Tim Mullin, LG  
VCP Site Manager  
Department of Ecology  
Toxics Cleanup Program, Southwest Region  
PO Box 47775  
Olympia, WA 98504-7775

**Re: Termination of VCP Agreement for the following Site:**

- **Site Name:** Mason County Transportation Cooperative
- **Site Address:** 3740 Shelton Springs Road, Shelton, Mason County, WA
- **Facility/Site No.:** 23634752
- **Cleanup Site ID:** 5731
- **VCP Project No.:** SW0579

Dear Mr. Mullin:

Mason County Transportation Cooperation (MCTC) is terminating the VCP Agreement governing Project No. SW0579. The Project involved the cleanup of the MCTC facility (Site). This notice is being provided in accordance with the terms of the Agreement. Based on that Agreement, Mason County Transportation understands that:

1. The effective date of termination will be the date Ecology receives this letter.
2. MCTC remains responsible for any costs incurred by Ecology under the Agreement before the effective date of termination.

At this time, MCTC, with the guidance of their environmental consultant (PBS Engineering and Environmental), is ready to terminate their involvement with the VCP. MCTC has completed interim cleanup actions and four consecutive quarters of groundwater monitoring with no reported contaminants of concern detected. MCTC has no plans to change ownership or Site use in foreseeable future. The MCTC facility is aware that inaccessible residual soil contamination (diesel up to a concentration of 21,000 milligrams per kilogram) is present on Site. MCTC is prepared to address the pockets of contamination if Site conditions change, and subsequently reapply to the VCP for opinion and closure.

If you have any questions about this notice, please contact me at 206.233.9639.

Sincerely,  
PBS Engineering and Environmental
