historical Sanborn maps in the EDR Historic Map Collection covering the years 1867 to present. EMG's historical Sanborn map search results are discussed below.

Review of the 1884 historical Sanborn maps indicated the following:

- **Project:** The Project is shown as a portion of East Bay. Vehicular access is available from the south.
- **Off-site:** The areas north, east, and west of the Project are shown as portions of East Bay. The area south of the Project is shown as developed with numerous buildings marked "storage."

The 1888 and 1891 historical Sanborn maps differ from the previous historical map in that:

- **Project:** The Project is shown as developed with numerous commercial buildings. Notations on the map indicate a mineral and soda water factory. Vehicular access is available from the east and south.
- **Off-site:** The areas east and south of the Project are shown as occupied by numerous commercial buildings.

The 1908 historical Sanborn map differs from the previous historical maps in that:

- **Project:** A 5,000-gallon oil AST is shown on the southern portion of the Project.
- **Off-site:** The area south of the Project is shown as occupied by Olympia Gas and Power Company. Notations on the map indicate "oil for fuel and gas making."

The 1924 historical Sanborn map differs from the previous historical map in that:

- **Project:** The Project is shown as occupied by two railroad lines and Olympia Feed Company
- **Off-site:** The area north of the Project is shown as occupied by railroad lines and Olympia Canning Company. The area west of the Project is shown as occupied by railroad lines and a structure labeled "lime and cement."

The 1946 and 1947 historical Sanborn maps differ from the previous historical map in that:

- **Project:** The Project is shown as also occupied by Associated Oil Company.
- **Off-Site:** The area east of the Project is occupied by numerous commercial structures labeled Olympia Foundry, Midfield Packers, Feed and Grain Warehouse. The area south of the Project is occupied by Washington Gas and Electric Company.

The 1968 historical Sanborn map differs from the previous historical maps in that:

- **Off-site:** The area east of the Project is occupied by a parking lot. The area north of the Project is occupied by Sea-Mart Shopping Center.

Copies of representative historical Sanborn maps are included in Appendix C.

Historical Topographic Maps:

Historical topographic maps show the location of buildings and structures that occupied a given area, as well as other physical features. EMG reviewed historical topographic maps as available from online historical topographic map repositories, such as the Perry-Castaneda Map Library and the University of Alabama Map Library. EMG's historical topographic map search results are discussed below.

Review of the 1959 (photorevised 1994) historical topographic map indicated the following:

- **Project:** The Project is shown as shaded to represent a high-density developed area, and the exact site improvements are not shown.
- **Off-site:** The areas north, south, east, and west of the Project are shown as shaded, to represent a high-density developed area, and the exact site improvements are not shown.

A copy of the historical topographic maps is included in Appendix C.

6.5 City Directories

City directories have tenant listings by address and are researched at approximately five-year intervals, as available. EMG reviewed historical city directories at the City of Olympia library.

Project Listings:

This review revealed the following listings associated with the Project:

- **1936, 1941, 1946, 1949, 1954, 1958, and 1964** - The Project is listed as Harvey's Olympia Feed Company and Tidewater Oil Company;
- **1969, 1974, 1979, and 1984** - The Project is listed as Harvey's Olympia Feed Company;
- **1988 and 1993**- The Project address is listed as Yardbirds.
- **1998** - The Project address is listed as Stitchery and Pleating.
- **2003 and 2008** - The Project address is listed as Phoenix Inn Suites.

Adjacent Property Listings:

This review revealed the following environmentally significant listings associated with the adjacent properties:

- **1936 to 1979**- the adjacent property to the south is listed as numerous oil/gas companies (e.g., Natural Gas Company, Shell Oil Dock, Olympia Gas and Power Company, etc.). Refer to Section 9.1 for further discussion of this site.

Copies of the City Directories were not available due to copyright restrictions and/or library policy.

6.6 Aerial Photography

EMG contacted EDR in an attempt to determine if there were any historical aerial photographs available for the area of the Project. EMG's historical aerial search results are discussed below.

Review of the 1941 historical aerial photograph indicated the following:

- **Project:** The Project is shown as developed with apparent commercial structures. Vehicular access is available from the north, east, south, and west.
- **Off-site:** The area north of the Project is shown as vacant land. The areas east and south of the Project are shown as developed with apparent commercial structures. The area west of the Project is shown as a waterfront dock area.

The 1957 historical aerial photograph differs from the previous aerial photograph in that:

- **Off-site:** The areas north and west of the Project are shown as developed with apparent commercial structures.

The 1968, 1973, 1980, and 1990 historical aerial photographs differ from the previous aerial photograph in that:

- **Project:** The Project is shown as developed with a large commercial structure.
- **Off-site:** The area east of the Project is shown as vacant land.

The 2005 and 2006 historical aerial photographs differ from the previous aerial photographs in that:

- **Project:** The Project is shown as developed with the current improvements.
- **Off-site:** The area north of the Project is shown as vacant land. The areas east, south, and west of the Project are shown as developed similar to conditions observed during the site visit.

Copies of representative historical aerial photographs are included in Appendix C.

6.7 Previous Investigations

EMG previously conducted a Phase I Environmental Site Assessment of the Project in March 29, 2006. Pertinent information identified in that report is as follows:

- The Project was occupied by the current improvements at the time of the previous assessment.
- The Scope of Work for this previous assessment consisted of ASTM E 1527.
- The review of operations at the Project did not identify any significant environmental concerns.
- The Project was not involved in the use of hazardous materials, with the exception of routine janitorial and maintenance supplies. No environmental concerns were noted.
- The Project was not involved in the generation of hazardous, regulated, or medical waste. No environmental concerns were noted.
- Environmental sampling (lead paint, radon, asbestos, mold, etc.) was not performed.

- No evidence of current storage tanks or pipelines (above or below ground) was identified. No environmental concerns were noted.
- A fuel oil UST was identified at the Project in 1993. The UST apparently was used by a warehouse that formerly occupied the site. The UST was removed in 1994. The subsurface of the Project had been impacted by both on-site sources and regional contamination. The Project was currently undergoing subsurface investigations. EMG recommended that the ongoing subsurface investigations be completed along with the appropriate remediation.
- The Project was formerly occupied by a bulk tank farm for petroleum products. Several ASTs and two USTs were historically located on the Project in the past. In addition, the Project was formerly part of a larger petroleum contaminated site known as "Yardbirds Property." Soil and groundwater are adversely impacted by petroleum at both The Project and surrounding properties. The majority of the Yardbirds site had been remediated/closed with no further actions required by the WDE. However, the Project was currently in investigatory phase and the results, along with the investigation report, were pending. Subsequent to the report submittal, a remediation/groundwater monitoring period will likely be required to obtain NFA. Based on EMG's understanding of the Project, soil and groundwater contamination (BTEX, TPH) was limited to the Project's southern end. Groundwater contamination appeared limited to the Project boundary. Soil and groundwater were adversely impacted by petroleum at the Project. Exceedences to the WDE Method A cleanup levels had been properly reported to the WDE. Based on EMG's understanding of the issues, and information provided by Mr. Paul Stemen of Stemen Environmental (consultant), the likely remediation scenario was oxygen-enhancement/bioremediation, and groundwater monitoring for a period of 2-3 yrs. . The site had also been entered into the Voluntary Cleanup program, for the purposes of obtaining an NFA from the WDE. EMG recommends that the Project be remediated so that an NFA could be obtained from the WDE.

6.8 Plans and Specifications

As-built/renovation-site plans, drawings, or specifications were not available for review at the Project or local agency offices visited for this assessment.

6.9 Historical Summary

Based upon the historical review, the previous Project uses include commercial uses such as warehousing and boarding (1884 to 1891), fuel storage (1908), commercial use such as Olympia Feed Company and Associated Oil Company (1924 to 1984), and retail stores (1988 to 1998) prior to the development of the current Project improvements in 2000.

Review of historical information indicates that the Project and surrounding area were formerly occupied by bulk tank farms for petroleum products. Several ASTs and USTs (reportedly removed in 1994; one reportedly closed in place in 2006) were historically located on the Project. Contaminants, including: metals, methyl tertiary-butyl ether, non-halogenated solvents, gasoline, and polynuclear aromatic hydrocarbons, have been detected in soils and groundwater at the Project as well as several surrounding properties. EMG interviewed Mr. Paul Stemen, of Stemen Environmental, via telephone. According to Mr. Stemen, the Project and surrounding area were formerly occupied by several petroleum storage facilities. Mr. Stemen further indicated that these past operations have resulted in soil and groundwater contamination in the area. Mr. Stemen has reviewed several prior Phase I and Phase II reports that have been conducted at the Project, but was unable to provide copies to EMG. According to Mr. Stemen, several USTs were removed from the Project in 1994 and no USTs remain, with the exception of the UST that was closed in place under the current Project building. Stemen Environmental has been involved with the Project since it was discovered that soil and groundwater contamination was present beneath the Project. Stemen Environmental advanced several monitoring wells at the Project prior to 2006 to investigate impacts to the Project from the former USTs and past uses, and has since conducted bioremediation in the form of microbe injections. Mr. Stemen indicated that as of early 2011, contaminant concentrations in all

but two monitoring wells had been reduced to below cleanup standards; however, construction and filling activities at a neighboring site led to clogging of the on-site wells and the migration of heavy oils. Stemen Environmental subsequently screened the wells, in order to filter out the heavy oils, and injected microbes in August 2011. According to Mr. Stemen, monitoring is scheduled to resume in September 2011. Mr. Stemen stated that the Project is currently enrolled in the Washington Department of Ecology (WDE) Voluntary Cleanup Program, and Stemen Environmental is in communication with the WDE regarding all remedial activities and sampling events

EMG was not able to obtain standard historical sources that document the Project history in five year intervals. Furthermore, EMG was also not able to document the use of the Project back to the first developed use, or back to 1940, whichever is earlier. This data failure represents a data gap; however, this data gap is not considered a *significant* data gap, and therefore, it is not addressed in Section 3.1.

7 PROJECT RECONNAISSANCE

7.1 Operational Activities/Noteworthy Tenants

The Project is currently a hotel. No noteworthy tenants occupy the Project and no environmentally significant operations are conducted at the Project. Drycleaning is not conducted at that Project. Considering the operations assessed at the Project, no environmental permits, registrations, or notifications appear to be required.

7.2 Hazardous Materials/Petroleum Products Storage and Handling

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. The following hazardous materials were identified:

- Routine janitorial and maintenance supplies are present in retail-size containers and stored in designated areas. These materials are used for Project maintenance and upkeep.
- Swimming pool chemicals are present in retail-size containers and stored in designated areas. These materials are stored in the swimming pool maintenance room and are used for swimming pool water treatment.

The identified chemicals, materials, and products were observed in their sealed, original containers and in designated storage areas. Materials appeared to be properly stored. No evidence of spills or staining was observed. In addition, the concrete surfaces appeared intact, and no cracks were observed in the areas of product storage/usage.

7.3 Waste Generation, Treatment, Storage and Disposal

Visual observation for the generation, treatment, storage, and disposal of wastes was performed. The following wastes were identified:

- Municipal trash is stored in dumpsters and disposed of by a contracted waste hauler.
- Domestic sewage is disposed of to the municipal sanitary sewer system.

No evidence of spills or staining was observed in the area of waste generation or pre-disposal storage. In addition, the concrete surfaces appeared intact, and no cracks were observed in the areas of waste generation or pre-disposal storage.

Review of information available at the Project indicated that the waste disposal operations appear to be appropriate.

No excessive odors or overflowing/excessive ground trash were noted in the vicinity of the dumpsters. No hazardous, regulated, or medical wastes were noted in the dumpsters.

7.4 Polychlorinated Biphenyls (PCBs)

The Project is supplied with underground secondary electrical service from one pad-mounted electrical transformer. The transformer is designated as the property of the Puget Sound Energy, the public utility. The unit should be periodically inspected for leakage. If leakage is visible, the Project owner/manager should

contact the public utility, which will remediate the situation. Should the unit have to be replaced, the utility is responsible, provided the cause is equipment failure, not customer misuse. No leakage of the transformer was observed at the time of the assessment.

One hydraulic lift elevator is located at the Project. PCB-containing hydraulic fluid has not been manufactured since 1977. Therefore, based on the date of installation, PCB-containing hydraulic fluid is not likely to be found in the elevator operating system. No visual indication of leakage was observed in the area of the elevator operating equipment. The hydraulic elevator unit at the Project should be inspected periodically for leakage. If leakage is identified, the unit should be repaired, and any fluid or fluid-soaked waste should be disposed of in accordance with applicable federal, state, and local regulations.

7.5 Asbestos-Containing Materials (ACM)

As-built/renovation-site plans, drawings, or specifications were not available for review at the Project or local agency offices visited for this assessment.

Suspect non-friable ACM, in the form of roofing materials and vinyl floor tile were identified. These materials were observed to be in good condition.

No suspect friable or damaged non-friable materials were observed at the Project during the assessment; therefore, no samples were collected.

7.6 Radon Gas

Review of the USEPA's Radon Map for Thurston County, Washington indicated that the Project is located in Zone 1, areas with a predicted average indoor radon screening level greater than 4 pCi/L (picoCuries per liter of air). However, based on the type of construction, the presence of commercial HVAC systems, and the commercial use of the building, there is reduced potential for the build-up of radon gas in the building at the Project.

7.7 Lead-Based Paint (LBP)

The building at the Project was originally constructed in 2000. Generally, due to the date of construction (post-1977), the potential use of LBP was minimized due to regulatory requirements and sound business practice. Based on the date of construction, no suspect LBP was observed, and no samples were collected.

7.8 Lead in Drinking Water

Based on review of local water utility's most recent Water Quality Report, the water supplied to the Project is within federal, state, and local drinking water quality standards. In addition, the building was constructed after the 1986 ban on lead drinking water piping, lead solder, and flux on copper drinking water piping.

7.9 Facility Storage Tanks and Pipelines (above or below ground)

Visual observations for manways, vent pipes, fill connections, concrete pads, and saw cuts in paved areas did not identify any surface connections or disturbances that would indicate the potential for an underground storage tank (UST) installation at the Project.

No aboveground storage tanks (ASTs) were observed at the Project.

The manways and surface caps observed at the Project were for site services (i.e., domestic water, storm water, and sanitary sewer system).

Review of currently installed mechanical equipment identified the use of alternate fuel sources (i.e., electric, natural gas), thereby eliminating the need for on-site fuel storage at the Project.

Based on the review of the state list of registered USTs, no current USTs are registered for the Project; however, one UST is registered as "closed in place" in 2006. Additional information is discussed in Sections 6.9 and 9.1.

Interviews with persons knowledgeable of the Project (Mr. Paul Stemen) indicated that there are several historic ASTs and USTs associated with the Project. Additional information is discussed in Section 6.9.

Visual observations did not identify surface markings indicating the existence of subsurface product pipelines at the Project.

7.10 Surface Areas

Observations during EMG's assessment identified that the Project lands are graded to provide slope and swale to direct storm water away from the on-site building. Surface water flows in a westerly direction.

Visual observation of the Project and adjacent properties did not identify evidence of distressed vegetation, staining, or surface migration of petroleum releases or hazardous materials onto or off the Project.

Visual observations did not identify evidence of on-site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Project.

Visual observations did not identify surface water features, including lagoons, ponds, or other bodies of water at the Project.

Minor oil discharges were observed on the parking areas; however, the discharges are incidental in nature, and corrective action is neither practical nor warranted.

Storm water from the roof areas is directed to underground stormwater drains via internal drains. Storm water from drive and parking surfaces is directed to surface drains via sheet flow. Storm water from vegetated surface areas generally infiltrates into the subsurface.

At least nine monitoring wells were identified on the paved parking areas of the Project. The monitoring wells are flush-mounted with covers bolted to the outer casings. Visual observations noted that the well caps appear to be adequately secured. According to the POC, the monitoring wells were installed in order to investigate soil and groundwater impacts at the Project, based on the historical use of the Project. Additional information is discussed in Sections 6.9 and 9.1.

7.11 Mold

No significant suspect mold and/or evidence of moisture was observed (i.e., beyond the presence of very small quantities at commonly found locations such as grout in bathtubs, shower lines and other frequently wet areas).

This assessment does not constitute a comprehensive mold survey of the Project. The reported observations and conclusions are based solely on interviews with Project personnel and on conditions as observed in readily accessible interior areas of the Project on the assessment date.

8 INTERVIEWS

8.1 Key Site Manager

A Key Site Manager Questionnaire was completed as a part of this assessment, which is included in Appendix D. The Questionnaire was completed with the Key Site Manager, Mr. Michael Davidson. Information obtained from the Questionnaire has been used in the preparation of this report. The Key Site Manager is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws, or possible liability related to hazardous substances or petroleum products.

8.2 Owner

EMG submitted an Owner Questionnaire to the user in an effort to identify the owner of the Project who could be interviewed to provide information regarding proceedings involving the Project. The Owner Questionnaire was completed by Mr. Michael Davidson, designated representative of the owner. Mr. Davidson indicated that he was aware of pending, threatened, or past litigation, administrative proceedings, relevant to hazardous substances or petroleum products. Additional information is discussed in section 6.9.

8.3 User

EMG submitted a User Questionnaire in an effort to obtain information regarding proceedings involving the Project. Refer to Section 4, for discussion of the User Questionnaire.

8.4 Occupants

The Project is a hotel and contains no other tenants. Therefore, based on the ASTM Standard guidance, occupants were not interviewed.

The lack, of or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a significant data gap.

8.5 Past Owners, Operators, and Occupants

No past owners, operators, or occupants of the Project, who likely would have material information regarding the potential for contamination at the Project, were identified.

8.6 Owners or Occupants of Adjacent or Nearby Properties

The Project was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews were not conducted with adjacent or nearby property owners or occupants.

8.7 Interviews with Others

The following individuals were interviewed as part of this assessment:

Name and Title	Organization	Phone Number
Ms. Paula Smith	City of Olympia Planning and Building Departments	360.753.8087
Mr. Paul Stemen	Stemen Environmental	360.438.9521

9 REGULATORY DATABASE REVIEW

EMG obtained a regulatory database report from Environmental Data Resources, Inc. (EDR) in an effort to determine if the Project is a listed regulatory site and whether there are any mappable regulatory database sites. The regulatory database search was run in accordance with the Scope of Work for this assessment. In addition, EMG reviewed the unmappable sites in the database report, cross-referencing addresses and site names. Unmappable sites are environmental risk sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded because of inaccurate or missing location information in the record provided by the agency. A copy of the regulatory database report is included in Appendix F.

Based on review of the regulatory database report, and by cross-referencing name, address, and zip code, EMG concludes that the Project is a listed site. Details regarding any listings for the Project are discussed after the table below.

The search for sites listed on regulatory databases in the area surrounding the Project identified various sites within the specified search radii.

The following are some of the databases which were reviewed for this assessment. See the appended regulatory database report for a complete listing of databases reviewed for this assessment:

- **NPL** - The National Priority List (NPL) is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program.
- **Proposed NPL** - A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.
- **NPL LIENS** - Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability.
- **Delisted NPL** - In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.
- **CERCLIS** - The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) contains sites that are either proposed to or on the National Priorities List (NPL) and sites that are in the screening and assessment phase for possible inclusion on the NPL.
- **CERCLIS-NFRAP** - CERCLIS No Further Remedial Action Planned (NFRAP) sites are sites that the EPA has determined that no further steps will be taken to list the sites on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.
- **CORRACTS** - Corrective Action Report (CORRACTS) identifies hazardous waste handlers with RCRA corrective action activity.
- **RCRA-TSDF** - Resource Conservation and Recovery Act (RCRA) - Transporters, Storage and Disposal (TSDF) database includes information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA.
- **RCRA-LQG** - The RCRA - Large Quantity Generators (LQG) database includes information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

- **RCRA-SQG** - The RCRA - Small Quantity Generators (SQG) database includes information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month.
- **RCRA-CESQG** - The RCRA - Conditionally Exempt Small Quantity Generators (CESQG) database includes information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Conditionally exempt small quantity generators generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.
- **US ENG CONTROLS** - A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
- **US INST CONTROL** - A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.
- **ERNS** - The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances.
- **FINDS** - The Facility Index System (FINDS) contains both facility information and 'pointers' to other sources that contain more detail.
- **SWF** - The Solid Waste Facilities (SWF) database contains an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps.
- **LUST** - Leaking underground storage tank (LUST) records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.
- **UST** - Registered Underground Storage Tank (UST) facilities.
- **AST** - Registered Aboveground Storage Tank (AST) facilities.
- **US BROWNFIELDS** - This database contains information on brownfield sites.
- **SHWS** - The State of Washington does not maintain a SHWS database; therefore, the search distance for the CERCLIS database was extended to cover the appropriate distance that the SHWS database would have been searched.
- **CRL** - Confirmed Release List and Inventory (CRL) sites have been identified by the Oregon Department of Environmental Quality as facilities with confirmed releases.
- **VCP** - The Voluntary Cleanup Program (VCP) database contains properties with either confirmed or unconfirmed releases and the project proponents have requested that the Oregon Department of Environmental Quality (DEQ) oversee investigation and/or cleanup activities and have agreed to provide coverage for DEQ's costs.
- **SHWS** - The SHWS database contains a listing of sites within the Environmental Cleanup Site Information System (ESCI), maintained by the Oregon Department of Environmental Quality. These sites may be contaminated and might require cleanup.

9.1 Project Regulatory Database Discussion

Regulatory database listings for the Project are discussed below.

Phoenix Inn

415 Capitol Way

Databases Listed On: FINDS, UST, LUST, CSCSL, ALLSITES, and VCP

The FINDS database is merely a cross-referencing database and points to the other Project listings. The UST database indicates that a UST was reported as "closed in place" at the Project in 2006. No information regarding size or contents was reported. According to Mr. Paul Stemen, additional USTs were removed from the Project in 1994. Information in the LUST database indicates that a release notification was submitted on March 23, 2006, which corresponds to the date the UST was reported as "closed in place". The LUST database further indicates that soil and groundwater were impacted and cleanup was started in 2007. The Incident remains active. The CSCSL database indicates that contaminants at the Project consist of metals, methyl tertiary-butyl ether, non-halogenated solvents, gasoline, and polynuclear aromatic hydrocarbons. The ALLSITES database indicates that the Project is a LUST and VCP site. The VCP database indicates that the Project is enrolled in the Voluntary Cleanup Program and cleanup has been started. Additional information is discussed in Section 6.9.

9.2 Off-Site Regulatory Database Discussion

Adjacent and nearby off-site listed properties of environmental significance are discussed below. The remaining off-site properties are located over 500 feet from the Project. In addition, there are no open release cases located within 500 feet of the Project, and no open release cases located within 1,000 feet up-gradient of the Project, except as discussed below. Based on various factors such as distance, topographic relations, estimated groundwater flow direction, and/or regulatory status, the remaining off-site listed properties are not anticipated to have adversely impacted the environmental integrity of the Project.

Yardbirds Properties

500 Capitol Way N

Distance: Adjacent (adjusted)

Direction: North

Databases Listed On: UST, ICR, ALLSITES, VCP, and CSCSL NFA

Although the Project was formerly a part of this site, the database listings have been separated and the Project is considered its own entity. Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the west, which is parallel to the Project. The ALLSITES database indicates that this facility is listed as a UST, LUST, VCP, and State Cleanup site. Information in the UST database indicates that a steel UST was installed at this site in 1964. Information in the ICR database indicates petroleum products spilled from a tank impacted soil and groundwater at this site in 1994. An Interim Cleanup Report was submitted. The CSCSL NFA and VCP databases indicate that No Further Action (NFA) status was granted in 2003. Based on the estimated direction of groundwater flow and current regulatory status, this site is not anticipated to have adversely impacted the environmental integrity of the Project.

503 Capitol Way N

Distance: Approximately 55 feet (adjusted)

Direction: North

Databases Listed On: ALLSITES, VCP, and CSCSL NFA

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the west, which is parallel to the Project. Information in the ALLSITES database indicates that this site is listed as a VCP site. The CSCSL NFA and VCP databases indicate that NFA status was granted in 2002. Based on the estimated direction of groundwater flow and current regulatory status, this site is not anticipated to have adversely impacted the environmental integrity of the Project.

Columbia Place

115 Thurston Avenue NW

Distance: Approximately 175 feet

Direction: South

Database listed on: Manufactured Gas Plants

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the west, which is parallel to the Project. Information in the ALLSITES database indicates that the listing is associated with water quality sampling conducted as a part of construction activities. No environmentally significant information is provided in the database. Based on the estimated direction of groundwater flow, current regulatory status, and absence of any reported releases, this site is not anticipated to have adversely impacted the environmental integrity of the Project.

Olympia Gas and Power Co.

11503 Capitol Way N

Distance: Approximately 161 feet

Direction: North

Database listed on: Manufactured Gas Plants

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the west, which is parallel to the Project. No environmentally significant information is provided in the database. Based on the estimated direction of groundwater flow, current regulatory status, and absence of any reported releases, this site is not anticipated to have adversely impacted the environmental integrity of the Project.

Zeigler Welding

322 N. Capitol Way Avenue

Distance: Approximately 75 feet (adjusted)

Direction: Southeast

Databases Listed On: UST and ALLSITES

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the west, which is parallel to the Project. The ALLSITES database indicates that this site is a UST site. The UST database indicates that a UST was installed at this facility in 1964 and was closed in place in 1996. In addition this facility is not listed on any databases that would indicate a release (e.g., LUST database). Based on the estimated direction of groundwater flow, the regulatory status, and a lack of known and reported releases, this site is not anticipated to have adversely impacted the environmental integrity of the Project.

Columbia Square Properties

320 N Columbia

Distance: Approximately 100 feet (adjusted)

Direction: South

Databases Listed On: ALLSITES, UST, CSCSL, VCP, and LUST

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the west, which is parallel to the Project. Information in the ALLSITES database indicates that this facility is listed in the LUST, UST, and VCP databases. Information in the UST database indicates that one UST was removed from this facility in 1996. Information in the CSCSL database indicates that contaminants at this facility include metals, non-halogenated solvents, petroleum products, and polynuclear aromatic hydrocarbons. Information in the VCP and LUST databases indicates that a release at this site in 1990 impacted soil and groundwater and cleanup has been started. Based on the proximity, there is potential for this site to have adversely impacted the environmental integrity of the Project.

Unocal Bulk Plant

207 W. Olympia Avenue

Distance: Approximately 200 feet (adjusted)

Direction: South

Databases Listed On: LUST, UST, CSCSL, CSCSL NFA, ALLSITES, VCP

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the west, which is parallel to the Project. The ALLSITES database indicates that this facility is a Tier 2, UST, LUST, and hazardous waste site. Information in the CSCSL database indicates that cleanup has been started, soil and groundwater have been impacted, and contaminants include halogenated organics, petroleum products, and other hazardous substances. Information in the UST database indicates that five USTs were removed and two USTs were closed in place in 1996. The LUST and CSCSL NFA databases indicate that all three release Incidents have been cleaned up and granted NFA status. The VCP database also indicates that NFA status has been granted. Based on the estimated direction of groundwater flow and current regulatory status, this facility is not anticipated to have adversely impacted the environmental integrity of the Project.

10 ADJACENT PROPERTIES

The general vicinity of the Project consists of commercial and residential land uses. The following adjacent properties were identified:

- The Project is bordered to the north by Avenue A NW. Farther north is vacant land, currently under construction (500 Columbia Street NW).
- The Project is bordered to the south by Thurston Avenue NW. Farther south is Gardners Restaurant (111 Thurston Avenue NW) and vacant land (320 Columbia Street NW).
- The Project is bordered to the east by Capitol Way N. Farther east are the Boardwalk Apartments (410 Capitol Way N).
- The Project is bordered to the west by Columbia Street NW. Farther west are Wineloft restaurant (401 Columbia Street NW) and Olympia Seafood Company (411 Columbia Street NW).

The adjacent property use to the south was identified on the ALLSITES, UST, CSCSL, VCP, and LUST databases and has the potential to impact the environmental integrity of the Project. More information regarding these sites is included in the Regulatory Review discussion (Section 9.2).

Based on observations and available regulatory information, the remaining adjacent property uses are not anticipated to adversely impact the environmental integrity of the Project.

Questionnaires

KEY SITE MANAGER PRE-SURVEY QUESTIONNAIRE

Date: 08/12/2011
Name of person completing questionnaire: Mr. Michael Davidson
Company Name: Phoenix Inn Suites - Olympia
Association with the property: Sales Manager
Length of association with property: 11 years
Phone Number: 360.570.0555
Property Name/Address: 415 Capitol Way N, Olympia, Washington 98501
EMG Project Number: 98954.11R-003.135

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.

Note: U/NR indicates "Unknown" or "No Response", and "N/A" indicates not applicable.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1	Is the Project used for an industrial use?		X		
1B	Are any adjoining properties used for an industrial use?	X			
2a	To the best of your knowledge, has the Project been used for an industrial use in the past?	X			
2b	To the best of your knowledge, has any adjoining properties been used for an industrial use in the past?	X			
3a	Is the Project used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
3b	Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	X			
4a	To the best of your knowledge, has the Project been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	X			
4b	To the best of your knowledge, has any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	X			
5a	Are there currently any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Project?		X		
5b	To the best of your knowledge, have there been previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Project?	X			
6a	Are there currently any industrial drums (typically 55 gallon) or sacks of chemicals located on the Project?	X			
6b	To the best of your knowledge, have there been previously any industrial drums (typically 55 gallon) or sacks of chemicals located on the Project?	X			
7a	Are there currently any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Project?	X			
7b	To the best of your knowledge, have there been previously any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Project?	X			

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
8a	Has fill dirt been brought onto the Project which originated from a contaminated site?		X		
8b	Has fill dirt been brought onto the Project which is of an unknown origin?			X	
9a	Are there currently any pits, ponds or lagoons located on the Project in connection with waste treatment or waste disposal?		X		
9b	To the best of your knowledge, have there been previously any pits, ponds or lagoons located on the Project in connection with waste treatment or waste disposal?		X		
10a	Is there currently, any stained soil on the Project?			X	
10b	To the best of your knowledge, has there been previously any stained soil on the Project?	X			
11a	Are there currently any registered or unregistered storage tanks (above or underground) located on the Project?		X		
11b	To the best of your knowledge, have there been previously any registered or unregistered storage tanks (above or underground) located on the Project?	X			
12a	Are there currently any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Project or adjacent to any structure located on the Project?			X	
12b	To the best of your knowledge, have there been previously any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Project or adjacent to any structure located on the Project?			X	
13a	Are there currently any flooring, drains, or walls located at the Project that are stained by substances other than water or are emitting foul odors?		X		
13b	To the best of your knowledge, have there been previously any flooring, drains, or walls located at the Project that are stained by substances other than water or are emitting foul odors?		X		
14a	If the Project is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system?				Not Applicable.
14b	If the Project is served by a private well or non-public water system, has the well been designated as contaminated by any government environmental/health agency?				Not Applicable.
15a	Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Project or any facility located on the Project?	X			
15b	Have you been informed of the current existence of hazardous substances or petroleum products with respect to the Project or any facility located on the Project?	X			
16a	Are there any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the Project or any facility located on the Project?			X	
16b	Have you been informed of the past existence of environmental violations with respect to the Project or any facility located on the Project?			X	
16c	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on or from the property?			X	
16d	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?	X			
16e	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
17	Have there been any environmental site assessments of the Project that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Project or recommended further assessment of the Project?	X			
18	Does the Project discharge waste water on or adjacent to the project, other than storm water, into a storm water sewer system?		X		
19	Does the Project discharge waste water on or adjacent to the project, other than storm water, or into a sanitary system?		X		
20	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Project?		X		
21	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?			X	
22	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Project?		X		
23	Has there ever been any ACM testing conducted on the Project?			X	
24	Is there an asbestos Operations and Maintenance (O&M) program in place at the Project?		X		
25	Is there now or has there ever been any lead-based paint (LBP) applications on the Project?			X	
26	Has there ever been LBP testing conducted on the Project?			X	
27	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Project?		X		
28	Has the water at the Project ever been tested for lead?		X		
29	Has Radon testing ever been conducted at the Project?			X	
30	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of?	X			General maintenance and repair (i.e. broken AC units, holes in walls, etc.)
31	Is the Project or any portion of the Project located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species, etc.)?	X			
32	Do you know or suspect that mold was or is present in the building(s) or HVAC system? - If "Yes", proceed to question #33. - If "No", skip question #33 and proceed to question #34.		X		
33	Are there reliable procedures that specify the actions (i.e. operations and maintenance) to be taken to prevent and/or respond to mold or mold producing problems?				
34	Is there a mold Operations and Maintenance (O&M) program in place at the Project?		X		
35	Is the HVAC system inspected at least annually?	X			
36	Have identified HVAC problems been corrected in a timely manner?	X			
37	Is there now, or has there ever been evidence of mold or mildew present at the building(s)? If so, when?	X			
38	Is there now, or has there ever been any water damage in the building(s), whether from flooding, plumbing, roof leaks, or other sources? If so, when?	X			
39	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s)?		X

USER QUESTIONNAIRE

EMG has been retained to conduct a Phase I Environmental Site Assessment (ESA) of the following property. The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM 05 Scope of Work for this assessment, which documents certain User responsibilities, we are submitting this questionnaire to help you meet those responsibilities. Please complete this questionnaire and return via email or by fax to 410-785-6220 (within one business day of receipt).

Date: 08/29/2011
Name of person completing questionnaire: Mr. Michael Davidson
Company: Phoenix Inn Suites - Olympia
Length of association with property: 11 Years
Phone Number: 360.570.0555
Property Name/Address: 415 Capitol Way N, Olympia, Washington 98501
EMG Project Number: 98954.11R-003.135

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.

Note: U/NR indicates "Unknown" or "No Response", and "N/A" indicates not applicable.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?			X	
2	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?	X			On-going remediation and monitoring
3	Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
4	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?			X	
5	Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?			X	
6	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		X		
7	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?			X	
8	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user		X		
8a	Do you know the past uses of the property?		X		
8b	Do you know of specific chemicals that are present or once were present at the property?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
8c	Do you know of spills or other chemical releases that have taken place at the property?		X		
8d	Do you know of any environmental cleanups that have taken place at the property?		X		
9	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	X			On-going remediation and monitoring

OWNER QUESTIONNAIRE

EMG has been retained to conduct a Phase I Environmental Site Assessment (ESA) of the following property. The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM 05 Scope of Work for this assessment we are required to ask the following questions to the Owner or Owner representative. Please complete this questionnaire and return via email or by fax to 410-785-6220 (within one business day of receipt).

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-LQG site within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 2 RCRA-CESQG sites within approximately 0.125 miles of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 04/26/2011 has revealed that there are 49 CSCSL sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the SWF/LF list, as provided by EDR, and dated 06/22/2011 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the UST list, as provided by EDR, and dated 05/24/2011 has revealed that there are 6 UST sites within approximately 0.125 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 04/26/2011 has revealed that there are 12 CSCSL NFA sites within approximately 0.5 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 2 Manufactured Gas Plants sites within approximately 1 mile of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/16/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 08/29/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 06/14/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/12/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 07/15/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/02/2011
Date Data Arrived at EDR: 03/17/2011

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 06/15/2011	Source: Environmental Protection Agency

Number of Days to Update: 5	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010	Source: Department of Energy

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010	Source: EPA
Date Data Arrived at EDR: 11/10/2010	Telephone: 202-566-0500
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 07/22/2011
Number of Days to Update: 98	Next Scheduled EDR Contact: 10/31/2011
	Data Release Frequency: Annually

MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 03/18/2010	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/06/2010	Telephone: 301-415-7169
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 06/13/2011
Number of Days to Update: 51	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Quarterly

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/11/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/13/2011	Telephone: 202-343-9775
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 34	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (206) 553-1200
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 06/14/2011
Number of Days to Update: 41	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

COUNTY RECORDS

KING COUNTY:

Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985

TACOMA/PIERCE COUNTY:

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Resumes

JUSTIN ARIAS

Technical Report Reviewer

Education

- Bachelor of Science, Natural Resources and Environmental Sciences, University of Illinois, 2003

Project Experience

- ***Gasoline Service Station, Chicago, IL*** – Mr. Arias performed a Phase I Environmental Assessment for an existing gasoline service station. The service station had a documented Leaking Underground Storage Tank (LUST) Incident. A Phase II Subsurface Investigation was recommended and implemented by Mr. Arias. Levels were reported and the Underground Storage Tanks (USTs) and contaminated soil were removed.
- ***Retail Strip Center, Naperville, IL*** – Mr. Arias performed a Phase I Environmental Assessment for an existing strip center, which included an on-site dry cleaner. The dry cleaner had documented staining outside of the rear entrance. A Phase II Subsurface Investigation was recommended and implemented by Mr. Arias. Levels were reported and the appropriate cleanup monitoring was implemented.
- ***Industrial Building, Chicago, IL*** – Mr. Arias performed a Phase I Environmental Assessment for a 70,000 square foot industrial building. Mr. Arias' duties included the review of numerous prior reports and documentation, a review of historical information, and on-site activities. Historical research identified the former use of the property as an oil refining facility which formerly housed a number of USTs and bulk storage tanks. Mr. Arias' expertise and recommendations were highly valued by the client.
- ***Taxi Company, Chicago, IL*** – Mr. Arias conducted a Phase I Environmental Assessment at this three acre site, which included a review of historical information and on-site activities. This investigation identified a number on-site USTs, associated with a former on-site taxi company whose operations included repair, maintenance, and refueling. Identified on site were hazardous and regulated wastes and asbestos. Several areas of concern were identified and Phase II Subsurface Investigation, Asbestos Sampling, and Geotechnical Survey were subsequently recommended.
