INGESTION: Single dose oral toxicity is considered to be low. No hazards anticipated from swallowing small amounts incidental to normal handling operations.

INHALATION: At room temperature, PMDI vapors are minimal due to low vapor pressure. However, certain operations may generate vapor or aerosol concentrations sufficient to cause irritation or other adverse effects. Excessive exposure may cause irritation to upper respiratory tract and lungs, and pulmonary edema (fluid in the lungs). May cause respiratory sensitization in susceptible individuals. MDI concentrations below the exposure guidelines may cause allergic respiratory reactions in individuals already sensitized. Symptoms may include coughing, difficult breathing and a feeling of tightness in the chest. Effects may be delayed. Decreased lung function has been associated with overexposure to isocyanates.

In confined or poorly ventilated areas, propane and isobutane vapors can readily accumulate and can cause unconsciousness and death due to displacement of oxygen (simple asphyxia). Excessive exposure may increase sensitivity to epinephrine and increase myocardial irritability (irregular heartbeats). Signs and symptoms of excessive exposure may be central nervous system effects. At air concentrations < 1000 ppm, propane exerts very little physiological action; at 100,000 ppm and above it may produce dizziness or other central nervous system effects. Signs and symptoms of central nervous system depression, in order of increasing exposure, are headache, dizziness, drowsiness, and unconsciousness, even death.

A single prolonged (hours) excessive inhalation exposure to dimethyl ether may cause serious adverse effects, even death. Excessive exposure may cause irritation to upper respiratory tract (nose and throat). Signs and symptoms of excessive exposure may be anesthetic or narcotic effects. In animals,

4. FIRST-AID MEASURES

EYE: Irrigate with flowing water immediately and continuously for 15 minutes. Consult medical personnel.

SKIN: Remove material from skin immediately by washing with soap and plenty of water, (warm water is preferable if readily available). Remove contaminated clothing and shoes while washing. Seek medical attention if irritation persists. An MDI skin decontamination study demonstrated that cleaning very soon after exposure is important, and that a polyglycol-based skin cleanser or corn oil may be more effective than soap and water.

INGESTION: If swallowed, seek medical attention. Do not induce vomiting unless directed to do so by medical personnel.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, oxygen should be administered by qualified personnel. Call a physician or transport to a medical facility.

NOTE TO PHYSICIAN: No specific antidote. Supportive care. Treatment based on judgment of the physician in response to reactions of the patient. May cause respiratory sensitization or asthma-like symptoms. Bronchodilators, expectorants, and antitussives may be of help. Respiratory symptoms, including pulmonary edema, may be delayed. Persons receiving significant exposure should be observed for 24-48 hours for signs of respiratory distress.

MATERIAL SAFETY DATA SHEET

GREAT STUFF Big Gap Filler

5. FIRE-FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASH POINT: -156F, -104C

METHOD USED: Estimated

AUTOIGNITION TEMPERATURE: NA

FLAMMABILITY LIMITS

LFL: NA

UFL: NA

HAZARDOUS COMBUSTION PRODUCTS: During a fire, smoke may contain the original material in addition to unidentified toxic and/or irritating compounds. Hazardous combustion products may include but are not limited to: nitrogen oxides, isocyanates, hydrogen cyanide, carbon monoxide, and carbon dioxide.

OTHER FLAMMABILITY INFORMATION: Product reacts with water. Reaction may produce heat and/or gases. Reaction may be violent. Container may rupture from gas generation in a fire situation. Violent steam generation or eruption may occur upon application of direct water stream to hot liquids. Dense smoke is produced when product burns. Spills of these organic liquids on hot fibrous insulations may lead to lowering of the autoignition temperatures possibly resulting in spontaneous combustion.

EXTINGUISHING MEDIA: Carbon dioxide, dry chemical, foam, water fog or fine spray. Alcohol resistant foams (ATC type) are preferred if available. General purpose synthetic foams (including AFFF) or protein foams may function, but much less effectively. Do not use direct water stream. May spread fire.

FIRE FIGHTING INSTRUCTIONS: Keep people away. Isolate fire area and deny unnecessary entry. Stay upwind. Keep out of low areas where gases (fumes) can accumulate. Water is not recommended but may be applied in very large quantities as a fine spray when other extinguishing agents are not available.

Contain fire water run-off if possible. Do not use direct water stream. May spread fire. Fight fire from protected location or safe distance. Consider use of unmanned hose holder or monitor nozzles. Use water spray to cool fire exposed containers and fire affected zone until fire is out. Immediately withdraw all personnel from area in case of rising sound from venting safety device or discoloration of the container. Move container from fire area if this is possible without hazard.

PROTECTIVE EQUIPMENT FOR FIRE FIGHTERS: Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, pants, boots, and gloves). Avoid contact with this material during fire fighting operations. If contact is likely, change to full chemical resistant clothing with SCBA. This will not provide sufficient fire protection; consider fighting fire from a remote location. For protective equipment in post-fire or non-fire clean-up situations, refer

6. ACCIDENTAL RELEASE MEASURES

PROTECT PEOPLE: Avoid any contact. Barricade area. Clear non-emergency personnel from area. Keep upwind of spill. Ventilate area of leak or spill. The area must be evacuated and reentered by persons equipped for decontamination. Use appropriate safety equipment. Ventilate area of leak or spill. If available, use foam to suppress vapors. For additional information, refer to "Exposure Controls/Personal Protection", MSDS Section 8. See Section 10, Stability and Reactivity.

MATERIAL SAFETY DATA SHEET

Page 4 of 8

3/17/2004

GREAT STUFF Big Gap Filler

PROTECT THE ENVIRONMENT: Contain liquid to prevent contamination of soil, surface water or ground water. Keep out of ditches, sewers, and water supplies. Should the product enter sewers or drains, it should be pumped into a covered, vented container; the cover should be placed loosely on the container but not made pressure tight. Move to a well-ventilated area. Emergency services may need to be called to assist in the cleanup operation.

CLEAN-UP: Supplies of suitable decontaminant should always be kept available. Absorb with material such as: sawdust, vermiculite, dirt, sand, clay, cob grit, Milsorb. Avoid materials such as cement powder. Collect material in suitable and properly labeled OPEN containers. Do not place in sealed container. Prolonged contact with water results in a chemical reaction which may result in rupture of the container. Place in: polylined fiber pacs, plastic drums, or properly labeled metal containers. Remove to a well ventilated area. Clean up floor areas. Attempt to neutralize by suitable decontaminant solution: Formulation 1: sodium carbonate 5-10%; liquid detergent 0.2-2%; water to make up to 100%. OR Formulation 2: Concentrated ammonia solution 3-8%; liquid detergent 0.2-2%; water to make up to 100%. If ammonia is used, use good ventilation to prevent vapor exposure. If you have any questions on how to neutralize call The Dow Chemical Company. Please refer to Disposal Information, MSDS Section 13. See Section 7 and 15 for more specific information.

7. HANDLING AND STORAGE

HANDLING: Avoid contact of this product with water at all times during handling and storage. Use only with adequate ventilation. Keep equipment clean. Use disposable containers and tools where possible. Do not eat, drink, or smoke in working area. Refer to Exposure Controls/Personal Protection, Section 8, of the MSDS.

STORAGE: Store in a dry place. Store between 32°F-90°F (0°-32°C). Keep containers tightly closed when not in use. Protect containers from physical abuse. Avoid direct sunlight. DO NOT incinerate aerosol can.

8. EXPOSURE CONTROL/PERSONAL PROTECTION

ENGINEERING CONTROLS: Use only with adequate ventilation. Provide general and/or local exhaust ventilation to control airborne levels below the exposure guidelines. Exhaust systems should be designed to move the air away from the source of vapor/aerosol generation and the people working at this point. Odor is inadequate warning of excessive exposure.

PERSONAL PROTECTIVE EQUIPMENT

EYE/FACE PROTECTION: Use chemical goggles.

SKIN PROTECTION Use protective clothing impervious to this material. Selection of specific items such as faceshield, gloves, boots, apron, or full-body suit will depend on operation. Remove contaminated clothing immediately, wash skin area with soap and water (warm water if available) and launder clothing before reuse. Items which cannot be decontaminated, such as shoes, belts and watchbands, should be removed and destroyed.

RESPIRATORY PROTECTION: Atmospheric levels should be maintained below the exposure guideline. When atmospheric levels may exceed the exposure guideline, use an approved air-purifying respirator equipped with an organic

MATERIAL SAFETY DATA SHEET

Page 5 of 8

3/17/2004

GREAT STUFF Big Gap Filler

vapor sorbent and a particle filter. For situations where the atmospheric levels may exceed the level for which an air-purifying respirator is effective, use a positive-pressure air-supplying respirator (airline or self-contained breathing apparatus). For emergency response or for situations where the atmospheric level is unknown, use an approved positive-pressure self-contained breathing apparatus.

EXPOSURE GUIDELINES(S):

Methylene bisphenyl isocyanate (MDI): ACGIH TLV is 0.005 ppm TWA and OSHA PEL is 0.02 ppm Ceiling.

Isobutane: ACGIH TLV and OSHA PEL are 800 ppm.

Propane: ACGIH TLV is 2500 ppm TWA and OSHA PEL is 1000 ppm.

Dimethyl Ether: ACGIH TLV is 1000 ppm TWA.

PELs are in accord with those recommended by OSHA, as in the 1989 revision of

9. PHYSICAL AND CHEMICAL PROPERTIES

Flash Point : -156°F (-104°C) (estimated)

Vapor Pres. (21°C/70°F) : 4210 mm HG

Specific Gravity : 1.1

VOC Content (g/L) : 158.1 grams/Litre

10. STABILITY AND REACTIVITY

CHEMICAL STABILITY: Stable under recommended storage conditions. See Section 7, Storage.

CONDITIONS TO AVOID: Avoid temperatures above 105F, 41C. Avoid temperatures below 75F, 24C. Can react with itself at temperatures above 320F, 160C. Product can decompose at elevated temperatures. Generation of gas during decomposition can cause pressure in closed systems. Pressure build-up can be rapid. Avoid moisture. Material reacts slowly with water, releasing carbon dioxide, which can cause pressure buildup and rupture of closed containers. Elevated temperatures accelerate this reaction.

INCOMPATIBILITY WITH OTHER MATERIALS: Avoid contact with acids, water, alcohols, amines, ammonia, bases, moist air, and strong oxidizers. Avoid contact with metals such as aluminum, brass, copper, galvanized metals, tin, zinc. Avoid contact with moist organic absorbents. Reaction with water will generate carbon dioxide and heat. Generation of gas can cause pressure buildup in closed systems. Avoid unintended contact with polyols. The reaction of polyols and isocyanates generate heat. Diisocyanates react with many materials and the rate of reaction increases with temperature as well as increased contact, these reactions can become violent. Contact is increased by stirring or if the other material mixes with the diisocyanate. Diisocyanates are not soluble in water and are denser than water and sink to the bottom, but react slowly at the interface. The reaction forms carbon dioxide gas and a layer of solid polyurea. See Hazardous Polymerization Section.

MATERIAL SAFETY DATA SHEET

Page 6 of 8

3/17/2004

GREAT STUFF Big Gap Filler

HAZARDOUS DECOMPOSITION PRODUCTS: Hazardous decomposition products depend upon temperature, air supply and the presence of other materials. Gases are released during decomposition.

HAZARDOUS POLYMERIZATION: Can occur. Polymerization can be catalyzed by: strong bases and water. Can react with itself at temperatures above 320F (160C).

11. TOXICOLOGICAL INFORMATION (See Section 3 for Potential Health Effects)

ACUTE:

SKIN: The LD50 for skin absorption in rabbits is > 2000 mg/kg.

INGESTION: The oral LD50 for rats is > 10,000 mg/kg.

MUTAGENICITY (EFFECTS ON GENETIC MATERIAL): Mutagenicity data on MDI are inconclusive. MDI was weakly positive in some in-vitro (test tube) studies; other in-vitro studies were negative. A mutagenicity study in animals was

DIMETHYL ETHER (115-10-6)

MUTAGENICITY

In vitro mutagenicity studies were positive. Animal mutagenicity studies were negative in some cases and positive in other cases.

12. ECOLOGICAL INFORMATION

ECOLOGICAL INFORMATION

ENVIRONMENTAL FATE

MOVEMENT & PARTITIONING: Based on information for MDI and polymeric MDI. In the aquatic or terrestrial environment, movement is expected to be limited by its reactivity with water forming predominantly insoluble polyureas.

DEGRADATION & PERSISTENCE: Based on information for MDI and polymeric MDI. In the aquatic and terrestrial environment, material reacts with water forming predominantly insoluble polyureas which appear to be stable. In the atmospheric environment, material is expected to have a short tropospheric half-life, based on calculations and by analogy with related diisocyanates.

ECOTOXICITY: Based on information for MDI and polymeric MDI. The measured ecotoxicity is that of the hydrolyzed product, generally under conditions maximizing production of soluble species. Material is practically non-toxic to aquatic organisms on an acute basis (LC50/EC50 > 100 mg/L in most sensitive species). The LC50 in earthworm *Eisenia foetida* is > 1000 mg/kg.

13. DISPOSAL CONSIDERATIONS

DISPOSAL CONSIDERATIONS (See Section 15 for Regulatory Information)

DISPOSAL: DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal methods must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator. THE DOW CHEMICAL COMPANY HAS NO CONTROL OVER THE MANAGEMENT PRACTICES OR MANUFACTURING

MATERIAL SAFETY DATA SHEET

GREAT STUFF Big Gap Filler

PROCESSES OF PARTIES HANDLING OR USING THIS MATERIAL. THE INFORMATION PRESENTED HERE PERTAINS ONLY TO THE PRODUCT AS SHIPPED IN ITS INTENDED CONDITION AS DESCRIBED IN MSDS SECTION 2 (Composition/Information On Ingredients).

FOR UNUSED & UNCONTAMINATED PRODUCT, the preferred options include sending to a licensed, permitted: recycler, reclaimer, incinerator or other thermal destruction device.

For additional information, refer to:

- Handling & Storage Information, MSDS Section 7. - Stability & Reactivity Information, MSDS Section 10.
- Regulatory Information, MSDS Section 15.

As a service to its customers, Dow can provide names of information resources to help identify waste management companies and other facilities which recycle, reprocess or manage chemicals or plastics, and that manage used drums. Telephone Dow's Customer Information Center at 800-258-2436 or 989-832-1556 for further details.

14. TRANSPORT INFORMATION

Consumer Commodity ORM-D

15. REGULATORY INFORMATION

NOTICE: The information herein is presented in good faith and believed to be accurate as of the effective date shown above. However, no warranty, expressed or implied is given. Regulatory requirements are subject to change and may differ from one location to another; it is the buyer's responsibility to ensure that its activities comply with federal, state or provincial, and local laws. The following specific information is made for the purpose of complying with numerous federal, state or provincial, and local laws and regulations. See other sections for health and safety information.

U.S. REGULATIONS

SARA 313 INFORMATION: This product contains the following subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

CHEMICAL NAME	CAS NUMBER
METHYLENE BIS (PHENYLISOCYANATE) (MDI)	000101-68-8
POLYMERIC DIPHENYLMETHANE DIISOCYANATE	009016-87-9

SARA HAZARD CATEGORY: This product has been reviewed according to the EPA "Hazard Categories" promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

PMDI/MDI
An immediate health hazard
A delayed health hazard

ISOBUTANE/PROPANE: A fire hazard

MATERIAL SAFETY DATA SHEET

Page 8 of 8

3/17/2004

GREAT STUFF Big Gap Filler

TOXIC SUBSTANCES CONTROL ACT (TSCA):

All ingredients are on the TSCA inventory or are not required to be listed on the TSCA inventory.

STATE RIGHT-TO-KNOW: The following product components are cited on certain state lists as mentioned. Non-listed components may be shown in the composition section of the MSDS.

CHEMICAL NAME	CAS NUMBER	LIST
Isobutane	75-28-5	MA, NJ, PA
Propane	74-98-6	MA, NJ, PA15.

REGULATORY INFORMATION

MA=Massachusetts Right to Know Substance List
NJ2=New Jersey Environmental Hazardous Substance
NJ3=New Jersey Workplace Hazardous Substance
PA1=Pennsylvania Hazardous Substance
PA3=Pennsylvania Environmental Hazardous Substance

OSHA HAZARD COMMUNICATION STANDARD: This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY ACT (CERCLA, or SUPERFUND): To the best of our knowledge, this product contains the following chemical subject to reporting under CERCLA.

Propane 100 lbs
Isobutane 100 lbs

CANADIAN REGULATIONS

WHMIS INFORMATION: The Canadian Workplace Hazardous Materials Information System (WHMIS) Classification for this product is:
D3 combustible liquid.

CANADIAN ENVIRONMENTAL PROTECTION ACT (CEPA):
All substances in this product are listed on the Canadian Domestic Substances List (DSL) or are not required to be listed.

16. OTHER INFORMATION

HMIS - H - F - R - PPE
2 - 4 - 1 - B

This product is a polyurethane blend in the form of a solution in liquid containing by weight 50% or more polymer.

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

* Black liquid. Ketone odor. Extremely flammable. Causes eye *
* irritation. May cause allergic respiratory reaction. May cause *
* allergic skin reaction. Toxic fumes released in fire situations. *
* May cause central nervous system effects. May cause anesthetic *
* effects. *

POTENTIAL HEALTH EFFECTS (See Section 11 for toxicological data.)

This section includes possible adverse effects which could occur
if this material is not handled in the recommended manner.

(Continued on page 2 , over)

* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: URETHANE PINCHWELD PRIMER NO 3 U413
Product Code: 34002

Effective Date: 01/15/04

Date Printed: 01/16/04

MSD: 005632

EYE: May cause moderate eye irritation which may be slow to heal.
May cause moderate corneal injury. Vapors may irritate eyes.

SKIN: Prolonged or repeated exposure may cause moderate skin irritation. Repeated contact may cause drying or flaking of skin. May cause allergic skin reaction in susceptible individuals. Animal studies have shown that skin contact with isocyanates may play a role in respiratory sensitization. A single prolonged exposure is not likely to result in the material being absorbed through skin in harmful amounts.

INGESTION: Single dose oral toxicity is considered to be low. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; swallowing amounts larger than that may cause injury.

INHALATION: Excessive vapor concentrations are attainable and could be hazardous on single exposure. Excessive exposure may cause respiratory irritation and central nervous system depression. Signs and symptoms of central nervous system depression, in order of increasing exposure, are headache, dizziness, drowsiness, and incoordination. Signs and symptoms of excessive exposure may be nausea and/or vomiting. May cause respiratory sensitization in susceptible individuals. MDI concentrations below the exposure guidelines may cause allergic respiratory reactions in individuals already sensitized. Symptoms may include coughing, difficult breathing and a feeling of tightness in the chest. Effects may be delayed. Impaired lung function (decreased ventilatory capacity) has been associated with overexposure to isocyanates. This material contains mineral and/or inorganic fillers. There is essentially no potential for inhalation exposure to these fillers incidental to industrial handling due to the physical state.

SYSTEMIC (OTHER TARGET ORGAN) EFFECTS:

For the components tested, effects have been reported on the following organs: blood, kidney, liver, lungs, testes, and upper respiratory tract. Signs and symptoms of excessive exposure may be anesthetic or narcotic effects.

CANCER INFORMATION:

Contains acetone, which did not cause cancer in laboratory animals. Lung tumors have been observed in laboratory animals exposed to aerosol droplets of MDI/Polymeric MDI (6 mg/m³) for their lifetime. Tumors occurred concurrently

(Continued on page 3)

* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: URETHANE PINCHWELD PRIMER NO 3 U413

Product Code: 34002

Effective Date: 01/15/04

Date Printed: 01/16/04

MSD: 005632

with respiratory irritation and lung injury. Current exposure guidelines are expected to protect against these effects reported for MDI.

TERATOLOGY (BIRTH DEFECTS): Contains methyl ethyl ketone and acetone which did not cause birth defects; other fetal effects occurred only at doses toxic to the mother. In laboratory animals, MDI/polymeric MDI did not produce birth defects; other fetal effects occurred only at high doses which were toxic to the mother.

REPRODUCTIVE EFFECTS: Contains acetone, which did not interfere with reproduction in animal studies.

4. FIRST AID

EYE: Irrigate with flowing water immediately and continuously for 15 minutes. Consult medical personnel.

SKIN: Wash off in flowing water or shower.

INGESTION: If swallowed, seek medical attention. Do not induce vomiting unless directed to do so by medical personnel.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, oxygen should be administered by qualified personnel. Call a physician or transport to a medical facility.

NOTE TO PHYSICIAN: May cause respiratory sensitization or asthma-like symptoms. Bronchodilators, expectorants and antitussives may be of help. Respiratory symptoms, including pulmonary edema, may be delayed. Persons receiving significant exposure should be observed 24-48 hours for signs of respiratory distress. No specific antidote. Treatment based on judgment of the physician in response to reactions of the patient.

5. FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASH POINT: 12 F

METHOD USED: Setaflash

EXTINGUISHING MEDIA: Carbon dioxide, dry chemical, foam.

SPECIAL FIRE FIGHTING PROCEDURES: Fire fighters should wear self-

(Continued on page 4 , over)

* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: URETHANE PINCHWELD PRIMER NO 3 U413
Product Code: 34002

Effective Date: 01/15/04 Date Printed: 01/16/04 MSD: 005632

contained breathing apparatus.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Vapors are heavier than air and may travel along the ground or by ventilation duct to ignition sources far from material handling point. Extremely flammable.

6. ACCIDENTAL RELEASE MEASURES (See Section 15 for Regulatory Information)

PROTECT PEOPLE: Clear non-emergency personnel from area. Use appropriate safety equipment. Eliminate all sources of ignition in vicinity of spill to avoid fire or explosion. For additional information, refer to "Exposure Controls/Personal Protection", MSDS section 8.

PROTECT THE ENVIRONMENT: Contain material to prevent contamination of soil, surface water or ground water.

CLEAN-UP: Contain spill if possible. Absorb with material such as cat litter, sand or sawdust. Clean up using tools which will not produce sparks. See "Disposal Considerations", MSDS section 13 for information on disposal.

7. HANDLING AND STORAGE

HANDLING & STORAGE: Extremely flammable. Keep from heat, sparks, and flame. Use appropriate grounding equipment while handling this material. Store indoors in tightly closed containers between 50-95 F.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

These precautions are suggested for conditions with high potential for exposure. If handling procedures are such that there is only a low potential for exposure, less protection may be needed. Emergency conditions may require additional precautions.

ENGINEERING CONTROLS: Provide general and/or local exhaust ventilation to control airborne levels below the exposure guidelines. Use only with adequate ventilation. The odor and irritancy of this material are inadequate to warn of excessive exposure. Exhaust systems should be designed to move the air away from the source of vapor-aerosol generation and people working at this point.

PERSONAL PROTECTIVE EQUIPMENT:

(Continued on page 5)

* OR (R) INDICATES A TRADEMARK OF THE DOW CHEMICAL COMPANY

Product: URETHANE PINCHWELD PRIMER NO 3 U413
Product Code: 34002

Effective Date: 01/15/04 Date Printed: 01/16/04 MSD: 005632

EYE/FACE PROTECTION: Use chemical goggles. If vapor exposure causes eye discomfort, use a full-face respirator.

SKIN PROTECTION: Use protective clothing impervious to this material. Selection of specific items such as faceshield, gloves, boots, apron, or full body suit will depend on operation. Remove contaminated clothing immediately, wash skin area with soap and water, (warm water if available) and launder clothing before reuse. Items which cannot be decontaminated, such as shoes, belts and watchbands, should be removed and destroyed.

RESPIRATORY PROTECTION: Atmospheric levels should be maintained below the exposure guideline. When atmospheric levels may exceed the exposure guideline, use an approved air-purifying respirator equipped with an organic vapor sorbent and a particle filter. For situations where the atmospheric levels may exceed the level for which an air-purifying respirator is effective, use a positive-pressure air-supplying respirator (airline or self-contained breathing apparatus). For emergency response or for situations where the atmospheric level is unknown, use an approved positive-pressure self-contained breathing apparatus.

EXPOSURE GUIDELINES: Methyl ethyl ketone (2-BUTANONE): ACGIH TLV is 200 ppm TWA, 300 ppm STEL. OSHA PEL is 200 ppm TWA.

ACETONE: ACGIH TLV is 500 ppm (1188 mg/m³) TWA, 750 ppm (1782 mg/m³) STEL. OSHA PEL is 1000 ppm (2400 mg/m³) TWA.

METHYLENE BISPHENYL ISOCYANATE (MDI): ACGIH TLV is 0.005 ppm TWA and OSHA PEL is 0.02 ppm ceiling.

PELs are in accord with those recommended by OSHA, as in the 1989 revision of PELs.

Although some of the fillers used in this product may have exposure guidelines, no exposure would be expected under normal handling conditions because of the physical state of the material.

9. PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE/PHYSICAL STATE: Black liquid

Product: URETHANE PINCHWELD PRIMER NO 3 U413
 Product Code: 34002

Effective Date: 01/15/04 Date Printed: 01/16/04 MSD: 005632

it is the buyer's responsibility to ensure that its activities comply with federal, state or provincial, and local laws. The following specific information is made for the purpose of complying with numerous federal, state or provincial, and local laws and regulations. See other sections for health and safety information.

U.S. REGULATIONS

SARA 313 INFORMATION: This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

CHEMICAL NAME	CAS NUMBER	CONCENTRATION		
METHYL ETHYL KETONE	000078-93-3	35	-45	%
METHYLENE BIS(PHENYLISOCYANATE) (MDI)	000101-68-8		<5	%
POLYMERIC DIPHENYLMETHANE DIISOCYANATE	009016-87-9	15	-25	%

SARA HAZARD CATEGORY: This product has been reviewed according to the EPA "Hazard Categories" promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

- An immediate health hazard
- A delayed health hazard
- A fire hazard

TOXIC SUBSTANCES CONTROL ACT (TSCA):

All ingredients are on the TSCA inventory or are not required to be listed on the TSCA inventory.

STATE RIGHT-TO-KNOW: The following product components are cited on certain state lists as mentioned. Non-listed components may be shown in the composition section of the MSDS.

OSHA HAZARD COMMUNICATION STANDARD:

This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY ACT (CERCLA, or SUPERFUND):

This product contains the following substance(s) listed as "Hazardous Substances" under CERCLA which may require reporting of releases:

Category:

Chemical Name	CAS#	RQ	% in Product
METHYL ETHYL KETONE	000078-93-3	5000 lbs	35-45%
ACETONE	000067-64-1	5000 lbs	10-20%
MDI, 4,4'-isomer, free	000101-68-8	5000 lbs	< 5%

CANADIAN REGULATIONS

=====

Product: URETHANE PINCHWELD PRIMER NO 3 U413

Product Code: 34002

Effective Date: 01/15/04

Date Printed: 01/16/04

MSD: 005632

REGULATORY INFORMATION (CONTINUED)

WHMIS INFORMATION: The Canadian Workplace Hazardous Materials Information System (WHMIS) Classification for this product is:

- B2 - flammable liquid with a flash point less than 37.8C
- D2A - possible, probable or known human carcinogen according to classifications by IARC or ACGIH
- D2A - respiratory tract sensitizer
- D2B - eye or skin irritant
- D2B - skin sensitizer

Refer elsewhere in the MSDS for specific warnings and safe handling information. Refer to the employer's workplace education program.

CPR STATEMENT: This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

HAZARDOUS PRODUCTS ACT INFORMATION: This product contains the following ingredients which are Controlled Products and/or on the Ingredient Disclosure List (Canadian HPA section 13 and 14):

COMPONENTS:	CAS #	AMOUNT (%w/w)
METHYL ETHYL KETONE	000078-93-3	35-45
ACETONE	000067-64-1	10-20
POLYMETHYLENEPOLYPHENYLENE ISOCYANATE	009016-87-9	15-25
MDI, 4,4'-ISOMER, FREE	000101-68-8	0.1-1,1-5
CARBON BLACK	001333-86-4	0.1-1,1-5
SILICA, QUARTZ	014808-60-7	0.1-1

Multiple ranges allow for variations in product composition due to variations in the manufacture of the product.

CAS#	LD50 Oral mg/kg	LD50 Dermal mg/kg	LC50 Inhal. ppm

SECTION 2

COMPOSITION / INFORMATION ON INGREDIENTS

Reportable Hazardous Substance(s) or Complex Substance(s)

Name	CAS#	Concentration*
ZINC DITHIOPHOSPHATE	68649-42-3	< 2.5%

* All concentrations are percent by weight unless material is a gas. Gas concentrations are in percent by volume.

SECTION 3

HAZARDS IDENTIFICATION

This material is not considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

POTENTIAL HEALTH EFFECTS

Excessive exposure may result in eye, skin, or respiratory irritation. Low order of toxicity. High-pressure injection under skin may cause serious damage.

NFPA Hazard ID: Health: 0 Flammability: 1 Reactivity: 0
HMIS Hazard ID: Health: 0 Flammability: 1 Reactivity: 0

NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

SECTION 4

FIRST AID MEASURES

Product Name: CAT DEO 15W-40 (DIESEL ENGINE OIL)
Revision Date: 12Jul2005
Page 2 of 8

INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

SKIN CONTACT

Wash contact areas with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

SECTION 5 FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO₂) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

FIRE FIGHTING

Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Incomplete combustion products, Aldehydes, Oxides of carbon, Smoke, Fume, Sulfur oxides

FLAMMABILITY PROPERTIES

Flash Point [Method]: >215°C (419°F) [ASTM D-92]

Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0

Autoignition Temperature: N/D

SECTION 6 ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. U.S. regulations require reporting releases of this material to the environment which exceed the reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National

Product Name: CAT DEO 15W-40 (DIESEL ENGINE OIL)
Revision Date: 12Jul2005
Page 3 of 8

Response Center can be reached at (800)424-8802.

SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Recover by pumping or with suitable absorbent.

Water Spill: Confine the spill immediately with booms. Stop leak if you can do it without risk. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

SECTION 7	HANDLING AND STORAGE
------------------	-----------------------------

HANDLING

Avoid contact with used product. Prevent small spills and leakage to avoid slip hazard.

Static Accumulator: This material is a static accumulator.

STORAGE

Do not store in open or unlabelled containers.

SECTION 8	EXPOSURE CONTROLS / PERSONAL PROTECTION
------------------	--

Exposure limits/standards for materials that can be formed when handling this product: When mists / aerosols can occur, the following are recommended: 5 mg/m³ - ACGIH TLV, 10 mg/m³ - ACGIH STEL, 5 mg/m³ - OSHA PEL.

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:
No special requirements under ordinary conditions of use and with adequate ventilation.

PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use

Product Name: CAT DEO 15W-40 (DIESEL ENGINE OIL)

Revision Date: 12Jul2005

Page 4 of 8

with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

No special requirements under ordinary conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Work conditions can greatly effect glove durability; inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

No protection is ordinarily required under normal conditions of use.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

No skin protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

ENVIRONMENTAL CONTROLS

See Sections 6, 7, 12, 13.

SECTION 9

PHYSICAL AND CHEMICAL PROPERTIES

Typical physical and chemical properties are given below. Consult the Supplier in Section 1 for additional data.

GENERAL INFORMATION

Physical State: Liquid

Color: Amber

Odor: Characteristic

Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 15 °C): 0.826

Flash Point [Method]: >215°C (419°F) [ASTM D-92]

Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0

Autoignition Temperature: N/D

Boiling Point / Range: > 316°C (600°F)

Vapor Density (Air = 1): N/D

Vapor Pressure: [N/D at 20 °C]

Product Name: CAT DEO 15W-40 (DIESEL ENGINE OIL)

Revision Date: 12Jul2005

Page 5 of 8

Evaporation Rate (n-butyl acetate = 1): N/D

pH: N/A

Log Pow (n-Octanol/Water Partition Coefficient): > 3.5

Solubility in Water: Negligible

Viscosity: 115.5 cSt (115.5 mm²/sec) at 40 °C | 15 cSt (15 mm²/sec) at 100°C

Oxidizing Properties: See Sections 3, 15, 16.

OTHER INFORMATION

Freezing Point: N/D

Melting Point: N/A

Pour Point: < -27°C (-17°F)

DMSO Extract (mineral oil only), IP-346: < 3 %wt

SECTION 10	STABILITY AND REACTIVITY
-------------------	---------------------------------

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

MATERIALS TO AVOID: Strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

SECTION 11	TOXICOLOGICAL INFORMATION
-------------------	----------------------------------

ACUTE TOXICITY

Route of Exposure	Conclusion / Remarks
Inhalation	
Toxicity (Rat): LC50 > 5000 mg/m ³	Minimally Toxic. Based on test data for structurally similar materials.
Irritation: No end point data.	Negligible hazard at ambient/normal handling temperatures. Based on assessment of the components.
Ingestion	
Toxicity (Rat): LD50 > 2000 mg/kg	Minimally Toxic. Based on test data for structurally similar materials.
Skin	
Toxicity (Rabbit): LD50 > 2000 mg/kg	Minimally Toxic. Based on test data for structurally similar materials.
Irritation (Rabbit): Data available.	Negligible irritation to skin at ambient temperatures. Based on test data for structurally similar materials.
Eye	
Irritation (Rabbit): Data available.	May cause mild, short-lasting discomfort to eyes. Based on test data for structurally similar materials.

CHRONIC/OTHER EFFECTS

For the product itself:

Diesel engine oils: Not carcinogenic in animals tests. Used and unused diesel engine oils did not produce any carcinogenic effects in chronic mouse skin painting studies.

Product Name: CAT DEO 15W-40 (DIESEL ENGINE OIL)

Revision Date: 12Jul2005

Page 6 of 8

Oils that are used in gasoline engines may become hazardous and display the following properties: Carcinogenic in animal tests. Caused mutations in vitro. Possible allergen and photoallergen. Contains polycyclic aromatic compounds (PAC) from combustion products of gasoline and/or thermal degradation products.

Contains:

Base oil severely refined: Not carcinogenic in animal studies. Representative material passes IP-346, Modified Ames test, and/or other screening tests. Dermal and inhalation studies showed minimal effects; lung non-specific infiltration of immune cells, oil deposition and minimal granuloma formation. Not sensitizing in test animals.

Additional information is available by request.

The following ingredients are cited on the lists below: None.

--REGULATORY LISTS SEARCHED--

1 = NTP CARC

3 = IARC 1

5 = IARC 2B

2 = NTP SUS

4 = IARC 2A

6 = OSHA CARC

SECTION 12

ECOLOGICAL INFORMATION

The information given is based on data available for the material, the components of the material, and similar materials.

ECOTOXICITY

Material -- Not expected to be harmful to aquatic organisms.

MOBILITY

Base oil component -- Low solubility and floats and is expected to migrate from water to the land. Expected to partition to sediment and wastewater solids.

PERSISTENCE AND DEGRADABILITY

Biodegradation:

Base oil component -- Expected to be inherently biodegradable

BIOACCUMULATION POTENTIAL

Base oil component -- Has the potential to bioaccumulate, however metabolism or physical properties may reduce the bioconcentration or limit bioavailability.

SECTION 13

DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised

Product Name: CAT DEO 15W-40 (DIESEL ENGINE OIL)

Revision Date: 12Jul2005

Page 7 of 8

incineration at very high temperatures to prevent formation of undesirable combustion products.

REGULATORY DISPOSAL INFORMATION

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrosivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

Empty Container Warning PRECAUTIONARY LABEL TEXT: Empty containers may retain residue and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to refill or clean container since residue is difficult to remove. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner. All containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

SECTION 14	TRANSPORT INFORMATION
-------------------	------------------------------

LAND (DOT): Not Regulated for Land Transport

LAND (TDG): Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

AIR (IATA): Not Regulated for Air Transport

SECTION 15	REGULATORY INFORMATION
-------------------	-------------------------------

OSHA HAZARD COMMUNICATION STANDARD: When used for its intended purposes, this material is not classified as hazardous in accordance with OSHA 29 CFR 1910.1200.

NATIONAL CHEMICAL INVENTORY LISTING: TSCA

EPCRA: This material contains no extremely hazardous substances.

SARA (311/312) REPORTABLE HAZARD CATEGORIES: None.

SARA (313) TOXIC RELEASE INVENTORY:

Carbon Zinc Batteries
08/12/04

The information contained within is provided for your information only. This battery is an article pursuant to 29 CFR 1910.1200 and, as such, is not subject to the OSHA Hazard Communication Standard requirement for preparation of a material safety data sheet. The information and recommendations set forth herein are made in good faith and are believed to be accurate as of the date of preparation. However, EVEREADY BATTERY COMPANY, INC., MAKES NO WARRANTY, EITHER EXPRESS OR IMPLIED, WITH RESPECT TO THIS INFORMATION AND DISCLAIMS ALL LIABILITY FROM RELIANCE ON IT.

PRODUCT SAFETY DATA SHEET

PRODUCT NAME: EVEREADY Battery

Type No.: **Volts:**

TRADE NAME: CLASSIC; SUPER HEAVY DUTY; INDUSTRIAL; HERCULES

Approximate Weight:

CHEMICAL SYSTEM: Carbon-Zinc

Designed for Recharge: No

SECTION I - MANUFACTURER INFORMATION

Eveready Battery Company, Inc.
25225 Detroit Road
Westlake, OH 44145

Telephone Numbers for Information:
440-835-7368
800-383-7323 (USA)

Date Prepared: August 12, 2004

SECTION II - HAZARDOUS INGREDIENTS

IMPORTANT NOTE: The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful.

MATERIAL OR INGREDIENT	PEL (OSHA)	TLV (ACGIH)	%/wt.
Acetylene Black (CAS# 1333-86-4)	3.5 mg/m ³ TWA (as carbon black)	3.5 mg/m ³ TWA (as carbon black)	3-7
Ammonium Chloride (CAS# 12125-02-9)	None established	10 mg/m ³ TWA (fume) 20 mg/m ³ STEL (fume)	0-10
Manganese Dioxide (CAS# 1313-13-9)	5 mg/m ³ CEILING (as Mn)	0.2 mg/m ³ TWA (as Mn)	15-31
Zinc (CAS# 7440-66-6)	15 mg/m ³ TWA (total dust as particulates not otherwise regulated) 5 mg/m ³ TWA (respirable fraction as particulates not otherwise regulated)	10 mg/m ³ TWA (inhalable particulate) 3 mg/m ³ TWA (respirable particulate)	7-42
Zinc Chloride (CAS# 7646-85-7)	1 mg/m ³ TWA (fume)	1 mg/m ³ TWA (fume) 2 mg/m ³ STEL (fume)	2-10

SECTION III - FIRE AND EXPLOSION HAZARD DATA

In case of fire, it is permissible to use any class of extinguishing medium on these batteries or their packing material. Cool exterior of batteries if exposed to fire to prevent rupture.

Fire fighters should wear self-contained breathing apparatus.

SECTION IV - HEALTH HAZARD DATA

Under normal conditions of use, the battery is hermetically sealed.

Ingestion: Swallowing a battery can be harmful.

Contents of an open battery can cause serious chemical burns of mouth, esophagus, and gastrointestinal tract. If battery or open battery is ingested, do not induce vomiting or give food or drink. Seek medical attention immediately. CALL NATIONAL BATTERY INGESTION HOTLINE for advice and follow-up (202-625-3333) collect, day or night.

Inhalation: Contents of an open battery can cause respiratory irritation. Provide fresh air and seek medical attention.

Skin Contact: Contents of an open battery can cause skin irritation and/or chemical burns. Remove contaminated clothing and wash skin with soap and water. If a chemical burn occurs or irritation persists, seek medical attention.

Eye Contact: Contents of an open battery can cause severe irritation and chemical burns. Immediately flush eyes thoroughly with water for at least 15 minutes, lifting upper and lower lids, until no evidence of the chemical remains. Seek medical attention.

Note: Acetylene Black is listed as a possible carcinogen by International Agency for Research on Cancer (IARC).

SECTION V - PRECAUTIONS FOR SAFE HANDLING AND USE

Storage: Store in a cool, well ventilated area. Elevated temperatures can result in shortened battery life.

Mechanical Containment: If potting or sealing the battery in an airtight or watertight container is required, consult your Eveready Battery Company representative for precautionary suggestions. Batteries normally evolve hydrogen which, when combined with oxygen from the air, can produce a combustible or explosive mixture unless vented. If such a mixture is present, short circuits, high temperature, or static sparks can cause an ignition.

Do not obstruct safety release vents on batteries. Encapsulation (potting) of batteries will not allow cell venting and can cause high pressure rupture.

Handling: Accidental short circuit for a few seconds will not seriously affect the battery. Prolonged short circuits will cause the battery to lose energy, and can cause the safety release vent to open. Sources of short circuits include jumbled batteries in bulk containers, metal jewelry, metal covered tables or metal belts used for assembly of batteries in devices.

If soldering or welding to the battery is required, consult your Eveready Battery Company representative for proper precautions to prevent seal damage or short circuit.

Charging: This battery is manufactured in a charged state. It is not designed for recharging. Recharging can cause battery leakage or, in some cases, high pressure rupture. Inadvertent charging can occur if a battery is installed backwards.

Labeling: If the Eveready label or package warnings are not visible, it is important to provide a package and/or device label stating:

WARNING: DO NOT DISPOSE OF IN FIRE, RECHARGE, PUT IN BACKWARDS, MIX WITH USED OR OTHER BATTERY TYPES - MAY EXPLODE OR LEAK AND CAUSE PERSONAL INJURY.

Where accidental ingestion of small batteries is possible, the label should state:

WARNING: (1) KEEP AWAY FROM SMALL CHILDREN. IF SWALLOWED, PROMPTLY SEE DOCTOR: HAVE DOCTOR PHONE (202) 625-3333 COLLECT. (2) DO NOT DISPOSE OF IN FIRE, RECHARGE, PUT IN BACKWARDS, MIX WITH USED OR OTHER BATTERY TYPES - MAY EXPLODE OR LEAK AND CAUSE PERSONAL INJURY.

Disposal: Dispose in accordance with all applicable federal, state, and local regulations. Appropriate disposal technologies include incineration and land filling.

SECTION VI - SPECIAL PROTECTION INFORMATION

Ventilation Requirements: Not necessary under normal conditions.

Respiratory Protection: Not necessary under normal conditions.

Eye Protection: Not necessary under normal conditions. Wear safety glasses with side shields if handling an open or leaking battery.

Gloves: Not necessary under normal conditions. Use neoprene or natural rubber gloves if handling an open or leaking battery

SECTION VII - REGULATORY INFORMATION

The transportation of dry cell batteries manufactured or sold by Eveready Battery Company is not regulated by the U.S. Department of Transportation or the major international regulatory bodies.

SARA/TITLE III - As an article, this battery and its contents are not subject to the requirements of the Emergency Planning and Community Right-To-Know Act.

PRODUCT SAFETY DATASHEET

The information contained within is provided for your information only. This battery is an article pursuant to 29 CFR 1910.1200 and, as such, is not subject to the OSHA Hazard Communication Standard requirement for preparation of a material safety data sheet. The information and recommendations set forth herein are made in good faith and are believed to be accurate as of the date of preparation. However, EVEREADY BATTERY COMPANY, INC., MAKES NO WARRANTY, EITHER EXPRESS OR IMPLIED, WITH RESPECT TO THIS INFORMATION AND DISCLAIMS ALL LIABILITY FROM RELIANCE ON IT.

PRODUCT SAFETY DATA SHEET

PRODUCT NAME: EVEREADY Battery

Type No.: **Volts:**

TRADE NAMES: ENERGIZER, ENERGIZER e², INDUSTRIAL ZMA, HERCULES, EVEREADY

Approximate Weight:

CHEMICAL SYSTEM: Alkaline Manganese Dioxide-Zinc

Designed for Recharge: No

SECTION I - MANUFACTURER INFORMATION

Eveready Battery Company, Inc.
25225 Detroit Road
Westlake, OH 44145

Telephone Numbers for Information:
(440) 835-7368
(800) 383-7323 (USA)

Date Prepared: August 12, 2004

SECTION II - HAZARDOUS INGREDIENTS

IMPORTANT NOTE: The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful.

MATERIAL OR INGREDIENT	PEL (OSHA)	TLV (ACGIH)	%/wt.
Graphite (CAS# 7782-42-5)	15 mg/m ³ TWA (total dust) 5 mg/m ³ TWA (respirable fraction)	2 mg/m ³ TWA (respirable fraction)	2-6
Manganese Dioxide (CAS# 1313-13-9)	5 mg/m ³ Ceiling (as Mn)	0.2 mg/m ³ TWA (as Mn)	30-45
Potassium Hydroxide (CAS# 1310-58-3)	None established	2 mg/m ³ Ceiling	4-8
Zinc (CAS# 7440-66-6)	15 mg/m ³ TWA PNOR* (total dust) 5 mg/m ³ TWA PNOR* (respirable fraction)	10 mg/m ³ TWA PNOC** (Inhalable particulate) 3 mg/m ³ TWA PNOC** (respirable particulate)	12-25

* PNOR: Particulates not otherwise regulated

**PNOC: Particulates not otherwise classified

SECTION III - FIRE AND EXPLOSION HAZARD DATA

In case of fire, it is permissible to use any class of extinguishing medium on these batteries or their packing material. Cool exterior of batteries if exposed to fire to prevent rupture.

Fire fighters should wear self-contained breathing apparatus.

SECTION IV - HEALTH HAZARD DATA

Under normal conditions of use, the battery is hermetically sealed.

Ingestion: Swallowing a battery can be harmful.

Contents of an open battery can cause serious chemical burns of mouth, esophagus, and gastrointestinal tract.

If battery or open battery is ingested, do not induce vomiting or give food or drink. Seek medical attention immediately. CALL NATIONAL BATTERY INGESTION HOTLINE for advice and follow-up (202-625-3333) collect day or night.

Inhalation: Contents of an open battery can cause respiratory irritation. Provide fresh air and seek medical attention.

Skin Contact: Contents of an open battery can cause skin irritation and/or chemical burns. Remove contaminated clothing and wash skin with soap and water. If a chemical burn occurs or if irritation persists, seek medical attention.

Eye Contact: Contents of an open battery can cause severe irritation and chemical burns. Immediately flush eyes thoroughly with water for at least 15 minutes, lifting upper and lower lids, until no evidence of the chemical remains. Seek medical attention.

SECTION V - PRECAUTIONS FOR SAFE HANDLING AND USE

Storage: Store in a cool, well ventilated area. Elevated temperatures can result in shortened battery life.

Mechanical Containment: If potting or sealing the battery in an airtight or watertight container is required, consult your Eveready Battery Company representative for precautionary suggestions. Batteries normally evolve hydrogen which, when combined with oxygen from the air, can produce a combustible or explosive mixture unless vented. If such a mixture is present, short circuits, high temperature, or static sparks can cause an ignition.

Do not obstruct safety release vents on batteries. Encapsulation (potting) of batteries will not allow cell venting and can cause high pressure rupture.

Handling: Accidental short circuit for a few seconds will not seriously affect the battery. Prolonged short circuit will cause the battery to lose energy, and can cause the safety release vent to open. Sources of short circuits include jumbled batteries in bulk containers, metal jewelry, metal covered tables or metal belts used for assembly of batteries into devices.

If soldering or welding to the battery is required, consult your Eveready Battery Company representative for proper precautions to prevent seal damage or short circuit.

Charging: This battery is manufactured in a charged state. It is not designed for recharging. Recharging can cause battery leakage or, in some cases, high pressure rupture. Inadvertent charging can occur if a battery is installed backwards.

Labeling: If the Eveready label or package warnings are not visible, it is important to provide a package and/or device label stating:

WARNING: do not install backwards, charge, put in fire, or mix with other battery types. May explode or leak causing injury. **Replace all batteries at the same time.**

Where accidental ingestion of small batteries is possible, the label should include:

Keep away from small children. If swallowed, promptly see doctor; have doctor phone (202) 625-3333 collect.

Disposal: Dispose in accordance with all applicable federal, state and local regulations. Appropriate disposal technologies include incineration and land filling.

SECTION VI - SPECIAL PROTECTION INFORMATION

Ventilation Requirements: Not necessary under normal conditions.

Respiratory Protection: Not necessary under normal conditions.

Eye Protection: Not necessary under normal conditions. Wear safety glasses with side shields if handling an open or leaking battery.

Gloves: Not necessary under normal conditions. Use neoprene or natural rubber gloves if handling an open or leaking battery.

SECTION VII - REGULATORY INFORMATION

The transportation of dry cell batteries manufactured or sold by Eveready Battery Company is not regulated by the U.S. Department of Transportation or the major international regulatory bodies.

SARA/TITLE III - As an article, this battery and its contents are not subject to the requirements of the Emergency Planning and Community Right-To-Know Act.

MATERIAL SAFETY DATA SHEET

MANUFACTURER:

ESCO CORPORATION
 2141 N.W. 25th Avenue
 Portland, OR 97210-2578

INFORMATION TELEPHONE NUMBER:

J. Carter Webb, Manager
 Environmental/Safety Affairs
 (503) 778-6670

PRODUCT DESIGNATION

Product Name: **STEEL FOUNDRY PRODUCTS**
 Chemical Name: N/A

Synonyms: N/A
 Formula: N/A

SECTION I - TYPICAL CHEMICAL COMPOSITION

<u>Ingredient (2)</u>	<u>CAS NO.</u>	<u>Permissible Air Level</u>		<u>ACGIH TLV (mg/m3)</u>
		<u>WT. %</u>	<u>OSHA PEL (mg/m3)</u>	
Iron	7439-89-6	Balance	10.0(3)	5.0(3)
Chromium	7440-47-3	0.1-30	0.1(4)	.05(4)
Manganese	7439-96-5	0.1-20	5.0(5)	1.0(6)
Nickel	7440-02-0	0.1-30	1.0(7)	1.0(7)
Molybdenum	7439-98-7	0.1-10	5.0	5.0
			(Soluble Compounds)	
			15.0	10.0
			(Insoluble Compounds)	
Silicon	7440-21-3	0.1-3.5	15.0	10.0
			(Total Dust)	
			5.0	5.0
			(Respirable Dust)	
Aluminum	7429-90-5	0.01-5	0.1	0.05
Cobalt	7440-48-4	0.1-5	N/A	N/A
Carbon	7440-44-0	0.01-4	N/A	N/A
Trace Elements	N/A	LT 1.0	N/A	N/A

Concentrations may vary somewhat between batches or lots. Various grades of steel will contain different combinations of these elements. Trace elements may also be present in minute amounts. No permissible exposure limits (PEL) or threshold limit values (TLV) exist for steel. Values shown are applicable to component elements.

SECTION II - PHYSICAL DATA

Physical State:	Solid	Flash Point:	N/A
Appearance and Odor:	Grey metal; odorless	Auto-Ignition Temperature:	N/A
Boiling Point:	N/A	Flammable Limits in Air:	N/A
Melting Point:	2450-2730°F		
Evaporation Rate:	N/A		
Vapor Pressure:	N/A		
Vapor Density:	N/A		
Specific Gravity:	7.6-7.8		
Solubility in Water:	N/A		

SECTION III - FIRE, REACTIVITY AND EXPLOSION DATA

EXTINGUISHING MEDIA:

Steel castings in their usual physical forms do not present fire or explosion hazards under normal conditions. Use fire fighting methods and materials that are appropriate for surrounding area.

Molten metal may explode on contact with water. For these fires, use dry powder or sand.

CONDITIONS TO AVOID:

Steel at temperatures above the melting point may emit fumes of iron and alloying elements. Avoid generation of airborne fume and dust.

SECTION IV - HEALTH HAZARD DATA

HEALTH HAZARDS:

Steel products in their solid state present no inhalation, ingestion, or contact health hazard. Operations such as burning, welding, sawing, brazing, grinding, and machining, which result in elevating the temperature of the product to or above its melting point, or result in the generation of airborne particulates, may present hazards. The major exposure hazard is inhalation.

Effects of Skin Contact: Remove particles by washing thoroughly with soap and water. Seek medical attention if condition persists.

Inhalation: Remove to fresh air. If condition continues, consult a physician.

Effect of Eye Contact: Flush thoroughly with running water to remove particle. Seek medical attention.

Ingestion: If significant amounts of metal are ingested, consult a physician.

Effects of overexposure to fume and dust are as follows:

Acute: Excessive inhalation of metallic fumes and dust may result in irritation of eyes, nose, and throat. High concentrations of fumes and dusts of iron oxide, manganese, copper, zinc and lead may result in metal fume fever. Typical symptoms last from 12 to 48 hours and consist of a metallic taste in the mouth, dryness and irritation of the throat, chills and fever.

Chronic: Chronic and prolonged inhalation of high concentrations of fumes or dust of the following elements may lead to the conditions listed opposite the element:

IRON (Fe)	Siderosis Pulmonary effects
CHROMIUM (Cr)...	Lesions of the skin and mucous membranes. Possible cancer of the nose or lungs - Bronchogenic Carcinoma.
MANGANESE (Mn)..	Bronchitis, Penumonitis, Lack of Coordination.
NICKEL (Ni).....	Lesions of the skin and mucous membranes. Possible cancer of the nose or lungs - Bronchogenic Carcinoma.
MOLYBDENUM (Mo)....	Respiratory tract irritation. Possible liver and kidney damage, bone deformity.
SILICON (Si)....	Considered a nuisance particulate by ACGIH.
ALUMINUM (Al)....	Possible lesions of skin and mucous membranes, Possible bone disease, Respiratory tract irritation, Asthma

COBALT (Co)...

Bronchitis, Asthma, Cough, Dyspnea, Chest Pain, Nausea, Vomiting and Abdominal Colic

SECTION V - PERMISSIBLE EXPOSURE LIMITS

Occupational Exposure Limits:

See Product Ingredients (Section I). Chromium and Nickel have been identified by the International Agency for Research on Cancer (IARC) and/or the National Toxicology Program (NTP) as potential cancer causing agents.

SECTION VI - CANCER HAZARD

Chromium and Nickel have been identified by the International Agency for Research on Cancer (IARC) and/or the National Toxicology Program (NTP) as potential cancer causing agents.

SECTION VII - CONTROLS, PROTECTION

Respiratory Protection:

Appropriate dust/mist/fume respirator should be used to avoid excessive inhalation of particulates. If exposure limits are reached or exceeded, use NIOSH approved equipment.

Hands, Arms, and Body:

Protective gloves should be worn as required for welding, burning, or handling operations.

Eyes and Face:

Safety glasses should be worn when grinding or cutting. Face shields are recommended when welding or burning.

Other Clothing and Equipment:

As required, depending on operations and safety codes.

SECTION VIII - SPILL, LEAK, AND DISPOSAL INFORMATION

Procedures to Follow if Material is Released or Spilled: N/A

Waste Disposal Method(s):

Any excess product can be recycled for further use, disposed in a permitted hazardous waste landfill, or disposed by other methods which are in accordance with local, state, and federal regulations.

SECTION IX - REACTIVITY INFORMATION

STABILITY: Stable under normal conditions of use, storage, and transportation.

INCOMPATIBILITY (Materials to Avoid): Reacts with strong acids to form Hydrogen gas.

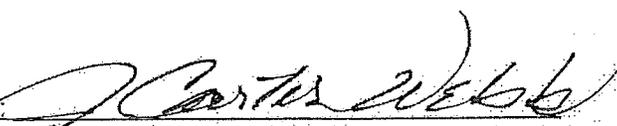

ADDITIONAL PRECAUTIONS: Provide adequate exhaust ventilation and maintain good housekeeping practices

ABBREVIATIONS:

- N/A = Not Applicable
- (2) All values, unless otherwise specified, refer to 8-hour time-weighted average concentrations and units are in mg/M³.
- (3) As iron oxide fume.
- (4) As hexavalent chromium compounds.
- (5) Ceiling value for manganese.
- (6) As manganese fume.
- (7) As nickel metal and insoluble compounds.

SECTION X - MSDS PREPARATION

DATE PREPARED: May 2006 (Rev. 11)
(Original Issue: December 1985)

PREPARER: 
J. Carter Webb, Manager
Environmental/Safety Affairs

This document has been prepared solely for the intent of compliance with the provisions of Subpart 2 of Part 1910 of Title 29 of the Code of Federal Regulations, paragraph 1910.1200. ESCO CORP. MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTY OF MERCHANTABILITY, ANY IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE AND ANY IMPLIED WARRANTIES OTHERWISE ARISING FROM COURSE OF DEALING OR TRADE.

1. Identification

Product Name: **EP2000**
 Registration #: 64684-6

2. Hazardous Components

Ingredient Name:	CAS #	Weight %	Occupational Exposure		Vap. Press mm Hg
			TLV	PEL	
Proprietary Algaecide		4.7%	100ppm	100ppm	23@25°C
1-Methyl-2-Pyrrolidinone	872-50-4	5%	100ppm	100ppm	0.29@20°C
N,N-Diethylethanamine Triethylamine	1121-44-8	.5%	10ppm	10ppm	54@20°C

OSHA Carcinogens: None known

Primary Routes of Entry:

Inhalation, Skin, eyes, ingestion

Potential Health Hazards:

Skin and Eyes Acute:

It is a mild eye and dermal irritant, but is nontoxic according to the results of acute dermal and acute eye testing.

Skin and Eyes Chronic:

Long term exposure may cause defatting of the skin and skin sensitization.

Skin Absorption Acute:

EP2000 is considered a mild dermal irritant based upon Acute Dermal testing.

Skin Absorption Chronic:

No effects would be expected from this route of entry.

Inhalation Acute:

May cause mild irritation to nose, throat, and lungs.

Inhalation Chronic:

Irritation to respiratory tract. There is no evidence that exposure will produce impairment of lung function.

Ingestion Acute:

EP2000 was found to have an LD50 of 1.6 g/kg in an Acute Oral Toxicity study with Sprague-Dawley rats.

Ingestion Chronic:

Prolonged occupational overexposure to this material (or one its components) when administered to pregnant female rats, at a high dose level of 750 mg/kg body weight, caused maternal and feto toxicity in some animals.

4. First Aid Measures

Skin:

Promptly remove contaminated clothing and wash with soap and water. Seek medical assistance if irritation persists.

yes:

Move individual away from exposure into fresh air. Flush eyes with copious amounts of water while holding eyelids apart for at least 15 minutes. If symptoms persist, seek medical attention.

Inhalation:

Remove individual to fresh air. Keep person warm and quiet. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Seek medical attention.

Ingestion:

Seek medical attention, keep person warm and quiet.

Medical Conditions Generally Aggravated by Exposure:

Not Determined.

Note to Physician:

5. Fire Fighting Measures

Flammable Properties:

Flash Point over 200°F

Flash Point Method Pensky-Martens C.C.

Extinguishing Media:

CO₂, dry chemical, water fog

Unusual Fire and Explosion Hazards:

Material will not support combustion unless the water has evaporated.

Special Firefighting Precautions/Instructions:

Water may be used to cool closed containers, to prevent pressure buildup.

6. Accidental Release Measures

ALWAYS WEAR RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT!

In Case of Spill or Other Release:

Evacuate area. Eliminate all ignition sources. Stop spill at the source. Prevent from entering drains, sewers, streams or other bodies of water. If runoff occurs, notify authorities as required. Pump or vacuum transfer spilled product to clean containers for recovery. Absorb unrecoverable product and transfer contaminated absorbent into containers for disposal. This material is heavier than water and subject to emulsification.

7. Handling, Storage, and Disposal

Dispose of in accordance with all local, state, and federal regulations. Store in a cool dry place. Keep out of reach of children.

8. Control Measures and Personal Protection

Ventilation:

Provide sufficient mechanical ventilation to maintain exposure below TLV.

Skin Protection:

Wear chemical resistant gloves and coveralls.

Eye Protection:

Wear face shield or chemical goggles.

Respiratory Protection:

A NIOSH/MSHA approved respirator must be worn to prevent the inhalation of vapors or spray mists when the TLV or PEL is exceeded.

Additional Recommendations:

Wear protective equipment.

9. Physical and Chemical Properties

Appearance White viscous liquid
Odor slight amine odor
Specific Gravity 1.4
Solubility Not Determined
Boiling Point 192-396°F
Vapor Density Heavier than air
Evaporation Rate slower than ether
Flash Point over 200°F
Flash Point Method Pensky-Martens C.C.

10. Stability and Reactivity

Stability stable
Conditions to Avoid Do not store in direct sunlight, or above 130°F or below 50°F.
Incompatibilities Strong oxidizing agents, ferrous metals, copper, copper alloys.
Hazardous Decomposition Products Carbon Monoxide, Carbon Dioxide, Oxides of Nitrogen
Hazardous Polymerization Will not occur.

11. Transportation Information

DOT/UPS/ IATA:

Proper Ship Name. paint
DOT Haz. Class non-hazardous
DOT ID#.
Packing Group.
Label Required.

12. Disclaimer

We believe the recommendations and technical information contained herein to be accurate. However, they are given without warranty or guarantee, expressed or implied, and we assume no responsibility for losses or damages, direct or indirect, as a result of their use.

EP2000
Antifouling Paint
EPA Reg#64684-6

FEATURES	RECOMMENDED USES
----------	------------------

- Water-based and VOC compliant
- Contains no copper or TBT
- High performance antifouling paint
- Available in WHITE
- Environmentally friendly
- Offers easy clean up
- Smooth, Strong and Flexible

For use on all hull types including aluminum and inflatable watercraft .

For those who desire the fastest, cleanest, and whitest bottom!

SPECIFICATION DATA	
--------------------	--

Coating Type	Copper and TBT-free water-based antifouling
Colors	E Paint Number
White	EP-401
Gray	EP-701
Safety Orange	EP-901
Packaging	Single component material 5, 1 Gallon and 1 Quart containers.
Flash Point	N/A
Thinner	Thinning is not recommended. Clean up with water.
Shelf Life	1 year
Weight Per Volume	13.6 lbs/gallon
Solids by Weight	64%
Solids by Volume	44%

Dry-to-Recoat
Minimum 8 hours at 70°F (21°C) @50%RH
Maximum not critical

Dry-to-Launch
Minimum 24 hours at 70°F (21°C)@50%RH
Maximum not critical

Theoretical Spreading Rate
240 Sq. Ft/Gal at 3-4 mil dft

Recommended Film Thickness Per Coat
6-8 wet mils to obtain 3-4 dry mils

Recommended Number of Coats
2 coats
w/ additional coat along the waterline.

Application
See application instructions on back.

APPLICATION INSTRUCTIONS

EP 2000 is a high performance, hard, water-based antifouling paint that is recommended for use on all substrates exposed to marine biofouling. EP 2000 is not compatible with other existing antifouling coatings. EP2000 is self-priming when applied to properly prepared substrates. To provide complete protection from water migration to the hull apply EP2000 over an epoxy barrier. Apply EP2000 at the dry-to-recoat interval. Consult your E Paint Company Representative for recommendations regarding specific epoxy primers.

NOTE: Due to the nature of photoactive paints, darker colors may require periodic maintenance scrubbing.

SURFACE PREPARATION

Previously Painted Surfaces

To renew old EP 2000, sand lightly to abrade the surface. Wash hull to remove sanding debris. Allow hull to fully dry. Apply new EP 2000 antifouling paint as per the instructions contained in this bulletin. All other existing antifouling coatings must be removed.

Unpainted Surfaces

Fiberglass, gel-coat and wood

E Paint Company recommends that an epoxy barrier coat be used as a tie coat for best performance. Consult your E Paint Company Representative for recommendations regarding specific epoxy primers. Follow the manufacturers' recommendations for dry times and film thickness. Apply EP2000 at the dry-to-recoat interval. Do not apply if a strong solvent odor emanates from the film. Remove sanding dust and debris by cleaning with water. Apply new EP 2000 antifouling paint as per the instructions contained in this bulletin.

Rubber

Degrease surface by cleaning with soapy water. Abrade surface with 80 grit sand paper. Remove sanding dust and debris by washing with water. Allow surface to dry. Apply new EP 2000 antifouling paint as per the instructions contained in this bulletin.

Metal surfaces should be properly prepared before applying EP 2000. Aluminum should be prepared to a 2mil profile prior to application of EP2000. Corrosion-inhibiting epoxy primers are recommended to afford protection to the hull. Consult your E Paint Company Representative for recommendations regarding epoxy primers. Follow the manufacturers' recommendations for dry times and film thickness. Apply EP2000 to **fully cured** epoxy. Remove sanding dust and debris by cleaning with water. Apply new EP 2000 antifouling paint as per the instructions contained in this bulletin.

MIXING AND THINNING

STIR EP 2000 until a homogenous blend results. **DO NOT POWER SHAKE** the product. Thinning is not recommended. If thinning is desired, thin up to 5% only with bottled water.

APPLICATION

EP 2000 may be applied by spray, roller or brush. Only apply EP 2000 to clean, dry, well-prepared surfaces. Apply two coats of EP 2000 with an additional coat at the waterline. **IMPORTANT:** Be sure to follow dry-to-recoat and launch instructions (see Specification Data). Failure to follow drying instructions will severely jeopardize adhesion and performance. **COOLER TEMPERATURES WILL REQUIRE INCREASING THE MINIMUM TIMES BETWEEN RECOATING AND LAUNCHING. DO NOT APPLY IF**, within the next 12 hours, the temperature may drop below 55°F, or rain or heavy dew is expected. **NOTE: EP2000 is a water-base coating, solvent residue in spray equipment will render the product unusable!** Always use first quality equipment. Clean up with water.

PRECAUTIONS

See the material safety data sheet and product label for complete safety and precaution requirements.

Any recommendations of E Paint Company contained herein, covering use, utilization, chemical or physical properties and other qualities of the products sold are believed to be reliable; however, E Paint Company makes no warranty or representation with respect thereto. Use or application of any E Paint Company products are at the discretion of the Buyer without liability or obligation whatsoever of E Paint Company, Inc.

Material Safety Data Sheet

May be used to comply with OSHA's Hazard Communication Standard, 29 CFR 1910 1200. Standard must be consulted for specific requirements.

U.S. Department of Labor

Occupational Safety and Health Administration
Form Approved
OMB No. 1218-0072

IDENTITY

**Emerald Wash
Recycled gun wash solvent blend**

Section I

Manufacturer's name **Emerald Services, Inc.**

Emergency Telephone Number **1-800-424-9300**

Address **1825 ALEXANDER Ave.
Tacoma, WA 98421**

Telephone Number for Information **206-832-3225**

Date Prepared **Revised 7/24/06**

Signature of Preparer (optional) **Devin D. Boyles**

Section II—Hazardous Ingredients/Identity Information

Hazardous Components (Specific Chemical Identity, Common Name(s))

	OSHA PEL	ACGIH TLV	Other Limits Recommended	% (optional)
Toluene CAS 108-88-3	TWA 200 ppm	50 ppm		10 – 15%
Methyl Ethyl Ketone CAS 78-93-3	TWA 200 ppm	200 ppm		30 – 40%
Acetone CAS 67-64-1	TWA 1000 ppm	500 ppm		20 – 25%
Xylenes CAS 1330-20-7	NOT ESTABLISHED			5 – 10%
Ethyl Acetate CAS 141-78-6	TWA 400 ppm	400 ppm		5 – 10%
Ethanol CAS 64-17-5	TWA 1000 ppm	1000 ppm		3 – 5%

May contain methanol (CAS 67-56-2), Isopropanol (67-63-0), Methyl Isobutyl Ketone (CAS 108-10-1), Butyl Acetate (CAS 123-86-4), and Ethylene Glycol Monobutyl Ether (CAS 111-76-2) each <2% and no more than 5% in aggregate.

Section III—Physical/Chemical Characteristics

Boiling Point	131F	Specific Gravity (H ₂ O = 1)	0.81 – 0.97
Vapor Pressure (mm Hg)	No data	Melting Point	No data
Vapor Density (AIR = 1)	No data	Evaporation Rate (Butyl Acetate = 1)	No data
Solubility in Water	Slight		
Appearance and Odor	Clear watery liquid with ketone odor		

Section IV—Fire and Explosion Hazard Data

Flash Point (Method Used)	-4°F (TCC)	Flammable Limits	LEL 1.2%	UEL
Extinguishing Media	Regular foam, Carbon Dioxide, Dry Chemical			

Special Fire Fighting Procedures Water may be ineffective. Water may be used to keep fire-exposed containers cool until fire is out. Use fog nozzles if water is used. DO NOT enter confined fire space without full bunker gear (helmet with face shield, bunker coats, gloves and rubber boots). Use NIOSH approved positive-pressure self-contained breathing apparatus.

Unusual Fire and Explosion Hazards Vapors are heavier than air and may travel along the ground or may be moved by ventilation

Waste Disposal Method Dispose of in accordance with all applicable local, state and federal regulations.

Precautions to Be Taken in Handling and Storing For handling, containers of this material may be hazardous when emptied. Since emptied containers retain product residues (vapor, liquid, and/or solid), all hazard precautions given in the data sheet must be observed. All five gallon pails and larger metal containers including tank cars and tank trucks should be grounded and/or bonded when materials is transferred. Warning. Sudden release of hot organic chemical vapors or mists from process equipment operating at elevated temperature and pressure, or sudden ingress of air into vacuum equipment, may result in ignitions without the presence of obvious ignition sources. Published "auto-ignition" or "ignition" temperature values cannot be treated as safe operating temperatures in chemical processes without analysis of the actual process conditions. Any use of this product in elevated temperature processes should be thoroughly evaluated to establish and maintain safe operating conditions. Isolate from oxidizers, heat, sparks, electric equipment and open flame. Use only with adequate ventilation. Avoid breathing vapor or spray mist. Avoid contact with skin and eyes. For storage, vapors may ignite explosively and spread long distances. Prevent vapor buildup. Put out pilot lights and turn off heaters, electric equipment and other ignition sources during use and until all vapors are gone. Do not store above 49°C/120°F. Store large amounts in structures made for OSHA Class I B liquids. Keep container tightly closed and upright when not in use to prevent leakage.

Other Precautions

Section VII—Control Measures

Respiratory Protection (*Specify Type*) Filter respirator for organic gases and vapors.

Ventilation	Local Exhaust	Yes	Special
	Mechanical (<i>General</i>)	Yes	Other

Protective Gloves Nitrile, neoprene

Eye Protection OSHA compliant chemical splash goggles

Other Protective Clothing or Equipment Impervious clothing and boots to prevent repeated or prolonged skin contact.

Work/Hygienic Practices Always wear proper PPE, thoroughly clean self before eating, going on breaks and going home.

Material Safety Data Sheet

May be used to comply with OSHA's Hazard Communication Standard, 29 CFR 1910 1200. Standard must be consulted for specific requirements.

DO NOT enter confined fire space without full bunker gear. Use NIOSH approved positive-pressure self-contained breathing apparatus.		

Unusual Fire and Explosion Hazards Vapors are heavier than air and may travel along the ground or may be moved by ventilation

and ignited by pilot lights, other flames, sparks, heaters, smoking, electric motors, static discharge, or other ignition sources at locations distant from material handling point. Never use welding or cutting torch on or near drum (even empty) because product (even just residue) can ignite explosively. Do not pressurize. Extremely flammable, vapors can cause flash fire.

(Reproduce locally)

OSHA 174 Sept. 1985

Section V—Reactivity Data

Stability	Unstable		Conditions to Avoid Avoid contact with: heat, sparks, electrical equipment, open flames, and strong oxidizing agents.
	Stable	X	

Incompatibility (Materials to Avoid) The substance can form explosive peroxides on contact with strong oxidants such as acetic acid, nitric acid, and hydrogen peroxide. Reacts with chloroform and bromoform under basic conditions, causing fire and explosion hazard. Attacks plastic.

Hazardous Decomposition or Byproducts May form carbon dioxide and carbon monoxide.

Hazardous Polymerization	May Occur		Conditions to Avoid
	Will Not Occur	X	

Section VI—Health Hazard Data

Route(s) of Entry	Inhalation? Yes	Skin? Yes	Ingestion? Yes
-------------------	-----------------	-----------	----------------

Health Hazards (Acute and Chronic) *Acute* – The vapor irritates the eyes and respiratory tract. The substance may cause effects on the central nervous system, liver, kidneys, and gastrointestinal tract. *Chronic* – Repeated or prolonged contact with skin may cause dermatitis. The substance may have effects on the blood and bone marrow.

Carcinogenicity	NTP? None	IARC Monographs? None	OSHA Regulated? None
-----------------	-----------	-----------------------	----------------------

Signs and Symptoms of Exposure Gastrointestinal irritation (nausea, vomiting, diarrhea), irritation (nose, throat, respiratory tract), cough, central nervous system depression (dizziness, drowsiness, weakness, fatigue, nausea, headache, unconsciousness), leg cramps, blurred vision, abdominal and low back pain, shortness of breath, cyanosis (characterized by bluish discoloration of skin and nails), coma and death.

Medical Conditions
Generally Aggravated by Exposure May aggravate pre-existing disorders of these organs: anemia, kidney damage, lung damage, and effects on hearing.

Emergency and First Aid Procedures For eye contact, immediately move individual away from exposure and into fresh air. Flush eyes gently with water for at least 15 minutes while holding eyelids apart; seek immediate medical attention. For skin, remove contaminated clothing. Flush exposed area with large amounts of water. If skin is damaged, seek immediate medical attention. If skin is not damaged and symptoms persist, seek medical attention. Launder clothing before reuse. If swallowed, do not induce vomiting. Vomiting may lead to pneumonitis, which may be fatal. If individual is drowsy or unconscious, place on left side with head down. Seek medical attention. If possible, do not leave individual unattended. For inhalation, if symptoms develop, immediately move individual away from exposure and into fresh. Seek immediate medical attention; keep person warm and quiet. If person is not breathing, begin artificial respiration. If breathing is difficult, give oxygen.

Section VII—Precautions for Safe Handling and Use

Steps to Be Taken in Case Material is Released or Spilled For small spill, absorb liquid on vermiculite, floor absorbent or other absorbent material. Persons NOT wearing proper personal protective equipment should be excluded from area of spill. For large spill, eliminate all ignition sources (flares, flames including pilot lights, electrical sparks). Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed. Stop spill at source. Prevent from entering or run-off to drains, sewers, streams or other bodies of water. Prevent from spreading. If runoff

occurs, notify authorities as required. Pump or vacuum transfer spilled product to clean containers for recover. Absorb unrecoverable product. Transfer contaminated absorbent, soil and other materials to containers for disposal. Notify proper authorities as required, that a spill has occurred.

Waste Disposal Method Dispose of in accordance with all applicable local, state and federal regulations.

Precautions to Be Taken in Handling and Storing For handling, containers of this material may be hazardous when emptied. Since emptied containers retain product residues (vapor, liquid, and/or solid) all hazard precautions given in the data sheet must be observed. All five-gallon pails and larger metal containers including tank cars and tank trucks should be grounded and/or bonded when material is transferred. Warning. Sudden release of hot organic chemical vapors or mists from process equipment operation at elevated temperature and pressure, or sudden ingress of air into vacuum equipment, may result in ignitions without the presence of obvious ignition sources. Published "auto ignition" or "ignition" temperature values cannot be treated as safe operation temperatures in chemical processes without analysis of the actual process conditions. Any use of this product in elevated temperature processes should be thoroughly evaluated to establish and maintain safe operating conditions. Isolate from oxidizers, heat, sparks, electric equipment and open flame. Use only with adequate ventilation. Avoid breathing vapor or spray mist. Avoid contact with skin and eyes. For storage, vapors may ignite explosively and spread long distances. Prevent vapor buildup. Put out pilot lights and turn off heaters, electric equipment and other ignition sources during use and until all vapors are gone. Do not store above 49°C / 120°F. Store large amounts in structures made for OSHA Class I B liquids. Keep container tightly closed and upright when not in use to prevent leakage.

Other Precautions

Section VII—Control Measures

Respiratory Protection (Specify Type) Filter respirator for organic gases and vapors.

Ventilation	Local Exhaust	Yes	Special	
	Mechanical (General)	Yes	Other	
Protective Gloves	Nitrile, neoprene		Eye Protection	OSHA compliant chemical splash goggles
Other Protective Clothing or Equipment		Impervious clothing and boots to prevent repeated or prolonged skin contact.		
Work/Hygienic Practices		Always wear proper PPE, thoroughly clean self before eating, going on breaks and going home.		

Franklin International

MATERIAL SAFETY DATA SHEET

MSDS Name: Titebond White Glue
 MSDS Number: 5027
 Revision Date: 11/15/00

SECTION 1 - CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: Titebond White Glue
 CAS Number: none
 HMIS Hazard Rating: Health: 1 Fire: 1 Reactivity: 0

Company Identification: Franklin International
 2020 Bruck Street
 Columbus OH 43207

Contact: Franklin Technical Services
 Telephone/Fax: (800) 877-4583 (614) 445-1493
 Emergency Phone (24 Hour): Franklin Security
 (614) 445-1300
 Chemtrec (24 Hour): (800) 424-9300
 Chemtrec International: (703) 527-3887

Product Class: polyvinyl acetate emulsion
 Product Use: wood glue
 Product Code: 1106

Division: Construction Adhesives & Sealants

SECTION 2 - COMPOSITION AND INFORMATION ON INGREDIENTS

Hazardous Ingredients	CAS Number	Percent
Product contains no hazardous ingredients or they are below reportable levels.		

OSHA PELs & ACGIH TLVs are listed in Section 8 where applicable.

SECTION 3 - HAZARD IDENTIFICATION

EMERGENCY OVERVIEW:

White colored water-based adhesive. Slippery in the wet state.

ROUTES OF ENTRY:

Ingestion: Yes
 Inhalation: Yes
 Skin: Yes
 Eye: Yes

INHALATION:

Vapors and/or aerosols which may be formed at elevated temperature may be irritating to eyes and respiratory tract.

No reported incidents of adverse health affects resulting from inhalation of vapors at room temperature.

INGESTION:

No hazard expected in normal industrial use. Ingestion is not a likely route of exposure.

SKIN:

Prolonged or repeated skin contact can cause irritation.

EYE:

Substance may cause moderate eye irritation.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:

None identified.

CARCINOGENICITY:

IARC: No

NTP: No

OSHA: No

REPRODUCTIVE TOXICITY:

This product has not been evaluated for reproductive toxicity.

SECTION 4 - FIRST AID MEASURES

INHALATION:

Remove patient to fresh air, if discomfort persists seek medical attention.

INGESTION:

Call poison control center immediately. Follow their specific instructions. Do not induce vomiting.

SKIN:

Wash with soap and water. Contact a physician if irritation develops or persists.

EYE:

Hold eyelids apart and flush with plenty of water for at least 15 minutes. Seek medical attention.

SECTION 5 - FIRE-FIGHTING MEASURES

Flammability Class (OSHA) IIIB

Flash Point: Not Applicable

Explosive Range: Not Applicable

EXTINGUISHING MEDIA:

Use alcohol foam, carbon dioxide, water spray, or ABC dry chemical when fighting fires involving this product.

HAZARDOUS COMBUSTION PRODUCTS:

Oxides of carbon.

FIRE FIGHTING PROCEDURES:

Wear a NIOSH approved self-contained breathing apparatus.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

CONTAINMENT TECHNIQUES:

Use inert absorbent to dike the spill. Keep away from drains.

CLEAN-UP:

If possible pump liquid into an approved container or spread absorbent over spill and shovel product/absorbent mixture into an approved container. If product has dried scrape up and place in an approved container.

SECTION 7 - HANDLING AND STORAGE

HANDLING:

Empty drums should be completely drained, properly bunged and promptly returned to a reconditioner, or properly disposed of.

Use only in well ventilated area.

STORAGE:

Keep from freezing.

Store at temperatures between 50 F and 90 F.

PRECAUTIONARY STATEMENT:

Keep out of the reach of children.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

Occupational Exposure Limits

ACGIH TLV	ACGIH TLV-C	ACGIH STEL	OSHA STEL	OSHA PEL
-----------	-------------	------------	-----------	----------

ENGINEERING CONTROLS:

Use local exhaust as needed to maintain occupational exposure limits.

OTHER:

Facilities storing or utilizing any chemical should be equipped with an eyewash facility and a safety shower.

RESPIRATORY PROTECTION:

Where exposure limits may be exceeded select a NIOSH approved respirator with appropriate Protection Factor and cartridge for the specific contaminants. Follow requirements for respiratory protection in OSHA 1910.134.

EYE PROTECTION:

Chemical splash goggles (ANSI Z87.1 or approved equivalent).

SKIN PROTECTION:

Where skin contact can occur, wear impervious gloves.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

Form:	Liquid
Appearance/Color:	white
Odor:	Mild
Solubility (in water):	Dispersible in water
pH Value:	4.8
Boiling Range/Point:	210.øF
Evaporation Rate:	Slower than n-Butyl Acetate
% Volatile:	54.1%
Specific Gravity:	1.09
VOC:	10.7 g/l

SECTION 10 - STABILITY AND REACTIVITY

Stability:	This product is stable
Hazardous Polymerization:	Hazardous polymerization will not occur

CONDITIONS TO AVOID:

None.

INCOMPATIBILITY:

Strong acids and bases.

HAZARDOUS DECOMPOSITION PRODUCTS:

Oxides of carbon may be released during combustion.

SECTION 11 - TOXICOLOGICAL INFORMATION

Acute and chronic health effects are not expected as long as good industrial hygiene and safety precautions are followed.

SECTION 12 - ECOLOGICAL INFORMATION

This formulation has not been tested for environmental effects.

SECTION 13 - DISPOSAL CONSIDERATIONS

WASTE DISPOSAL:

Disposal of this product must comply with all applicable federal, state and local regulations.

CONTAINER DISPOSAL:

Disposal of this container should comply with all applicable federal,

state and local regulations.

SECTION 14 - TRANSPORT INFORMATION

UN Number	none
UN Pack Group	N/A
UN Class	Nonhaz
ICAO/IATA Class	Nonhazardous
IMDG Class	Nonhazardous
Shipping Name	Nonhazardous

Packaging may not be approved for shipping by air. Please contact Franklin International for further information.

SECTION 15 - REGULATORY INFORMATION

TSCA (Toxic Substances Control Act Inventory):

All components of this product are listed on the TSCA inventory except as exempted.

PENNSYLVANIA:

Non-hazardous components required to be listed at 3% or more:

polyvinyl acetate emulsion 9003-20-7; polyvinyl alcohol 25213-24-5

NEW JERSEY:

polyvinyl acetate emulsion 9003-20-7; water 7732-18-5; polyvinyl alcohol 25213-24-5; petroleum hydrocarbon 64741-89-5; trade secret 80100233-5015p

SECTION 16 - OTHER INFORMATION

DISCLAIMER:

While the information and recommendations set forth herein are believed to be accurate as of the data hereof, Franklin International makes no warranty, express or implied, with respect thereto and disclaims all liability from reliance thereon.

SAFETY DATA SHEET

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY

NAME OF MANUFACTURER/SUPPLIER:

FUCHS LUBRICANTS (UK) PLC

Sheet 1 of 4

Revision Number 2

Last revision 15 January 2002

Issue date 15/04/2002

ADDRESS:

New Century Street, Hanley, Stoke-on-Trent ST1 5HU

Business Telephone: 08701 200400 Fax: 01782
202072

PRODUCT NAME:

Product Code: 2602

RENOLIT 762 HIGH TEMPERATURE JOINT COMPOUND

APPLICATION:

Anti-Seize and jointing compound

2. COMPOSITIONAL INFORMATION:

Comprises an aqueous blend of sodium silicate, clays and talc.

Hazardous ingredient	Risk codes	Cas number	% range
Sodium silicate solution	Xi: R38, R41	15859-24-2	>50%

3. HAZARDS IDENTIFICATION:

Alkaline irritant

Special hazards of
product after use:

Dried material may produce a dust during dismantling equipment which contains talc, and which may lead to respiratory irritation.

PRODUCT NAME:**RENOLIT 762 HIGH TEMPERATURE JOINT COMPOUND**

Sheet 2 of 4

Revision Number

2

Last revision 15 January 2002

Issue date 15/04/2002

4. FIRST AID MEASURES:

- Eyes: Hold eyes open for at least 15 minutes under running water. Obtain immediate medical attention.
- Skin: Wash thoroughly with soap and water. Apply emollient cream
- Inhalation: Remove to fresh air. If effects persist, seek medical advice
- Ingestion: Rinse mouth with water. If conscious give water to drink. Transport to hospital and show this data sheet.
- Pressure injection: ALWAYS OBTAIN IMMEDIATE MEDICAL ATTENTION EVEN THOUGH THE INJURY MAY APPEAR MINOR.

5. FIRE FIGHTING MEASURES

- Flammability: Not classified as flammable
- Flash point (°C,PMCC): None.
- Extinguishing media: Dry chemical, CO₂, foam, sand and water
- Products of combustion: Not applicable

6. ACCIDENTAL RELEASE MEASURES.

- Personal precautions: Complete eye and face protection
- Environmental precautions: If substance has entered a water course or sewer or been spilt on soil or vegetation, advise appropriate authorities
- Decontamination: Wash residues away by dilution with water

7. HANDLING AND STORAGE.

Store in clearly marked containers under cover at a maximum temperature of 40°C. Keep away from food and drink. Compatible with most common metals.

Storage temperature: Ambient

8. EXPOSURE CONTROLS/PERSONAL PROTECTION.

Occupational exposure limits	Substance	LT _{EL}	ST _{EL}	Source/other information
	None assigned			
Engineering control measures	Local exhaust ventilation is not anticipated necessary for the use of this product			
Personal protection	Select PPE appropriate for the product properties/operations taking place. No eating, drinking or smoking in the work area. Wash before breaks and at end of shift/day. Do not keep contaminated cloths in pockets. Launder coveralls at regular intervals.			

PRODUCT NAME:

Sheet 3 of 4

Revision Number

2

RENOLIT 762 HIGH TEMPERATURE JOINT COMPOUND

Last revision 15 January 2002

Issue date 15/04/2002

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Smooth, off-white paste	Odour:	Almost
Specific gravity @ 15.6°C:	1.3	pH:	>12
Vapour pressure (mm Hg)@ 20°C:	<0.01	Vapour density (air=1)	> 1
Boiling point (°C):		Pour point/Melting point (°	None.
Flash point (°C, PMCC):	None.	Autoignition temperature, °	
Flammability limit in air, % by volume:	LEL:	UEL:	
Volatile organic compounds, %:			
Kinematic viscosity(cSt) @ 40°C:			
Solubility:	Miscible with water in all ratios		

PLEASE NOTE: THESE PROPERTIES ARE FOR GUIDANCE ONLY. THEY DO NOT CONSTITUTE A SPECIFICATION

10. STABILITY AND REACTIVITY

Stability:	The product is stable and not subject to polymerisation
Conditions to avoid:	Reactive metals, e.g. aluminium, zinc, magnesium.
Materials to avoid:	Incompatible with strong oxidising agents
Hazardous decomposition products:	Not applicable

11. TOXICOLOGICAL INFORMATION

The following toxicological assessment is based on a knowledge of the toxicity of the product's components

Estimated oral LD50 Rat, >2000mg/Kg.

HEALTH EFFECTS

On eyes:	Irritating to eyes
On skin:	Irritating to skin
By inhalation:	Harmful concentrations of vapour do not normally arise except under high temperature or high atomisation. High concentrations of mist may give rise to respiratory irritation.
By ingestion:	Alkaline irritant
Chronic:	None determined
Other:	None determined

12. ECOLOGICAL INFORMATIONBiodegradability: Not determined. Chemical oxygen demand (mgO₂/l): Not determined

Alkaline Material: will have a harmful effect on aquatic flora and fauna without suitable dilution

13. DISPOSAL CONSIDERATIONS

Used, degraded or contaminated product must be classified as special waste. Anyone classifying hazardous waste and determining its fate must be qualified in accordance with state and international regulations.

16. OTHER INFORMATION

The data and advice given apply when the product is sold for the stated application(s). The product is not sold as suitable for any other application. Use of the product for applications other than as stated in this sheet may give rise to risks not mentioned in this sheet. You should not use the product other than for the stated application or applications without seeking advice from us.

If you have purchased the product for supply to a third party for use at work, it is your duty to take all necessary steps to secure that any person handling or using the product is provided with the information in this sheet

If you are an employer, it is your duty to tell your employees and others who may be affected of any hazards described in this sheet and of any precautions which should be taken.

"PURSUANT TO TITLE III OF THE SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (SARA) AND 40 CFR PART 372, THIS PRODUCT CONTAINS OR MAY CONTAIN A TOXIC CHEMICAL IN A QUANTITY SUBJECT TO THE REPORTING REQUIREMENTS UNDER SECTION 313"

SECTION III PHYSICAL DATA

BOILING RANGE: 237-400 F. WEIGHT/GALLON: 9.5 lbs. VAPOR PRESSURE: 16mmHg@20C
VAPOR DENSITY: HEAVIER THAN AIR: XX LIGHTER THAN AIR: _____
EVAPORATION RATE: FASTER THAN ETHER: _____ SLOWER THAN ETHER: XX
PERCENT ORGANIC VOLATILE BY VOLUME: 77% SOLUBILITY IN WATER: NIL
VOC: 611 GRAMS/LITER (LESS WATER) REACTIVITY IN WATER: NIL
APPEARANCE: White liquid, or color of tint, with pungent odor.

SECTION IV FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION: OSHA: FLAMMABLE FLASH POINT: 60 F. TCC
CLASS: 3 % LEL: 1.7
DOT: FLAMMABLE UN NUMBER: 1263

EXTINGUISHING MEDIA: Foam, CO2, Dry Chemical, or Water Fog.
USE THE ABOVE OR ANY CLASS B EXTINGUISHING AGENT. WATER MAY BE UNSUITABLE AS AN EXTINGUISHING MEDIUM, BUT HELPFUL IN KEEPING ADJACENT CONTAINERS COOL.
SPECIAL FIREFIGHTING PROCEDURES: Firefighters and others exposed to vapors or products of combustion should wear self-contained breathing apparatus.
Evacuate area of unprotected personnel. Wear protective clothing.
UNUSUAL FIRE AND EXPLOSION HAZARDS: Vapors may form an explosive mixture in air and may be ignited by sparks, pilot lights, etc. Closed containers may rupture when exposed to extreme heat.

SECTION V: HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:

SKIN: THIS MATERIAL MAY CAUSE IRRITATION, SENSITIZATION, OR DEFATTING OF SKIN UPON PROLONGED OR REPEATED CONTACT.
INHALATION: EXCESSIVE EXPOSURE TO VAPORS OR SPRAY MIST CAN RESULT IN HEADACHE, DIZZINESS, NAUSEA AND LOSS OF CONSCIOUSNESS. SOME REPORTS HAVE ASSOCIATED REPEATED & PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN & NERVOUS SYSTEM DAMAGE.
EYES: THIS MATERIAL MAY BE AN EYE IRRITANT.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE: NONE, WHEN USED IN ACCORDANCE WITH SAFE HANDLING INSTRUCTIONS. (SEE SECTION VIII)

EMERGENCY AND FIRST AID PROCEDURES:

SKIN: PROMPTLY WASH WITH SOAP AND WATER. REMOVE AND WASH ANY CONTAMINATED CLOTHING BEFORE REUSE.
EYES: FLUSH WITH LARGE QUANTITIES OF WATER FOR 15 MINUTES AND SEEK MEDICAL ATTENTION.
SWALLOWING: IF INGESTED DO NOT INDUCE VOMITING; KEEP PERSON WARM AND QUIET AND GET MEDICAL ATTENTION. ASPIRATION OF MATERIAL INTO LUNGS CAN CAUSE CHEMICAL PNEUMONITIS WHICH CAN BE FATAL.
INHALATION: REMOVE VICTIM TO FRESH AIR IMMEDIATELY. IF RESPIRATORY SYMPTOMS DEVELOP, SEEK MEDICAL ATTENTION AT ONCE.

PRIMARY ROUTE(S) OF ENTRY: INHALATION, DERMAL, INGESTION.

MUTAGENICITY: THIS PRODUCT CONTAINS NO KNOWN CARCINOGENS IN REPORTABLE QUANTITIES AS DEFINED BY ACGIH, OSHA, NTP, IARC.

SECTION VI: REACTIVITY DATA

STABILITY: UNSTABLE: _____ STABLE: XX HAZARDOUS POLYMERIZATION: MAY OCCUR: _____ WILL NOT OCCUR: XX

HAZARDOUS DECOMPOSITION PRODUCTS: INCOMPLETE COMBUSTION CAN YIELD CARBON MONOXIDE AND TOXIC VAPORS.

CONDITIONS TO AVOID: HEAT, SPARKS & OPEN FLAME. IF PRODUCT CONTAINS ALUMINUM, MOISTURE IN CLOSED CONTAINERS WILL GENERATE HYDROGEN GAS.

INCOMPATIBILITY: AVOID CONTACT WITH STRONG OXIDANTS, ACIDS, BASES AND EPOXY HARDENERS UNDER UNCONTROLLED CONDITIONS.

SECTION VII: SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: REMOVE ALL SOURCES OF IGNITION. VENTILATE AREA. ABSORB SPILL WITH AN ABSORBENT MATERIAL SUCH AS SAWDUST, VERMICULITE OR SAND AND PLACE MATERIAL INTO A CLOSED CONTAINER. IF LARGE SPILL, DIKE AREA TO PREVENT THIS MATERIAL FROM ENTERING WATER SYSTEMS OR SEWERS. WEAR PROTECTIVE EQUIPMENT DURING CLEANUP.

WASTE DISPOSAL METHOD: IF DISCARDED, THIS MATERIAL AND CONTAINERS SHOULD BE TREATED AS HAZARDOUS WASTE BASED ON THE CHARACTERISTICS OF IGNITABILITY AS DEFINED UNDER FEDERAL RCRA REGULATIONS (40 CFR 261). DISPOSAL OF THIS MATERIAL OR ITS CONTAINERS REQUIRES COMPLIANCE WITH APPLICABLE LABELING, PACKAGING AND RECORDKEEPING STANDARDS.

WASTE DISPOSAL: DISPOSE IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL AGENCIES. GROUND HANDLING EQUIPMENT TO PREVENT SPARKS.
FOR FURTHER INFORMATION: CONTACT YOUR STATE OR LOCAL WASTE AGENCY OR THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY'S RCRA HOTLINE (1-800-424-9346 OR 1-202-382-3000).

SECTION VIII: SAFE HANDLING AND USE INFORMATION

KEEP OUT OF THE REACH OF CHILDREN

RESPIRATORY PROTECTION: A CANISTER-TYPE RESPIRATOR MUST BE WORN TO PREVENT THE INHALATION OF VAPORS OR SPRAY MIST WHEN THE TLV OR PEL IS EXCEEDED.

VENTILATION: GENERAL VENTILATION IS REQUIRED DURING NORMAL USE. LOCAL VENTILATION MAY BE REQUIRED DURING CERTAIN OPERATIONS TO KEEP EXPOSURE LEVEL BELOW THE LIMITS LISTED IN SECTION II OF THIS DATA SHEET.

PROTECTIVE GLOVES: CHEMICAL RESISTANT NITRILE, NEOPRENE OR RUBBER GLOVES REQUIRED.

EYE PROTECTION: WEAR FACE SHIELD OR CHEMICAL GOGGLES.

OTHER PROTECTIVE EQUIPMENT: WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. EYE WASH STATION AND SAFETY SHOWER SHOULD BE AVAILABLE.

HYGIENIC PRACTICES: WASH HANDS BEFORE EATING OR SMOKING.

SECTION IX: SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: AVOID PROLONGED OR REPEATED INHALATION OF HEATED VAPORS OR SPRAY MIST. KEEP AWAY FROM HEAT OR OPEN FLAME. THIS MATERIAL MAY CAUSE SENSITIZATION. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT ALLOW CONTAMINATED CLOTHING TO CONTACT SKIN. DO NOT WELD ON FULL OR EMPTY CONTAINERS. KEEP CONTAINERS CLOSED WHEN NOT IN USE, AND PROPERLY LABELED.

SECTION X: SUPPLEMENTAL INFORMATION

THIS MATERIAL HAS BEEN CATEGORIZED AS HAVING THE FOLLOWING HAZARD(S) AS DEFINED BY SARA TITLE III REGULATIONS (40 CFR 370): ACUTE, F.

THE INFORMATION IN THIS DATA SHEET IS BELIEVED TO BE ACCURATE AND TRUE AT THE TIME OF PREPARATION OF THIS DOCUMENT. THIS IS NOT A WARRANTY OF PRODUCT OR PRODUCT SPECIFICATION. THE END-USER OF THIS PRODUCT IS ADVISED TO VERIFY IN ADVANCE THAT THE INFORMATION IN THIS SHEET IS CURRENT, APPLICABLE, AND SUITABLE TO THEIR CIRCUMSTANCE.

CARCINOGENICITY: THIS PRODUCT CONTAINS NO KNOWN CARCINOGENS IN REPORTABLE QUANTITIES AS DEFINED BY ACGIH, OSHA, NTP, IARC.

SECTION VI: REACTIVITY DATA

STABILITY: UNSTABLE: STABLE: XX HAZARDOUS POLYMERIZATION: MAY OCCUR: WILL NOT OCCUR: XX

HAZARDOUS DECOMPOSITION PRODUCTS: INCOMPLETE COMBUSTION CAN YIELD CARBON MONOXIDE AND TOXIC VAPORS.

CONDITIONS TO AVOID: HEAT, SPARKS & OPEN FLAME. IF PRODUCT CONTAINS ALUMINUM, MOISTURE IN CLOSED CONTAINERS WILL GENERATE HYDROGEN GAS.

INCOMPATIBILITY: AVOID CONTACT WITH STRONG OXIDANTS, ACIDS, BASES AND EPOXY HARDENERS UNDER UNCONTROLLED CONDITIONS.

SECTION VII: SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: REMOVE ALL SOURCES OF IGNITION. VENTILATE AREA. ABSORB SPILL WITH AN ABSORBENT MATERIAL SUCH AS SAWDUST, VERMICULITE OR SAND AND PLACE MATERIAL INTO A CLOSED CONTAINER.

WASTE DISPOSAL METHOD: IF DISCARDED, THIS MATERIAL AND CONTAINERS SHOULD BE TREATED AS HAZARDOUS WASTE BASED ON THE CHARACTERISTICS OF IGNITABILITY AS DEFINED UNDER FEDERAL RCRA REGULATIONS (40 CFR 261).

WASTE DISPOSAL: DISPOSE IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL AGENCIES. GROUND HANDLING EQUIPMENT TO PREVENT SPARKS. FOR FURTHER INFORMATION: CONTACT YOUR STATE OR LOCAL WASTE AGENCY OR THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY'S RCRA HOTLINE (1-800-424-9346 OR 1-202-382-3000).

SECTION VIII: SAFE HANDLING AND USE INFORMATION KEEP OUT OF THE REACH OF CHILDREN

RESPIRATORY PROTECTION: A CANISTER-TYPE RESPIRATOR MUST BE WORN TO PREVENT THE INHALATION OF VAPORS OR SPRAY MIST WHEN THE TLV OR PEL IS EXCEEDED.

VENTILATION: GENERAL VENTILATION IS REQUIRED DURING NORMAL USE. LOCAL VENTILATION MAY BE REQUIRED DURING CERTAIN OPERATIONS TO KEEP EXPOSURE LEVEL BELOW THE LIMITS LISTED IN SECTION II OF THIS DATA SHEET.

PROTECTIVE GLOVES: CHEMICAL RESISTANT NITRILE, NEOPRENE OR RUBBER GLOVES REQUIRED.

EYE PROTECTION: WEAR FACE SHIELD OR CHEMICAL GOGGLES.

OTHER PROTECTIVE EQUIPMENT: WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. EYE WASH STATION AND SAFETY SHOWER SHOULD BE AVAILABLE.

HYGIENIC PRACTICES: WASH HANDS BEFORE EATING OR SMOKING.

SECTION IX: SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: AVOID PROLONGED OR REPEATED INHALATION OF HEATED VAPORS OR SPRAY MIST. KEEP AWAY FROM HEAT OR OPEN FLAME. THIS MATERIAL MAY CAUSE SENSITIZATION. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT ALLOW CONTAMINATED CLOTHING TO CONTACT SKIN.

SECTION X: SUPPLEMENTAL INFORMATION

THIS MATERIAL HAS BEEN CATEGORIZED AS HAVING THE FOLLOWING HAZARD(S) AS DEFINED BY SARA TITLE III REGULATIONS (40 CFR 370): ACUTE,

THE INFORMATION IN THIS DATA SHEET IS BELIEVED TO BE ACCURATE AND TRUE AT THE TIME OF PREPARATION OF THIS DOCUMENT. THIS IS NOT A WARRANTY OF PRODUCT OR PRODUCT SPECIFICATION. THE END-USER OF THIS PRODUCT IS ADVISED TO VERIFY IN ADVANCE THAT THE INFORMATION IN THIS SHEET IS CURRENT, APPLICABLE, AND SUITABLE TO THEIR CIRCUMSTANCES.

NIOSH PUBLICATION #78-210. Considered hazardous under 29CFR 1910.1200.
This chemical is not listed under 29CFR 1910.1000.

"PURSUANT TO TITLE III OF THE SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (SARA) AND 40 CFR PART 372, THIS PRODUCT CONTAINS OR MAY CONTAIN A TOXIC CHEMICAL IN A QUANTITY SUBJECT TO THE REPORTING REQUIREMENTS UNDER SECTION 313"

SECTION III PHYSICAL DATA

BOILING RANGE: 180-229 F. WEIGHT/GALLON: 7.40 lbs. VAPOR PRESSURE: 31.2mmHg@20C
VAPOR DENSITY: HEAVIER THAN AIR: XX LIGHTER THAN AIR:
EVAPORATION RATE: FASTER THAN ETHER: SLOWER THAN ETHER: XX
PERCENT VOLATILE BY VOLUME: 88.16% REACTIVITY IN WATER: NONE
VOC: 693 GRAMS/LITER (LESS WATER) SOLUBILITY IN WATER: PARTIALLY
MELTING POINT: Unknown pH: N/A VISCOSITY: 70-72 KU FREEZING POINT: -89.5 C.
APPEARANCE & ODOR: Muddy green liquid, alcohol odor. DECOMPOSITION TEMP: Unknown

SECTION IV FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION: OSHA: FLAMMABLE LIQUID CLASS: 3
FLASH POINT: 53 F. TCC
LEL: 1.45%
DOT: FLAMMABLE LIQUID UN NUMBER: 1263

EXTINGUISHING MEDIA: Foam, CO2, Dry Chemical, or Water Fog.

USE THE ABOVE OR ANY CLASS B EXTINGUISHING AGENT. WATER MAY BE UNSUITABLE AS AN EXTINGUISHING MEDIUM, BUT HELPFUL IN KEEPING ADJACENT CONTAINERS COOL.

SPECIAL FIREFIGHTING PROCEDURES: Firefighters and others exposed to vapors or products of combustion should wear self-contained breathing apparatus.

Evacuate area of unprotected personnel. Wear protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Vapors may form an explosive mixture in air and may be ignited by sparks, pilot lights, etc. Closed containers may rupture when exposed to extreme heat.

15328A (solcarc)

SECTION V: HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:

SKIN: THIS MATERIAL MAY CAUSE IRRITATION, SENSITIZATION, OR DEFATTING OF SKIN UPON PROLONGED OR REPEATED CONTACT.
INHALATION: EXCESSIVE EXPOSURE TO VAPORS OR SPRAY MIST CAN RESULT IN HEADACHE, DIZZINESS, NAUSEA AND LOSS OF CONSCIOUSNESS.
SOME REPORTS HAVE ASSOCIATED REPEATED & PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN & NERVOUS SYSTEM DAMAGE.
EYES: THIS MATERIAL MAY BE AN EYE IRRITANT.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE: NONE, WHEN USED IN ACCORDANCE WITH SAFE HANDLING INSTRUCTIONS: (SEE SECTION VIII)

EMERGENCY AND FIRST AID PROCEDURES:

SKIN: PROMPTLY WASH WITH SOAP AND WATER. REMOVE AND WASH ANY CONTAMINATED CLOTHING BEFORE REUSE.
EYES: FLUSH WITH LARGE QUANTITIES OF WATER FOR 15 MINUTES AND SEEK MEDICAL ATTENTION.
SWALLOWING: IF INGESTED DO NOT INDUCE VOMITING; KEEP PERSON WARM AND QUIET AND GET MEDICAL ATTENTION. ASPIRATION OF MATERIAL INTO LUNGS CAN CAUSE CHEMICAL PNEUMONITIS WHICH CAN BE FATAL.
INHALATION: REMOVE VICTIM TO FRESH AIR IMMEDIATELY. IF RESPIRATORY SYMPTOMS DEVELOP, SEEK MEDICAL ATTENTION AT ONCE.

PRIMARY ROUTE(S) OF ENTRY: INHALATION, DERMAL, INGESTION.

CARCINOGENICITY: THIS PRODUCT CONTAINS NO KNOWN CARCINOGENS IN REPORTABLE QUANTITIES AS DEFINED BY ACGIH, OSHA, NTP, IARC.

SECTION VI: REACTIVITY DATA

STABILITY: UNSTABLE:___ STABLE: XX HAZARDOUS POLYMERIZATION: MAY OCCUR:___ WILL NOT OCCUR: XX

HAZARDOUS DECOMPOSITION PRODUCTS: INCOMPLETE COMBUSTION CAN YIELD CARBON MONOXIDE AND TOXIC VAPORS.

CONDITIONS TO AVOID: HEAT, SPARKS & OPEN FLAME. IF PRODUCT CONTAINS ALUMINUM, MOISTURE IN CLOSED CONTAINERS WILL GENERATE HYDROGEN GAS.

INCOMPATIBILITY: AVOID CONTACT WITH STRONG OXIDANTS, ACIDS, BASES AND EPOXY HARDENERS UNDER UNCONTROLLED CONDITIONS.

SECTION VII: SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: REMOVE ALL SOURCES OF IGNITION. VENTILATE AREA. ABSORB SPILL WITH AN ABSORBENT MATERIAL SUCH AS SAWDUST, VERMICULITE OR SAND AND PLACE MATERIAL INTO A CLOSED CONTAINER. IF LARGE SPILL, DIKE AREA TO PREVENT THIS MATERIAL FROM ENTERING WATER SYSTEMS OR SEWERS. WEAR PROTECTIVE EQUIPMENT DURING CLEANUP.

WASTE DISPOSAL METHOD: IF DISCARDED, THIS MATERIAL AND CONTAINERS SHOULD BE TREATED AS HAZARDOUS WASTE BASED ON THE CHARACTERISTIC IGNITABILITY AS DEFINED UNDER FEDERAL RCRA REGULATIONS (40 CFR 261). DISPOSAL OF THIS MATERIAL OR ITS CONTAINERS REQUIRES COMPLIANCE WITH APPLICABLE LABELING, PACKAGING AND RECORDKEEPING STANDARDS.

WASTE DISPOSAL: DISPOSE IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL AGENCIES. GROUND HANDLING EQUIPMENT TO PREVENT SPARKS.
FOR FURTHER INFORMATION: CONTACT YOUR STATE OR LOCAL WASTE AGENCY OR THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY'S RCRA HOTLINE (1-800-424-9346 OR 1-202-382-3000).

SECTION VIII: SAFE HANDLING AND USE INFORMATION

KEEP OUT OF THE REACH OF CHILDREN

RESPIRATORY PROTECTION: A CANISTER-TYPE RESPIRATOR MUST BE WORN TO PREVENT THE INHALATION OF VAPORS OR SPRAY MIST WHEN THE TLV OR PEL IS EXCEEDED.

VENTILATION: GENERAL VENTILATION IS REQUIRED DURING NORMAL USE. LOCAL VENTILATION MAY BE REQUIRED DURING CERTAIN OPERATIONS TO KEEP EXPOSURE LEVEL BELOW THE LIMITS LISTED IN SECTION II OF THIS DATA SHEET.

PROTECTIVE GLOVES: CHEMICAL RESISTANT NITRILE, NEOPRENE OR RUBBER GLOVES REQUIRED.

EYE PROTECTION: WEAR FACE SHIELD OR CHEMICAL GOGGLES.

OTHER PROTECTIVE EQUIPMENT: WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. EYE WASH STATION AND SAFETY SHOWER SHOULD BE AVAILABLE.

HYGIENIC PRACTICES: WASH HANDS BEFORE EATING OR SMOKING.

SECTION IX: SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: AVOID PROLONGED OR REPEATED INHALATION OF HEATED VAPORS OR SPRAY MIST. KEEP AWAY FROM HEAT OR OPEN FLAME. THIS MATERIAL MAY CAUSE SENSITIZATION. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT ALLOW CONTAMINATED CLOTHING TO CONTACT SKIN. DO NOT WELD ON FULL OR EMPTY CONTAINERS. KEEP CONTAINERS CLOSED WHEN NOT IN USE, AND PROPERLY LABELED.

SECTION X: SUPPLEMENTAL INFORMATION

THIS MATERIAL HAS BEEN CATEGORIZED AS HAVING THE FOLLOWING HAZARD(S) AS DEFINED BY SARA TITLE III REGULATIONS (40 CFR 370): ACUTE, ...

THE INFORMATION IN THIS DATA SHEET IS BELIEVED TO BE ACCURATE AND TRUE AT THE TIME OF PREPARATION OF THIS DOCUMENT. THIS IS NOT A WARRANTY OF PRODUCT OR PRODUCT SPECIFICATION. THE END-USER OF THIS PRODUCT IS ADVISED TO VERIFY IN ADVANCE THAT THE INFORMATION IN THIS SHEET IS CURRENT, APPLICABLE, AND SUITABLE TO THEIR CIRCUMSTANCES.

15328B (acidic)

=====
SECTION V: HEALTH HAZARD DATA
=====

PRIMARY ROUTE(S) OF EXPOSURE: INHALATION, SKIN OR EYE CONTACT.

EFFECTS OF OVEREXPOSURE:

INHALATION: INHALATION OF MIST CAN CAUSE DAMAGE TO NASAL AND RESPIRATORY PASSAGES.

SKIN CONTACT: CAUSES BURNS.

EYE CONTACT: CAUSES BURNS TO THE EYES.

INGESTION: RESULTS IN SEVERE DAMAGE TO MUCOUS MEMBRANES.

EMERGENCY AND FIRST AID PROCEDURES:

INHALATION: REMOVE VICTIM TO FRESH AIR IMMEDIATELY. IF RESPIRATORY SYMPTOMS DEVELOP, SEEK MEDICAL ATTENTION AT ONCE.

SKIN CONTACT: WASH OFF QUICKLY WITH PLENTY OF WATER, THEN SOAP & WATER. GET MEDICAL ATTENTION. REMOVE & WASH CONTAMINATED CLOTHING BEFORE REUSE.

EYE CONTACT: FLUSH IMMEDIATELY WITH LARGE AMOUNTS OF WATER, ESPECIALLY UNDER LIDS, FOR AT LEAST 30 MINUTES. OBTAIN EMERGENCY MEDICAL TREATMENT.

INGESTION: IF SWALLOWED, OBTAIN MEDICAL TREATMENT IMMEDIATELY. DO NOT INDUCE VOMITING. GIVE LOTS OF WATER.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: NONE, WHEN USED IN ACCORDANCE WITH SAFE HANDLING INSTRUCTIONS. (SEE SECTION VIII).

CARCINOGENICITY: THIS PRODUCT CONTAINS NO KNOWN CARCINOGENS IN REPORTABLE QUANTITIES AS DEFINED BY NTP, IARC, OSHA, EPA.

=====
SECTION VI: REACTIVITY DATA
=====

STABILITY: UNSTABLE:___ STABLE: XX HAZARDOUS POLYMERIZATION: MAY OCCUR:___ WILL NOT OCCUR: XX

HAZARDOUS DECOMPOSITION PRODUCTS: MAY FORM TOXIC AND PHOSPHOROUS COMPOUNDS.

CONDITIONS TO AVOID: ELEVATED TEMPERATURES.

INCOMPATIBILITY: ALKALINE AGENTS, COMBUSTIBLE MATERIALS, OXIDIZERS AND REDUCING AGENTS.

=====
SECTION VII: SPILL OR LEAK PROCEDURES
=====

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: COMPLY WITH ALL APPLICABLE HEALTH AND ENVIRONMENTAL REGULATIONS* VENTILATE AREA. SPILLS MAY BE COLLECTED WITH ABSORBENT MATERIALS.

WASTE DISPOSAL: DISPOSE IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL REGULATIONS. AVOID DISCHARGE TO NATURAL WATERS.

=====
SECTION VIII: SAFE HANDLING AND USE INFORMATION
=====

USE ONLY WITH ADEQUATE VENTILATION. AVOID BREATHING VAPOR AND SPRAY MIST. AVOID CONTACT WITH SKIN AND EYES.

VENTILATION: LOCAL EXHAUST PREFERABLE. GENERAL EXHAUST ACCEPTABLE IF THE EXPOSURE TO MATERIALS IN SECTION II IS MAINTAINED BELOW APPLICABLE EXPOSURE LIMITS.

RESPIRATORY PROTECTION: IF PERSONAL EXPOSURE CANNOT BE CONTROLLED BELOW APPLICABLE LIMITS BY VENTILATION, WEAR A PROPERLY FITTED ORGANIC VAPOR/PARTICULATE RESPIRATOR APPROVED BY NIOSH/OSHA FOR PROTECTION AGAINST MATERIALS IN SECTION II.

PROTECTIVE GLOVES: WEAR GLOVES WHICH ARE RECOMMENDED BY GLOVE SUPPLIER FOR PROTECTION AGAINST MATERIALS IN SECTION II.

EYE PROTECTION: WEAR SAFETY SPECTACLES WITH UNPERFORATED SIDESHIELDS.

PERSONAL PROTECTIVE EQUIPMENT: EYE WASH - SAFETY SHOWERS - GOGGLES - SAFETY GLASSES - IMPERVIOUS GLOVES.

HYGIENIC PRACTICES: KEEP WORK AREA CLEAN AND FREE FROM SPILLS AND LEAKS. ALWAYS WASH HANDS THOROUGHLY WITH SOAP AND WATER BEFORE HANDLING FOOD, DRINK OR SMOKING.

=====
SECTION IX: SPECIAL PRECAUTIONS
=====

KEEP OUT OF THE REACH OF CHILDREN

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: KEEP FROM FREEZING. STORE CONTAINERS WITH LIDS TIGHTLY CLOSED AND APPROPRIATELY LABELED.

=====
SECTION X: SUPPLEMENTAL INFORMATION
=====

NOTE: THIS PRODUCT CONTAINS NO MERCURY IN REPORTABLE QUANTITIES AS DEFINED BY OSHA AND EPA.

THE INFORMATION IN THIS DATA SHEET IS BELIEVED TO BE ACCURATE AND TRUE AT THE TIME OF PREPARATION OF THIS DOCUMENT. THIS IS NO WARRANTY OF PRODUCT OR PRODUCT SPECIFICATION. THE END-USER OF THIS PRODUCT IS ADVISED TO VERIFY IN ADVANCE THAT THE INFORMATION IN THIS SHEET IS CURRENT, APPLICABLE, AND SUITABLE TO THEIR CIRCUMSTANCES.

SECTION IX: SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: AVOID PROLONGED OR REPEATED INHALATION OF HEATED VAPORS OR SPRAY MIST. KEEP AWAY FROM HEAT OR OPEN FLAME. THIS MATERIAL MAY CAUSE SENSITIZATION. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT ALLOW CONTAMINATED CLOTHING TO CONTACT SKIN. DO NOT WELD ON FULL OR EMPTY CONTAINERS. KEEP CONTAINERS CLOSED WHEN NOT IN USE, AND PROPERLY LABELED.

SECTION X: SUPPLEMENTAL INFORMATION

THIS MATERIAL HAS BEEN CATEGORIZED AS HAVING THE FOLLOWING HAZARD(S) AS DEFINED BY SARA TITLE III REGULATIONS (40 CFR 370): ACUTE, FI

THE INFORMATION IN THIS DATA SHEET IS BELIEVED TO BE ACCURATE AND TRUE AT THE TIME OF PREPARATION OF THIS DOCUMENT. THIS IS NOT A WARRANTY OF PRODUCT OR PRODUCT SPECIFICATION. THE END-USER OF THIS PRODUCT IS ADVISED TO VERIFY IN ADVANCE THAT THE INFORMATION IN THIS SHEET IS CURRENT, APPLICABLE, AND SUITABLE TO THEIR CIRCUMSTANCES.

INGREDIENT	CAS NUMBER	PERCENT (BY WEIGHT)	OCCUPATIONAL EXPOSURE TLV (ACGIH) PEL (OSHA)	
XYLENE	1330-20-7	12.21%	100ppm	100ppm
PHENYLETHANE	100-41-4	2.16%	100ppm	100ppm
AROMATIC HYDROCARBON	64742-94-5	16.16%	50ppm	50ppm
1-METHOXY-2-PROPANOL ACETATE	108-65-6	26.35%	Not Established	

"PURSUANT TO TITLE III OF THE SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (SARA) AND 40 CFR PART 372, THIS PRODUCT CONTAINS OR MAY CONTAIN A TOXIC CHEMICAL IN A QUANTITY SUBJECT TO THE REPORTING REQUIREMENTS UNDER SECTION 313"

SECTION III PHYSICAL DATA

BOILING RANGE: 281-420 F. WEIGHT/GALLON: 8.45 LBS. VAPOR PRESSURE: 9.5mmHg@20C
VAPOR DENSITY: HEAVIER THAN AIR: XX LIGHTER THAN AIR:
EVAPORATION RATE: FASTER THAN ETHER: SLOWER THAN ETHER: XX
PERCENT VOLATILE BY VOLUME: 59% REACTIVITY IN WATER: NIL
VOC: 576 GRAMS/LITER (LESS WATER) SOLUBILITY IN WATER: NIL
MELTING POINT: N/A pH: N/A VISCOSITY: 22-26 Sec. #4 Ford Cup
APPEARANCE & ODOR: Grayish liquid with mild aromatic odor.

SECTION IV FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION: OSHA: FLAMMABLE LIQUID FLASH POINT: 80 F. TCC
CLASS: 3 % LEL: 1.0 % UEL: 7.0
DOT: FLAMMABLE LIQUID UN NUMBER: 1263

EXTINGUISHING MEDIA: Foam, CO2, Dry Chemical, or Water Fog.
USE THE ABOVE OR ANY CLASS B EXTINGUISHING AGENT. WATER MAY BE UNSUITABLE AS AN EXTINGUISHING MEDIUM, BUT HELPFUL IN KEEPING ADJACENT CONTAINERS COOL.
SPECIAL FIREFIGHTING PROCEDURES: Firefighters and others exposed to vapors or products of combustion should wear self-contained breathing apparatus.
Evacuate area of unprotected personnel. Wear protective clothing.
UNUSUAL FIRE AND EXPLOSION HAZARDS: Vapors may form an explosive mixture in air and may be ignited by sparks, pilot lights, etc. Closed containers may rupture when exposed to extreme heat.

X-6390 (solvent)

SECTION V: HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:

SKIN: THIS MATERIAL MAY CAUSE IRRITATION, SENSITIZATION, OR DEFATTING OF SKIN UPON PROLONGED OR REPEATED CONTACT.
INHALATION: EXCESSIVE EXPOSURE TO VAPORS OR SPRAY MIST CAN RESULT IN HEADACHE, DIZZINESS, NAUSEA AND LOSS OF CONSCIOUSNESS.
EYES: THIS MATERIAL MAY BE AN EYE IRRITANT.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE: NONE, WHEN USED IN ACCORDANCE WITH SAFE HANDLING INSTRUCTIONS. (SEE SECTION VIII)

EMERGENCY AND FIRST AID PROCEDURES:

SKIN: PROMPTLY WASH WITH SOAP AND WATER. REMOVE AND WASH ANY CONTAMINATED CLOTHING BEFORE REUSE.
EYES: FLUSH WITH LARGE QUANTITIES OF WATER FOR 15 MINUTES AND SEEK MEDICAL ATTENTION.
SWALLOWING: IF INGESTED DO NOT INDUCE VOMITING; KEEP PERSON WARM AND QUIET AND GET MEDICAL ATTENTION.
INHALATION: REMOVE VICTIM TO FRESH AIR IMMEDIATELY. IF RESPIRATORY SYMPTOMS DEVELOP, SEEK MEDICAL ATTENTION AT ONCE.

PRIMARY ROUTE(S) OF ENTRY: INHALATION, DERMAL, INGESTION.

CARCINOGENICITY: THIS PRODUCT CONTAINS NO KNOWN CARCINOGENS IN REPORTABLE QUANTITIES AS DEFINED BY ACGIH, OSHA, NTP, IARC.

SECTION VI: REACTIVITY DATA

STABILITY: UNSTABLE:___ STABLE:XX HAZARDOUS POLYMERIZATION: MAY OCCUR:___ WILL NOT OCCUR:XX

HAZARDOUS DECOMPOSITION PRODUCTS: INCOMPLETE COMBUSTION CAN YIELD CARBON MONOXIDE AND TOXIC VAPORS.

CONDITIONS TO AVOID: HEAT, SPARKS & OPEN FLAME. IF PRODUCT CONTAINS ALUMINUM, MOISTURE IN CLOSED CONTAINERS WILL GENERATE HYDROGEN GAS.

INCOMPATIBILITY: AVOID CONTACT WITH STRONG OXIDANTS, ACIDS, BASES AND EPOXY HARDENERS UNDER UNCONTROLLED CONDITIONS.

SECTION VII: SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: REMOVE ALL SOURCES OF IGNITION. VENTILATE AREA. ABSORB SPILL WITH AN ABSORBENT MATERIAL SUCH AS SAWDUST, VERMICULITE OR SAND AND PLACE MATERIAL INTO A CLOSED CONTAINER.

WASTE DISPOSAL METHOD: IF DISCARDED, THIS MATERIAL AND CONTAINERS SHOULD BE TREATED AS HAZARDOUS WASTE BASED ON THE CHARACTERISTICS OF IGNITABILITY AS DEFINED UNDER FEDERAL RCRA REGULATIONS (40 CFR 261). DISPOSAL OF THIS MATERIAL OR ITS CONTAINERS REQUIRES COMPLIANCE WITH APPLICABLE LABELING, PACKAGING AND RECORDKEEPING STANDARDS.

WASTE DISPOSAL: DISPOSE IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL AGENCIES. GROUND HANDLING EQUIPMENT TO PREVENT SPARKS. FOR FURTHER INFORMATION: CONTACT YOUR STATE OR LOCAL WASTE AGENCY OR THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY'S RCRA HOTLINE (1-800-424-9346 OR 1-202-382-3000).

SECTION VIII: SAFE HANDLING AND USE INFORMATION KEEP OUT OF THE REACH OF CHILDREN

RESPIRATORY PROTECTION: A CANISTER-TYPE RESPIRATOR MUST BE WORN TO PREVENT THE INHALATION OF VAPORS OR SPRAY MIST WHEN THE TLV OR PEL IS EXCEEDED.

VENTILATION: GENERAL VENTILATION IS REQUIRED DURING NORMAL USE. LOCAL VENTILATION MAY BE REQUIRED DURING CERTAIN OPERATIONS TO KEEP EXPOSURE LEVEL BELOW THE LIMITS LISTED IN SECTION II OF THIS DATA SHEET.

PROTECTIVE GLOVES: CHEMICAL RESISTANT NITRILE, NEOPRENE OR RUBBER GLOVES REQUIRED.

EYE PROTECTION: WEAR FACE SHIELD OR CHEMICAL GOGGLES.

OTHER PROTECTIVE EQUIPMENT: WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. EYE WASH STATION AND SAFETY SHOWER SHOULD BE AVAILABLE.

HYGIENIC PRACTICES: WASH HANDS BEFORE EATING OR SMOKING.

SECTION IX: SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: AVOID PROLONGED OR REPEATED INHALATION OF HEATED VAPORS OR SPRAY MIST. KEEP AWAY FROM HEAT OR OPEN FLAME. THIS MATERIAL MAY CAUSE SENSITIZATION. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT ALLOW CONTAMINATED CLOTHING TO CONTACT SKIN. DO NOT WELD ON FULL OR EMPTY CONTAINERS. KEEP CONTAINERS CLOSED WHEN NOT IN USE, AND PROPERLY LABELED.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: AVOID PROLONGED OR REPEATED INHALATION OF HEATED VAPORS OR SPRAY MIST. KEEP AWAY FROM HEAT OR OPEN FLAME. THIS MATERIAL MAY CAUSE SENSITIZATION. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT ALLOW CONTAMINATED CLOTHING TO CONTACT SKIN. DO NOT WELD ON FULL OR EMPTY CONTAINERS. KEEP CONTAINERS CLOSED WHEN NOT IN USE, AND PROPERLY LABELED.

SECTION X: SUPPLEMENTAL INFORMATION

THIS MATERIAL HAS BEEN CATEGORIZED AS HAVING THE FOLLOWING HAZARD(S) AS DEFINED BY SARA TITLE III REGULATIONS (40 CFR 370): ACUTE

THE INFORMATION IN THIS DATA SHEET IS BELIEVED TO BE ACCURATE AND TRUE AT THE TIME OF PREPARATION OF THIS DOCUMENT. THIS IS NOT A WARRANTY OF PRODUCT OR PRODUCT SPECIFICATION. THE END-USER OF THIS PRODUCT IS ADVISED TO VERIFY IN ADVANCE THAT THE INFORMATION IN THIS SHEET IS CURRENT, APPLICABLE, AND SUITABLE TO THEIR CIRCUMSTANCES.

(solvent)

FARWEST PAINT MANUFACTURING CO.
4522 SOUTH 133RD STREET
TUKWILA, WASHINGTON 98168

MATERIAL SAFETY DATA SHEET
FOR COATINGS AND RELATED MATERIALS
PREP: JUNE 1993 UPDATE: CURRENT

SECTION I PRODUCT IDENTIFICATION

PRODUCT NUMBER: X-6392 COMPONENT A

(Also need X-6390 Component B MSDS)

PRODUCT NAME: FAST-DRI EPOXY PRIMER
COMPONENT A

PRODUCT CLASS: 2 COMPONENT ORGANIC
COATING SYSTEM

24 HOUR EMERGENCY ASSISTANCE

EMERGENCY (CHEMTREC) (800) 424-9300
INFORMATION (FARWEST) (206) 244-8844

HAZARD RATING	THIS PRODUCT
0 LOWEST	HEALTH 2
1	FLAMMABILITY 1
2	REACTIVITY 0
3	PERSONAL
4 EXTREME	PROTECTION G

HAZARDOUS MATERIAL: YES XX NO

SECTION II HAZARDOUS INGREDIENTS

INGREDIENT	CAS NUMBER	PERCENT (BY WEIGHT)	OCCUPATIONAL EXPOSURE	
			TLV (ACGIH)	PEL (OSHA)
MINERAL SPIRITS 350	8052-41-3	0.04%	100ppm	100ppm
PROPYLENE GLYCOL MONOMETHYL ETHER ACETATE	108-65-6	3.37%	Not Established	
AROMATIC HYDROCARBON	64742-94-5	18.03%	50ppm	50ppm

"PURSUANT TO TITLE III OF THE SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (SARA) AND 40 CFR PART 372, THIS PRODUCT CONTAINS OR MAY CONTAIN A TOXIC CHEMICAL IN A QUANTITY SUBJECT TO THE REPORTING REQUIREMENTS UNDER SECTION 313"

SECTION III PHYSICAL DATA

BOILING RANGE: 354-420 F. WEIGHT/GALLON: 12.19 LBS. VAPOR PRESSURE: 5.2mmHg@100F
VAPOR DENSITY: HEAVIER THAN AIR: XX LIGHTER THAN AIR:
EVAPORATION RATE: FASTER THAN ETHER: SLOWER THAN ETHER: XX
PERCENT VOLATILE BY VOLUME: 35.0% REACTIVITY IN WATER: NIL
VOC: 423 GRAMS/LITER (LESS WATER) SOLUBILITY IN WATER: NIL
MELTING POINT: N/A pH: N/A VISCOSITY: 105 KU FREEZING POINT: N/A
APPEARANCE/ODOR: White, Buff or Gray liquid/mild odor. DECOMPOSITION TEMP: N/A

SECTION IV FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION: OSHA: COMBUSTIBLE FLASH POINT: 116 F. TCC
CLASS: 3 % LEL: 0.7 % UEL: 6.0
DOT: COMBUSTIBLE UN NUMBER: 1263

EXTINGUISHING MEDIA: Foam, CO2, Dry Chemical, or Water Fog.
USE THE ABOVE OR ANY CLASS B EXTINGUISHING AGENT. WATER MAY BE UNSUITABLE AS AN EXTINGUISHING MEDIUM, BUT HELPFUL IN KEEPING ADJACENT CONTAINERS COOL.
SPECIAL FIREFIGHTING PROCEDURES: Firefighters and others exposed to vapors or products of combustion should wear self-contained breathing apparatus.
Evacuate area of unprotected personnel. Wear protective clothing.
UNUSUAL FIRE AND EXPLOSION HAZARDS: Vapors may form an explosive mixture in air and may be ignited by sparks, pilot lights, etc. Closed containers may rupture when exposed to extreme heat.

X-6392 (solvent)

SECTION V: HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:

SKIN: THIS MATERIAL MAY CAUSE IRRITATION, SENSITIZATION, OR DEFATTING OF SKIN UPON PROLONGED OR REPEATED CONTACT.
INHALATION: EXCESSIVE EXPOSURE TO VAPORS OR SPRAY MIST CAN RESULT IN HEADACHE, DIZZINESS, NAUSEA AND LOSS OF CONSCIOUSNESS.
EYES: THIS MATERIAL MAY BE AN EYE IRRITANT.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE: NONE, WHEN USED IN ACCORDANCE WITH SAFE HANDLING INSTRUCTIONS. (SEE SECTION VIII)

EMERGENCY AND FIRST AID PROCEDURES:

SKIN: PROMPTLY WASH WITH SOAP AND WATER. REMOVE AND WASH ANY CONTAMINATED CLOTHING BEFORE REUSE.
EYES: FLUSH WITH LARGE QUANTITIES OF WATER FOR 15 MINUTES AND SEEK MEDICAL ATTENTION.
SWALLOWING: IF INGESTED DO NOT INDUCE VOMITING; KEEP PERSON WARM AND QUIET AND GET MEDICAL ATTENTION.
INHALATION: REMOVE VICTIM TO FRESH AIR IMMEDIATELY. IF RESPIRATORY SYMPTOMS DEVELOP, SEEK MEDICAL ATTENTION AT ONCE.

PRIMARY ROUTE(S) OF ENTRY: INHALATION, DERMAL, INGESTION.

CARCINOGENICITY: THIS PRODUCT CONTAINS NO KNOWN CARCINOGENS IN REPORTABLE QUANTITIES AS DEFINED BY ACGIH, OSHA, NTP, IARC.

SECTION VI: REACTIVITY DATA

STABILITY: UNSTABLE: UNSTABLE: STABLE: XX HAZARDOUS POLYMERIZATION: MAY OCCUR: WILL NOT OCCUR: XX

HAZARDOUS DECOMPOSITION PRODUCTS: INCOMPLETE COMBUSTION CAN YIELD CARBON MONOXIDE AND TOXIC VAPORS.

CONDITIONS TO AVOID: HEAT, SPARKS & OPEN FLAME. IF PRODUCT CONTAINS ALUMINUM, MOISTURE IN CLOSED CONTAINERS WILL GENERATE HYDROGEN GAS.

INCOMPATIBILITY: AVOID CONTACT WITH STRONG OXIDANTS, ACIDS, BASES AND EPOXY HARDENERS UNDER UNCONTROLLED CONDITIONS.

SECTION VII: SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: REMOVE ALL SOURCES OF IGNITION. VENTILATE AREA. ABSORB SPILL WITH AN ABSORBENT MATERIAL SUCH AS SAWDUST, VERMICULITE OR SAND AND PLACE MATERIAL INTO A CLOSED CONTAINER.

WASTE DISPOSAL METHOD: IF DISCARDED, THIS MATERIAL AND CONTAINERS SHOULD BE TREATED AS HAZARDOUS WASTE BASED ON THE CHARACTERISTICS OF THE MATERIAL AS DEFINED UNDER FEDERAL RCRA REGULATIONS (40 CFR 261).

WASTE DISPOSAL: DISPOSE IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL AGENCIES. GROUND HANDLING EQUIPMENT TO PREVENT SPARKS. FOR FURTHER INFORMATION: CONTACT YOUR STATE OR LOCAL WASTE AGENCY OR THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY'S RCRA HOTLINE (1-800-424-9346 OR 1-202-382-3000).

SECTION VIII: SAFE HANDLING AND USE INFORMATION KEEP OUT OF THE REACH OF CHILDREN

RESPIRATORY PROTECTION: A CANISTER-TYPE RESPIRATOR MUST BE WORN TO PREVENT THE INHALATION OF VAPORS OR SPRAY MIST WHEN THE TLV OR PEL IS EXCEEDED.

VENTILATION: GENERAL VENTILATION IS REQUIRED DURING NORMAL USE. LOCAL VENTILATION MAY BE REQUIRED DURING CERTAIN OPERATIONS TO KEEP EXPOSURE LEVEL BELOW THE LIMITS LISTED IN SECTION II OF THIS DATA SHEET.

PROTECTIVE GLOVES: CHEMICAL RESISTANT NITRILE, NEOPRENE OR RUBBER GLOVES REQUIRED.

EYE PROTECTION: WEAR FACE SHIELD OR CHEMICAL GOGGLES.

OTHER PROTECTIVE EQUIPMENT: WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. EYE WASH STATION AND SAFETY SHOWER SHOULD BE AVAILABLE.

HYGIENIC PRACTICES: WASH HANDS BEFORE EATING OR SMOKING.

SECTION IX: SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: AVOID PROLONGED OR REPEATED INHALATION OF HEATED VAPORS OR SPRAY MIST. KEEP AWAY FROM HEAT OR OPEN FLAME. THIS MATERIAL MAY CAUSE SENSITIZATION. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT ALLOW CONTAMINATED CLOTHING TO CONTACT SKIN.

SECTION X: SUPPLEMENTAL INFORMATION

THIS MATERIAL HAS BEEN CATEGORIZED AS HAVING THE FOLLOWING HAZARD(S) AS DEFINED BY SARA TITLE III REGULATIONS (40 CFR 370): ACUTE

THE INFORMATION IN THIS DATA SHEET IS BELIEVED TO BE ACCURATE AND TRUE AT THE TIME OF PREPARATION OF THIS DOCUMENT. THIS IS NOT A WARRANTY OF PRODUCT OR PRODUCT SPECIFICATION. THE END-USER OF THIS PRODUCT IS ADVISED TO VERIFY IN ADVANCE THAT THE INFORMATION IN THIS SHEET IS CURRENT, APPLICABLE, AND SUITABLE TO THEIR CIRCUMSTANCES.

(solvent)

SECTION I PRODUCT IDENTIFICATION

PRODUCT NUMBER: 1007-X

PRODUCT NAME: FLOOR GRIP

PRODUCT CLASS: PIGMENTED ACRYLIC RESIN SOLUTION

24 HOUR EMERGENCY ASSISTANCE

EMERGENCY (CHEMTREC) (800) 424-9300
INFORMATION (FARWEST) (206) 244-8844

HAZARD RATING	THIS PRODUCT
0 LOWEST	HEALTH 2

SECTION II HAZARDOUS INGREDIENTS

INGREDIENT	CAS NUMBER	PERCENT (BY WEIGHT)	OCCUPATIONAL TLV (ACGIH)	EXPOSURE PEL (OSHA)
XYLENE	1330-20-7	13.44%	100ppm	100ppm
NATURAL MINERAL QUARTZ (SAND)	14808-60-7	35.00%	8Hr-50Ug/m3	8Hr-.10mg/m3

"PURSUANT TO TITLE III OF THE SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (SARA) AND 40 CFR PART 372, THIS PRODUCT CONTAINS OR MAY CONTAIN A TOXIC CHEMICAL IN A QUANTITY SUBJECT TO THE REPORTING REQUIREMENTS UNDER SECTION 313"

SECTION III PHYSICAL DATA

BOILING RANGE: 281-284 F. WEIGHT/GALLON: 14.12 lbs. VAPOR PRESSURE: 9.5mmHg@20C
 VAPOR DENSITY: HEAVIER THAN AIR: XX LIGHTER THAN AIR: _____
 EVAPORATION RATE: FASTER THAN ETHER: _____ SLOWER THAN ETHER: XX
 PERCENT ORGANIC VOLATILE BY VOLUME: 37.53% SOLUBILITY IN WATER: NIL
 VOC: 327 GRAMS/LITER (LESS WATER) REACTIVITY IN WATER: NIL
 APPEARANCE: Clear (or color of tint) thixotropic material, sweet aromatic odor.

SECTION IV FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION: OSHA: FLAMMABLE CLASS: 3 DOT: FLAMMABLE
 FLASH POINT: 80 F. TCC
 % LEL: 1.5 % UEL: 7.0
 UN NUMBER: 1263

EXTINGUISHING MEDIA: Foam, CO2, Dry Chemical, or Water Fog.
 USE THE ABOVE OR ANY CLASS B EXTINGUISHING AGENT. WATER MAY BE UNSUITABLE AS AN EXTINGUISHING MEDIUM, BUT HELPFUL IN KEEPING ADJACENT CONTAINERS COOL.
 SPECIAL FIREFIGHTING PROCEDURES: Firefighters and others exposed to vapors or ducts of combustion should wear self-contained breathing apparatus.
 Isolate area of unprotected personnel. Wear protective clothing.
 UNUSUAL FIRE AND EXPLOSION HAZARDS: Vapors may form an explosive mixture in air and may be ignited by sparks, pilot lights, etc. Closed containers may rupture when exposed to extreme heat.

SECTION V: HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:

SKIN: THIS MATERIAL MAY CAUSE IRRITATION, SENSITIZATION, OR DEFATTING OF SKIN UPON PROLONGED OR REPEATED CONTACT.
INHALATION: EXCESSIVE EXPOSURE TO VAPORS OR SPRAY MIST CAN RESULT IN HEADACHE, DIZZINESS, NAUSEA AND LOSS OF CONSCIOUSNESS.
EYES: SOME REPORTS HAVE ASSOCIATED REPEATED & PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN & NERVOUS SYSTEM DAMAGE. THIS MATERIAL MAY BE AN EYE IRRITANT.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE: NONE, WHEN USED IN ACCORDANCE WITH SAFE HANDLING INSTRUCTIONS. (SEE SECTION VIII)

EMERGENCY AND FIRST AID PROCEDURES:

SKIN: PROMPTLY WASH WITH SOAP AND WATER. REMOVE AND WASH ANY CONTAMINATED CLOTHING BEFORE REUSE.
EYES: FLUSH WITH LARGE QUANTITIES OF WATER FOR 15 MINUTES AND SEEK MEDICAL ATTENTION.
SWALLOWING: IF INGESTED DO NOT INDUCE VOMITING; KEEP PERSON WARM AND QUIET AND GET MEDICAL ATTENTION. ASPIRATION OF MATERIAL INTO LUNGS CAN CAUSE CHEMICAL PNEUMONITIS WHICH CAN BE FATAL.
INHALATION: REMOVE VICTIM TO FRESH AIR IMMEDIATELY. IF RESPIRATORY SYMPTOMS DEVELOP, SEEK MEDICAL ATTENTION AT ONCE.

PRIMARY ROUTE(S) OF ENTRY: INHALATION, DERMAL, INGESTION.

CARCINOGENICITY: THIS PRODUCT CONTAINS NO KNOWN CARCINOGENS IN REPORTABLE QUANTITIES AS DEFINED BY ACGIH, OSHA, NTP, IARC.

SECTION VI: REACTIVITY DATA

STABILITY: UNSTABLE: STABLE: **HAZARDOUS POLYMERIZATION:** MAY OCCUR: WILL NOT OCCUR:

HAZARDOUS DECOMPOSITION PRODUCTS: INCOMPLETE COMBUSTION CAN YIELD CARBON MONOXIDE AND TOXIC VAPORS.

CONDITIONS TO AVOID: HEAT, SPARKS & OPEN FLAME. IF PRODUCT CONTAINS ALUMINUM, MOISTURE IN CLOSED CONTAINERS WILL GENERATE HYDROGEN GAS.

INCOMPATIBILITY: AVOID CONTACT WITH STRONG OXIDANTS, ACIDS, BASES AND EPOXY HARDENERS UNDER UNCONTROLLED CONDITIONS.

SECTION VII: SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: REMOVE ALL SOURCES OF IGNITION. VENTILATE AREA. ABSORB SPILL WITH AN ABSORBENT MATERIAL SUCH AS SAWDUST, VERMICULITE OR SAND AND PLACE MATERIAL INTO A CLOSED CONTAINER. IF LARGE SPILL, DIKE AREA TO PREVENT THIS MATERIAL FROM ENTERING WATER SYSTEMS OR SEWERS. WEAR PROTECTIVE EQUIPMENT DURING CLEANUP.

WASTE DISPOSAL METHOD: IF DISCARDED, THIS MATERIAL AND CONTAINERS SHOULD BE TREATED AS HAZARDOUS WASTE BASED ON THE CHARACTERISTICS IGNITABILITY AS DEFINED UNDER FEDERAL RCRA REGULATIONS (40 CFR 261). DISPOSAL OF THIS MATERIAL OR ITS CONTAINERS REQUIRES COMPLIANCE WITH APPLICABLE LABELING, PACKAGING AND RECORDKEEPING STANDARDS.

WASTE DISPOSAL: DISPOSE IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL AGENCIES. GROUND HANDLING EQUIPMENT TO PREVENT SPARKS.
FOR FURTHER INFORMATION: CONTACT YOUR STATE OR LOCAL WASTE AGENCY OR THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY'S RCRA HOTLINE (1-800-424-9346 OR 1-202-382-3000).

SECTION VIII: SAFE HANDLING AND USE INFORMATION

KEEP OUT OF THE REACH OF CHILDREN

RESPIRATORY PROTECTION: A CANISTER-TYPE RESPIRATOR MUST BE WORN TO PREVENT THE INHALATION OF VAPORS OR SPRAY MIST WHEN THE TLV OR PEL IS EXCEEDED.

VENTILATION: GENERAL VENTILATION IS REQUIRED DURING NORMAL USE. LOCAL VENTILATION MAY BE REQUIRED DURING CERTAIN OPERATIONS TO KEEP EXPOSURE LEVEL BELOW THE LIMITS LISTED IN SECTION II OF THIS DATA SHEET.

PROTECTIVE GLOVES: CHEMICAL RESISTANT NITRILE, NEOPRENE OR RUBBER GLOVES REQUIRED.

EYE PROTECTION: WEAR FACE SHIELD OR CHEMICAL GOGGLES.

OTHER PROTECTIVE EQUIPMENT: WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. EYE WASH STATION AND SAFETY SHOWER SHOULD BE AVAILABLE.

HYGIENIC PRACTICES: WASH HANDS BEFORE EATING OR SMOKING.

SECTION IX: SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: AVOID PROLONGED OR REPEATED INHALATION OF HEATED VAPORS OR SPRAY MIST. KEEP AWAY FROM HEAT OR OPEN FLAME. THIS MATERIAL MAY CAUSE SENSITIZATION. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT ALLOW CONTAMINATED CLOTHING TO CONTACT SKIN. DO NOT WELD ON FULL OR EMPTY CONTAINERS. KEEP CONTAINERS CLOSED WHEN NOT IN USE, AND PROPERLY LABELED.

SECTION 2 - PRODUCT COMPONENTS

Table with 5 columns: Component Name, OSHA PEL, ACGIH TLV, Wt. %, CAS Number. Rows include Petroleum naphtha, Lubricants/corrosion inhibitors, and Petroleum products, liquefied gas, sweetened.

SECTION 3 - PHYSICAL AND CHEMICAL CHARACTERISTICS

Boiling Point: 300°F IBP
Vapor Pressure: 3 at 75°F
Vapor Density (Air = 1): > 1
Volume % Volatile: > 70
Appearance and Odor: Clear liquid, solvent odor.
Specific Gravity: 0.8 typical
Water Soluble: Nil
Water Reactive: No
pH: NA

SECTION 4 - FIRE AND EXPLOSION INFORMATION

Flash Point (Method): 108°F
Flammable Limits, LEL: ND
Flame Extension: 50 - 60 "
Extinguishing Media: Foam, dry chemical, CO2
Special Firefighting Procedures: Use SCBA. Water is not suitable as an extinguishing media, but may be useful for cooling nearby containers.
Unusual Fire and Explosion Hazards: Aerosol containers may burst when exposed to temperatures in excess of 120°F.

SECTION 5 - REACTIVITY DATA

Stable: Yes
Incompatibility: Strong oxidizers like chlorine or concentrated O2
Hazardous Decomposition Products: Fumes, smoke, oxides of carbon.
Polymerization: No
Conditions to Avoid: Heat, sparks, open flame.
Conditions to Avoid: None Known

MOISTURE DISPLACING LUBE AEROSOL MATERIAL SAFETY DATA SHEET, CONTINUED

SECTION 6 - HEALTH HAZARDS

Primary Routes of Entry: Oral: No Carcinogenic Listing: NTP: No
 Inhalation: Yes IARC: No
 Skin Absorb.: No ACGIH: No

HMIS Rating¹: Health: 2 Flammability: 2 Reactivity: 0

Signs/Symptoms of Exposure: Headache, dizziness, nausea from inhalation of vapors or mist. May cause skin or eye irritation.

Emergency First Aid Procedures

Eye Contact: Flush with running water for 15 minutes, holding lid open to expose surface. Contact physician.

Skin Contact: Remove contaminated clothing and shoes. Wash with mild soap and water, apply skin cream for irritation.

Inhalation: Remove to fresh air at once. Apply artificial respiration if necessary, contact physician immediately.

Ingestion: Do not induce vomiting, contact physician immediately.

Chronic Hazards: Health studies have shown that many chemicals pose human health risks which may vary from person to person. Prolonged or repeated occupational overexposure to solvents has been linked to permanent brain and nervous system damage. Intentional misuse by deliberate concentration and inhalation may be harmful or fatal. As a precaution, exposure to liquids or vapors should be minimized.

SECTION 7 - SPECIAL PRECAUTIONS/SPILL & LEAK PROCEDURES

Precautions for Storage and Handling: Keep containers closed when not in use. Do not use or store near open flame or strong oxidizers.

Other Precautions: Avoid breathing vapors or mists; prolonged or repeated skin contact.

Spill or Leak Precautions: **** DANGER!! LEAKING AEROSOLS ARE AN EXTREME FIRE AND EXPLOSION HAZARD!!** Remove ignition sources, check area with gas detector. Move leaking cans outdoors and empty into suitable container by depressing valve button. Small liquid spills may be taken up with absorbent material.

Waste Disposal Method: Comply with all applicable regulations.

SECTION 8 - SPECIAL PROTECTION & PRECAUTIONS

Respiratory Protection: None required in normal use, but an effective, NIOSH/MSHA approved respirator should be used at any time when vapor concentrations exceed established standards.

Ventilation Type Required: Adequate to maintain level below established standards.

Local Exhaust: Yes Rate: >60 fpm Mech. (General) No

Gloves: Chemical resistant

Eye Protection: Face shield or safety glasses recommended.

LENSCLEAN MSDS

1. Chemical Product And Company Identification

MATERIAL NAME:	Visionaid Rainbow II
COMPANY PRODUCT CODE:	LCL211B, LCL211BR, LCL211E, LCL2112, 1LC211C, 1LC1760D, LC5000D, LC382D, LCT100
PREPARED BY	ASR CONSULTANTS LTD, approved by H.L. Bouton Co., Inc.
PHONE NUMBER:	(416) 925-3407
DATE PREPARED:	January 15, 2002
LAST REVISION DATE:	Not applicable - first release
MANUFACTURER:	H.L. Bouton Co., Inc. 11 Kendrick Road, Warcham Massachusetts, U.S.A., 02571
INFORMATION PHONE NUMBERS:	U.S.A.: (800) 426-1881 (business hours)
EMERGENCY PHONE NUMBERS:	U.S.A.: CHEMTREC (800)424-9300 (24 hours) Canada: CANUTEC (613)996-6666 (24 hours)
SIZE:	3.8 L (128 fl. Oz.), 473 ml (16 fl. oz.), 103 ml (3.5 fl. oz.), 59 ml (2 fl. oz.)
PRODUCT USE:	Lens cleaner
CHEMICAL NAME:	Mixture
CHEMICAL FAMILY:	Not applicable
SYNONYMS:	Not applicable
FORMULA:	Not applicable
CLASSIFICATION:	WHMIS Class: B3 - Combustible liquid WHMIS Class: D2B - Toxic: Eye/Skin Irritant.
SYMBOLS:	 
RISK PHRASES:	Caution: Combustible liquid. Causes eye and skin irritation.

2. Composition/Information On Ingredients

HAZARDOUS INGREDIENTS

CHEMICAL NAME:	Isopropanol
COMMON NAME:	Rubbing Alcohol

EXPOSURE LIMITS OF INGREDIENT:	Unknown for mixture, however Direct Blue 86 has an exposure limit of 1 mg/m ³ (AS, CU, dust and mists) OSHA-PEL TWA/ACGIH
LD ₅₀ :	Greater than 5000 mg/kg oral
LC ₅₀ :	Not available
LISTS WHICH INCLUDE CHEMICAL:	Not applicable - mixture
OTHER:	This is a mixture which contains: 2% Copper Cas no. 7440-50-8 0.39% Direct Blue 86 (Copper Phthalocyanine compound) cas no. 1330-38-7 Acid Green 25 cas no. 4403-90-1 Sodium Sulphate cas no. 7757-82-6 Sodium Chloride cas no. 7647-14-5 Sodium Carbonate cas no. 497-19-8 This is a controlled product as defined by the Canadian WHMIS, Category D-2-B. This contains Copper Compound and Sodium Carbonate which are listed on the IDL, but exist at concentrations well below reported concentrations.

3. Hazards Identification

EMERGENCY OVERVIEW

Combustible liquid, may cause eye or skin irritation.

POTENTIAL HEALTH EFFECTS

See SECTION 11 TOXICOLOGICAL INFORMATION for background data on the health hazards presented in this subsection.

INHALATION

ROUTE OF ENTRY:	<input checked="" type="checkbox"/> Y=YES, N=NO, U=UNKNOWN
SINGLE EXPOSURE SEVERITY, TARGET ORGANS AND TYPE OF EFFECT:	High levels may cause headaches, nausea, dizziness
REPEATED EXPOSURE SEVERITY, TARGET ORGANS AND TYPE OF EFFECT:	No longterm effects expected.
LIFETIME EXPOSURE SEVERITY, TARGET ORGANS AND EFFECT OF TYPE:	No longterm effects expected
SIGNS AND SYMPTOMS OF EXPOSURE:	Headache, nausea, dizziness
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:	None expected.

INGESTION

ROUTE OF ENTRY:	<input checked="" type="checkbox"/> Y=YES, N=NO, U=UNKNOWN
SINGLE EXPOSURE SEVERITY, TARGET ORGANS AND TYPE OF EFFECT:	Mildly toxicating by ingestion. May cause nausea, headache, and vomiting.

SIGNS AND SYMPTOMS OF EXPOSURE:	Irritation, redness.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:	None expected.

HAZARDS TO THE ENVIRONMENT

ENVIRONMENTAL HAZARDS OVERVIEW	Solutions of alcohols are toxic to aquatic at moderate to low concentrations. Detergents such as SDS (Sodium Dodecyl Sulphate) are aesthetics nuisances and may enhance toxicity of other components.
--------------------------------	---

4. FIRST AID MEASURES

FIRST AID FOR INHALATION:	Move to fresh air. If dizziness persists, consult physician.
FIRST AID FOR INGESTION:	If conscious, induce vomiting and drink two glasses of water. Seek medical advice.
FIRST AID FOR SKIN CONTACT:	Wash thoroughly with soap and water.
FIRST AID FOR EYE CONTACT:	Flush with plenty of water for at least fifteen minutes. If irritation persists consult physician.
FIRST AID EQUIPMENT AND SKILLS REQUIRED ON-SITE:	No special equipment required.
ANTIDOTE:	None.

NOTE TO PHYSICIAN

DELAYED EFFECTS AND SYMPTOMS DETECTABLE ONLY BY CLINICAL TESTING:	Ingestion of large quantities may cause intoxication followed by severe gastrointestinal pain and upset.
TREATMENT AND DIAGNOSTIC PROCEDURES:	Treat symptomatically.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:	Allergies
See SECTION 3 HAZARDS IDENTIFICATION, SUBSECTION POTENTIAL HEALTH EFFECTS for more information.	

5. FIRE FIGHTING MEASURES**FLAMMABLE PROPERTIES**

FLAMMABILITY CLASSIFICATION (29 CFR 1910.1200)	Combustible liquid
FLASH POINT AND METHOD:	82°C (180°F)

CONTAINMENT TECHNIQUE:	Prevent from entering waterways and storm sewers.
CLEAN-UP TECHNIQUE:	Contain spill. Cover spill with inert absorbent (absorbent, vermiculate). Using non-sparking tools, shovel or sweep up into a clean container. Remove from area. Flush spill area with water.
EVACUATION PROCEDURES:	Follow normal Emergency Response Plan (ERP).
SPECIAL INSTRUCTIONS, EQUIPMENT AND OTHER EMERGENCY ADVICE:	Risk of spreading an already existing fire. See SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION, SUBSECTION PERSONAL PROTECTIVE (PPE) for more information.
REPORTING REQUIREMENTS ASSOCIATED WITH SPILLS, LEAKS, AND RELEASES:	Not available See SECTION 15 REGULATORY INFORMATION for additional information.

7. HANDLING AND STORAGE

HANDLING

HANDLING PRACTICES:	Use grounding wires if transferring large quantities. Keep away from oxidizers, heat and other ignition sources. Do not allow to freeze.
HYGIENE RECOMMENDATIONS TO PREVENT CONTINUED EXPOSURE:	Use normal good industrial hygiene practices.
REGULATORY REQUIREMENTS ASSOCIATED WITH SAFE HANDLING:	Not available. See SECTION 15 REGULATORY INFORMATION for additional information
VENTILATION REQUIREMENTS FOR HANDLING:	None required.
MEASURES TO PREVENT AEROSOL AND DUST GENERATION AND FIRE:	Not required.

STORAGE

CONDITIONS FOR SAFE STORAGE:	Keep away from oxidizers, heat and other ignition sources. Do not store in direct sunlight. Store in cool, dry well-ventilated area. Do not allow to freeze.
VENTILATION REQUIREMENTS FOR	None required

professional judgement to determine if the results are appropriate to the specific combination of ingredients. Occasionally certain chemical mixtures contain components that may act upon the same organ system. The combined health effects may be additive. See SECTION 2 COMPOSITION/INFORMATION ON INGREDIENTS for exposure limits of each ingredient if product is a mixture.

9. PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE:	Clear blue solution.
ODOR:	Slight alcoholic odor.
ODOR THRESHOLD:	Not available.
PHYSICAL STATE:	Liquid
PH FACTOR:	Not applicable
VAPOR PRESSURE:	20mmHg at 20°C (68°F)
VAPOR DENSITY:	1
BOILING POINT:	93°C (200°F)
MELTING POINT:	-6°C (21°F)
FREEZING POINT:	-6°C (21°F)
SOLUBILITY IN WATER:	100%
SOLUBILITY IN OTHER SOLVENTS (SPECIFY SOLVENT):	Not available
SPECIFY GRAVITY (RELATIVE DENSITY):	0.98
HEAT VALUE:	Not available
PARTICLE SIZE:	Not applicable
VOLATILE ORGANIC COMPOUNDS (VOC) CONTENT:	10%
SOFTENING POINT:	Not applicable
EVAPORATE RATE:	0.99
MISCIBILITY:	100%
VISCOSITY:	As for water.
CONDUCTIVITY:	Slightly higher than water.
BULK DENSITY:	Not applicable
PERCENT VOLATILE BY VOLUME:	10%
PARTITION CO-EFFICIENT (N OCTANOL/WATER):	Not available
MOLECULAR WEIGHT:	Not available- mixture
MOLECULAR FORMULA:	Not available- mixture
ADDITIONAL CHARACTERISTICS NOT LISTED:	Surface active foaming.

10. STABILITY AND REACTIVITY

EXPOSURE:	
SUBCHRONIC EFFECTS:	CNS (CENTRAL NERVOUS SYSTEM), depression.
IS PRODUCT AN IRRITANT?:	<input checked="" type="checkbox"/> Y=YES, N=NO, U=UNKNOWN Eye and skin irritant.
IS PRODUCT A SENSITIZER?:	<input type="checkbox"/> N Y=YES, N=NO, U=UNKNOWN
EVIDENCE OF EPIDEMIOLOGY	<input type="checkbox"/> N Y=YES, N=NO, U=UNKNOWN
EVIDENCE OF CARCINOGENICITY:	<input type="checkbox"/> N Y=YES, N=NO, U=UNKNOWN IARC Group 3, Insufficient evidence.
EVIDENCE OF REPRODUCTIVE TOXICITY:	<input type="checkbox"/> N Y=YES, N=NO, U=UNKNOWN Insufficient evidence.
EVIDENCE OF TERATOGENICITY:	<input type="checkbox"/> N Y=YES, N=NO, U=UNKNOWN
EVIDENCE OF MUTAGENICITY:	<input type="checkbox"/> N Y=YES, N=NO, U=UNKNOWN
EVIDENCE OF NEUROTOXICITY:	<input checked="" type="checkbox"/> Y=YES, N=NO, U=UNKNOWN May occur from ingestion of isopropanol.
EVIDENCE OF NARCOSIS:	<input checked="" type="checkbox"/> Y=YES, N=NO, U=UNKNOWN May cause severe narcosis if large amounts are ingested.
OTHER STUDIES RELEVANT TO MATERIAL:	None known.
SYNERGISTIC PRODUCTS:	None known.

12. ECOLOGICAL INFORMATION

ECOTOXICITY

ACUTE AND LONG-TERM TOXICITY TO FISH AND INVERTEBRATES:	Solutions of alcohols are toxic to aquatic life at moderate to low concentrations. No longterm ecological effects are likely.
TOXICITY TO AQUATIC AND TERRESTRAL PLANTS:	Concentrated solutions of alcohols and surfactants may cause damage to aquatic and terrestrial plants.
ACUTE AND DIETARY TOXICITY TO BIRDS:	Not expected to be toxic
TOXICITY TO BENEFICIAL MICROORGANISMS:	Concentrated solutions of alcohols and surfactants have antimicrobial activity.

ENVIRONMENTAL FATE

PERSISTANCE AND DEGRADATION:	Moderately persistent but is biodegradable over time.
BIOACCUMULATION/ BIOCONCENTRATION:	Will not bioaccumulate.
SOIL MOBILITY:	Similar to water.

PHYSICAL/CHEMICAL

For additional PHYSICAL/CHEMICAL characteristics see SECTION 9. PHYSICAL/AND CHEMICAL PROPERTIES.

LOCTITE(R*)

MATERIAL SAFETY DATA SHEET

HENKEL TECHNOLOGIES

REVISION DATE: 05/08/2007

ISSUE DATE: 05/08/2007

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: LOCTITE(R) 204 THREADLOCKER DRI-LOC(R) STOCK SOLUTION 156

ITEM NO.: 18723

PRODUCT TYPE: SEALANT

REGION: UNITED STATES

COMPANY ADDRESS:
HENKEL CORPORATION
1001 TROUT BROOK CROSSING
ROCKY HILL, CONNECTICUT 06067

CONTACT INFORMATION:
PHONE: 860.571.5100
FACILITY TELEPHONE: 860.571.5100
WWW: WWW.LOCTITE.COM

2. COMPOSITION/INFORMATION ON INGREDIENTS

Table with 5 columns: HAZARDOUS COMPONENTS, %, ACGIH TLV, OSHA PEL, OTHER. Rows include AROMATIC DIMETHACRYLATE ESTER, SILICA, QUARTZ, ACRYLIC POLYMER, and AMMONIUM BENZOATE.

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

PHYSICAL STATE: LIQUID

COLOR: PINK

ODOR: MILD

HMS:
HEALTH 2*
FLAMMABILITY 1
PHYSICAL HAZARD 1
PERSONAL PROTECTION SEE SECTION 8

WARNING:
MAY CAUSE EYE, SKIN AND RESPIRATORY TRACT IRRITATION.
MAY CAUSE ALLERGIC SKIN REACTION.

RELEVANT ROUTES OF EXPOSURE: SKIN, INHALATION, EYES

POTENTIAL HEALTH EFFECTS:

INHALATION: MAY CAUSE RESPIRATORY TRACT IRRITATION.

SKIN CONTACT: MAY CAUSE SKIN IRRITATION. MAY CAUSE ALLERGIC SKIN REACTION.

EYE CONTACT: MAY CAUSE IRRITATION.

INGESTION: MAY BE HARMFUL IF SWALLOWED.

EXISTING CONDITIONS AGGRAVATED BY EXPOSURE:
EYE, SKIN, AND RESPIRATORY DISORDERS.

SEE SECTION 11 FOR ADDITIONAL TOXICOLOGICAL INFORMATION.

4. FIRST AID MEASURES

INHALATION:
REMOVE TO FRESH AIR. IF SYMPTOMS DEVELOP AND PERSIST, GET MEDICAL ATTENTION.

SKIN CONTACT:
WASH WITH SOAP AND WATER. REMOVE CONTAMINATED CLOTHING AND SHOES. WASH CLOTHING BEFORE REUSE. GET MEDICAL ATTENTION IF SYMPTOMS OCCUR.

EYE CONTACT:
FLUSH WITH COPIOUS AMOUNTS OF WATER, PREFERABLY, LUKEWARM WATER FOR AT LEAST 15 MINUTES, HOLDING EYELIDS OPEN ALL THE TIME. GET MEDICAL ATTENTION.

INGESTION:
DO NOT INDUCE VOMITING. KEEP INDIVIDUAL CALM. OBTAIN MEDICAL ATTENTION.

5. FIRE-FIGHTING MEASURES

FLASH POINT: GREATER THAN 93 DEG. C (200 DEG. F)

AUTOIGNITION TEMPERATURE: NOT APPLICABLE

FLAMMABLE/EXPLOSIVE LIMITS-LOWER %: NOT APPLICABLE
FLAMMABLE/EXPLOSIVE LIMITS-UPPER %: NOT APPLICABLE

EXTINGUISHING MEDIA: FOAM, DRY CHEMICAL OR CARBON DIOXIDE.

SPECIAL FIRE FIGHTING PROCEDURES:
WEAR SELF-CONTAINED BREATHING APPARATUS AND FULL PROTECTIVE CLOTHING, SUCH AS TURN-OUT GEAR.

UNUSUAL FIRE OR EXPLOSION HAZARDS: NONE

HAZARDOUS COMBUSTION PRODUCTS:
OXIDES OF CARBON, OXIDES OF NITROGEN, OXIDES OF SULFUR, ACRYLIC MONOMERS, IRRITATING ORGANIC VAPORS.

6. ACCIDENTAL RELEASE MEASURES

ENVIRONMENTAL PRECAUTIONS:
PREVENT PRODUCT FROM ENTERING DRAINS OR OPEN WATERS.

CLEAN-UP METHODS:
SOAK UP WITH INERT ABSORBENT. STORE IN A PARTLY FILLED, CLOSED CONTAINER UNTIL DISPOSAL.

7. HANDLING AND STORAGE

HANDLING:
AVOID CONTACT WITH EYES, SKIN AND CLOTHING. AVOID BREATHING VAPOR AND MIST. WASH THOROUGHLY AFTER HANDLING. USE ONLY WITH ADEQUATE VENTILATION.

STORAGE:
FOR SAFE STORAGE, STORE BETWEEN 5 DEG. C (41 DEG. F) AND 30 DEG. C (86 DEG. F). KEEP IN A COOL, WELL VENTILATED AREA AWAY FROM HEAT, SPARKS AND OPEN FLAME. KEEP CONTAINER TIGHTLY CLOSED UNTIL READY FOR USE.

INCOMPATIBLE PRODUCTS: REFER TO SECTION 10.

FOR INFORMATION ON PRODUCT SHELF LIFE CONTACT HENKEL CUSTOMER SERVICE AT (800) 243-4874.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS:
NO SPECIFIC VENTILATION REQUIREMENTS NOTED, BUT FORCED VENTILATION MAY STILL BE REQUIRED IF CONCENTRATIONS EXCEED OCCUPATIONAL EXPOSURE LIMITS.

RESPIRATORY PROTECTION:
USE NIOSH APPROVED RESPIRATOR IF THERE IS POTENTIAL TO EXCEED EXPOSURE LIMIT(S).

SKIN PROTECTION:
USE IMPERMEABLE GLOVES AND PROTECTIVE CLOTHING AS NECESSARY TO PREVENT SKIN CONTACT. POLYVINYL CHLORIDE GLOVES, NITRILE GLOVES.

EYE/FACE PROTECTION: SAFETY GOGGLES OR SAFETY GLASSES WITH SIDE SHIELDS.

SEE SECTION 2 FOR EXPOSURE LIMITS.

9. PHYSICAL AND CHEMICAL PROPERTIES

PHYSICAL STATE: LIQUID

COLOR: PINK

ODOR: MILD

VAPOR PRESSURE: 20 mmHg AT 22 DEG. C (72 DEG. F)

pH: 7 - 10

BOILING POINT/RANGE: 100 DEG. C (212 DEG. F)

MELTING POINT/RANGE: NOT AVAILABLE

SPECIFIC GRAVITY: 1.1034

VAPOR DENSITY: NOT AVAILABLE

EVAPORATION RATE: NOT AVAILABLE

SOLUBILITY IN WATER: MISCIBLE

Revision Date: 10/20/2003

Issue date: 10/20/2003

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product name: 242® Threadlocker
Product type: Anaerobic Sealant
Company address:
Henkel Loctite Corporation
1001 Trout Brook Crossing
Rocky Hill, Connecticut 06067

Item number: 24231
Region: United States
Contact Information:
Telephone: 860.571.5100
Emergency telephone: 860.571.5100
Internet: www.loctite.com

2. COMPOSITION/INFORMATION ON INGREDIENTS

<u>Hazardous components</u>	<u>%</u>	<u>ACGIH TLV</u>	<u>OSHA PEL</u>	<u>OTHER</u>
Polyglycol dimethacrylate	60-100	None	None	
Polyglycol oleate 9004-96-0	10-30	None	None	None
Alkylene glycol	1-5	None	None	None
Cumene hydroperoxide 80-15-9	1-5	None	None	1 ppm (6 mg/m ³) Skin (WEEL)

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Physical state: Liquid
Color: Blue
Odor: Mild

HMIS:

HEALTH: 1*
FLAMMABILITY: 1
PHYSICAL HAZARD: 1
Personal Protection: See Section 8

WARNING: CAUSES EYE IRRITATION.
MAY CAUSE SKIN IRRITATION.
MAY CAUSE ALLERGIC SKIN REACTION.
MAY CAUSE RESPIRATORY TRACT IRRITATION.

Relevant routes of exposure: Skin, Inhalation, Eyes

Potential Health Effects

Inhalation: May cause respiratory tract irritation.
Skin contact: May cause allergic skin reaction. May cause skin irritation.
Eye contact: Contact with eyes will cause irritation.
Ingestion: Not expected to be harmful by ingestion.

Existing conditions aggravated by exposure: Skin disorders.

See Section 11 for additional toxicological information.

Item number: 24231

Product name: 242® Threadlocker

Eye/face protection:

Safety goggles or safety glasses with side shields.

See Section 2 for exposure limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state: Liquid
 Color: Blue
 Odor: Mild
 Vapor pressure: Less than 5 mm Hg at 27°C (80°F)
 pH: Not applicable
 Boiling point/range: Greater than 149°C (300°F)
 Melting point/range: Not available
 Specific gravity: 1.1
 Vapor density: Not available
 Evaporation rate: Not available
 Solubility in water: Slight
 Partition coefficient (n-octanol/water): Not available
 VOC content: 4.48%; 49.3 grams/liter (EPA Method 24)

10. STABILITY AND REACTIVITY

Stability: Stable.
 Hazardous polymerization: Will not occur.
 Hazardous decomposition products: Oxides of carbon. Oxides of sulfur. Oxides of nitrogen. Irritating organic vapors.
 Incompatibility: Strong oxidizers.
 Conditions to avoid: See "Handling and Storage" (Section 7) and "Incompatibility" (Section 10).

11. TOXICOLOGICAL INFORMATION

Product toxicity data: Acute oral LD50 greater than 10,000 mg/kg (rat). Acute dermal LD50 greater than 5000 mg/kg (rabbit).

Carcinogen Status

Hazardous components	NTP Carcinogen	IARC Carcinogen	OSHA Carcinogen
Polyglycol dimethacrylate	No	No	No
Polyglycol oleate	No	No	No
Alkylene glycol	No	No	No
Cumene hydroperoxide	No	No	No

Literature Referenced Target Organ & Other Health Effects

Hazardous components	Health Effects/Target Organs
Polyglycol dimethacrylate	Allergen, Irritant
Polyglycol oleate	Irritant
Alkylene glycol	Irritant
Cumene hydroperoxide	Allergen, Central nervous system, Corrosive, Irritant, Mutagen

12. ECOLOGICAL INFORMATION

Ecological Information: Not available

16. OTHER INFORMATION

This material safety data sheet contains changes from the previous version in sections:
New Material Safety Data Sheet format.

Material Safety Data Sheet

Revision Date: 03/06/2008

Issue date: 03/06/2008

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product name: TYCEL 7000	Item No. : / IDH No. 515419
Product type: Laminating Adhesive	Region: United States
Company address: Henkel Corporation 1001 Trout Brook Crossing Rocky Hill, Connecticut 06067	Contact Information: Telephone: 860.571.5100 Emergency telephone: 860.571.5100 Internet: www.loctite.com

2. COMPOSITION/INFORMATION ON INGREDIENTS

<u>Hazardous components</u>	<u>%</u>	<u>ACGIH TLV</u>	<u>OSHA PEL</u>	<u>OTHER</u>
Methyl ethyl ketone 78-93-3	60-100	200 ppm TWA 300 ppm STEL	200 ppm TWA 590 mg/m ³ TWA	None
Polymer	10-30	None	None	None

3. HAZARDS IDENTIFICATION

<u>EMERGENCY OVERVIEW</u>	
Physical state: Liquid	HMIS:
Color: Clear	HEALTH: 2*
Odor: Solvent	FLAMMABILITY: 3
	PHYSICAL HAZARD: 0
	Personal Protection: See Section 8
DANGER: FLAMMABLE!	
MAY CAUSE ALLERGIC SKIN AND RESPIRATORY REACTION.	
MAY AFFECT THE CENTRAL NERVOUS SYSTEM.	

Relevant routes of exposure: Skin, Eyes, Inhalation, Ingestion

Potential Health Effects

Inhalation:	May cause respiratory tract irritation. Central nervous system depression, including dizziness, drowsiness, fatigue, nausea, headache, unconsciousness. May cause sensitization by inhalation.
Skin contact:	May cause skin irritation. Itching. Redness. Pain and discomfort. May cause sensitization by skin contact.
Eye contact:	May cause irritation.
Ingestion:	Harmful if swallowed.

Existing conditions aggravated by exposure:

Determining whether product ingredients will aggravate a pre-existing medical condition requires case-by-case consideration of the exposed workers' medical condition and the nature of the exposures expected to occur in the specific workplace where the worker will be employed.

See Section 11 for additional toxicological information.

Eye/face protection:

Safely goggles or safety glasses with side shields. Full face protection should be used if the potential for splashing or spraying of product exists.

See Section 2 for exposure limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state:	Liquid
Color:	Clear
Odor:	Solvent
Vapor pressure:	Not determined
pH:	Not applicable
Boiling point/range:	79°C (174°F)
Melting point/range:	Not determined
Specific gravity:	7.25-7.55 lbs/gal
Vapor density:	Heavier than air
Evaporation rate:	7.12
Solubility in water:	Not soluble
Partition coefficient (n-octanol/water):	Not available
VOC content:	627.5 g/L

10. STABILITY AND REACTIVITY

Stability:	Stable.
Hazardous polymerization:	Will not occur.
Hazardous decomposition products:	May produce fumes when heated to decomposition. Fumes may contain carbon monoxide and other toxic fumes.
Incompatibility:	Acids. Bases. Oxidizing agents.
Conditions to avoid:	Heat, flames, sparks and other sources of ignition.

11. TOXICOLOGICAL INFORMATION

Carcinogen Status

Hazardous components	NTP Carcinogen	IARC Carcinogen	OSHA Carcinogen
Methyl ethyl ketone 78-93-3	No	No	No

1. PRODUCT AND COMPANY IDENTIFICATION

Product name:	DB EPOXY ADH E-60HP 50 ML RESIN	IDH number:	701985
Product type:	Epoxy resin	Item number:	29319_209534
Company address:	Henkel Corporation 1001 Trout Brook Crossing Rocky Hill, Connecticut 06067	Region:	United States
		Contact information:	Telephone: 860.571.5100 Emergency telephone: 860.571.5100 Internet: www.henkelna.com

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Physical state:	Liquid	HEALTH:	*2
Color:	Pale yellow	FLAMMABILITY:	1
Odor:	Faint, Epoxy	PHYSICAL HAZARD:	1
WARNING:	MAY CAUSE ALLERGIC SKIN REACTION. MAY CAUSE EYE AND SKIN IRRITATION.		See MSDS Section 8

Relevant routes of exposure: Eyes, Skin

Potential Health Effects

Inhalation:	This material does not normally present an inhalation hazard, however, in applications where vapors (caused by high temperatures) or mists (caused by mixing) are created, breathing may cause respiratory tract irritation.
Skin contact:	May cause skin irritation with discomfort or rash. May cause allergic skin reaction.
Eye contact:	May cause irritation.
Ingestion:	Not a relevant route of exposure.

Existing conditions aggravated by exposure: Skin disorders. Skin allergies.

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

See Section 11 for additional toxicological information.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Hazardous components	CAS NUMBER	%
Epichlorohydrin-4,4'-isopropylidene diphenol resin	25068-38-6	60 - 100
2-Propenoic acid, 2-methyl-, methyl ester, polymer	25053-09-2	10 - 30

4. FIRST AID MEASURES

Inhalation:	Move to fresh air. If symptoms persist, seek medical advice.
Skin contact:	Remove contaminated clothing and footwear. Immediately flush skin with plenty of water (using soap, if available). Wash clothing before reuse. If symptoms develop and persist, get medical attention.
Eye contact:	Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state:	Liquid
Color:	Pale yellow
Odor:	Faint, Epoxy
Odor threshold:	Not available
pH:	Not available
Vapor pressure:	Not available
Boiling point/range:	> 260 °C (> 500°F)
Melting point/ range:	Not available
Specific gravity:	1.17
Vapor density:	Not available
Flash point:	> 93 °C (> 199.4 °F) Setaflash Closed Cup
Flammable/Explosive limits - lower:	Not available
Flammable/Explosive limits - upper:	Not available
Autoignition temperature:	Not available
Evaporation rate:	Not available
Solubility in water:	Negligible
Partition coefficient (n-octanol/water):	Not available
VOC content:	< 1.0 %; < 10 g/l Estimated

10. STABILITY AND REACTIVITY

Stability	Stable
Hazardous reactions:	Reaction with some curing agents may produce an exothermic reaction which in large masses could cause runaway polymerization.
Hazardous decomposition products:	None reasonably foreseeable.
Incompatible materials:	Strong oxidizing agents. Strong acids and strong bases. Amines. Water. Do not allow molten material to contact water or liquids as this can cause violent eruptions, splatter hot material, or ignite flammable material.
Conditions to avoid:	Excessive heat. Store away from incompatible materials. Avoid mixing resin (Part A) and curing agent (Part B) unless you plan to use immediately. Failure to observe these precautions may result in excessive heat build-up causing an exotherm.

11. TOXICOLOGICAL INFORMATION

<u>EMERGENCY OVERVIEW</u>	
<u>HMS:</u>	
Physical state: Wax	HEALTH: 1*
Color: White	FLAMMABILITY: 1
Odor: Mild	PHYSICAL HAZARD: 1

Item number: 37127

Product name: 561 PIPE THREAD SLNT 19GR STK

7. HANDLING AND STORAGE

Handling:	Avoid contact with eyes, skin and clothing. Avoid breathing vapor and mist. Wash thoroughly after handling. Use only with adequate ventilation.
Storage:	For safe storage, store at or below 38°C (100°F). Keep in a cool, well ventilated area away from heat, sparks and open flame. Keep container tightly closed until ready for use.
Incompatible products:	Refer to Section 10.

For information on product shelf life contact Henkel Customer Service at (800) 243-4874.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering controls:	No specific ventilation requirements noted, but forced ventilation may still be required if concentrations exceed occupational exposure limits.
Respiratory protection:	Use NIOSH approved respirator if there is potential to exceed exposure limit(s).
Skin protection:	Use impermeable gloves and protective clothing as necessary to prevent skin contact.
Eyeface protection:	Safety goggles or safety glasses with side shields.

See Section 2 for exposure limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state:	Wax
Color:	White
Odor:	Mild
Vapor pressure:	Less than 10 mm Hg at 27°C (80°F)
pH:	Not applicable
Boiling point/range:	Greater than 149°C (300°F)
Melting point/range:	Not available
Specific gravity:	1.1394
Vapor density:	Not available
Evaporation rate:	Not available
Solubility in water:	Slight
Partition coefficient (n-octanol/water):	Not available
VOC content:	6.95%; 79.2 grams/liter (EPA Method 24)

10. STABILITY AND REACTIVITY

Stability:	Stable.
Hazardous polymerization:	Will not occur.
Hazardous decomposition products:	Oxides of carbon. Toxic fluorine compounds. Irritating organic vapors.
Incompatibility:	Strong oxidizers.
Conditions to avoid:	See "Handling and Storage" (Section 7) and "Incompatibility" (Section 10).

11. TOXICOLOGICAL INFORMATION

Product toxicity data:	Acute LD50 (oral) :Greater than 10000 (rat). (estimated). Acute dermal LD50 greater than 5000 mg/kg (rabbit)(estimated).
------------------------	--

Carcinogen Status

15. REGULATORY INFORMATION

United States Regulatory Information

TSCA 8 (b) Inventory Status:	All components are listed or are exempt from listing on the Toxic Substances Control Act Inventory.
TSCA 12 (b) Export Notification:	None.
CERCLA/SARA Section 302 EHS:	None above reporting de minimus.
CERCLA/SARA Section 311/312:	Immediate Health Hazard, Delayed Health Hazard
CERCLA/SARA 313:	This product contains the following toxic chemicals subject to the reporting requirements of section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 (40 CFR 372). Cumene hydroperoxide (CAS# 80-15-9) .
California Proposition 65:	This product contains a chemical known to the State of California to cause cancer and birth defects or other reproductive harm. Ethylene oxide (CAS# 75-21-8). Acetaldehyde (CAS# 75-07-0). 1,4-Dioxane (CAS# 123-91-1). Toluene (CAS# 108-88-3).

Canada Regulatory Information

CEPA DSL/NDSL Status:	All components are listed on or are exempt from listing on the Domestic Substances List.
WHMIS hazard class:	D.2.A, D.2.B

16. OTHER INFORMATION

This material safety data sheet contains changes from the previous version in sections: Expanded chemical information in Section 2 and related sections.

Loctite(R) Hydraulic Jack Oil
30522

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: Loctite(R) Hydraulic Jack Oil
Item No.: 30522
Product Type: Hydraulic Fluid

2. COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients	CAS No.	%
Mineral oil	64742-52-5	95-100
Polymethacrylate dispersion	Proprietary	1-3
Rust inhibitor	Proprietary	0.1-1
Surfactant	Proprietary	0.01-0.1

The polymethacrylate dispersion is registered with the state of New Jersey as a trade secret: NJ TSRN 06-070-1067-5034P

The rust inhibitor is registered with the state of New Jersey as a trade secret: NJ TSRN 06-070-1067-5035P

The surfactant is registered with the state of New Jersey as a trade secret: NJ TSRN 06-070-1067-5036P.

Ingredients which have exposure limits

Exposure Limits (TWA) Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
Mineral oil	5 mg/m3 mist	5 mg/m3 mist	None

Exposure Limits (STEL) Ingredients	ACGIH (TLV)	OSHA (PEL)
Mineral oil	10 mg/m3 mist	None

3. HAZARDS IDENTIFICATION

Toxicity: Skin and eye irritant.
Primary Routes of Entry: Skin, ingestion, inhalation
Signs and Symptoms of Exposure: Prolonged exposure may cause dermatitis. Breathing of mist or vapor may cause irritation of the pulmonary tract or aspiration pneumonia.
Existing Conditions Aggravated by Exposure: None known

7. HANDLING AND STORAGE

Safe Storage: Keep away from flames, sparks, or hot surfaces.
(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)
Handling: Avoid skin contact. Keep away from eyes. Avoid prolonged breathing of vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Safety glasses or goggles.
Skin: Neoprene or plastic gloves.
Ventilation: Sufficient to maintain vapor concentration below TLV.
Respiratory: NIOSH/MSHA approved respirator when ventilation is inadequate.

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Amber liquid
Odor: Mild petroleum
Boiling Point: More than 500°F
: Does not apply
Solubility in Water: Negligible
Specific Gravity: 0.905 at 60°F
Volatile Organic Compound (EPA Method 24): 21.6%; 195 grams per liter
Vapor Pressure: Less than 5 mm
Vapor Density: Not available
Evaporation Rate (Ether = 1): Not available

10. STABILITY AND REACTIVITY

Stability: Stable
Hazardous Polymerization: Will not occur
Incompatibility: Strong oxidizers.
Conditions to Avoid: Not available
Hazardous Decomposition Products (non-thermal): None

Explosive Limits:

(% by volume in air) Lower Propylene glycol: 2.6%
(% by volume in air) Upper Propylene glycol: 12.5%

6. ACCIDENTAL RELEASE MEASURES

Steps to be taken in case
of spill or leak: Remove sources of ignition. Maintain adequate
ventilation.
Soak up in an inert absorbant. Store in a partly
filled, closed container until disposal.

7. HANDLING AND STORAGE

Safe Storage: Store below 100°F away from sources of ignition.
(Contact Loctite Customer Service 1-800-243-4874 for shelf life information)
Handling: Do not use near sources of ignition.
Avoid prolonged skin contact. Keep away from eyes.
Do not breathe vapors.

8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Safety glasses or goggles.
Skin: Neoprene, rubber, or butyl rubber gloves.
Ventilation: Sufficient to maintain vapor concentration below
TLV.
Respiratory: NIOSH approved respirator if ventilation is
inadequate.

See Section 2 for Exposure Limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Blue liquid
Odor: Mild
Boiling Point: More than 300°F
pH: Does not apply
Solubility in Water: Slight

MATERIAL SAFETY DATA SHEET

Page 05 of 06

Product Name: Tight Anaerobic Gel
Item No.: 51642

14. TRANSPORTATION INFORMATION

(continued)

Combustible liquid, Packing Group III (More than 450 liters)
Identification Number: None (Not more than 75 pounds);
UN 3082 (More than 75 pounds but not more than 450 liters)
NA 1993 (More than 450 liters)
Marine Pollutant: None
IATA
Proper Shipping Name: Unrestricted (Not more than 75 pounds)
Environmentally hazardous substances, liquid,
n.o.s. (Contains di-n-butyl phthalate) (More than 75 pounds)
Class or Division: Unrestricted (Not more than 75 pounds);
Class 9, Packing Group III (More than 75 pounds)
UN or ID Number: None (Not more than 75 pounds);
UN 3082 (More than 75 pounds)

15. REGULATORY INFORMATION

CA Proposition 65: WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
(ppb levels of Arsenic, Cd, Pb, Ni),

This product contains Saccharin. No Prop65 hazard warning is necessary if this product is used as reasonably anticipated.

16. OTHER INFORMATION

Estimated NFPA(R) Code:
Health Hazard: 1
Fire Hazard: 1
Reactivity Hazard: 1
Specific Hazard: Does not apply

Estimated HMIS(R) Code:
Health Hazard: 1*
Flammability Hazard: 1
Reactivity Hazards: 1
Personal Protection: See Section 8.

NFPA is a registered trademark of the National Fire Protection Assn.
HMIS is a registered trademark of the National Paint and Coatings Assn.

2 Composition/Data on components

Chemical characterization**Description:** Mixture of the substances listed below with nonhazardous additions.**Dangerous components:**

1330-20-7	Xylene (mix)	25-50%
78-93-3	butanone	10-25%
108-65-6	2-methoxy-1-methylethyl acetate	10-25%
108-88-3	toluene	10-25%
108-10-1	4-methylpentan-2-one	2.5-10%

Additional information: For the wording of the listed risk phrases refer to section 16.

3 Hazards identification

Hazard description:Harmful
Highly flammable**Information pertaining to particular dangers for man and environment:**

The product has to be labelled due to the calculation procedure of the "General Classification guideline for preparations of the EU" in the latest valid version.

Highly flammable.

Harmful by inhalation and in contact with skin.

Irritating to eyes and skin.

Classification system:

The classification was made according to the latest editions of international substances lists, and expanded upon from company and literature data.

10 Stability and reactivity

- Thermal decomposition / conditions to be avoided:
No decomposition if used according to specifications.
- Dangerous reactions No dangerous reactions known.
- Dangerous products of decomposition: No dangerous decomposition products known.

11 Toxicological information

· Acute toxicity:

· LD/LC50 values that are relevant for classification:

1330-20-7 Xylene (mix)

Oral	LD50	8700 mg/kg (rat)
Dermal	LD50	2000 mg/kg (rbt)
Inhalative	LC50/4 h	6350 mg/l (rat)

108-88-3 toluene

Oral	LD50	5000 mg/kg (rat)
Dermal	LD50	12124 mg/kg (rab)
Inhalative	LC50/4 h	5320 mg/l (mus)

· Primary irritant effect:

- on the skin: Irritant to skin and mucous membranes.
- on the eye: Irritating effect.

· Sensitization: No sensitizing effects known.

· Additional toxicological information:

The product shows the following dangers according to internally approved calculation methods for preparations:

- Harmful.
- Irritant.

12 Ecological information

- General notes: Not known to be hazardous to water.

13 Disposal considerations

· Product:

· Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

· Uncleaned packagings:

- Recommendation: Disposal must be made according to official regulations.

14 Transport information

· DOT regulations:

· Hazard class:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.
- **Protection of hands:**

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· **Material of gloves**

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

(Contd. on page 4)

Trade name: *Superspeed SP 52 (Various colors)*

(Contd. of page 4)

- **Primary irritant effect:**
- *on the skin: No irritant effect.*
- *on the eye: No irritating effect.*
- **Sensitization:** *Sensitization possible through skin contact.*
- **Additional toxicological information:**
The product shows the following dangers according to internally approved calculation methods for preparations:
Harmful.
Irritant.

12 Ecological information

- **General notes:**
Water hazard class 2 (Self-assessment): hazardous for water
Do not allow product to reach ground water, water course or sewage system.
Danger to drinking water if even small quantities leak into the ground.

13 Disposal considerations

- **Product:**
- **Recommendation:**
Must not be disposed of together with household garbage. Do not allow product to reach sewage system.
- **Uncleaned packagings:**
- **Recommendation:** *Disposal must be made according to official regulations.*

14 Transport information

- **DOT regulations:**

- **Hazard class:** 3
- **Identification number:** UN1263
- **Packing group:** II
- **Proper shipping name (technical name):** *Paint*

- **Land transport ADR/RID (cross-border):**

- **ADR/RID class:** 3 *Flammable liquids*
- **Item:** 5b
- **Danger code (Kemler):** 33
- **UN-Number:** 1263

MATERIAL SAFETY DATA SHEET

Marine Diesel Fuel

MSDS No. 4323

1. CHEMICAL PRODUCT and COMPANY INFORMATION (rev. Jan-99)

HOVENSA L.L.C.

1 Estate Hope

Christiansted, VI 00820-5652

EMERGENCY TELEPHONE NUMBER (24 hrs): CHEMTREC (800) 424-9300

COMPANY CONTACT (business hours): Safety Department (340) 692-3000

SYNONYMS: Marine Diesel Bunkers

See Section 16 for abbreviations and acronyms.

2. COMPOSITION and INFORMATION ON INGREDIENTS (rev. Jan-99)

INGREDIENT NAME	EXPOSURE LIMITS	CONCENTRATION PERCENT BY WEIGHT
Diesel Fuel CAS NUMBER: 68476-34-6	OSHA PEL-TWA: 5 mg/m, as mineral oil mist ACGIH TLV-TWA: 1997 NOIC- 100 mg/m ³ , skin, A3	100
Naphthalene CAS NUMBER: 91-20-3	OSHA PEL: 10 ppm ACGIH TLV-TWA/STEL: 10 / 15 ppm, A4	Typically < 0.01

A complex mixture of hydrocarbons with carbon numbers in the range C9 and higher.

3. HAZARDS IDENTIFICATION (rev. Mar-98; Tox-99)

EMERGENCY OVERVIEW

CAUTION!

OSHA/NFPA COMBUSTIBLE LIQUID - SLIGHT TO MODERATE IRRITANT - EFFECTS CENTRAL NERVOUS SYSTEM - HARMFUL OR FATAL IF SWALLOWED

Moderate fire hazard. Avoid breathing vapors or mists. May cause dizziness and drowsiness. May cause moderate eye irritation and skin irritation (rash). Long-term, repeated exposure may cause skin cancer.

If ingested, do NOT induce vomiting, as this may cause chemical pneumonia (fluid in the lungs).

EYES

Contact with liquid or vapor may cause mild irritation.

SKIN

May cause skin irritation with prolonged or repeated contact. Practically non-toxic if absorbed following acute (single) exposure. Liquid may be absorbed through the skin in toxic amounts if large areas of skin are repeatedly exposed.

INGESTION

The major health threat of ingestion occurs from the danger of aspiration (breathing) of liquid drops into the lungs, particularly from vomiting. Aspiration may result in chemical pneumonia (fluid in the lungs), severe lung damage, respiratory failure and even death.

Ingestion may cause gastrointestinal disturbances, including irritation, nausea, vomiting and diarrhea, and central nervous system (brain) effects similar to alcohol intoxication. In severe cases, tremors, convulsions, loss of consciousness, coma, respiratory arrest, and death may occur.

INHALATION

Excessive exposure may cause irritations to the nose, throat, lungs and respiratory tract. Central nervous system (brain) effects may include headache, dizziness, loss of balance and coordination, unconsciousness, coma, respiratory failure, and death.

HOVENSA

MATERIAL SAFETY DATA SHEET

Marine Diesel Fuel

MSDS No. 4323

FIRE FIGHTING INSTRUCTIONS

Small fires in the incipient (beginning) stage may typically be extinguished using handheld portable fire extinguishers and other fire fighting equipment.

Firefighting activities that may result in potential exposure to high heat, smoke or toxic by-products of combustion should require NIOSH/MSHA- approved pressure-demand self-contained breathing apparatus with full facepiece and full protective clothing.

Isolate area around container involved in fire. Cool tanks, shells, and containers exposed to fire and excessive heat with water. For massive fires the use of unmanned hose holders or monitor nozzles may be advantageous to further minimize personnel exposure. Major fires may require withdrawal, allowing the tank to burn. Large storage tank fires typically require specially trained personnel and equipment to extinguish the fire, often including the need for properly applied fire fighting foam.

See Section 16 for the NFPA 704 Hazard Rating.

6. ACCIDENTAL RELEASE MEASURES (rev. Mar-98)

ACTIVATE FACILITY'S SPILL CONTINGENCY OR EMERGENCY RESPONSE PLAN.

Evacuate nonessential personnel and remove or secure all ignition sources. Consider wind direction; stay upwind and uphill, if possible. Evaluate the direction of product travel, diking, sewers, etc. to confirm spill areas. Spills may infiltrate subsurface soil and groundwater; professional assistance may be necessary to determine the extent of subsurface impact.

Carefully contain and stop the source of the spill, if safe to do so. Protect bodies of water by diking, absorbents, or absorbent boom, if possible. Do not flush down sewer or drainage systems, unless system is designed and permitted to handle such material. The use of fire fighting foam may be useful in certain situations to reduce vapors. The proper use of water spray may effectively disperse product vapors or the liquid itself, preventing contact with ignition sources or areas/equipment that require protection.

Take up with sand or other oil absorbing materials. Carefully shovel, scoop or sweep up into a waste container for reclamation or disposal - caution, flammable vapors may accumulate in closed containers. Response and clean-up crews must be properly trained and must utilize proper protective equipment (see Section 8).

7. HANDLING and STORAGE (rev. Mar-98)

HANDLING PRECAUTIONS

Handle as a combustible liquid. Keep away from heat, sparks, and open flame! Electrical equipment should be approved for classified area. Bond and ground containers during product transfer to reduce the possibility of static-initiated fire or explosion.

Special slow load procedures for "switch loading" must be followed to avoid the static ignition hazard that can exist when higher flash point material (such as fuel oil) is loaded into tanks previously containing low flash point products (such as this product) - see API Publication 2003, "Protection Against Ignitions Arising Out Of Static, Lightning and Stray Currents.

STORAGE PRECAUTIONS

Keep away from flame, sparks, excessive temperatures and open flame. Use approved vented containers. Keep containers closed and clearly labeled. Empty product containers or vessels may contain explosive vapors. Do not pressurize, cut, heat, weld or expose such containers to sources of ignition.

Store in a well-ventilated area. This storage area should comply with NFPA 30 "Flammable and Combustible Liquid Code". Avoid storage near incompatible materials. The cleaning of tanks previously containing this product should follow API Recommended Practice (RP) 2013 "Cleaning Mobile Tanks In Flammable and Combustible Liquid Service" and API RP 2015 "Cleaning Petroleum Storage Tanks".

HOVENSA

MATERIAL SAFETY DATA SHEET

Marine Diesel Fuel

MSDS No. 4323

CONDITIONS TO AVOID and INCOMPATIBLE MATERIALS

Avoid high temperatures, open flames, sparks, welding, smoking and other ignition sources. Keep away from strong oxidizers; Viton ® ; Fluorel ®

HAZARDOUS DECOMPOSITION PRODUCTS

Carbon monoxide, carbon dioxide and non-combusted hydrocarbons (smoke).

11. TOXICOLOGICAL PROPERTIES (rev. Mar-00; Tox-00)

ACUTE TOXICITY

Acute dermal LD50 (rabbits): > 5 ml/kg
Acute oral LD50 (rats): 9 ml/kg
Primary dermal irritation: extremely irritating (rabbits)
Draize eye irritation: non-irritating (rabbits)
Guinea pig sensitization: negative

CHRONIC EFFECTS AND CARCINOGENICITY

Carcinogenic: OSHA: NO IARC: YES (2B) NTP: NO ACGIH: 1997 NOIC: A3

Studies have shown that similar products produce skin tumors in laboratory animals following repeated applications without washing or removal. The significance of this finding to human exposure has not been determined. Other studies with active skin carcinogens have shown that washing the animal's skin with soap and water between applications reduced tumor formation.

MUTAGENICITY (genetic effects)

This material has been positive in a mutagenicity study.

12. ECOLOGICAL INFORMATION (rev. Mar-98)

Keep out of sewers, drainage areas, and waterways. Report spills and releases, as applicable, under Federal and State regulations.

13. DISPOSAL CONSIDERATIONS (rev. Mar-98)

Consult federal, state and local waste regulations to determine appropriate disposal options.

14. TRANSPORTATION INFORMATION (rev. Mar-98)

PROPER SHIPPING NAME: Diesel Fuel
HAZARD CLASS and PACKING GROUP: 3, PG III
DOT IDENTIFICATION NUMBER: NA 1993
DOT SHIPPING LABEL: None

15. REGULATORY INFORMATION (rev. Feb-01)

U.S. FEDERAL, STATE, and LOCAL REGULATORY INFORMATION

This product and its constituents listed herein are on the EPA TSCA Inventory. Any spill or uncontrolled release of this product, including any substantial threat of release, may be subject to federal, state and/or local reporting requirements. This product and/or its constituents may also be subject to other regulations at the state and/or local level. Consult those regulations applicable to your facility/operation.

CLEAN WATER ACT (OIL SPILLS)

Any spill or release of this product to "navigable waters" (essentially any surface water, including certain wetlands) or adjoining shorelines sufficient to cause a visible sheen or deposit of a sludge or emulsion must be reported immediately to the National Response Center (1-800-424-8802) or, if not practical, the U.S. Coast Guard with follow-up to the National Response Center, as required by U.S. Federal Law. Also contact appropriate state and local regulatory agencies as required.

CERCLA SECTION 103 and SARA SECTION 304 (RELEASE TO THE ENVIRONMENT)

The CERCLA definition of hazardous substances contains a "petroleum exclusion" clause which exempts crude oil, refined, and unrefined petroleum products and any indigenous components of such. However,

DISCLAIMER OF EXPRESSED AND IMPLIED WARRANTIES

Information presented herein has been compiled from sources considered to be dependable, and is accurate and reliable to the best of our knowledge and belief, but is not guaranteed to be so. Since conditions of use are beyond our control, we make no warranties, expressed or implied, except those that may be contained in our written contract of sale or acknowledgment.

Vendor assumes no responsibility for injury to vendee or third persons proximately caused by the material if reasonable safety procedures are not adhered to as stipulated in the data sheet. Additionally, vendor assumes no responsibility for injury to vendee or third persons proximately caused by abnormal use of the material, even if reasonable safety procedures are followed. Furthermore, vendee assumes the risk in their use of the material.

Hazardous Polymerization: Will not occur

SECTION 6 HEALTH HAZARDS

Effects of over exposure:

Acute: May cause skin and eye irritation.

Chronic: Prolonged or repeated contact can cause defatting of skin, skin disorders, dermatitis, folliculitis, or oil acne.

Emergency and First Aid procedures:

Eyes: Flush with water for at least 15 minutes. Contains abrasive particles, consult a physician.

Skin: Wash thoroughly with soap and water. If irritation occurs, consult a physician.

Ingestion: Consult a physician.

SECTION 7 SPECIAL PRECAUTIONS AND SPILL/LEAD PROCEDURES

Storage and Handling: Store in closed containers. Protect from contamination with other materials. Do not transfer into unmarked containers.

Leak/Spill Procedure: Scoop up material. Use sand, earth, sawdust, or other absorbent if necessary.

Waste Disposal: Dispose of in accordance with state, local and federal regulations.

SECTION 8 SPECIAL PROTECTION INFORMATION/CONTROL MEASURES

Respiratory protection: None required under normal conditions

Ventilation: Use in open, well-ventilated area.

Protective Gloves: Chemical resistant gloves

Eyes Protection: Goggles or safety glasses

Other protection: As required to prevent dermal contact. Launder contaminated clothing before reuse. Wash before eating, drinking, and smoking. Safety shower and eye wash should be provided.

OTHER COMMENTS

The responsibility to provide a safe workplace remains with the user. The user should consider the health hazards and safety information contained herein as a guide and should take those precautions required in an individual operation to instruct employees and to develop work practice procedures for a safe environment.

DISCLAIMER: The information contained herein is, to the best of our knowledge and belief, accurate. However, because the condition of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by the use of this material. It is the responsibility of the user to comply with all federal, state, and local laws and regulations.

Revision No.: 003

Page 1

Product Identification

Product Name: TETRAHYDROFURAN
Synonyms: THF, Diethylene Oxide, Tetramethylene Oxide
Chemical Formula: C₄H₈O
Formula Weight: 72.11
Chemical Family: Cyclic Ether
Integra Product Numbers: T227.10; T227.50

Hazard Overview

HMIS Rating: 2-3-2-H **NFPA Rating:** 2-3-1
Warning Label:

DANGER!

Extremely flammable liquid and vapor. Keep away from heat, sparks and open flame. May form explosive peroxides. Minimize exposure to air and store out of direct sunlight. Harmful if swallowed or inhaled. Use only with adequate ventilation. Avoid contact with skin, eyes and clothing.

Components

Component	CAS #	%
Tetrahydrofuran	00109-99-9	100

Physical Data

Boiling Point:	66 °C	Specific Gravity:	0.888 Water=1
Melting Point:	-108.5 °C	Evaporation Rate:	8.0 Butyl Acetate=1
Vapor Pressure:	129 mm Hg@20°C	Vapor Density:	2.5 Air = 1

Solubility:

Miscible with water.

Appearance and Odor:

Clear, colorless liquid. Ether-like odor.

Fire and Explosion Data

Flash Point: -14 °C Test Method: CC
Auto-ignition Temperature: 320 °C
Flammable Limits (% by volume in air): Upper: 11.8 Lower: 2.0

Fire Extinguishing Media:

CO₂, Dry chemical or alcohol foam. Water may be ineffective.

Special Firefighting Procedures:

Use water to cool nearby containers and structures. Wear full protective equipment, including suitable respiratory protection.

Unusual Fire and Explosion Hazards:

Vapors may flow along surfaces to distant ignition sources and flash back. May form explosive peroxides, especially when heated..

Health Hazard Information

Effects of Overexposure

Skin Contact:

Contact may cause severe irritation or burns.

Eye Contact:

May irritate or burn the eyes.

Ingestion:

Harmful if swallowed. Ingestion may cause headache, dizziness, nausea, vomiting, gastrointestinal irritation .

Inhalation:

Harmful if inhaled. Symptoms include respiratory tract irritation, coughing, dizziness, dullness and headache. High concentrations can produce central nervous system depression, narcosis and unconsciousness.

Chronic Effects of Overexposure:

Kidney damage, liver damage.

Exposure Limits:

	<u>TWA</u>	<u>OSHA PEL</u> <u>STEL</u>	<u>Ceiling</u>
Tetrahydrofuran	200 ppm	NE	NE
	<u>TWA</u>	<u>ACGIH TLV</u> <u>STEL</u>	<u>Ceiling</u>
Tetrahydrofuran	200 ppm	250 ppm	NE

Toxicity Data:

Tetrahydrofuran	LD50 (oral, rat)	2816 mg/kg
	LC50 (inhalation, rat)	78000 mg/m ³ /2H
	LD50 (intraperitoneal, rat)	2900 mg/kg

Medical Conditions Generally Aggravated by Exposure:

Respiratory, skin, liver and kidney conditions.

Target Organs:

Eyes, skin, respiratory system, CNS, liver, kidneys.

Reproductive Effects:

None Identified

Carcinogenicity:

None Identified

<u>Component</u>	<u>NTP Listing</u>	<u>IARC Listing</u>	<u>OSHA Regulated</u>
Tetrahydrofuran	No listing	No Listing	<input type="checkbox"/>

Emergency First Aid Procedures

Skin Contact:

Flush skin with plenty of water. Seek medical attention.

Eye Contact:

Flush with water for at least 15 minutes. Seek immediate medical attention.

Inhalation:

Remove victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult administer oxygen. Seek medical attention.

Ingestion:

TETRAHYDROFURAN

24 Hour Emergency Response: CHEMTREC 800-424-9300 (Outside USA 703-527-3887)

MSDS Number: T227
Revision Date: 19-Sep-03
Revision No.: 003

Page 3

Emergency First Aid Procedures

Ingestion:

Do not induce vomiting. If victim is conscious, give water. Never give anything by mouth to an unconscious person. Seek immediate medical attention.

Additional First aid and Treatment Notes:

No information available

Reactivity Data

Stability: Stable

Hazardous Polymerization: Will Not Occur

Incompatibles:

Incompatible with strong bases and strong oxidizers Strong reducing agents.

Decomposition Products:

Oxides of carbon (CO, CO₂) Peroxides.

Conditions to Avoid:

Heat, sparks and open flame. Exposure to air and sunlight.

Spill and Disposal Procedures

Spill and Leak Procedures:

Prevent spread of spill. Eliminate all potential sources of ignition. Wear protective equipment. Take up with non-combustible inert material and place into container for disposal. Flush spill area with water.

Disposal Procedures:

Dispose in accordance with all Local, State and Federal regulations. EPA Hazardous Waste Code: U213 (Toxic waste)

Protective Equipment

Ventilation:

Use general or local exhaust ventilation to meet TLV and PEL requirements.

Respiratory Protection:

If ventilation controls do not limit airborne concentrations below PEL or TLV values, an approved respirator must be worn. Use a chemical cartridge respirator with an organic vapor cartridge. At concentrations above 1000 ppm a self-contained breathing apparatus is recommended.

Skin and Eye Protective Equipment:

Safety goggles, protective clothing and gloves. Maintain an eyewash station and safety shower nearby. Polyvinyl alcohol gloves are recommended.

Storage and Handling Precautions

Storage Area: FLAMMABLE LIQUID

Store in a cool, dry, well-ventilated flammable liquids storage area or cabinet. Bond and ground containers when transferring liquid. Minimize exposure to air and light sources. Check peroxide content of material before heating. Protect containers from physical damage.

3. HAZARD IDENTIFICATION

Overview:	NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Avoid contact with eyes, skin and clothing.		
Inhalation:	Harmful if inhaled. Causes nose and throat irritation. Vapors may affect the brain or nervous system causing dizziness, headache or nausea.		
Eyes:	Causes severe eye irritation. Avoid contact with eyes.		
Skin:	Causes skin irritation. May be harmful if absorbed through the skin.		
Ingestion:	Harmful or fatal if swallowed.		
Chronic Effects:	Contains an ingredient which can cause organ damage (See Section 2 and Section 15 for each ingredient). Possible cancer hazard. Contains an ingredient which may cause cancer based on animal data (See Section 2 and Section 15 for each ingredient). Risk of cancer depends on duration and level of exposure.		
HMIS Rating:	Health: 1*	Flammability: 2	Reactivity: 0

4. FIRST AID MEASURES

General:	Remove contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean or destroy contaminated shoes.
Inhalation:	If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.
Eyes:	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.
Skin:	In case of contact, immediately flush skin with soap and plenty of water. Get medical attention immediately.
Ingestion:	If swallowed, immediately contact Poison Control Center at 1-800-854-6813. DO NOT induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.

5. PROTECTIVE EQUIPMENT AND CONTROL MEASURES

Respiratory:	Select equipment to provide protection from the ingredients listed in Section 2 of this document. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates dust, vapor, or mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use. FOR USERS OF 3M RESPIRATORY PROTECTION ONLY: For information and assistance on 3M occupational health and safety products, call OH&ESD Technical Service toll free in U.S.A. 1-800-243-4630, in Canada call 1-800-267-4414. Please do not contact these numbers regarding other manufacturer's respiratory protection products. 3M does not endorse the accuracy of the information contained in this Material Safety Data Sheet.
Eyes:	Avoid contact with eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, safety glasses, chemical goggles, and/or head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.
Skin/Hand:	Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, protective gloves, apron, boots, head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.
Engineering Controls:	Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation.
Other Work Practices:	Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, using toilet facilities, etc. Promptly remove soiled clothing and wash clothing thoroughly before reuse. Shower after work using plenty of soap and water.

6. FIRE AND EXPLOSION INFORMATION

Flash Point:	F: 106 C: 41
Lower Explosive Limit (LEL):	1 (%vol in air) at Normal Atmospheric Temp and Pressure
Fire and Explosion Hazards:	Combustible liquid and vapor. FLAMMABLE/COMBUSTIBLE MATERIALS: Will be easily ignited by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks) creating a vapor explosion hazard. Runoff to sewers may create fire or explosion hazard. Containers may explode when heated.
Fire Fighting Procedures:	CAUTION: This product has a very low flashpoint. Use of water spray when fighting fire may be inefficient. SMALL FIRES: Use dry chemical, CO ₂ , water spray or alcohol-resistant foam. LARGE FIRES: Use water spray, fog, or alcohol-resistant foam. Do not use straight streams. Move containers from fire area if you can do so without risk. Runoff from fire control may cause pollution. Dike fire control water for later disposal. Do not scatter the material. Also Reference Emergency Response Guide Number: 127

7. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Liquid
pH:	Not Determined
Specific Gravity:	0.937277
Boiling Point (F):	235
Vapor Density:	Heavier than air
VOC Content (lbs):	Refer to the Technical Data Sheet for this product
Evaporation Rate:	Slower than ether

8. STABILITY AND REACTIVITY DATA

General:	This product is stable and hazardous polymerization will not occur.
Incompatible Materials:	Strong oxidizing agents.
Hazardous Decomposition:	May produce hazardous fumes when heated to decomposition as in welding. Fumes may produce Carbon Dioxide and Carbon Monoxide.

9. HANDLING AND STORAGE

Storage Temperature:	Store between 32 and 120 F
Handling and Storage Precautions:	Keep away from heat, sparks and flame. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during use and until all vapors are gone. Vapors may cause flash fire or ignite explosively. Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation. Avoid contact with eyes, skin and clothing. Close container after each use. Wash thoroughly after handling.

10. TOXICOLOGICAL DATA

General:	OTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. No additional information provided for this product. See Section 2 for chemical specific data.
-----------------	---

11. ECOLOGICAL DATA

General: o additional information provided for this product. See Section 2 for chemical specific data.

12. ACCIDENTAL RELEASE MEASURES

Spill Response Procedures: ELIMINATE ALL IGNITION SOURCES (no smoking, flares, sparks or flames in immediate area). Use only non-sparking equipment to handle spilled material and absorbent. Do not touch or walk through spilled material. Stop leak if you can do so without risk. Prevent entry into waterways, sewers, basements or confined areas. A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand, or other non-combustible material and transfer to containers. Use non-sparking tools to collect absorbed material.

Public Safety: CALL CHEMTREC at (800)-424-9300 for emergency response. Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. LARGE SPILLS: Consider initial downwind evacuation for at least 300 meters (1000 feet).

Also, Reference Emergency Response Guide Number: 127

13. DISPOSAL CONSIDERATION

Waste Disposal: Dispose of in accordance with local, state and federal regulations. (Also reference RCRA information in Section 15 if listed).

14. TRANSPORTATION INFORMATION

3. HAZARD IDENTIFICATION

Overview:	NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Avoid contact with eyes, skin and clothing. Contains 1,2,4-Trimethylbenzene which can cause central nervous system depression, anemia and bronchitis.		
Inhalation:	May be harmful or fatal if inhaled. Causes nose and throat irritation. Vapors may affect the brain or nervous system causing dizziness, headache or nausea.		
Eyes:	Causes severe eye irritation. Do not get in eyes.		
Skin:	Causes skin irritation. May cause allergic skin reaction. May be harmful if absorbed through the skin.		
Ingestion:	Harmful if swallowed. May cause abdominal pain, nausea, vomiting, diarrhea, or drowsiness.		
Chronic Effects:	Contains an ingredient which can cause organ damage (See Section 2 and Section 15 for each ingredient). Cancer hazard. Contains an ingredient which can cause cancer (See Section 2 and Section 15 for each ingredient). Risk of cancer depends on duration and level of exposure.		
HMIS Rating:	Health: Unknown	Flammability: Unknown	Reactivity: Unknown

4. FIRST AID MEASURES

General:	Remove contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean or destroy contaminated shoes.
Inhalation:	If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.
Eyes:	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.
Skin:	In case of contact, immediately flush skin with soap and plenty of water. Get medical attention immediately.
Ingestion:	If swallowed, immediately contact Poison Control Center at 1-800-854-6813. DO NOT induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.

5. PROTECTIVE EQUIPMENT AND CONTROL MEASURES

Respiratory:	Select equipment to provide protection from the ingredients listed in Section 2 of this document. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates dust, vapor, or mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use. FOR USERS OF 3M RESPIRATORY PROTECTION ONLY: For information and assistance on 3M occupational health and safety products, call OH&ESD Technical Service toll free in U.S.A. 1-800-243-4630, in Canada call 1-800-267-4414. Please do not contact these numbers regarding other manufacturer's respiratory protection products. 3M does not endorse the accuracy of the information contained in this Material Safety Data Sheet.
---------------------	---

Eyes: Do not get in eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, safety glasses, chemical goggles, and/or head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.

Skin/Hand: Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, protective gloves, apron, boots, head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.

Engineering Controls: Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation.

Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure.

Other Work Practices: Use good personal hygiene practices. Wash hands before eating, drinking, using toilet facilities, etc. Promptly remove soiled clothing and wash clothing thoroughly before reuse. Shower after work using plenty of soap and water.

6. FIRE AND EXPLOSION INFORMATION

Flash Point: F: 80
C: 27

Lower Explosive Limit (LEL): 1 (%vol in air) at Normal Atmospheric Temp and Pressure

Fire and Explosion Hazards: Flammable liquid and vapor. FLAMMABLE/COMBUSTIBLE MATERIALS: Will be easily ignited by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks) creating a vapor explosion hazard. Runoff to sewers may create fire or explosion hazard. Containers may explode when heated.

Fire Fighting Procedures: Also Reference Emergency Response Guide Number: Not Determined

7. PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Liquid

pH: Not Determined

Specific Gravity: 1.605388

Boiling Point (F): 279

Vapor Density: Heavier than air

VOC Content (lbs): Refer to the Technical Data Sheet for this product

Evaporation Rate: Slower than ether

8. STABILITY AND REACTIVITY DATA

General: This product is stable and hazardous polymerization will not occur.

Incompatible Materials: Strong oxidizing agents.

Hazardous Decomposition: May produce hazardous fumes when heated to decomposition as in welding. Fumes may produce Carbon Dioxide and Carbon Monoxide.

9. HANDLING AND STORAGE

Storage Temperature: Store between 32 and 120 F

Handling and Storage Precautions: Keep away from heat, sparks and flame. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during use and until all vapors are gone. Vapors may cause flash fire or ignite explosively. Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation. Do not get in eyes, on skin or clothing. Close container after each use. Wash thoroughly after handling.

10. TOXICOLOGICAL DATA

General: NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. No additional information provided for this product. See Section 2 for chemical specific data.

11. ECOLOGICAL DATA

General: No additional information provided for this product. See Section 2 for chemical specific data.

12. ACCIDENTAL RELEASE MEASURES

Spill Response Procedures: ELIMINATE ALL IGNITION SOURCES (no smoking, flares, sparks or flames in immediate area). Use only non-sparking equipment to handle spilled material and absorbent. Do not touch or walk through spilled material. Stop leak if you can do so without risk. Prevent entry into waterways, sewers, basements or confined areas. A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand, or other non-combustible material and transfer to containers. Use non-sparking tools to collect absorbed material.

Public Safety: CALL CHEMTREC at (800)-424-9300 for emergency response. Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. LARGE SPILLS: Consider initial downwind evacuation for at least 300 meters (1000 feet).

Also, Reference Emergency Response Guide Number: Not Determined

13. DISPOSAL CONSIDERATION

Waste Disposal: Dispose of in accordance with local, state and federal regulations. (Also reference RCRA information in Section 15 if listed).

14. TRANSPORTATION INFORMATION

DOT (Domestic Surface Transportation)		IMO / IMDG (Ocean Transportation)	
DOT Proper Shipping Name:	CONSUMER COMMODITY, ORM-D	IMDG Proper Shipping Name:	CONSUMER COMMODITY, ORM-D

SECTION 3 - HAZARDS IDENTIFICATION

*** EMERGENCY OVERVIEW ***: Vapors irritating to eyes and respiratory tract. Vapors may cause flash fire or explosion.

EFFECTS OF OVEREXPOSURE - EYE CONTACT: Liquid, aerosols and vapors of this product are irritating and can cause pain, tearing, reddening and swelling accompanied by a stinging sensation and/or a feeling like that of fine dust in the eyes.

EFFECTS OF OVEREXPOSURE - SKIN CONTACT: Prolonged or repeated contact can result in defatting and drying of the skin which may result in skin

(Continued on Page 2)

SECTION 3 - HAZARDS IDENTIFICATION

irritation and dermatitis (rash).

EFFECTS OF OVEREXPOSURE - INHALATION: Headaches, dizziness, nausea, decreased blood pressure, changes in heart rate and cyanosis may result from over-exposure to vapor or skin exposure. Prolonged inhalation may be harmful.

EFFECTS OF OVEREXPOSURE - INGESTION: This material may be harmful or fatal if swallowed. Corrosive and may cause severe and permanent damage to mouth, throat and stomach.

EFFECTS OF OVEREXPOSURE - CHRONIC HAZARDS: Overexposure may cause nervous system damage. Overexposure may cause lung damage. Overexposure may cause kidney damage.

PRIMARY ROUTE(S) OF ENTRY: SKIN CONTACT SKIN ABSORPTION INHALATION
INGESTION EYE CONTACT

SECTION 4 - FIRST AID MEASURES

FIRST AID - EYE CONTACT: Immediately flush eyes with plenty of water. Get medical attention, if irritation persists.

FIRST AID - SKIN CONTACT: Immediately flush skin with plenty of water. Remove clothing. Get medical attention immediately. Wash clothing separately before reuse.

FIRST AID - INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.

FIRST AID - INGESTION: Get medical attention immediately. If swallowed, do NOT induce vomiting. Give victim a glass of water or milk. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POINT: -156 F
(SETAFLASH CLOSED CUP)

LOWER EXPLOSIVE LIMIT: 1.0 %
UPPER EXPLOSIVE LIMIT: 9.5 %

AUTOIGNITION TEMPERATURE: ND

EXTINGUISHING MEDIA: CO2 DRY CHEMICAL FOAM WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDS: Vapors can travel to a source of ignition and flash back. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND

(Continued on Page 3)

SECTION 5 - FIRE FIGHTING MEASURES

CAUSE INJURY OR DEATH. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner, or properly disposed of.

SPECIAL FIREFIGHTING PROCEDURES: Containers can build up pressure if exposed to heat (fire). As in any fire, wear self-contained breathing apparatus pressure-demand (MSHA/NIOSH approved or equivalent) and full protective gear.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Absorb spill with inert material (e.g. dry sand or earth), then place in a chemical waste container.

SECTION 7 - HANDLING AND STORAGE

HANDLING: Wash thoroughly after handling.

STORAGE: Keep away from heat, sparks and flame. Keep from freezing.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Local exhaust ventilation may be necessary to control any air contaminants to within their TLVs during the use of this product.

RESPIRATORY PROTECTION: A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.

SKIN PROTECTION: Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield.

EYE PROTECTION: Wear safety glasses with side shields (or goggles) and a face shield.

OTHER PROTECTIVE EQUIPMENT: STANDARD INDUSTRIAL CLOTHING STANDARDS SHOULD BE FOLLOWED.

HYGIENIC PRACTICES: Wash hands before eating. Remove contaminated clothing and wash before reuse. Use only in a well ventilated area.

(Continued on Page 4)

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

Follow all MSDS/label precautions even after container is emptied because they may retain product residues. Avoid prolonged or repeated contact with skin. Avoid breathing vapors from heated material. Avoid contact with eyes, skin, and clothing.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

BOILING RANGE	: -43 - 159 F	VAPOR DENSITY	: Is heavier than air
ODOR	: PROPANE	ODOR THRESHOLD	: ND
APPEARANCE	: WHITE	EVAPORATION RATE	: Is faster than Butyl Acetate
SOLUBILITY IN H2O	: NEGLIGIBLE	SPECIFIC GRAVITY	: 0.6825
FREEZE POINT	: 32	pH @ 0.0 %	: NA
VAPOR PRESSURE	: 80-90	VISCOSITY	: NA
PHYSICAL STATE	: LIQUID		
COEFFICIENT OF WATER/OIL DISTRIBUTION: NEGLIGIBLE			

(See Section 16 for abbreviation legend)

SECTION 10 - STABILITY AND REACTIVITY

CONDITIONS TO AVOID: ALL SOURCES OF IGNITION, WELDING ARCS, AND OPEN FLAMES.

INCOMPATIBILITY: STRONG ACIDS, ALKALIS, OXIDIZERS, AND AMINES.

HAZARDOUS DECOMPOSITION PRODUCTS: OXIDES OF CARBON, OXIDES OF NITROGEN, AND MAY PRODUCE FORMS OF CHLORIDE, CHLORINE, AND PHOSGENE.

HAZARDOUS POLYMERIZATION: Will not occur under normal conditions.

STABILITY: This product is stable under normal storage conditions.

SECTION 11 - TOXICOLOGICAL PROPERTIES

PRODUCT LD50: 48 mg/kg

PRODUCT LC50: 28 ppm

COMPONENT TOXICOLOGICAL INFORMATION:

----- CHEMICAL NAME -----	----- LD50 -----	----- LC50 -----
N-HEXANE	48,000 PPM/4H/RAT	28,710 MG/KG RAT
PROPANE/ ISOBUTANE/N-BUTANE	NE	57 PPH/15M/RAT
TALC	NE	TCLO

(Continued on Page 5)

SECTION 12 - ECOLOGICAL INFORMATION

ECOLOGICAL INFORMATION: No Information.

SECTION 13 - DISPOSAL CONSIDERATIONS

DISPOSAL METHOD: DISPOSE IN ACCORDANCE WITH ALL FEDERAL, STATE, AND LOCAL REGULATIONS.

SECTION 14 - TRANSPORTATION INFORMATION

DOT PROPER SHIPPING NAME: AEROSOL - CONSUMER COMMODITY

DOT TECHNICAL NAME: ORM-D

DOT HAZARD CLASS: 2.1

HAZARD SUBCLASS: NA

DOT UN/NA NUMBER: UN1950

PACKING GROUP: NA

RESP. GUIDE PAGE: 126

SECTION 15 - REGULATORY INFORMATION

U.S. FEDERAL REGULATIONS: AS FOLLOWS -

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200)

CERCLA - SARA HAZARD CATEGORY:

This product has been reviewed according to the EPA 'Hazard Categories' promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

IMMEDIATE HEALTH HAZARD CHRONIC HEALTH HAZARD FIRE HAZARD PRESSURIZED
GAS HAZARD

SARA SECTION 313:

This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

----- CHEMICAL NAME -----	CAS NUMBER	WT/WT % IS LESS THAN
N-HEXANE	110-54-3	65.0 %

TOXIC SUBSTANCES CONTROL ACT:

This product contains the following chemical substances subject to the reporting requirements of TSCA 12(B) if exported from the United States:

----- CHEMICAL NAME ----- CAS NUMBER

No information is available.

(Continued on Page 6)

SECTION 15 - REGULATORY INFORMATION

U.S. STATE REGULATIONS: AS FOLLOWS -

NEW JERSEY RIGHT-TO-KNOW:

The following materials are non-hazardous, but are among the top five components in this product:

----- CHEMICAL NAME ----- CAS NUMBER

No non-hazardous materials are among the top five ingredients.

PENNSYLVANIA RIGHT-TO-KNOW:

The following non-hazardous ingredients are present in the product at greater than 3%:

----- CHEMICAL NAME ----- CAS NUMBER

No non-hazardous ingredients are present at greater than 3%.

CALIFORNIA PROPOSITION 65:

WARNING: The chemical(s) noted below and contained in this product, are known to the state of California to cause cancer, birth defects or other reproductive harm:

----- CHEMICAL NAME ----- CAS NUMBER

No Proposition 65 chemicals exist in this product.

INTERNATIONAL REGULATIONS: AS FOLLOWS -

CANADIAN WHMIS: This MSDS has been prepared in compliance with Controlled Product Regulations except for use of the 16 headings.

CANADIAN WHMIS CLASS: No information available.

SECTION 16 - OTHER INFORMATION

HMIS RATINGS - HEALTH: 1 FLAMMABILITY: 4 REACTIVITY: 0

PREVIOUS MSDS REVISION DATE: 04/23/01

REASON FOR REVISION: NEW FORMAT

VOLATILE ORGANIC COMPOUNDS (VOCs): 5.05 lbs/gal, 605 grams/ltr

LEGEND: N.A. - Not Applicable, N.E. - Not Established,
N.D. - Not Determined

The information contained on this MSDS is been checked and should be accurate. However, it is the responsibility of the user to comply with all Federal, State, and Local laws and regulations.

3. HAZARD IDENTIFICATION

Overview: NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Avoid contact with eyes, skin and clothing.

Inhalation: Harmful if inhaled. Causes lung irritation. Causes nose and throat irritation. Vapors may affect the brain or nervous system causing dizziness, headache or nausea.

Eyes: Causes eye burns. Do not get in eyes.

Skin: Causes skin burns. May be harmful if absorbed through the skin.

Ingestion: Harmful if swallowed. May cause abdominal pain, nausea, vomiting, diarrhea, or drowsiness.

Chronic Effects: Contains an ingredient which can cause organ damage (See Section 2 and Section 15 for each ingredient). Possible cancer hazard. Contains an ingredient which may cause cancer based on animal data (See Section 2 and Section 15 for each ingredient). Risk of cancer depends on duration and level of exposure.

HMIS Rating: Health: Unknown Flammability: Unknown Reactivity: Unknown

4. FIRST AID MEASURES

General: Remove contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean or destroy contaminated shoes.

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Eyes: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

Skin: In case of contact, immediately flush skin with soap and plenty of water. Get medical attention immediately.

Ingestion: If swallowed, immediately contact Poison Control Center at 1-800-854-6813. DO NOT induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.

5. PROTECTIVE EQUIPMENT AND CONTROL MEASURES

Respiratory: Select equipment to provide protection from the ingredients listed in Section 2 of this document. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates dust, vapor, or mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use. FOR USERS OF 3M RESPIRATORY PROTECTION ONLY: For information and assistance on 3M occupational health and safety products, call OH&ESD Technical Service toll free in U.S.A. 1-800-243-4630, in Canada call 1-800-267-4414. Please do not contact these numbers regarding other manufacturer's respiratory protection products. 3M does not endorse the accuracy of the information contained in this Material Safety Data Sheet.

Eyes: Do not get in eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, safety glasses, chemical goggles, and/or head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.

Skin/Hand: Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, protective gloves, apron, boots, head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.

Engineering Controls: Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation.

Other Work Practices: Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, using toilet facilities, etc. Promptly remove soiled clothing and wash clothing thoroughly before reuse. Shower after work using plenty of soap and water.

6. FIRE AND EXPLOSION INFORMATION

Flash Point:	F: 80 C: 27
Lower Explosive Limit (LEL):	1 (%vol in air) at Normal Atmospheric Temp and Pressure
Fire and Explosion Hazards:	Flammable liquid and vapor. FLAMMABLE/COMBUSTIBLE MATERIALS: Will be easily ignited by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks) creating a vapor explosion hazard. Runoff to sewers may create fire or explosion hazard. Containers may explode when heated.
Fire Fighting Procedures:	Also Reference Emergency Response Guide Number: Not Determined

7. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Liquid
pH:	Not Determined
Specific Gravity:	0.875804
Boiling Point (F):	243
Vapor Density:	Heavier than air
VOC Content (lbs):	Refer to the Technical Data Sheet for this product
Evaporation Rate:	Slower than ether

8. STABILITY AND REACTIVITY DATA

General:	This product is stable and hazardous polymerization will not occur.
Incompatible Materials:	Strong oxidizing agents.
Hazardous Decomposition:	May produce hazardous fumes when heated to decomposition as in welding. Fumes may produce Carbon Dioxide and Carbon Monoxide.

9. HANDLING AND STORAGE

Storage Temperature:	Store between 32 and 120 F
Handling and Storage Precautions:	Keep away from heat, sparks and flame. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during use and until all vapors are gone. Vapors may cause flash fire or ignite explosively. Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation. Do not get in eyes, on skin or clothing. Close container after each use. Wash thoroughly after handling.

10. TOXICOLOGICAL DATA

General:	NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. No additional information provided for this product. See Section 2 for chemical specific data.
-----------------	---

11. ECOLOGICAL DATA

General:	No additional information provided for this product. See Section 2 for chemical specific data.
-----------------	--

12. ACCIDENTAL RELEASE MEASURES

Spill Response Procedures: ELIMINATE ALL IGNITION SOURCES (no smoking, flares, sparks or flames in immediate area). Use only non-sparking equipment to handle spilled material and absorbent. Do not touch or walk through spilled material. Stop leak if you can do so without risk. Prevent entry into waterways, sewers, basements or confined areas. A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand, or other non-combustible material and transfer to containers. Use non-sparking tools to collect absorbed material.

Public Safety: CALL CHEMTREC at (800)-424-9300 for emergency response. Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. LARGE SPILLS: Consider initial downwind evacuation for at least 300 meters (1000 feet).

Also, Reference Emergency Response Guide Number: Not Determined

13. DISPOSAL CONSIDERATION

Waste Disposal: Dispose of in accordance with local, state and federal regulations. (Also reference RCRA information in Section 15 if listed).

14. TRANSPORTATION INFORMATION

1. GENERAL INFORMATION

Product Identity: INTERLUX SPECIAL THINNER

Bulk Sales Reference No: Y216

IMPORTANT: Read this MSDS before handling or disposing of this product, and provide this information to the employee, customers, and users of this product. PLEASE NOTE THE MSDS REVISION NUMBER AT THE TOP OF THIS PAGE. If the MSDS Revision Number posted at the top of this page does not match the MSDS Revision Number on the product label, please contact Customer Service at the phone number included above for the correct MSDS. This product is covered by the OSHA Hazard Communication Standard and this document has been prepared in accordance with requirements of this standard.

3. HAZARD IDENTIFICATION

Overview: NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Avoid contact with eyes, skin and clothing.

Inhalation: Harmful if inhaled. Causes nose and throat irritation. Vapors may affect the brain or nervous system causing dizziness, headache or nausea.

Eyes: Causes severe eye irritation. Do not get in eyes.

Skin: Causes skin irritation. May be harmful if absorbed through the skin.

Ingestion: Harmful if swallowed. May cause abdominal pain, nausea, vomiting, diarrhea, or drowsiness.

Chronic Effects: Contains an ingredient which can cause organ damage (See Section 2 and Section 15 for each ingredient).

HMIS Rating: Health: Unknown Flammability: Unknown Reactivity: Unknown

4. FIRST AID MEASURES

General: Remove contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean or destroy contaminated shoes.

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Eyes: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

Skin: In case of contact, immediately flush skin with soap and plenty of water. Get medical attention immediately.

Ingestion: If swallowed, immediately contact Poison Control Center at 1-800-854-6813. DO NOT induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.

5. PROTECTIVE EQUIPMENT AND CONTROL MEASURES

Respiratory: Select equipment to provide protection from the Ingredients listed in Section 2 of this document. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates dust, vapor, or mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use. FOR USERS OF 3M RESPIRATORY PROTECTION ONLY: For information and assistance on 3M occupational health and safety products, call OH&ESD Technical Service toll free in U.S.A. 1-800-243-4630, in Canada call 1-800-2F 4414. Please do not contact these numbers regarding other manufacturer's respiratory protection products. 3M does not endorse the accuracy of the information contained in this Material Safety Data Sheet.

Eyes: Do not get in eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, safety glasses, chemical goggles, and/or head and face protection may be required to prevent contact. The equipment must be thoroughly

cleaned, or discarded after each use.

Skin/Hand:

Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, protective gloves, apron, boots, head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.

Engineering Controls: Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation.

Other Work Practices:

Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, using toilet facilities, etc. Promptly remove soiled clothing and wash clothing thoroughly before reuse. Shower after work using plenty of soap and water.

6. FIRE AND EXPLOSION INFORMATION

Flash Point:

F: 80

C: 27

Lower Explosive Limit (LEL):

1 (%vol in air) at Normal Atmospheric Temp and Pressure

Fire and Explosion Hazards:

Flammable liquid and vapor. **FLAMMABLE/COMBUSTIBLE MATERIALS:** Will be easily ignited by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks) creating a vapor explosion hazard. Runoff to sewers may create fire or explosion hazard. Containers may explode when heated.

Fire Fighting Procedures:

Also Reference Emergency Response Guide Number: Not Determined

7. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:

Liquid

pH:

Not Determined

Specific Gravity:

0.8622

Boiling Point (F):

279

Vapor Density:

Heavier than air

VOC Content (lbs):

Refer to the Technical Data Sheet for this product

Evaporation Rate:

Slower than ether

8. STABILITY AND REACTIVITY DATA

General:

This product is stable and hazardous polymerization will not occur.

Incompatible Materials:

Strong oxidizing agents.

Hazardous

May produce hazardous fumes when heated to decomposition as in welding. Fumes may produce Carbon

Decomposition:

Dioxide and Carbon Monoxide.

9. HANDLING AND STORAGE

Storage Temperature:

Store between 32 and 120 F

Handling and Storage

Precautions:

Keep away from heat, sparks and flame. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during use and until all vapors are gone. Vapors may cause flash fire or ignite explosively. Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation. Do not get in eyes, on skin or clothing. Close container after each use. Wash thoroughly after handling.

10. TOXICOLOGICAL DATA

General:

NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. No additional information provided for this product. See Section 2 for chemical specific data.

11. ECOLOGICAL DATA

General:

No additional information provided for this product. See Section 2 for chemical specific data.

12. ACCIDENTAL RELEASE MEASURES

Spill Response Procedures:

ELIMINATE ALL IGNITION SOURCES (no smoking, flares, sparks or flames in immediate area). Use only non-sparking equipment to handle spilled material and absorbent. Do not touch or walk through spilled material. Stop leak if you can do so without risk. Prevent entry into waterways, sewers, basements or confined areas. A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand, or other non-combustible material and transfer to containers. Use non-sparking tools to collect absorbed material.

Public Safety:

CALL CHEMTREC at (800)-424-9300 for emergency response. Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. LARGE SPILLS: Consider initial downwind evacuation for at least 300 meters (1000 feet).

Also, Reference Emergency Response Guide Number: Not Determined

13. DISPOSAL CONSIDERATION

Waste Disposal:

Dispose of in accordance with local, state and federal regulations. (Also reference RCRA information in Section 15 if listed).

-----------------------------------	---

Public Safety:

CALL CHEMTREC at (800)-424-9300 for emergency response. Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. LARGE SPILLS: Consider initial downwind evacuation for at least 300 meters (1000 feet). Also, Reference Emergency Response Guide Number: Not Determined

13. DISPOSAL CONSIDERATION

Waste Disposal:

Dispose of in accordance with local, state and federal regulations. (Also reference RCRA information in Section 15 if listed).

14. TRANSPORTATION INFORMATION

DOT (Domestic Surface Transportation)		IMO / IMDG (Ocean Transportation)

1. GENERAL INFORMATION

Product Identity: VINYLUX PRIMEWASH REDUCER

Bulk Sales Reference No: Y354

IMPORTANT: Read this MSDS before handling or disposing of this product, and provide this information to the employee, customers, and users of this product. PLEASE NOTE THE MSDS REVISION NUMBER AT THE TOP OF THIS PAGE. If the MSDS Revision Number posted at the top of this page does not match the MSDS Revision Number on the product label, please contact Customer Service at the phone number included above for the correct MSDS. This product is covered by the OSHA Hazard Communication Standard and this document has been prepared in accordance with requirements of this standard.

NOTICE: OSHA hazardous chemicals are listed in Section 2 if present at 1% or more. Carcinogens and extraordinarily/special hazardous chemicals are listed in Section 2 if present at .1% or more. Additional regulatory information for specific chemical categories is included in Section 15.

3. HAZARD IDENTIFICATION

Overview: NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Avoid contact with eyes, skin and clothing.

Inhalation: May be harmful or fatal if inhaled. Causes lung irritation. Causes nose and throat irritation. Vapors may affect the brain or nervous system causing dizziness, headache or nausea.

Eyes: Causes eye burns. Do not get in eyes.

Skin: Causes skin burns. May be harmful if absorbed through the skin.

Ingestion: Harmful if swallowed. May cause abdominal pain, nausea, vomiting, diarrhea, or drowsiness.

Chronic Effects: Contains an ingredient which can cause organ damage (See Section 2 and Section 15 for each ingredient). Birth defect hazard. Contains an ingredient which can cause birth defects (See Section 2 and Section 15 for each ingredient). Possible cancer hazard. Contains an ingredient which may cause cancer based on animal data (See Section 2 and Section 15 for each ingredient). Risk of cancer depends on duration and level of exposure.

HMIS Rating: Health: 2 Flammability: 3 Reactivity: 0

4. FIRST AID MEASURES

General: Remove contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean or destroy contaminated shoes.

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Eyes: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

Skin: In case of contact, immediately flush skin with soap and plenty of water. Get medical attention immediately.

Ingestion: If swallowed, immediately contact Poison Control Center at 1-800-854-6813. DO NOT induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.

5. PROTECTIVE EQUIPMENT AND CONTROL MEASURES

Respiratory: Select equipment to provide protection from the ingredients listed in Section 2 of this document. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates dust, vapor, or mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use. FOR USERS OF 3M RESPIRATORY PROTECTION ONLY: For information and assistance on 3M occupational health and safety products, call OH&ESD Technical Service toll free in U.S.A. 1-800-243-4630, in Canada call 1-800-267-4414. Please do not contact these numbers regarding other manufacturer's respiratory protection products. 3M does not endorse the accuracy of the information contained in this Material Safety Data Sheet.

Eyes: Do not get in eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, safety glasses, chemical goggles, and/or head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.

Skin/Hand: Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, protective gloves, apron, boots, head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.

Engineering Controls: Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation.

Other Work Practices: Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, using toilet facilities, etc. Promptly remove soiled clothing and wash clothing thoroughly before reuse. Shower after work using plenty of soap and water.

6. FIRE AND EXPLOSION INFORMATION

Flash Point:	F: 25 C: -4
Lower Explosive Limit (LEL):	1 (%vol in air) at Normal Atmospheric Temp and Pressure
Fire and Explosion Hazards:	Flammable liquid and vapor. FLAMMABLE/COMBUSTIBLE MATERIALS: May be ignited by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks) creating a vapor explosion hazard. Runoff to sewers may create fire or explosion hazard. Containers may explode when heated.
Fire Fighting Procedures:	CAUTION: This product has a low flashpoint. Use of water spray when fighting fire may be inefficient. SMALL FIRES: Use dry chemical, CO ₂ , water spray or alcohol-resistant foam. LARGE FIRES: Use water spray, fog, or alcohol-resistant foam. Do not use straight streams. Move containers from fire area if you can do so without risk. Runoff from fire control may cause pollution. Dike fire control water for later disposal. Do not scatter the material.

Also Reference Emergency Response Guide Number: 132

7. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Liquid
pH:	Not Determined
Specific Gravity:	0.972871
Boiling Point (F):	175
Vapor Density:	Heavier than air
VOC Content (lbs):	Refer to the Technical Data Sheet for this product.
Evaporation Rate:	Slower than ether

8. STABILITY AND REACTIVITY DATA

General:	This product is stable and hazardous polymerization will not occur.
Incompatible Materials:	Strong oxidizing agents.
Hazardous Decomposition:	May produce hazardous fumes when heated to decomposition as in welding. Fumes may produce Carbon Dioxide and Carbon Monoxide.

9. HANDLING AND STORAGE

Storage Temperature:	Store between 32 and 120 F
Handling and Storage Precautions:	Keep away from heat, sparks and flame. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during use and until all vapors are gone. Vapors may cause flash fire or ignite explosively. Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation. Do not get in eyes, on skin or clothing. Close container after each use. Wash thoroughly after handling.

10. TOXICOLOGICAL DATA

General:	NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. No additional information provided for this product. See Section 2 for chemical specific data.
-----------------	---

11. ECOLOGICAL DATA

General:	No additional information provided for this product. See Section 2 for chemical specific data.
-----------------	--

12. ACCIDENTAL RELEASE MEASURES

Spill Response Procedures: ELIMINATE ALL IGNITION SOURCES (no smoking, flares, sparks or flames in immediate area). Use only non-sparking equipment to handle spilled material and absorbent. Fully encapsulated, vapor protective clothing should be worn for spills and leaks with no fire. Do not touch or walk through spilled material. Stop leak if you can do so without risk. Prevent entry into waterways, sewers, basements or confined areas. A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand, or other non-combustible material and transfer to containers. Use non-sparking tools to collect absorbed material. **LARGE SPILLS:** Dike far ahead of liquid spill to contain released material and runoff from fire control.

Public Safety: CALL CHEMTREC at (800)-424-9300 for emergency response. Isolate spill or leak area immediately for at least 50 to 100 meters (160 to 330 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. **LARGE SPILLS:** Consider initial downwind evacuation for at least 300 meters (1000 feet).

Also, Reference Emergency Response Guide Number: 132

13. DISPOSAL CONSIDERATION

Waste Disposal: Dispose of in accordance with local, state and federal regulations. (Also reference RCRA information in Section 15 if listed).

3. HAZARD IDENTIFICATION

Overview:	NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Avoid contact with eyes, skin and clothing. Contains 1,2,4-Trimethylbenzene which can cause central nervous system depression, anemia and bronchitis.		
Inhalation:	May be harmful or fatal if inhaled. May cause lung injury. Causes nose and throat irritation. Vapors may affect the brain or nervous system causing dizziness, headache or nausea.		
Eyes:	Causes eye burns. Do not get in eyes.		
Skin:	Causes skin burns. May be harmful if absorbed through the skin.		
Ingestion:	Harmful if swallowed. May cause abdominal pain, nausea, vomiting, diarrhea, or drowsiness.		
Chronic Effects:	Contains an ingredient which can cause organ damage (See Section 2 and Section 15 for each ingredient). Cancer hazard. Contains an ingredient which can cause cancer (See Section 2 and Section 15 for each ingredient). Risk of cancer depends on duration and level of exposure.		
HMIS Rating:	Health: Unknown	Flammability: Unknown	Reactivity: Unknown

4. FIRST AID MEASURES

General:	Remove contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean or destroy contaminated shoes.
Inhalation:	If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.
Eyes:	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.
Skin:	In case of contact, immediately flush skin with soap and plenty of water. Get medical attention immediately.
Ingestion:	If swallowed, immediately contact Poison Control Center at 1-800-854-6813. DO NOT induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.

5. PROTECTIVE EQUIPMENT AND CONTROL MEASURES

Respiratory:	Select equipment to provide protection from the ingredients listed in Section 2 of this document. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates dust, vapor, or mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use. FOR USERS OF 3M RESPIRATORY PROTECTION ONLY: For information and assistance on 3M occupational health and safety products, call OH&ESD Technical Service toll free in U.S.A. 1-800-243-4630, in Canada call 1-800-267-4414. Please do not contact these numbers regarding other manufacturer's respiratory protection products. 3M does not endorse the accuracy of the information contained in this Material Safety Data Sheet.
Eyes:	Do not get in eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, safety glasses, chemical goggles, and/or head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.
Skin/Hand:	Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, protective gloves, apron, boots, head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.
Engineering Controls:	Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation.
Other Work Practices:	Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, using toilet facilities, etc. Promptly remove soiled clothing and wash clothing thoroughly before reuse. Shower after work using plenty of soap and water.

6. FIRE AND EXPLOSION INFORMATION

Flash Point:	F: 80 C: 27
Lower Explosive Limit (LEL):	1 (%vol in air) at Normal Atmospheric Temp and Pressure
Fire and Explosion Hazards:	Flammable liquid and vapor. FLAMMABLE/COMBUSTIBLE MATERIALS: Will be easily ignited by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined

areas (sewers, basements, tanks) creating a vapor explosion hazard. Runoff to sewers may create fire or explosion hazard. Containers may explode when heated.

Fire Fighting Procedures:

Also Reference Emergency Response Guide Number: Not Determined

7. PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Liquid
 pH: No Established Limit
 Specific Gravity: 1.285861
 Boiling Point (F): 270
 Vapor Density: Heavier than air
 VOC Content (lbs): Refer to the Technical Data Sheet for this product.
 Evaporation Rate: Slower than ether

8. STABILITY AND REACTIVITY DATA

General: This product is stable and hazardous polymerization will not occur.
 Incompatible Materials: Strong oxidizing agents.
 Hazardous Decomposition: May produce hazardous fumes when heated to decomposition as in welding. Fumes may produce Carbon Dioxide and Carbon Monoxide.

9. HANDLING AND STORAGE

Storage Temperature: Store between 40–100°F (4–38°C).
 Handling and Storage Precautions: Keep away from heat, sparks and flame. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during use and until all vapors are gone. Vapors may cause flash fire or ignite explosively. Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation. Do not get in eyes, on skin or clothing. Close container after each use. Wash thoroughly after handling.

10. TOXICOLOGICAL DATA

General: NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. No additional information provided for this product. See Section 2 for chemical specific data.

11. ECOLOGICAL DATA

General: No additional information provided for this product. See Section 2 for chemical specific data.

12. ACCIDENTAL RELEASE MEASURES

Spill Response Procedures: ELIMINATE ALL IGNITION SOURCES (no smoking, flares, sparks or flames in immediate area). Use only non-sparking equipment to handle spilled material and absorbent. Do not touch or walk through spilled material. Stop leak if you can do so without risk. Prevent entry into waterways, sewers, basements or confined areas. A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand, or other non-combustible material and transfer to containers. Use non-sparking tools to collect absorbed material. CALL CHEMTREC at (800)-424-9300 for emergency response. Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. LARGE SPILLS: Consider initial downwind evacuation for at least 300 meters (1000 feet).
 Public Safety: Also, Reference Emergency Response Guide Number: Not Determined

13. DISPOSAL CONSIDERATION

Waste Disposal: Dispose of in accordance with local, state and federal regulations. (Also reference RCRA information in Section 15 if listed).

14. TRANSPORTATION INFORMATION

DOT (Domestic Surface Transportation)	IMO / IMDG (Ocean Transportation)
DOT Proper Shipping Name: CONSUMER COMMODITY, ORM-D	IMDG Proper Shipping Name: Paint
DOT Hazard Class: NR	IMDG Hazard Class: Flammable Liquid, 3
UN / NA Number: Not Regulated	UN Number: UN 1263

CERCLA/DOT RQ: 138 gal. / 1479 lbs.	System Reference Code: 181

15. REGULATORY INFORMATION

Regulatory Overview: The regulatory data in Section 15 is not intended to be all-inclusive, only selected regulations are represented. All ingredients of this product are listed on the TSCA (Toxic Substance Control Act) Inventory or are not required to be listed on the TSCA Inventory.
Note: Any chemical ingredients listed in Section 15, that do not also appear in Section 2, are contained in the product at a concentration below the applicable OSHA threshold level of 1% or 0.1%.

IPS
WELD-ON

MATERIAL SAFETY DATA SHEET

Date Revised: SEP 2003
Supersedes: MAY 2002

Information on this form is furnished solely for the purpose of compliance with the Occupational Safety and Health Act and shall not be used for any other purpose. IPS Corporation urges the customers receiving this Material Safety Data Sheet to study it carefully to become aware of the hazards, if any, of the product involved. In the interest of safety, you should notify your employees, agents and contractors of the information on this sheet.

SECTION I

MANUFACTURER'S NAME IPS Corporation ADDRESS 17109 S. Main St., P.O. Box 379, Gardena, CA. 90248	Transportation Emergencies: CHEMTREC: (800) 424-9300 or 3 E COMPANY (800) 451-8346 Medical Emergencies: 3 E COMPANY (24 Hour No.) (800) 451-8346 Business: (310) 898-3300
--	---

CHEMICAL NAME and FAMILY Solvent Cement for Plastic Pipe Mixture of Synthetic Resin and Organic Solvents	TRADE NAME: WELD-ON 790 Multi-Purpose Cement for Plastic Pipe FORMULA: Proprietary
---	--

SECTION II - HAZARDOUS INGREDIENTS

None of the ingredients below are listed as carcinogens by IARC, NTP or OSHA	CAS#	APPROX %	ACGIH-TLV	ACGIH-STEL	OSHA-PEL	OSHA-STEL	DUPONT	
							(A) AEL	(B) STEL
Chlorinated Polyvinyl Chloride Resin (CPVC)	NON/HAZ		N/A		N/A			
Tetrahydrofuran (THF)**	109-99-9	40 - 55	200 PPM	250 PPM	200 PPM	250 PPM	50 PPM	75 PPM
Methyl Ethyl Ketone (MEK)	78-93-3	25 - 45*	200 PPM	300 PPM	200 PPM	300 PPM		
Cyclohexanone	108-94-1	2 - 10	25 PPM Skin			25 PPM Skin		

All of the constituents of Weld-On adhesive products are listed on the TSCA inventory of chemical substances maintained by the US EPA, or are exempt from such listing.

* Title III Section 313 Supplier Notification: This product contains toxic chemicals subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 and of 40CFR372. This information must be included in all MSDS's that are copied and distributed for this material.

(A) Dupont and BASF mfg's Acceptable Exposure Limit (AEL) guidelines for 8 hour and 12 hour TWA. (B) Dupont/BASF recommended STEL for 15 minute TWA.

**Information found in a report from the National Toxicology Program (NTP) on an inhalation study in rats and mice suggests that Tetrahydrofuran (THF) can cause tumors in animals. In the study the rats and mice were exposed to THF vapor levels up to 1800 PPM for two years (their lifetime), 6 hours/day, 5 days/week. Test results showed evidence of liver tumors in female mice and kidney tumors in male rats. No evidence of tumors was seen in female rats and male mice. There is no data linking Tetrahydrofuran exposure with cancer in humans.

BULK SHIPPING INFORMATION / CONTAINERS LARGER THAN ONE LITER DOT Shipping Name: Adhesive DOT Hazard Class: 3 Identification Number: UN 1133 Packaging Group: II Label Required: Flammable Liquid	SPECIAL HAZARD DESIGNATIONS		
	HEALTH:	HMIS	NFPA
SHIPPING INFORMATION FOR CONTAINERS LESS THAN ONE LITER DOT Shipping Name: Consumer Commodity DOT Hazard Class: ORM-D	FLAMMABILITY:		HAZARD RATING
	REACTIVITY:		0 - MINIMAL
	PROTECTIVE		1 - SLIGHT
	EQUIPMENT:	B - H	2 - MODERATE
			3 - SERIOUS
			4 - SEVERE
			B = Eye, Hand/Skin (for normal solvent-welding, small spill, clean-up activities)
			H = Eye, Hand/Skin, Respiratory Protection and Impermeable Apron (splash/immersion risks)

SECTION III - PHYSICAL DATA

APPEARANCE Clear, medium syrupy liquid	ODOR Ethereal	BOILING POINT (°F/°C) 151°F (67°C) Based on first boiling component: THF
SPECIFIC GRAVITY @ 73°F ± 3.6° (23°C ± 2°) Typical 0.940 ± 0.040	VAPOR PRESSURE (mm Hg.) 143 mm Hg. based on first boiling component, THF @ 68°F (20°C)	PERCENT VOLATILE BY VOLUME (%) Approx: 80 - 90%
VAPOR DENSITY (Air = 1) 2.49	EVAPORATION RATE (BUAC = 1) > 1.0	SOLUBILITY IN WATER Solvent portion completely soluble in water. Resin portion separates out.

VOC STATEMENT: VOC as manufactured 850 Grams/Liter (g/l). Maximum VOC emissions as applied and tested per SCAQMD Rule 1168, Test Method 316A: 600 g/l.

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT -4°F (-20°C) T.C.C. Based on THF	FLAMMABLE LIMITS (PERCENT BY VOLUME)	LEL 2.0	UEL 11.8
--	--	-------------------	--------------------

FIRE EXTINGUISHING MEDIA
Ansul "Purple K" potassium bicarbonate dry chemical, any appropriately sized ABC dry chemical, carbon dioxide or foam extinguisher can be used for small fires. Use of a water fog by trained personnel can extinguish small/large fires.

SPECIAL FIRE FIGHTING PROCEDURES
Evacuate enclosed areas. Stay upwind. Close quarters or confined spaces require self-contained breathing apparatus, positive pressure mask or airline mask. Use of a water fog by trained personnel can extinguish small/large fires and avoid water flow or water streams/spray distributing burning material or contaminated water over a large area or into sewers or storm drains. Use water spray to cool containers, to flush spills from source of ignition and to disperse vapors.

UNUSUAL FIRE AND EXPLOSION HAZARDS
Fire hazard because of low flash point and high volatility. Vapors are heavier than air and may travel to source(s) of ignition at or near ground or lower level(s) and flash back.

SECTION V - HEALTH HAZARD DATA

PRIMARY ROUTES OF ENTRY:

Inhalation
 Skin Contact
 Eye Contact
 Ingestion

EFFECT OF OVEREXPOSURE ACUTE:

Inhalation: Severe overexposure may result in nausea, dizziness, headache. Can cause drowsiness, irritation of eyes and nasal passages.
Skin Contact: Skin irritant. Liquid contact may remove natural skin oils resulting in skin irritation. Dermatitis may occur with prolonged contact.
Skin Absorption: Prolonged or widespread exposure may result in the absorption of harmful amounts of material.
Eye Contact: Overexposure may result in severe eye injury with corneal or conjunctival inflammation on contact with the liquid. Vapors slightly uncomfortable.
Ingestion: Moderately toxic. May cause nausea, vomiting, diarrhea. May cause mental sluggishness.
CHRONIC: Symptoms of respiratory tract irritation and damage to respiratory epithelium were reported in rats exposed to 5000 ppm THF for 90 days. Elevation of SGPT suggests a disturbance in liver function. The NOEL was reported to be 200 ppm.

REPRODUCTIVE EFFECTS	TERATOGENICITY	MUTAGENICITY	EMBRYOTOXICITY	SENSITIZATION TO PRODUCT	SYNERGISTIC PRODUCTS
N. AP.	N. AP.	N. AP.	N. AP.	N. AP.	N. AV.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Individuals with pre-existing diseases of the eyes, skin or respiratory system may have increased susceptibility to the toxicity of excessive exposures.

EMERGENCY AND FIRST AID PROCEDURES

Inhalation: If overcome by vapors, remove to fresh air and if breathing stopped, give artificial respiration. If breathing is difficult, give oxygen. Call physician.
Eye Contact: Flush eyes with plenty of water for 15 minutes and call a physician.
Skin Contact: Remove contaminated clothing and shoes. Wash skin with plenty of soap and water for at least 15 minutes. If irritation develops, get medical attention.
Ingestion: Give 1 or 2 glasses of water or milk. Do not induce vomiting. Call physician or poison control center immediately.

SECTION VI - REACTIVITY

STABILITY	UNSTABLE		CONDITIONS TO AVOID
	STABLE	X	

INCOMPATIBILITY (MATERIALS TO AVOID) Caustics, ammonia, inorganic acids, chlorinated compounds, strong oxidizers and isocyanates.

HAZARDOUS DECOMPOSITION PRODUCTS
When forced to burn, this product gives out carbon monoxide, carbon dioxide, hydrogen chloride and smoke.

HAZARDOUS POLYMERIZATION	MAY OCCUR		CONDITIONS TO AVOID
	WILL NOT OCCUR	X	

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED
Eliminate all ignition sources. Avoid breathing of vapors. Keep liquid out of eyes. Flush with large amount of water. Contain liquid with sand or earth. Absorb with sand or nonflammable absorbent material and transfer into steel drums for recovery or disposal. Prevent liquid from entering drains.

WASTE DISPOSAL METHOD
Follow local, State and Federal regulations. Consult disposal expert. Can be disposed of by incineration. Excessive quantities should not be permitted to enter drains. Empty containers should be air dried before disposing. Hazardous Waste Code (CA): 214.

SECTION VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION (Specify type)
Atmospheric levels should be maintained below established exposure limits contained in Section II. If airborne concentrations exceed those limits, use of a NIOSH approved organic vapor cartridge respirator with full face-piece is recommended. The effectiveness of an air purifying respirator is limited. Use it only for a single short-term exposure. For emergency and other conditions where short-term exposure guidelines may be exceeded, use an approved positive pressure self-contained breathing apparatus.

VENTILATION
Use only with adequate ventilation. Provide sufficient ventilation in volume and pattern to keep contaminants below applicable exposure limits set forth in Section II. Use only explosion proof ventilation equipment.

PROTECTIVE GLOVES PVA coated rubber gloves for frequent dipping/immersion. Use of latex/nitrile surgical gloves or solvent resistant barrier cream should provide adequate protection when normal solvent-cement welding practices and procedures are used for making plastic welded pipe joints.	EYE PROTECTION Splashproof chemical goggles, face shield, safety glasses (spectacles) with brow guards and side shields, etc. as appropriate for exposure.
--	---

OTHER PROTECTIVE EQUIPMENT AND HYGIENIC PRACTICES
Impervious apron and a source of running water to flush or wash the eyes and skin in case of contact.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING
Store in the shade between 40°F - 90°F (5°C - 32.5°C). Keep away from heat, sparks, open flame and other sources of ignition. Avoid prolonged breathing of vapor. Use with adequate ventilation. Avoid contact with eyes, skin and clothing. Train employees on all special handling procedures before they work with this product.

OTHER PRECAUTIONS
Follow all precautionary information given on container label, product bulletins and our solvent cementing literature. All material handling equipment should be electrically grounded.

The information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of this data or the results to be obtained from the use thereof.

 IARC: Group 2b: No; Group 3: Yes; Group 4: No

3. HAZARD IDENTIFICATION

Overview:	NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Avoid contact with eyes, skin and clothing.		
Inhalation:	Harmful if inhaled. Causes nose and throat irritation. Vapors may affect the brain or nervous system causing dizziness, headache or nausea.		
Eyes:	Causes severe eye irritation. Do not get in eyes.		
Skin:	Causes skin irritation. May be harmful if absorbed through the skin.		
Ingestion:	Harmful if swallowed. May cause abdominal pain, nausea, vomiting, diarrhea, or drowsiness.		
Chronic Effects:	Contains an ingredient which can cause organ damage (See Section 2 and Section 15 for each ingredient). Possible cancer hazard. Contains an ingredient which may cause cancer based on animal data (See Section 2 and Section 15 for each ingredient). Risk of cancer depends on duration and level of exposure.		
HMIS Rating:	Health: 2*	Flammability: 3	Reactivity: 0

4. FIRST AID MEASURES

General:	Remove contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean or destroy contaminated shoes.
Inhalation:	If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.
Eyes:	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.
Skin:	In case of contact, immediately flush skin with soap and plenty of water. Get medical attention immediately.
Ingestion:	If swallowed, immediately contact Poison Control Center at 1-800-854-6813. DO NOT induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.

5. PROTECTIVE EQUIPMENT AND CONTROL MEASURES

Respiratory:	Select equipment to provide protection from the ingredients listed in Section 2 of this document. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates dust, vapor, or mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use. FOR USERS OF 3M RESPIRATORY PROTECTION ONLY: For information and assistance on 3M occupational health and safety products, call OH&ESD Technical Service toll free in U.S.A. 1-800-243-4630, in Canada call 1-800-267-4414. Please do not contact these numbers regarding other manufacturer's respiratory protection products. 3M does not endorse the accuracy of the information contained in this Material Safety Data Sheet.
Eyes:	Do not get in eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, safety glasses, chemical goggles, and/or head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.
Skin/Hand:	Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 2 of this document. Depending on the site-specific conditions of use, protective gloves, apron, boots, head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.
Engineering Controls:	Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation.
Other Work Practices:	Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, using toilet facilities, etc. Promptly remove soiled clothing and wash clothing thoroughly before reuse. Shower after work using plenty of soap and water.

6. FIRE AND EXPLOSION INFORMATION

Flash Point:	F: 60
	C: 16
Lower Explosive Limit (LEL):	1 (%vol in air) at Normal Atmospheric Temp and Pressure

Fire and Explosion Hazards:

Flammable liquid and vapor. FLAMMABLE/COMBUSTIBLE MATERIALS. Will be easily ignited by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks) creating a vapor explosion hazard. Runoff to sewers may create fire or explosion hazard. Containers may explode when heated.

Fire Fighting Procedures:

Also Reference Emergency Response Guide Number: Not Determined

7. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Liquid
pH:	Not Determined
Specific Gravity:	0.868008
Boiling Point (F):	175
Vapor Density:	Heavier than air
VOC Content (lbs):	Refer to the Technical Data Sheet for this product
Evaporation Rate:	Slower than ether

8. STABILITY AND REACTIVITY DATA

General:	This product is stable and hazardous polymerization will not occur.
Incompatible Materials:	Strong oxidizing agents.
Hazardous Decomposition:	May produce hazardous fumes when heated to decomposition as in welding. Fumes may produce Carbon Dioxide and Carbon Monoxide.

9. HANDLING AND STORAGE

Storage Temperature:	Store between 32 and 120 F
Handling and Storage Precautions:	Keep away from heat, sparks and flame. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during use and until all vapors are gone. Vapors may cause flash fire or ignite explosively. Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation. Do not get in eyes, on skin or clothing. Close container after each use. Wash thoroughly after handling.

10. TOXICOLOGICAL DATA

General:	NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. No additional information provided for this product. See Section 2 for chemical specific data.
-----------------	---

11. ECOLOGICAL DATA

General:	No additional information provided for this product. See Section 2 for chemical specific data.
-----------------	--

12. ACCIDENTAL RELEASE MEASURES

Spill Response Procedures:	ELIMINATE ALL IGNITION SOURCES (no smoking, flares, sparks or flames in immediate area). Use only non-sparking equipment to handle spilled material and absorbent. Do not touch or walk through spilled material. Stop leak if you can do so without risk. Prevent entry into waterways, sewers, basements or confined areas. A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand, or other non-combustible material and transfer to containers. Use non-sparking tools to collect absorbed material.
-----------------------------------	---

CALL CHEMTREC at (800)-424-9300 for emergency response. Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. LARGE SPILLS: Consider initial downwind evacuation for at least 300 meters (1000 feet).

Also, Reference Emergency Response Guide Number: Not Determined

13. DISPOSAL CONSIDERATION

Waste Disposal: Dispose of in accordance with local, state and federal regulations. (Also reference RCRA information in Section 15 if listed).

14. TRANSPORTATION INFORMATION

DOT (Domestic Surface Transportation)		IMO / IMDG (Ocean Transportation)	
DOT Proper Shipping Name:	CONSUMER COMMODITY, ORM-D	IMDG Proper Shipping Name:	CONSUMER COMMODITY, ORM-D

SECTION 1 CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Identity: Metal Marking Yellow Item No.: 16060,16063,16064,26063,26064 Other Names: Tex-Pen, Dalo Formula: A419M	Note: Blank spaces are not permitted. If any item is not applicable, or no information is available, the space must be marked to indicate that.
Another Exclusive Product of: ITW Dykem	Emergency Telephone Number 1-800-535-5053 (Domestic), 1-352-323-3500 (International)
Address (Number, Street, City, State, and ZIP Code) 805 East Old 56 Highway Olathe, KS 66061-4914	Telephone Number for Information 1-800-443-9536 or 1-913-397-9889
Product Class: Solvent based marker.	Date Prepared 9/05/06
	Signature of Preparer (Optional) Regulatory Dept.

SECTION 2 - COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous Components (Specific Chemical Identity, Common Name(s))	CAS No.	OSHA PEL	ACGIH-TLV	Other Limits Recommended	%(Opt.)
Aromatic Hydrocarbon	64742-95-6	TWA 100 ppm	TWA 100 ppm	No data	20 - 30
Titanium Dioxide	13463-67-7	TWA 10 mg/m3	TWA 10 mg/m3	Nuisance dust*	20 - 30
Clay, Silica	1332-58-7	TWA 15 mg/m3	TWA 15 mg/m3	Nuisance dust*	15 - 25
1,2,4 Trinitethyl Benzene	95-63-6	TWA 100 ppm	TWA 100 ppm	No data	1 - 10
Organic Yellow(s)	6358-31-2 6528-34-3	TWA 10 mg/m3	TWA 10 mg/m3	Nuisance dust*	1 - 10
Xylene	1330-20-7	TWA 100 ppm	TWA 100 ppm	No data	1 - 5

*Nuisance dust as free dust only, not as bound in paint or ink.

SECTION 3 HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW – Yellow opaque thick viscosity liquid with aromatic odor. Warning! Combustible liquid and vapor. Keep away from heat sparks and flames. May cause eye, skin and respiratory tract irritation. If swallowed do not induce vomiting. Get immediate medical attention.

POTENTIAL HEALTH EFFECTS

Eyes: Liquid is moderately irritating to the eyes.

Skin: Liquid is mildly irritating to the skin.

Ingestion: Ingestion of liquid may cause vomiting.

Inhalation: High concentration of vapors may produce irritation of the respiratory tract, headache, dizziness, and nausea.

CHRONIC HEALTH EFFECTS

Prolonged or repeated contact may cause skin sensitization or dermatitis. Reports have associated repeated and prolonged occupational overexposure to solvents with irreversible brain and nervous system damage. Intentional misuse by deliberately concentrating or inhaling this product may be harmful or fatal.

SECTION 4 FIRST AID MEASURES

Eyes – Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

Inhalation – Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Skin – Flush skin with plenty of water. Remove contaminated clothing and shoes.

Ingestion – If large quantities of this material are swallowed, get immediate medical attention. Do not induce vomiting. Never give anything by mouth to an unconscious person.

SECTION 5 FIRE FIGHTING MEASURES

Flash Point (Method Used) 108°F	Flammable Limits	LEL 1.9	UEL 12.6
---	-------------------------	-------------------	--------------------

Extinguishing Media -

Use water fog, foam, dry chemical or CO2. Use water spray to cool fire-exposed containers and to protect personnel.

Special Fire Fighting Procedures -

Keep containers cool and vapors down with water spray. Prevent spill from entering drains, sewers, streams or other bodies of water. If run-off occurs, notify proper authorities. Do not enter confined fire space without full bunker gear (helmet with face shield, bunker coats, gloves and rubber boots), including a positive pressure NIOSH approved self-contained breathing apparatus.

Unusual Fire and Explosion Hazards – Vapors are heavier than air and may travel along ground, or be moved by ventilation and be ignited by ignition source.

SECTION 6 ACCIDENTAL RELEASE MEASURES

SMALL SPILL: Absorb liquid with non-combustible floor absorbent and place in non-leaking container; seal properly and dispose of properly in compliance with federal, state, and local regulations.

LARGE SPILL: Evacuate area of unprotected personnel. Eliminate all ignition sources. Stop spill at source if safe to do so. Handling equipment must be grounded to prevent sparking. Prevent spill from entering drains, sewers, streams or other bodies of water. If run-off occurs, notify proper authorities. Pump or vacuum transfer spilled product to clean containers for recovery. Absorb unrecoverable product. Transfer contaminated absorbent, soil and other materials to containers for disposal. Dispose of properly in compliance with federal, state, and local regulations.

SECTION 7 HANDLING AND STORAGE

HANDLING: Empty containers retain residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, sparks, flames, static electricity, or other sources of ignition. Many hot organic chemical vapors or mists are susceptible to sudden spontaneous combustion when mixed with air. Ignition may occur at temperatures below those published in the literature as “autoignition” or ignition temperatures. Ignition temperatures decrease with increasing vapor volume and vapor volume and vapor/air contact time, and are influenced by pressure changes. Ignition of organic chemical vapors may occur at typical elevated-temperature process conditions, especially in processes operating under vacuum if subjected to sudden ingress of air, or outside process equipment operating under elevated pressure if sudden escape of vapors or mists to the atmosphere occurs. Any proposed use of this product in elevated-temperature processes should be thoroughly evaluated to assure that safe operating conditions are established and maintained.

STORAGE:

Keep away from heat, sparks and open flames. Keep out of reach of children. Keep container tightly sealed when not in use. Store in cool, well-ventilated place away from incompatible materials. Information on this Material Safety Data Sheets refers to ink used in pens and markers, however, it applies to these inks in bulk. The inks are contained in capillary or valve reservoirs and will not spill or leak under normal conditions.

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION**Respiratory Protection (Specify Type) –**

Not usually necessary. Use with adequate ventilation. Use NIOSH/MSHA approved respirator if PELs or TLVs are exceeded.

Engineering Controls	Local Exhaust	Not usually needed	Special	None
	Mechanical (General)	Yes	Other	None

Protective Gloves – Chemical resistant gloves if skin contact is possible (consult your safety equipment supplier).

Eye Protection – Not normally required if used as intended. Wear chemical splash goggles in compliance with OSHA regulation if splashing is possible.

Other Protective Clothing or Equipment -

Not usually necessary. For bulk material, if direct contact is possible, wear apron, boots, face shield, etc. as needed.

Work/Hygienic Practices -

Follow label instructions. Wash hands after use and before eating, drinking, smoking, using restrooms, etc.

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Boiling Point	318 to 338 ^o F	Specific Gravity (H ₂ O = 1) @70 ^o F	>1
Vapor Pressure (mm-Hg @ 70 ^o F)	No Data	Melting Point	No Data
Vapor Density (AIR = 1)	Greater than one (1)	Evaporation Rate (Butyl Acetate = 1)	Less than one (1)
Solubility in Water	Negligible	pH	No Data

Appearance and Odor – Yellow opaque thick viscosity liquid with aromatic odor.

VOC: This product contains 351 grams per liter or 28.73% by weight VOC's.

SECTION 10 STABILITY AND REACTIVITY

Chemical	Unstable		Conditions to Avoid – None known.
Stability	Stable	X	

Incompatibility (Materials to Avoid) -

Strong oxidizing and reducing agents, strong alkalies and strong acids.

Hazardous Decomposition or Byproducts -

Carbon dioxide, carbon monoxide, smoke, soot and various organic oxidation by-products.

Hazardous Polymerization	May Occur		Conditions to Avoid - No data
	Will Not Occur	X	

SECTION 11 TOXICOLOGICAL INFORMATION

Please refer to Section 3 for available information on potential health effects.

SECTION 12 ECOLOGICAL INFORMATION

No specific ecological data are available for this product. Please refer to Section 6 for information regarding accidental releases and Section 15 for regulatory reporting information.

SECTION 13 DISPOSAL CONSIDERATIONS

Dispose of in accordance with all applicable local, state and federal regulations.

SECTION 14 TRANSPORT INFORMATION (Not meant to be all inclusive)

Domestic Highway (Containers < 1 Quart are ORM-D)	Domestic Air Shipments (Pens)
Proper Shipping Name: Paint/ Ink	Proper Shipping Name: Consumer Commodity
Hazard Class/Subsidiary Hazard: 3	Hazard Class/Subsidiary Hazard: 9
UN/NA No.: UN1263	UN/NA No.: I.D. 8000
Packing Group: III	Packing Group: None
Label Required: Combustible Liquid (2)	Label Required: Class 9

SECTION 15 REGULATORY INFORMATION (Not meant to be all inclusive - selected regulations represented)

U.S. FEDERAL REGULATIONS:

Carcinogenicity:	NTP?	IARC Monographs?	OSHA Regulated?
	No	No	No

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200).

SECTION 313: This product contains Xylene (1330-20-7) and 1,2,4 Tri Methyl Benzene (95-63-6) which are listed and may require reporting under SARA Title III Sec. 313 if used over the threshold reporting quantity. This information must be included in all MSDSs that are copied and distributed for this material.

INTERNATIONAL REGULATIONS:

CANADIAN WHMIS: Not WHMIS controlled (pens)	Bulk: Class B2, D2A
---	---------------------

STATE REGULATIONS:

CALIFORNIA PROPOSITION 65:

This product contains a chemical known to the State of California to cause cancer. Benzene, Ethyl benzene.

This product contains chemicals known to the State of California to cause birth defects or other reproductive harm. Toluene, Benzene.

SECTION 16 OTHER INFORMATION

MSDS Status: Revised Section(s): Section 15 has been updated.

WARNING! The use of this product is beyond the control of the manufacturer and distributor; therefore, no guarantee, expressed or implied, is made as to the effects of such or the results to be obtained if not used in accordance with directions or established safe practice. The user must assume all responsibility, including injury or damage, resulting from its misuse as such, or in combination with other materials. The manufacturer and distributor warrant only that this product meets the specifications for such product. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, AS TO DESCRIPTION, QUALITY, MERCHANTABILITY, FITNESS FOR ANY PARTICULAR PURPOSE, PRODUCTIVENESS, OR ANY OTHER MATTER OF THIS PRODUCT. THE MANUFACTURER AND DISTRIBUTOR SHALL BE IN NO WAY RESPONSIBLE FOR THE IMPROPER USE OF THIS PRODUCT. The sole and exclusive remedy against the manufacturer and distributor for breach of warranty shall be reimbursement of the purchase price of the product in the event that a defective condition of the product shall be found to exist. NO OTHER REMEDY (INCLUDING BUT NOT LIMITED TO INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR INJURY TO PERSON OR PROPERTY OR ANY OTHER INCIDENTAL OR CONSEQUENTIAL LOSS) SHALL BE AVAILABLE.

MA 830 ADHESIVE

This product appears in the following stock number(s):

IT185 IT186 IT187

Last revised: 12/05/05

Printed: 12/6/2005

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Tradename: MA 830 ADHESIVE

General use: Adhesive

Chemical family: Acrylate

MANUFACTURERITW Plexus
30 Endicott St.
Danvers, MA 01923**EMERGENCY INFORMATION**Emergency telephone number
(CHEMTREC): (800) 424-9300
Other Calls: (978) 777-1100**2. COMPOSITION/INFORMATION ON INGREDIENTS****HAZARDOUS CONSTITUENTS****Exposure limits**

Constituent	Abbr.	CAS No.	Weight percent	ACGIH TLV	OSHA PEL	Other Limits
Methacryloxyethyl acid phosphate		52628032	1-10	n/e	n/e	n/e
Methacrylic acid	MAA	79414	1-10	20 ppm	20 ppm	4 ppm (Manufacturer)
Methyl Methacrylate Monomer	MMA	80626	40-70	50 ppm	100 ppm	100 ppm (Canada)
Metallic Dimethacrylate		*	< 5	n/e	n/e	n/e

"TLV" means the Threshold Limit Value exposure (eight-hour, time-weighted average, unless otherwise noted) established by the American Conference of Governmental Industrial Hygienists. "STEL" indicates a short-term exposure limit. "PEL" indicates the OSHA Permissible Exposure Limit. "n/e" indicates that no exposure limit has been established. An asterisk (*) indicates a substance whose identity is a trade secret of our supplier and unknown to us.

3. HAZARDS IDENTIFICATION**Emergency Overview**

Appearance, form, odor: Off-white paste with varied fragrant odor.

WARNING! Flammable. Eye, skin and respiratory irritant. Skin sensitizer. Harmful if inhaled or absorbed through skin. Chronic overexposure may cause liver and kidney effects.

Potential health effects

Primary routes of exposure: Skin contact Skin absorption Eye contact Inhalation Ingestion

Symptoms of acute overexposure:

Skin: May cause irritation and sensitization (itching, redness, rashes, hives, burning, swelling). May be absorbed through the skin.

Eyes: May be corrosive (burns). Liquid and vapors causes moderate to severe irritation (pain, tearing, redness, swelling). May cause destruction of eye tissue and corneal damage.

Inhalation

: High concentration is irritant to respiratory tract and may cause coughing accompanied by chest pain, nasal discomfort

Ingestion

: Causes irritation, a burning sensation of the mouth, throat and gastrointestinal tract and abdominal pain. May cause nausea and vomiting.

Effects of chronic overexposure:

Prolonged exposure may lead to kidney, lung, liver and heart damage; not likely to cause cancer. Not believed to represent a carcinogenic or mutagenic hazard. May cause dermatitis and/or skin sensitization (itching, redness, rashes, hives, burning, swelling) and/or numbness/prickling of the skin. Repeated or prolonged inhalation exposure may cause asthma. May effect the central and/or peripheral nervous systems.

Carcinogenicity -- OSHA regulated: No

ACGIH: No

National Toxicology Program: No

International Agency for Research on Cancer:No

Medical conditions which may be aggravated by exposure:

Eye disease, skin disorders and allergies (e.g.eczema), asthma and lung disorders.

Other

MMA: Developmental toxicity observed in animal tests, but only at levels toxic to the mother. MMA is reported to impair human olfactory function.

4. FIRST AID MEASURES**First aid for eyes:**

Flush eye with clean water for at least 15 minutes while gently holding eyelids open. Get immediate medical attention.

First aid for skin:

Immediately remove contaminated clothing and excess contaminant. Flush skin with water. Wash thoroughly with warm soap and water. Consult a physician if irritation develops.

First aid for inhalation:

Remove patient to fresh air. Administer oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention if symptoms persist.

First aid for ingestion:

Do NOT induce vomiting. Rinse mouth out with water, then sip 2 glasses of water. Never give anything by mouth to an unconscious person. If vomiting occurs spontaneously, keep head below hips (if sitting) or to the side (if lying down) to prevent aspiration. Get medical attention.

5. FIRE FIGHTING MEASURES**General fire and explosion characteristics:**

Vapor forms explosive mixture with air.

Extinguishing media: Water Carbon dioxide Dry chemical Foam Alcohol foam**Flash Point (°F):** 50**Method:** TCC**Explosive limits in air (percent) -- Lower:** 1.7**Upper:** 12.5**Special firefighting procedures:**

Approach fire from upwind. Wear self contained breathing apparatus and full protective equipment. Cool tank with water spray, but do not direct a solid stream of water or foam into burning material. Fight fire from a distance as the heat may rupture the tanks.

Unusual fire and explosion hazards:

Sealed containers at elevated temperatures may rupture due to polymerization. Vapors are heavier than air and may travel to ignition sources and flash back. Burning liquid may float on water. Personnel in vicinity and downwind should be evacuated.

Hazardous products of combustion:

Carbon monoxide, carbon dioxide, hydrogen chloride, organic acids, aldehydes, alcohols, sulfur dioxide, metallic

6. ACCIDENTAL RELEASE MEASURES**Spill control:**

Avoid personal contact. Evacuate area. Eliminate ignition sources. Ventilate area.

Containment:

Dike, contain and absorb with clay, sand or other suitable non-combustible material.

Cleanup:

For large spills, pump to storage/salvage vessels. Soak up residue with an absorbent such as clay, sand, or other suitable material and dispose of properly (RCRA hazardous waste). Add inhibitor as contaminated monomer may polymerize.

Special procedures:

Prevent spill from entering drainage/sewer systems, waterways, and surface waters. Spills on porous surfaces can contaminate groundwater. Prevent material from entering low areas. Notify authorities immediately if liquid enters sewer/public waters. Use bonding/ grounding lines and non-sparking tools. Have proper fire extinguishers manned by

7. HANDLING AND STORAGE**Handling precautions:**

Do not breathe vapor or mist. Do not get in eyes, on skin or clothing. Wash thoroughly with soap and water after using and particularly before eating, drinking, smoking, applying cosmetics, or using toilet facilities. Air dry and then launder contaminated clothing and protective gear before reuse. Close container after each use. Ground/bond container when pouring. Keep away from heat, flame or sparks. Use non-sparking tools and explosion-proof equipment.

Storage:

Keep in a cool and ventilated place, without direct exposure to sunlight. Keep container tightly closed and otherwise in accordance with NFPA regulations. Maintain air space in storage containers, inhibitor requires oxygen contact to function. Vapors are uninhibited and may form polymers in vents or flame arrestors, resulting in blockage of vents. Check inhibitor levels after 6 months and return to original level.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering controls

Ventilation :

Use ventilation that is adequate to keep employee exposure to airborne concentrations below exposure limits.

Other engineering controls :

Have emergency eye wash and safety shower present.

Personal protective equipment

Eye and face protection:

Wear safety glasses. Wear coverall chemical splash goggles and face shield when eye and face contact is possible.

Skin protection:

Chemical-resistant gloves (i.e. butyl, nitrile) and other gear as required to prevent skin contact. The breakthrough time

Respiratory protection:

A NIOSH/MSHA air purifying respirator with an organic vapor cartridge may be permissible as exposure levels dictate. However use a positive pressure air supplied respirator if there is any potential for uncontrolled release, or unknown exposure levels, or when airborne concentrations exceed 10 times the TLV or PEL.

9. PHYSICAL AND CHEMICAL PROPERTIES

Specific gravity:	n/d	Boiling point (°F):	n/d
Melting point (°F):	n/d	Vapor density (air = 1):	> 1
Vapor pressure (mmHg):	n/d at 0 °F	Evaporation rate (butyl acetate = 1):	n/d
VOC (grams/liter):	< 50 mixed	Solubility in water:	n/d
Percent volatile by volume:	n/d	pH (5% solution or slurry in water):	n/d
Percent solids by weight:	n/d		

10. STABILITY AND REACTIVITY

This material is chemically stable. Hazardous polymerization may occur.

Conditions to avoid :

Heat, sparks, open flames and other ignition sources. UV light. Inerting. Oxygen-free atmospheres. Corrosion of storage containers. Material can soften paint and rubber.

Incompatible materials:

Incompatible with strong oxidizing agents (e.g. peroxides, nitrates), reducing agents, acids, bases, azo-compounds, catalytic metals (e.g. copper, iron), halogens.

Hazardous products of decomposition:

Oxides of carbon/nitrogen. Hydrocarbons, acrolein, metal fumes, hydrogen chloride, organic acids, aldehydes, alcohols, phosphoric compounds.

Conditions under which hazardous polymerization may occur:

Excessive heat, excessive aging, storage in the absence of inhibitor, oxygen-free atmospheres, ultraviolet light (sunlight), inadvertent addition of catalyst and contamination.

11. TOXICOLOGICAL INFORMATION

Acute oral effects: LD50 (rat): Not available
Toxicity exposed near LD50 include blood in the urine and liver changes.

Acute dermal effects: LD50 (rabbit): Not available
Dermatitis. May cause sensitization by skin contact.

Acute inhalation effects: LC50 (rat): Not available Exposure: 4 hours.
Toxicity at 8-100 times TLV from respiratory and gastrointestinal irritation, lung damage, nervous system effects and

Eye
Irritant.

Subchronic effects:
Inhalation: Repeated exposure at 5-100 times the TLV of MMA include lung damage, pulmonary irritation, liver changes, eye irritation, nasal tissue changes, incoordination and upper respiratory irritation. Ingestion: Liver and

Carcinogenicity, teratogenicity, and mutagenicity:
Possible reproductive hazard based on animal data. MMA did not cause birth defects, malformations or fetal toxicity in pregnant rats inhaling concentrations up to 2028 ppm.

Other chronic effects:
MMA: Inhalation: long term exposure caused inflammation of the nasal cavity, changes in nasal sensory cells and decreased body weight. Produced adverse effects on the nasal epithelium of animals inhaling airborne concentrations of 100 and 400 ppm. Ingestion: Can cause decreased body weight, and increased kidney weight.

Toxicological information on hazardous chemical constituents of this product:

Constituent	Oral LD50 (rat)	Dermal LD50 (rabbit)	Inhalation LC50 4hr, (rat)
Methacryloxyethyl acid phosphate	n/d	n/d	n/d
Methacrylic acid	1060 mg/kg	500 mg/kg	>1300 ppm
Methyl Methacrylate Monomer	7872 mg/kg	> 5,000 mg/kg	7093 ppm
Metallic Dimethacrylate	n/d	n/d	n/d

'n/d' = 'not determined'

12 ECOLOGICAL INFORMATION**Ecotoxicity:**

MMA: Low toxicity to fish; LC50 (fish): typically > 100 mg/L; estimate of 96 hr median threshold limit: 100-1,000 ppm; LC50 (fathead minnow, 96 hr) - 150 ppm; LC50 (bluegill sunfish, 96 hr) - 232 ppm. Harmful to aquatic invertebrates; EC50 (Daphnia Magna, 48 hr) - 69 mg/L. Low toxicity to algae; EC50 (Selenastrum Capricornutum, 96 hr) - 170 mg/L. NOEC (Zebra fish, 35 day, flow through) - 8.4 mg/L. MAA has: LC50 = 85mg/l, 96 hr, Rainbow trout (slightly toxic); EC50 > 130 mg/l, 48 hr, Daphnia magna (practically non-toxic); EC50 = 0.6 mg/l, 96 hr, Algae (highly toxic).

Mobility and persistence:

MMA: partially biodegradable in water. BOD-5 day: 0.14 g/g - 0.90 g/g; THOD : 1.92 g/g; Chemical Oxygen Demand - 28 day: 88%; Inherent Biodegradation - Dissolved Organic Carbon Removal: > 95% (28 day). MAA readily biodegraded (86% within 28 days) under aerobic conditions.

biodegraded (86% within 28 days) under aerobic conditions.

Environmental fate:

MMA: produces high tonnage material in wholly contained systems. Liquid with moderate mobility. Sparingly soluble in water. Low potential for bioaccumulation. Predicted to have high mobility in soil. Substantially removed in biological treatment processes. MAA is highly mobile, not adsorbed to soil.

13. DISPOSAL CONSIDERATIONS

Please see also Section 15, Regulatory Information.

Waste management recommendations:

If this product becomes a waste, it would be a hazardous waste by RCRA criteria (40CFR 261). Dispose of according to applicable federal, state, and local regulations. Do not dispose of in a landfill. Incineration is the preferred method of disposal. Empty containers still contain hazardous product residue (vapors and/or liquid). Follow all MSDS and label warnings even after container is emptied. Residual vapors in empty containers may explode on ignition - DO NOT pressurize, or expose to heat, flame, sparks, static electricity or other sources of ignition (i.e. cutting, drilling, grinding, or welding on or near container).

14. TRANSPORT INFORMATION

Proper shipping name: Adhesives *

Technical name : N/A

Hazard class : 3

UN number: 1133

Packing group: II

Emergency Response Guide no.: 128

IMDG page number: N/A

Other: Containers < 30 liters are PG III

*Depending upon the size and type of container, this material may be reclassified as "Consumer Commodity, ORM-D" for shipments within the United States, or "Limited Quantity" elsewhere. Refer to the appropriate regulation.

15. REGULATORY INFORMATION**U.S. Federal Regulations****TSCA**

All ingredients of this product are listed, or are exempt from listing, on the TSCA inventory.

The following RCRA code(s) applies to this material if it becomes waste:

D001

Regulatory status of hazardous chemical constituents of this product:

Constituent	Extremely Hazardous*	Toxic Chemical**	CERCLA RQ (lbs)	TSCA 12B Export Notification
Methacryloxyethyl acid phosphate	No	No	0.0	Not required

Constituent	Extremely Hazardous*	Toxic Chemical**	CERCLA RQ (lbs)	TSCA 12B Export Notification
Methacrylic acid	No	No	0.0	Not required
Methyl Methacrylate Monomer	No	Yes	1000.0	Required
Metallic Dimethacrylate	No	Yes	0.0	Not required

*Consult the appropriate regulations for emergency planning and release reporting requirements for substances on the SARA Section 301 Extremely Hazardous Substance list.

**Substances for which the "Toxic Chemical" column is marked "Yes" are on the SARA Section 313 list of Toxic Chemicals, for which release reporting may be required. For specific requirements, consult the appropriate regulations.

For purposes of SARA Section 312 hazardous materials inventory reporting, the following hazard classes apply to this material: - Immediate health hazard -- Delayed health hazard -- Fire hazard -- Reactivity hazard -

Canadian regulations

WHMIS hazard class(es): B2; D2B

All components of this product are on the Domestic Substances List.

Regulatory notes:

In normal use, the methyl methacrylate in this product is polymerized during cure. For purposes of air quality regulations, the maximum amount of VOC (i.e. MMA) emitted is negligible (less than 5 %). Actual emissions are a function of substrate and process and should be considered on an individual basis.

16. OTHER INFORMATION

Hazardous Materials Identification System (HMIS) ratings:	Health	Flammability	Reactivity
	1 2*	3	2

The information and recommendations in this document are based on the best information available to us at the time of preparation, but we make no other warranty, express or implied, as to its correctness or completeness, or as to the results of reliance on this document.

MA 830/MA 832/MA 833 GRAY ACTIVATOR

This product appears in the following stock number(s):

IT182 IT186 IT261 IT262 IT264 IT281 IT284 IT332

Last revised: 12/01/04

Printed: 2/20/2006

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION**Tradename:** MA 830/MA 832/MA 833 GRAY ACTIVATOR**General use:** This information applies to the activator component of the two-part kit. After curing, the product is not hazardous.**Chemical family:** Epoxy resin**MANUFACTURER**ITW Plexus
30 Endicott St.
Danvers, MA 01923**EMERGENCY INFORMATION****Emergency telephone number**
(CHEMTREC): (800) 424-9300
Other Calls: (978) 777-1100**2. COMPOSITION/INFORMATION ON INGREDIENTS****HAZARDOUS CONSTITUENTS****Exposure limits**

Constituent	Abbr.	CAS No.	Weight percent	ACGIH TLV	OSHA PEL	Other Limits
Bisphenol A diglycidyl ether resin	DGEBPA	25068386	10-30	n/e	n/e	n/e
Diisodecyl phthalate		TRADE SECRET	< 5	n/e	n/e	n/e
Butyl benzyl phthalate	BBP	85687	10-30	n/e	n/e	5 mg/m ³
Benzoyl peroxide	BPO	94360	10-30	5 mg/m ³	5 mg/m ³	5 ppm (Canada)

"TLV" means the Threshold Limit Value exposure (eight-hour, time-weighted average, unless otherwise noted) established by the American Conference of Governmental Industrial Hygienists. "STEL" indicates a short-term exposure limit. "PEL" indicates the OSHA Permissible Exposure Limit. "n/e" indicates that no exposure limit has been established. An asterisk (*) indicates a substance whose identity is a trade secret of our supplier and unknown to us.

3. HAZARDS IDENTIFICATION**Emergency Overview**

Appearance, form, odor: gray viscous liquid with little odor.

WARNING! Eye and skin irritant. Potential skin sensitizer.**Potential health effects**

Primary routes of exposure: Skin contact Skin absorption Eye contact Inhalation Ingestion

Symptoms of acute overexposure:

Skin: Moderate irritant. Contact at elevated temperatures can cause thermal burns which may result in permanent damage. May cause skin sensitization (itching, redness, rashes, hives, burning, swelling).

Eyes: Moderate irritant (stinging, burning sensation, tearing, redness, swelling). Contact at elevated temperatures can cause thermal burns which may result in permanent damage or blindness.

Inhalation:

The low vapor pressure of the resin makes inhalation unlikely in normal use. In applications where vapors (caused by high temperature) or mists (caused by mixing) are created, breathing may cause a mild burning sensation in the nose, throat and lungs.

Ingestion:

Acute oral toxicity is low. May cause gastric distress (nausea, vomiting, diarrhea). May cause adverse reproductive affects at high doses.

Effects of chronic overexposure:

Prolonged or repeated skin contact may cause sensitization, with itching, swelling, or rashes on later exposure. Pure benzoyl peroxide is reported to be an allergen.

Carcinogenicity -- OSHA regulated: No

ACGIH: No

National Toxicology Program: No

International Agency for Research on Cancer:No

Cancer-suspect constituent(s) : None

Medical conditions which may be aggravated by exposure:

Preexisting eye and skin disorders. Development of preexisting skin or lung allergy symptoms may increase.

Other effects:

See section 11.

4. FIRST AID MEASURES

First aid for eyes:

Flush eye with clean water for at least 20 minutes while gently holding eyelids open, lifting upper and lower lids. Get immediate medical attention.

First aid for skin:

Immediately remove contaminated clothing and excess contaminant. Flush skin with water for at least 15 minutes. Wash thoroughly with soap and warm water. Consult a physician if irritation develops.

First aid for inhalation:

Remove patient to fresh air. Administer oxygen if breathing is difficult. Get medical attention if symptoms persist.

First aid for ingestion:

Do NOT induce vomiting. Rinse mouth out with water, then sip 2 glasses of water. Never give anything by mouth to an unconscious person. If vomiting occurs spontaneously, keep head below hips (if sitting) or to the side (if lying down) to prevent aspiration. Get medical attention.

5. FIRE FIGHTING MEASURES

General fire and explosion characteristics:

Decomposition products can be flammable. Self accelerating decomposition temperature is 129 F (estimated).

Extinguishing media:

Water

Carbon dioxide

Dry chemical

Foam

Alcohol foam

Flash Point (°F): n/d

Method: (No flashpoint method for peroxides)

Explosive limits in air (percent) -- Lower: n/d

Upper: n/d

Special firefighting procedures:

If large amounts of material are involved, evacuate area and fight fire from safe distance. Do not enter confined space without full bunker gear. Firefighters should wear self-contained breathing apparatus and protective clothing. Cool fire exposed containers with water.

Unusual fire and explosion hazards:

Benzoyl peroxide can decompose violently if heated strongly while confined. Personnel in vicinity and downwind should be evacuated.

Hazardous products of combustion:

When heated to decomposition it emits fumes of Cl-, carbon monoxide, other fumes and vapors varying in composition and toxicity.

6. ACCIDENTAL RELEASE MEASURES**Spill control:**

Avoid personal contact. Eliminate ignition sources. Ventilate area.

Containment:

Dike, contain and absorb with clay, sand or other suitable material.

Cleanup:

For large spills, pump to storage/ salvage vessels. Soak up residue with an absorbent such as clay, sand, or other suitable material and dispose of properly. Flush area with water to remove trace residue.

Special procedures:

Prevent spill from entering drainage/ sewer systems, waterways, and surface waters. Notify appropriate authorities as required. Use non-sparking tools.

7. HANDLING AND STORAGE**Handling precautions:**

Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after using and particularly before eating, drinking, smoking, applying cosmetics, or using toilet facilities.

Laundry contaminated clothing and protective gear before reuse. Discard contaminated leather articles.

Provide appropriate ventilation/ respiratory protection against decomposition products (see Section 10) during welding/ flame cutting operations and against particulates during sanding/ grinding. Use nonsparking equipment.

Storage:

Store in a cool, dry area away from high temperatures and flames. Storage above 100 F will reduce useful life of the material. Keep from heat, sparks, and open flame. Exposure to high heat may cause a reaction.

Do not store near combustibles.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION**Engineering controls****Ventilation :**

Use ventilation that is adequate to keep employee exposure to airborne concentrations below exposure limits.

Other engineering controls :

Have emergency shower and eye wash available.

Personal protective equipment**Eye and face protection:**

Chemical goggles if liquid contact is likely, or Safety glasses with side shields.

Skin protection:

Chemical-resistant gloves and other gear as required to prevent skin contact. The breakthrough time of the selected glove(s) must be greater than the intended use period.

Respiratory protection:

None required at normal handling temperatures and conditions. Use NIOSH approved organic vapor cartridges for uncured resin and dust/ particle respirators during grinding/ sanding operations of cured resin as exposure levels dictate.

9. PHYSICAL AND CHEMICAL PROPERTIES

Specific gravity:	1.06	Boiling point (°F):	n/d
Melting point (°F):	n/d	Vapor density (air = 1):	n/d
Vapor pressure (mmHg):	n/d at 171 °F	Evaporation rate (butyl acetate = 1):	<<1
VOC (grams/liter):	< 50 mixed	Solubility in water:	slight
Percent volatile by volume:	n/d	pH (5% solution or slurry in water):	neutral
Percent solids by weight:	n/d		

10. STABILITY AND REACTIVITY

This material is chemically stable. Hazardous polymerization will not occur.

Conditions to avoid :

Heat, spark, open flame, contamination, and friction.

Incompatible materials:

Strong Lewis or mineral acids, strong oxidizing agents, strong mineral and organic bases (especially primary and secondary aliphatic amines). Polymerization accelerators.

Hazardous products of decomposition:

Oxides of carbon; aldehydes, acids, flammable and toxic fumes, nitrogen oxides, ammonia, sulfur oxides, and other organic substances may be formed during combustion.

Conditions under which hazardous polymerization may occur:

Heat is generated when activator is mixed with adhesive; Run-a-way cure reactions may char and decompose the activator, generating unidentified fumes and vapors which may be toxic.

11. TOXICOLOGICAL INFORMATION

Acute oral effects: LD50 (rat): > 5000 mg/kg

BPO: slightly toxic to practically non-toxic to rats.

Acute dermal effects: LD50 (rabbit): Not available

BPO: non-irritating to rabbits (4-hr exposure). Repeated controlled human skin contact studies produced skin allergy.

Acute inhalation effects: LC50 (rat): Not available

Exposure: 8 hours.

BPO: practically non-toxic to rats (LC50 > 22.4 mg/L, 4-hr).

Eye irritation:

BPO: severely irritating to rabbits.

Subchronic effects:

No data available.

Carcinogenicity, teratogenicity, and mutagenicity:

1) **MUTAGENICITY:** Liquid resins based on diglycidyl ether of Bisphenol A (DGEBA), have proved to be inactive when tested by in vivo mutagenicity assays. These resins have shown activity in in vitro microbial mutagenicity screening and have produced chromosomal aberrations in cultured rat liver cells. The significance of these tests to man is unknown. 2) **CARCINOGENICITY:** Recent 2-year bioassays in rats and mice exposed by the dermal route to DGEBA yielded no evidence of carcinogenicity to the skin or any other organs. This study clarifies prior equivocal results from a 2-year mouse skin painting study, which were suggestive, but not conclusive, for weak carcinogenic activity. 3) The International Agency for Research on Cancer (IARC) concluded that DGEBA is not classifiable as a carcinogen (IARC group 3), that is human and animal evidence of carcinogenicity is inadequate. BPO: both positive and negative (mutagenic and non-mutagenic) responses occurred in tests with animal or bacterial cells. Repeated skin application with a known carcinogen enhanced skin tumor production in mice by the carcinogen.

Other chronic effects:

DGEBA: Prolonged or repeated skin contact may cause sensitization, with itching, swelling, or rashes on later exposure. Studies have shown bisphenol A diglycidyl ether resin to cause allergic contact dermatitis. BPO: Rats fed dose of 2800 mg/kg for 2-yrs showed increase incidence of testicular atrophy.

Toxicological information on hazardous chemical constituents of this product:

Constituent	Oral LD50 (rat)	Dermal LD50 (rabbit)	Inhalation LC50 4hr, (rat)
Bisphenol A diglycidyl ether resin	11.4 g/kg	>20 ml/kg	no deaths
Diisodecyl phthalate	64gm/kg	>3160 mg/kg	n/d
Butyl benzyl phthalate	2330 mg/kg	>10 mg/kg	n/d
Benzoyl peroxide	7710 mg/kg	n/d	n/d

'n/d' = 'not determined'

12 ECOLOGICAL INFORMATION**Ecotoxicity:**

BPO: 96 hr, LC50 guppy (semi-static) = 2.0 mg/l, moderately toxic.

Mobility and persistence:

BPO: almost 60 % biodegradation was reached after 28 days in the closed bottle ready biodegradability test.

Environmental fate:

BPO: EC50 = 35 mg/L absorbed to gel for activated sludge respiration inhibition.

13. DISPOSAL CONSIDERATIONS

Please see also Section 15, Regulatory Information.

Waste management recommendations:

If this product becomes a waste, it would not be a hazardous waste by RCRA criteria (40CFR 261). Dispose of according to applicable federal, state, and local regulations. Incineration is the preferred method of disposal.

14. TRANSPORT INFORMATION

Proper shipping name: Environmentally hazardous substances, liquid, n.o.s.
Technical name : Butyl Benzyl Phthalate
Hazard class : 9
UN number: 3082
Packing group: III
Emergency Response Guide no.: 171
IMDG page number: N/A
Other: RQ > 985 lbs (< 985 lbs is non-regulated ground & air). Marine pollutant.

15. REGULATORY INFORMATION**U.S. Federal Regulations****TSCA**

All ingredients of this product are listed, or are exempt from listing, on the TSCA inventory.

The following RCRA code(s) applies to this material if it becomes waste:

None

Regulatory status of hazardous chemical constituents of this product:

Constituent	Extremely Hazardous*	Toxic Chemical**	CERCLA RQ (lbs)	TSCA 12B Export Notification
Bisphenol A diglycidyl ether resin	No	No	0.0	Not required
Diisodecyl phthalate	No	No	0.0	Required
Butyl benzyl phthalate	No	No	100.0	Required
Benzoyl peroxide	No	Yes	0.0	Not required

*Consult the appropriate regulations for emergency planning and release reporting requirements for substances on the SARA Section 301 Extremely Hazardous Substance list.

**Substances for which the "Toxic Chemical" column is marked "Yes" are on the SARA Section 313 list of Toxic Chemicals, for which release reporting may be required. For specific requirements, consult the appropriate regulations.

For purposes of SARA Section 312 hazardous materials inventory reporting, the following hazard classes apply to this material: - Immediate health hazard -- Delayed health hazard -- Reactivity hazard -

Canadian regulations

WHMIS hazard class(es) : D2B

All components of this product are on the Domestic Substances List.

=====
SECTION IV - FIRE AND EXPLOSION HAZARD DANGER
=====

Flammability Class: IB
Flash Range: < 0
Explosive Range: 1.0%
16.0%

EXTINGUISHING MEDIA:

Foam, dry chemical, carbon dioxide, water spray or fog.

SPECIAL FIREFIGHTING PROCEDURES:

Avoid breathing smoke. Use air supplied rescue equipment for enclosed area. Water tends to spread burning liquid if large funnels used.

UNUSUAL FIRE & EXPLOSION HAZARDS:

Vapors are heavier than air and may travel to an ignition source distant from the material handling point.

=====
SECTION V - HEALTH HAZARD DATA
=====

PERMISSIBLE EXPOSURE LEVEL:

SEE SECTION VIII.

EFFECTS OF OVEREXPOSURE:

INGESTION: Can cause gastrointestinal irritation, nausea and vomiting. Aspiration of material into lungs may cause chemical pneumonitis which can be fatal.

INHALATION: May cause nose or throat irritation. High concentrations may cause acute central nervous system depression characterized by headaches, dizziness, nausea and confusion.

EYES: May cause severe eye irritation and corneal damage.

SKIN: May cause dermatitis. May cause defatting and irritation of the skin.

FIRST AID:

EYES: Flush with large amounts of water, lifting upper and lower lids occasionally. Get medical attention.

Page Number: 3

SKIN: Prolonged or repeated contact can cause irritation and possible defatting of skin.

INGESTION: Do not induce vomiting, keep person warm, quiet, and get medical attention (aspiration of this material into the lungs due to vomiting can cause chemical pneumonitis which can be fatal.

INHALATION: Remove individual to fresh air and if breathing is difficult, administer oxygen.

SECTION VI - REACTIVITY DATA

Stability: This product is stable
Hazardous Polymerization: Hazardous polymerization will not occur

INCOMPATIBILITY:

Strong oxidizing agents, strong acids and bases.

CONDITIONS TO AVOID:

Fire, sparks, static electricity.

HAZARDOUS DECOMPOSITION PRODUCTS:

Carbon monoxide, carbon dioxide.

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

Keep spectators away. Eliminate all ignition sources (flames, hot surfaces and sources of electrical, static or frictional sparks). Dike and contain spill with inert material (e.g. sand, earth). Transfer liquids to covered metal containers for recovery or disposal, or remove with inert absorbent. Use only non-sparking tools. Place absorbent diking materials in covered metal containers for disposal. Prevent contamination of sewers, streams and groundwater with spilled material or used absorbent.

WASTE DISPOSAL METHOD:

Dispose of in accordance with local, state and federal

SECTION VIII - EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure Limits:

ACGIH TLV ACGIH TLV-C ACGIH STEL OSHA STEL OSHA PEL

ACETONE

HEXANE	400.00 PPM	N/est	500.00 PPM	N/est	500.00 PPM

RESPIRATORY PROTECTION:

If workplace exposure limit of product is exceeded, a NIOSH/MSHA approved air supplied respirator must be used in absence of proper environmental control. Engineering or administrative controls should be implemented to reduce exposure.

VENTILATION:

Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below PEL.

PROTECTIVE GLOVES:

Chemical resistant gloves.

EYE PROTECTION:

Chemical splash goggles in compliance with OSHA regulations are advised.

OTHER PROTECTIVE EQUIPMENT:

To prevent repeated, prolonged skin contact, wear impervious clothing and boots.

=====
SECTION IX - SPECIAL PRECAUTIONS
=====

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

Keep container closed when not in use. Store at 60-95 degrees F and out of the sun. Use adequate ventilation to avoid breathing vapors when cover is removed. Ground all equipment when handling flammable solventborne materials.

OTHER PRECAUTIONS:

Containers may be hazardous when empty. Never use welding or cutting torch on or near drum (even when empty).

MATERIAL SAFETY DATA SHEET

PRODUCT
Eperan or Eperan-PP

KANEKA TEXAS CORPORATION
 200 NORTHPOINT DR., SUITE 200
 HOUSTON, TX 77060

I. GENERAL			
Trade Name: Eperan or Eperan-PP		Telephone Number: (713) 447-0755	
Other Names (Synonyms):		Emergency: (713) 474-7534	
Chemical Family: Polyethylene or Ethylene Propylene Copolymer		DOT Proper Shipping Name: Not regulated	
Generic Name:		DOT Hazard Class: Regulated	
		DOT Hazard Label: Not required	
		DOT ID#: Not Required	
II. COMPONENTS			
Product	Component Name	CAS No.	Composition amount (Wt.)
Eperan (Polyethylene beads)	Polyethylene	9002-88-4	>99%
	Calcium Phosphate	1306-06-5	less than 2000 ppm
Eperan-PP (Polypropylene beads)	Ethylene Propylene Copolymer	9010-79 1	>99%
	Calcium Phosphate	1306-06-5	less than 1500 ppm
III. SUMMARY OF HAZARDS			
Combustible solid. Vapors or fumes from molten processes may be irritating.			
IV. FIRE AND EXPLOSION			
Flash Point (Method) N/A	Auto-ignition Temperature: >600F	Flammable Limits: LEL=N/A UEL=N/A	

MATERIAL SAFETY DATA SHEET

PRODUCT

Eperan or Eperan-PP

Extinguishing Media: Dry Chemical, CO ₂ , Foam, Water.	
Special Firefighting: Procedures:	Do not enter fire area without proper protection. See decomposition products. Fight fire from safe distance/protected location. For large fire, use lots of water, solid stream to "DIG" into molten mass and open up, cool interior, prevent reignition. Use spray/fog for surface cooling. Keep above burning material. Molten material forms flaming drops after igniting. Notify authorities if liquid enters sewer/public waters.
Unusual Fire and Explosion Hazards:	Beads are likely to be charged with static electricity and may become an ignition source.
V. HEALTH HAZARDS	
Acute Toxicity:	No known effects.
Chronic Toxicity:	No known effects.
Eyes:	Vapors or fumes from molten polymer may cause irritation.
Skin:	Not expected to present a skin hazard under anticipated conditions of normal use.
Inhalation:	Not expected to present a respiratory problem. Vapors or fumes from molten polymers or beads may be irritating to the respiratory tract. See Respiratory Protection.
VI. PROTECTIVE EQUIPMENT AND OTHER CONTROL MEASURES	
Ventilation:	Local exhaust is recommended. Maintain low dust concentration. See Fire and Explosion Hazard section.
Respiratory Protection:	Use NIOSH approved high efficiency dust respirator when dusty conditions prevail. No TLV-TWA has been established for this dust. The ACGIH recommends that nuisance particulates be limited to 10 mg/M ³ , total dust. OSHA and ACGIH recommends that nuisance dust, respirable 5 mg/M ³ for 8 hours. An organic vapor respirator may be needed during molten or heating processes if ventilation is inadequate.
Eye and Face Protection:	Chemical worker's goggles may be needed during molten or heating process if ventilation is inadequate. Do not wear contact lenses.

MATERIAL SAFETY DATA SHEET

PRODUCT

Eperan or Eperan-PP

Other Clothing/ Equipment:	An eyewash should be readily available.	
VII. EMERGENCY AND FIRST AID		
Inhalation:	Move exposed individual to fresh air. Call a physician.	
Eye Irritation:	Immediately flush eyes with flowing water for at least 15 minutes, occasionally lifting upper and lower lids, until no evidence of irritant remains. Get medical attention.	
Skin Irritation:	Wash area with mild soap and water. Get medical attention if irritation persists.	
VIII. SPILL AND DISPOSAL		
Spill Response:	On land, sweep or shovel into suitable disposal containers. On water, material is insoluble. Collect and contain as any solid. Report per regulatory requirements.	
Recommended Disposal:	Reuse when possible. Landfill solids. Federal, State and Local regulations should be observed when disposing. See regulatory information.	
IX. PHYSICAL AND CHEMICAL DATA		
Specific gravity: 0.05 - 0.06	Volatiles: <1%	Odor: None
Appearance: Expanded beads, molded planks or other shapes, in white, black and other colors.		
Solubility in Water: Insoluble		
Stability: Stable	Conditions to avoid: Avoid exposing dust to ignition sources of high temperatures.	
Incompatibility (Materials to avoid): None		
Hazardous decomposition products: Normal products of hydrocarbon combustion.		

01444

MATERIAL SAFETY DATA SHEET**PRODUCT**

Eperan or Eperan-PP

X.

ADDITIONAL PRECAUTIONS

Storage and Handling: Store in dry area to maintain product quality. No hazard will occur if product becomes wet. All equipment conveying beads should be grounded to avoid static spark. Do not store near open flames or other sources of ignition.

XI.

REGULATORY INFORMATION**FEDERAL REGULATIONS:**

OSHA HAZARD COMMUNICATION RULE, 29 CFR 1910.1200;
Based on our hazard evaluation, none of the ingredients in this product are hazardous.

CERCLA, 40 CFR 117. 302:
Notification of spills of this product is not required.

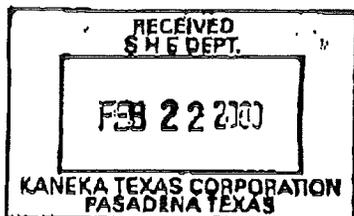

SARA 302 - EXTREMELY HAZARDOUS SUBSTANCES, 40 CFR 355:
This product does not contain ingredients listed in Appendix A and B as an Extremely Hazardous Substance.

SARA 311 and 312 - MATERIAL SAFETY DATA SHEET REQUIREMENTS, 40 CFR 370:
Our hazard evaluation has found that this product is not hazardous under 29 CFR 1910.1200.

SARA 313 - LIST OF TOXIC CHEMICALS, 40 CFR 372:
This product does not contain ingredients on the List of Toxic Chemicals at greater than the de minimis reporting level.

TOXIC SUBSTANCES CONTROL ACT (TSCA), 40 CFR 710:
The ingredients in this product are on the 8(b) Inventory List.
RESOURCE CONSERVATION AND RECOVERY ACT (RCRA), 40 CFR 261 SUBPART C & D:
If this product becomes a waste, in original form, it does not meet the criteria of a hazardous waste as defined by RCRA.

01444

MATERIAL SAFETY DATA SHEET**PRODUCT**

Eperan or Eperan-PP

FEDERAL WATER POLLUTION CONTROL ACT, CLEAN WATER ACT, 40 CFR 401.15 (formerly Sec. 307), 40 CFR 116 (formerly Sec. 311):
None of the ingredients are specifically listed.

CLEAN AIR ACT, Sec. 111 (40 CFR 60), Sec. 112 (40 CFR 61, 1990 Amendments), Sec. 611 (40 CFR 82), CLASS I and II Ozone depleting substances):
This product does not contain ingredients covered by the Clean Air Act.

STATE REGULATIONS:**CALIFORNIA PROPOSITION 65:**

This product does not contain any chemicals which require warning under California Proposition 65.

MICHIGAN CRITICAL MATERIALS:

This product does not contain ingredients listed on the Michigan Critical Materials Register.

STATE RIGHT TO KNOW LAWS:

This product does not contain ingredients listed by State Right To Know Laws.

XII.

USER'S RESPONSIBILITY

Individuals handling this product should be informed of the recommended safety precautions and should have access to this information.

The information on this MSDS has been gathered from standard reference materials and Kaneka Corporation data and to our best knowledge and belief accurate and reliable. Such information is offered solely for your consideration, investigation and verification, and it is not suggested or guaranteed that the precautions or procedures mentioned are the only ones which exist. Kaneka Corporation makes no warranties, expressed or implied, with respect to the use of such information or the use of the specific material identified herein in combination with any other material or process and, therefore, assumes no responsibility. While our technical personnel will be happy to respond to questions regarding safe handling and use procedures, handling and use remains the responsibility of the customer.

Section III - Physical Data

Boiling Pt Deg F/C: < 0F/-18C
Vapor Pressure(MM HG):N/A
Vapor Density(Air=1):Heavier than air
Solubility In Water: NIL
Physical State: AEROSOL
Freeze PT Deg F/C: N/A
Appearance And Odor: Clear liquid, solvent odor
Voc:Lbs/Gal=5.29; Grams/Liter=634 ; Grams Voc/Gram Solid=N/A ; % Voc 99.7
Specific Gravity:0.64
%Volatile Volume:99.9
Evaporation Rate:Faster than ether
Water/Oil Dist Coeff:0
PH: N/A
Threshold Odor,PPM: N/A

Section IV - Fire and Explosion Hazard Data

Classification: FLAMMABLE AEROSOL
Combustion Products: CO, CO2
Flash Point Deg F/C: Propellant < 0 F/-18 C
Extinguishing Media: Foam, dry chemical, carbon dioxide
Auto Ign. Temp Deg F/C: N/A
Special Fire Fighting Procedures:
Firefighters should wear self-contained breathing equipment.
NFPA Rating: 2,4,0 HMIS: 2,4,0
Lel%:1.1 Uel%:12.7

Unusual Fire And Explosion Hazards:

Exposure to fire, heat or prolonged sunlight may cause bursting. If used in confined spaces, hazardous vapors may spread or build up in low areas.
Burning Rate: HIGH
Static Sensitive: Yes FLAMMABLE

Section V - Health Hazard Data

Routes Of Entry: SKIN CONTACT,EYE,INHALATION

Effects Of Overexposure:

Causes eye & skin irritation. Excess inhalation of vapors may cause respiratory irritaiton, dizziness, weakness, fatigue, nausea, headache & possible

unconsciousness, even death. Prolonged & repeated inhalation may be harmful to respiratory system & central nervous system. Misuse or deliberate inhalation may be harmful or fatal. Warning: This product contains chemicals known to the State of California to cause cancer & birth defects or other reproductive harm.

Any suspected carcinogen = or > 0.1%?: No

Emergency and First Aid Procedures:

EYE: Immediately flush with plenty of water for 15 min. and call physician.
SKIN: Wash thoroughly with plenty of water & soap. INHALATION: If affected, remove to fresh air, administer oxygen & call physician. INGESTION: Accidental ingestion is unlikely. If ingested, call a physician immediately.

Section VI - Reactivity Data

Stable: Yes Conditions to Avoid: Heat, sparks, flames, ignition sources.
Incompatibility(Materials to Avoid): No
Hazardous Decomposition Products: Yes CO,CO2
Hazardous Polymerization: No

Section VII - Spill or Leak Procedures

Listed In: SARA Title III; #302: No #304,Cercla: No #313: No
Steps to be Taken in Case Material is Released or Spilled:
Remove all sources of ignition. Ventilate the area. Clean up with absorbent material.
Disposal Method:
Dispose of wastes in accordance with federal, state and local regulations.
Do not puncture, incinerate or burn containers.

Section VIII - Safe Handling and Protection Information

Ventilation-Local: Recommended Special:N/A
Mechanical: Recommended Other: N/A
Protective Gloves: See Below Eye Protection:Safety glasses
Precautions in Use:
If ventilation is inadequate, wear approved respiratory equipment. Do not

spray near sparks, flame or heated surface. Gloves: None required under normal application where skin contact is minimal.

Estimated LD50, MG/KG: No

Estimated LC50, PPM: No

Sensitization: No

Irritant: Yes EYES, SKIN

Synergistic Agents: No

Section IX - Special Precautions

Precautions to be Taken in Handling and Storing:

Keep away from heat, sparks, flames or sources of ignition. Do not puncture, incinerate, burn or store containers above 120F(47C). Use only in well ventilated areas. Do not breathe vapor or spray mist. Avoid contact with eyes, skin & clothing. Wash thoroughly after using. In case of accident or illness, seek physician immediately, show label or MSDS.

Other Precautions:

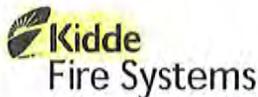

Keep out of reach of children. Always read & follow directions on product label. Additional technical data sheets and/or material safety data sheets (MSDS) are available upon request. For professional & industrial use only.

Symbols, Abbreviations and Notations:

#=Listed in SARA Title III Section 313; @=Non-hazardous ingredient among the Normal product usage should not result in respirable dust that would be hazardous to the respiratory system; N/A=Not available or applicable; *=If found as dust, mist or fume; C=Ceiling limit; S=Skin designation; M=Human; RAB=Rabbits; GPG=Guinea Pigs; MIC=Mice; I=Ingestion; A=Skin absorption; LO=Little observable effect; NO=No effect; Pel=OSHA permissible exposure limit; TLV=ACGIH threshold limit value; Stel=Short term exposure limit.

Final determination of suitability of the chemical(s) is the sole responsibility of the user. Users of any chemicals should satisfy

themselves that the conditions and methods of use assure that the chemical is used safely. NO REPRESENTATIONS OR WARRANTIES, EITHER EXPRESS OR IMPLIED, OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER NATURE ARE MADE HEREUNDER WITH RESPECT TO THE INFORMATION CONTAINED HEREIN OR THE CHEMICAL TO WHICH THE INFORMATION REFERS.

ABC Dry Chemical

MATERIAL SAFETY DATA SHEET

Emergency # (800) 424-9300

4251 Seminole Trail

Charlottesville, VA 22911 (434) 973-4361

Date: July, 2002

SECTION 1 - NAME & HAZARD SUMMARY

Material name: **DRY CHEMICAL** Multipurpose Ammonium Phosphate
Manufacturer: Badger Fire Protection, Inc. Phone (434) 973-4361

SECTION 2 - INGREDIENTS

Material name: Siliceous Muscovite Mica, Mica
OSHA PEL: 20 MPPCF* ACGIH TLV: 20 MPPCF* Other Exposure Limits: None CAS No.: 12001-26-2
*Million particles per cubic foot

SECTION 3 - PHYSICAL DATA

Boiling Point: NA Specific Gravity (H₂O = 1): 1.80 Vapor Pressure (mm Hg): NA
Vapor Density (Air - 1): NA Solubility In Water: Slightly water soluble
Appearance Yellow powder w/and odor: no appearable odor Melting Point: 374° Fahrenheit

SECTION 4 - FIRE & EXPLOSION HAZARD

Flash Point: Noncombustible Method Used: NA
Flammable Limits in Air % by Volume: LEL Lower: NA UEL Upper: NA
Auto-Ignition Temperature: NA Extinguisher Media: NA, This material is a fire extinguisher agent
Special Fire Fighting Procedures: NA Unusual Fire and Explosion Hazards: NA

SECTION 5 - REACTIVITY DATA

Stability: Stable Conditions to Avoid: NA
Incompatibility: (Materials to Avoid): Do not mix with different types of dry chemical extinguishing agents.
Hazardous Polymerization: Will Not Occur Conditions to Avoid: NA

SECTION 6 - HEALTH HAZARD ASSESSMENT

Acute: Transient cough, Irritation of airways, and shortness of breath Chronic: Pneumonconiosis
Signs and Symptoms of Exposure: Coughing and irritation of airways
Medical Conditions Generally Aggravated by Exposure: Asthma, Bronchitis, or other respiratory illness
Chemical Listed as Carcinogen or Potential Carcinogen: N/A
Emergency and First Aid Procedures: Move victims to fresh air. Wash affected area with soap and water. Flush from eyes with large amounts of water for at least 15 minutes. Seek medical attention if necessary.
Routes of entry: Inhalation, Eyes, Skin, Ingestion

SECTION 7 - SPILL OR LEAK PROCEDURES

Precautions to be Taken in Handling and Storage: Multipurpose (ABC) Dry Chemical should be stored in original container or in sealed extinguishers.
Other Precautions: None
Steps to be Taken in Case Material is Released or Spilled: Sweep up. Store in covered containers. Do not reuse.

SECTION 8 - SPECIAL PROTECTION INFORMATION

Respiratory Protection: Dust respirator approved by NIOSH/MSHA schedule TC-ZIC

Ventilation: NA **Local Exhaust:** NA **Mechanical General:** NA **Special:** NA **Other:** NA

Protective Gloves: Sensitive individuals should wear gloves

Eye Protection: Safety glasses are recommended **Other Protective Clothing or Equipment:** NA

Work/Hygienic Practices: Avoid breathing of dust. Wash off with soap and water.

The information herein is given in good faith but no warranty, expressed or implied, is made.

MATERIAL SAFETY DATA SHEET

Kidde 55 Multi-Purpose Dry Chemical (Fire Extinguishing Agent)

1. PRODUCT AND COMPANY IDENTIFICATION

Product Name Kidde 55 Multi-Purpose Dry Chemical (Fire Extinguishing Agent)
Other Trade Names ABC, Ammonium Phosphate, Monoammonium Phosphate
Manufacturer/Supplier Kidde - Residential and Commercial
A United Technologies Company
Address 1016 Corporate Park Drive
Mebane, NC 27302
USA
Phone Number (919) 304-8200
(919) 563-5911
Chemtrec Number (800) 424-9300
(for emergencies only) (703) 527-3887 (International)
Revision Date: August 7, 2007
MSDS Date: January 15, 2007

This MSDS has been compiled in accordance with - EC Directive 91/155/EC - OSHA's Hazcom Standard (29 CFR 1910.1200)

2. COMPOSITION/INFORMATION ON THE COMPONENTS

Component Name	CAS#/Codes	Concentration	R Phrases	EU Classification
Monoammonium Phosphate	7722-76-1 EC#2317645	55 - 65%	None	None
Ammonium Sulfate	7783-20-2 EC#2319841	30 - 40%	None	None
Mica	12001-26-2	1 - 4%	None	None
Clay	8031-18-3	<2%	None	None
Amorphous Silica	7631-86-9 EC#2315454	<2%	None	None
Dye	NA	<0.1%	None	None

3. HAZARD IDENTIFICATION

EU Main Hazards

Non Hazardous Powder

Routes of Entry

- Eye contact - Inhalation - Skin contact

Carcinogenic Status

See Section 11 - Toxicity

Target Organs

- Respiratory System - Skin - Eye

Health Effects - Eyes

Contact for short periods of time may cause irritation.

Health Effects - Skin

Contact may cause mild irritation.

MATERIAL SAFETY DATA SHEET

Kidde 55 Multi-Purpose Dry Chemical (Fire Extinguishing Agent)

3. HAZARD IDENTIFICATION

Health Effects - Ingestion

Ingestion is not an expected route of exposure.

Health Effects - Inhalation

May irritate the respiratory tract. May cause transient cough and shortness of breath.

4. FIRST AID MEASURES

Eyes

Immediately flood the eye with plenty of water or warm water for at least 15 minutes, holding the eye open. Obtain medical attention if soreness or redness persists.

Skin

Wash affected area with soap and water. Obtain medical attention if irritation persists.

Ingestion

Dilute by drinking large quantities of water and obtain medical attention.

Inhalation

Move victim to fresh air. Obtain medical attention immediately for any breathing difficulty.

Advice to Physicians

Treat symptomatically.

5. FIRE FIGHTING MEASURES

Extinguishing Media

This preparation is used as an extinguishing agent and therefore is not a problem when trying to control a blaze. Use extinguishing agent appropriate to other materials involved. Keep pressurized extinguishers and surroundings cool with water spray as they may rupture or burst in the heat of a fire.

Unusual Fire and Explosion Hazards

Pressurized containers may explode in heat of fire.

Protective Equipment for Fire-Fighting

Wear full protective clothing and self-contained breathing apparatus as appropriate for specific fire conditions.

6. ACCIDENTAL RELEASE MEASURES

Sweep up or vacuum. Prevent skin and eye contact. Wear appropriate protective equipment.

7. HANDLING AND STORAGE

Pressurized extinguishers should be properly stored and secured to prevent falling or being knocked over. Do not drag, slide or roll extinguishers. Do not drop extinguishers or permit them to strike against each other. Never apply flame or localized heat directly to any part of the extinguisher or plastic container. Store pressurized extinguishers and plastic containers away from high heat sources. Storage area should be: - cool - dry - well ventilated - under cover - out of direct sunlight

MATERIAL SAFETY DATA SHEET

Kidde 55 Multi-Purpose Dry Chemical (Fire Extinguishing Agent)

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure Standards

Occupational exposure limits are listed below, if they exist.

Mica

ACGIH TLV: 3 mg/m³ TWA, measured as respirable fraction of the aerosol.

OSHA PEL: 20 mppcf, <1% crystalline silica

Nuisance Dust Limit

OSHA PEL: 50 mppcf or 15 mg/m³ TWA, total dust

15 mppcf or 5 mg/m³ TWA, respirable fraction

Engineering Control Measures

Use with adequate ventilation. There should be local procedures for the selection, training, inspection and maintenance of this equipment. When used in large volumes, use local exhaust ventilation.

Respiratory Protection

Not normally required. Use dust mask where dustiness is prevalent, or TLV is exceeded.

Hand Protection

Not normally needed when used as a portable fire extinguisher. Use gloves if irritation occurs.

Eye Protection

Chemical goggles or safety glasses with side shields.

Body Protection

Normal work wear.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State	Powder
Color	Pale Yellow
Odor	Odorless
Specific Gravity	Not available
Boiling Range/Point (°C/F)	Not applicable
Flash Point (PMCC) (°C/F)	Not Flammable
Solubility in Water	Not applicable
Vapor Density (Air = 1)	Heavier than air.
Vapor Pressure	Not applicable
Evaporation Rate	Not applicable

10. STABILITY AND REACTIVITY

Stability

Stable under normal conditions.

Conditions to Avoid

- Heat - High temperatures - Exposure to direct sunlight

Materials to Avoid

- Strong oxidizing agents - strong acids - sodium hypochlorite

MATERIAL SAFETY DATA SHEET

**Kidde 55 Multi-Purpose Dry Chemical
(Fire Extinguishing Agent)**

10. STABILITY AND REACTIVITY

Hazardous Polymerization

Will not occur.

Hazardous Decomposition Products

- oxides of carbon - ammonia - oxides of phosphorus - nitrogen oxides

11. TOXICOLOGICAL INFORMATION

Acute Toxicity

Low order of acute toxicity.

Chronic Toxicity/Carcinogenicity

This product is not expected to cause long term adverse health effects.

Mica and clay may contain small quantities of quartz (crystalline silica) as an impurity. Prolonged exposure to respirable crystalline silica dust at concentrations exceeding the occupational exposure limits may increase the risk of developing a disabling lung disease known as silicosis. IARC found limited evidence for pulmonary carcinogenicity of crystalline silica in humans.

Genotoxicity

This product is not expected to cause any mutagenic effects.

Reproductive/Developmental Toxicity

This product is not expected to cause adverse reproductive effects.

12. ECOLOGICAL INFORMATION

Mobility

No relevant studies identified.

Persistence/Degradability

No relevant studies identified.

Bio-accumulation

No relevant studies identified.

Ecotoxicity

No relevant studies identified.

13. DISPOSAL

Dispose of container in accordance with all applicable local and national regulations. Do not cut, puncture or weld on or near to the container. No harm to the environment is expected from this preparation.

14. TRANSPORT INFORMATION

DOT CFR 172.101 Data	Not regulated
UN Proper Shipping Name	Not regulated
UN Class	None
UN Number	None
UN Packaging Group	None

MATERIAL SAFETY DATA SHEET

**Kidde 55 Multi-Purpose Dry Chemical
(Fire Extinguishing Agent)**

15. REGULATORY INFORMATION

EU Label Information

Classification and labelling have been performed according to EU directives 67/548/EEC and 99/45/EC including amendments.

EU Hazard Symbol and Indication of Danger.

This preparation is not classified as dangerous.

R phrases

None

S phrases

None.

US REGULATIONS (Federal, State) and INTERNATIONAL CHEMICAL REGISTRATION LAWS

TSCA Listing

This product contains ingredients that are listed on or exempt from listing on the EPA Toxic Substance Control Act Chemical Substance Inventory.

EINECS Listing

All ingredients in this product have not been verified for listing on the European Inventory of Existing Commercial Chemical Substances (EINECS) or the European List of New Chemical Substances (ELINCS).

DSL/NDSL (Canadian) Listing

All ingredients in this product are listed on the Domestic Substance List (DSL) or the Non-Domestic Substance List (NDSL) or are exempt from listing.

WHMIS Classification

D2B

This product was classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations and the MSDS contains all the information required by these regulations.

MA Right To Know Law

All components have been checked for inclusion on the Massachusetts Substance List (MSL). Those components present at or above the de minimus concentration include: - Mica (12001-26-2) 1-4% - Amorphous Silica (7631-86-9) <2% - Ammonium Sulfate (7783-20-2) 30 - 40%

PA Right To Know Law

This product contains the following chemicals found on the Pennsylvania Hazardous Substance List: - Mica (12001-26-2) 1-4% - Amorphous Silica (7631-86-9) <2% - Ammonium Sulfate (7783-20-2) 30 - 40%

NJ Right To Know Law

This product contains the following chemicals found on the NJ Right To Know Hazardous Substance List: - Mica (12001-26-2) 1-4% - Amorphous Silica (7631-86-9) <2%

California Proposition 65

This product does not contain materials which the State of California has found to cause cancer, birth defects or other reproductive harm.

SARA Title III Sect. 302 (EHS)

This product does not contain any chemicals subject to SARA Title III Section 302.

SARA Title III Sect. 304

This product does not contain any chemicals subject to SARA Title III Section 304.

MATERIAL SAFETY DATA SHEET

**Kidde 55 Multi-Purpose Dry Chemical
(Fire Extinguishing Agent)**

15. REGULATORY INFORMATION

SARA Title III Sect. 311/312 Categorization

- Immediate (Acute) Health Hazard

SARA Title III Sect. 313

This product does not contain any chemicals that are listed in Section 313 at or above de minimis concentrations.

This product contains ingredients that are listed on or exempt from listing on the EPA Toxic Substance Control Act Chemical Substance Inventory.

EINECS Listing

All ingredients in this product have not been verified for listing on the European Inventory of Existing Commercial Chemical Substances (EINECS) or the European List of New Chemical Substances (ELINCS).

DSL/NDSL (Canadian) Listing

All ingredients in this product are listed on the Domestic Substance List (DSL) or the Non-Domestic Substance List (NDSL) or are exempt from listing.

WHMIS Classification

D2B

This product was classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations and the MSDS contains all the information required by these regulations.

MA Right To Know Law

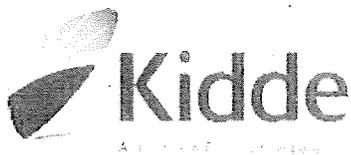

All components have been checked for inclusion on the Massachusetts Substance List (MSL). Those components present at or above the de minimus concentration include: - Mica (12001-26-2) 1-4% - Amorphous Silica (7631-86-9) <2% - Calcium Carbonate (471-34-1) 10-20%

PA Right To Know Law

This product contains the following chemicals found on the Pennsylvania Hazardous Substance List: - Mica (12001-26-2) 1-4% - Amorphous Silica (7631-86-9) <2% - Calcium Carbonate (471-34-1) 10-20%

NJ Right To Know Law

This product contains the following chemicals found on the NJ Right To Know Hazardous Substance List: Mica (12001-26-2) 1-4% - Amorphous Silica (7631-86-9) <2%

MATERIAL SAFETY DATA SHEET

Regular Dry Chemical
(Fire Extinguishing Agent)

15. REGULATORY INFORMATION

California Proposition 65

This product does not contain materials which the State of California has found to cause cancer, birth defects or other reproductive harm.

SARA Title III Sect. 302 (EHS)

This product does not contain any chemicals subject to SARA Title III Section 302.

SARA Title III Sect. 304

This product does not contain any chemicals subject to SARA Title III Section 304.

SARA Title III Sect. 311/312 Categorization

- Immediate (Acute) Health Hazard

SARA Title III Sect. 313

This product does not contain a chemical which is listed in Section 313 at or above de minimis concentrations.

SECTION 3: HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: **DANGER!** Emits toxic fumes when exposed to open flames/excessively high temperatures.

ROUTES OF ENTRY: **INGESTION, SKIN CONTACT, EYE CONTACT**

POTENTIAL HEALTH EFFECTS

EYES: May cause irritation.

SKIN: May cause irritation.

INGESTION: Not known. See section 4 for course of action.

INHALATION: Inhalation is not an expected hazard unless misted or heated to high temperatures.

ACUTE HEALTH HAZARDS: N/A

CHRONIC HEALTH HAZARDS: No information found.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: NA

MATERIAL SAFETY DATA SHEET

SILICONE RUBBER CLEAR
SECTION 3 NOTES:

FILE NO.: 0035
MSDS DATE: 05/16/06

SECTION 4: FIRST AID MEASURES

EYES: Immediately flush eyes with gentle but large stream of water for at least 15 minutes. Call a physician immediately.

SKIN: Immediately flush skin with plenty of water for at least 15 minutes. If irritation persists contact a physician.

INGESTION: If swallowed, DO NOT INDUCE VOMITING. Give large quantities of water. Never give anything by mouth to an unconscious person. Get medical attention immediately.

INHALATION (Burning Material): Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician immediately.

NOTES TO PHYSICIANS OR FIRST AID PROVIDERS: Treat symptomatically and supportively.

SECTION 4 NOTES:

SECTION 5: FIRE-FIGHTING MEASURES

EXTINGUISHING MEDIA: Foam, CO₂, dry chemical. DO NOT ATTEMPT TO EXTINGUISH WITH WATER.

SPECIAL FIRE FIGHTING PROCEDURES: In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Not considered to be an explosion hazard.

HAZARDOUS DECOMPOSITION PRODUCTS: Silicone Oxides, Carbon Oxides

SECTION 5 NOTES:

SECTION 6: ACCIDENTAL RELEASE MEASURES

ACCIDENTAL RELEASE MEASURES: Confine spill and place in a closed container. Wipe up excess with dry rags and place in a closed container.

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE: Avoid contact with skin and eyes by using personal protective equipment; product is moisture sensitive (store in a dark, DRY place). BE SURE TO HAVE PROPER VENTILLATION TO MINIMIZE EXPOSURE TO VAPORS.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Use adequate ventilation to keep airborne concentrations low.

RESPIRATORY PROTECTION: Not generally required.

EYE PROTECTION: Goggles

SKIN PROTECTION: PVC or rubber gloves.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE: Clear Paste

MATERIAL SAFETY DATA SHEET

MATERIAL SAFETY DATA SHEET - 8 Point

SECTION 1 – PRODUCT INFORMATION

Mascoat Products
Houston, TX 77041

Emergency phone: (713) 465-0304
Fax: (713) 465-0302
Date Reviewed: Jan 2007

Product Name: Delta T Marine Gen 2 Thermal Insulation
Product ID: DTM 2
Common Chemical Name: Acrylic Insulation Emulsion
Synonyms: None
Molecular Formula: Mixture

Thermal Insulating Material	
HEALTH	1
FLAMMABILITY	1
PHYSICAL HAZARD	0
Personnel Protection	G
Eye protection Gloves Dust mask	

SECTION 2 – HAZARDOUS INGREDIENTS DETERMINED BY OSHA (out of limits)

<u>Cas Number</u>	<u>Ingredients</u>	<u>% Range</u>	<u>OSHA PEL</u>	<u>ACGIH TLV</u>
	NONE as defined by OSHA % levels			

SECTION 3 – PHYSICAL PROPERTIES

Color :	White	Form/Appearance:	Thick emulsion mixture
Odor:	Slight ammonia	Melting Point:	N/A
Boiling Point:	No boiling point	Evaporation Rate (Butyl Ace =1):	<1
Freeze Point	32°F (0°C)	Solubility in H2O:	Dilutable
Specific Gravity:	0.56	Volume Solids:	80-82%
Pounds/Gallon:	5.1-5.2	VOC Content:	0.0 lbs/gallon
Non Volatile Solids:	53.3%		

SECTION 4 – FIRE FIGHTING MEASURES

Flash Point: Noncombustible

Auto ignition: N/A

Extinguished Media: (for dried film) carbon dioxide, dry chemical, or alcohol foam.

Special Fire Fighting Procedures: Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure buildup.

Unusual Fire and Explosion: Product will not burn but may spatter if temperature exceeds boiling point. Extreme heat may cause closed containers to burst. Dried film of product is capable of burning giving off oxides of carbon/nitrogen.

SECTION 5 – REACTIVITY DATA

Stability Data: Stable

Incompatibility: Solvents will coagulate the product.

Conditions or Hazards to Avoid: Extreme temperatures above 500°F (260°C)

Hazardous Decomposition: Hazardous polymerization will not occur.

Corrosive Properties: Not corrosive

Oxidizer Properties: Not an oxidizer

Chloride Properties: None

SECTION 6 – HEALTH HAZARD AND FIRST AID DATA

Routes of entry: skin-possible ingestion-possible inhalation-possible

Health Hazards Acute - In a confined area vapors in high concentration can bother some personnel. Extended periods of exposure without PP may result in health concerns.

Carcinogenicity: N/A

SECTION 6 – HEALTH HAZARD AND FIRST AID DATA (cont)

First aid procedure:

Eye exposure - flush eyes with water immediately. Get immediate medical attention.
Skin contact - wash area with soap and water. If redness persists, seek medical attention
Ingestion – If swallowed, dilute with water. **DO NOT INDUCE VOMITING.** Never give fluids or induce vomiting if the victim is unconscious or having convulsions. Get immediate medical attention.
Inhalation – Move to fresh air. Aid in breathing if needed and get immediate medical attention.
Notes to Physicians – none known.
Aggravated Medical Attention – No data is available at this time which addresses medical conditions that are generally recognized as being aggravated by exposure to this product. Please refer to the effects of overexposure section for effects (if any) observed in animals.
Special Precautions – No

SECTION 7 – ACCIDENTAL RELEASE MEASURES

Steps if material is released: Spills should be contained and placed in suitable containers for disposal by a licensed facility.

Waste Disposal Methods: Waste from this material is not hazardous as defined by the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Incinerate in approved facility. Do not incinerate closed containers. Dispose of in accordance with Federal, State, and Local regulations regarding pollution.

Precaution in handling and storage: Use only with adequate ventilation. Avoid breathing vapor and spray mist. Avoid contact with skin and eyes. Wash hands after using. Protect against dust which may be generated by sanding or abrading the dried film.

Other Precautions: Keep container closed when not in use. Transfer only to approved containers with complete and appropriate labeling. Do not take internally. *Keep out of reach of children.*

General: Protect from freezing.
Other: Keep out of direct sunlight in storage area

SECTION 8 – PERSONNEL PROTECTION

Clothing: Gloves, coveralls, apron, and boots necessary to prevent contact.

Respiratory Protection: Ventilation and dust mask recommended during application. If sprayed in confined area respiratory equipment is recommended due to slight ammonia odor.

Ventilation: Local exhaust - *preferable* Mechanical (gen) - *acceptable*

Protective Gloves: Preferred.

Eye Protection: Spectacles with unperforated sideshields.

Other Protective Equipment: None needed

OTHER

Special Handling: **DO NOT LET PRODUCT FREEZE.**

Hazardous ratings: Mascoat Products currently uses the National Paint and Coatings Association rating system. The use of an asterisk (*) in the HMIS rating indicates the potential for chronic health effects

HMIS:	Health	Fire	Reactivity	Special
	1	1	0	0

Hazardous rating OSHA: **The product is considered NON HAZRDOUS by the OSHA Hazard Communication Standard.**

Trademark: Delta T Marine Thermal Insulating Coating is a registered trademark of Mascoat Product, Houston, TX USA.

Important: While descriptions, designs, data and other information contained herein are presented in good faith and believed to be accurate, it is provided for guidance only. Many factors may influence the processing or application/use, Mascoat recommends that tests are made for the suitability for the product in the intended purpose. The intended use of this document is for health and handling procedures and not intended for an ingredients list for reformulation.

Shipping: This product is acceptable for shipment as non-hazardous via motor, air or ocean freight without any specialized handling. (Class 55).

Delta T Marine²

Selection & Specification Data

Product Name	Delta T Marine Thermal Insulating Coating
Product Number	DTM GEN2
Generic Type	Water-based Acrylic Marine Insulation Coating
Description	Delta T Marine is a multi-purpose coating that provides thermal insulation and anti-condensation protection. It combines painting and insulating solutions for marine vessels and provides drastic reduction in temperatures for its thickness.
Features	<ul style="list-style-type: none"> ◆ IMO/SOLAS compatible ◆ MED Certification ◆ Provides anti-condensation protection ◆ Dramatically reduces heat absorption due to radiant heat gain ◆ Excellent personnel protection ◆ Easy application characteristics ◆ Applies to almost any surface ◆ Extended recoat window ◆ Fast drying and curing rates ◆ No harmful volatile organic compounds
Gloss	Flat
Color	White and Light Grey. Custom tinting can be done at special request.
Priming	Self-priming over non-ferrous materials (stainless steel & aluminum). Primers are required for carbon steel substrates.
Topcoats	Please consult Mascoat
Wet weight	5.10–5.20 lbs/gal (0.6 kg/liter)
Weight dry film to area	0.037lbs/ft ² at 20 mils dft (0.181 kg/m ² at 0.5 mm dft)
Volume Solids Content	80–82%
Average Coat Thickness	20–22 mils WFT at 70°–130°F (0.5 mm WFT at 21°–54°C)
Practical Wet Coat Coverage	60–65 ft ² /gal @ 20mils (1.6 m ² /liter @ 0.5 mm)
Practical Dry Coat Coverage	50–55 ft ² /gal @ 20mils (1.3 m ² /liter @ 0.5 mm)
VOC Content	0.0 lbs/gal (1.57 grams/liter)
Limitations	Applications should not exceed 225°F (107°C) or peak areas above. Do not subject wet coating in pail format to freezing conditions.

Substrates & Surface Preparation

Surface Prep	Surface should be dry and free of foreign matter. Surface prep can be used to NACE 1-3 (SSPC SP 5-6) when applicable.
Ferrous Surfaces	Should be primed prior to application of Delta T Marine. Since the coating is water-based, it is important to have a boundary layer of protection to eliminate flash rusting.
Non-ferrous Surfaces	The coating can be applied directly to non-ferrous surfaces. Surface should be clean and free of oil, dirt or any other foreign matter.

Application Equipment

Listed below are the general equipment guidelines for the application of this product.

Airless Sprayer	<table border="0"> <tr> <td>Pump Ratio:</td> <td>33:1 or larger</td> </tr> <tr> <td>Volume:</td> <td>1.5 gpm (5.6 lpm) or greater</td> </tr> <tr> <td>Hose:</td> <td>3/8" or larger with no more than 3' of 1/4" whip. 1/2" hose recommended for length above 50'.</td> </tr> <tr> <td>Tip Size:</td> <td>.017" (for tight spots) .019–.023" (for normal use)</td> </tr> <tr> <td>Pressure:</td> <td>Minimum of 3000 PSI</td> </tr> </table>	Pump Ratio:	33:1 or larger	Volume:	1.5 gpm (5.6 lpm) or greater	Hose:	3/8" or larger with no more than 3' of 1/4" whip. 1/2" hose recommended for length above 50'.	Tip Size:	.017" (for tight spots) .019–.023" (for normal use)	Pressure:	Minimum of 3000 PSI
Pump Ratio:	33:1 or larger										
Volume:	1.5 gpm (5.6 lpm) or greater										
Hose:	3/8" or larger with no more than 3' of 1/4" whip. 1/2" hose recommended for length above 50'.										
Tip Size:	.017" (for tight spots) .019–.023" (for normal use)										
Pressure:	Minimum of 3000 PSI										
Small Spray Application	Please consult Mascoat for the sprayer. This gun is excellent for small applications & touchups.										
Brush	Brushing is only recommended for touchup of less than 0.5 ft ² (0.04 m ²). Brushing can inhibit coating performance. Please consult Mascoat for detailed instructions regarding brushing.										
Roller	Not recommended for this coating										

Application Conditions

Surface Temperatures	Surface temperatures for applications should be 60°F (15°C) or above. Lower surface temperatures will increase dry times.
Applications	<p><i>Ambient & Cold (60°–139°F, 15°–59°C):</i> For temperatures (surface or ambient – whichever is lower), an initial tack coat is recommended of 10 mils (0.25 mm or 250 microns). This tack coat will help to eliminate sag on vertical wall applications. Tack coat should be dry to touch prior to next pass. Typical coat thickness should not exceed 20–22 mils (0.50–0.55 mm) wet. Coating can be reapplied after each coat is thoroughly dry.</p> <p><i>Hot (>140°F, >60°C):</i> Application of Delta T Marine should be applied as per Mascoat detailed hot application instructions.</p>
Application Thickness	Product can be applied in successive coats to increase insulation abilities.
Forced Ventilation	Forced ventilation should be used to help coating dry and hang on vertical surfaces. Air movement should be both in/out during drying process.
Dryfall	Dryfall within a 3 ft. radius. Version: DTM 0705-1

Other Coating Specifications

Item	English Value (Metric Value)	Test Method

Flame Spread	5	ASTM E-84
Smoke Developed	5	ASTM E-87
Cone Calorimeter	>6	ASTM E-1384-97

Mixing & Thinning

- Mixing** Only a mud mixing paddle should be used. Use 1/2" drill motor to stir contents with paddle. *Make sure drill is set to reverse to ensure that the paddle will not mar the bucket's inner wall.* Please consult Mascoat for paddle, if needed.
- Thinning** Thinning is normally not needed in most applications. Please consult Mascoat for specific instructions, if thinning is desired. Thinning can also be used to help coating aesthetically.
- Pot Life** Coating is one part, so no catalization is needed. Pail can be reused if properly sealed.
- Container** 5 gallon pail (18.92 liters)

Package, Handling & Storage

- Package wet weight including pail & lid** 27.5-28.0 lbs (12.47-12.7 kg)
- Net Contents** 25.9 lbs (11.7 kg)
- Flash Point (Setflash)** None
- Storage** Product should be kept out of direct sunlight and stored in a climate controlled warehouse with temperatures ranging from 50°F to 110°F (10°C to 43°C).
- Shelf Life** One year shelf life from manufacture date
- Caution** Do not let product freeze.

Cleanup & Safety

- Cleanup** Equipment may be cleaned with soap and water.
- Safety** Half-face respirator recommended with ammonia cartridge or better. Eye protection recommended.
- Ventilation** Recommended for constricted areas.
- Caution** This material is not for human consumption.
- Clothing** Safety clothing & gloves are recommended.

Dry Times vs. Humidity

Surface Temperature	% Humidity	Time Between Coats (hours)

	51-70%	0.75
	>70%	1.00

Use 90° thumb test or moisture meter prior to recoat to ensure coating is dry. These are the estimated dry times for 15-20 mils (0.38-0.5mm) of Delta T Marine wet. Dry time may vary depending on other conditions such as wind or enclosed environments. Lighter thickness passes will expedite dry times. Forced ventilation in confined areas will also expedite dry times.

Curing Schedule

Temperature	Cure Time
50-60°F (10-15°C)	60-72 hrs
61-70°F (16-21°C)	48-60 hrs
71-80°F (22-26°C)	36-48 hrs
81-90°F (27-32°C)	20-24 hrs
91-100°F (33-37°C)	18-20 hrs
>100°F (>37°C)	14-16 hrs

To the best of our knowledge the technical data contained herein is true and accurate on the date of publication and is subject to change without prior notice. We guarantee our products to conform to Mascoat quality control. We assume no responsibility for coverage, performance or injuries resulting from use. Liability, if any, is limited to replacement of products. Logos are registered properties of their respective owners.

**Why Paint
And then
Insulate?**

The Industry Leaders in Insulation Coatings

Applications of Delta T Marine² Thermal Insulating Coating

The pictures below are just a small number of the applications areas when using Delta T Marine² Thermal Insulating Coating. All applications use the coating for thermal protection and/anti-condensation protection. The coating is normally applied no greater than 2.0 mm (80 mils) in 0.5 mm coats (20 mils). The colder environments (below 5°C) normally receive 1.5-2.00 mm (60-80) mils.

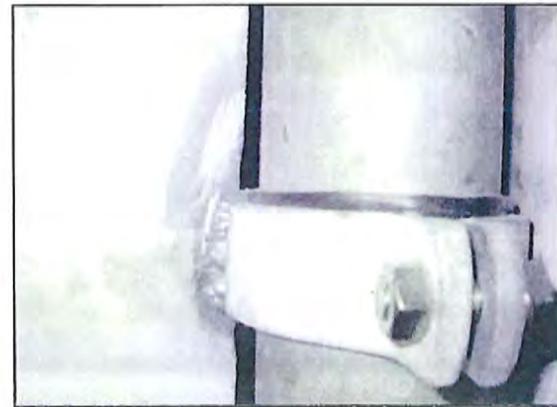

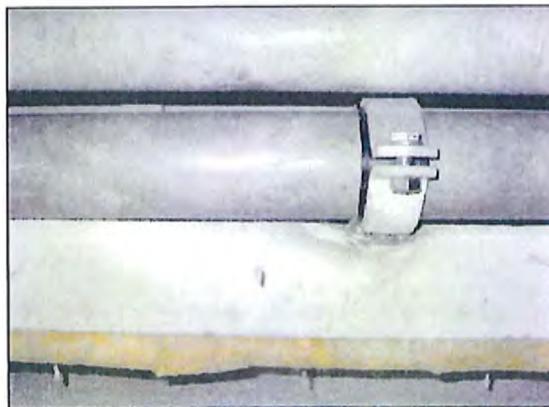

Delta T Marine applied to the outside wall of the vessel and framing supports to combat condensation/sweating. The coating is normally applied to 40-80 mils (1.0-2.0 mm) in a series of coats. By applying the coating to the side walls, stiffeners, overheads and shells of the vessel, protection is given as well as reducing radiant heat gain.

More applications using the coating in conjunction with conventional sound damping insulation. This method allows for thermal and sound control inside state of the art yachts. The pins and hangers also are used for structural fire protection.

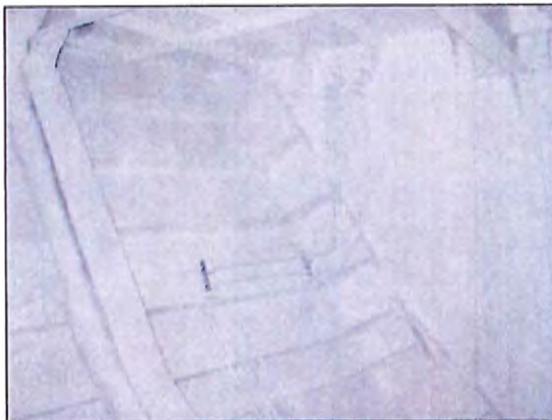

The two burn pictures directly below are the surfaces there were welded for a pipe hanger. The coating was applied prior to the fix and the weld. This shows that the coating can tolerate repairs with minimal degradation of the coating in the area adjacent to the weld.

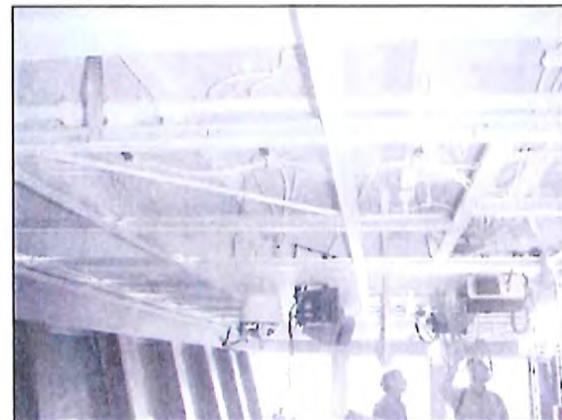

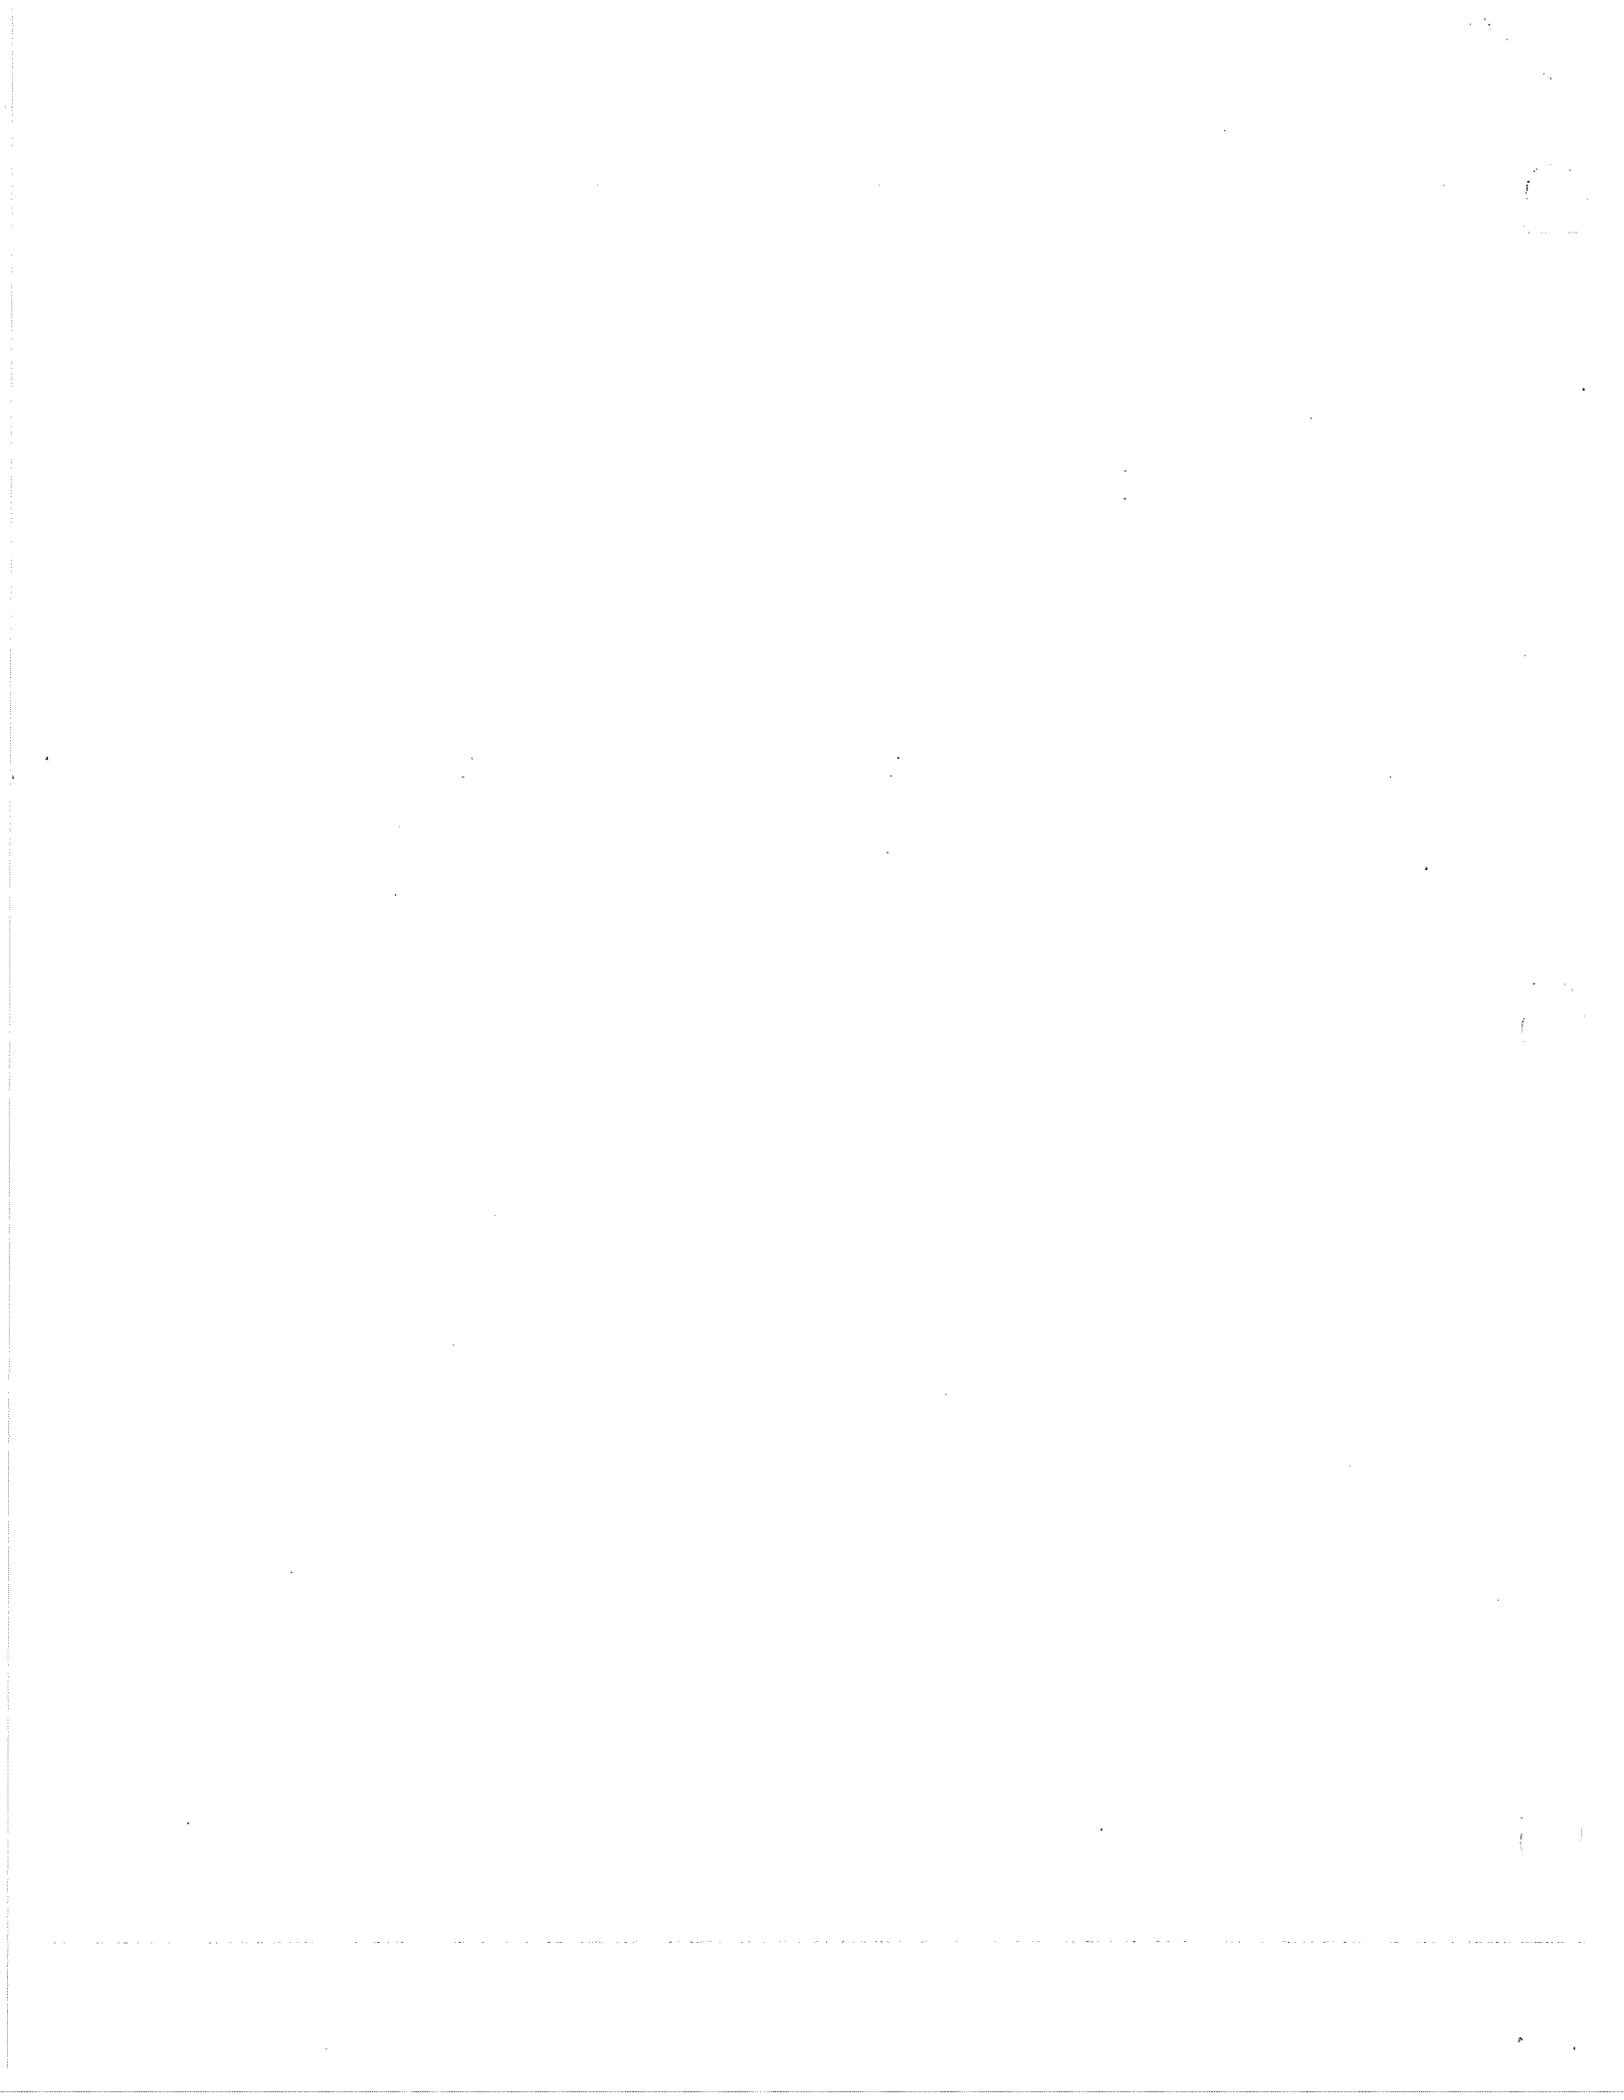

Complex geometrical shapes are easy to insulate by spraying of the coating. No longer is cut and paste insulation the only method to providing insulation qualities.

The coating can be sprayed prior to any rigging or after rigging with ease.

SECTION 3 : Physical And Chemical Characteristics

Physical State/Appearance:

Liquid

Color:

Colorless

Odor:

Alcohol Type Odor

pH:

Neutral

Vapor Pressure:

(MM HG.): 32.8 @ 68 deg F.

30.003 (Anhydrous) @ 68 deg F.

Vapor Density:

(AIR=1): 2.1

Boiling Point:

177.4 deg F. Range 179.96 to 181.04 (Anhydrous)

Solubility:

In Water: Complete

Specific Gravity:

(H(2)O=1): 0.786 @ 68/68 deg C

Evaporation Point:

(n Butyl Acetate=1): 1.4, 2.4 (Anhydrous)

Percent Volatile:

By Volume: > 99

FlashPoint:

55 deg. F

Upper Flammable Explosive Limit:

(% Volume in Air): 12.1% at 151 deg F

Lower Flammable Explosive Limit:

(% Volume in Air): 2.5% at 79 deg F

TOP

SECTION 4 : Fire And Explosion Hazards

Flash Point:

55 deg. F

Flash Point Method:

TCC

Upper Flammable or Explosive Limit: (% Volume in Air): 12.1% at 151 deg F

Lower Flammable or Explosive Limit: (% Volume in Air): 2.5% at 79 deg F

Extinguishing Media:

Water fog, Dry chemical, CO(2), "Alcohol" Foam.

Fire Fighting Instructions:

Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes. Water may be ineffective for fire fighting. Use water spray to keep fire exposed containers cool and to protect personnel. If a leak or spill has not ignited, use water spray to disperse the vapors. Either allow fire to burn under controlled conditions or extinguish with alcohol type foam and dry chemical. Try to cover liquid spills with foam.

Unusual Fire Hazards:

Flammable liquid (see section 10). Vapors are heavier than air and may travel considerable distance to a source of ignition and flash back. Run-off from fire control may cause pollution.

TOP

SECTION 5 : Health Hazards

Isopropyl Alcohol:

Potential Health Effects:

Eye Contact:

Vapor irritates eyes. Liquid will damage eye tissue if not removed promptly.

Skin Contact:

Prolonged or repeated contact can cause dryness, irritation, defatting and dermatitis. Acute dermal LD(50) (Rabbit); 1300 mg/kg mildly irritating to the skin, low order of toxicity.

Inhalation:

High concentrations of vapor can irritate respiratory tract, are anesthetic, and may cause central nervous system (CNS) depression. Early CNS depression may be evidenced by giddiness, headache, dizziness and nausea. Acute Inhalation LC(50) (Rat) 8 Hrs: 12000 ppm. Negligible hazard at ambient temperatures 0 to 100 deg. F (18 to 38 deg. C)

Ingestion:

May cause marked and persistent nausea, vomiting and abdominal pain. Generally considered to have a low order of acute oral toxicity. Acute oral LD(50) (Rat): 5840 MG/KG. Small amounts of the liquid aspirated into the respiratory system during ingestion, or from vomiting, may cause bronchiopneumonia or pulmonary edema.

Aggravation of Pre-Existing Conditions:

Pre-existing skin. Eye and respiratory disorders may be aggravated by exposure to IPA.

Threshold Limit Value: As indicated - Section 1. 50% Odor Recognition Threshold is

7.5 ppm.

(For analytical method see section is reference (1).

Other Information:

Supplemental Health Information:

Intentional abuse, misuse or other massive exposure to IPA may result in difficult breathing, nausea, vomiting and headache accompanied by various degrees of CNS depression. Coma and/or death are even possible.

In Rats:

1 Liver and kidney enlargement has been seen at levels > 6250 ppm in drinking water.

2. Anemia has been seen at 12500 and 25000 ppm in drinking water.

TOP

SECTION 6 : Emergency And First Aid Procedures

Eye Contact:

Flush with water for 15 minutes while periodically holding eyelids open. Get medical attention.

Skin Contact:

Wash with soap and water. Remove contaminated clothing and shoes; do not reuse until cleaned. If persistent irritation occurs, get medical attention.

Inhalation:

Remove victim to fresh air and provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get medical attention.

Ingestion:

Do not induce vomiting. Keep at rest. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into lungs. Get medical attention at once!

TOP

SECTION 7 : Reactivity Data

Chemical Stability:

Stable

Incompatibilities with Other Materials:

(Materials to avoid for purposes of transport, handling and storage only): Alkylene oxides, acid anhydrides, Isocyanates, Organometallic contaminants, Inorganic Acids, Alkanolamines, Caustics, Amines, Ammonia, Chlorinated compounds, Organic Acids, Halogens, Phosphorus, Trichloride, Aldehydes, Monomers, Polymerizable esters, and storing this product in Aluminum vessels.

Avoid heat, sparks, open flames, and contact with strong oxidizing agents, will attack aluminum if the surface oxide film is penetrated (e.g. by abrasion or high temperature).

TOP

SECTION 8 : Precautions For Safe Handling

Small Spill:

Take up with an absorbent material and place in non-leaking containers: Seal tightly for proper disposal.

Waste Disposal:

Place in a disposal facility approved under RCRA regulations for hazardous waste, use non-leaking containers, seal tightly and label properly. Assure compliance with local, state, and federal regulations. EPA-Resource conservation and recovery act (RCRA) regulations, as produced, this material is a product and not a waste. If discarded or intended to be discarded as is, it is an ignitable hazardous waste as defined in RCRA (40 CFR 261.21).

EPA Waste Number:

D001

DOT Shipping Name:

Isopropanol

DOT Hazard Class: Flammable Liquid

DOT Identification Number: UN1219

DOT Subpart E Labeling Requirement: Flammable Liquid

Reportable Quantity: DOT: None

Other Information: Not Applicable

TOP

SECTION 9 : Control Measures

Ventilation System:

Required: Face velocity > 60 LFPM in confined space. Use explosion-proof ventilation equipment.

Skin Protection Description:

Chemically resistant gloves, Nitrile, Neoprene or natural rubber preferred.

Eye/Face Protection:

Chemical splash goggles or face shield.

Respiratory Protection:

For concentrations above PEL/TLV and up to 1000 PPM, use chemical cartridge respirator with a full facepiece and organic vapor cartridge(s), per NIOSH/OSHA, for higher concentrations, see Ref. (2), Sec. 10.

Other Protective:

An eye bath and washing facilities should be available.

Section 304:

EPA-Comprehensive Environmental Response, Compensation and Liability Act. Under EPA-CERCLA ("Superfund") releases to air, land or water may be reportable to the national response center, 800-424-8802 (Circumstances surrounding the release and cleanup determine reportability). This product is not subject to CERCLA Reporting Requirements.

Section 312 Hazard Category:

Pressures: Not Applicable

Reactivity: Not Applicable

Chronic: Not Applicable

Acute: Yes

Fire: Yes

OSHA 29 CFR 1200:

The information and recommendations contained in this Material Safety Data Sheet are supplied pursuant to 29 CFR 1910.1200 of the Occupational Safety and Health

Standard Hazard Communication Rule.

NFPA:

Fire Hazard: 4 = Extrême

Health: 1 = Slight

Reactivity: 1 = Slight

Label Text:

Additional Information:

This information may be of importance to you.

Keep liquid and vapor away from heat, sparks and flame. Surfaces that are sufficiently hot may ignite even liquid product in the absence of sparks or flame. Extinguish pilot lights, cigarettes and turn off other sources of ignition prior to use and until all vapors are gone.

Vapors may accumulate and travel to ignition sources distant from the handling site; flash fire can result. Keep containers closed when not in use. Use with adequate ventilation. Static electricity may accumulate and create a fire hazard. Ground fixed equipment. Bond and ground transfer containers and equipment. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat flame, sparks, static electricity, or other sources of ignition: They may explode and cause injury or death. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner, or properly disposed of. Aluminum containers are not recommended for storage. Minimize skin contact. Wash with soap and water before eating, drinking, smoking or using toilet facilities.

No smoking where material is used or stored.

SECTION VI - HEALTH HAZARD DATA

Route(s) of Entry: Inhalation (Y) Skin (Y) Ingestion (Y) Eye (Y)

Health Hazards (Acute and Chronic): Eye - Mild irritant. Skin - Mild irritant. Ingestion - Toxicity is relatively low. There is a risk of aspiration of product into the lungs. Ingestion of large quantities may cause slight gastrointestinal discomfort, diarrhea, and headache. Ingestion of small doses may produce irritation and diarrhea. Inhalation - Low risk. Mists above TLV may cause chemical pneumonitis.

Carcinogenicity: NTP (N/D) IARC Monographs (N/D) OSHA Regulated (N/D)

Signs and Symptoms of Exposure: See Health Hazards (Acute and Chronic)

Medical Conditions Generally Aggravated by Exposure: N/D

Emergency and First Aid Procedures: Eye - Immediately wash the eyes with large quantities of room temperature water for at least 15 minutes, occasionally lifting the lower and upper lids. Get medical attention immediately. Skin - Remove contaminated clothing and wash affected area with soap and water for 15 minutes. Launder contaminated clothing before reuse. Ingestion - DO NOT INDUCE VOMITING. Get immediate medical assistance. Inhalation - Move the exposed person to fresh air at once and call emergency medical care. If breathing has stopped, give artificial respiration. If breathing is difficult, give humidified Oxygen.

SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE

Steps to be Taken in Case Material is Released or Spilled: Small Spill - Remove sources of heat or ignition. Provide adequate ventilation. Contain leak with absorbent, inert, non-combustible material.

Large Spill - Contain spill. Transfer to secure containers. In the event of an uncontrolled material release, the user should determine if release is reportable under applicable laws and regulations.

Waste Disposal Method: Dispose of product in accordance with federal, state, and local regulations. Before attempting to clean up, refer to other sections of MSDS for hazard caution information.

Precautions to be taken in Handling and Storing: Store below 150°F. Keep away from heat and flames.

Other Precautions: KEEP AWAY FROM CHILDREN!

SECTION VIII - CONTROL MEASURES

Respiratory Protection (Specify Type): Normally none required. Use a NIOSH- approved respirator for organic vapors and mists if high vapor or mist concentrations are expected.

Ventilation: Local: To maintain exposure levels below any recommended limits.

Mechanical: In confined spaces.

Protective Gloves: Oil impervious

Eye Protection: Safety goggles or chemical-splash goggles

Other Protective Clothing or Equipment: Wear body covering clothes to avoid prolonged exposure.

Work/Hygiene Practices: Always follow good housekeeping and personal hygiene practices.

SECTION VI - HEALTH HAZARD DATA**Route(s) of Entry:** Inhalation (Y) Skin (Y) Eye (Y) Ingestion (Y)**Health Hazards (Acute and Chronic):** Acute: Inhalation - No significant adverse health effects are expected to occur upon short-term exposure. Eye - Transient, mild irritation with short-term contact with liquid sprays or mists. Skin - Mild, transient skin irritation with short-term exposure. Ingestion - No significant adverse health effects are anticipated. Chronic: Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking (dermatitis), or oil acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation and other pulmonary effects.**Carcinogenicity:** NTP (N) IARC Monographs (N) OSHA Regulated (N)**Signs and Symptoms of Exposure:** Inhalation - N/A Eye - Stinging, watering, redness, and swelling. Skin - Contact with hot material may result in severe burns. Ingestion - Can cause a laxative effect.**Medical Conditions Generally Aggravated by Exposure:** Pre-existing skin disorders.**Emergency and First Aid Procedures:** Inhalation - In case of overexposure, move victim to fresh air. Eye - Remove contact lenses if any. Flush eyes with cool, clean, low-pressure water while occasionally lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persists. Skin - Remove contaminated clothing and shoes. Wipe off excess material from skin. Wash exposed skin area with mild soap and water. Seek medical attention if tissue appears damaged or irritation persists. If material is injected under the skin, into the muscle or into the bloodstream, seek medical attention immediately. Ingestion - DO NOT INDUCE VOMITING. Do not give anything to drink unless directed to by a physician. Never give anything by mouth to a person who is not fully conscious. Seek medical attention immediately.**SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE****Steps to be Taken in Case Material is Released or Spilled:** Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. **Small Spill:** Absorb or cover with dry earth, sand, or other inert non-combustible absorbent material. Place into waste containers for later disposal. **Large Spill:** Contain spill. Prevent entry into waterways or sewers. In urban areas, clean up spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used. Transfer to secure containers.**Waste Disposal Method:** User to determine if material is a hazardous waste at time of disposal. Transportation, treatment, storage, and disposal of waste material must be conducted in accordance with RCRA regulations. State and/or local regulations may be more restrictive. Contact the RCRA/Superfund Hotline at (800) 424-9346 for guidance concerning case specific disposal issues.**Precautions to be taken in Handling and Storing:** Avoid water contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residue that can ignite with explosive force. Do not pressurize, cut, weld, braze, solder, drill, grind or expose empty containers to flames, sparks, heat or other potential ignition sources. Keep container closed when not in use. Do not store with strong oxidizing agents. Do not store at temperatures above 120°F or in direct sunlight.**Other Precautions:** KEEP AWAY FROM CHILDREN**SECTION VIII - CONTROL MEASURES****Respiratory Protection (Specify Type):** Normally none required. A NIOSH-approved organic vapor respirator equipped with a dust/mist prefilter should be used if elevated airborne concentrations are anticipated.**Ventilation: Local & Mechanical -** To keep airborne concentrations of mists and/or vapors below the recommended exposure limits.**Protective Gloves:** Use gloves constructed of chemical-resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected.**Eye Protection:** Safety glasses w/side shields. Goggles and/or face shield if splashing/spraying is likely or material is heated above 125°F.**Other Protective Clothing or Equipment:** Wear clean protective clothing (e.g., neoprene or Tyvek®) for prolonged or repeated contact. Launder contaminated work clothes before reuse.**Work/Hygiene Practices:** Always follow good housekeeping and personal hygiene practices.

This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition.

Firefighters must use full bunker gear including NIOSH-approved, positive-pressure, self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

Unusual Fire and Explosion Hazards: In enclosed spaces, heater vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point.**ADDITIONAL INFORMATION**

Mercury Marine Emergency Information Number: 920-929-5000

Manufacturer, Citgo Petroleum Corp., Emergency Number: 800-424-9300 (Chemtrec)

SECTION V - REACTIVITY DATA

Stability: Unstable () Stable (X)

Conditions to Avoid: Keep away from extreme heat, sparks, open flame, and strongly oxidizing conditions.

Incompatibility (Materials to Avoid): Strong oxidizers

Hazardous Decomposition or Byproducts: Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons, and trace oxides of sulfur, phosphorus, zinc, and/or nitrogen.

Hazardous Polymerization: May Occur () Will Not Occur (X)

SECTION VI - HEALTH HAZARD DATA

Route(s) of Entry: Inhalation (X) Skin (X) Eye (X) Ingestion (X)

Health Hazards (Acute and Chronic): This product contains a petroleum-based mineral oil. Prolonged or repeated skin contact can cause mild irritation and inflammation characterized by drying, cracking, (dermatitis) or oil acne. Repeated or prolonged inhalation of petroleum-based mineral oil mists at concentrations above applicable workplace exposure levels can cause respiratory irritation or other pulmonary effects.

Carcinogenicity: NTP (N) IARC Monographs (N) OSHA Regulated (N)

Signs and Symptoms of Exposure: Inhalation – No significant adverse health effects are expected to occur upon short-term exposure. Skin – This product can cause mild, transient skin irritation with short-term exposure. Skin contact with hot material may result in severe burns. Eye – This product can cause transient, mild eye irritation with short-term contact with liquid sprays or mists. Symptoms include stinging, watering, redness, and swelling. Ingestion – If swallowed, this material can cause a laxative effect.

Medical Conditions Generally Aggravated by Exposure: Skin

Emergency and First Aid Procedures: Inhalation – Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the affected person to fresh air. Skin – If burned by hot material, cool skin by quenching with large amounts of cool water. For contact with product at ambient temperatures, remove contaminated shoes and clothing. Wipe off excess material. Wash exposed skin with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persists. Thoroughly clean contaminated clothing before reuse. Discard contaminated leather goods. If material is injected under skin, seek medical attention immediately. Eye – Check for and remove contact lenses. Flush eyes with cool, clean, low-pressure water while occasionally lifting and lowering eyelids. Seek medical attention if excessive tearing, redness, or pain persists. Ingestion- Do not induce vomiting unless directed by a physician. Do not give anything to drink unless directed by a physician. Never give anything by mouth to a person who is not fully conscious. Seek medical attention immediately.

SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE

Steps to be Taken in Case Material is Released or Spilled: Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Slipping hazard; do not walk through spilled material. Stop leak if you can do so without risk. **Small Spills:** Absorb or cover with dry earth, sand, or other inert non-combustible absorbent material. Place into waste containers for later disposal. **Large Spills:** Contain to maximize product recovery or disposal. Prevent entry into waterways or sewers. In urban area, clean up spill as soon as possible. In natural environments, seek cleanup advice from specialists to minimize physical habitat damage. This material will float on water. Absorbent pads and similar materials can be used.

Waste Disposal Method: It is the responsibility of the user to determine if the material is a "hazardous waste" as the time of disposal. Transportation, treatment, storage, and disposal of waste material must be conducted in accordance with RCRA regulations (40 CFR 260 through 40 CFR 271). State and/or local regulations may be more restrictive.

SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE

Precautions to be taken in Handling: Avoid contamination and extreme temperatures to minimize product degradation. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze solder, drill, grind, or expose containers to flames, sparks, heat, or other potential ignition sources. Consult appropriate federal, state, and local authorities before reusing, reconditioning, reclaiming, recycling, or disposing of empty containers and/or waste residues of this product.

Precautions to be taken in Storing: Keep container closed. Do not store with strong oxidizing agents. Do not store at elevated temperatures. Avoid storing product in direct sunlight for extended periods of time. Consult appropriate federal, state, and local authorities before reusing, reconditioning, reclaiming, recycling, or disposing of empty containers and/or waste residues of this product.

Other Precautions: KEEP AWAY FROM CHILDREN!

SECTION VIII - CONTROL MEASURES

Respiratory Protection (Specify Type): If elevated airborne concentrations above applicable workplace exposure levels are anticipated, a NIOSH-approved organic vapor respirator equipped with dust/mist/prefilter should be used.

Ventilation: Local Exhaust & Mechanical: Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mists and/or vapors below the recommended exposure limits.

Protective Gloves: Use gloves constructed of chemical-resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.

Eye Protection: Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. Wear goggles and/or face shield if splashing or spraying is anticipated. Wear goggles and face shield if material is heated above 125°F (51°C). Have suitable eye wash water available.

Other Protective Clothing or Equipment: Personal protective equipment should be selected based upon the conditions under which this material is used. Use clean and impervious protective clothing (e.g. neoprene or Tyvek) if splashing or spraying conditions are present. Protective clothing should include long sleeves, apron, boots, and additional face protection.

Work/Hygiene Practices: Always follow good housekeeping and personal hygiene practices. Launder oil-contaminated clothing before reuse. Contaminated leather goods should be removed promptly and discarded.

Section II - Hazardous Ingredients/Identity Information

Hazardous Components (Specific Chemical Identity, Common name (s))
This product is regarded as an "Article" by definition under 29CFR 1910.1200. The product contents are listed for information in the event that the battery cell case is breached due to fire, explosion, extreme abuse, misuse or improper disposal. The physical form of the product precludes exposure in normal use.

Ingredient	% by Weight	Reg. Y/N	CAS #	OSHA PEL	ACGIH TLV**	Other Limits Recommended	CARCINOGEN Y/N
Cadmium	0-26	Y	7440-43-9	0.005 TWA	0.05 TWA	NA	Y

Hazard Ratings:	0 = Minimal hazard A = Goggles	1 = Slight hazard B = Goggles + Gloves	2 = Moderate hazard C = Face Shield, Gloves + Apron	3 = Serious hazard D = Special, See section VII of this sheet

Section III - Physical/Chemical Characteristics

Boiling Point > 392° F	Specific Gravity (H ₂ O=1) > 2.6
Vapor Pressure (mm/Hg.) NA	Melting Point NA
Vapor Density (Air=1) NA	Evaporation Rate NA
Solubility in Water Slightly soluble (electrolyte)	
Appearance and Odor Solid, sealed in a case NA	

Section IV - Fire and Explosion Hazard Data

Flash Point (Method Used) NA	Flammable Limits NA	LEL NA	UEL NA
Extinguishing Media Water CO ₂			
Special Fire Fighting Procedures NA			
Unusual Fire and Explosion Hazards Exposure to temperatures above 212°F can cause evaporation of the liquid content of the potassium hydroxide electrolyte resulting in rupture of the cell. Potential for exposure to cadmium fumes during fire; use self-contained breathing apparatus.			

Section V - Reactivity Data

Stability	Unstable		Conditions to avoid:
	Stable	X	Heat, open flames, sparks, moisture
Incompatibility (Material to avoid): Acids, aldehydes, and carbonate compounds.			
Hazardous Decomposition or Byproducts Oxides of cadmium and nickel			
Hazardous Polymerization	May Occur		Conditions to avoid:
	Stable	X	NA

Section VI - Health Hazard Data

Route(s) of Entry: During normal use	Inhalation?	Skin?	Ingestion?
	NA	NA	NA
Health Hazards (Acute and Chronic) NA during normal use. The electrolyte may cause skin or eye irritation.			
Carcinogenicity: Not during normal use.	NIIP?	IARC Monographs?	OSHA Regulated?
	NA	NA	NA
Signs and Symptoms of Exposure: The electrolyte may cause skin or eye irritation. Flush immediately with water.			
Medical Conditions Generally Aggravated by Exposure: NA during normal use.			
Emergency and First Aid Procedures: If electrolyte contacts skin or eyes, flush area with clean water.			

Section VII - Precautions for Safe handling and Use

Steps to Be Taken in Case Material is Released or Spilled Spill and leaks are unlikely. If disassembled avoid contact with skin and eyes.
Waste Disposal Method Cadmium batteries are hazardous waste and should be disposed of according to Federal, State and Local regulations.
Precautions to Be Taken in Handling and Storage Never short circuit cells. Personal injury and fire may result.
Other Precautions If battery contents are released, do not touch spilled material. Take up with sand or other absorbent and place in container for disposal as a hazardous waste per Federal, State and Local regulations.

Section VIII - Control Measures

Respiratory Protection (Specify Type) Unnecessary during normal use.			
Ventilation	Local Exhaust	NA	Special NA
	Mechanical	NA	Other NA
Protective Gloves NA during normal use	Eye Protection NA during normal use		
Other Protective Clothing or Equipment None			
Work/Hygienic Practices NA

PRODUCT: 13004-14-021/5 025472 MOELLER GREEN ZINC CHROMATE

Section 01: CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

MANUFACTURER MANUFACTURED FOR:
MOELLER MARINE PRODUCTS CO.
801 NORTH SPRINGS ST
SPARTA
TENN. 38583
USA
931-738-8090

PRODUCT NAME..... 13004-14-021/5 025472 MOELLER GREEN ZINC CHROMATE
CHEMICAL FAMILY..... ALKYD BASED COATING.
MOLECULAR WEIGHT..... NOT APPLICABLE.
CHEMICAL FORMULA..... NOT APPLICABLE.
TRADE NAMES & SYNONYMS..... 13004-14-021/5 025472 MOELLER GREEN ZINC CHROMATE
PRODUCT USES..... PRIMER.
FORMULATION #..... 14-521.
LAB BOOK #..... 002-17-142.
V.O.C.(M.I.R.)..... COMPLIES WITH AVIATION AND MARINE PRIMER CATERGORY <2 g OZONE / g PRODUCT.

Section 02: COMPOSITION/INFORMATION INGREDIENTS

Hazardous Ingredients	%	Exposure Limit	C.A.S.#	LD/50, Route,Species	LC/50 Route,Species
ACETONE	15-40	750 ppm	67-64-1	>9750 mg/kg ORAL - RAT	>16,000 ppm (4 hr) INHAL - RAT
OLUENE	7-13	50 ppm	108-88-3	5000 mg/kg ORAL - RAT	8000 ppm (4 hr) INHAL - RAT

PROPANE	10-30	1000 ppm	74-98-6	NOT APPLICABLE	NOT AVAILABLE

Section 03: HAZARDS IDENTIFICATION

ROUTE OF ENTRY:

INGESTION..... MAY CAUSE HEADACHE, NAUSEA, VOMITING AND WEAKNESS.
INHALATION..... INHALATION OF SOLVENTS MAY CAUSE IRRITATION. PROPELLANT IS A SIMPLE ASPHYXIANT.

EYE CONTACT..... MAY CAUSE IRRITATION.
SKIN ABSORPTION..... NO DATA AVAILABLE FOR THIS PRODUCT MIXTURE.
SKIN CONTACT..... MAY CAUSE IRRITATION.
EFFECTS OF ACUTE EXPOSURE..... DIZZINESS, NAUSEA. IRRITATION TO SKIN & EYES.
EFFECTS OF CHRONIC EXPOSURE..... SOLVENTS MAY CAUSE DEFATTING DERMATITIS.
EXPOSURE LIMIT OF MATERIAL..... SEE SECTION 2.

Section 04: FIRST AID MEASURES

EMERGENCY FIRST AID PROCEDURE IN CASE OF EYE CONTACT, FLUSH IMMEDIATELY WITH PLENTY OF WATER FOR AT LEAST 15 MINUTES AND GET MEDICAL ATTENTION. FOR SKIN, WASH THOROUGHLY WITH SOAP AND WATER. IF AFFECTED BY INHALATION OF VAPOUR OR SPRAY MIST, REMOVE TO FRESH AIR. IF SWALLOWED; DO NOT INDUCE VOMITING, GET MEDICAL ATTENTION.

PRODUCT: 13004-14-021/5 025472 MOELLER GREEN ZINC CHROMATE**Section 05: FIRE FIGHTING MEASURES**

AUTO IGNITION TEMPERATURE (°C).....	243-465.
SPECIAL PROCEDURES.....	WATER FROM FOGGING NOZZLES MAY BE USED TO COOL CLOSED CONTAINERS TO PREVENT BUILD-UP IF EXPOSED TO EXTREME TEMPERATURES. FULL PROTECTIVE EQUIPMENT INCLUDING SELF CONTAINED BREATHING APPARTATUS SHOULD BE WORN IN A FIRE INVOLVING THIS MATERIAL.
FLAMMABILITY.....	EXTREMELY FLAMMABLE.
IF YES, UNDER WHICH CONDITIONS?.....	EXCESSIVE HEAT, SPARKS AND OPEN FLAME.
EXTINGUISHING MEDIA.....	WATER, CARBON DIOXIDE, DRY CHEMICAL, FOAM.
UPPER FLAMMABLE LIMIT.....	12.6.
(% BY VOLUME)	
LOWER FLAMMABLE LIMIT.....	1.
(% BY VOLUME.)	
EXPLOSION DATA	
SENSITIVITY TO STATIC DISCHARGE.....	NOT APPLICABLE.
SENSITIVITY TO IMPACT.....	NOT APPLICABLE.
HAZARDOUS COMBUSTION	
PRODUCTS.....	HYDROCARBON FUMES AND SMOKE. CARBON MONOXIDE WHERE COMBUSTION IS INCOMPLETE.
AEROSOL FLAME PROJECTION	
CLASSIFIED AS:.....	> 45 CM.
FLASHBACK.....	NONE.
FLASH POINT(°C),TAG CLOSED-CUP	LOWEST VALUE KNOWN IS ACETONE @-18C.
(CONCENTRATE)	

Section 06: ACCIDENTAL RELEASE MEASURES

LEAK/SPILL.....	REMOVE ALL SOURCES OF IGNITION. USE AN INERT ABSORBENT MATERIAL, AND NON-SPARKING TOOLS. VENTILATE AREA. PREVENT FROM ENTERING A WATERCOURSE.
-----------------	---

Section 07: HANDLING AND STORAGE

STORAGE NEEDS.....	KEEP AWAY FROM HEAT, SPARKS, AND OPEN FLAMES.
ENGINEERING CONTROLS.....	VENTILATION - LOCAL (MECHANICAL IF USED INDOORS ON A CONTINUOUS BASIS).
HANDLING PROCEDURES AND EQUIPMENT.....	STORE IN A COOL, WELL VENTILATED AREA NOT TO EXCEED 50 DEG C.
SYNERGISTIC MATERIALS.....	NONE KNOWN.

Section 08: EXPOSURE CONTROLS/PERSONAL PROTECTION

GLOVES/ TYPE.....	WEAR CHEMICAL RESISTANT GLOVES.
RESPIRATORY/TYPE.....	IF USED INDOORS ON A CONTINUOUS BASIS, USE OF A CARTRIDGE TYPE RESPIRATOR (NIOSH/MSHATC 23C OR EQUIVALENT) IS RECOMMENDED.
EYE/TYPE.....	SAFETY GLASSES.
FOOTWEAR/TYPE.....	NOT NORMALLY REQUIRED.
OTHER/TYPE.....	NOT REQUIRED.

Section 09: PHYSICAL AND CHEMICAL PROPERTIES

PHYSICAL STATE.....	AEROSOL.
APPEARANCE.....	GREEN.
ODOR.....	KETONE.
ODOR THRESHOLD.....	NOT AVAILABLE.
VAPOUR PRESSURE(PSIG)-AEROSOL.....	55 - 65.
@ 20 C	
BOILING POINT (° C)(CONC).....	57-143.
EVAPORATION RATE.....	GREATER THAN 1.
n-BUTYL ACETATE = 1	
VAPOUR DENSITY (AIR=1).....	GREATER THAN 1.
(BY WEIGHT)	
SOLUBILITY IN WATER.....	NEGLIGIBLE.
pH.....	NOT APPLICABLE.
SPECIFIC GRAVITY (LIQUID).....	0.89-0.93.
COEFFICIENT OF WATER/OIL DIST.....	NOT AVAILABLE.
FREEZING POINT: (°C).....	NOT AVAILABLE.

Section 10: STABILITY AND REACTIVITY

HAZARDOUS PRODUCTS OF DECOMPOSITION.....	HYDROCARBON FUMES AND SMOKE. CARBON MONOXIDE WHERE COMBUSTION IS INCOMPLETE.
CHEMICAL STABILITY:	
YES.....	UNDER NORMAL CONDITIONS.

PRODUCT: 13004-14-021/5 025472 MOELLER GREEN ZINC CHROMATE

Section 10: STABILITY AND REACTIVITY

NO, WHICH CONDITIONS?..... NOT APPLICABLE.
 COMPATABILITY WITH OTHER SUBSTANCES:
 NO, WHICH ONES?..... STRONG OXIDIZING AGENTS.
 REACTIVITY CONDITIONS?..... NOT APPLICABLE.

Section 11: TOXICOLOGICAL INFORMATION

REPRODUCTIVE EFFECTS..... TOLUENE - PROLONGED AND REPEATED EXPOSURE OF PREGNANT ANIMALS TO TOLUENE (LEVELS GREATER THAN APPROXIMATELY 1500 ppm) HAS BEEN REPORTED TO CAUSE ADVERSE FETAL DEVELOPMENTAL EFFECTS. XYLENE - HIGH EXPOSURES TO XYLENE IN SOME ANIMAL STUDIES, OFTEN AT LEVELS TOXIC TO THE MOTHER, AFFECTED EMBRYO/FETAL DEVELOPMENT. THE SIGNIFICANCE OF THIS FINDING TO HUMANS IS NOT KNOWN.
 IRRITANCY OF MATERIAL..... SKIN/EYE IRRITANT.
 SENSITIZING CAPABILITY OF MATERIAL..... UNKNOWN.
 CARCINOGENICITY OF MATERIAL..... LEAD IS A CARCINOGEN.
 TERATOGENICITY..... NO INFORMATION IS AVAILABLE AND NO ADVERSE TERATOGENIC EFFECTS ARE ANTICIPATED.
 MUTAGENICITY..... NO INFORMATION IS AVAILABLE AND NO ADVERSE MUTAGENIC EFFECTS ARE ANTICIPATED.

Section 12: ECOLOGICAL CONSIDERATIONS

ENVIRONMENTAL..... NOT AVAILABLE.

Section 13: DISPOSAL CONSIDERATIONS

WASTE DISPOSAL..... DO NOT PUNCTURE OR INCINERATE CONTAINERS, EVEN WHEN EMPTY. DISPOSE OF IN ACCORDANCE WITH LOCAL, PROVINCIAL AND FEDERAL REGULATIONS.

Section 14: TRANSPORTATION INFORMATION

T.D.G. CLASSIFICATION..... CONSUMER COMMODITY AEROSOLS, UN1950, CLASS 2.1 .
 DOT CLASSIFICATION..... CONSUMER COMMODITY, ORM-D.

Section 15: REGULATORY INFORMATION

WHMIS CLASSIFICATION..... A,B5,D1A,D2B.
 HMIS RATING HEALTH..... 2 MODERATE HAZARD.
 HMIS RATING FLAMMABILITY..... 4 SEVERE HAZARD.
 HMIS RATING REACTIVITY..... 0 MINIMAL HAZARD.
 NFPA CODE 30B..... LEVEL 2.
 CNFC SECTION 3.3.5..... LEVEL 2.

Section 16: OTHER INFORMATION

Mid-Mountain Materials

THE FINAL BARRIER AGAINST ABRASION, HEAT, CHEMICALS AND CORROSION

SILTEX® 18 AMORPHOUS SILICA TEXTILES

SILTEX® is a family of high performance textile fabrics comprised of high purity, high strength amorphous silica fibers that are woven into a strong, flexible fabric designed for use where severe temperature conditions exist.

SILTEX® 18 is manufactured to a finished weight of 18 ounces per square yard. Its unique properties make it well suited for protection of personnel and equipment against moderate welding splatter sparks, grinding of metals, etc. SILTEX® 18 is also excellent for use in engineered thermal insulation systems designed for severe temperatures, such as Turbine Covers, Exhaust Silencer Covers, etc.

The amorphous silica fibers that make up all SILTEX® products are unaffected by most chemicals, except strong alkalis, hydrofluoric acid or sodium. All SILTEX® fabrics are available in standard "C" and pre-shrunk (fired) versions, and are available with several coating/treatment options that enhance certain properties of the product in order to meet required performance characteristics.

AVERAGE PHYSICAL PROPERTIES

> Material	Amorphous Silica 96 - 99%	> Tolerance, % stated	+/- 10 unless otherwise specified
> Construction	Woven fabric, 8 harness satin weave	> Break Strength, lb, nom, warp x fill	>200 x 150 (1"x4")
> Use Limit, intermittent	2300°F • 1260°C	> Width in. standard	36
> Use Limit, continuous	1800°F • 980°C	> Linear Shrinkage, % 30 minutes	<3 @ 1300°F • 700°C
> Melting Point	3100°F • 1700°C		8-12 @ 1800°F • 700°C
> Weight, oz/sy	17.5	> Packaging	50 ly per roll
> Thickness, inches, nom028		300 ly per master roll

AVAILABLE FORMS:

SILTEX® 18C – Standard product caramelized and includes a light coating to aid in handling, abrasion resistance and fabrication.

SILTEX® 18U – Uncoated, available caramelized as well as loom-state white

SILTEX® 18C – Pre-shrunk, available fired to 1800°F • 980°C, white

The technical data presented herein are indicative of representative properties and are intended as a specification guide only. No warranties are expressed or implied as application conditions are beyond our control.

MATERIAL SAFETY DATA SHEET

DATE PREPARED:
REVISED MAY 3, 2001

IDENTITY (AS USED ON LABEL AND LIST): **N-109A H.D. CLEANER / DEGREASER
SAFE-FIREPROOF BIODEGRADABLE**

SECTION I

MANUFACTURER'S NAME: **EMERGENCY TELEPHONE NUMBER:**
NAR ENTERPRISES, INC. (253)478-9401 OR 1-888-474-5699

ADDRESS: 5202 SOUTH PROCTOR STREET, BLDG. A
TACOMA, WASHINGTON 98409

SECTION II - HAZARDOUS INGREDIENTS/IDENTITY INFORMATION

HAZARDOUS COMPONENTS CHEMICAL NAME:	OSHA PEL	ACGIH TLV	OTHER LIMITS	PERCENT
ETHYLENE GLYCOL MONOBUTYL ETHER (CAS #111-76-2)	25 PPM (SKIN)	25 PPM (SKIN)	NONE	6%
SODIUM METASILICATE (CAS #8834-92-0)	2MG/M3 CEILING	2MG/M3 CEILING	NONE	7%

NO OTHER INGREDIENTS CONSIDERED HAZARDOUS.

SECTION III - PHYSICAL/CHEMICAL CHARACTERISTICS

BOILING POINT: APPROXIMATELY 212F. SPECIFIC GRAVITY: APPROXIMATELY .98
VAPOR PRESSURE (MM HG): NOT APPLICABLE pH CONCENTRATE: APPROX. 12.5
VAPOR DENSITY (AIR=1): LESS THAN EVAPORATION RATE(BUTYL ACETATE=1):
SLOWER
SOLUBILITY IN WATER: COMPLETELY SOLUBLE
APPEARANCE AND ODOR: CLEAR, PINK LIQUID WITH SLIGHT ODOR.

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT: NON-COMBUSTIBLE FLAMMABLE LIMITS: N/A LEL: N/A UEL: N/A
EXTINGUISHING MEDIA: THIS PRODUCT IS NOT COMBUSTIBLE. WATER SPRAY, FOAM,
CARBON DIOXIDE, OR DRY CHEMICAL MAY BE USED.
SPECIAL FIRE FIGHTING PROCEDURES: WEAR FULL PROTECTIVE CLOTHING IF NECESSARY.
UNUSUAL FIRE AND EXPLOSION HAZARDS: NOT APPLICABLE

SECTION V - REACTIVITY DATA

STABILITY: STABLE HAZARDOUS POLYMERIZATION: WILL NOT OCCUR
CONDITIONS TO AVOID INSTABILITY: NOT APPLICABLE
MATERIALS AND CONDITIONS TO AVOID INCOMPATIBILITY: CONCENTRATED ACIDS
HAZARDOUS DECOMPOSITION PRODUCTS: BIODEGRADABLE

SECTION VI - HEALTH HAZARD DATA

ROUTE(S) OF ENTRY:	INHALATION?	SKIN?	INGESTION?
	PROLONGED USE	YES	YES

HEALTH HAZARDS (ACUTE AND CHRONIC): INHALATION: MAY BE IRRITATING TO NOSE AND THROAT. SKIN: CAN PRODUCE SEVERE BURNS ON CONTINUED CONTACT. EYES: CAN CAUSE SEVERE BURNS THAT RESULT IN DAMAGE TO THE EYES IF NOT TREATED. INGESTION: CAN CAUSE SEVERE BURNS TO MUCOUS MEMBRANES OF THE MOUTH, THROAT, AND STOMACH.
SKIN ABSORPTION: EXCESSIVE EXPOSURE MAY CAUSE HEMOLYSIS, THEREBY IMPAIRING THE BLOOD'S ABILITY TO TRANSPORT OXYGEN.

CARCINOGENICITY: NTP? NO IARC MONOGRAPHS? NO OSHA REGULATED? NO

SIGNS AND SYMPTOMS OF EXPOSURE: INHALATION: MAY CAUSE COUGHING, SNEEZING, OR OTHER SYMPTOMS. EYES: PAIN, REDNESS. SKIN: ITCHING OR BURNING. INGESTION: BURNING OF THROAT, MOUTH, STOMACH, ETC.
MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: NONE KNOWN
EMERGENCY AND FIRST AID PROCEDURES: INHALATION: REMOVE VICTIM TO FRESH AIR. EYES: FLUSH WITH WATER FOR 15 MINUTES. SKIN: FLUSH THOROUGHLY WITH COOL WATER. INGESTION: DO NOT INDUCE VOMITING. SEEK MEDICAL ATTENTION IMMEDIATELY.

SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: WEAR ALL PROTECTIVE EQUIPMENT WHEN HANDLING LARGE SPILLS. MOP, PUMP, OR VACUUM INTO SUITABLE CONTAINERS. DRY MOP OR USE ABSORBENT TO REMOVE FINAL TRACES.
WASTE DISPOSAL METHOD: DISPOSE OF ACCORDING TO FEDERAL, STATE, AND LOCAL HEALTH ENVIRONMENTAL REGULATIONS.
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: WEAR PROTECTIVE EQUIPMENT WHEN HANDLING. KEEP CONTAINERS CLOSED WHEN NOT IN USE. DO NOT GET INTO EYES. STORE IN A COOL PLACE AND KEEP FROM FREEZING.
OTHER PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN.

SECTION VIII - CONTROL MEASURES

RESPIRATORY PROTECTION: WHEN PROTECTION IS REQUIRED FOR CERTAIN OPERATIONS, USE AN APPROVED AIR-PURIFYING RESPIRATOR.
VENTILATION: LOCAL EXHAUST IS REQUIRED WHERE MIST MAY BE GENERATED.
PROTECTIVE GLOVES: RUBBER GLOVES ARE RECOMMENDED.
EYE PROTECTION: CHEMICAL GOGGLES ARE RECOMMENDED.
OTHER PROTECTIVE CLOTHING OR EQUIPMENT: IMPERVIOUS PROTECTIVE CLOTHING IS RECOMMENDED. SAFETY SHOWER AND EYEWASH SHOULD BE AVAILABLE.
WORKHYGIENIC PRACTICES: WASH THOROUGHLY AFTER HANDLING. DO NOT GET INTO EYES, ON SKIN, ON CLOTHING. DO NOT TAKE INTERNALLY.

**** END OF M.S.D.S. ****

MATERIAL SAFETY DATA SHEET

Required under USDL Safety and Health Regulations for Ship Repairing,
Shipbuilding, and Shipbreaking (29 CFR 1915, 1916, 1917)

SECTION I

MANUFACTURER'S NAME National Engineering Products, Inc.		EMERGENCY TELEPHONE NO. 202-526-6274
ADDRESS (Number, Street, City, State, and ZIP Code) 1950 Capitol Avenue N.E., Washington, D.C. 20002		
CHEMICAL NAME AND SYNONYMS polymeric material	TRADE NAME AND SYNONYMS Copaltite	
CHEMICAL FAMILY	FORMULA	

SECTION II - HAZARDOUS INGREDIENTS

PAINTS, PRESERVATIVES, & SOLVENTS	%	TLV (Units)	ALLOYS AND METALLIC COATINGS	%	TLV (Units)
PIGMENTS			BASE METAL		
CATALYST			ALLOYS		
VEHICLE		200 ppm	METALLIC COATINGS		
SOLVENTS methanol (MeOH)	15	(skin)	FILLER METAL PLUS COATING OR CORE FLUX		
ADDITIVES clay	10	-	OTHERS		
OTHERS graphite	10	-			
HAZARDOUS MIXTURES OF OTHER LIQUIDS, SOLIDS, OR GASES				%	TLV (Units)

SECTION III - PHYSICAL DATA

BOILING POINT (°F.) (MeOH) 64.7 C.	760 mm Hg	SPECIFIC GRAVITY (H ₂ O=1)	1.04
VAPOR PRESSURE (mm Hg.) (MeOH) 97 mm Hg/20		PERCENT VOLATILE BY VOLUME (%)	15
VAPOR DENSITY (AIR=1) (MeOH)	1.11	EVAPORATION RATE (Bu acetate) (MeOH)	6.1
SOLUBILITY IN WATER % by Weight	10	Flash Point 190°F TOC	
APPEARANCE AND ODOR high viscosity dark liquid with sharp odor			

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT (Method used) 85 C. TOC	FLAMMABLE LIMITS (MeOH)	Lel	Uel
		6.7	36
EXTINGUISHING MEDIA Use CO ₂ or dry chemicals for small fires, foam or water fog for la. fires.			
SPECIAL FIRE FIGHTING PROCEDURES Self-contained breathing apparatus & protective clothing should be worn.			
UNUSUAL FIRE AND EXPLOSION HAZARDS none			

SECTION V - HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE

EFFECTS OF OVEREXPOSURE

No problems expected from vapors. Prolonged or repeated skin contact may cause sensitization & skin rash.*

EMERGENCY AND FIRST AID PROCEDURES

In case of contact, wash skin with soap & water. Flush eyes with plenty of water.

SECTION VI - REACTIVITY DATA

STABILITY

UNSTABLE

STABLE

X

CONDITIONS TO AVOID

temperatures greater than 100 C. during shipping or storage

INCOMPATIBILITY (Materials to avoid)

Alkali metals, conc. nitric & sulfuric acids, acyl halides, aldehydes,

HAZARDOUS DECOMPOSITION PRODUCTS

CO, CO₂ & toxic cresol vapors & halogens.*

HAZARDOUS POLYMERIZATION

MAY OCCUR

WILL NOT OCCUR

X

CONDITIONS TO AVOID
none

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Eliminate all sources of ignition. Wear suitable protective clothing. Collect in a flammable waste container for disposal.

WASTE DISPOSAL METHOD

Incinerate in a furnace where permitted under appropriate Federal, State, & local regulations.

SECTION VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION (Specify type)
none

VENTILATION

LOCAL EXHAUST

may be needed in a confined area

MECHANICAL (General)

SPECIAL

OTHER

PROTECTIVE GLOVES

plastic

EYE PROTECTION

monogoggles

OTHER PROTECTIVE EQUIPMENT

eye bath & safety shower

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.

OTHER PRECAUTIONS

*in uncured state

* SUBJECT TO REPORTING REQUIREMENT OF SECTION 313 OF TITLE III OF SARA (40 CFR PART 372).

- 1) This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990.
- 2) The above ACGIH exposure limit is for Trimethylbenzene isomers CAS# 25551-13-7.
- 3) This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990.
- 4) This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990.

The recommended permissible exposure limits (PEL) indicated above reflect the levels adopted by OSHA in 1989. Although, some of the 1989 levels have since been vacated, the Nazdar Company recommends that the lower exposure levels be observed as reasonable worker protection.

SECTION 3 -- HAZARDOUS IDENTIFICATION

GENERAL HEALTH EFFECTS

THE FOLLOWING INFORMATION HAS BEEN DEVELOPED BASED UPON USING THE PRODUCT AS INTENDED BY THE MANUFACTURER. The potential health effects of this product are based on the hazards of its components. The use of this product in combination with other products may produce synergistic (additive) health effects. Cautionary labeling and material safety data sheets of all materials used with this product should be reviewed before use.

EYES

Eye contact with liquid, vapors or mists may cause moderate to severe irritation, including burning, tearing, redness or swelling and reversible eye damage.

SKIN

Skin contact may cause irritation. Repeated or prolonged overexposure may cause skin irritation or dermatitis. Symptoms may include dryness, chapping and redness. Toxic and may be harmful if absorbed through the skin.

INHALATION

Inhalation may cause respiratory tract irritation. Symptoms may include central nervous system disorders such as headaches, dizziness, weakness and fatigue.

INGESTION

Ingestion may cause gastrointestinal tract irritation. Symptoms may include abdominal pain, nausea, vomiting and diarrhea. Symptoms may include nervous system depression including drowsiness or unconsciousness. Ingestion may cause vomiting. Aspiration of material into lungs may cause chemical pneumonitis which can be fatal.

CHRONIC EFFECTS/TARGET ORGANS

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Ethylbenzene is possibly carcinogenic to humans (IARC Group 2B).

ANIMAL STUDIES

Diacetone alcohol has been found to cause kidney and liver injury and blood disorders in lab animals. Isophorone is a suspect carcinogen in lab animals. Xylene causes harm to the fetus in lab animal studies. The relevance of these findings to humans is uncertain. Repeated and prolonged overexposure to high concentrations of xylene has been suggested to cause the following effects in laboratory animals; hearing loss, mild reversible liver effects, kidney, lung, heart, spleen and nervous system effects. For animal studies, reference TSCA Section 4 Test Rule Results or contact the manufacturer for further details.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Pregnant women and persons with pre-existing health disorders should consult their physician before using this product. Repeated and prolonged overexposure and/or individual sensitivity may increase the potential for and degree of adverse health effects. See Section 3 "Hazards Identification" for effects of certain hazardous ingredients.

ROUTES OF EXPOSURE

Primary exposure routes: Inhalation-Dermal (Contact/Absorption)-Ingestion

SECTION 4 -- FIRST AID MEASURES

EYES

After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. If irritation persists have eyes examined and tested by medical personnel.

SKIN

In case of contact, immediately wash skin with a mild soap and plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Cool water is initially suggested to prevent the pores of the skin from opening. This will minimize both the area and time of skin contact. Lukewarm water may then be used to ensure all contaminants are removed. Skin should be monitored for reddening or chemical burns. Mild soap is suggested to help prevent abrading the skin or rubbing the chemicals into pores during cleansing. Get medical attention if irritation persists or significant contact has occurred. Thoroughly wash (or discard) clothing and shoes before reuse.

INHALATION

Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention if breathing difficulty is experienced.

INGESTION

If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

OTHER COMMENTS

No Data Available

SECTION 5 -- FIRE FIGHTING MEASURES

FLASH POINT

115 Degrees Fahrenheit (SETA Flash)

OSHA FLAMMABILITY CLASSIFICATION (NFPA)

Class II Combustible Liquid

LEL - LOWER EXPLOSIVE LIMIT / UEL - UPPER EXPLOSIVE LIMIT

0.8% volume in air / No Data Available

EXTINGUISHING MEDIA

Foam-CO2-Dry Chemical-Water Spray

FLAME AND EXPLOSION HAZARDS

Isolate from heat, electrical equipment, sparks, and open flame. Keep containers tightly closed. Vapors may be heavier than air and can travel to a source of ignition then flash back. Closed containers may explode when exposed to extreme heat.

FIRE FIGHTING EQUIPMENT

Full protective equipment including self-contained breathing apparatus (SCBA) is recommended to protect firefighters.

SPECIAL FIRE FIGHTING PROCEDURES

Water may be ineffective but may be used to cool containers. Fumes released on burning may be toxic and dangerous.

SECTION 6 -- ACCIDENTAL RELEASE MEASURES

RELEASE MANAGEMENT MEASURES

Remove all sources of ignition (flames, hot surfaces and electrical, static or frictional sparks). Avoid contact or breathing vapors. Ventilate area. Contain release and remove with inert absorbent. Use non-sparking tools to place material in appropriate container for disposal. Isolate the hazard area and deny entry to unnecessary and unprotected personnel. The National Response Center (800-424-8802) and local authorities should be contacted for any reportable spill/release.

SECTION 7 -- HANDLING AND STORAGE

HANDLING AND STORAGE METHODS

Use in a well ventilated area. Follow all MSDS/label precautions even after container is emptied; container may retain product residues. Store in closed containers in cool, dry, well ventilated area away from sources of ignition. Keep containers closed when not in use. Smoke in designated areas only. Avoid prolonged or repeated overexposure to this product. Keep out of reach of children. Follow label directions carefully. Do not take internally. Harmful or fatal if swallowed.

SECTION 8 -- EXPOSURE CONTROLS, PERSONAL PROTECTION

RESPIRATORY PROTECTION

If concentrations of hazardous ingredients exceed exposure limits listed in Section 2 an appropriate NIOSH (National Institute for Occupational Safety and Health) approved respirator with an organic vapor cartridge should be used. If material is handled under mist, spray or dust forming conditions, a P100 (99.97% efficiency) filter should be used in addition to the organic vapor cartridge. Protection provided by air-purifying respirators is limited. If no exposure limits are listed in Section 2, follow general safety guidelines in 29 CFR 1910.134 Respiratory Protection or other applicable respiratory standard.

SKIN PROTECTION

Use neoprene, nitrile or other gloves resistant to chemicals listed in Section 2. Contact a reputable safety supply company for appropriate gloves. Solvent resistant aprons are recommended. Prevent prolonged skin contact with contaminated clothing.

EYE PROTECTION

Use ANSI (American National Standards Institute) approved safety glasses, faceshield or splash proof goggles to prevent eye contact. Contact a reputable safety supply company for appropriate eye protection. The availability of an eye wash is highly recommended.

EXPOSURE GUIDELINES

See Section 2 "Composition, Information on Ingredients" for occupational exposure limits.

HYGIENIC PRACTICES

Wash with soap and water before eating, smoking or using toilet facilities. Separately wash or discard clothing and footwear before reuse. NEVER try to remove product from the skin by using solvent or thinner. Such action is likely to increase the possibility of undesirable effects. Remove contaminated clothing to prevent prolonged skin contact.

ENGINEERING CONTROLS

Use applicable engineering controls, work practices and personal protective equipment to ensure all concentrations are kept below the exposure limits listed in Section 2. Adequate controls should be implemented to ensure employee safety from fine mists which may be produced under some printing conditions.

OTHER PROTECTION

No Data Available

SECTION 9 -- PHYSICAL AND CHEMICAL PROPERTIES

**

APPEARANCE:

Thin liquid

ODOR:

Characteristic

PHYSICAL STATE:

Liquid

pH
Not applicable

VAPOR PRESSURE
See Section 2 for individual ingredients.

VAPOR DENSITY
Heavier than air

BOILING POINT
Greater than 300 degrees Fahrenheit

FREEZING POINT
Not available

SOLUBILITY IN WATER
Not tested

EVAPORATION RATE
Slower than ether

PERCENT VOLATILE BY VOLUME: 100.00 %

WEIGHT PER GALLON: 7.51 lbs/gal

VOC: 901.37 g/L
7.51 lb/gal

PHOTOCHEMICALLY REACTIVE
Yes

Percent volatile = Percent VOC

SECTION 10 -- STABILITY AND REACTIVITY

CHEMICAL STABILITY
Stable

CONDITIONS TO AVOID
Avoid excessive heat, ignition sources, sparks and open flame.

INCOMPATIBILITY WITH OTHER MATERIALS
Strong acids/bases, oxidizing/reducing agents and reactive chemicals.

HAZARDOUS DECOMPOSITION PRODUCTS
May produce hazardous fumes when heated to decomposition e.g. carbon monoxide, carbon dioxide and other noxious gases.

HAZARDOUS POLYMERIZATION
Not anticipated during normal printing and storage conditions.

SECTION 11 -- TOXICOLOGICAL INFORMATION

EXPERIMENTAL TOXICITY DATA
Refer to Section 3 Hazards Identification for additional toxicological data. Experimental toxicity data on diacetone alcohol has given the following results: Intraperitoneal LD50 Mouse; 933 mg/kg. Oral LD50 Rat; 4 g/kg; Dermal LD50 Rabbit; 13.6 g/kg. Experimental toxicity data on xylene has given the following results: Oral LD50 Rat; 4300 mg/kg; Inhalation LC50 Rat; 6700 ppm.

SECTION 12 -- ECOLOGICAL INFORMATION

ECOTOXICITY
Because this product may be a mixture of chemicals, some of which may be ecologically toxic, it is strongly suggested that it not be disposed of into the environment, i.e. soil, water courses, lakes, landfills, sewers, etc.

ENVIRONMENTAL FATE
No Data Available

SECTION 13 -- DISPOSAL CONSIDERATIONS

DISPOSAL METHODS

This product is considered hazardous for disposal purposes by the U.S. Environmental Protection Agency Resource Conservation and Recovery Act (RCRA). Contact Nazdar's Regulatory Compliance Department or refer to the regulations located in 40 CFR Part 261 for additional waste disposal information, including appropriate hazardous waste codes. It is the responsibility of the user to determine if local, county, state, or provincial regulations may also apply to the disposal of this product and/or container. Empty containers may retain hazardous properties and should be disposed of in an environmentally safe manner in accordance with applicable regulations.

SECTION 14 -- TRANSPORT INFORMATION

TRANSPORT INFORMATION

DOT Proper Shipping Description: Printing Ink Related Material, 3, UN1210, PG III. In the U.S. and Canada, this material may be reclassified as a combustible liquid and is not regulated, via surface transportation, in containers less than 119 gallons or 450 liters [per 49 CFR 173.150(f)] [per Transportation of Dangerous Goods Regulations/Clear Language Part 1.33]. Questions concerning transportation requirements should be directed to Nazdar's Regulatory Compliance Department 913-422-1735.

SECTION 15 -- REGULATORY INFORMATION

SARA TITLE III 313 INFORMATION

See Section 2 "Composition, Information on Ingredients" for applicable chemicals.

TOXIC SUBSTANCES CONTROL ACT STATUS

All ingredients in Section 2 are listed on the U.S. Environmental Protection Agency's Toxic Substances Control Act (TSCA) Inventory and the Canadian Domestic Substance List.

OTHER REGULATORY INFORMATION

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA) - MSDS is compliant with Occupational Safety and Health Administration Hazard Communication Standard - 29 CFR 1910.1200. AMERICAN NATIONAL STANDARDS INSTITUTE - This MSDS follows the ANSI Z400.1-1998 format. WORKPLACE HAZARDOUS MATERIAL INFORMATION SYSTEM (WHMIS) - This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

WHMIS CLASSIFICATION (CANADA):

B3 Combustible Liquids; D2A Materials causing other toxic effects, very toxic material; D2B Materials causing other toxic effects, toxic material;

SECTION 16 -- OTHER INFORMATION

DISCLOSURE

The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind express or implied is made with respect to the information contained herein. The data in this MSDS relates only to the specific material designated herein and does not apply to use in combination with any other material or process.

DEFINITIONS

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association

CEILING: (TLV-Ceiling and PEL Ceiling Limit) The ceiling exposure limit or concentration not to be exceeded for even brief times.

DOT: Department of Transportation

HMIS: The Hazardous Materials Identification System (HMIS) developed by the National Paint and Coatings Association (NPCA) to provide information on the acute health hazards, reactivity and flammability of products encountered in the workplace at room temperatures.

HMIS codes assigned for this product are only suggested ratings based on anticipated normal screen printing applications. The employer has the ultimate responsibility for assigning these ratings and should fully evaluate the MSDS, work practices and environmental conditions prior to assigning the appropriate ratings.

HMIS rating involves data interpretations that may vary from company to company.

HMIS Personal Protection Index of "X-Ask your supervisor" is given on this MSDS due to varying work conditions which may dictate different levels of protection. Please review this MSDS before determining appropriate protective equipment and beginning work.

IARC: International Agency for Research on Cancer

NFPA: National Fire Protection Association

NTP: National Toxicology Program

STEL: Short-Term Exposure Limit: ACGIH terminology for the short-term exposure limit or maximum concentration for a continuous exposure period of 15 minutes.

TLV: Threshold Limit Value. A term ACGIH uses to express the airborne concentration of a material to which most workers can be exposed during a normal daily and weekly work schedule without adverse effects.

TWA: Time-Weighted Average

VOC: Volatile Organic Compound

MATERIAL SAFETY DATA SHEET

LEAD ACID BATTERY

I. PRODUCT IDENTIFICATION:

- A. Chemical/Trade Name (per on label): **Lead Acid Battery**
- B. Chemical Family/Classification: Electrical Storage Battery
- C. Manufacturer's Name & Address: NorthStar Battery Co. LLC
4000 Continental Way
Springfield, MO 65803
- D. Contact: U.S. - NSB Safety and Health Department
Phone: (417) 575-8219
Fax: (417) 575-8250
Aust. NorthStar Battery Pty Ltd
Phone: 02 9888 1998
- E. Emergency Information: Chemtrec (US, Canada & Mexico)
Phone: (800) 424-9300
Chemtrec (Outside US, Canada & Mexico)
Phone: +1 (703) 527-3887 (call collect)
- F. Non-Hazardous Classification
Per US DOT, Northstar Battery Company products, submitted and tested by Wyle Labs, have been deemed to meet all requirements as specified in 49CFR§ 173.159 (d) for **exception** as hazardous material classification.

II. HAZARDOUS INGREDIENTS/IDENTITY INFORMATION:

NORTH AMERICAN INFORMATION			Air Exposure Limits (ug/m ³)		
Materials	% by Wt.	CAS Number	OSHA	AGGIH (TLV)	NIOSH
Lead	57	7439-92-1	50	150	100
Lead Oxide	22	1309-60-0	50	150	100
Electrolyte (Sulfuric Acid) 1.400 sg	14	7664-93-9	1	1	1

AUSTRALIAN INFORMATION			
Chemical or Material	Australian Dangerous Goods Classification	Hazardous Substance Classification as per NOHSC Australia	Australian Poison Schedule Classification
Non-Spillable Lead Acid Battery	Exempt under A67 (NATA Identification Guide) and Clause 238 of the Australian Dangerous Goods Code, Appendix 3	R34/R41	Schedule 6 Agricultural, Domestic and Industrial Substances

Note: Product contains toxic chemicals that are subject to the reporting requirements of Section 302 and 313 of the Emergency Planning and Community Right-to-Know Act of 1986.

III. PHYSICAL DATA:

Material is solid at normal temperatures.

- A. Electrolyte:
1. Specific Gravity: 1.250 – 1.350 kg/dm³

MATERIAL SAFETY DATA SHEET

LEAD ACID BATTERY

- | | | |
|----|------------------------|----------------|
| 2. | Boiling Point: | 110°C (230°F) |
| 3. | % Volatiles By Weight: | Not Applicable |
| 4. | Solubility in Water: | 100% |
| 5. | Melting Point Lead: | 327°C (621°F) |
| 6. | Vapor Density | Not Determined |

B. Appearance and Odor

1. Electrolyte is a clear liquid with an acidic odor.

IV. HEALTH HAZARD INFORMATION:

Under normal operating conditions, because the battery is "non-spillable", the internal material will not be hazardous to your health. Only internally exposed material during production or case breakage or extreme heat (fire) may be hazardous to your health.

A. Routes of Entry:

1. Inhalation: Acid mist from formation process may cause respiratory irritation.
2. Skin Contact: Acid may cause irritation, burns and/or ulceration.
3. Skin Absorption Not a significant route of entry.
4. Eye Contact: Acid may cause sever irritation, burns, cornea damage and/or blindness.
5. Ingestion: Acid may cause irritation of mouth, throat, esophagus and stomach.

B. Signs and Symptoms of Over Exposure:

1. Acute Effects: Over exposure to lead may lead to loss of appetite, constipation, sleeplessness and fatigue. Over exposure to acid may lead to skin irritation, corneal damage of the eyes and upper respiratory system.
2. Chronic Effects: Lead and its components may cause damage to kidneys and nervous system. Acid and its components may cause lung damage and pulmonary conditions.
3. Potential to Cause Cancer: The International Agency for Research on Cancer has classified "strong inorganic acid mist containing sulfuric acid" as a Category 1 carcinogen, a substance that is carcinogenic to humans. This classification does not apply to liquid forms of sulfuric acid or sulfuric acid solutions contained within a battery. Inorganic acid mist is not generated under normal use of this product. Misuse of the product, such as overcharging, may however result in the generation of sulfuric acid mist.

C. Emergency and First Aid Procedures:

1. Inhalation: Remove from exposure, move to fresh air, and apply oxygen if breathing is difficult. Consult physician immediately.
2. Skin: Wash with plenty of soap and water for at least 15 minutes. Remove any contaminated clothing. Consult physician if skin irritation appears.
3. Eyes: Flush with plenty of water immediately for at least 15 minutes, lifting lower

MATERIAL SAFETY DATA SHEET

LEAD ACID BATTERY

and upper eyelids occasionally. Consult a physician immediately.

4. Ingestion: Do not induce vomiting. Give large quantities of water. Never give anything by mouth to an unconscious person. Consult a physician immediately.

D. HANDLING AND STORAGE

1. Safe Storage: Store in a cool, dry place in closed containers. Keep away from ignition sources and high temperatures.
 1. Contact NorthStar Battery Company (417-575-8200) for shelf life information.
2. Handling: Avoid skin or eye contact. Avoid breathing vapors. Do not use near sources of ignition

- V. CARCINOGENICITY: See section IV, Part B "Signs and Symptoms of Over Exposure"
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: See section IV, Part B "Signs and Symptoms of Over Exposure"

VI. FIRE AND EXPLOSION HAZARD DATA:

- A. Flash Point: Hydrogen = 259°C
- B. Auto ignition Temperature: Hydrogen = 580°C
- C. Extinguishing Media: Dry chemical, foam, CO₂
- D. Unusual Fire and Explosion Hazards: Hydrogen and oxygen gases are produced in the cells during normal battery operation (hydrogen is flammable and oxygen supports combustion). These gases enter the air through the vent caps. To avoid the chance of a fire or explosion, keep sparks and other sources of ignition away from the battery.
- E. Firefighting PPE: Full protective clothing and
NIOSH-approved self-contained breathing apparatus with full facepiece

VII. REACTIVITY DATA:

- A. Stability: Stable
- B. Conditions to Avoid: Sparks and other sources of ignition.
- C. Incompatibility: (materials to avoid)
 1. Lead/lead compounds: Potassium, carbides, sulfides, peroxides, phosphorus, sulfur.
 2. Battery electrolyte (acid): Combustible materials, strong reducing agents, most metals, carbides, organic materials, chlorates, nitrates, picrates, and fulminates.
- D. Hazardous Decomposition Products:
 1. Lead/lead compounds: Oxides of lead and sulfur.

MATERIAL SAFETY DATA SHEET

LEAD ACID BATTERY

2. Battery electrolyte (acid): Hydrogen, sulfur dioxide, and sulfur trioxide.

E. Conditions to Avoid:

High temperature. Battery electrolyte (acid) will react with water to produce heat. Can react with oxidizing or reducing agents.

VIII. CONTROL MEASURES:

A. Engineering Controls:

Store lead/acid batteries with adequate ventilation. Room ventilation is required for batteries utilized for standby power generation. Never recharge batteries in an unventilated, enclosed space.

B. Work Practices:

Do not remove vent covers. Follow shipping and handling instructions which are applicable to the battery type. To avoid damage to terminals and seals, do not double-stack industrial batteries.

C. Personal Protective Equipment:

1. Respiratory Protection: None required under normal handling conditions. During battery formation (high-rate charge condition), acid mist can be generated which may cause respiratory irritation. Also, if acid spillage occurs in a confined space, exposure may occur. If irritation occurs, wear a respirator suitable for protection against acid mist.
2. Eyes and Face: Chemical splash goggles are preferred. Also acceptable are "visor-gogs" or a chemical face shield worn over safety glasses.
3. Hands, Arms, Body: Vinyl coated, VC, gauntlet type gloves with rough finish are preferred.
4. Other Special Clothing and Equipment: Safety shoes are recommended when handling batteries. All footwear must meet requirements of ANSI Z41.1 -Rev. 1972.

IX. ACCIDENTAL RELEASE MEASURES:

- A. Not applicable under normal conditions.
- B. In case of damage resulting in breakage of the battery container, see VIII, Sec. C Personal Protective Equipment.

X. PRECAUTIONS FOR SAFE HANDLING AND USE:

- A. Hygiene Practices: Following contact with internal battery components, wash hands thoroughly before eating, drinking, or smoking.
- B. Respiratory Protection: Wear safety glasses. Do not permit flames or sparks in the vicinity of battery(s). If battery electrolyte (acid) comes in contact with clothing, discard clothing.

MATERIAL SAFETY DATA SHEET

LEAD ACID BATTERY

C. Protective Measures:

1. Remove combustible materials and all sources of ignition. Cover spills with soda ash (sodium carbonate) or quicklime (calcium oxide). Mix well. Make certain mixture is neutral, then collect residue and place in a drum or other suitable container. Dispose of as hazardous waste.
2. Wear acid-resistant boots, chemical face shield, chemical splash goggles, and acid-resistant gloves. Do not release unneutralized acid.

D. Waste Disposal Method (*):

1. Battery electrolyte (acid): Neutralize as above for a spill, collect residue, and place in a drum or suitable container. Dispose of as hazardous waste.
2. Do not flush lead contaminated acid to sewer.
3. In case of accidental spill, utilize personal protective equipment, i.e., face shield, rubber apron, rubber safety shoes.
4. Batteries: Send to lead smelter for reclamation following applicable Federal, State and local regulations. Product can be recycled along with automotive (SLI) lead acid batteries.
5. Battery may be returned, shipping pre-paid, to the manufacturer or any distributor for recycling. See 1.C for manufacturer's address or visit our web site @ www.northstarbattery.com.

*In accordance to Local, State and Federal regulations and laws.

E. Other Handling and Storage Precautions: None Required.

XI. ECOLOGICAL INFORMATION:

Lead and its compounds can pose a threat if released to the environment. See Waste Disposal Method in Section X, Part D.

XII. NFPA HAZARD RATING: SULFURIC ACID:

Flammability (Red)	=	0
Health (Blue)	=	3
Reactivity (Yellow)	=	1

MATERIAL SAFETY DATA SHEET

LEAD ACID BATTERY

XIII. DEPARTMENT OF TRANSPORTATION AND INTERNATIONAL SHIPPING REGULATIONS:

Proper Shipping Name	UN2800 - Battery, wet, non-spillable (electric storage)
IATA	Batteries must be packed to protect against short circuits and firmly secured to skids or pallets. Packaging instruction 806 Not restricted per special provision A67.
US DOT	Northstar Battery Company products, submitted and tested by Wyle Labs, have been deemed to meet all requirements as specified in 49CFR§ 173.159 (d) for exception as hazardous material classification.
IMDG	Northstar Battery Company products, submitted and tested by Wyle Labs, have been deemed to meet all requirements as specified in special provision 238 for determination of "Non-Spillable" and are not subject to the provision of this Code.

SECTION 5 REGULATED IDENTIFICATION

DOT PROPER SHIPPING NAME	N/A
DOT HAZARD CLASS	N/A
SHIPPING ID NUMBER	N/A
EPA HAZARDOUS WASTE ID NUMBER	D-002
EPA HAZARD WASTE CLASS	Corrosive

SECTION 6 EFFECTS OF EXPOSURE

ENTRY ROUTE	INHALE - YES INGEST - YES SKIN - YES EYE - YES
GENERAL	Zinc Chloride is corrosive to all body tissues and can cause severe burns.
INHALATION	If heated, fumes may produce respiratory irritation, fever, chills, muscular pain, vomiting and sweating.

SKIN	Contact may cause irritation, burns or dermatitis.
EYE	May cause irritation, burns or corneal damage.
INGESTION	May cause burns of mouth and throat, vomiting, diarrhea, strictures, kidney disease, shock or death.
TARGET ORGANS	Eye, Skin, Kidney, Lung, Liver, Central Nervous System

SECTION 7 EMERGENCY AND FIRST AID PROCEDURES - 303/623-5716 COLLECT

SKIN	If irritation arises, wash thoroughly with soap and water. Seek medical attention if irritation persists.
EYES	If fumes cause irritation, move to fresh air and irrigate eyes with water for 15 minutes. If irritation persists, seek medical attention.
INHALATION	Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Keep victim quiet and warm. Call a poison control center or physician immediately.
INGESTION	Drink water. DO NOT INDUCE VOMITING and call a poison control center or physician immediately. Avoid alcoholic beverages. Never give anything by mouth to an unconscious person.

SECTION 8 PHYSICAL AND CHEMICAL PROPERTIES

NFPA HAZARD SIGNAL	HEALTH 1	STABILITY 1	FLAMMABILITY 0	SPECIAL NONE
BOILING POINT	208 Degrees F	97 Degrees C		
MELTING POINT	N/A			
VAPOR PRESSURE	N/A			
VAPOR DENSITY (AIR = 1)	N/A			
VOLATILE COMPONENTS	60-65%			
SOLUBILITY IN WATER	Very Soluble			
PH	2-3			
SPECIFIC GRAVITY	1.14			
EVAPORATION RATE	N/A			
APPEARANCE	Yellowish Liquid

SECTION 3

EMERGENCY OVERVIEW

Blue liquid with an ether-like odor. Extremely flammable liquid and vapor. Vapors may cause flash fire. May cause eye and skin irritation. Inhalation of vapors or mist may cause respiratory irritation and central nervous system effects. Swallowing may cause irritation, nausea, vomiting, diarrhea and kidney or liver disorders. Aspiration hazard. May be fatal if swallowed. Symptoms may be delayed.
NFPA Hazard Signal: Health: 2 Stability: 1 Flammability: 3 Special: None
HMIS Hazard Signal: Health: 3 Stability: 1 Flammability: 3 Special: None
OSHA Hazard Classification: Flammable, irritant, organ effects
Canadian WHIMS Classification: Class B, Division 1; Class D, Division 2, Subdivision B

SECTION 4

EMERGENCY AND FIRST AID PROCEDURES - CALL 1-303-623-5716 COLLECT

Skin: Remove contaminated clothing immediately. Wash all exposed areas with soap and water. Get medical attention if irritation develops. Remove dried cement with Oatey Plumber's Hand Cleaner or baby oil.
Eyes: If material gets into eyes or if fumes cause irritation, immediately flush eyes with water for 15 minutes. If irritation persists, seek medical attention.
Inhalation: If symptoms of exposure develop, remove to fresh air. If breathing becomes difficult, administer oxygen. Administer artificial respiration if breathing has stopped. Seek immediate medical attention.
Ingestion: **DO NOT INDUCE VOMITING.** Rinse mouth with water. Never give anything by mouth to a person who is unconscious or drowsy. Get immediate medical attention by calling a Poison Control Center, or hospital emergency room. If medical advice cannot be obtained, then take the person and product to the nearest medical emergency treatment center or hospital.

RAIN-R-SHINE PVC CEMENT

SECTION 5 FIRE FIGHTING MEASURES

Flashpoint / Method: 0 - 5 Degrees F. / PMCC
Flammability: LEL = 1.8 % Volume, UEL = 11.8 % Volume
Extinguishing Media: Use dry chemical, CO2, or foam to extinguish fire. Cool fire exposed container with water. Water may be ineffective as an extinguishing agent.
Special Fire Fighting Procedure: Firefighters should wear positive pressure self-contained breathing apparatus and full protective clothing for fires in areas where chemicals are used or stored
Unusual Fire and Explosion: Extremely flammable liquid. Keep away from heat and all sources of ignition including sparks, flames, lighted cigarettes and pilot lights. Containers may rupture or explode in the heat of a fire. Vapors are heavier than air and may travel to a remote ignition source and flash back. This product contains tetrahydrofuran that may form explosive organic peroxide when exposed to air or light or with age.
Hazardous Decomposition Products: Combustion will produce toxic and irritating vapors including carbon monoxide, carbon dioxide and hydrogen chloride.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Spill or Leak Procedures: Remove all sources of ignition and ventilate area. Stop leak if it can be done without risk. Personnel cleaning up the spill should wear appropriate personal protective equipment, including respirators if vapor concentrations are high. Soak up spill with an inert absorbent such as sand, earth or other non-combusting material. Put absorbent material in covered, labeled metal containers. Prevent liquid from entering watercourses, sewers and natural waterways. Report releases to authorities as required. See Section 12 for disposal information.

SECTION 7 HANDLING AND STORAGE

Handling: Avoid contact with eyes, skin and clothing. Avoid breathing vapors or mists. Use with adequate ventilation (equivalent to outdoors). Wash thoroughly after handling. Do not eat, drink or smoke in the work area. Keep product away from heat, sparks, flames and all other sources of ignition. No smoking in storage or use areas. Keep containers closed when not in use.
Storage: Store in a cool, dry, well-ventilated area away from incompatible materials. Keep containers closed when not in use.
Other: "Empty" containers retain product residue and can be hazardous. Follow all MSDS precautions in handling empty containers. Do not cut or weld on or near empty or full containers.

SECTION 8 ECOLOGICAL INFORMATION

This product is not expected to be toxic to aquatic organisms.
Cyclohexanone: 96 hour LC50 values for fish is over 100 mg/l.
Tetrahydrofuran: 96 hour LC50 fathead minnow: 2160 mg/L.
Methyl Ethyl Ketone: 96 hour LC50 for fish is greater than 100 mg/L.
VOC Information: This product emits VOC's (volatile organic compounds) in its use. Make sure that use of this product complies with local VOC emission regulations, where they exist.
VOC Level: 600 g/l per SCAQMD Test Method 316A.

RAIN-R-SHINE PVC CEMENT

SECTION 9

EXPOSURE CONTROLS/PERSONAL PROTECTION

Ventilation: Open doors & windows. Provide ventilation capable of maintaining emissions at the point of use below recommended exposure limits. If used in enclosed area, use exhaust fans. Exhaust fans should be explosion-proof or set up in a way that flammable concentrations of solvent vapors are not exposed to electrical fixtures or hot surfaces.

Respiratory Protection: For operations where the exposure limit may be exceeded, a NIOSH approved organic vapor respirator or supplied air respirator is recommended. Equipment selection depends on contaminant type and concentration, select in accordance with 29 CFR 1910.134 and good industrial hygiene practice. For firefighting, use self-contained breathing apparatus.

Skin Protection: Rubber gloves are suitable for normal use of the product. For long exposures product chemical resistant gloves may be required such as 4H(tm) or Silver Shield(tm) to avoid prolonged skin contact.

Eye Protection: Safety glasses with sideshields or safety goggles.

Other: Eye wash and safety shower should be available.

SECTION 10

PHYSICAL AND CHEMICAL PROPERTIES

Boiling Point: 151 Degrees F / 66 C
Melting Point: N/A
Vapor Pressure: 145 mmHg @ 20 Degrees C
Vapor Density: (Air = 1) 2.5
Volatile Components: 82-86%
Solubility In Water: Negligible
pH: N/A
Specific Gravity: 0.94 +/- 0.02
Evaporation Rate: (BUAC = 1) = 5.5 - 8.0
Appearance: Blue Liquid
Odor: Ether-Like
Will Dissolve In: Tetrahydrofuran
Material Is: Liquid

SECTION 11

STABILITY AND REACTIVITY

Stability: Stable.
Conditions To Avoid: Avoid heat, sparks, flames and other sources of ignition.
Hazardous Decomposition: Combustion will produce toxic and irritating vapors including carbon monoxide, carbon dioxide and hydrogen chloride.
Products: Oxidizing agents, alkalies, amines, ammonia, acids, chlorine compounds, chlorinated inorganics (potassium, calcium and sodium hypochlorite) and hydrogen peroxides. May attack plastic, resins and rubber.
Materials To Avoid: Will not occur.
Hazardous Polymerization: Will not occur.

SECTION 12

DISPOSAL INFORMATION

Waste Disposal: Dispose in accordance with current local, state and federal regulations.

RAIN-R-SHINE PVC CEMENT

SECTION 13

TOXICOLOGICAL INFORMATION

Inhalation: Vapors or mists may cause mucous membrane and respiratory irritation, coughing, headache, dizziness, dullness, nausea, shortness of breath and vomiting. High concentrations may cause central nervous system depression, narcosis and unconsciousness. May cause kidney, liver and lung damage.

Skin: May cause irritation with redness, itching and pain. Methyl ethyl ketone and cyclohexanone may be absorbed through the skin causing effects similar to those listed under inhalation.

Eye: Vapors may cause irritation. Direct contact may cause irritation with redness, stinging and tearing of the eyes. May cause eye damage.

Ingestion: Swallowing may cause abdominal pain, nausea, vomiting and diarrhea. Aspiration during swallowing or vomiting can cause chemical pneumonia and lung damage. May cause kidney and liver damage.

Chronic Toxicity: Prolonged or repeated overexposure cause dermatitis and damage to the kidney, liver, lungs and central nervous system.

Toxicity Data: Cyclohexanone: Oral rat LD50: 1,620 mg/kg
Inhalation rat LC50: 8,000 ppm/4 hours
Skin rabbit LD50: 1 mL/kg
Tetrahydrofuran: Oral rat LD50: 1,650 mg/kg
Inhalation rat LC50: 21,000 ppm/3 hours
Methyl Ethyl Ketone: Oral rat LD50: 2,737 mg/kg
Inhalation rat LC50: 23,500 mg/m³/8 hours
Skin rabbit LD50: 6,480 mg/kg

Sensitization: None of the components are known to cause sensitization.

Carcinogenicity: None of the components are listed as a carcinogen or suspect carcinogen by NTP, IARC or OSHA. The National Toxicology Program has reported that exposure of mice and rats to Tetrahydrofuran (THF) vapor levels up to 1800 ppm 6 hr/day, 5 days/week for their lifetime caused an increased incidence of kidney tumors in male rats and liver tumors in female mice. The significance of these findings for human health are unclear at this time, and may be related to "species specific" effects. Elevated incidences of tumors in humans have not been reported for THF.

Mutagenicity: Cyclohexanone has been positive in bacterial and mammalian assays. Tetrahydrofuran was positive in a bacterial assay. Methyl ethyl ketone is not considered genotoxic based on laboratory studies.

Reproductive Toxicity: Methyl ethyl ketone and cyclohexanone have been shown to cause embryofetal toxicity and birth defects in laboratory animals. Tetrahydrofuran has been found to cause adverse developmental effects only when exposure levels cause other toxic effects to the mother.

Medical Conditions Aggravated By Exposure: Persons with pre-existing skin, lung, kidney or liver disorders may be at increased risk from exposure to this product.

RAIN-R-SHINE PVC CEMENT

SECTION 14 TRANSPORTATION INFORMATION

DOT Less than 1 Liter (0.3 gal) Greater than 1 Liter (0.3 gal)

Proper Shipping Name: Consumer Commodity Adhesives
Hazard Class/Packing Group: ORM-D 3, PGII
UN/NA Number: None UN1133
Hazard Labels: None Flammable Liquid

IMDG

Proper Shipping Name: Adhesives Adhesives

are excepted Liquid)
from labeling)

RCRA Hazardous Waste Number: U057, U159, U213

EPA Hazardous Waste ID Number: D001, D035, F003, F005

EPA Hazard Waste Class: Ignitable Waste. Toxic Waste (Methyl Ethyl Ketone content)

2000 North American Emergency Response Guidebook Number: 127 or 128

SECTION 15

REGULATIONS

Hazard Category for Section 311/312: Acute Health, Chronic Health, Flammable

Section 302 Extremely Hazardous Substances (TPQ): This product does not contain chemicals regulated under SARA Section 302.

Section 313 Toxic Chemicals: This product contains the following chemicals subject to SARA Title III Section 313 Reporting requirements:

<u>Chemical</u>	<u>CAS #</u>	<u>%</u>
Methyl Ethyl Ketone	78-93-3	24-31%

CERCLA 103 Reportable Quantity: Spills of this product over the RQ (reportable quantity) must be reported to the National Response Center. The RQ for the product, based on the RQ for Tetrahydrofuran (55% maximum) of 1,000 lbs, is 1,818 lbs. Many states have more stringent release reporting requirements. Report spills required under federal, state and local regulations.

California Proposition 65: This product contains trace amounts of chemicals known to the State of California to cause cancer. Under normal use conditions, exposures to these chemicals at levels above the State of California "No Significant Risk Level" (NSRL) are unlikely. Oatey strongly encourages the use of proper personal protective equipment (PPE) and ventilation guidelines noted in Section 9 to minimize exposure to these chemicals.

TSCA Inventory: All of the components of this product are listed on the TSCA inventory.

SECTION 16 DISCLAIMER

The information herein has been compiled from sources believed to be reliable, up-to-date, and is accurate to the best of our knowledge. However, Oatey cannot give any guarantees regarding information from other sources, and expressly does not make warranties, nor assumes any liability for its use.

Initial Preparation Date: 2/4/03
Last Revision Date: 6/04/03

NFPA: HEALTH: 1

FLAMMABILITY: 1

REACTIVITY: 0

HMIS: HEALTH: 2

FLAMMABILITY: 1

REACTIVITY: 0

(For Ethylene Glycol)

KEY: 0 - Minimal 1 - Slight 2 - Moderate 3 - Serious 4 - Severe

POTENTIAL HEALTH EFFECTS

Routes of Exposure: Inhalation, Ingestion, Skin Contact/Absorption, Eye Contact

Eye: May cause slight transient (temporary) eye irritation. Corneal injury is unlikely. Vapors or mists may cause eye irritation.

Skin: Prolonged or repeated exposure not likely to cause significant skin irritation. A single prolonged exposure is not likely to result in the material being absorbed through skin in harmful amounts. Repeated skin exposure may result in absorption of harmful amounts. Massive contact with damaged skin or of material sufficiently hot to burn skin may result in absorption of potential lethal amounts.

Ingestion: Single dose oral toxicity is considered to be moderate. Excessive exposure may cause central nervous system effects, cardiopulmonary effects (metabolic acidosis), and kidney failure. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; however, swallowing amounts larger than that may cause serious injury, even death.

Inhalation: At room temperature, exposures to vapors are minimal due to physical properties; higher temperatures may generate vapor levels sufficient to cause adverse effects.

Systemic (Other Target Organ) Effects: Repeated excessive exposures may cause severe kidney and also liver and gastrointestinal effects. Signs and symptoms of excessive exposure may be central nervous system effects. Signs and symptoms of excessive exposure may be nausea and/or vomiting. Signs and symptoms of excessive exposure may be anesthetic or narcotic effects. Observations in animals include formation of bladder stones after repeated oral doses of ethylene glycol. Reports of kidney failure and death in burn patients suggest the ethylene glycol may have been a factor. The use of topical applications containing this material may not be appropriate in severely burned patients or individuals with impaired renal function.

Cancer Information: Based on data from long-term animal studies, ethylene glycol is not believed to pose a carcinogenic risk to man.

Teratology (Birth Defects): Exposure to ethylene glycol has caused birth defects in laboratory animals only at doses toxic to the mother.

Reproductive Effects: Ethylene glycol has not interfered with reproduction in animal studies except at very high doses.

CHRONIC, PROLONGED OR REPEATED OVEREXPOSURE

Effects of Repeated Overexposure: Repeated inhalation of ethylene glycol mist may produce signs of central nervous system involvement, particularly dizziness and nystagmus.

Other Effects of Overexposure: repeated skin contact with ethylene glycol may, in a very small proportion of cases, cause sensitization with the development of allergic contact dermatitis. The incidence is significantly less than 1% with the undiluted material.

4. **FIRST AID MEASURES**

Ensure physician has access to this MSDS.

TREATMENT

Eyes: Immediately flush eyes with large amounts of water for 15 minutes, lifting lower and upper lids. Get medical attention as soon as possible. Contact lenses should never be worn when working with this chemical.

Skin: Flush area of skin contact immediately with large amounts of water for at least 15 minutes while removing contaminated clothing. If irritation persists after flushing, get medical attention promptly. Wash clothing before re-use.

Inhalation: If inhaled, immediately remove victim to fresh air and call *emergency medical care*. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.

Ingestion: Obtain medical attention immediately. If patient is fully conscious, give two glasses of water. Do not induce vomiting. If medical advice is delayed, and if the person has swallowed a moderate volume of material (a few ounces), then give three to four ounces of hard liquor, such as whisky. For children, give proportionally less liquor, according to weight.

Notes to Physician:

It is estimated that the lethal oral dose to adults is of the order of 1.0 ml/kg. Ethylene glycol is metabolized by alcohol dehydrogenase to various metabolites including glycerinaldehydes, glycolic acid and oxalic acid which cause an elevated anion-gap metabolic acidosis and renal tubular injury. The signs and symptoms in ethylene glycol poisoning are those of metabolic acidosis, CNS depression, and kidney injury. Urinalysis may show albuminuria, hematuria and oxaluria. Clinical chemistry may reveal anion-gap metabolic acidosis and uremia. The currently recommended medical management of ethylene glycol poisoning includes elimination of ethylene glycol and metabolites, correction of metabolic acidosis and prevention of kidney injury. It is essential to have immediate and follow up urinalysis and clinical chemistry. There should be particular emphasis on acid-base balance and renal function tests. A continuous infusion of 5% sodium bicarbonate with frequent monitoring of electrolytes and fluid balance is used to achieve correction of metabolic acidosis and forced diuresis. As a competitive substrate for alcohol dehydrogenase, ethanol is antidotal. Given in the early stages of intoxication, it blocks the formulation of nephrotoxic metabolites. A therapeutically effective blood concentration of ethanol is in the range 100-150 mg/dl, and should be achieved by a rapid loading dose and maintained by intravenous infusion. For severe and/or deteriorating cases, hemodialysis may be required. Dialysis should be considered for patients who are symptomatic, have severe metabolic acidosis, a blood ethylene glycol concentration greater than 25 md/dl, or compromise of renal functions.

A more effective intravenous antidote for physician use is 4-methylpyrazole, a potent inhibitor of alcohol dehydrogenases, which effectively blocks the formation of toxic metabolites of ethylene glycol. It has been used to decrease the metabolic consequences of ethylene glycol poisoning before metabolic acidosis coma, seizures, and renal failure have occurred. A generally recommended protocol is a loading dose of 15 mg/kg followed by 10 mg/kg every 12 hours for 4 doses and then 15 mg/kg every 12 hours until ethylene glycol concentrations are below 20 mg/100 ml. Slow intravenous infusion is required. Since 4-methylpyrazole is dialyzable, increased dosage may be necessary during hemodialysis. Additional therapeutic measures may include the administration of cofactors

involved in the metabolism of ethylene glycol. Thiamine (100 mg) and pyridoxine (50 mg) should be given every six hours.

Pulmonary edema with hypoxemia has been described in a number of patients following poisoning with ethylene glycol. The mechanism of production has not been elucidated, but it appears to be non-cardiogenic in origin in several cases. Respiratory support with mechanical ventilation and positive end expiratory pressure may be required. There may be cranial nerve involvement in the late stages of toxicity from swallowed ethylene glycol. In particular, effects have been reported involving the seventh, eighth and ninth cranial nerves, presenting with bilateral facial paralysis, diminished hearing and dysphasia.

5. ***FIRE FIGHTING MEASURES***

Flammable Properties

Flash Point: 259°F

Autoignition Temperature: Autoignition temperature for ethylene glycol is 398°C (748°F).

Flammability Limits - % of vapor concentration at which product can ignite in presence of spark.

Lower Flammability Limit: 3.2%

Upper Flammability Limit: 15.3%

Hazardous Combustion Products: Hazardous combustion products may include and are not limited to carbon monoxide, carbon dioxide and trace amounts of aldehydes and organic acids. When available oxygen is limited, as in a fire or when heated to very high temperatures by a hot wire or plate, carbon monoxide and other hazardous compounds such as aldehydes might be generated.

Extinguishing Media: Water fog or fine spray. Alcohol resistant foams (ATC type) are preferred if available. General purpose synthetic foams (including AFFF) or protein foams may function, but much less effectively. Carbon dioxide. Dry chemical. Do not use direct water stream. May spread fire.

Fire Fighting Instructions: No fire and explosion hazards expected under normal storage and handling conditions (i.e. ambient temperatures). However, ethylene glycol or solutions of ethylene glycol and water can form flammable vapors with air if heated sufficiently. Keep people away. Isolate fire area and deny unnecessary entry.

Protective Equipment for Fire Fighters: Wear positive-pressure, self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire-fighting helmet, coat, pants, boots and gloves).

6. ***ACCIDENTAL RELEASE MEASURES***

Protect People: Material is moderately toxic when ingested. Take adequate precautions to keep people, especially children away from spill site. PVC-coated rubber gloves and monogoggles or face shield can be used during cleanup of spill site. Product on surfaces can cause slippery conditions. Practice reasonable care and cleanliness. Avoid breathing spray mists if generated. Keep out of reach of children. Product may become a solid at temperatures below -18°C (0°F). Do not store near food, foodstuffs, drugs or potable water supplies.

Protect the Environment: Do not dump used product or diluted material into sewers, on the ground, or into any body of water.

Cleanup: Small spills: Soak up with absorbent material. Large spills: Dike and pump into suitable containers for disposal. Ensure compliance with all applicable statutes that require notification of appropriate government officials.

7. HANDLING AND STORAGE

Steps to be Taken in Case Material is Released or Spilled: Eliminate all sources of ignition in vicinity of the spilled or released fluid.

Other Precautions: Use normal precautions in handling any combustible liquid. Keep container closed when not in use. Store away from heat or open flame. Product on surfaces can cause slippery conditions. Practice reasonable care and cleanliness. Avoid breathing spray mists if generated. Keep out of reach of children. Product may become a solid at temperatures below -18°C (0°F). Do not store near food, foodstuffs, drugs or potable water supplies.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Respiratory Protection: Respiratory protection is required if airborne concentration exceeds TLV. At any detectable concentration any self-contained breathing apparatus with a full face piece and operated in a pressure-demand or other positive pressure mode or any supplied-air respirator with a full face piece and operated in a pressure-demand or other positive pressure mode in combination with an auxiliary self-contained breathing apparatus operated in pressure-demand or other positive pressure mode.

Escape: Any air-purifying full face piece respirator (gas mask) with a chin-style or front- or back-mounted organic vapor canister or any appropriate escape-type self-contained breathing apparatus.

Skin Protection: Protective gloves recommended when prolonged skin contact cannot be avoided. Polyethylene; Neoprene; Nitrile; Polyvinyl alcohol; Natural Rubber, Butyl Rubber. Safety shower should be available.

Eye Protection: Safety goggles and face shield. Emergency eyewash should be available. Contact lenses should not be worn when working with this chemical.

Engineering Controls: Use general or local exhaust ventilation to meet TLV requirements.

EXPOSURE LIMITS

<u>Component</u>	<u>Exposure Limits</u>	<u>Skin Form</u>
Ethylene glycol	100 mg/m ³ CEILING ACGIH	Aerosol
Ethylene glycol	125 mg/m ³ CEILING OSHA-vacated	
	50 ppm CEILING OSHA – vacated	
	100 mg/m ³ CEILING UCC	Aerosol and Vapor
Diethylene glycol	50 ppm TWA8 AIHA WHEEL	Aerosol and Vapor
Diethylene glycol	10 mg/m ³ TWA8 AIHA WHEEL	Aerosol

In the Exposure Limits Chart above, if there is no specific qualifier (i.e., Aerosol) listed in the Form Column for a particular limit, the listed limit includes all airborne forms of the substance that can be inhaled.

A “blank” in the Skin column indicates that exposure by the cutaneous (skin) route is not a potential significant contributor to overall exposure.

9. PHYSICAL / CHEMICAL PROPERTIES

Boiling Point:	>300°F
Freeze Point:	< 5°F
Specific Gravity (Water =1):	1.13
Vapor Pressure (mm of Hg) @ 20C:	0.05 Estimated
Vapor Density (air=1):	Not established
Water Solubility:	Complete
Evaporation Rate (BuAc = 1):	Nil
% Volatile By Volume:	88-97
Appearance:	Yellow
Odor:	Mild
pH (50% Water Solution):	8.4

10. STABILITY & REACTIVITY DATA

Stability:	Stable
Conditions to Avoid:	Keep away from flame
Incompatibility (Materials to Avoid):	Strong acid or oxidizing agents
Hazardous Decomposition Products:	Incomplete combustion may produce CO gas
Hazardous Polymerization:	Will not occur

11. TOXICOLOGICAL INFORMATION

Skin: The dermal LD50 has not been determined.

Ingestion: The lethal dose in humans is estimated to be 100 ml (3 ozs.). The oral LD50 for rats is in the 6000-13,000-mg/kg range.

Hydrated Inorganic Acid Sodium Salt: The lowest dose of a similar compound reported to produce death in humans was estimated to be 709 mg/kg body weight for a person weighing 150 pounds, this would be equivalent to swallowing about one-tenth (.1) of a pound of the dry material in a short period of time.

Acute oral LD50s for a similar compound = 2,650 mg/kg (rats) 2,000 mg/kg (mice)

Mutagenicity (The Effects on Genetic Material): In vitro mutagenicity studies were negative. Animal mutagenicity studies were negative.

Significant Data with Possible Relevance to Humans: Ethylene glycol has been shown to produce dose-related teratogenic effects in rats and mice when given by gavage or in drinking water at high concentrations or doses. The no-effect doses for developmental toxicity for ethylene glycol given by gavage over the period of organogenesis has been shown to be 150 mg/kg/day for the mouse and 500 mg/kg/day for the rat. Also, in a preliminary study to assess the effects of exposure of pregnant rats and made to aerosol at concentrations of 150, 1000 and 25000 mg/m³ for 6 hours a day throughout the period of organogenesis, teratogenic effects were produced at the highest concentration, but only in mice. The conditions of these latter experiments did not allow a conclusion as to whether the developmental toxicity was mediated by inhalation of aerosol percutaneous absorption of ethylene glycol from contaminated skin, or swallowing ethylene glycol as a result of grooming the wetted coat. In a further study, comparing effects from high aerosol concentration by whole-body or nose-only exposure, it was shown that nose-only exposure resulted in maternal toxicity (1000 and 25000 mg/m³) and developmental toxicity with minimal

evidence of teratogenicity (2500 mg/m³). The no-effects concentration (based on maternal toxicity) was 500 mg/m³. In a further study in mice, no teratogenic effects could be produced when ethylene glycol was applied to skin of pregnant mice over the period of organogenesis. The above observations suggest that ethylene glycol is to be regarded as an animal teratogen. There is currently no available information to suggest that ethylene glycol has caused birth defects in humans. Cutaneous application of ethylene glycol is ineffective in producing developmental toxicity. Exposure to high aerosol concentrations is only minimally effective in producing developmental toxicity. The major route for producing developmental toxicity is perorally. Two chronic feeding studies, using rats and mice, have not produced any evidence that ethylene glycol causes dose-related increases in tumor incidence or a different pattern of tumors compared with untreated controls. The absence of carcinogenic potential for ethylene glycol has been supported by numerous in vitro genotoxicity studies showing that it does not produce mutagenic or clastogenic effects.

A chronic dietary feeding study of diethylene glycol with rats showed mild kidney injury at 1%, while concentrations of 2% and 4% caused more marked kidney injury. In addition, at 2% and 4% of diethylene glycol in the diet, some rats developed benign papillary tumors in the urinary bladder. These have been attributed to the presence of urinary bladder calcium oxalate stones. No evidence for carcinogenicity was found with a chronic skin-painting study with diethylene glycol in mice. The absence of a direct chemical carcinogenic effect addords with the results in vitro genotoxicity studies that show that it does not produce mutagenic or clastogenic effects. A feeding study employing up to 5.0% diethylene glycol in the diet failed to produce any teratogenic effects. In a mouse continuous breeding study with large doses of diethylene glycol in drinking water, there was evidence for reproductive toxicity at 3.5% (equivalent to 6.1 g/kg/day) as reduced number of litter, live pups per litter and live pup weight. No such effects were seen at 1.75% (approximately 3.05 g/kg/day). The relevance of these very high dosages to human health is uncertain. Pregnant rats receiving undiluted diethylene glycol by gavage over the period of organogenesis had toxic effects at 4.0 and 8.0 ml/kg/day as mortality, decreased body weight, decreased food consumption increased water consumption and increased liver and kidney weights. Fetotoxicity was seen only at these maternally toxic dosages. Decreased fetal body weight occurred at 8.0 ml/kg/day, and increased skeletal variants at 4.0 and 8.0 ml/kg/day. No embryotoxic or teratogenic effects were seen. Neither maternal toxicity nor fetotoxicity occurred at 1.0 ml/kg/day. In a study with mice also receiving undiluted diethylene glycol over the period of organogenesis, maternal toxicity occurred at 2.5 and 10.0 ml/kg/day, but not at 0.5 ml/kg/day. Definitive developmental toxicity was not seen in this species.

ACUTE TOXICITY

Peroral: The lethal dose in humans is estimated to be 3 oz. or 100 ml.

Rat: LD₅₀ (6000 – 13000) mg/kg

Percutaneous:

Rabbit: LD₅₀ =>22270 mg/kg; 24 h occluded

Inhalation:

Rat: 8-hour exposure, substantially saturated vapor studies, dynamic generation method

Mortality: 0/6

Inhalation: Mist/vapor study, rat, at 170°C, 8-hour exposure = 2.2 mg/l

Mortality: 0/6

Inhalation:

Rat: 8-hour exposure, fog = 10000 ppm; 65° - 70°C

Mortality: 0/6

IRRITATION

Skin:

Rabbit: 24-hour occluded contact, 0.5 ml
Results: Minor erythema and edema

Skin:

Human: Primary irritation patch test, 48-hour occluded, 0.2 ml
Results: Evidence of irritation

Eye:

Rabbit: 0.1 ml
Results: Minor transient iritis, conjunctival irritation with discharge

REPEATED EXPOSURE

In a 7-day dietary study with rats, a significant increase in kidney weights in females was observed at 5.0 gm/kg. The NOEL was 2.5 gm/kg.

In a 24-month dietary study with rats, increased mortality in males was observed at the highest dose, 1.0 gm/kg/day. There were multiple signs: mineralization of several organs, including the cardiac vessels, cardiac muscle, vas deferens, stomach and pulmonary vessels; cellular hyperplasia of the parathyroids, hemosiderosis of the spleen, myocardial fibrosis, portal fibrosis of the liver, bile duct hyperplasia and hydronephrosis and oxalate nephrosis of the kidneys. Ethylene glycol was not oncogenic.

In a 90-day dietary study with dogs, repeated exposures to 2.5 gm/kg resulted in acute renal failure and deaths. The NOAEL was 1.0 gm/kg.

SENSITIZATION (ANIMAL AND HUMAN STUDIES)

Repeated skin contact with ethylene glycol may, in a very small proportion of cases, cause sensitization with the development of allergic contact dermatitis. The incidence is significantly less than 1% with the undiluted material.

REPRODUCTIVE TOXICITY

A three-generation study indicated that ethylene glycol did not affect reproductive parameters at dietary concentrations up to 1.0 gm/kg/day in any generation.

CHRONIC TOXICITY AND CARCINOGENICITY

Two chronic feeding studies, using rats and mice, have not produced any evidence that ethylene glycol causes dose-related increases in tumor incidence or a different pattern of tumors compared with untreated controls. The absence of a carcinogenic potential for ethylene glycol has been supported by numerous in vitro genotoxicity studies showing that it does not produce mutagenic or clastogenic effects.

GENETIC TOXICOLOGY

In Vitro: Ethylene glycol was devoid of genotoxic activity in an Ames test, forward gene mutation and sister chromatid exchange (SCE) studies in Chinese Hamster Ovary (CHO) cells and an in vitro cytogenetics study.

In Vivo: Ethylene glycol by three different routes (intravenous, peroral and percutaneous) demonstrates apparent first-order pharmacokinetic behavior for the disposition in and the elimination from the plasma. Dose-dependent changes occur for the elimination of metabolites in the urine and as $^{14}\text{CO}_2$ after single doses for the intravenous and

peroral, but not the percutaneous route. The hypothesis from literature sources exists that developmental toxicity is caused by a metabolite of ethylene glycol, called glycolic acid, and not parent ethylene glycol. Under most conditions of ethylene glycol exposure, the glycolic acid metabolite is present in the blood in very low levels. However, it can become the major metabolite following large doses of ethylene glycol due to saturation of glycolic acid oxidation and/or elimination. When levels of this acidic metabolite exceed the capacity of maternal blood buffers to neutralize it, a maternal metabolic acidosis ensues, which has been hypothesized to be the true agent responsible for ethylene glycol induced developmental toxicity. Research suggests that ethylene glycol developmental toxicity is due to a dose-rate dependent toxicokinetic shift leading to glycolate accumulation and metabolic acidosis.

ADDITIONAL STUDIES

Ethylene glycol has been shown to produce dose-related teratogenic effects in rats and mice when given by gavage or in drinking water at high concentrations or doses. The no-effect doses for developmental toxicity for ethylene glycol given by gavage over the period of organogenesis has been shown to be 150 mg/kg/day for the mouse and 500 mg/kg/day for the rat. Also, in a preliminary study to assess the effects of exposure of pregnant rats and mice to aerosols at concentrations of 150, 1000 and 2500 mg/m³ for 6 hours a day throughout the period of organogenesis, teratogenic effects were produced at the highest concentration, but only in mice. The conditions of these latter experiments did not allow a conclusion as to whether the developmental toxicity was mediated by inhalation of aerosol, percutaneous absorption of ethylene glycol from contaminated skin, or swallowing of ethylene glycol as a result of grooming the wetted coat. In a further study, comparing effects from high aerosol concentration by whole-body or nose-only exposure, it was shown that nose-only exposure resulted in maternal toxicity (1000 and 2500 mg/m³) and developmental toxicity with minimal evidence of teratogenicity (2500 mg/m³). The no-effects concentration (based on maternal toxicity) was 500 mg/m³. In a further study in mice, no teratogenic effects could be produced when ethylene glycol was applied to the skin of pregnant mice over the period of organogenesis. The above observations suggest that ethylene glycol is to be regarded as an animal teratogen. There is currently no available information to suggest that ethylene glycol has caused birth defects in humans. Cutaneous application of ethylene glycol is ineffective in producing developmental toxicity. Exposure to high aerosol concentrations is only minimally effective in producing developmental toxicity.

12. ECOLOGICAL INFORMATION

ENVIRONMENTAL FATE

Movement & Partitioning: Bioconcentration potential is low (BCF less than 100 or Log Kow less than 3). Log octanol/water partition coefficient (log Kow) is -1.36. Henry's Law Constant (H) is 6.0E-08 atm-m³/mol. Bioconcentration factor (BCF) is 10 in golden orfe.

Degradation & Transformation: Biodegradation under aerobic static laboratory conditions is high (BOD20 or BOD28/ThOD greater than 40%). 5-Day biochemical oxygen demand (BOD5) is 0.78 p/p. 10-Day biochemical oxygen demand (BOD10) is 1.06 p/p. 20-Day biochemical oxygen demand (BOD20) is 1.15 p/p. Theoretical oxygen demand (THOD) is calculated to be 1.29 p/p. Biodegradation may occur under both aerobic and anaerobic conditions (in either the presence or absence of oxygen). Inhibitory concentration (IC50) in OECD "Activated Sludge, Respiration Inhibition Test" (Guideline # 209) is < 1000 mg/L. Degradation is expected in the atmospheric environment within days to weeks.

Ecotoxicology: Material is practically non-toxic to aquatic organisms on an acute basis (LC50 greater than 100 mg/L in most sensitive species). Acute LC50 for fathead minnow (*Pimephales promelas*) is 51000 mg/L. Acute LC50 for bluegill (*Lepomis macrochirus*) is 27549 mg/L. Acute LC50 for rainbow trout (*Oncorhynchus mykiss*) is about 18000-46000 mg/L. Acute LC50 for guppy (*Poecilia reticulata*) is 49300 mg/L. Acute LC50 for water flea (*Daphnia magna*) is 46300-51100 mg/L. Acute LC50 for the cladoceran *Ceriodaphnia dubia* is 10000-25800 mg/L.

Acute LC50 for crayfish is 91430 mg/L. Acute LC50 for brine shrimp (*Artemia salina*) is 20000 mg/L. Acute LC50 for golden orfe (*Leuciscus idus*) is greater than 10000 mg/L. Acute LC50 for goldfish (*Carassius auratus*) is greater than 5000 mg/L. Growth inhibition EC50 for green alga *Selenastrum capricornutum* is 9500-13000 mg/L.

BOD (% Oxygen Consumption):

Day 5	Day 10	Day 15	Day 20	Day 30
51%	80%		97%	

ECOTOXICITY

Toxicity to Micro-organisms:

Bacterial / NA: 16 h; IC50
Result Value: >10000 mg/l

Toxicity to Aquatic Invertebrates:

Daphnia: 48 h; LC50
Result Value: >100000 mg/l

Toxicity to Fish

Fathead Minnow: 94 h; LC50
Result Value: 70000 mg/l

FURTHER INFORMATION

Chemical Oxygen Demand (COD) – Measured: 1.29 mg/mg
Theoretical Oxygen Demand (THOD) – Calculated: 1.30 mg/mg

Octanol/Water Partition Coefficient – Measured: -1.36

13. DISPOSAL CONSIDERATIONS

DO NOT discharge to sewer. Wear appropriate personal protection. Take up with sand, vermiculite, or similar inert material. Dispose in accordance with federal, state and local regulations.

14. TRANSPORT INFORMATION

U.S. DEPARTMENT OF TRANSPORTATION

Non-Bulk

Not regulated by the US D.O.T. (in quantities under 5,000 lbs in any one inner package)

Bulk

Proper Shipping Name: Environmentally Hazardous Substance, LIQUID N.O.S. (ETHYLENE GLYCOL)
Technical Name: ETHYLENE GLYCOL
ID Number: UN 3082
Hazard Class: 9
Packing Group: PG III
Reportable Quantity: 5,000 lb.

IATA
Non-Bulk
Not Regulated by IATA

IMDG
Non-Bulk
Not regulated by IMDG (in quantities under 5,000 lbs in any one inner package)

15. REGULATORY INFORMATION

THIS PRODUCT CONTAINS COMPONENT(S) CITED ON THE FOLLOWING REGULATIONS.

<u>Chemical Name</u>	<u>Cas Number</u>
Ethylene Glycol	107-21-1

United States - TSCA
Inventory:

Listed

Water Standards:

No data available

Atmospheric Standards:

Clean Air Act (1990) - List of Hazardous Air Contaminants: listed

CERCLA:

Reportable Quantity (RQ): 5,000 pounds (532 gallons)

OSHA Hazard Communication
Standard:

This product is a "hazardous chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

SARA Title III:

Section 311/312 - Categories: Acute hazard; chronic hazard

Section 312 - Inventory Reporting: Ethylene glycol is subject to Tier I and/or Tier II annual inventory reporting.

Section 313 - Emission Reporting: Ethylene glycol is subject to Form R reporting requirements.

Section 302 - Extremely Hazardous Substances: Ethylene glycol is not listed.

State Right-To-Know:

California - Exposure Limits - Ceilings:	vapor-50 ppm ceiling; 125 mg/m3 ceiling
Director's List of Hazardous Substances:	listed
Florida - Hazardous Substances List:	listed
Massachusetts - Right-to-Know List:	listed
Minnesota - Haz. Subs. List:	listed (particulate and vapor)
New Jersey - Right-to-Know List (Total):	Present greater than 1.0%
Pennsylvania Right-to-Know List:	environmental hazard

Canadian Regulations: This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required.

Peak CF-EXL Extended Life Antifreeze

WHMIS Information: D2A - material has potential toxic effects. Refer elsewhere in the MSDS for specific warnings and safe handling information. Refer to the employer's workplace education program.

California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986): This product contains the following chemical(s) known to the State of California to cause cancer:

<u>Component</u>	<u>CAS #</u>	<u>Amount</u>
1,4 - Dioxane	123-91-1	<=0.0086%
Acetaldehyde	75-07-0	<=0.1000PPM

California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986): This product contains the following chemical(s) known to the State of California to cause birth defects and/or other reproductive harm.

<u>Component</u>	<u>CAS #</u>	<u>Amount</u>
Ethylene glycol monomethyl ether	109-86-4	<=0.0009%

California SCAQMD Rule 443.1 (South Coast Air Quality Management District Rule 443.1, Labeling of Materials Containing Organic Solvents):

VOC: Vapor pressure 0.06 mmHg at 20°C
1113.38 g/l

(Does not contain IARC, NTP, OSHA and ACGIH listed carcinogens greater than 0.1%)

3. HAZARDS IDENTIFICATION

NPFA: HEALTH: 0 FLAMMABILITY: 1 REACTIVITY: 0
HMIS: HEALTH: 1 FLAMMABILITY: 1 REACTIVITY: 0

KEY: 0 - Minimal 1 - Slight 2 - Moderate 3 - Serious 4 - Severe

Emergency Overview: This material is NOT HAZARDOUS by OSHA Hazard Communication definition.

POTENTIAL HEALTH EFFECTS

Routes of Exposure: Eye Contact, Skin Contact, Inhalation, Ingestion, Signs and Symptoms of Overdose

Eye: May cause minor eye irritation.

Skin: No significant signs or symptoms indicative of any adverse health hazard are expected to occur as a result of skin exposure. Not a skin absorption hazard.

Inhalation: No significant signs or symptoms indicative of any health hazard are expected to occur as a result of inhalation exposure.

Ingestion: Not a likely route of exposure. No significant signs or symptoms indicative of any health hazard are expected to occur as a result of ingestion. However, lactic acidosis, stupor and seizures have been reported following chronic ingestion and in individuals with kidney disease.

Signs and Symptoms of Overexposure: Same as above.

Medical Conditions Generally Aggravated by Exposure: Material and/or its emissions may aggravate preexisting eye disease.

Chronic Health Effects (Propylene Glycol): No chronic health hazards are expected to occur from anticipated conditions of normal use of this material.

Other Health Information: None.

4. FIRST AID MEASURES

Eyes: Immediately rinse eyes with clean water for 20-30 minutes. Retract eyelids often. Obtain medical attention if pain, blinking, tears or redness persist.

Skin: Not expected to present a significant skin hazard under anticipated conditions of normal use. If skin contact occurs, remove contaminated clothing and wash skin thoroughly.

Inhalation: Not expected to present a significant inhalation hazard under anticipated conditions of normal use. If overcome by exposure, remove victim to fresh air immediately. Give oxygen or artificial respiration as needed. Obtain medical attention if breathing difficulty persists.

Ingestion: Ingestion unlikely. If large quantity swallowed, give lukewarm water (pint / ½ liter) if victim completely conscious / alert. Obtain medical attention.

Notes to Physician: Following acute ingestion, signs of toxicity are unlikely. Ethanol treatment, as in ethylene glycol poisoning, is inappropriate. There is no specific antidote. Treatment should be directed at the control of symptoms and the clinical condition. Monitor for acidosis and central nervous system effects.

5. FIRE FIGHTING MEASURES

Flammable Properties:

Flammability Classification: OSHA/NFPA Class IIIB combustible liquid

Flash Point / Method: 109°C (228°F) (PMCC) (Aqueous solution)

Auto-Ignition Temperature: 371°C (700°F)

Extinguishing Media:

Suitable: SMALL FIRE: Use dry chemicals, CO₂, water spray or alcohol-resistant foam.

LARGE FIRE: Use water spray, water fog or alcohol-resistant foam.

Unsuitable: Do not use solid water stream.

Special Fire Fighting Procedures: Wear positive pressure, self-contained breathing apparatus and other protective apparatus as warranted. Fight fire from distance or protected location - heat may build up pressure and rupture closed containers. Liquid may form slippery film. Use water spray or fog for cooling, solid stream may spread fire as burning liquid will float on water. Avoid frothing/steam explosion. Notify authorities if liquid enters sewers/public waters.

Unusual Fire and Explosion Hazards: Heat from fire can generate flammable vapor. When mixed with air and exposed to ignition source, vapors can burn in open or explode if confined. Vapors may be heavier than air and travel long distances along ground before igniting and flashing back. Fine sprays and mists may be combustible at temperatures below normal flash point.

6. ACCIDENTAL RELEASE MEASURES

Steps to be Taken in Case Material Is Released or Spilled: Prevent flow to sewers and public waters as it may contaminate said water. Restrict water usage to prevent slip/fall hazard. Soak up small spills with inert solids. Dike and recover large land spills. Notify appropriate authorities if product enters any waterway.

7. HANDLING AND STORAGE

Handling: Hygroscopic. Handle with care. After handling, always wash hands thoroughly with soap and water. Always drain and flush systems containing propylene glycol with water before welding or other maintenance. Wear recommended personal protective equipment. Observe precautions pertaining to confined space entry.

Storage:

Bulk Drums / Larger: Stainless steel containers. Lined steel. Mild steel. Reinforced plastic. Keep drums tightly closed to prevent contamination. Store at 65° to 90°F. Use dry nitrogen or low dew point air for tank padding.

1-Gallon Containers: Store at ambient temperature.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Respiratory Protection: No special respiratory protection equipment is recommended under normal conditions of anticipated use with adequate ventilation.

Ventilation: Adequate general ventilation is required, local exhaust is recommended if possible.

Protective Gloves: None normally needed; however, wearing chemical resistant gloves is recommended if prolonged contact is expected. Avoid contact with skin. Where use can result in skin contact, practice good personal hygiene.

Eye Protection: Chemical splash goggles or full face shield must be worn when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapor. Contact lenses should not be worn.

Other Protective Equipment: None

Work Practices/Engineering Controls: Keep containers closed when not in use.

Personal Hygiene: If product-handling results in skin contact, wash hands and other exposed areas with mild soap and water before eating, drinking, smoking, or using toilet facilities. Promptly remove soiled clothing and wash thoroughly before reuse.

Other Hygienic Practices: Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use and the hazards and/or potential hazards that may be encountered during use. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure.

As of 2001, no occupational exposure limits have been established for propylene glycol by either ACGIH or OSHA.

9. PHYSICAL PROPERTIES (Propylene Glycol)

Boiling Point (deg F):	365
Specific Gravity (Water =1):	1.04
Vapor Pressure (mm of Hg):	<0.1
Vapor Density (air=1):	2.6
Burst Point:	Product will not freeze solid or burst.
Water Solubility:	Complete
Evaporation Rate (n-butyl acetate=1):	Slight
Freeze Point / Melting Point (deg F):	-76
Freeze Point 50% Concentration (deg F):	-26
Appearance:	Green
Odor:	Slightly viscous, almost odorless liquid

10. STABILITY and REACTIVITY

Stability:	Stable
Conditions to Avoid:	Heat, sparks, open flame
Materials to Avoid:	Strong alkalis, strong oxidizing agents
Hazardous Decomposition or Byproducts:	Carbon monoxide and other toxic vapors
Hazardous Polymerization:	Not expected to occur

11. TOXICOLOGICAL INFORMATION

Skin: The LD50 for skin absorption in rabbits is >20,800 mg/kg.

Ingestion: The oral LD50 for rats is 20,000 mg/kg, and for mice is 22,000 mg/kg.

Mutagenicity: In vitro mutagenicity studies were negative. Animal mutagenicity studies were negative.

12. ECOLOGICAL INFORMATION

Ecotoxicity: This material is expected to be non-hazardous to aquatic species.

	Test Type	Species	Value / Units
Fish / Amphibians	LC50 / 96 hours	Sheepshead Minnow	23,800 mg/l
Aquatic Invertebrates	EC50 / 48 hours	Daphnia	> 43,500 mg/l
Aquatic Plants	EC50 / 72 hours	Green algae	> 19,000 mg/l

Environmental Fate: Propylene glycol is expected to degrade rapidly in the vapor phase by reaction with photochemically produced hydroxyl radicals. It has an estimated half-life of 32 hours in an average ambient atmosphere. Propylene glycol is expected to degrade relatively rapidly via biodegradation in water. It is not expected to be susceptible to hydrolysis, oxidation, volatilization, bioconcentration and adsorption to sediments. Propylene glycol is expected to degrade relatively rapidly via biodegradation in soil. Degradation in soil does not appear to be inhibited by high glycol concentrations or by subfreezing temperatures. Due to its high mobility and low adsorptivity, propylene glycol is susceptible to leaching. However, concurrent biodegradation may be rapid enough to diminish the significance of leaching. Evaporation from dry (but not moist) soil surfaces is likely to occur.

Bioaccumulation: Based on the octanol/water partition coefficient, the bioconcentration factor is estimated to be < 1.

Biodegradation: This material is expected to be readily biodegradable.

13. DISPOSAL CONSIDERATIONS

Waste Disposal Method: Landfill solids at permitted sites using registered transporters. Burn concentrated liquids, avoiding flameouts, and assuring emissions comply with applicable regulations. Diluted aqueous waste may biodegrade, but avoid overloading plant biomass and assure effluent complies with applicable regulations.

14. TRANSPORT INFORMATION

This product is not regulated by DOT.

15. REGULATORY INFORMATION

Superfund Amendments and Reauthorization of 1988 (SARA), Title III

Section 302/304

Requires emergency planning based on "Threshold Planning Quantities" (TPQs) and release reporting based on Reportable Quantities (RQs) of "Extremely Hazardous Substances" (EHS) listed in Appendix A of 40 CFR 355. There are no components of this material with known CAS numbers that are on the EHS list.

Section 311 and 312

Based upon available information, this material and/or components are not classified as any of the specific health and/or physical hazards defined by Section 311 & 312.

Section 313

The material does not contain any chemical components with known CAS numbers that exceeded the De Minimis reporting levels established by SARA Title III, Section 313 and 40 CFR 372.

Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)

No chemicals in this material with known CAS numbers are subject to the reporting requirements of CERCLA.

OSHA Regulations

"Chemical-specific" U.S. Occupational Safety and Health Administration (OSHA) regulations (1910.1002 to 1910.1050) presented under 29 U.S. Code of Federal Regulations (CFR) 1910 do not apply to this material or its components.

Department of Transportation (DOT)

Other than the normal shipping instructions and information given in this MSDS, there are no other specific U.S. Department of Transportation (DOT) regulations governing the shipment of this material.

State Regulations:

California Safe Drinking Water and Toxic Enforcement Act of 1988 – Proposition 65

This material is not known to contain any chemicals currently listed as carcinogens or reproductive toxins under California Proposition 65 at levels that would be subject to the proposition.

California South Coast Air Quality Management District (SCAWMD) Rule 443.1 (VOCs)

A Volatile Organic Compound (VOC) is any volatile compound of carbon excluding methane, carbon monoxide, carbonic acid, metallic carbides or carbonates, ammonium carbonate, 1, 1, 1-trichloroethane, methylene chloride (FC-23), (CFC-113), (CFC-12), (CFC-11), (CFC-22), (CFC-114) and (CFC-115). By this definition, this is a VOC material.

Massachusetts Right to Know Substance List (MSL) (105 CMR Section 670.000)

Extraordinarily Hazardous Substances (MSL-EHS) must be identified when present in materials at levels greater than state specified criterion. The criterion is $\geq 0.0001\%$. Hazardous Substances (MSL-HS) on the MSL must be identified when present in materials at greater than the state specified criterion. The criterion is $\geq 1\%$. Components with CAS numbers present in this material, at levels specified in Section 9 -- Components do not require reporting under the statute.

New Jersey Registration

The New Jersey Registry 3. Registration law does not apply to this material, as none of its components are trade secrets.

Pennsylvania Right to Know Hazardous Substance List

Hazardous Substances (PA-HS) must be identified when present in material at levels greater than the state specified criterion. The criterion is $\geq 1\%$. Components with CAS numbers in this material at a level which could require reporting under the statute are:

<u>Chemical</u>	<u>CAS #</u>
Propylene Glycol	57-5506

Special Hazardous Substances (PA-SHS) must be identified when present in materials at levels greater than the state specified criterion. The criterion is $\geq 0.01\%$. Components with CAS numbers in this material, at levels specified in Section 9 Components do not require reporting under the statute.

UNITED STATES - TSCA - Inventory: Listed

WHMIS classification for product: n/a

This product has been classified in accordance with the hazard criteria of the CFR and the MSDS contains all the information required by the CFR.

 (collect)

The OPTIMA sealed lead acid battery is considered an article as defined by 29 CFR 1910.1200(c) OSHA Hazard Communication. The information on this sheet is supplied at the customer's request for information only.

Emergency Overview:

Exposure not expected for product under normal conditions of use. In its manufactured and supplied state, the product is considered non-hazardous. Keep away from flames during and immediately after charge. No significant health effects are associated with the product.

Section 2 - Composition (Hazardous Components)

Material	% by weight or volume	CAS Number
Lead Compounds	63 - 81	7439-92-1
Sulfuric Acid Electrolyte	17 - 25	7664-93-9
Case Matl Polypropylene	2 - 6	9003-07-0
Separator/Paster Paper Fibrous Glass	1 - 4	65997-17-3

Section 3 - Hazards Rating

The Hazards rating for the Sealed Lead Acid Battery are:

<u>Hazards Rating (HMIS System)</u>	
Health	0
Flammability	0
Reactivity	0

Section 4 - Hazards Identification

Potential Health Effects

None expected for finished product under normal conditions of use.

Fire and Explosion

The sealed lead acid battery is not considered flammable, but it will burn if involved in a fire. Short circuit can also result in fire. Evacuate area. Self-contained breathing apparatus must be worn to prevent possible inhalation of acid mists, smoke and decomposition products in a fire. Remove all ignition sources. Cool battery(s) to prevent rupture.

Section 5 - First-Aid

Inhalation - Not expected for product under normal conditions of use. However, if acid vapor is released due to overcharging or abuse of the battery, remove exposed person to fresh air. If breathing is difficult, oxygen may be administered. If breathing has stopped, artificial respiration should be started immediately. Seek medical attention.

Eyes - Exposure not expected for product under normal conditions of use. However, if acid from broken battery case enters eyes, flush with water for at least 15 minutes. If irritation develops, seek prompt medical attention.

Skin - Exposure not expected for product under normal conditions of use. However, if acid contacts skin, flush with water and mild soap. If irritation develops, seek medical attention.

Ingestion - Not expected due to physical form of finished product. However, if any materials are ingested, seek prompt medical attention.

Section 6 - Fire-fighting Measures

Extinguishing media - Multipurpose dry chemical or multipurpose CO₂.

Fire fighting procedures - Evacuate area. Self-contained breathing apparatus must be worn to prevent possible inhalation of acid mists, smoke and decomposition products in a fire. Remove all ignition sources. Cool battery(s) to prevent rupture.

Unusual fire and explosion hazards - Hydrogen gas may be produced and may explode if ignited. Remove all ignition sources. Ventilate area.

Section 7 - Accidental Release Measures

Spill or leak cleanup procedures: Avoid contact with acid materials. Use soda ash, baking soda or lime to neutralize acid if released.

Waste disposal: Dispose of in accordance with all local, state, and federal regulations.

Section 8 - Handling and Storage

Handling - Do not carry battery by terminals. Do not drop battery, puncture or attempt to open battery case. Keep away from flames during and immediately after charge. Avoid prolonged overcharges in confined areas.

Storage - Store at ambient room temperature. Do not subject product to open flame or fire. Avoid conditions which could cause arcing between battery terminals.

Hygiene - Wash hands thoroughly before eating or smoking after handling batteries.

Section 9 - Exposure Control

<u>Material</u>	<u>Exposure Limits</u>
Lead compounds	0.05 mg/m ³
Sulfuric Acid Electrolyte	1.00 mg/m ³ OSHA

Section 10 - Personal Protection:

Eye: Not necessary under normal conditions of use for finished product.
Skin: Not necessary under normal conditions of use for finished product.
Respiratory: Not necessary under normal conditions of use for finished product.
Ventilation: Not necessary under normal conditions of use for finished product.
Work Practices: Not necessary under normal conditions of use for finished product.

Section 11 - Physical and Chemical Properties

Boiling Point:	N/A	Appearance/Odor:	N/A
Vapor Pressure:	N/A	Specific Gravity (H ₂ O=1):	N/A
Vapor Density (air=1):	N/A	Melting Point:	N/A
Solubility in water:	N/A	Evaporation Rate:	N/A
		(Butyl Acetate = 1)	

Section 12 - Stability and Reactivity

Stability:	Stable
Conditions to avoid:	Avoid shorting, use only approved charging methods. Do not puncture battery case
Hazardous reactions:	N/A
Decomposition Products:	N/A
Hazardous Polymerization:	Will not occur

Section 13 - Toxicological Information

Threshold limit value: Not applicable for finished product.
Route of entry: Not applicable for finished product under normal conditions of use.
Signs of symptoms of acute exposure: None expected for finished product under normal conditions of use.
Chronic Exposure: None expected for finished product under normal conditions of use.
Medical Conditions aggravated by exposure: None expected for finished product under normal conditions of use.
Effects of overexposure, conditions to avoid: No exposure expected for finished product. However, do not puncture or open battery case. Acid electrolyte may be released. Use only standard charging methods. If overcharged, battery may release gases (Hydrogen and oxygen).
Carcinogen listing: NTS: no IARC: no OSHA regulated: NA for finished product under normal conditions of use.

Section 14 - Disposal Considerations

Send to a lead recycling facility which follows applicable Federal, State and Local regulations for routine disposition of spent or damaged batteries. The distributor / user is responsible to know that "spent" and/or "damaged" batteries (scrap batteries) are disposed of in an environmentally sound way in accordance with all applicable Federal, State, and Local Environmental Regulations. OPTIMA batteries are 100% recyclable by any licensed reclamation operation.

Section 15 - Regulatory Information

According to the OSHA Hazard Communication Standard, Sealed Lead Acid Battery in its manufactured and supplied state is considered non-hazardous.
Transportation:
Sealed Lead Acid Battery is not a DOT Hazardous Material.

Section 16 - Supplemental Information

Under the Dangerous Goods Regulations, 34th Edition, Effective 1 January 1993, produced by International Air Transport Association (IATA): OPTIMA batteries are classified as non-regulated by special provisions A-48 and A-67 for UN Number of UN2800: Batteries, wet, non-spillable, electric storage:

A-48: Packaging tests are not considered necessary.

A-67: Non-spillable batteries are considered to be non-dangerous if, at a temperature of 55°C (130°F), the electrolyte will not flow from a ruptured or cracked case and there is no free liquid to flow and if, when packaged for transport, the terminals are protected from short circuit.

The manufacturer of this finished article cannot foresee every possible use or misuse of the product. However, the following information is supplied:

In its manufactured and supplied state, the product is considered non-hazardous. Excessive overcharging or abuse to the terminals can result in the release of gases (hydrogen and oxygen). As a general practice, batteries should not be used in enclosed, non-ventilated spaces. Avoid immersion in water as it may lead to hydrogen generation. If the battery is crushed in a collision or similar accident, the absorbent separator may be squeezed causing the release of a small amount of acid electrolyte. Neutralize the acid electrolyte with baking soda and flush with plenty of water.

Under the Code of Federal Regulations #49, October 1, 1994 Edition, OPTIMA batteries are classified as an exception from all other requirements or conditions as stated in the following areas: Batteries, wet, 173.159 (d)(3)(i) and (d)(3)(i)(i).

- (d)(3)(i): vibration test
- (d)(3)(i)(i): pressure differential test

These conditions have been tested and certified by the following: Energy Research Laboratory (ERL A/S), Batteritest Laboratory, Munkebjergvaenget 13, DK-5230, Odense M, Denmark. Information is on file at main company location.

The information and recommendations contained herein have been compiled from sources believed to be reliable and to represent current knowledge on the subject. No warranty, guarantee, or representation contained herein and OPTIMA Batteries, Inc., its subsidiaries or affiliates assume no responsibility in connection therewith, nor can it be assumed that all acceptable safety measures are contained herein, or that other or additional measures may not be required under particular or exceptional conditions or circumstances.

Powers Fasteners, Inc., • 2 Powers Lane, Brewster • NY, U.S.A. 10509 • Phone (914) 235-6300

MATERIAL SAFETY DATA SHEET

SECTION 1 — PRODUCT AND COMPANY IDENTIFICATION

Product identifier: POWERFOAM™/TRIGGERFOAM™

Product use: Polyurethane filler foam, insulating foam, backing foam, spray foam, acoustical sealant, penetration sealant.

Chemical Family: Mixture of polyurethane, polymeric isocyanate and hydrocarbon propellants.

Supplier's name and address:

Powers Fasteners, Inc.

2 Powers Lane
Brewster, NY, U.S.A.
10509

Phone: 914-235-6300 (8 AM to 8 PM EST, Monday to Thursday; 8 AM to 7 PM EST, Friday)

Emergency Tel.: CHEMTREC – 800-424-9300

Manufacturer's name and address:

Refer to supplier.

SECTION 2 — COMPOSITION/INFORMATION ON INGREDIENTS

<u>Ingredients</u>	<u>CAS #</u>	<u>% (weight)</u>	<u>ACGIH TLV</u>		<u>OSHA PEL</u>	
			<u>TWA</u>	<u>STEL</u>	<u>PEL</u>	<u>STEL</u>
Polymethylene polyphenyl isocyanate	9016-87-9	30 - 60	0.005 ppm (as 'MDI')	N/Av	0.02 ppm (Ceiling) (as 'MDI')	N/Av
Dimethyl ether	115-10-6	7 - 13	*1000 ppm	N/Av	N/Av	N/Av
Propane	74-98-6	1 - 5	*1000 ppm	N/Av	1000 ppm	N/Av
Isobutane	75-28-5	1 - 5	*1000 ppm	N/Av	N/Av	N/Av

*Note: The ACGIH TLV listed above for Dimethyl ether, is an AIHA WEEL. The ACGIH TLV's listed above for Propane and Isobutane, are 'As Aliphatic hydrocarbon gases'.

This material is classified as hazardous under OSHA regulations (29CFR 1910.1200).

SECTION 3 — HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Aerosolized yellowish liquid / foam. Mild amine odor, characteristic of polyurethane.

Danger! Flammable aerosol. Contents under pressure. Container will explode if heated. Reacts slowly with water. May polymerize if heated to high temperatures or if exposed to incompatible materials. Poison. Harmful or fatal if inhaled. Can cause lung injury. Inhalation could cause headache, nausea, dizziness or other central nervous system. May cause respiratory tract irritation. May cause skin and eye irritation. May cause severe allergic skin and respiratory sensitization.

POTENTIAL HEALTH EFFECTS

Target organs: Eyes, skin, respiratory system, digestive system, central nervous system.

Routes of exposure: Skin contact, skin absorption, eye contact, inhalation, ingestion.

Signs and symptoms of short-term (acute) exposure:

Inhalation: Inhalation may cause irritation to the upper respiratory tract, headache, nausea, vomiting, dizziness, drowsiness and other central nervous system effects. Symptoms may also include sore throat, shortness of breath, wheezing, coughing and chest pain. These symptoms may be delayed. Inhalation of higher concentrations may cause inflammation of lung tissue, bronchitis, wheezing, pulmonary edema and eventually death. In confined or poorly ventilated areas where the vapor concentration is very high, product may act as an asphyxiant and cause increased breathing and pulse rates, fatigue, nausea and vomiting.

Skin: Direct skin contact may cause mild irritation, skin discoloration (staining) and skin hardening. Symptoms of frostbite may be experienced including numbness, prickling and itching.

Eyes: Direct eye contact may cause mild irritation, tearing and discomfort. If sprayed directly onto eye, product may freeze the eye and cause eye damage.

Ingestion: Ingestion may cause may cause severe irritation and corrosion to the mouth, throat and stomach.

SECTION 3 — HAZARDS IDENTIFICATION Continued

Chronic effects: Prolonged or repeated inhalation may cause severe, permanent respiratory impairment and lung injury.

Repeated or prolonged skin exposure may result in drying, cracking and defatting of the skin (dermatitis).

Conditions aggravated by exposure: Pre-existing skin, eye and respiratory disorders. Persons with asthma-type conditions or other chronic respiratory diseases should be excluded from working with this material.

Carcinogenic status: See TOXICOLOGICAL INFORMATION, Section 11.

Additional health hazards: **Potential severe sensitizer.** For further information, see TOXICOLOGICAL INFORMATION, Section 11.

Potential environmental effects: See ECOLOGICAL INFORMATION (Section 12).

SECTION 4 — FIRST AID MEASURES

Inhalation: Immediately remove person to fresh air. If breathing is difficult, oxygen may be administered by qualified personnel. Obtain medical attention immediately.

Skin contact: Flush skin thoroughly with running water for at least 20 minutes, while removing contaminated clothing. Obtain medical attention immediately. Launder clothing before reuse.

Eye contact: Immediately flush eyes with running water for a minimum of 20 minutes. Obtain medical attention immediately.

Ingestion: If swallowed, do NOT induce vomiting. Have victim drink one glass of water, to dilute material in stomach. Obtain medical attention immediately. Never give anything by mouth to an unconscious or convulsing person.

Note to Physicians: Asthmatic-like symptoms, if manifested, may develop immediately, or be delayed for up to several hours. Following severe exposure, medical follow-up should be monitored for at least 48 hours.

SECTION 5 — FIRE FIGHTING MEASURES

Fire hazards/conditions of flammability: Flammable aerosol. Product slowly reacts with water to produce Carbon dioxide. Closed containers are contained under pressure and will explode if exposed to excess heat or flame. Vapors are heavier than air and will collect in low-lying areas. The vapors may travel to a distant source of ignition and flashback.

Flammability classification (OSHA 29 CFR 1910.1200): Flammable aerosol.

Flash point (Method): <17.8°C / 0°F (propellant)

Auto-ignition temperature: N/Av

Lower flammable limit (% by vol.): N/Av

Upper flammable limit (% by vol.): N/Av

Explosion data: *Sensitivity to mechanical impact / static discharge:* May be sensitive to static discharge.

Oxidizing properties: None known.

Suitable extinguishing media: Use foam, carbon dioxide or dry chemical. Use water with caution, as this material may react with water.

Special fire-fighting procedures/equipment: Do not enter fire area without proper protection. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full facepiece. Shield personnel to protect from venting, rupturing or bursting cans. Move containers from fire area if it can be done without risk. Water spray may be useful in cooling equipment exposed to heat and flame.

Hazardous combustion products: Nitrogen oxides, hydrogen cyanide, hydrogen chloride, carbon oxides and other irritating fumes and smoke.

SECTION 6 — ACCIDENTAL RELEASE MEASURES

Personal precautions: Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate chemically protective equipment. Keep all other personnel upwind and away from the spill/release. Refer to Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.

Environmental precautions: Ensure any spilled liquid or foam portion of the product does not enter drains, sewers, waterways or confined spaces.

Spill response/Cleanup: Eliminate all sources of heat, sparks and flame. Ventilate area of release. Stop leak if you can do so without risk. Cover any spilled liquid or foam material with non-combustible absorbent material, such as vermiculite or sand, then shovel into a container for later disposal (see Section 13). If in solid state, collect and place in an appropriate container for later disposal. Spill area may be cleaned with a suitable solvent, such as Acetone. Follow the appropriate precautions for the solvent being used. Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

Powers Fasteners, Inc. • 2 Powers Lane, Brewster • NY, U.S.A. 10509 • Phone (914) 235-6300

SECTION 6 — ACCIDENTAL RELEASE MEASURES Continued

Prohibited materials: None known.

Special spill response procedures: In case of a transportation accident, contact CHEMTREC at 1-800-424-9300 or International at 1-703-527-3887. If a spill/release in excess of EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8002).

DOT/CERCLA Reportable quantity (RQ): None reported

SECTION 7 — HANDLING AND STORAGE

Safe handling procedures: This material is a toxic, flammable aerosol. Medical supervision of employees who come into contact with respiratory sensitizers is recommended. Persons with asthmatic-type conditions, chronic bronchitis, other chronic respiratory diseases or recurrent skin eczema or sensitization should be excluded from working with this product. Once a person is sensitized, no further exposure to the material that caused the sensitization should be permitted. Wear protective equipment during handling. Use in a well-ventilated area. Do not inhale vapors or mists. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks, flame and direct sunlight. Keep away from acids and incompatibles. Avoid moist conditions. Do not puncture or incinerate containers. Stand upwind of all opening and spraying operations. Keep container closed when not in use. Assume empty containers contain residues, which are hazardous. Wash hands before eating, drinking, smoking or use of toilet facilities. Launder contaminated clothing before reuse.

Storage requirements: Store in a cool, dry, well-ventilated area away from sources of heat, ignition and sunlight. Ideal storage temperature is 10 – 21.1°C / 50 – 70°F. Keep away from incompatibles. Shelf life of 2 years, provided recommended storage requirements are met. Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel. Inspect periodically for damage or leaks. No smoking in the area.

Special packaging materials: Always keep in containers made of the same materials as the supply container.

SECTION 8 — EXPOSURE CONTROLS AND PERSONAL PROTECTION

Ventilation and engineering controls: Use adequate ventilation to maintain air contaminants below exposure limits. Local and/or general exhaust may be required

Respiratory protection: Respiratory protection is required if the airborne concentration exceeds exposure limits. When concentrations exceed the exposure limits specified, use NIOSH/MSHA-approved air-purifying respirators. In poorly ventilated or confined spaces, use a NIOSH/MSHA-approved self-contained breathing apparatus. Advice should be sought from respiratory protection specialists.

Skin protection and other protective equipment: Protective gloves impervious to the material must be worn during use. Confirmation of what type of material is most suitable for the intended application, should be obtained from glove suppliers. Additional impervious protective clothing, is recommended to prevent skin contact. An eyewash station and safety shower should be made available in the immediate working area.

Eye / face protection: Use chemical splash goggles. Contact lenses should not be worn.

General hygiene considerations: Do not inhale vapors and mists. Avoid contact with eyes, skin and clothing. Do not eat, drink or smoke when working. Upon completion of work, wash hands before eating, drinking, smoking or use of toilet facilities. Remove soiled clothing and wash it thoroughly before reuse.

Permissible exposure levels: For individual ingredient exposure levels, see Section 2.

SECTION 9 — PHYSICAL AND CHEMICAL PROPERTIES

Physical state, odor and appearance: Aerosolized yellowish liquid / foam. Mild amine odor, characteristic of polyurethane.

Odor threshold: N/Av.

Specific gravity: 1.1

Vapor pressure: N/Av.

Boiling point: N/Av.

Evaporation rate (n-Butyl acetate = 1): N/Av.

Coefficient of water/oil distribution: N/Av

Solubility in water: Insoluble.

Vapor density (Air = 1): >1

Freezing point: N/Av.

pH: N/Av

Volatiles (% by weight): 20.

SECTION 10 — REACTIVITY AND STABILITY DATA

Stability and reactivity: Stable under the recommended storage and handling conditions. Product reacts with water to produce Carbon dioxide. Reaction is slow at temperatures less than 49°C (120°F).

Powers Fasteners, Inc. • 2 Powers Lane, Brewster • NY, U.S.A. 10509 • Phone (914) 235-6300

SECTION 10 — REACTIVITY AND STABILITY DATA Continued

Hazardous polymerization: Uncontrolled exothermic polymerization may occur on contact with incompatible materials or at elevated temperatures (175 – 204°C / 347 – 399°F).

Conditions to avoid: Avoid heat (>43°C / 110°F), moisture and contact with incompatible materials.

Materials to avoid (incompatibles): Strong oxidizers (e.g. Chlorine, Peroxides, etc.), moisture, strong acids, alcohols, strong bases, metal compounds and amines.

Hazardous decomposition products: May form 4,4'-Methylene dianiline during reaction with water. Refer also to 'Hazardous Combustion products', Section 5.

SECTION 11 — TOXICOLOGICAL INFORMATION

Toxicological data: There is no available data for the product itself, only for the ingredients. See below for individual ingredient acute toxicity data.

Ingredients	LC ₅₀ (4hr) inh, rat	LD ₅₀ (mg/kg)	
		oral, rat	dermal, rabbit
Polymethylene polyphenyl isocyanate	490 mg/m ³	>10,000	>6200
Dimethyl ether	Not available	Not available	Not available
Propane	Not available	Not available	Not available
Isobutane	658 mg/L (As 'Butane')	Not available	Not available

Carcinogenic status: None of the ingredients listed are classified as carcinogenic by IARC, ACGIH, NTP or OSHA.

Reproductive effects, Teratogenicity, Mutagenicity: None known.

Sensitization to material: May cause severe respiratory sensitization with asthmatic symptoms such as wheezing and chest tightness. May cause severe skin sensitization with allergic contact dermatitis symptoms such as swelling, rash and eczema.

Other important hazards: CNS depression may result from exposure.

Synergistic materials: Not available.

SECTION 12 — ECOLOGICAL INFORMATION

Chemical fate information: The ecological characteristics of this product have not been fully investigated. The product should not be allowed to enter drains or water courses, or be deposited where it can affect ground or surface waters. Do not discharge product unmonitored into the environment. Insoluble in water, and will react with water to produce carbon dioxide, and inert, non-biodegradable solids.

Ecotoxicological information: There is no data available on the product itself.

SECTION 13 — DISPOSAL CONSIDERATIONS

Handling for disposal: Empty containers may contain product residue or vapors. Handle according to recommendations listed in Section 7.

Methods of disposal: Dispose in accordance with all applicable federal, state, provincial and/or local regulations. Contact your local, state, provincial and/or federal environmental agency for specific rules.

RCRA: If this product, as supplied, becomes a waste, it may meet the criteria of a hazardous waste as defined under RCRA, Title 40 CFR 261. Under the RCRA, it is the responsibility of the waste generator to determine the proper waste identification and disposal method. For disposal of unused or waste material, check with local, state and federal environmental agencies.

SECTION 14 — TRANSPORTATION INFORMATION

US 49 CFR information:

Proper Shipping Name:	Aerosols	Label Codes:	2.1
Hazard Class - Primary:	2.1	RQ LBS:	None reported.
Identification No.:	UN1950	RQ Components:	Not applicable.
Packing Group:	Not applicable	Marine Pollutant:	None.

Special Transportation Notes: For shipments by ground within the United States, the Limited Quantity or Consumer commodity exceptions may apply. Under the US 49 CFR, refer to Sections 173.306 and 173.307 for additional exception information, if shipping under one of these exceptions.

Powers Fasteners, Inc. • 2 Powers Lane, Brewster • NY, U.S.A. 10509 • Phone (914) 235-6300

SECTION 14 — TRANSPORTATION INFORMATION Continued

Canadian Transportation of Dangerous Goods Regulations (TDGR) information:

Proper Shipping Name: AEROSOLS UN No.: UN1950
Primary Class(es): 2.1 Subsidiary Class(es): None
Packing Group: Not applicable

Other Shipping Information: This product may be shipped by ground within Canada, as a 'Consumer commodity' or a 'Limited Quantity'. Refer to Section 1.17 for Limited Quantity and Consumer Commodity Information, if shipping under this exemption.

International IATA / ICAO information:

Proper Shipping Name: Aerosols, flammable Packing Instruction(s), passenger aircraft: Y203 or 203
UN No.: UN1950 Packing Instruction(s), cargo aircraft only: 203
Primary Class(es): 2.1
Subsidiary Class(es): None
Packing Group: Not applicable

Other Shipping Information: This product may be shipped internationally by air, as a 'Limited Quantity'. Combination packagings must be used and the maximum gross weight of the package must not exceed 30 kg (66 lbs). Refer to Packing Instruction Y203, including all State and operator variations, for additional Limited Quantity information.

International IMO/IMDG information:

Proper shipping name: AEROSOLS UN number: UN1950
Class: 2.1 Packing Group: Not applicable
EmS: F-D, S-U
Marine Pollutant (Yes/No): No

Other Shipping Information: This product may be shipped internationally by sea, as a 'Limited Quantity'. Combination packagings must be used and the maximum gross weight of the package must not exceed 30 kg. Refer to the IMDG Code Chapter 3.4 for additional Limited Quantity requirements, if shipping under this exemption.

SECTION 15 — REGULATORY INFORMATION

US Federal Information:

TSCA information: All ingredients are listed on the TSCA inventory.

CERCLA Reportable Quantity (RQ) (40 CFR 117.302): None reported.

SARA TITLE III:

- Sec. 302, Extremely Hazardous Substances, 40 CFR 355:* No Extremely Hazardous Substances are present.
Sec. 311 and 312, MSDS Requirements, 40 CFR 370 Hazard Classes: Immediate (Acute); Delayed (Chronic); Fire Hazard; Pressure Hazard. Under SARA Sections 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are 500 pounds for the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.
Sec. 313, Toxic Chemicals Notification, 40 CFR 372: This material may be subject to SARA notification requirements, since it contains Polymethylene polyphenyl isocyanate, a Toxic Chemical constituent above its *de minimus* concentration.

US State Right to Know Laws:

California Proposition 65: To the best of our knowledge, this product does not contain any chemicals known to the State of California to cause cancer or reproductive harm.

New Jersey Labeling Requirements: This product contains the following substances that may be required to be disclosed on product labeling:

Chemical Name	CAS #	% (weight)	New Jersey Hazardous Substance
Polymethylene polyphenyl isocyanate	9016-87-9	30 - 60	Yes
Dimethyl ether	115-10-6	7 - 13	Yes
Propane	74-98-6	1 - 5	Yes
Isobutane	75-28-5	1 - 5	Yes

Powers Fasteners, Inc. • 2 Powers Lane, Brewster • NY, U.S.A. 10509 • Phone (914) 235-6300

SECTION 15 — REGULATORY INFORMATION Continued**International Information:**

Canadian WHMIS Classification: Class A (*Compressed gas*); Class B5 (*Flammable aerosols*); Class D1A (*Materials Causing Immediate and Serious Toxic Effects, Very Toxic Material*), Class D2A (*Materials Causing Other Toxic Effects, Very Toxic Material*), Class D2B (*Materials Causing Other Toxic Effects, Toxic Material*).

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and this MSDS contains all the information required by the CPR.

Canadian CEPA information: All ingredients are present on the DSL.

SECTION 16 — OTHER INFORMATION**NFPA Rating:**

0 - Minimal 1 - Slight 2 - Moderate 3 - Serious 4 - Severe

Health: 2 Flammability: 3 Instability: 0 Special Hazard: None

MATERIAL SAFETY DATA SHEET

Polypro® Froth "B" Component

* SECTION IV - FIRE AND EXPLOSION HAZARD DATA *

FLASH POINT (METHOD): 425°F (PMCC) **Flammable Limits (LFL/UFL) N.D.**
EXTINGUISHING MEDIA: Water, CO₂, Chemical Foam
SPECIAL FIRE FIGHTING PROCEDURES: Wear self contained breathing apparatus to avoid inhalation of toxic thermal decomposition products. Keep container cool.
UNUSUAL FIRE AND EXPLOSIVE HAZARDS: Decomposition under conditions of high temperatures results in the generation of hazardous gases.

* SECTION V - REACTIVITY DATA *

STABILITY: Stable
INCOMPATIBILITY (MATERIALS TO AVOID): Isocyanates, Strong Oxidizers, Strong Acids, and Alkali or alkaline earth metals. (Aluminum, zinc, beryllium, copper, brass.)
HAZARDOUS POLYMERIZATION: Will not occur
HAZARDOUS DECOMPOSITION PRODUCTS: Thermal decomposition products include carbon monoxide, carbon dioxide, nitrous oxides, and other compounds.

* SECTION VI - HEALTH HAZARD DATA *

ROUTES OF ENTRY: **Inhalation** - The components are irritating to the upper respiratory tract and nasal passages. **Eyes** - Causes irritation upon contact and possible corneal damage. Symptoms include burning, tearing and blurring of vision.
Skin - Contact with the skin may lead to rash and swelling on the affected area.
Ingestion - none reported
MATERIAL IN COMPOSITION IS AN: Acute Chronic health hazard.
CARCINOGENCY: None of the components of this product are known to be carcinogenic in nature.

EMERGENCY & FIRST AID PROCEDURES

EYE CONTACT: Flush with running water for at least 15 minutes. Contact a physician if irritation persists.
SKIN CONTACT: Wash thoroughly with soap and water. Remove and wash contaminated clothing before reuse.
INHALATION: Remove to fresh air. If breathing is difficult, contact a physician.
INGESTION: If ingested, induce vomiting and call a physician at once.

EMPLOYEE PROTECTION RECOMMENDATIONS

EYE PROTECTION: Chemical safety goggles or full face shield.
GLOVES: Chemical safety gloves
RESPIRATORY PROTECTION: The Polyurethane Division of the SPI recommends the use of air supplied breathing apparatus or its equivalent.
VENTILATION: Provide general and/or local exhaust ventilation to remove vapors to a level below the TLV.

10014

MATERIAL SAFETY DATA SHEET

Polypro® Froth "B" Component

*** SECTION VII - SPILL OR LEAK PROCEDURES ***

STEPS TO TAKE IN THE EVENT OF SPILL: Avoid breathing of vapors present, wear air supplied breathing apparatus. Contain spill and absorb with material such as sand, sweeping material, or diatomaceous earth. Place material in suitable container for disposal in a licensed facility. Wash affected area with water after removal of absorbent.

WASTE DISPOSAL METHOD: Incinerate or bury in an approved landfill in compliance with all applicable federal, state and local environmental control regulations.

SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT (SARA) TITLE III:

Section 302 - Extremely hazardous substances: NONE

Section 313 - Toxic Chemicals: NONE

*** SECTION VIII - SPECIAL PRECAUTIONS AND STORAGE DATA ***

STORAGE TEMPERATURE: MINIMUM: 7°C (45°F) MAXIMUM: 32°C (90°F)

AVERAGE SHELF LIFE: 6 Months

PRECAUTIONS IN HANDLING AND STORAGE: Contents under pressure. Material is hygroscopic, keep containers tightly closed to avoid contamination. Avoid breathing vapors if present. Avoid eye and skin contact. Employee education and training in the safe handling of this product is required under OSHA guidelines.

*** SECTION XI - SHIPPING DATA ***

D.O.T. Shipping name.....	COMPRESSED GAS N.O.S. (CHLORODIFLOUROMETHANE MIXTURE)
D.O.T. Hazard Class.....	2.2
D.O.T. Labels Required.....	NON FLAMMABLE GAS
D.O.T. Placards Required.....	NON FLAMMABLE GAS
Bill of Lading Description.....	COMPRESSED GAS N.O.S. (CHLORODIFLOUROMETHANE MIXTURE) 2.2 UN1956

Prepared By : Pat L. Murray

Date: May 14, 1997

This information is furnished without warranty, expressed or implied, except that it is accurate to the best knowledge of Polyfoam Products, Inc. The data on these sheets relates only to the specific material designated herein. Polyfoam Products, Inc. assumes no legal responsibility for use or reliance upon this data.

10014

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

SPECIAL FIREFIGHTING PROCEDURES: WATER MAY BE USED TO COOL CLOSED CONTAINERS TO PREVENT PRESSURE BUILD-UP AND POSSIBLE AUTOIGNITION OR EXPLOSION WHEN EXPOSED TO EXTREME HEAT. WEAR A FULL FACE POSITIVE PRESSURE SELF CONTAINED BREATHING APPARATUS WHEN FIGHTING FIRES.

SECTION V - HEALTH HAZARD DATA

EFFECTS OF OVER EXPOSURE: INHALATION: SHORTNESS OF BREATH, DIZZINESS, AND LIGHTEADEDNESS. EYE: CAN CAUSE EYE IRRITATION. SKIN: SLIGHT SKIN IRRITATION. CAN CAUSE DERMATITIS. INGESTION: MAY CAUSE CHEMICAL PNEUMONIA IF ASPIRATED INTO LUNG

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE: NONE RECOGNIZED.

EMERGENCY AND FIRST AID PROCEDURES: CALL PHYSICIAN IMMEDIATELY!!: IF IN EYES: FLUSH WITH LARGE AMOUNTS OF WATER, LIFTING UPPER AND LOWER LIDS OCCASIONALLY, GET MEDICAL ATTENTION. IF SWALLOWED: DO NOT INDUCE VOMITING. IMMEDIATELY DRINK TWO GLASSES OF WATER. NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. CALL PHYSICIAN IMMEDIATELY. IF BREATHED: IF AFFECTED. REMOVE INDIVIDUAL TO FRESH AIR. IF BREATHING IS DIFFICULT GIVE OXYGEN. IF BREATHING HAS STOPPED GIVE ARTIFICIAL RESPIRATION. KEEP PERSON WARM, QUIET, GET MEDICAL ATTENTION. IF ON SKIN: THOROUGHLY WASH EXPOSED AREA WITH SOAP AND WATER. REMOVE CONTAMINATED CLOTHING. LAUNDRY CONTAMINATED CLOTHING BEFORE RE-USE.

EFFECTS OF CHRONIC OVEREXPOSURE: OVEREXPOSURE TO THIS MATERIAL (OR ITS COMPONENTS) HAS BEEN SUGGESTED AS A CAUSE OF THE FOLLOWING EFFECTS IN HUMANS: CENTRAL NERVOUS SYSTEM EFFECTS. OVEREXPOSURE TO THIS MATERIAL (OR ITS COMPONENTS) HAS BEEN SUGGESTED AS A CAUSE OF THE FOLLOWING EFFECTS IN HUMANS: CARDIAC ABNORMALITY. INHALATION OF HIGH CONCENTRATIONS OF VAPOR IS HARMFUL AND MAY CAUSE HEART IRREGULARITIES, UNCONSCIOUSNESS OR DEATH. VAPOR REDUCES OXYGEN AVAILABLE FOR BREATHING AND IS HEAVIER THAN AIR. PROLONGED EXPOSURE ABOVE THE OSHA PERMISSIBLE EXPOSURE LIMITS MAY RESULT IN KIDNEY AND LIVER DAMAGE.

PRIMARY ROUTE(S) OF ENTRY: SKIN CONTACT INHALATION INGESTION EYE CONTACT

SECTION VI - REACTIVITY DATA

HAZARDOUS DECOMPOSITION PRODUCTS: BURNING CAN PRODUCE CARBON MONOXIDE AND/OR CARBON DIOXIDE AND TRACE PHOSGENE GAS.

CONDITIONS TO AVOID: OPEN FLAMES OR ELECTRICAL ARCS. MIXING WITH CONCENTRATED OXIDIZING OR REDUCING AGENTS.

INCOMPATIBILITY: AVOID CONTACT WITH STRONG OXIDIZING AGENTS, STRONG ALKALIES, AND STRONG MINERAL ACIDS. AVOID CONTACT WITH CHLORINATED SOLVENTS. AVOID CONTACT WITH PEROXIDES, BROMINE, CHLORINE, AND FLUORINE.

(Continued on Page 3)

SECTION VI - REACTIVITY DATA

HAZARDOUS POLYMERIZATION: Will not occur under normal conditions.
STABILITY: This product is stable under normal storage conditions.

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: VENTILATE AREA. REMOVE ALL SOURCES OF IGNITION. CLEAN UP WITH INERT MATERIALS AND DISPOSE OF IN ACCORDANCE WITH ALL LOCAL, STATE, AND FEDERAL REGULATIONS.

WASTE DISPOSAL METHOD: AEROSOL CONTAINER: DO NOT PUNCTURE OR INCINERATE. EMPTY CONTAINERS MAY BE DISPOSED OF THROUGH NORMAL CHANNELS. FULL OR PARTIALLY FILLED CONTAINERS ARE CONSIDERED HAZARDOUS WASTE.

SECTION VIII - SAFE HANDLING AND USE INFORMATION

RESPIRATORY PROTECTION: NIOSH/OSHA APPROVED RESPIRATOR TYPES SUITABLE FOR MATERIALS IN SECTION II RECOMMENDED. APPROVED CHEMICAL/MECHANICAL FILTERS RECOMMENDED WHEN VENTILATION IS RESTRICTED. APPROVED AIRLINE TYPE RESPIRATORS OR HOODS RECOMMENDED IN CONFINED AREAS.

VENTILATION: SUFFICIENT VENTILATION, IN VOLUME AND PATTERN, SHOULD BE PROVIDED TO KEEP AIR CONTAMINATION BELOW CURRENT APPLICABLE OSHA PERMISSIBLE EXPOSURE LIMIT OR ACGHI'S TLV LIMIT.

PROTECTIVE GLOVES: RECOMMENDED FOR PROLONGED OR REPEATED CONTACT. WEAR RESISTANT GLOVES SUCH AS POLYVINYL ALCOHOL, POLYETHYLENE.

EYE PROTECTION: CHEMICAL GOGGLES WITH SIDE SHIELDS OR FACE SHIELD RECOMMENDED.

OTHER PROTECTIVE EQUIPMENT: PROTECTIVE CLOTHING AND EQUIPMENT: SEE 29 CFR 1910.133 AND 132.

HYGENIC PRACTICES: WASH HANDS BEFORE EATING OR SMOKING.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: DO NOT STORE IN DIRECT SUNLIGHT, NEAR OPEN FLAMES, OR AT TEMPERATURES EXCEEDING 120 F. DO NOT SMOKE WHILE SPRAYING. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING VAPORS AND INHALING CONTENTS CAN BE HARMFUL OR FATAL.

OTHER PRECAUTIONS: No Information.

(Continued on Page 4)

SECTION X - HMIS RATINGS

771159

HMIS RATINGS - HEALTH: 1 FLAMMABILITY: 3 REACTIVITY: 1

SECTION XI - TRANSPORTATION AND STORAGE

SARA SECTION 313:

This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

CHEMICAL NAME	CAS NUMBER	WT/WT % IS LESS THAN
PROPRIETARY MIXTURE	N/A	50.0 %

PREVIOUS MSDS REVISION DATE: 01/18/01

LEGEND: N.A. - Not Applicable. N.F. - Not Established.
N.O. - Not Determined

TRANSPORTATION AND STORAGE: DOT CLASSIFICATION: CONSUMER COMMODITY ORM-D.

NFPA CODES: No Information.

SECTION XII - OTHER REGULATORY INFORMATION

OTHER REGULATORY INFORMATION: DISCLAIMER: THE FOREGOING INFORMATION HAS BEEN COMPILED FROM SOURCES BELIEVED TO BE ACCURATE BUT IS NOT WARRANTED TO BE. RECIPIENTS ARE ADVISED TO CONFIRM IN ADVANCE OF NEED THAT DATA IS CORRECT. STANDARDS CHANGE WITHOUT NOTICE. IT IS THE RESPONSIBILITY OF THE RECIPIENT TO ASSURE THAT THEIR PERSONNEL HAVE BEEN NOTIFIED OF ANY CHANGES WHICH MAY AFFECT THEM. THE DATA PROVIDED ON THIS MSDS ARE NOT MEANT TO BE USED AS SPECIFICATIONS, ONLY AS GUIDLINE INFORMATION AS TO THE SAFE USE OF THE PRODUCT. USER SHOULD REFER TO APPLICABLE LAWS BEFORE USE. THIS MSDS COMPLIES WITH GUIDELINES SET BY 29 CFR 1910.1200.

PROPOSITION 65 STATEMENT: No Information.

The information contained on this MSDS has been checked and should be accurate. However, it is the responsibility of the user to comply with all Federal, State, and Local laws and regulations.

CALL CHEMTREC DAY OR NIGHT 800-424-9300*** SECTION I - PRODUCT INFORMATION ***

Manufacturer's name	Polyfoam Products, Inc.	Phone number:	(281) 350-8888
Product Name:	POLYPRO® Froth A	Chemical Family:	Diisocyanate
Synonyms:	Froth A Component	Chemical name:	Not Applicable (mixture)
C.A.S. Number:	9016-87-9	Date Revised:	January 31, 2003
Date Prepared:	October 17, 1989		

*** SECTION II - INGREDIENTS ***

COMPONENTS	% w/w	CAS#	OSHA- PEL
Polymeric Diphenylmethane Diisocyanate (polymeric MDI) Contains: 4,4'-Diphenylmethane Diisocyanate (4,4'-MDI) (approx. 45%)	>80	9016-87-9	not listed
MDI isomers/oligomers		101-68-8	0.02 ppb ceiling
		9016-87-9	not listed
HCFC-22	<20	75-45-6	not listed

*** SECTION III - PHYSICAL / CHEMICAL CHARACTERISTICS ***

Appearance:	Liquid and gas under pressure
Color:	Brown
Odor:	Slight musty odor
Molecular Weight	not applicable (mixture)
Melt Point/Freeze Point:	Below 32°F (0°C)
Boiling Point:	less than 0°F
Vapor Pressure:	151 psig @ 25°C
Vapor Density:	3.03 @ 25°C (Air = 1)
Viscosity:	130 cps @ 77° F (25°C)
Specific Gravity:	1.23 @ 77°F (25°C)
% Volatile by Volume:	less than 20%
Solubility In Water:	Not Soluble. Reacts slowly with water to liberate CO ₂ gas.

*** MATERIAL SAFETY DATA SHEET ***
POLYPRO® Froth "A"

*** SECTION IV - FIRE AND EXPLOSION HAZARD DATA ***

FLASH POINT (METHOD) °F (°C): 425.0°F (218°C)
EXTINGUISHING MEDIA: Dry chemical; carbon dioxide, appropriate chemical foam, water spray for large fires. If water is used, very large quantities are required. Reaction with water may be vigorous. Contain runoff water with temporary barriers.
SPECIAL FIRE FIGHTING PROCEDURES/UNUSUAL FIRE OR EXPLOSION HAZARDS: Full emergency equipment with self-contained breathing apparatus and full protective clothing should be worn by firefighters. Containers are equipped with a pressure relief valve intended to vent any excessive build up of pressure exerted by gases generated by heat, thermal decomposition or combustion. (See Section VIII). Therefore, use cold water to cool fire-exposed containers.

*** SECTION V - HUMAN HEALTH DATA ***

Hazardous Ingredients:

4.4= Diphenylmethane Diisocyanate
HCFC-22

OSHA PEL CEILING

0.02 PPM
not listed

ROUTES OF ENTRY: **Skin Contact** - From liquid and aerosols (spray application). **Inhalation** - An inhalation hazard can exist from aerosols or vapors formed during heating, foaming, or spraying. Vapor reduces oxygen available for breathing and is heavier than air.

HUMAN EFFECTS AND SYMPTOMS OF OVEREXPOSURE:

ACUTE INHALATION: **Acute Inhalation**- 4-4= MDI vapors or mists at concentrations above the TLV can irritate (burning sensation) the mucous membranes in the respiratory tract (nose, throat, lungs) causing runny nose, sore throat, coughing, chest discomfort, shortness of breath, and reduced lung function (breathing obstruction). Persons with a pre-existing, nonspecific bronchial hyperreactivity can respond to concentrations below the 4-4= MDI TLV with similar symptoms as well as asthma attack. Exposure well above the 4-4= MDI TLV may lead to bronchitis, bronchial spasm and pulmonary edema (fluid in lungs). These affects are usually reversible. Chemical or hypersensitive pneumonitis, with flu-like symptoms (e.g. fever and chills) has also been reported. These symptoms can be delayed up to several hours after exposure. HCFC-22 vapor reduces oxygen available, and can cause dizziness or loss of consciousness. **Chronic Inhalation** - As a result of previous repeated over-exposures to 4-4= MDI or a single large dose, certain individuals develop isocyanate sensitization (chemical asthma) which will cause them to react to a later exposure to Isocyanate at levels well below the TLV. These symptoms, which can include chest tightness, wheezing, cough, shortness of breath, or asthma attack, could be immediate or delayed (up to several hours after exposure). Similar to many non-specific asthmatic responses, there are reports that once sensitized an individual can experience these symptoms upon exposure to dust, cold air, or other irritants. This increased lung sensitivity can persist for weeks and in severe cases for several years. Overexposure to Isocyanates has also been reported to cause lung damage (including decrease in lung function), which may be permanent. Sensitization can either be temporary or permanent.

ACUTE SKIN CONTACT:- Isocyanates react with skin protein and moisture and can cause irritation which may include the following symptoms: reddening, swelling, rash, scaling, or blistering. Cured material is difficult to remove. **Chronic Skin Contact** - Prolonged contact can cause reddening, swelling, rash, scaling, blistering, and in some cases skin sensitization. Individuals who have developed a skin sensitization can develop these symptoms from contact with liquid or vapors. Animal tests have indicated that respiratory sensitization can result from skin contact with MDI. This data reinforces the need to prevent direct skin contact with MDI.
(See Toxicological Information, SENSITIZATION.)

ACUTE EYE CONTACT: Liquid, aerosols or vapors are irritating and can cause tearing, reddening, and swelling. If left untreated, corneal damage can occur and injury is slow to heal. However, damage is usually reversible. See section VI for treatment.

CHRONIC EYE CONTACT: None Found

*** MATERIAL SAFETY DATA SHEET ***
POLYPRO® Froth "A"

*** SECTION V - HUMAN HEALTH DATA * (Cont.)**

ACUTE INGESTION: Can result in irritation and corrosive damage in the mouth, stomach tissue and the digestive tract. Symptoms can include sore throat, abdominal pain, nausea, vomiting, and diarrhea.

CHRONIC INGESTION: None Found

MEDICAL CONDITIONS:

Aggravated By Exposure - Asthma, other respiratory disorders (bronchitis, emphysema, bronchial hyperactivity), skin allergies, eczema.

CARCINOGENICITY - None of the ingredients are listed by NTP, IARC, or regulated by OSHA as carcinogens.

*** SECTION VI - EMERGENCY AND FIRST AID PROCEDURES ***

EYE CONTACT: Flush with copious amount of water, preferably, lukewarm water for at least 15 minutes, holding eyelids open all the time. Refer individual for physician or ophthalmologist for immediate follow-up.

SKIN CONTACT: Remove contaminated clothing. Wash affected skin thoroughly with soap and water. Wash contaminated clothing thoroughly before reuse. For severe exposures, get under safety shower after removing clothing, then get medical attention. For lesser exposures, seek medical attention if irritation develops or persists after the area is washed.

INHALATION: Move to area free from risk of further exposure. Administer oxygen or artificial respiration as needed. Obtain medical attention. Asthmatic-type symptoms may develop and may be immediate or delayed up to several hours. Consult physician should this occur.

INGESTION: **DO NOT INDUCE VOMITING.** Give 1 to 2 cups of milk or water to drink. **DO NOT GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON.** Consult physician.

NOTE TO PHYSICIAN: **Eyes** - Stain for evidence of corneal injury. If cornea is burned, instill antibiotic steroid preparation frequently. Workplace vapors have produced reversible corneal epithelial edema impairing vision. **Skin** - This compound is a known skin sensitizer. Treat symptomatically as for contact dermatitis or thermal burns. If burned, treat as thermal burn. **Ingestion** - Treat symptomatically. There is no specific antidote. Inducing vomiting is contradicted because of the irritating nature of this compound. **Respiratory** - This compound is a known pulmonary sensitizer. Treatment is essentially symptomatic. An individual having a skin or pulmonary sensitization to this material should be removed from exposure to any isocyanate.

*** SECTION VII - EMPLOYEE PROTECTION RECOMMENDATIONS ***

EYE PROTECTION - Liquid chemical goggles or full-face shield. Vapor resistant goggles should be worn when contact lenses are in use. In a splash hazard environment chemical goggles should be used in combination with a full face - shield.

SKIN PROTECTION - Permeation resistant gloves (butyl rubber, nitrile rubber, polyvinyl alcohol). However, please note that PVA degrades in water. Cover as much of the exposed skin area as possible with appropriate clothing. If skin creams are used, keep the area covered by the cream to a minimum.

RESPIRATORY PROTECTION: Concentrations greater than the 4,4= MDI TLV can occur during spraying, heating, or use in a poorly ventilated area. In such cases, or whenever concentrations of 4,4= MDI exceed the TLV, respiratory protection must be worn. A supplied-air respirator or a self-contained breathing apparatus is recommended. In situations where material is not sprayed or heated and a supplied air or self-contained apparatus is unavailable or its use impractical, at least an air-purifying respirator equipped with an organic cartridge and a particulate filter must be worn. **HOWEVER, THIS SHOULD BE PERMITTED ONLY FOR SHORT PERIODS OF TIME (LESS THAN ONE HOUR) AT RELATIVELY LOW CONCENTRATIONS (AT OR NEAR THE TLV).** However, due to the poor warning properties of 4,4= MDI, proper fit and timely replacement of filter elements must be ensured. Observe OSHA regulations for respirator use (29 CFR 1910.134).

*** MATERIAL SAFETY DATA SHEET ***
POLYPRO® Froth "A"

*** SECTION VII - EMPLOYEE PROTECTION RECOMMENDATIONS * (Cont.)**

VENTILATION: Local exhaust should be used to maintain levels below the 4,4= MDI TLV whenever Polypro® Froth A is processed, heated or spray applied. For spray applications, an air-supplied respirator must be worn. Standard reference sources regarding industrial ventilation (i.e., ACGIH Industrial Ventilation) should be consulted for guidance about adequate ventilation.

MONITORING: 4,4= MDI exposure levels should be monitored by accepted monitoring techniques to ensure that the TLV is not exceeded.

MEDICAL SURVEILLANCE: Medical supervision of all employees who handle or come in contact with 4,4= MDI is recommended. These should include pre-employment and periodic medical examinations with respiratory function tests (FEV, FVC as a minimum). Persons with asthmatic-type conditions, chronic bronchitis, other chronic respiratory type diseases or recurrent skin eczema or sensitization should be excluded from working with Polypro® Froth A. Once a person is diagnosed as sensitized by 4,4= MDI, no further exposure can be permitted.

OTHER: Safety showers and eye wash stations should be available. Educate and train employees in safe use of product. Follow all label instructions.

*** SECTION VIII - REACTIVITY DATA ***

STABILITY: This is a stable material

POLYMERIZATION: May occur if in contact with moisture or other materials which react with isocyanates. May occur at temperatures over 400°F (204°C), may cause polymerization.

INCOMPATIBILITY: (Materials to Avoid) - Water, amines, strong bases, alcohols. Will cause some corrosion to copper alloys and aluminum.

HAZARDOUS DECOMPOSITION PRODUCTS: By high heat and fire - carbon monoxide, oxides of nitrogen, traces of HCN, MDI vapors or aerosols, HCFC-22 vapor.

*** SECTION IX - SPILL OR LEAK PROCEDURES ***

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Evacuate and ventilate spill area; dike spill to prevent entry into water system; wear full protective equipment, including respiratory equipment during cleanup. (See Section VII).

MAJOR SPILL: Call Polyfoam Products, Inc. at 1-(281)-350-8888. If transportation spill, call Chemtrec 1-(800) 434-9300. If temporary control of isocyanates vapor is required, a blanket of protein foam (available at most fire departments) may be placed over the spill. Large quantities may be pumped into closed, but not sealed, containers of disposal.

MINOR SPILL: Absorb Polypro® Froth A with sawdust or other absorbent, shovel into suitable unsealed containers, transport to well-ventilated area (outside) and treat with neutralizing solution: mixture of water (80%) with non-ionic surfactant Tergitol TMN-10 (20%), or; water (90%), concentrated ammonia (3-8%) and detergent (2%). Add about 10 parts of neutralizer per part of Polypro® Froth A with mixing. Allow to stand uncovered for 48 hours to let CO₂ escape.

CLEAN-UP: Decontaminate floor with decontamination solution letting stand for at least 15 minutes.

CERCLA (SUPERFUND) REPORTABLE QUANTITY: None reported.

WASTE DISPOSAL METHOD: Waste must be disposed of in accordance with federal, state, and local environmental control regulations. Incineration is the preferred method. Empty containers must be handled with care due to product residue. Decontaminate containers prior to disposal. Empty decontaminated containers should be crushed to prevent reuse. **DO NOT HEAT OR CUT EMPTY CONTAINER WITH ELECTRIC OR GAS TORCH.** (See Sections IV and VIII)
Vapors and gases may be highly toxic.

*** MATERIAL SAFETY DATA SHEET ***
POLYPRO® Froth "A"

*** SECTION X - SPECIAL PRECAUTIONS AND STORAGE DATA ***

STORAGE TEMPERATURE (MIN./MAX.): 64°F (18°C) / 86°F (30°C)
AVERAGE SHELF LIFE: 6 months

SPECIAL SENSITIVITY

(HEAT, LIGHT, MOISTURE): If container is exposed to high heat, 400°F (204°C) or higher, or contaminated with water, pressure can be generated. Containers are equipped with a pressure relief valve intended to vent any excessive build up of pressure exerted by gases generated by heat or moisture contamination.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Store in tightly closed containers to prevent moisture contamination. Do not reseal if contamination is suspected. Avoid contact with skin and eyes. Do not breathe aerosols or vapors. Warning properties (irritation of the eyes, nose and throat or odor) are not adequate to prevent chronic overexposure from inhalation. This material can produce asthmatic sensitization upon either single inhalation exposure to a relatively high concentration or upon repeated inhalation exposures to lower concentrations. Exposure to vapors or heated Polypro® Froth A can be extremely dangerous. Employee education and training in the safe use and handling of this compound are required under the OSHA Hazard Communication Standard.

*** SECTION XI - SHIPPING DATA ***

HAZARD LABEL(s): Non Flammable Gas
HAZARD PLACARD(s): Non Flammable Gas

Transportation Emergency Telephone Number: 1-800-424-9300 (CHEMTREC)

*** SECTION XII - ANIMAL TOXICITY DATA ***

ACUTE TOXICITY

ORAL, LD50: Greater than 15,800 mg/kg (Rats) for 4-4=MDI

DERMAL, LD50: Greater than 5010 but less than 7,940 mg/kg (Rabbits) for 4-4=MDI

INHALATION, LC50: The 4-hour LC50 for polymeric MDI in rats ranges from 370 to 490 mg/m³. The LC50 for monomeric MDI was estimated to be between 172 and 187 mg/m³. The 4 hour LC50 for HCFC-22 is 220,000 ppm in rats.

EYE EFFECTS: Slightly irritating. A maximum primary eye irritation score for polymeric MDI of 12.0/110 (24 hr) was obtained. This score is fairly typical for a number of MDI products.

SKIN EFFECTS: Slight to moderate irritant. Primary dermal irritations scores are typically below 3.4/8.0 (Draize).

SENSITIZATION: Has been known to produce dermal sensitization in guinea pigs, rabbits, and dogs. Although not well defined in experimental animals models, Polypro® Froth A can induce pulmonary and dermal sensitization in humans. In addition, there is some evidence to suggest that cross-sensitization between different types of diisocyanates may occur.

*** MATERIAL SAFETY DATA SHEET ***
POLYPRO® Froth "A"

*** SECTION XII - ANIMAL TOXICITY DATA * (Cont.)**

CHRONIC TOXICITY: In a chronic inhalation exposure study, rats were exposed to an aerosol of polymeric MDI for 6 hours per day, 5 days per week for a period of two years. The exposure concentrations were 0, 0.2, 1.0, and 6.0 mg/m³. Microscopic examination of tissues revealed the effects of irritation to the nasal cavity and lungs in animals exposed to 1.0 and 6.0 mg/m³. The No Observable Effect Level (NOEL) was 0.2 mg/m³.

CARCINOGENICITY: In the same two year inhalation study described above (See Chronic Toxicity), the occurrence of pulmonary adenomas (benign tumors) and a single pulmonary adenocarcinoma (malignant tumor) was considered to be related to the exposure. These tumors were observed only in rats exposed to the high concentration of 6.0 mg/m³.

MUTAGENICITY: Monomeric MDI is positive in the Ames assay (with hepatic microsomal activation). However, it was negative in an in vivo-in vitro micronucleus assay.

AQUATIC TOXICITY: LC₅₀ - 24HR (static): Greater than 500mg/liter for *Daphnia magna*, *Limnea stagnalis*, and zebra fish (*Brachydanio rerio*) for both polymeric and monomeric MDI.

DEVELOPMENTAL TOXICITY: Rats were exposed to polymeric MDI at air concentrations of 0, 1, 4 and 12 mg/m³ during days 6-15 of gestation. Maternal Toxicity (including mortality) was observed at the highest concentration of 12 mg/m³ accompanied by embryo and fetal toxicity. However, no teratogenic effects even at this lethal concentration. HCFC-22 is not considered a unique hazard to the conceptus.

*** SECTION XIII - REGULATORY INFORMATION ***

OSHA STATUS: This product is hazardous under the criteria of the federal OSHA Hazard Communication Standard 29CFR 1910.1200.

TSCA STATUS: On TSCA inventory.

CERCLA REPORTABLE QUANTITY: 5000 lb for 4,4'-Diphenylmethane Diisocyanate, CAS# 101-68-8

SARA TITLE III:

SECTION 302 EXTREMELY

HAZARDOUS SUBSTANCES: None

SECTION 311/312

HAZARD CATEGORIES: Immediate Health Hazard; Delayed Health Hazard; Reactive Hazard

SECTION 313

TOXIC CHEMICALS: Polymeric Diphenylmethane Diisocyanate, CAS# 9016-87-9, 100%
4,4'-Diphenylmethane Diisocyanate, CAS# 101-68-8; Upper Bound 45%

RCRA STATUS: MDI is not listed as a hazardous waste. To the best of our knowledge, MDI does not meet the criteria of a hazardous waste if discarded in its purchased form. However, under RCRA, it is the responsibility of the user of the products to determine, at the time of disposal whether a product meets any of the criteria for a hazardous waste. This is because product uses, transformations, mixtures, processes, etc., may render the resulting material hazardous, under the criteria of ignitability, corrosivity, reactivity and toxicity characteristics under the new Toxicity Characteristics Leaching Procedure (TCLP) 40 Code of Federal Regulations 261.20-24.

3. HAZARDS IDENTIFICATION

Toxicity:

Harmful if swallowed. At elevated temperatures may cause irritation of the eyes and respiratory tract. Repeated and prolonged inhalation of graphite dust may cause pulmonary fibrosis, emphysema and pneumoconiosis. This product contains encapsulated silicon dioxide (quartz silica). No exposure to free respirable silica is anticipated during normal use of this product. Silica may be released by grinding or machining of coated material. Use NIOSH-approved dust/mist respirator when grinding or machining. This product contains encapsulated metal powder which contains copper and zinc. No exposure to free metal is anticipated during normal use. If grinding or machining coated surfaces, use appropriate protective measures. Repeated or prolonged exposure to metal dust may cause metal-fume fever, metallic taste and discoloration of the skin and hair.
 Eye and skin contact, ingestion, inhalation.

Primary Routes of Entry:

Signs and Symptoms of Exposure:

Slightly irritating to eyes, but does not injure eye tissue. May cause skin irritation. Inhalation of dust at levels above recommended exposure limit may cause metallic or sweet taste, irritation of pharynx and possible ulceration with perforation of the nasal septum. Moderately toxic if swallowed. Irritating to mouth, throat and stomach with nausea.

Ingredients	Percent	NTP:	ACGIH Carcinogens	IARC:
SILICA, QUARTZ 14808-60-7	0.1-0.5	Known Carcinogen		Group 1; Vol. 68; 1997

Medical Conditions Recognized as Being Aggravated by Exposure: Preexisting pulmonary and dermatological disorders

4. FIRST AID MEASURES

Ingestion:

If swallowed, DO NOT induce vomiting. Drink water or milk. Seek medical attention immediately. Never give fluids or induce vomiting if the victim is unconscious or having convulsions.

Inhalation:

No specific treatment is necessary since this material is not likely to be hazardous during normal use.

Product Name: 765-2569 BALKAMP ANTI-SEIZE LUBRICANT 40Z
Item No: 39772

Skin Contact: If exposed to excessive levels of dust or fumes, remove to fresh air and get medical attention if cough or other symptoms develop. Remove contaminated clothing. Wash area with soap and water. If irritation persists, seek medical attention.

Eye Contact: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention if irritation persists.

5. FIRE FIGHTING MEASURES

Flash Point (°F/C): 225 degrees F. Method: Pensky-Martens CC

Recommended Extinguishing Media: Water fog, carbon dioxide, foam, dry chemical.

Special Fire-Fighting Procedures: Wear approved positive-pressure self-contained breathing apparatus and protective clothing. Use water to cool exposed containers. Water stream directed into fire may cause frothing with subsequent spread of flame.

Hazardous Products Formed by Fire or Thermal Decomposition: Irritating vapors. Oxides of sulfur, Oxides of carbon.

Unusual Fire/Explosion Hazards: Finely divided dust in air may present explosion hazard. Prevent dust build up. Closed containers may rupture or explode when exposed to extreme heat.

Lower Explosive Limit: Not determined.

Upper Explosive Limit: Not determined.

6. ACCIDENTAL RELEASE MEASURES

Spill Procedures: Reclaim clean material. Contaminated material should be swept or shoveled into appropriate waste container for proper disposal.

7. HANDLING AND STORAGE

Storage: Store away from heat.

Handling: Avoid contact with skin and eyes. Avoid contact with vapors from heated material. Keep container closed when not in use. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Do not take internally.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Eyes: Safety glasses or goggles.

Skin: Clean clothing to cover skin. Cloth or synthetic gloves.

Ventilation: General ventilation is usually adequate.

Respiratory Protection: None normally required under general ventilation. If exposure levels are unknown or exceed TLV, use NIOSH-approved respirator.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Copper colored

Odor: Petroleum Odor

Boiling Point (°F): 550 - 4215 degrees F.

pH: Does not apply

Solubility in Water: Insoluble

Specific Gravity: Not determined

VOC Content(Wt.%): None

Vapor Pressure: Not Determined

Vapor Density (Air=1): Heavier than air

Evaporation Rate: <1 (butyl acetate = 1)

10. STABILITY AND REACTIVITY

Chemical Stability: Stable at normal conditions

Hazardous Polymerization: WILL NOT OCCUR

Incompatibilities: Strong mineral acids, strong bases or oxidants, nitrates, nitrites, chlorinated hydrocarbons, chlorides, palladium, selenium, manganese, magnesium, potassium chlorate, sodium carbonate, sulfates, diborane

Conditions to Avoid: Excessive heat.

Hazardous Products Formed by Fire or Thermal Decomposition: Irritating vapors. Oxides of sulfur, Oxides of carbon.

Product Name: 765-2569 BALKAMP ANTI-SEIZE LUBRICANT 4OZ
Item No: 39772

11. TOXICOLOGICAL INFORMATION

See Section 3

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended Method of Disposal: Disposal should be made in accordance with federal, state and local regulations.
US EPA Waste Number: NH - Not a RCRA Hazardous Waste Material

14. TRANSPORT INFORMATION

DOT (49CFR 172)

Domestic Ground Transport

DOT Shipping Name: Unrestricted
Hazard Class: NONE
UN/ID Number: None

MATERIAL SAFETY DATA SHEET

PRODUCT: Diesel Conditioner Plus+
 Revision Date: 5/19/2003
PART NUMBER(S):
 ADT 1116 (16 oz.)
 ADT 1201 (1 gal.)
 ADT 1325 (2.5 gal.)
 ADT 1555 (55 gal.)

International: (352) 323-3500

SECTION 1: PRODUCT IDENTIFICATION

TRADE NAME: RACOR DIESEL CONDITIONER PLUS+

DESCRIPTION: A hydrocarbon solution of an amine substituted resin and an octyl nitrate

NFPA 704M/HMIS RATING: 2/3 HEALTH 2/2 FLAMMABILITY 1/1 REACTIVITY 0 OTHER

0=Insignificant 1=Slight 2=Moderate 3=High 4=Extreme

SECTION 2: COMPOSITION / INGREDIENT INFORMATION

Our hazard evaluation has identified the following chemical ingredient(s) as hazardous. One or more is being claimed as a trade secret under OSHA's Hazard Communication Rule, 29 CFR 1910.1200. Consult Section 15 for the nature of the hazard(s).

<u>Chemical Name</u>	<u>CAS #</u>	<u>% by volume</u>	<u>TLV</u>
Amine substituted resin	Trade secret	14%	N/A
Heavy aromatic naphtha	64742-94-5	67%	100 ppm
2-Ethylhexyl nitrate	27247-96-7	19%	5 ppm

SECTION 3: HAZARD IDENTIFICATION

EMERGENCY OVERVIEW:

WARNING! Combustible. May cause irritation to skin and eyes. Avoid prolonged or repeated inhalation of vapor. Do not get in eyes, on skin or on clothing. Wear goggles and face shield when handling. Avoid prolonged or repeated breathing of vapor. Use with adequate ventilation. Do not take internally. Keep away from heat and open flame. Keep container closed when not in use.

Empty containers may contain residual product. Do not reuse container.

PRIMARY ROUTE(S) OF EXPOSURE: Eye, Skin, Inhalation

EYE CONTACT: Can cause moderate irritation

SKIN CONTACT: Can cause severe irritation.

INGESTION: Can be harmful. Can cause liver, kidney damage.

INHALATION: Inhalation of vapor may be harmful

SYMPTOMS OF EXPOSURE: A review of available data does not identify any symptoms from exposure not previously mentioned.

AGGRAVATION OF EXISTING CONDITIONS: A review of available data does not identify any worsening of existing conditions.

MATERIAL SAFETY DATA SHEET

PRODUCT: Diesel Conditioner Plus+
Revision Date: 5/19/2003
PART NUMBER(S):
ADT 1116 (16 oz.)
ADT 1201 (1 gal.)
ADT 1325 (2.5 gal.)
ADT 1555 (55 gal.)

International: (352) 323-3500

SECTION 4: FIRST AID INFORMATION

EYE: Immediately flush for at least 15 minutes while holding eyelids open. Call physician at once.

SKIN: Wash thoroughly with soap and rinse with water. If irritation persists, call a physician.

INGESTION: Do not induce vomiting. Give water. Call a physician at once.

INHALATION: Remove to fresh air. Treat symptoms. Call a physician at once.

NOTE TO PHYSICIAN: Based on the individual reactions of the patient, the physician's judgment should be used to control symptoms and clinical condition.

CAUTION: If unconscious, having trouble breathing or in convulsions, do not induce vomiting or give water.

SECTION 5: FIRE FIGHTING

FLASH POINT: 151 Degrees F (TCC) ASTM D-56

EXTINGUISHING MEDIA: Based on the NFPA guide, use dry chemical, foam, carbon dioxide or other extinguishing agent suitable for Class B fires. Use water to cool containers exposed to fire. For large fires, use water spray or fog, thoroughly drenching the burning material.

UNUSUAL FIRE AND EXPLOSION HAZARD: Containers exposed in a fire should be cooled with water to prevent vapor pressure buildup leading to a rupture.

SECTION 6: ACCIDENTAL RELEASE MEASURES

IN CASE OF TRANSPORTATION ACCIDENTS, CALL THE FOLLOWING 24-HOUR TELEPHONE NUMBER: (800) 535-5053 (INFOTRAC)

SPILL CONTROL AND RECOVERY:

Small liquid spills: Contain with absorbent material. Shovel reclaimed liquid and absorbent into recovery or salvage drums for disposal. Refer to CERCLA in Section 15.

Large liquid spills: Dike to prevent further movement and reclaim into recovery or salvage drums or tank truck for disposal. Refer to CERCLA in Section 15.

SECTION 7: HANDLING AND STORAGE

Storage: Keep container closed when not in use.

Parker Hannifin Corporation
 Racor Division
 P.O. Box 3208, 3400 Finch Road
 Modesto, CA 95353 USA
 Telephone 800/344-3286, 209/521-7860

MATERIAL SAFETY DATA SHEET

PRODUCT: Diesel Conditioner Plus+
 Revision Date: 5/19/2003
PART NUMBER(S):
 ADT 1116 (16 oz.)
 ADT 1201 (1 gal.)
 ADT 1325 (2.5 gal.)
 ADT 1555 (55 gal.)

International: (352) 323-3500

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

RESPIRATORY PROTECTION: If it is possible to generate significant levels of vapors or mists, a NIOSH approved or equivalent respirator is recommended.

For large spills, entry into large tanks, vessels or enclosed small spaces with inadequate ventilation, a positive pressure, self-contained breathing apparatus is recommended.

VENTILATION: General ventilation is recommended. Additionally, local exhaust ventilation is recommended where vapors or mists may be released.

PROTECTIVE EQUIPMENT: Wear impermeable gloves, boots, apron and a face shield with chemical splash goggles. Examples of impermeable gloves available on the market are neoprene, nitrile, PVC, natural rubber, viton and butyl (compatibility studies have not been performed). A full slicker suit is recommended if gross exposure is possible.

The availability of an eye wash fountain and safety shower is recommended .
 If clothing is contaminated, remove clothing and thoroughly wash the affected area. Launder contaminated clothing before reuse.

HUMAN EXPOSURE CHARACTERIZATION: Based on Racor's recommended product application and our recommended personal protective equipment, the potential human exposure is: MODERATE.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

COLOR:	Clear amber	Form: Liquid
DENSITY:	7.6 lbs./gal. @ 60 Degrees F	
SOLUBILITY IN WATER:	Insoluble	
SPECIFIC GRAVITY:	0.92 @ 60 Degrees F	
FLASH POINT:	151 Degrees F (TCC)	ASTM D-56
VAPOR PRESSURE:	103 mm/Hg @ 131 Degrees F	ASTM D-323

NOTE: These physical properties are typical values for this product.

SECTION 10: STABILITY AND REACTIVITY

Parker Hannifin Corporation
Racor Division

MATERIAL SAFETY DATA SHEET

PRODUCT: Diesel Conditioner Plus+
Revision Date: 5/19/2003
PART NUMBER(S):
ADT 1116 (16 oz.)
ADT 1201 (1 gal.)
ADT 1325 (2.5 gal.)
ADT 1555 (55 gal.)

International: (352) 323-3500

INCOMPATIBILITY: Avoid contact with strong oxidizers (eg., Chlorine, peroxides, chromates, nitric acid, perchlorates, concentrated oxygen, permanganates) which can generate heat, fires, explosions and the release of toxic fumes.

THERMAL DECOMPOSITION PRODUCTS: In the event of combustion CO, CO₂, NO_x may be formed. Do not breathe smoke or fumes. Wear suitable protective equipment.

SECTION 11: TOXICOLOGICAL INFORMATION

TOXICITY STUDIES: Toxicity studies have not been conducted on this product, but studies have been conducted on the 2-Ethylhexyl nitrate in the product. The results are shown below:

ACUTE ORAL TOXICITY (ALBINO RATS): LD50 = 9.6 gm/kg

ACUTE DERMAL TOXICITY (ALBINO RABBITS): LD50 = 4.8 gm/kg

ACUTE INHALATION TOXICITY (ALBINO RATS): LC50 = 4.6 gm/L (one hour)

PRIMARY SKIN IRRITATION TEST (ALBINO RABBITS):

COMMENTS: Non-irritating with D.O.T. Primary Irritation Assay

PRIMARY EYE IRRITATION TEST (ALBINO RABBITS):

EYE IRRITATION INDEX DRAIZE RATING: 0.0/110.0

COMMENTS: Non-irritating

SECTION 12: ECOLOGICAL INFORMATION

If released into the environment, see CERCLA in Section 15.

SECTION 13: DISPOSAL CONSIDERATIONS

DISPOSAL: If this product becomes a waste, it does not meet the criteria of a hazardous waste as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261, since it does not have the characteristics of Subpart C, nor is it listed under Subpart D.

As a non-hazardous liquid waste, it should be solidified with stabilizing agents (such as sand, fly ash, or cement) so that no free liquid remains before disposal to an industrial waste landfill. A non-hazardous liquid waste can also be incinerated in accordance with local, state, and federal regulations.

SECTION 14: TRANSPORTATION INFORMATION

PROPER SHIPPING NAME/HAZARD CLASS MAY VARY BY PACKAGING, PROPERTIES, AND MODE OF TRANSPORTATION. THIS PRODUCT IS REGULATED IN THE U.S. ONLY WHEN SHIPPED IN

SECTION 15: REGULATORY INFORMATION

The following regulations apply to this product.

FEDERAL REGULATIONS:

OSHA's HAZARD COMMUNICATION RULE, 29 CFR 1910.1200:

Based on our hazard evaluation, the following ingredients in this product are hazardous and the reasons are shown below.

- 2-Ethylhexyl nitrate - Combustible
- Heavy aromatic naphtha - Irritant, combustible

SECTION 313 - LIST OF TOXIC CHEMICALS (40 CFR 372):

This product contains the following ingredient(s), (with CAS # and % range) which appear(s) on the List of Toxic Chemicals:

- 2-Ethylhexyl nitrate = TWA 5 ppm ACGIH/TLV
- 2-Ethylhexyl nitrate = TWA 5 ppm OSHA/PEL

SARA/SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (TITLE III) - SECTIONS 302, 311, 312, AND 313:

SECTION 302 - EXTREMELY HAZARDOUS SUBSTANCES (40 CFR 355):

This product does not contain ingredients listed in Appendix A and B as an Extremely Hazardous Substance.

SECTIONS 311 AND 312-MATERIAL SAFETY DATA SHEET REQUIREMENTS (40 CFR 370):

Our hazard evaluation has found this product to be hazardous. The product should be reported under the following EPA hazard categories:

- XX Immediate (acute) health hazard
- XX Delayed (chronic) health hazard
- XX Fire hazard
- Sudden release of pressure hazard
- Reactive hazard

Under SARA 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are: 500 pounds or the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.

TOXIC SUBSTANCES CONTROL ACT (TSCA):

The chemical ingredients in this product are on the 8 (b) Inventory List (40 CFR 710).

REGISTERED WITH THE U.S. EPA OFFICE OF FUEL AND FUEL ADDITIVE REGISTRATION, as a fuel additive.

RESOURCE CONSERVATION AND RECOVERY ACT (RCRA), 40 CFR 261 SUBPART C & D :

Consult Section 13 for RCRA classification.

CLEAN AIR ACT, Sec. 111 (40 CFR 60), Sec. 112 (40 CFR 61, 1990 Amendments), Sec 611 (40 CFR 82, CLASS I and II Ozone depleting substances):

This product does not contain ingredients covered by the Clean Air Act.

STATE REGULATIONS:

CALIFORNIA PROPOSITION 65: This product does not contain any chemicals which require warning under California Proposition 65.

SECTION 17: RISK CHARACTERIZATION

Due to our commitment to Product Stewardship, we have evaluated the human and environmental hazards and exposures of this product. Based on our recommended use of this product, we have characterized the product's general risk. This information should provide assistance for your own risk management practices. We have evaluated our product's risk as follows:

- The human risk is: **MODERATE.**
- The environmental risk is: **LOW.**

Any use inconsistent with Racor's recommendations may affect our risk characterization. Our sales representative will assist you to determine if your product application is consistent with our recommendations. Together we can implement an appropriate risk management process.

This product material safety data sheet provides health and safety information. The product is to be used in applications consistent with our product literature. Individuals handling this product should be informed of the recommended safety precautions and should have access to this information. For any other uses, exposures should be evaluated so that appropriate handling practices and training programs can be established to insure safe workplace operations. Please consult your local sales representative for any further information.

Liquid: Sharp penetrating and Non-Residual Odor			

Section IV — FIRE AND EXPLOSION HAZARD DATA

FLASH POINT (METHOD USED)	0°F, TAG C.C.	FLAMMABLE LIMITS % by Volume	Lel	Uel
			2.6	13.0
EXTINGUISHING MEDIA Use Carbon Dioxide or Dry Chemical for small fires. Use "Alcohol" type foam for large fires. Water spray will reduce intensity of flames.				
SPECIAL FIRE FIGHTING PROCEDURES Self-contained breathing apparatus for fire fighters equipped with positive pressure mode.				
UNUSUAL FIRE AND EXPLOSION HAZARDS Keep work area free of hot metal surfaces and other sources of ignition.				

Section V — HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE	See Section II
EFFECTS OF OVEREXPOSURE EYES: Can cause severe irritation, redness, tearing, blurred vision. SKIN: Prolonged or repeated contact can cause moderate irritation, defatting dermatitis. INHALATION: Excess inhalation of vapors or mists may cause irritation of the nose and throat, nausea, vomiting, and signs of nervous system depression (e.g., headache, drowsiness, dizziness, loss of coordination, and fatigue), respiratory symptoms associated with pre-existing lung disorders (e.g., Asthma-like conditions) may be aggravated by exposure to this material. INGESTION: (swallowing) While this material has a low degree of toxicity, ingestion of excessive quantities may cause irritation of the digestive tract and signs of nervous system depression (e.g., headache, drowsiness, dizziness, loss of coordination, and fatigue). COMMENTS: This material has not been identified as a carcinogen by NTP, IARC, or OSHA. Reports have associated repeated and prolonged occupational over exposure to Solvents with Permanent Brain and Nervous System Damage (some times referred to as Solvent or Painters' Syndrome). Intentional misuse by deliberately concentrating and inhaling this product may be harmful or fatal.	

EMERGENCY AND FIRST AID PROCEDURES

EYE CONTACT: Moderate hazard to the eyes, but liquid contact should be treated with flushing of eyes with water for fifteen minutes.

SKIN CONTACT: Skin contact is only a slight hazard. However, skin should be flushed with water.

INHALATION: Remove to fresh air. Apply artificial respiration and call a physician.

INGESTION: Induce vomiting if the patient is conscious. Call a physician immediately.

Section VI — REACTIVITY DATA

STABILITY	UNSTABLE		CONDITIONS TO AVOID
	STABLE	X	Heat, sparks and open flame
INCOMPATIBILITY (Materials to Avoid) Avoid catalyst such as Ba(OH) ₂ , NaOH and other Alkalies, H ₂ SO ₄ .			
HAZARDOUS DECOMPOSITION PRODUCTS Burning can produce CO and/or CO ₂ .			
HAZARDOUS POLYMERIZATION	MAY OCCUR		CONDITIONS TO AVOID Avoid low temperature when in the presence of catalysts. Condensation will occur. If the temperature rises, reaction stops and material will cool down.
	WILL NOT OCCUR	X	

Section VII — SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED
 Keep public away. Shut off source if possible. To do so without hazard, eliminate source of ignition. Use suitable protective equipment. Flush spilled material into suitable retaining areas or containers with large quantities of water. Small amounts of spilled material may be absorbed into an appropriate absorbent. Collect in a flammable waste container for disposal.

WASTE DISPOSAL METHOD
 Incinerate in a furnace where permitted under appropriate federal, state and local regulations.

Section VIII — SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION (Specific Type) Air supplied mask			
VENTILATION	LOCAL EXHAUST	Suggested	SPECIAL Positively NO SMOKING
	MECHANICAL (General)	Explosion-Proof	OTHER Adequate Ventilation
PROTECTIVE GLOVES	Rubber Gloves - Impermeable	FACE PROTECTION	Safety Glasses
OTHER PROTECTIVE EQUIPMENT Eye bath and safety shower. Impermeable aprons.			

Section IX — SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING Keep product container cool, dry and away from sources of ignition. Use and store this product with adequate ventilation.

OTHER PRECAUTIONS
 Avoid inhalation of vapors. Remove saturated clothing and flush affected areas with water. Personal contact should be avoided.

3. HAZARDS IDENTIFICATION

Toxicity: May cause eye and skin irritation. May cause nose, throat and respiratory irritation. May cause gastrointestinal irritation. May cause central nervous system (CNS) depression.
Primary Routes of Entry: Eye and skin contact, ingestion, inhalation.
Signs and Symptoms of Exposure: Overexposure may cause eye and skin redness, difficulty breathing and vomiting. Excessive accidental exposure may cause headache, dizziness, nausea and mild respiratory irritation. Inhalation of dust at levels above recommended exposure limit may cause metallic or sweet taste, irritation of pharynx and possible ulceration with perforation of the nasal septum. Repeated skin contact may cause allergic skin reactions.

Ingredients	Percent	NTP:	ACGIH Carcinogens	IARC:
SILICA, QUARTZ 14808-60-7	0.1-1.0	Known Carcinogen		Group 1; Vol. 68; 1997

Medical Conditions Recognized as Being Aggravated by Exposure: Persons with respiratory problems such as emphysema and asthma should avoid inhalation.

4. FIRST AID MEASURES

Ingestion: If swallowed, DO NOT induce vomiting. Keep individual calm. Obtain medical attention.
Inhalation: If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. If breathing is difficult give oxygen. Get medical attention.
Skin Contact: Remove contaminated clothing. Wash area with soap and water. If irritation persists, seek medical attention.
Eye Contact: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention.

Product Name: 133K ANTI-SEIZE LUBRICANT 8OZ
Item No: 80078

attention if irritation persists.

5. FIRE FIGHTING MEASURES

Flash Point (°F/C): Greater than 200 degrees F. Method: Tag Closed Cup
Recommended Extinguishing Media: Carbon Dioxide, Dry Chemicals, Foam.
Special Fire-Fighting Procedures: Firefighters should wear self-contained breathing apparatus. Water spray may be ineffective on flames but should be used to keep fire-exposed containers cool.
Hazardous Products Formed by Fire or Thermal Decomposition: Metal oxide fumes, Oxides of carbon. Nitrogen compounds, Barium oxide. Sulfur dioxide. Hydrogen sulfide, Zinc.
Unusual Fire/Explosion Hazards: May ignite when sufficient heat is applied.
Lower Explosive Limit: 30% aluminum metal; 1% oil
Upper Explosive Limit: 7% oil

6. ACCIDENTAL RELEASE MEASURES

Spill Procedures: Eliminate all sources of ignition. Maintain good ventilation. Take up with an inert absorbent. Store in a closed waste container until disposal.

7. HANDLING AND STORAGE

Storage: Store away from heat, sparks or open flame. Do not store at temperatures above 120 degrees F.
Handling: Avoid prolonged skin contact. Keep away from eyes. Do not inhale vapors. Do not use near heat, sparks or open flame. Wash hands and face after handling this compound.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Eyes: Safety glasses or goggles.
Skin: Neoprene or nitrile gloves recommended.
Ventilation: Provide adequate local ventilation to maintain vapor concentration below TLV if misting of oil occurs.
Respiratory Protection: Use an approved NIOSH organic vapor respirator below the TLV. If TLV is exceeded or overexposure is likely, use positive pressure or self contained breathing apparatus.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Silver paste
Odor: PETROLEUM
Boiling Point (°F): Not determined.
pH: Does not apply
Solubility in Water: Nil
Specific Gravity: 1.17
VOC Content(Wt.%): Not determined
Vapor Pressure: Less than 5 mm Hg
Vapor Density (Air=1): Not Determined
Evaporation Rate: Not Determined

10. STABILITY AND REACTIVITY

Chemical Stability: Stable at normal conditions
Hazardous Polymerization: WILL NOT OCCUR
Incompatibilities: Strong oxidizers, alkalis, mineral acids, selected amines.
Conditions to Avoid: Do not expose to heat or store at temperatures above 120 F.
Hazardous Products Formed by Fire or Thermal Decomposition: Metal oxide fumes, Oxides of carbon. Nitrogen compounds, Barium oxide. Sulfur dioxide. Hydrogen sulfide, Zinc.

11. TOXICOLOGICAL INFORMATION

See Section 3

12. ECOLOGICAL INFORMATION

No data available

13. DISPOSAL CONSIDERATIONS

Recommended Method of Disposal: Disposal should be made in accordance with federal, state and local regulations.

Product Name: 133K ANTI-SEIZE LUBRICANT 8OZ
Item No: 80078

US EPA Waste Number: D001

14. TRANSPORT INFORMATION

DOT (49CFR 172)

Domestic Ground Transport

DOT Shipping Name: Unrestricted
Hazard Class: NONE
UN/ID Number: None
Marine Pollutant: None

IATA

Proper Shipping Name: Unrestricted
Class or Division: None

COATINGS AND RESINS GROUP

PPG Industries, Inc.

DDL MSDS #1

SECTION 1 CHEMICAL PRODUCT AND COMPANY INFORMATION

PRODUCT CODE/IDENTITY: DDL
REVISION DATE: 11/27/96 (T) 0808
CUSTOMER PART #/NAME: Not applicable
PRODUCT TRADE NAME: DURACRYL ACRYLIC LACQUER
CHEMICAL FAMILY: Acrylic
EMERGENCY MEDICAL/SPILL INFO: (304) 843-1300 (U.S.)
 91-800-00-214 (MEXICO)
TECHNICAL INFORMATION: (216) 572-2800
PRODUCT SAFETY/MSDS INFORMATION: 4325 ROSANNA DRIVE, P.O. BOX 9
 ALLISON PARK, PA 15101
 (412) 492-5555
DATE OF MSDS PREPARATION: 12/08/96

PRIMARY HAZARD WARNING

Flammable. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. Extinguish all flames and pilot lights. Turn off stoves, heaters, electrical motors, and other sources of ignition during use and until all vapors/odors are gone. Harmful if swallowed. May cause moderate skin irritation. Causes severe eye irritation. Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat.

THIS MATERIAL SAFETY DATA SHEET HAS BEEN PREPARED IN ACCORDANCE WITH THE OSHA HAZARD COMMUNICATION STANDARD (29 CFR 1910.1200), THE SUPPLIER NOTIFICATION REQUIREMENTS OF SARA TITLE III, SECTION 313, AND OTHER APPLICABLE RIGHT-TO-KNOW REGULATIONS.

SECTION 2 COMPOSITION/INFORMATION ON INGREDIENTS

PRODUCT STATUS RELATIVE TO THE U.S. EPA TOXIC SUBSTANCES

CONTROL ACT

All chemical substances in this product are listed on the U.S. TSCA Inventory or are otherwise exempt from TSCA Inventory reporting requirements.

SECTION 3 HAZARDS IDENTIFICATION

EFFECTS OF OVEREXPOSURE FROM:

- **INGESTION:** Harmful if swallowed.
- **EYE CONTACT:** Causes severe eye irritation.
- **SKIN CONTACT:** May cause moderate skin irritation.
- **INHALATION:** Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage.
- **CHRONIC OVEREXPOSURE:** Avoid long-term and repeated contact. This product contains titanium dioxide. Animals inhaling massive quantities of titanium dioxide dust in a long-term study developed lung tumors. Studies with humans involved in manufacture of this pigment indicate no increased risk of cancer from exposure. Potential for inhalation of titanium dioxide dusts from coatings is very limited. Since overexposures are not expected, there is no significant hazard for man. This product contains methyl ethyl ketone (MEK). MEK has been shown to cause minor embryotoxic/fetotoxic effects in laboratory animals exposed for prolonged periods at high concentrations via inhalation. The potential for human exposure to high concentrations is expected to be low due to the irritating effects of MEK at low concentrations. This product contains toluene. Toluene inhalation in animals (greater than 1500 ppm) and intentional inhalation of toluene-containing products by humans (e.g. glue) has caused adverse fetal development effects.

SIGNS AND SYMPTOMS OF OVEREXPOSURE: Eye watering, headaches, nausea, dizziness, and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

SECTION 4 FIRST AID MEASURES

- **INGESTION:** If swallowed, do not induce vomiting. Gently wipe out inside mouth to remove any residual material.
- **EYE CONTACT:** In case of eye contact, remove contact lenses and flush eyes immediately with a gentle stream of luke warm water for at least 15 minutes.
- **SKIN CONTACT:** In case of skin contact, flush immediately with plenty of water for at least 15 minutes followed by washing with soap and water.
- **INHALATION:** If affected by inhalation of vapor or spray mist, remove to fresh air. Apply artificial respiration and other support measures as required.
- **OTHER:** If ingestion, any type of overexposure or symptoms of overexposure occur during or following the use of this product, contact a poison control center, emergency room or physician immediately; have Material Safety Data Sheet information available.

SECTION 5 FIRE FIGHTING MEASURES

- **FLASHPOINT:** 21 Degrees F (-6 Degrees C) (PENSKEY-MARTENS CLOSED CUP)
- **FLAMMABLE LIMITS:** Lower explosion limit (LEL): 1.7
- **Upper explosion limit (UEL):** Not available
- **EXTINGUISHING MEDIA:** Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class IB flammable liquid fires.

Manufactured and Supplied by:
 REFINISH PRODUCTS
 19699 PROGRESS DRIVE STRONGSVILLE, OH 44136

► **UNUSUAL FIRE AND EXPLOSION HAZARDS:** Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat.

► **SPECIAL FIRE FIGHTING PROCEDURES:** Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat. If water is used, fog nozzles are preferable. Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

SECTION 6 ACCIDENTAL RELEASE MEASURES

► **STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:** Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible, absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

► **WASTE DISPOSAL METHOD:** Waste material must be disposed of in accordance with federal, state, provincial, and local environmental control regulations. Empty containers should be recycled or disposed of through an approved waste management facility.

SECTION 7 HANDLING AND STORAGE

► **HANDLING AND STORAGE PRECAUTIONS:** Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class IB flammable liquids.

► **OTHER PRECAUTIONS:** Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

SECTION 8 EXPOSURE CONTROLS AND PERSONAL PROTECTION

PERSONAL PROTECTIVE EQUIPMENT FOR:

► **EYE PROTECTION:** Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

► **SKIN PROTECTION:** Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: nitrile rubber or latex. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment.

► **RESPIRATORY PROTECTION:** Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used.

► **OTHER EQUIPMENT:** Clean contaminated clothing and shoes.

VENTILATION REQUIREMENTS: Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

[FORMULA VALUES, NOT SALES SPECIFICATIONS]

BOILING RANGE: 149- 392degrees F	SOLUBILITY IN WATER: 16.6 %
VAPOR PRESSURE: 40.6 mmHg	WEIGHT/GALLON : 8.00 (LBS/U.S. GAL.)
VAPOR DENSITY: Heavier than air	pH: Not applicable
% VOLATILE/VOLUME: 55-80	% SOLIDS BY WEIGHT: 29-49
SPECIFIC GRAVITY: .960	EVAPORATION RATE(BuOAc = 100): 374
ODDR/APPEARANCE: Viscous liquid with an odor characteristic of the solvents listed in Section 2.	

SECTION 10 STABILITY AND REACTIVITY

► This product is normally stable and will not undergo hazardous reactions.

► **INCOMPATIBILITY (MATERIALS AND CONDITIONS TO AVOID):** Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents.

► **HAZARDOUS DECOMPOSITION PRODUCTS:** May produce the following hazardous decomposition products when exposed to extreme heat: carbon monoxide ; carbon dioxide ; lower molecular weight polymer fractions; . . . Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

PPG Safety and Health In-Plant Index System (SHIS): HEALTH = 2 , FLAMMABILITY = 3, REACTIVITY = 0

Acute Hazard Rating System: 0 = Minimal, 1 = Slight, 2 = Moderate, 3 = Serious, 4 = Severe.

Chronic Hazard Rating System: 3* or 4*

SHIS ratings are assigned to identify the relative magnitude of potential hazards. Safe handling of this product requires that all of the information on the MSDS be evaluated for specific work environments.

THIS IS THE END OF THE MSDS FOR: DDL- (00054062.002DDL)

PRIMARY HAZARD WARNING

Flammable. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. Extinguish all flames and pilot lights. Turn off stoves, heaters, electrical motors, and other sources of ignition during use and until all vapors/odors are gone. Harmful if swallowed. Contains lead. Lead poisoning is characterized by a metallic taste in the mouth, loss of appetite, indigestion, nausea, vomiting, constipation, abdominal cramps, disturbance of rest and sleep, and weakness. Dried film of this product may be harmful if chewed or swallowed. May cause moderate skin irritation. Causes severe eye irritation. May be harmful if absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction. Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Sanding and grinding dusts may be harmful if inhaled.

THIS MATERIAL SAFETY DATA SHEET HAS BEEN PREPARED IN ACCORDANCE WITH THE OSHA HAZARD COMMUNICATION STANDARD (29 CFR 1910.1200), THE SUPPLIER NOTIFICATION REQUIREMENTS OF SARA TITLE III, SECTION 313, AND OTHER APPLICABLE RIGHT-TO-KNOW REGULATIONS.

PRODUCT STATUS RELATIVE TO THE U.S. EPA TOXIC SUBSTANCES

CONTROL ACT

All chemical substances in this product are listed on the U.S. TSCA Inventory or are otherwise exempt from TSCA Inventory reporting requirements.

SECTION 3 HAZARDS IDENTIFICATION

EFFECTS OF OVEREXPOSURE FROM:

► **INGESTION:** Harmful if swallowed. Contains lead. Lead poisoning is characterized by a metallic taste in the mouth, loss of appetite, indigestion, nausea, vomiting, constipation, abdominal cramps, disturbance of rest and sleep, and weakness. Dried film of this product may be harmful if chewed or swallowed.

► **EYE CONTACT:** Causes severe eye irritation.

► **SKIN CONTACT:** May cause moderate skin irritation. May be harmful if absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction.

► **INHALATION:** Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage.

► **CHRONIC OVEREXPOSURE:** Avoid long-term and repeated contact. Overexposure to lead adversely affects blood and blood forming tissues, kidneys, liver and the central nervous system, reproductive organs and causes adverse developmental effects. NTP and IARC have classified chromium (+6) compounds as carcinogenic. No human data were available on the risk associated with use of strontium chromate or other chromate pigments. This product contains an insoluble form of a chromium (6+) compound. NTP and IARC associate these materials with an increased risk of cancer. This product contains titanium dioxide. Animals inhaling massive quantities of titanium dioxide dust in a long-term study developed lung tumors. Studies with humans involved in manufacture of this pigment indicate no increased risk of cancer from exposure. Potential for inhalation of titanium dioxide dusts from coatings is very limited. Since overexposures are not expected, there is no significant hazard for man. This product contains methyl ethyl ketone (MEK). MEK has been shown to cause minor embryotoxic/fetotoxic effects in laboratory animals exposed for prolonged periods at high concentrations via inhalation. The potential for human exposure to high concentrations is expected to be low due to the irritating effects of MEK at low concentrations. This product contains toluene. Toluene inhalation in animals (greater than 1500 ppm) and intentional inhalation of toluene-containing products by humans (e.g. glue) has caused adverse fetal development effects.

► **SIGNS AND SYMPTOMS OF OVEREXPOSURE:** Contains lead. Lead poisoning is characterized by a metallic taste in the mouth, loss of appetite, indigestion, nausea, vomiting, constipation, abdominal cramps, disturbance of rest and sleep, and weakness. Dried film of this product may be harmful if chewed or swallowed. Eye watering, headaches, nausea, dizziness, and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

► **MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:** Not applicable.

WARNING: This product contains a chemical(s) known to the State

Manufactured and Supplied by:
 REFINISH PRODUCTS

of California to cause cancer and birth defects or other reproductive harm.

SECTION 4: FIRST AID MEASURES

- ▶ **INGESTION:** If swallowed, induce vomiting by giving 1 ounce of syrup of ipecac followed by 8 to 16 ounces of water. Wipe out inside mouth to remove any residual material.
- ▶ **EYE CONTACT:** In case of eye contact, remove contact lenses and flush eyes immediately with a gentle stream of luke warm water for at least 15 minutes.
- ▶ **SKIN CONTACT:** In case of skin contact, flush immediately with plenty of water for at least 15 minutes followed by washing with soap and water.
- ▶ **INHALATION:** If affected by inhalation of vapor or spray mist, remove to fresh air. Apply artificial respiration and other support measures as required.
- ▶ **OTHER:** If ingestion, any type of overexposure or symptoms of overexposure occur during or following the use of this product, contact a poison control center, emergency room or physician immediately; have Material Safety Data Sheet information available.

SECTION 5: FIRE FIGHTING MEASURES

- ▶ **FLASHPOINT:** 21 Degrees F (-6 Degrees C) (PENSKY-MARTENS CLOSED CUP)
- ▶ **FLAMMABLE LIMITS:** Lower explosion limit (LEL): 1.7
- ▶ **Upper explosion limit (UEL):** Not available
- ▶ **EXTINGUISHING MEDIA:** Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class IB flammable liquid fires.
- ▶ **UNUSUAL FIRE AND EXPLOSION HAZARDS:** Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat.
- ▶ **SPECIAL FIRE FIGHTING PROCEDURES:** Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat. If water is used, fog nozzles are preferable. Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

SECTION 6: ACCIDENTAL RELEASE MEASURES

- ▶ **STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:** Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.
- ▶ **WASTE DISPOSAL METHOD:** Waste material must be disposed of in accordance with federal, state, provincial, and local environmental control regulations. Empty containers should be recycled or disposed of through an approved waste management facility.

SECTION 7: HANDLING AND STORAGE

- ▶ **HANDLING AND STORAGE PRECAUTIONS:** Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class IB flammable liquids.
- ▶ **OTHER PRECAUTIONS:** Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches. Do not apply on toys or other children's articles, furniture, or interior surfaces of any dwelling or facility. Do not apply on those exterior surfaces of any dwelling units, such as windowsills, porches, stairs, or railings to which children may be commonly exposed. Wash thoroughly before eating or smoking.

SECTION 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

PERSONAL PROTECTIVE EQUIPMENT FOR:

- ▶ **EYE PROTECTION:** Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.
- ▶ **SKIN PROTECTION:** Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: nitrile rubber or latex. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment.
- ▶ **RESPIRATORY PROTECTION:** Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used.
- ▶ **OTHER EQUIPMENT:** Clean contaminated clothing and shoes.

VENTILATION REQUIREMENTS: Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

(FORMULA VALUES, NOT SALES SPECIFICATIONS)

BOILING RANGE: 149- 392Degrees F
 SOLUBILITY IN WATER: 16.6 %
 VAPOR PRESSURE: 40.6 mmHg
 VAPOR DENSITY: Heavier than air
 % VOLATILE/VOLUME: 55-80
 SPECIFIC GRAVITY: .960
 ODOR/APPEARANCE: Viscous liquid with an odor characteristic of the solvents listed in Section 2.

WEIGHT/GALLON : 8.00 (LBS/U.S. GAL.)
 pH: Not applicable
 % SOLIDS BY WEIGHT: 29-49
 EVAPORATION RATE(BuOAc = 100): 374

SECTION 10: STABILITY AND REACTIVITY

- ▶ **This product is normally stable and will not undergo hazardous reactions.**
 - ▶ **INCOMPATIBILITY (MATERIALS AND CONDITIONS TO AVOID):** Avoid contact with strong alkalies, strong mineral acids, or strong oxidizing agents.
 - ▶ **HAZARDOUS DECOMPOSITION PRODUCTS:** May produce the following hazardous decomposition products when exposed to extreme heat: carbon monoxide ; carbon dioxide ; oxides of chromium ; oxides of lead ; oxides of sulfur ; lower molecular weight polymer fractions; . Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.
- PPG Safety and Health In-Plant Index System (SHIS): HEALTH = 4*, FLAMMABILITY = 3, REACTIVITY = 0
 Acute Hazard Rating System: 0 = Minimal, 1 = Slight, 2 = Moderate, 3 = Serious, 4 = Severe.
 Chronic Hazard Rating System: 3* or 4*
 SHIS ratings are assigned to identify the relative magnitude of potential hazards. Safe handling of this product requires that all of the information on the MSDS be evaluated for specific work environments.

THIS IS THE END OF THE MSDS FOR: DDL (00054063.002DDL-)

PRIMARY HAZARD WARNING:

Flammable. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. Extinguish all flames and pilot lights. Turn off stoves, heaters, electrical motors, and other sources of ignition during use and until all vapors/odors are gone. Harmful or fatal if swallowed. Dried film of this product may be harmful if chewed or swallowed. May cause moderate skin irritation. Causes severe eye irritation. Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Sanding and grinding dusts may be harmful if inhaled.

THIS MATERIAL SAFETY DATA SHEET HAS BEEN PREPARED IN ACCORDANCE WITH THE OSHA HAZARD COMMUNICATION STANDARD (29 CFR 1910.1200), THE SUPPLIER NOTIFICATION REQUIREMENTS OF SARA TITLE III, SECTION 313, AND OTHER APPLICABLE RIGHT-TO-KNOW REGULATIONS.

PRODUCT STATUS RELATIVE TO THE U.S. EPA TOXIC SUBSTANCES

CONTROL ACT

All chemical substances in this product are listed on the U.S. TSCA Inventory or are otherwise exempt from TSCA Inventory reporting requirements.

SECTION 3: HAZARDS IDENTIFICATION

EFFECTS OF OVEREXPOSURE FROM:

- INGESTION:** Harmful or fatal if swallowed. Dried film of this product may be harmful if chewed or swallowed.
- EYE CONTACT:** Causes severe eye irritation.
- SKIN CONTACT:** May cause moderate skin irritation.
- INHALATION:** Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage.
- CHRONIC OVEREXPOSURE:** Avoid long-term and repeated contact. Exposure to high levels of airborne cadmium damages kidneys, liver, blood and/or blood forming tissues. NTP and IARC also associate cadmium with increased risk of lung cancer. This product contains titanium dioxide. Animals inhaling massive quantities of titanium dioxide dust in a long-term study developed lung tumors. Studies with humans involved in manufacture of this pigment indicate no increased risk of cancer from exposure. Potential for inhalation of titanium dioxide dusts from coatings is very limited. Since overexposures are not expected, there is no significant hazard for man. This product contains methyl ethyl ketone (MEK). MEK has been shown to cause minor embryotoxic/fetotoxic effects in laboratory animals exposed for prolonged periods at high concentrations via inhalation. The potential for human exposure to high concentrations is expected to be low due to the irritating effects of MEK at low concentrations. This product contains toluene. Toluene inhalation in animals (greater than 1500 ppm) and intentional inhalation of toluene-containing products by humans (e.g. glue) has caused adverse fetal development effects.

SIGNS AND SYMPTOMS OF OVEREXPOSURE: Respiratory irritation, throat constriction, metallic taste, shortness of breath, chest pain and flu-like symptoms are signs of cadmium over-exposure. Dried film of this product may be harmful if chewed or swallowed. Eye watering, headaches, nausea, dizziness, and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

WARNING: This product contains a chemical(s) known to the State of California to cause cancer and birth defects or other reproductive harm.

SECTION 4: FIRST AID MEASURES

- INGESTION:** If swallowed, do not induce vomiting. Gently wipe out inside mouth to remove any residual material.

Manufactured and Supplied by:
 REFINISH PRODUCTS
 19699 PROGRESS DRIVE STRONGSVILLE, OH 44136

- ▶ **EYE CONTACT:** In case of eye contact, remove contact lenses and flush eyes immediately with a gentle stream of luke warm water for at least 15 minutes.
- ▶ **SKIN CONTACT:** In case of skin contact, flush immediately with plenty of water for at least 15 minutes followed by washing with soap and water.
- ▶ **INHALATION:** If affected by inhalation of vapor or spray mist, remove to fresh air. Apply artificial respiration and other support measures as required.
- ▶ **OTHER:** If ingestion, any type of overexposure or symptoms of overexposure occur during or following the use of this product, contact a poison control center, emergency room or physician immediately; have Material Safety Data Sheet information available.

SECTION 5: FIRE FIGHTING MEASURES

- ▶ **FLASHPOINT:** 21 Degrees F (-6 Degrees C) (PENSKEY-MARTENS CLOSED CUP)
- ▶ **FLAMMABLE LIMITS:** Lower explosion limit (LEL): 1.7
- ▶ **Upper explosion limit (UEL):** Not available
- ▶ **EXTINGUISHING MEDIA:** Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class IB flammable liquid fires.
- ▶ **UNUSUAL FIRE AND EXPLOSION HAZARDS:** Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat.
- ▶ **SPECIAL FIRE FIGHTING PROCEDURES:** Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat. If water is used, fog nozzles are preferable. Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

SECTION 6: ACCIDENTAL RELEASE MEASURES

- ▶ **STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:** Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.
- ▶ **WASTE DISPOSAL METHOD:** Waste material must be disposed of in accordance with federal, state, provincial, and local environmental control regulations. Empty containers should be recycled or disposed of through an approved waste management facility.

SECTION 7: HANDLING AND STORAGE

- ▶ **HANDLING AND STORAGE PRECAUTIONS:** Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class IB flammable liquids.
- ▶ **OTHER PRECAUTIONS:** Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches. Do not apply on interior surfaces or other surfaces to which children may be commonly exposed.

SECTION 8: EXPOSURE CONTROL AND PERSONAL PROTECTION**PERSONAL PROTECTIVE EQUIPMENT FOR:**

- ▶ **EYE PROTECTION:** Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.
- ▶ **SKIN PROTECTION:** Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: nitrile rubber or latex. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment.
- ▶ **RESPIRATORY PROTECTION:** Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used.
- ▶ **OTHER EQUIPMENT:** Clean contaminated clothing and shoes.

VENTILATION REQUIREMENTS: Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PRODUCT STATUS RELATIVE TO THE U.S. EPA TOXIC SUBSTANCES

CONTROL ACT

All chemical substances in this product are listed on the U.S. TSCA Inventory or are otherwise exempt from TSCA Inventory reporting requirements.

SECTION 3: HAZARDS IDENTIFICATION

EFFECTS OF OVEREXPOSURE FROM:

INGESTION: Harmful or fatal if swallowed. Contains lead. Lead poisoning is characterized by a metallic taste in the mouth, loss of appetite, indigestion, nausea, vomiting, constipation, abdominal cramps, disturbance of rest and sleep, and weakness. Dried film of this product may be harmful if chewed or swallowed.

EYE CONTACT: Causes severe eye irritation.

SKIN CONTACT: May cause moderate skin irritation. May be harmful if absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction.

INHALATION: Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage.

CHRONIC OVEREXPOSURE: Avoid long-term and repeated contact. Overexposure to lead adversely affects blood and blood forming tissues, kidneys, liver and the central nervous system, reproductive organs and causes adverse developmental effects. NTP and IARC have classified chromium (+6) compounds as carcinogenic. No human data were available on the risk associated with use of strontium chromate or other chromate pigments. This product contains an insoluble form of a chromium (6+) compound. NTP and IARC associate these materials with an increased risk of cancer. Exposure to high levels of airborne cadmium damages kidneys, liver, blood and/or blood forming tissues. NTP and IARC also associate cadmium with increased risk of lung cancer. This product contains titanium dioxide. Animals inhaling massive quantities of titanium dioxide dust in a long-term study developed lung tumors. Studies with humans involved in manufacture of this pigment indicate no increased risk of cancer from exposure. Potential for inhalation of titanium dioxide dusts from coatings is very limited. Since overexposures are not expected, there is no significant hazard for man. This product contains methyl ethyl ketone (MEK). MEK has been shown to cause minor embryotoxic/fetotoxic effects in laboratory animals exposed for prolonged periods at high concentrations via inhalation. The potential for human exposure to high concentrations is expected to be low due to the irritating effects of MEK at low concentrations. This product contains toluene. Toluene inhalation in animals (greater than 1500 ppm) and intentional inhalation of toluene-containing products by humans (e.g. glue) has caused adverse fetal development effects.

SIGNS AND SYMPTOMS OF OVEREXPOSURE: Respiratory irritation, throat

Manufactured and Supplied by:
 REFINISH PRODUCTS
 19699 PROGRESS DRIVE STRONGSVILLE, OH 44136

constriction, metallic taste, shortness of breath, chest pain and flu-like symptoms are signs of cadmium over-exposure. Contains lead. Lead poisoning is characterized by a metallic taste in the mouth, loss of appetite, indigestion, nausea, vomiting, constipation, abdominal cramps, disturbance of rest and sleep, and weakness. Dried film of this product may be harmful if chewed or swallowed. Eye watering, headaches, nausea, dizziness, and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

WARNING: This product contains a chemical(s) known to the State of California to cause cancer and birth defects or other reproductive harm.

SECTION 4: FIRST AID MEASURES

- ▶ **INGESTION:** If swallowed, induce vomiting by giving 1 ounce of syrup of ipecac followed by 8 to 16 ounces of water. Wipe out inside mouth to remove any residual material.
- ▶ **EYE CONTACT:** In case of eye contact, remove contact lenses and flush eyes immediately with a gentle stream of luke warm water for at least 15 minutes.
- ▶ **SKIN CONTACT:** In case of skin contact, flush immediately with plenty of water for at least 15 minutes followed by washing with soap and water.
- ▶ **INHALATION:** If affected by inhalation of vapor or spray mist, remove to fresh air. Apply artificial respiration and other support measures as required.
- ▶ **OTHER:** If ingestion, any type of overexposure or symptoms of overexposure occur during or following the use of this product, contact a poison control center, emergency room or physician immediately; have Material Safety Data Sheet information available.

SECTION 5: FIRE FIGHTING MEASURES

- ▶ **FLASHPOINT:** 21 Degrees F (-6 Degrees C) (PENSKEY-MARTENS CLOSED CUP)
- ▶ **FLAMMABLE LIMITS:** Lower explosion limit (LEL): 1.7
- ▶ **Upper explosion limit (UEL):** Not available
- ▶ **EXTINGUISHING MEDIA:** Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class IB flammable liquid fires.
- ▶ **UNUSUAL FIRE AND EXPLOSION HAZARDS:** Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat.
- ▶ **SPECIAL FIRE FIGHTING PROCEDURES:** Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat. If water is used, fog nozzles are preferable. Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

SECTION 6: ACCIDENTAL RELEASE MEASURES

- ▶ **STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:** Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.
- ▶ **WASTE DISPOSAL METHOD:** Waste material must be disposed of in accordance with Federal, state, provincial, and local environmental control regulations. Empty containers should be recycled or disposed of through an approved waste management facility.

SECTION 7: HANDLING AND STORAGE

- ▶ **HANDLING AND STORAGE PRECAUTIONS:** Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class IB flammable liquids.
- ▶ **OTHER PRECAUTIONS:** Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches. Do not apply on toys or other children's articles, furniture, or interior surfaces of any dwelling or facility. Do not apply on those exterior surfaces of any dwelling units, such as windowsills, porches, stairs, or railings to which children may be commonly exposed. Wash thoroughly before eating or smoking. Do not apply on interior surfaces or other surfaces to which children may be commonly exposed.

SECTION 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

PERSONAL PROTECTIVE EQUIPMENT FOR:

- ▶ **EYE PROTECTION:** Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.
- ▶ **SKIN PROTECTION:** Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: nitrile rubber or latex. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment.
- ▶ **RESPIRATORY PROTECTION:** Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure,

air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used.

▶ **OTHER EQUIPMENT:** Clean contaminated clothing and shoes.

VENTILATION REQUIREMENTS: Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

[FORMULA VALUES, NOT SALES SPECIFICATIONS]

- BOILING RANGE: 149- 392Degrees F
- VAPOR PRESSURE: 40.6 mmHg
- VAPOR DENSITY: Heavier than air
- % VOLATILE/VOLUME: 55-80
- SPECIFIC GRAVITY: .960
- ODOR/APPEARANCE: Viscous liquid with an odor characteristic of the solvents listed in Section 2.
- SOLUBILITY IN WATER: 16.6 %
- WEIGHT/GALLON : 8.00 (LBS/U.S. GAL.)
- pH: Not applicable
- % SOLIDS BY WEIGHT: 29-49
- EVAPORATION RATE(BuOAc= 100): 374

SECTION 10: STABILITY AND REACTIVITY

- ▶ **This product is normally stable and will not undergo hazardous reactions.**
- ▶ **INCOMPATIBILITY (MATERIALS AND CONDITIONS TO AVOID):** Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents.
- ▶ **HAZARDOUS DECOMPOSITION PRODUCTS:** May produce the following hazardous decomposition products when exposed to extreme heat: carbon monoxide ; carbon dioxide ; oxides of chromium ; oxides of lead ; oxides of sulfur ; lower molecular weight polymer fractions; oxides of cadmium ; Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.
- PPG Safety and Health In-Plant Index System (SHIS): HEALTH = 4*, FLAMMABILITY = 3, REACTIVITY = 0
- Acute Hazard Rating System: 0= Minimal, 1 = Slight, 2 = Moderate, 3 = Serious, 4 = Severe.
- Chronic Hazard Rating System: 3* or 4*
- SHIS ratings are assigned to identify the relative magnitude of potential hazards. Safe handling of this product requires that all of the information on the MSDS be evaluated for specific work environments.

PRODUCT NAME: T-10 THINNER 010T0000
SYNONYMS: None
ISSUE DATE: 06/03/2008
EDITION NO.: 2
CHEMICAL: SOLVENT
FAMILY:

EMERGENCY OVERVIEW:

Flammable. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. Extinguish all flames and pilot lights. Turn off stoves, heaters, electrical motors, and other sources of ignition during use and until all vapors/odors are gone. CAUSES SEVERE EYE IRRITATION. MAY CAUSE MODERATE SKIN IRRITATION. MAY BE ABSORBED THROUGH THE SKIN. VAPOR AND/OR SPRAY MIST MAY BE HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. VAPOR GENERATED AT ELEVATED TEMPERATURES IRRITATES EYES, NOSE AND THROAT. HARMFUL IF SWALLOWED.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "x" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous
N-BUTYL ALCOHOL 71-36-3	15 - 40	X
XYLENES 1330-20-7	15 - 40	X
METHYL (N-AMYL) KETONE 110-43-0	10 - 30	X
ETHYL BENZENE 100-41-4	3 - 7	X

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

Causes severe eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

May cause moderate skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

May be absorbed through the skin.

INHALATION:

Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Vapor generated at elevated temperatures irritates eyes, nose and throat.

INGESTION:

Harmful if swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Prolonged exposure to an ingredient(s) in this product may cause kidney and/or liver damage. High exposures to xylenes in some animal studies have been reported to cause health effects on the developing embryo and fetus. These effects were often at levels toxic to the mother. There is some evidence that repeated overexposure to n-butyl alcohol vapors at concentrations above the stated threshold limits can contribute to hearing loss by damaging the auditory nerve and can cause specific injury to the cornea of the eye known as keratitis. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given. Never give anything by mouth to an unconscious person. Contact a poison control center, emergency room or physician right away as further treatment may be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 81 Degrees F (27 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 1.2

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class IC flammable liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

STORAGE:

Do not store above 120 degrees F. (48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class IC flammable liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

SKIN/GLOVES:

Wear protective clothing. Gloves should be constructed of: butyl rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume, and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

Material/ CAS Number	Percent	ACGIH TLV	ACGIH STEL	OSHA PEL	OSHA STEL
N-BUTYL ALCOHOL 71-36-3	15 - 40	20 PPM	Not established	C-S-50 ppm	Not established
XYLENES 1330-20-7	15 - 40	100 ppm	150 PPM	100 ppm	150 ppm
METHYL (N-AMYL) KETONE 110-43-0	10 - 30	50 ppm	Not established	100 ppm	Not established

SECTION 9 - PHYSICAL & CHEMICAL PROPERTIES

(FORMULA VALUES, NOT SALES SPECIFICATIONS)

SPECIFIC GRAVITY: .834
PHYSICAL STATE: Liquid
Percent Solids: .00
Percent Volatile by Volume: 100.000
pH: Not available.
ODOR THRESHOLD: Not available.
Vapour Pressure: 4.2 mmHg
ODOR/APPEARANCE: Non-viscous liquid with an odor characteristic of the ingredients listed in Section 2.
VAPOR DENSITY: HEAVIER THAN AIR

Evaporation Rate: 52
BOILING POINT OR RANGE: 241 - 304 Degrees F
Freezing Point or Range: Not Applicable.
Melting Point or Range(°C): Not Applicable.
Partition coefficient (n-octanol/water): Not Applicable.
WEIGHT PER GALLON: 6.95 (U.S.) / 8.3 (IMPERIAL)

SECTION 10 - STABILITY AND REACTIVITY

STABILITY:

This product is normally stable and will not undergo hazardous reactions.

CONDITIONS TO AVOID:

None Known.

INCOMPATIBLE MATERIALS:

Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents.

HAZARDOUS POLYMERIZATION:

None Known.

HAZARDOUS DECOMPOSITION PRODUCTS:

- Carbon monoxide - Carbon dioxide

SECTION 11 - TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

Material/ CAS Number	Percent	ORAL LD50 (g/kg)	DERMAL LD50 (g/kg)	INHALATION LC50 (mg/l)
N-BUTYL ALCOHOL 71-36-3	15 - 40	.79 g/kg	3.40 g/kg	24.25 mg/l 4 hr
XYLENES 1330-20-7	15 - 40	4.30 g/kg	1.70 g/kg	21.88 mg/l 4 hr
METHYL (N-AMYL) KETONE 110-43-0	10 - 30	1.60 g/kg	10.21 g/kg	Not Available

CHRONIC TOXICITY

Ingredient Target Organ/Chronic Effects:

- Carcinogen - Eye - Embryotoxin - Ear - Kidney - Liver - Brain - Central nervous system - Lung

Mutagenicity Toxicity:

This has not been tested for this product.

Reproductive Toxicity:

This has not been tested for this product.

SUPPLEMENTAL HEALTH INFORMATION:

Material/ CAS Number	Percent	Ingredient Specific Animal Data:
N-BUTYL ALCOHOL 71-36-3	15 - 40	This product contains an ingredient which has been shown to cause adverse reproductive effects in animals at doses which are also toxic to the mother.
ETHYL BENZENE 100-41-4	3 - 7	Ethylbenzene has been reported by NTP to cause cancer in laboratory animals following a chronic (2 year) inhalation exposure. Dose levels of 75, 250 and 750 ppm were used, with evidence of carcinogenicity found in the kidneys of rats and the lung and liver of mice at 750 ppm. The No Observed Effect Level (NOEL) was 75 ppm. The relevance of these findings to humans is uncertain, but appropriate safeguards should be employed to reduce or eliminate inhalation exposure to ethylbenzene.

SECTION 12 - ECOLOGICAL INFORMATION

POTENTIAL ENVIRONMENTAL EFFECTS

Ecotoxicity: No Information Available.

ENVIRONMENTAL FATE

Mobility: No information available.

Biodegradation: No information available.

Bioaccumulation: No Information Available.

PHYSICAL/CHEMICAL

Hydrolysis: No information available.

Photolysis: No information available.

SECTION 13 - DISPOSAL CONSIDERATIONS

Provide maximum ventilation, only personnel equipped with proper respiratory and skin and eye protection should be permitted in the area. Take up spilled material with sawdust, vermiculite, or other absorbent material and place in containers for disposal.

Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations. Empty containers should be recycled by an appropriately licensed reconditioner/salvager or disposed of through a permitted waste management facility. Additional disposal information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

CHEMICAL: Hydrocarbon
FAMILY:

EMERGENCY OVERVIEW:

Flammable. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. Extinguish all flames and pilot lights. Turn off stoves, heaters, electrical motors, and other sources of ignition during use and until all vapors/odors are gone. CAUSES SEVERE EYE IRRITATION. MAY CAUSE MODERATE SKIN IRRITATION. MAY BE ABSORBED THROUGH THE SKIN. PROLONGED OR REPEATED CONTACT MAY CAUSE AN ALLERGIC SKIN REACTION. VAPOR AND/OR SPRAY MIST MAY BE HARMFUL IF INHALED. SANDING AND GRINDING DUSTS MAY BE HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. VAPOR GENERATED AT ELEVATED TEMPERATURES IRRITATES EYES, NOSE AND THROAT. MAY CAUSE IRRITATION AND/OR ALLERGIC RESPIRATORY REACTION IN LUNGS. HARMFUL OR FATAL IF SWALLOWED. DRIED FILM OF THIS PRODUCT MAY BE HARMFUL IF CHEWED OR SWALLOWED. STABLE - HAZARDOUS REACTIONS POSSIBLE AT EXTREMELY HIGH TEMPERATURES/PRESSURES.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "x" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous	
CUPROUS OXIDE 1317-39-1	15 - 40	X	
ZINC OXIDE 1314-13-2	10 - 30	X	
N-BUTYL ALCOHOL 71-36-3	5 - 10	X

(As Copper Cmpnds) 1317-39-1	*	X	See Sections 8 and 15 for information.
(As Zinc Cmpnds) 137-30-4	*	X	See Sections 8 and 15 for information.

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

Causes severe eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

May cause moderate skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

May be absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction.

INHALATION:

Vapor and/or spray mist may be harmful if inhaled. Sanding and grinding dusts may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Vapor generated at elevated temperatures irritates eyes, nose and throat. May cause irritation and/or allergic respiratory reaction in lungs.

INGESTION:

Harmful or fatal if swallowed. Dried film of this product may be harmful if chewed or swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Prolonged exposure to an ingredient(s) in this product may cause kidney and/or liver damage. High exposures to xylenes in some animal studies have been reported to cause health effects on the developing embryo and fetus. These effects were often at levels toxic to the mother. There is some evidence that repeated overexposure to n-butyl alcohol vapors at concentrations above the stated threshold limits can contribute to hearing loss by damaging the auditory nerve and can cause specific injury to the cornea of the eye known as keratitis. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. An ingredient in this product has caused fetal toxicity in experimental animals. The significance of these findings for humans is unknown.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given if person is fully conscious. Never give anything by mouth to an unconscious or convulsing person. Do Not induce vomiting. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 83 Degrees F (28 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 1.4

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class IC flammable liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

When this product is used, the overspray and other combustible materials such as paint booth filters, rags, masking materials, etc., contaminated by coating material are subject to spontaneous combustion. Wetting the contaminated materials and not packing them tightly together in refuse containers will minimize the potential for this to occur. Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

Do not apply on interior surfaces or other surfaces to which children may be commonly exposed.

STORAGE:

Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class IC flammable liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles and full face shield when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

SKIN/GLOVES:

Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: butyl rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

Do not apply on interior surfaces or other surfaces to which children may be commonly exposed.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

Material/ CAS Number	Percent	ACGIH TLV	ACGIH STEL	OSHA PEL	OSHA STEL

**SECTION 9 - PHYSICAL & CHEMICAL PROPERTIES
(FORMULA VALUES, NOT SALES SPECIFICATIONS)**

SPECIFIC GRAVITY: 1.969
PHYSICAL STATE: Liquid
Percent Solids: 80.42
Percent Volatile by Volume: 45.970

pH: Not available.
ODOR THRESHOLD: Not available.
Vapour Pressure: 6.0 mmHg
ODOR/APPEARANCE: Viscous liquid with an odor characteristic of the solvents listed in Section 2.
VAPOR DENSITY: HEAVIER THAN AIR
Evaporation Rate: 58
BOILING POINT OR RANGE: 148 - 288Degrees F
Freezing Point or Range: Not Applicable.
Melting Point or Range(°C): Not Applicable.
Partition coefficient (n-octanol/water): Not Applicable.
WEIGHT PER GALLON: 16.41 (U.S.) / 19.6 (IMPERIAL)

SECTION 10 - STABILITY AND REACTIVITY

STABILITY:

This product is normally stable but may undergo hazardous reactions at extremely high temperatures and pressures.

CONDITIONS TO AVOID:

None Known.

INCOMPATIBLE MATERIALS:

Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents.

HAZARDOUS POLYMERIZATION:

None Known.

HAZARDOUS DECOMPOSITION PRODUCTS:

- Carbon monoxide - Carbon dioxide - Oxides of nitrogen - Oxides of zinc - Oxides of sulfur - Iron oxides - Oxides of copper

SECTION 11 - TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

Material/ CAS Number	Percent	ORAL LD50 (g/kg)	DERMAL LD50 (g/kg)	INHALATION LC50 (mg/l)

CHRONIC TOXICITY

Ingredient Target Organ/Chronic Effects:

- Respiratory sensitizer - Carcinogen - Eye - Embryotoxin - Ear - Kidney - Liver - Brain - Central nervous system - Lung - Fetotoxin

Mutagenicity Toxicity:

This has not been tested for this product.

Reproductive Toxicity:
This has not been tested for this product.

SUPPLEMENTAL HEALTH INFORMATION:

Material/ CAS Number	Percent	Ingredient Specific Animal Data:
N-BUTYL ALCOHOL 71-36-3	5 - 10	This product contains an ingredient which has been shown to cause adverse reproductive effects in animals at doses which are also toxic to the mother.
ETHYL BENZENE 100-41-4	0.1-1.0	Ethylbenzene has been reported by NTP to cause cancer in laboratory animals following a chronic (2 year) inhalation exposure. Dose levels of 75, 250 and 750 ppm were used, with evidence of carcinogenicity found in the kidneys of rats and the lung and liver of mice at 750 ppm. The No Observed Effect Level (NOEL) was 75 ppm. The relevance of these findings to humans is uncertain, but appropriate safeguards should be employed to reduce or eliminate inhalation exposure to ethylbenzene.

SECTION 12 - ECOLOGICAL INFORMATION

POTENTIAL ENVIRONMENTAL EFFECTS

Ecotoxicity: No Information Available.

ENVIRONMENTAL FATE

Mobility: No information available.

Biodegradation: No information available.

Bioaccumulation: No Information Available.

PHYSICAL/CHEMICAL

Hydrolysis: No information available.

Photolysis: No information available.

SECTION 13 - DISPOSAL CONSIDERATIONS

Provide maximum ventilation, only personnel equipped with proper respiratory and skin and eye protection should be permitted in the area. Take up spilled material with sawdust, vermiculite, or other absorbent material and place in containers for disposal.

Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations. Empty containers should be recycled by an appropriately licensed reconditioner/salvager or disposed of through a permitted waste management facility. Additional disposal information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

SECTION 14 - TRANSPORTATION INFORMATION

Proper Shipping Name: Paint

Product ID: ABC3-92 (0882)
PRODUCT NAME: ABC #3 BLACK 283S5773 AF
SYNONYMS: None
ISSUE DATE: 08/15/2007
EDITION NO.: 2
CHEMICAL FAMILY: Hydrocarbon

EMERGENCY OVERVIEW:

Flammable. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. Extinguish all flames and pilot lights. Turn off stoves, heaters, electrical motors, and other sources of ignition during use and until all vapors/odors are gone. CAUSES SEVERE EYE IRRITATION. MAY CAUSE MODERATE SKIN IRRITATION. MAY BE ABSORBED THROUGH THE SKIN. PROLONGED OR REPEATED CONTACT MAY CAUSE AN ALLERGIC SKIN REACTION. VAPOR AND/OR SPRAY MIST MAY BE HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. VAPOR GENERATED AT ELEVATED TEMPERATURES IRRITATES EYES, NOSE AND THROAT. MAY CAUSE IRRITATION AND/OR ALLERGIC RESPIRATORY REACTION IN LUNGS. HARMFUL OR FATAL IF SWALLOWED. STABLE - HAZARDOUS REACTIONS POSSIBLE AT EXTREMELY HIGH TEMPERATURES/PRESSURES.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "x" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous	
CUPROUS OXIDE 1317-39-1	40 - 70	X	
ZINC OXIDE 1314-13-2	7 - 13	X

(As Copper Cmpnds) 1317-39-1	*	X	See Sections 8 and 15 for information.
(As Zinc Cmpnds) 1314-13-2	*	X	See Sections 8 and 15 for information.

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

Causes severe eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

May cause moderate skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

May be absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction.

INHALATION:

Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat. Vapor generated at elevated temperatures irritates eyes, nose and throat. May cause irritation and/or allergic respiratory reaction in lungs.

INGESTION:

Harmful or fatal if swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Prolonged exposure to an ingredient(s) in this product may cause kidney and/or liver damage. High exposures to xylenes in some animal studies have been reported to cause health effects on the developing embryo and fetus. These effects were often at levels toxic to the mother. There is some evidence that repeated overexposure to n-butyl alcohol vapors at concentrations above the stated threshold limits can contribute to hearing loss by damaging the auditory nerve and can cause specific injury to the cornea of the eye known as keratitis. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. An ingredient in this product has caused fetal toxicity in experimental animals. The significance of these findings for humans is unknown.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given if person is fully conscious. Never give anything by mouth to an unconscious or convulsing person. Do Not induce vomiting. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 83 Degrees F (28 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 1.8

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class IC flammable liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

When this product is used, the overspray and other combustible materials such as paint booth filters, rags, masking materials, etc., contaminated by coating material are subject to spontaneous combustion. Wetting the contaminated materials and not packing them tightly together in refuse containers will minimize the potential for this to occur. Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbent should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

STORAGE:

Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class IC flammable liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles and full face shield when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

SKIN/GLOVES:

Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: butyl rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. SECTION 9 - PHYSICAL & CHEMICAL PROPERTIES
(FORMULA VALUES, NOT SALES SPECIFICATIONS)

SPECIFIC GRAVITY: 2.059
PHYSICAL STATE: Liquid
Percent Solids: 81.23
Percent Volatile by Volume: 46.190
pH: Not available.
ODOR THRESHOLD: Not available.
Vapour Pressure: 10.1 mmHg
ODOR/APPEARANCE: Viscous liquid with an odor characteristic of the solvents listed in Section 2.
VAPOR DENSITY: HEAVIER THAN AIR
Evaporation Rate: 64
BOILING POINT OR RANGE: 148 - 288Degrees F
Freezing Point or Range: Not Applicable.
Melting Point or Range(°C): Not Applicable.
Partition coefficient (n-octanol/water): Not Applicable.
WEIGHT PER GALLON: 17.16 (U.S.) / 20.5 (IMPERIAL)

SECTION 10 - STABILITY AND REACTIVITY

STABILITY:
This product is normally stable but may undergo hazardous reactions at extremely high temperatures and pressures.
CONDITIONS TO AVOID:
None Known.
INCOMPATIBLE MATERIALS:
Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents.
HAZARDOUS POLYMERIZATION:
None Known.
HAZARDOUS DECOMPOSITION PRODUCTS:
- Carbon monoxide - Carbon dioxide - Oxides of zinc - Oxides of sulfur - Iron oxides - Oxides of copper - Lower molecular weight polymer fractions

SECTION 11 - TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

Material/ CAS Number	Percent	ORAL LD50 (g/kg)	DERMAL LD50 (g/kg)	INHALATION LC50 (mg/l)
CUPROUS OXIDE 1317-39-1	40 - 70	.47 g/kg	Not Available	Not Available
N-BUTYL ALCOHOL 71-36-3	5 - 10	.79 g/kg	3.40 g/kg	24.25 mg/l 4 hr
XYLENES 1330-20-7	5 - 10	4.30 g/kg	1.70 g/kg	21.88 mg/l 4 hr
N-ETHYL-O- TOLUENE SULFONAMIDE 1077-56-1	1 - 5	2.25 g/kg	1.00 g/kg	Not Available
N-BUTYL ACETATE 123-86-4	0.5-1.5	10.77 g/kg	17.60 g/kg	Not Available
ETHYL BENZENE 100-41-4	0.1-1.0	3.50 g/kg	17.80 g/kg	Not Available

CHRONIC TOXICITY

Ingredient Target Organ/Chronic Effects:

- Respiratory sensitizer - Carcinogen - Eye - Embryotoxin - Ear - Kidney - Liver - Brain - Central nervous system - Lung - Fetotoxin

Mutagenicity Toxicity:

This has not been tested for this product.

Reproductive Toxicity:

This has not been tested for this product.

SUPPLEMENTAL HEALTH INFORMATION:

Material/ CAS Number	Percent	Ingredient Specific Animal Data:
N-BUTYL ALCOHOL 71-36-3	5 - 10	This product contains an ingredient which has been shown to cause adverse reproductive effects in animals at doses which are also toxic to the mother.
ETHYL BENZENE 100-41-4	0.1-1.0	Ethylbenzene has been reported by NTP to cause cancer in laboratory animals following a chronic (2 year) inhalation exposure. Dose levels of 75, 250 and 750 ppm were used, with evidence of carcinogenicity found in the kidneys of rats and the lung and liver of mice at 750 ppm. The No Observed Effect Level (NOEL) was 75 ppm. The relevance of these findings to humans is uncertain, but appropriate safeguards should be employed to reduce or eliminate inhalation exposure to ethylbenzene.

SECTION 12 - ECOLOGICAL INFORMATION

POTENTIAL ENVIRONMENTAL EFFECTS

Ecotoxicity: No Information Available.

ENVIRONMENTAL FATE

Mobility: No information available.
Biodegradation: No information available.
Bioaccumulation: No Information Available.

PHYSICAL/CHEMICAL

Hydrolysis: No information available.
Photolysis: No information available.

SECTION 13 - DISPOSAL CONSIDERATIONS

Provide maximum ventilation, only personnel equipped with proper respiratory and skin and eye protection should be permitted in the area. Take up spilled material with sawdust, vermiculite, or other absorbent material and place in containers for disposal.

Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations. Empty containers should be recycled by an appropriately licensed reconditioner/salvager or disposed of through a permitted waste management facility. Additional disposal information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

SECTION 14 - TRANSPORTATION INFORMATION	
Proper Shipping Name:	Paint
NOS Technical Name:	None
Hazard Class:	3
Subsidiary Class(es):	None

MATERIAL SAFETY DATA SHEET

SECTION 1 - PRODUCT AND COMPANY INFORMATION

PPG Industries, Inc.
 One PPG Place
 Pittsburgh, PA 15272

EMERGENCY PHONE NUMBERS (412) 434-4515 (U.S.)
 (24 hours/day):

(514) 645-1320 (Canada)
 01-800-00-21-400 (Mexico)
 0532-83889090 (China)

PRODUCT SAFETY/MSDS INFORMATION: (412) 492-5555 7:00 a.m. - 4:30 p.m. EST

Product ID: AT240-126 (0882)
PRODUCT NAME: AMERCOAT 240 BUFF DV1642
SYNONYMS: None
ISSUE DATE: 08/07/2007
EDITION NO.: 2
CHEMICAL FAMILY: Epoxy

EMERGENCY OVERVIEW:

Combustible. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. CAUSES SEVERE EYE IRRITATION. CAUSES PRIMARY SKIN IRRITATION. MAY BE ABSORBED THROUGH THE SKIN. PROLONGED OR REPEATED CONTACT MAY CAUSE AN ALLERGIC SKIN REACTION. VAPOR AND/OR SPRAY MIST MAY BE HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. HARMFUL IF SWALLOWED.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "x" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous	
SODIUM POTASSIUM ALUMINUM SILICATE 37244-96-5	40 - 70	X	
EPOXY RESIN 67924-34-9	10 - 30	X	
EPOXY RESIN 25066-38-6	5 - 10	X

METHYL (N-AMYL) KETONE 110-43-0	3 - 7	X	
TITANIUM DIOXIDE 13463-67-7	3 - 7	X	
N-BUTYL ALCOHOL 71-36-3	1 - 5	X	
BUTANDIOLDIGLYCIDYL ETHER 2425-79-8	1 - 5	X	
XYLENES 1330-20-7	0.1-1.0	X	
(As Nuisance Particulates) 37244-96-5	*	X	See Sections 8 and 15 for information.

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

Causes severe eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

Causes primary skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

May be absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction.

INHALATION:

Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat.

INGESTION:

Harmful if swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Prolonged exposure to an ingredient(s) in this product may cause kidney and/or liver damage. High exposures to xylenes in some animal studies have been reported to cause health effects on the developing embryo and fetus. These effects were often at levels toxic to the mother. There is some evidence that repeated overexposure to n-butyl alcohol vapors at concentrations above the stated threshold limits can contribute to hearing loss by damaging the auditory nerve and can cause specific injury to the cornea of the eye known as keratitis. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given if person is fully conscious. Never give anything by mouth to an unconscious or convulsing person. Do Not induce vomiting. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 122 Degrees F (50 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 1.3

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class II combustible liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

The curing process of this two component product is an exothermic reaction. As the mixture nears the end of its potlife, it increases in temperature rapidly. The mixed product gels and may smoke. Contact with the material or the container may cause burns. To avoid the increase in temperature, spread the material out or mix it with a bucket of sand. Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

STORAGE:

Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class II combustible liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

SKIN/GLOVES:

Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: nitrile rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

MATERIAL SAFETY DATA SHEET

SECTION 1 - PRODUCT AND COMPANY INFORMATION

PPG Industries, Inc.
One PPG Place
Pittsburgh, PA 15272

EMERGENCY PHONE NUMBERS (412) 434-4515 (U.S.)
(24 hours/day):

(514) 645-1320 (Canada)
01-800-00-21-400 (Mexico)
0532-83889090 (China)

PRODUCT SAFETY/MSDS INFORMATION: (412) 492-5555 7:00 a.m.
- 4:30 p.m. EST

Product ID: AT240-9 (0882)
PRODUCT NAME: AMERCOAT 240 BLACK RESIN
SYNONYMS: None
ISSUE DATE: 11/22/2006
EDITION NO.: 1
CHEMICAL: Epoxy
FAMILY:

EMERGENCY OVERVIEW:

Combustible. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. CAUSES SEVERE EYE IRRITATION. CAUSES PRIMARY SKIN IRRITATION. MAY BE ABSORBED THROUGH THE SKIN. PROLONGED OR REPEATED CONTACT MAY CAUSE AN ALLERGIC SKIN REACTION. VAPOR AND/OR SPRAY MIST MAY BE HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. HARMFUL IF SWALLOWED.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "X" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous	
SODIUM POTASSIUM ALUMINUM SILICATE 37244-86-5	40 - 70	X	
EPOXY RESIN 67924-34-9	10 - 30	X	
EPOXY RESIN 25068-38-6	7 - 13	X	
MICA 12001-28-2	3 - 7	X	
METHYL (N-AMYL) KETONE 110-43-0	3 - 7	X	
N-BUTYL ALCOHOL 71-36-3	1 - 5	X	
CARBON BLACK 1333-86-4	1 - 5	X	
BUTANDIOLDIGLYCIDYL ETHER 2425-79-8	1 - 5	X	
XYLENES 1330-20-7	0.1-1.0	X	
(As Nuisance Particulates) 37244-86-5	*	X	See Sections 8 and 15 for information.

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

Causes severe eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

Causes primary skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

May be absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction.

INHALATION:

Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat.

INGESTION:

Harmful if swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

Prolonged exposure to an ingredient(s) in this product may cause kidney and/or liver damage. High exposures to xylenes in some animal studies have been reported to cause health effects on the developing embryo and fetus. These effects were often at levels toxic to the mother. There is some evidence that repeated overexposure to n-butyl alcohol vapors at concentrations above the stated threshold limits can contribute to hearing loss by damaging the auditory nerve and can cause specific injury to the cornea of the eye known as keratitis. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given if person is fully conscious. Never give anything by mouth to an unconscious or convulsing person. Do Not induce vomiting. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 138 Degrees F (59 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 1.3

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class II combustible liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

The curing process of this two component product is an exothermic reaction. As the mixture nears the end of its potlife, it increases in temperature rapidly. The mixed product gels and may smoke. Contact with the material or the container may cause burns. To avoid the increase in temperature, spread the material out or mix it with a bucket of sand. Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

STORAGE:

Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class II combustible liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

SKIN/GLOVES:

Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: nitrile rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

Material/ CAS Number	Percent	ACGIH TLV	ACGIH STEL	OSHA PEL	OSHA STEL

**SECTION 9 - PHYSICAL & CHEMICAL PROPERTIES
(FORMULA VALUES, NOT SALES SPECIFICATIONS)**

SPECIFIC GRAVITY: 1.571
PHYSICAL STATE: Liquid
Percent Solids: 89.62
Percent Volatile by Volume: 19.680
pH: Not available.
ODOR THRESHOLD: Not available.
Vapour Pressure: 3.4 mmHg
ODOR/APPEARANCE: Viscous liquid with an odor characteristic of the solvents listed in Section 2.
VAPOR DENSITY: HEAVIER THAN AIR
Evaporation Rate: 44
BOILING POINT OR RANGE: 226 - 370Degrees F
Freezing Point or Range: Not Applicable.
Melting Point or Range(°C): Not Applicable.
Partition coefficient (n-octanol/water): Not Applicable.
WEIGHT PER GALLON: 13.09 (U.S.) / 15.7 (IMPERIAL)

SECTION 10 - STABILITY AND REACTIVITY

STABILITY:
This product is normally stable and will not undergo hazardous reactions.
CONDITIONS TO AVOID:
None Known.
INCOMPATIBLE MATERIALS:
Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents.
HAZARDOUS POLYMERIZATION:
None Known.
HAZARDOUS DECOMPOSITION PRODUCTS:
- Carbon monoxide - Carbon dioxide - Oxides of aluminum - Lower molecular weight polymer fractions

**SECTION 11 - TOXICOLOGICAL INFORMATION
ACUTE TOXICITY**

Material/ CAS Number	Percent	ORAL LD50 (g/kg)	DERMAL LD50 (g/kg)	INHALATION LC50 (mg/l)

CHRONIC TOXICITY

Ingredient Target Organ/Chronic Effects:

- Carcinogen - Mutagen - Eye - Embryotoxin - Ear - Kidney - Liver - Brain
- Central nervous system - Lung

Mutagenicity Toxicity:

This has not been tested for this product.

Reproductive Toxicity:

This has not been tested for this product.

SUPPLEMENTAL HEALTH INFORMATION:

Material/ CAS Number	Percent	Ingredient Specific Animal Data:
N-BUTYL ALCOHOL 71-36-3	1 - 5	This product contains an ingredient which has been shown to cause adverse reproductive effects in animals at doses which are also toxic to the mother.
CARBON BLACK 1333-86-4	1 - 5	This product contains carbon black which has been rated an IARC 2B carcinogen due to animal data.

SECTION 12 - ECOLOGICAL INFORMATION

POTENTIAL ENVIRONMENTAL EFFECTS

Ecotoxicity: No Information Available.

ENVIRONMENTAL FATE

Mobility: No information available.
Biodegradation: No information available.
Bioaccumulation: No Information Available.

PHYSICAL/CHEMICAL

Hydrolysis: No information available.
Photolysis: No information available.

SECTION 13 - DISPOSAL CONSIDERATIONS

Provide maximum ventilation, only personnel equipped with proper respiratory and skin and eye protection should be permitted in the area. Take up spilled material with sawdust, vermiculite, or other absorbent material and place in containers for disposal. Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations. Empty containers should be recycled by an appropriately licensed reconditioner/salvager or disposed of through a permitted waste management facility. Additional disposal information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

SECTION 14 - TRANSPORTATION INFORMATION

PRODUCT NAME: AMERCOAT 240 CURE
SYNONYMS: None
ISSUE DATE: 12/07/2006
EDITION NO.: 1
CHEMICAL: Polyamide
FAMILY:

EMERGENCY OVERVIEW:

Combustible. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. CAUSES IRREVERSIBLE EYE DAMAGE. MAY BE CORROSIVE. THIS PRODUCT CONTAINS A MATERIAL WHICH CAUSES SKIN BURNS. MAY BE HARMFUL IF ABSORBED THROUGH THE SKIN. PROLONGED OR REPEATED CONTACT MAY CAUSE AN ALLERGIC SKIN REACTION. VAPOR AND/OR SPRAY MIST HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. MAY CAUSE IRRITATION AND/OR ALLERGIC RESPIRATORY REACTION IN LUNGS. HARMFUL OR FATAL IF SWALLOWED.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "x" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous
N-BUTYL ALCOHOL 71-36-3	5 - 10	X
ETHYLENEDIAMINE 107-15-3	1 - 5	X
DIETHYLENE TRIAMINE 111-40-0	0.1-1.0	X

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

This product contains a material which causes irreversible eye damage. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

May be corrosive. This product contains a material which causes skin burns. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

May be harmful if absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction.

INHALATION:

Vapor and/or spray mist harmful if inhaled. Vapor irritates eyes, nose, and throat. May cause irritation and/or allergic respiratory reaction in lungs.

INGESTION:

Harmful or fatal if swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. This product either contains formaldehyde or is capable of releasing formaldehyde above 0.5 ppm under certain conditions. If this product contains free formaldehyde, formaldehyde will be listed as an ingredient in Section 2 and 11 of this MSDS; if formaldehyde is not specifically listed, this product contains ingredients capable of releasing formaldehyde under certain conditions. Formaldehyde is a known cancer hazard, a skin sensitizer and a respiratory sensitizer. There is some evidence that repeated overexposure to n-butyl alcohol vapors at concentrations above the stated threshold limits can contribute to hearing loss by damaging the auditory nerve and can cause specific injury to the cornea of the eye known as keratitis.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given if person is fully conscious. Never give anything by mouth to an unconscious or convulsing person. Do Not induce vomiting. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 138 Degrees F (59 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 2.4

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class II combustible liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

The curing process of this two component product is an exothermic reaction. As the mixture nears the end of its potlife, it increases in temperature rapidly. The mixed product gels and may smoke. Contact with the material or the container may cause burns. To avoid the increase in temperature, spread the material out or mix it with a bucket of sand. Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

STORAGE:

Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class II combustible liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles and full face shield when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

SKIN/GLOVES:

Wear protective clothing sufficient to cover exposed skin surfaces. For applications where skin contact is likely and impermeable clothing is necessary, select clothing constructed of: butyl rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

**SECTION 9 - PHYSICAL & CHEMICAL PROPERTIES
(FORMULA VALUES, NOT SALES SPECIFICATIONS)**

SPECIFIC GRAVITY: .968
PHYSICAL STATE: Liquid
Percent Solids: 87.10
Percent Volatile by Volume: 14.930

pH: Not available.
ODOR THRESHOLD: Not available.
Vapour Pressure: 6.3 mmHg
ODOR/APPEARANCE: Viscous liquid with an odor characteristic of the solvents listed in Section 2.
VAPOR DENSITY: HEAVIER THAN AIR
Evaporation Rate: 32
BOILING POINT OR RANGE: 241 - 246 Degrees F
Freezing Point or Range: Not Applicable.
Melting Point or Range(°C): Not Applicable.
Partition coefficient (n-octanol/water): Not Applicable.
WEIGHT PER GALLON: 8.07 (U.S.) / 9.6 (IMPERIAL)

SECTION 10 - STABILITY AND REACTIVITY

STABILITY:
This product is normally stable and will not undergo hazardous reactions.
CONDITIONS TO AVOID:
None Known.
INCOMPATIBLE MATERIALS:
Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents.
HAZARDOUS POLYMERIZATION:
None Known.
HAZARDOUS DECOMPOSITION PRODUCTS:
- Oxides of nitrogen - Carbon monoxide - Carbon dioxide - Aldehydes

SECTION 11 - TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

Material/ CAS Number	Percent	ORAL LD50 (g/kg)	DERMAL LD50 (g/kg)	INHALATION LC50 (mg/l)
N-BUTYL ALCOHOL 71-36-3	5 - 10	.79 g/kg	3.40 g/kg	24.25 g/L, 4 hr.
ETHYLENEDIAMIN E 107-15-3	1 - 5	.50 g/kg	.73 g/kg	Not Available
DIETHYLENE TRIAMINE 111-40-0	0.1-1.0	1.08 g/kg	1.09 g/kg	Not Available

CHRONIC TOXICITY

Ingredient Target Organ/Chronic Effects:
- Kidney - Liver - Respiratory sensitizer - Brain - Central nervous system - Lung - Ear - Eye

Mutagenicity Toxicity:

This has not been tested for this product.

Reproductive Toxicity:

This has not been tested for this product.

SUPPLEMENTAL HEALTH INFORMATION:

Material/ CAS Number	Percent	Ingredient Specific Animal Data:
N-BUTYL ALCOHOL 71-36-3	5 - 10	This product contains an ingredient which has been shown to cause adverse reproductive effects in animals at doses which are also toxic to the mother.
ETHYLENE DIAMINE 107-15-3	1 - 5	This product contains ethylene diamine. Ethylene diamine has caused kidney, liver and lung damage in laboratory animals when repeatedly inhaled at high concentrations.

SECTION 12 - ECOLOGICAL INFORMATION

POTENTIAL ENVIRONMENTAL EFFECTS

Ecotoxicity: No Information Available.

ENVIRONMENTAL FATE

Mobility: No information available.

Biodegradation: No information available.

Bioaccumulation: No Information Available.

PHYSICAL/CHEMICAL

Hydrolysis: No information available.

Photolysis: No information available.

SECTION 13 - DISPOSAL CONSIDERATIONS

Provide maximum ventilation, only personnel equipped with proper respiratory and skin and eye protection should be permitted in the area. Take up spilled material with sawdust, vermiculite, or other absorbent material and place in containers for disposal. Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations. Empty containers should be recycled by an appropriately licensed reconditioner/salvager or disposed of through a permitted waste management facility. Additional disposal information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

SECTION 14 - TRANSPORTATION INFORMATION

Proper Shipping Name: Paint
NOS Technical Name: None
Hazard Class: 3
Subsidiary Class(es): None
UN Number: UN1263
Packing Group: III

USA - RQ Hazardous Substances: None

USA-RQ Hazardous Substance: None

Threshold Ship Weight:

Marine Pollutant Name: None

USA and Canada Shipments Only- Combustible Liquid Exception: Non-bulk (<=119 Gallons/450 L) ground shipments can be reclassified to "not regulated" for transportation. Bulk shipments - USA Only (> 119 Gallons/450 L) can be reclassified to a Combustible Liquid.

SECTION 15 - REGULATORY INFORMATION

INVENTORY STATUS

U.S. TSCA: This product and/or all of its components are listed on the U.S. TSCA Inventory or is otherwise exempt from TSCA inventory reporting requirements.

Product ID: AT240G219 (0882)
PRODUCT NAME: AMERCOAT 240 DEEP GRAY F/
SYNONYMS: None
ISSUE DATE: 02/23/2007
EDITION NO.: 2
CHEMICAL: Epoxy
FAMILY:

EMERGENCY OVERVIEW:

Combustible. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. CAUSES SEVERE EYE IRRITATION. CAUSES PRIMARY SKIN IRRITATION. MAY BE ABSORBED THROUGH THE SKIN. PROLONGED OR REPEATED CONTACT MAY CAUSE AN ALLERGIC SKIN REACTION. VAPOR AND/OR SPRAY MIST MAY BE HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. HARMFUL IF SWALLOWED.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "x" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous	
SODIUM POTASSIUM ALUMINIUM SILICATE 37244-86-5	40 - 70	X	
EPOXY RESIN 67924-34-9	10 - 30	X	
EPOXY RESIN 25068-38-6	5 - 10	X	
GLASS OXIDES 65997-17-3	3 - 7	X	
MICA 12001-26-2	3 - 7	X	
METHYL (N-AMYL) KETONE 110-43-0	3 - 7	X

AROMATIC NAPHTHA 64742-95-6	0.5-1.5	X	
CARBON BLACK 1333-86-4	0.1-1.0	X	
XYLENES 1330-20-7	0.1-1.0	X	
(As Nuisance Particulates) 37244-96-5	*	X	See Sections 8 and 15 for information.
(As Nuisance Particulates) 65997-17-3	*	X	See Sections 8 and 15 for information.

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

Causes severe eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

Causes primary skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

May be absorbed through the skin. Prolonged or repeated contact may cause an allergic skin reaction.

INHALATION:

Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat.

INGESTION:

Harmful if swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

Prolonged exposure to an ingredient(s) in this product may cause kidney and/or liver damage. This product contains fiberglass. Implantation or intratracheal injection of fiberglass has caused cancer in laboratory animals (IARC 2B). Fiberglass has been associated with non-malignant respiratory diseases in humans. High exposures to xylenes in some animal studies have been reported to cause health effects on the developing embryo and fetus. These effects were often at levels toxic to the mother. There is some evidence that repeated overexposure to n-butyl alcohol vapors at concentrations above the stated threshold limits can contribute to hearing loss by damaging the auditory nerve and can cause specific injury to the cornea of the eye known as keratitis. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given if person is fully conscious. Never give anything by mouth to an unconscious or convulsing person. Do Not induce vomiting. Contact a poison control center, emergency room or physician right away as further treatment will be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 122 Degrees F (50 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 1.3

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class II combustible liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

The curing process of this two component product is an exothermic reaction. As the mixture nears the end of its potlife, it increases in temperature rapidly. The mixed product gels and may smoke. Contact with the material or the container may cause burns. To avoid the increase in temperature, spread the material out or mix it with a bucket of sand. Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

STORAGE:

Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class II combustible liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

SKIN/GLOVES:

Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: nitrile rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

Material/ CAS Number	Percent	ACGIH TLV	ACGIH STEL	OSHA PEL	OSHA STEL

 01-800-00-21-400 (Mexico)
 0532-83889090 (China)

TECHNICAL (740) 363-9610 (DELAWARE, OH) 8:00 a.m. -
 INFORMATION: 5:00 p.m. EST
 PRODUCT SAFETY/MSDS INFORMATION: (412) 492-5555 7:00 a.m.
 - 4:30 p.m. EST
 Product ID: **DCX61 (0B08)**
 PRODUCT NAME: HIGH SOLIDS HARDENER
 SYNONYMS: None
 ISSUE DATE: 01/15/2007
 EDITION NO.: 5
 CHEMICAL ISOCYANATE
 FAMILY:

EMERGENCY OVERVIEW:

Combustible. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. CAUSES SEVERE EYE IRRITATION. MAY CAUSE MODERATE SKIN IRRITATION. PROLONGED OR REPEATED CONTACT MAY CAUSE AN ALLERGIC SKIN REACTION. VAPOR AND/OR SPRAY MIST HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. MAY CAUSE IRRITATION AND/OR ALLERGIC RESPIRATORY REACTION IN LUNGS. HARMFUL IF SWALLOWED. STABLE - HAZARDOUS REACTIONS POSSIBLE AT EXTREMELY HIGH TEMPERATURES/PRESSURES.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "X" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous	
HEXANE-1,6-DI-ISOCYANATE POLYMER 28182-81-2	40 - 70	X	
ISOPHORONE DIISOCYANATE POLYMER 53680-05-0	15 - 40	X	
METHYL (N-AMYL) KETONE 110-43-0	10 - 30	X	
ISOPHORONE DIISOCYANATE 4098-71-9	0.1-1.0	X	
HEXAMETHYLENE-DI-ISOCYANATE 822-06-0	0.1-1.0	X	
(As Diisocyanates) 822-06-0	*	X	See Sections 8 and 15 for information.
(As Diisocyanates) 4098-71-9	*	X	See Sections 8 and 15 for information.

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

Causes severe eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

May cause moderate skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

Skin absorption not expected to occur. Prolonged or repeated contact may cause an allergic skin reaction.

INHALATION:

Vapor and/or spray mist harmful if inhaled. Vapor irritates eyes, nose, and throat. May cause irritation and/or allergic respiratory reaction in lungs.

INGESTION:

Harmful if swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Do not use if you have chronic (long-term) lung or breathing problems, or if you have ever had a reaction to isocyanates.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact. Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Prolonged inhalation of an ingredient(s) in this product may cause lung sensitivity leading to pneumonitis. This product contains isocyanates. Inhalation may cause a burning sensation of the nose, throat and lungs. Allergic respiratory reactions to these materials are characterized by asthma-like symptoms such as chest tightness, wheezing, shortness of breath and coughing. These symptoms may follow repeated exposure or a single massive exposure and may be delayed. The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given. Never give anything by mouth to an unconscious person. Contact a poison control center, emergency room or physician right away as further treatment may be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 122 Degrees F (50 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 1.1

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class II combustible liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

STORAGE:

Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class II combustible liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles and full face shield when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.

SKIN/GLOVES:

Wear protective clothing sufficient to cover exposed skin surfaces. For applications where skin contact is likely and impermeable clothing is necessary, select clothing constructed of: butyl rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. The decision whether to clean or discard contaminated clothing should be based on the chemicals contaminating them. Some chemicals can cause skin irritation, sensitization or other health effects if the cleaning process does not remove all traces of them. Consult a safety professional to determine whether clothing contaminated with this product can be safely cleaned and reused.

RESPIRATOR:

Where vapors or overspray are present, use a NIOSH approved, positive-pressure, air- supplied respirator for the entire time of spraying and until all vapors and mists are gone. Follow the respirator manufacturer's directions for respirator use. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

Material/ CAS Number	Percent	ACGIH TLV	ACGIH STEL	OSHA PEL	OSHA STEL

SECTION 9 - PHYSICAL & CHEMICAL PROPERTIES
(FORMULA VALUES, NOT SALES SPECIFICATIONS)

SPECIFIC GRAVITY: 1.088
PHYSICAL STATE: Liquid
Percent Solids: 83.91
Percent Volatile by Volume: 20.380
pH: Not available.
ODOR THRESHOLD: Not available.
Vapour Pressure: 2.1 mmHg
ODOR/APPEARANCE: Viscous liquid with an odor characteristic of the solvents listed in Section 2.
VAPOR DENSITY: HEAVIER THAN AIR
Evaporation Rate: 40
BOILING POINT OR RANGE: 300 - 304Degrees F
Freezing Point or Range: Not Applicable.
Melting Point or Range(°C): Not Applicable.
Partition coefficient (n-octanol/water): Not Applicable.
WEIGHT PER GALLON: 9.07 (U.S.)/ 10.8 (IMPERIAL)

SECTION 10 - STABILITY AND REACTIVITY

STABILITY:
This product is normally stable but may undergo hazardous reactions at extremely high temperatures and pressures.
CONDITIONS TO AVOID:
None Known.
INCOMPATIBLE MATERIALS:
Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents. Avoid water and alcohols.
HAZARDOUS POLYMERIZATION:
None Known.
HAZARDOUS DECOMPOSITION PRODUCTS:
- Carbon monoxide - Carbon dioxide - Traces of isocyanate - Oxides of nitrogen - Hydrogen cyanide - Lower molecular weight polymer fractions

SECTION 11 - TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

Material/ CAS Number	Percent	ORAL LD50 (g/kg)	DERMAL LD50 (g/kg)	INHALATION LC50 (mg/l)

CHRONIC TOXICITY

Ingredient Target Organ/Chronic Effects:
- Brain - Central nervous system - Lung - Respiratory sensitizer

Mutagenicity Toxicity:

This has not been tested for this product.

Reproductive Toxicity:

This has not been tested for this product.

SUPPLEMENTAL HEALTH INFORMATION:

SECTION 12 - ECOLOGICAL INFORMATION

POTENTIAL ENVIRONMENTAL EFFECTS

Ecotoxicity: No Information Available.

ENVIRONMENTAL FATE

Mobility: No information available.
Biodegradation: No information available.
Bioaccumulation: No Information Available.

PHYSICAL/CHEMICAL

Hydrolysis: No information available.
Photolysis: No information available.

SECTION 13 - DISPOSAL CONSIDERATIONS

Provide maximum ventilation, only personnel equipped with proper respiratory and skin and eye protection should be permitted in the area. Take up spilled material with sawdust, vermiculite, or other absorbent material and place in containers for disposal. Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations. Empty containers should be recycled by an appropriately licensed reconditioner/salvager or disposed of through a permitted waste management facility. Additional disposal information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

SECTION 14 - TRANSPORTATION INFORMATION

Proper Shipping Name: Resin Solution
NOS Technical Name: None
Hazard Class: 3
Subsidiary Class(es): None

Section 3 - Hazards Identification, Including Emergency Overview
PRESTONE ANTIFREEZE/COOLANT

Health Hazards Acute & Chronic: INHALATION: MAY CAUSE IRRITATION OF NOSE AND THROAT. HIGH VAPOR CONCENTRATIONS MAY PRODUCE NAUSEA, VOMITING, HEADACHE, DIZZINESS AND IRREGULAR EYE MOVEMENTS. SKIN CONTACT: NO EVIDENCE OF ADVERSE EFFECTS. EYE CONTACT: LIQUID, VAPOR OR MIST MAY CAUSE DISCOMFORT IN THE EYE WITH PERSISTENT CONJUNCTIVITIS. INGESTION: MAY CAUSE ABDOMINAL DISCOMFORT/PAIN, A BITTER TASTE, NAUSEA, VOMITING, DIZZINESS, DROWSINESS, MALAISE, BLURRING VISION, BACK PAIN, KIDNEY FAILURE. CARDIAC FAILURE, PULMONARY EDEMA, SEVERE KIDNEY AND LIVER DAMAGE MAY ALSO OCCUR. MAY BE FATAL. CHRONIC: CENTRAL NERVOUS SYSTEM INVOLVEMENT, SKIN SENSITIZATION, DERMATITIS.

Signs & Symptoms of Overexposure:

INHALATION: HIGH VAPOR CONCENTRATIONS MAY PRODUCE NAUSEA, VOMITING, HEADACHE DIZZINESS AND IRREGULAR EYE MOVEMENTS. INGESTED: ABDOMINAL DISCOMFORT/PAIN, A BITTER TASTE, NAUSEA, VOMITING, DIZZINESS, DROWSINESS, MALAISE, BLURRING VISION, BACK PAIN. EYE CONTACT: REDNESS, CONJUNCTIVA, DISCOMFORT.

Medical Conditions Aggravated by Exposure:

THE AVAILABLE TOXICOLOGICAL INFORMATION AND A KNOWLEDGE OF THE PHYSICAL AND CHEMICAL PROPERTIES OF THE MATERIAL SUGGEST THAT OVEREXPOSURE IS UNLIKELY TO AGGRAVATE EXISTING MEDICAL CONDITIONS.

LD50 LC50 Mixture: LD50 (ORAL, RAT) 4700 MG/KG**Route of Entry Indicators:****Inhalation:** N/P**Skin:** N/P**Ingestion:** N/P**Carcinogenicity Indicators****NTP:** NO**IARC:** NO**OSHA:** NO

Carcinogenicity Explanation: NONE OF THE COMPONENTS IN THESE PRODUCTS IS LISTED AS A CARCINOGEN OR SUSPECTED CARCINOGEN BY IARC, NTP OR OSHA.

Section 4 - First Aid Measures
PRESTONE ANTIFREEZE/COOLANT

First Aid:

INHALATION: REMOVE VICTIM TO FRESH AIR. IF BREATHING HAS STOPPED, ADMINISTER ARTIFICIAL RESPIRATION. IF BREATHING IS DIFFICULT, HAVE MEDICAL PERSONNEL ADMINISTER OXYGEN. GET MEDICAL ATTENTION. SKIN: IMMEDIATELY WASH CONTACTED AREA THOROUGHLY WITH SOAP AND WATER. IF IRRITATION PERSISTS, GET MEDICAL ATTENTION. EYES: IMMEDIATELY FLUSH WITH LARGE AMOUNT OF WATER FOR 15 MINUTES. GET MEDICAL ATTENTION IF IRRITATION PERSISTS. INGESTION: SEEK IMMEDIATE MEDICAL ATTENTION. CALL POISON CONTROL CENTER. NEVER GIVE ANYTHING BY MOUTH TO OR INDUCE VOMITING IN AN UNCONSCIOUS OR DROWSY PERSON.

Section 5 - Fire Fighting Measures
PRESTONE ANTIFREEZE/COOLANT

Fire Fighting Procedures:

DO NOT SPRAY POOL FIRES DIRECTLY. COOL FIRE EXPOSED CONTAINERS WITH WATER. FIREFIGHTERS SHOULD WEAR POSITIVE PRESSURE SELF-CONTAINED BREATHING APPARATUS AND FULL PROTECTIVE CLOTHING FOR FIRES IN AREAS WHERE CHEMICALS ARE USED OR STORED.

Unusual Fire or Explosion Hazard:

A SOLID STREAM OF WATER OR FOAM DIRECTED INTO HOT, BURNING LIQUID CAN CAUSE FROTHING.

Extinguishing Media:

FOR LARGE FIRES, USE ALCOHOL TYPE OR ALL-PURPOSE FOAMS. FOR SMALL FIRES, USE WATER SPRAY, CARBON DIOXIDE OR DRY CHEMICAL.

Flash Point: =104.4C, 220.F **Flash Point Text:**

Autoignition Temperature:

Autoignition Temperature Text: N/D

Lower Limit(s): 3.2

Upper Limit(s): 15.3

Section 6 - Accidental Release Measures
PRESTONE ANTIFREEZE/COOLANT

Spill Release Procedures:

WEAR APPROPRIATE PROTECTIVE CLOTHING AND EQUIPMENT. COLLECT WITH ABSORBENT MATERIAL AND PLACE IN APPROPRIATE, LABELED CONTAINER FOR DISPOSAL OR, IF PERMITTED FLUSH SPILL AREA WITH WATER.

Section 7 - Handling and Storage
PRESTONE ANTIFREEZE/COOLANT

Handling and Storage Precautions:**Other Precautions:**

Section 8 - Exposure Controls & Personal Protection

PRESTONE ANTIFREEZE/COOLANT

Respiratory Protection:

IF THE TLV IS EXCEEDED A NIOSH APPROVED RESPIRATOR WITH ORGANIC VAPOR CARTRIDGE AND DUST/MIST PREFILTERS OR SUPPLIED AIR RESPIRATOR IS RECOMMENDED. EQUIPMENT SELECTION DEPENDS ON CONTAMINANT TYPE AND CONCENTRATION. SELECT AND USE IN ACCORDANCE WITH 29 CFR 1910.134 AND GOOD INDUSTRIAL HYGIENE PRACTICE. FOR FIREFIGHTING, USE SELF-CONTAINED BREATHING APPARATUS.

Ventilation:

USE GENERAL VENTILATION OR LOCAL EXHAUST AS REQUIRED TO MAINTAIN EXPOSURES BELOW THE OCCUPATIONAL EXPOSURE LIMITS.

Protective Gloves:

CHEMICAL RESISTANT GLOVES SUCH AS NEOPRENE OR PVC WHERE CONTACT IS POSSIBLE.

Eye Protection: SPLASH-PROOF GOGGLES.

Other Protective Equipment: APPROPRIATE PROTECTIVE CLOTHING AS NEEDED TO MINIMIZE SKIN CONTACT. SUITABLE WASHING AND EYE FLUSHING FACILITIES SHOULD BE AVAILABLE IN THE WORK AREA.

Work Hygienic Practices: CONTAMINATED CLOTHING SHOULD BE REMOVED AND LAUNDERED BEFORE RE-USE.

Supplemental Health & Safety Information: P/N FOR ICCI: PRESTONE ADVANCED FORMULA. PART NUMBER OF PRESTONE: AF777.

Section 9 - Physical & Chemical Properties

PRESTONE ANTIFREEZE/COOLANT

HCC: V5

NRC/State License Number: N/R

Net Property Weight for Ammo: N/R

Boiling Point: =167.8C, 334.F **Boiling Point Text:**

Melting/Freezing Point: =-22.2C, -8.F **Melting/Freezing Text:**

Decomposition Point: **Decomposition Text:** N/P

Vapor Pressure: <0.1 **Vapor Density:** 2.1

Percent Volatile Organic Content:

Specific Gravity: 1.12

Volatile Organic Content Pounds per Gallon:

pH: NOT DETERMINED

Volatile Organic Content Grams per Liter:

Viscosity: NOT DETERMINED.

Evaporation Weight and Reference: <1 (NO METHOD GIVEN)

Solubility in Water: COMPLETE (100%)

Appearance and Odor: YELLOW LIQUID WITH A MILD ODOR.

Percent Volatiles by Volume: NONE

Corrosion Rate: N/P

Section 10 - Stability & Reactivity Data

PRESTONE ANTIFREEZE/COOLANT

Stability Indicator: YES

Materials to Avoid:

NORMALLY UNREACTIVE. HOWEVER, AVOID STRONG BASES AT HIGH TEMPERATURES, STRONG ACIDS, STRONG OXIDIZING AGENTS AND MATERIALS REACTIVE WITH HYDROXYL COMPOUNDS.

Stability Condition to Avoid:

NONE KNOWN.

Hazardous Decomposition Products:

BURNING MAY PRODUCE CARBON MONOXIDE AND CARBON DIOXIDE.

Hazardous Polymerization Indicator: NO**Conditions to Avoid Polymerization:**

NONE.

Section 11 - Toxicological Information
PRESTONE ANTIFREEZE/COOLANT

Toxicological Information:

ETHYLENE GLYCOL LD50 SKIN RABBIT: 9530 MG/KG. DIETHYLENE GLYCOL: LD50 ORAL RAT: 12,565 MG/KG AND LD50 SKIN RABBIT: 11890 MG/KG. ETHYLENE GLYCOL HAS BEEN SHOWN TO PRODUCE DOSE-RELATED TERATOGENIC EFFECTS IN RATS AND MICE WHEN GIVEN IN DRINKING WATER AT HIGH CONCENTRATIONS OR DOSES.

Section 12 - Ecological Information
PRESTONE ANTIFREEZE/COOLANT

Ecological Information:

ETHYLENE GLYCOL: LC50 GOLDFISH: 5,000 MG/L/24 HR, AT 20C STATIC CONDITIONS. TOXICITY THRESHOLD: BACTERIAL (PSEUDOMONAS PUTIDA): 10,000 MG/L; PROTOZOA: >10,000 MG/L; ALGAE: 2,000 MG/L; GREEN ALGAE: >10,000 MG/L.

Section 13 - Disposal Considerations
PRESTONE ANTIFREEZE/COOLANT

Waste Disposal Methods:

DISPOSE OF PRODUCT IN ACCORDANCE WITH ALL LOCAL, STATE/PROVINCIAL AND FEDERAL REGULATIONS.

Section 14 - MSDS Transport Information
PRESTONE ANTIFREEZE/COOLANT

Transport Information:

DOT HAZARD CLASSIFICATION: NONE. IMDG: NOT REGULATED. NOTE IF BULK SHIPMENT IS INVOLVED, THE FOLLOWING INFORMATION APPLIES: US DOT PROPER SHIPPING NAME: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N. O.S. (ETHYLENE GLYCOL), 9, UN3082.

Section 15 - Regulatory Information
PRESTONE ANTIFREEZE/COOLANT

SARA Title III Information:

EPA SARA 311/312: HAZARD CLASSIFICATION: ACUTE HEALTH AND CHRONIC HEALTH. EPA SARA 313: THIS PRODUCT CONTAINS THE FOLLOWING CHEMICALS SUBJECT TO ANNUAL RELEASE REPORTING REQUIREMENTS UNDER SARA TITLE III, SECTION 313 (40

CFR 372): ETHYLENE GLYCOL, CAS# 107-21-1, 80-96%. CERCLA SECTION 103: SPILLS OF THIS PRODUCT OVER THE RQ (REPORTABLE QUANTITY) MUST BE REPORTED TO THE NATIONAL RESPONSE CENTER. THE RQ FOR THIS PRODUCT, BASED ON THE RQ FOR ETHYLENE GLYCOL (96% MAXIMUM) OF 5,000 LBS, IS 5,208 LBS. MANY STATES HAVE MORE STRINGENT RELEASE REPORTING REQUIREMENTS. REPORT SPILLS REQUIRED UNDER FEDERAL, STATE, AND LOCAL REGULATIONS.

Federal Regulatory Information:

EPA TSCA INVENTORY: ALL OF THE COMPONENTS OF THIS MATERIAL ARE LISTED ON THE TOXIC SUBSTANCE CONTROL ACT (TSCA) CHEMICAL SUBSTANCES INVENTORY.

State Regulatory Information:

CALIFORNIA PROPOSITION 65: THIS PRODUCT MAY CONTAIN THE FOLLOWING SUBSTANCES KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER AND/OR REPRODUCTIVE HARM: 1,4-DIOXANE (TRACE AMOUNT).

Section 16 - Other Information
PRESTONE ANTIFREEZE/COOLANT

Other Information:

NOTE TO PHYSICIAN: THE PRINCIPAL TOXIC EFFECTS OF ETHYLENE GLYCOL, WHEN SWALLOWED, ARE KIDNEY DAMAGE AND METABOLIC ACIDOSIS. ETHANOL IS ANTIDOTAL AND ITS EARLY ADMINISTRATION MAY BLOCK FORMATION OF NEPHROTOXIC METABOLITES OF ETHYLENE GLYCOL IN THE LIVER. THE OBJECTIVE IS TO RAPIDLY ACHIEVE AND MAINTAIN A BLOOD ETHANOL LEVEL OF 100 MG/DL (IV). HEMODIALYSIS MAY BE REQUIRED. 4-METHYLPYRAZOLE, A POTENT INHIBITOR OF ALCOHOL DEHYDROGENASE, HAS BEEN USED THERAPEUTICALLY. ADDITIONAL THERAPEUTIC MODALITIES WHICH MAY DECREASE ADVERSE EFFECTS ARE ADMINISTRATION OF BOTH THIAMINE AND PYRIDOXINE.

Praxair Material Safety Data Sheet

1. Chemical Product and Company Identification

Product Name: Butane	Trade Name: Butane
Product Use: Many	
Chemical Name: n-Butane	Synonym: Methylethylmethane, Diethyl, n-Butane, Butyl hydride.
Chemical Formula: C ₄ H ₁₀	Chemical Family: Alkanes
Telephone: Emergencies: * 1-800-363-0042	Supplier /Manufacture: Praxair Canada Inc. 1 City Centre Drive Suite 1200 Mississauga, ON L5B 1M2
	Phone: 905-803-1600
	Fax: 905-803-1682

**Call emergency numbers 24 hours a day only for spills, leaks, fire, exposure, or accidents involving this product. For routine information, contact your supplier or Praxair sales representative.*

2. Composition and Information on Ingredients

INGREDIENTS	% (VOL)	CAS NUMBER	LD ₅₀ (Species & Routes)	LC ₅₀ (Rat, 4 hrs.)	TLV-TWA (ACGIH)
Butane	100	106-97-8	Not available.	658 g/m ³	800 ppm

3. Hazards Identification

Emergency Overview

DANGER! Flammable liquid and gas under pressure. Can form explosive mixtures with air. May cause frostbite. Can cause rapid suffocation. May cause dizziness and drowsiness. Self-contained breathing apparatus may be required by rescue workers.

ROUTES OF EXPOSURE: Inhalation. Skin contact. Swallowing. Eye contact.

THRESHOLD LIMIT VALUE: TLV-TWA Data from 2004 Guide to Occupational Exposure Values (ACGIH). TLV-TWAs should be used as a guide in the control of health hazards and not as fine lines between safe and dangerous concentrations.

EFFECTS OF A SINGLE (ACUTE) OVEREXPOSURE:

INHALATION: Asphyxiant. Effects are due to lack of oxygen. Moderate concentrations may cause headaches, drowsiness, dizziness, excitation, excess salivation, vomiting, and unconsciousness. Lack of oxygen can kill.

SKIN CONTACT: Liquid may cause frostbite.

SKIN ABSORPTION: No harm expected.

SWALLOWING:

This product is a gas at normal temperature and pressure, but frostbite of the lips and mouth may result from contact with the liquid.

EYE CONTACT:

Relatively non-irritating, but may cause frostbite.

EFFECTS OF REPEATED (CHRONIC) OVEREXPOSURE:

Not available.

OTHER EFFECTS OF OVEREXPOSURE:

None known.

MEDICAL CONDITIONS AGGRAVATED BY OVEREXPOSURE:

The skin irritating properties of the material may aggravate an existing dermatitis.

SIGNIFICANT LABORATORY DATA WITH POSSIBLE RELEVANCE TO HUMAN HEALTH HAZARD EVALUATION:

None.

CARCINOGENICITY:

Not listed as carcinogen by OSHA, NTP or IARC.

4. First Aid Measures

INHALATION:

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

SKIN CONTACT:

For exposure to liquid, immediately warm frostbite area with warm water not to exceed 41C. In case of massive exposure, remove contaminated clothing while showering with warm water. Call a physician.

SWALLOWING:

This product is a gas at normal temperature and pressure.

EYE CONTACT:

For contact with the liquid, immediately flush eyes thoroughly with warm water for at least 15 minutes. Hold the eyelids open and away from the eyeballs to ensure that all surfaces are flushed thoroughly. See a physician, preferably an ophthalmologist, immediately.

NOTES TO PHYSICIAN:

This material may be a cardiac sensitizer; avoid the use of epinephrine. There is no specific antidote, and treatment of overexposure should be directed at the control of symptoms and the clinical condition.

5. Fire Fighting Measures

FLAMMABLE : Yes.

IF YES, UNDER WHAT CONDITIONS?

See Unusual Fire and Explosion Hazards.

FLASH POINT (test method) CLOSED CUP: -60°C (-76°F). (Tag)

AUTOIGNITION TEMPERATURE 405°C (761°F)

FLAMMABLE LIMITS IN AIR, % by volume:

LOWER: 1.8

UPPER: 8.5

EXTINGUISHING MEDIA:

CO2, dry chemical, water spray or fog.

SPECIAL FIRE FIGHTING PROCEDURES:

DANGER! Evacuate all personnel from danger area. Immediately cool cylinders with water spray from maximum distance taking care not to extinguish flames. Remove ignition source if without risk. If flames are accidentally extinguished, explosive re-ignition may occur; therefore, appropriate measures should be taken; e.g., total evacuation. Reapproach with extreme caution. Use self-contained breathing apparatus. Stop flow of gas if without risk while continuing cooling water spray. Remove all containers from area if without risk. Allow fire to burn out.

UNUSUAL FIRE AND EXPLOSION HAZARD:

Flammable gas. Forms explosive mixtures with air and oxidizing agents. Container may rupture due to heat of fire. Do not extinguish flames due to possibility of explosive re-ignition. Vapours form from this product and may travel or be moved by air currents an ignited by pilot lights, other flames, smoking, sparks, heaters, electrical equipment, static discharges, or other ignition sources at locations distant from product handling point. Explosive atmospheres may linger. Before entering area, especially confined areas, check atmosphere with approved device. No part of a container should be subjected to temperature higher than 52 C (approximately 125 F). Most containers are provided with a pressure relief device designed to vent contents when they are exposed to elevated temperature.

HAZARDOUS COMBUSTION PRODUCTS:

These products are carbon oxides (CO, CO₂).

SENSITIVITY TO IMPACT:

Avoid impact against container.

SENSITIVITY TO STATIC DISCHARGE:

Possible, ground all equipment before use.

6. Accidental Release Measures

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

DANGER! **Flammable, high-pressure gas.** Forms explosive mixtures with air. Immediately evacuate all personnel from danger area. Use self-contained breathing apparatus where needed. Remove all sources of ignition if without risk. Reduce gas with fog or fine water spray. Shut off flow if without risk. Ventilate area or move cylinder to a well-ventilated area. Flammable gas may spread from leak. Before entering area, especially confined areas, check atmosphere with an appropriate device.

WASTE DISPOSAL METHOD:

Prevent waste from contaminating the surrounding environment. Keep personnel away. Discard any product, residue, disposable container, or liner in an environmentally acceptable manner, in full compliance with federal, provincial, and local regulations. If necessary, call your local supplier for assistance.

7. Handling and Storage

PRECAUTIONS TO BE TAKEN IN STORAGE:

Store and use with adequate ventilation. Separate flammable cylinders from oxygen, chlorine, and other oxidizers by at least 6 m or use a barricade of non-combustible material. This barricade should be at least 1.5 m high and have a fire resistance rating of at least ½ hour. Firmly secure cylinders upright to keep them from falling or being knocked over. Screw valve protection cap firmly in place by hand. Post "No Smoking or Open Flames" signs in storage and use areas. There must be no sources of ignition. All electrical equipment in storage areas must be explosion-proof. Storage areas must meet national electric codes for Class 1 hazardous areas. Store only where temperature will not exceed 52 C. Store full and empty cylinders separately. Use a first-in, first-out inventory system to prevent storing full cylinders for long periods.

PRECAUTIONS TO BE TAKEN IN HANDLING:

Protect cylinders from damage. Use a suitable hand truck to move cylinders; do not drag, roll, slide, or drop. Never attempt to lift a cylinder by its cap; the cap is intended solely to protect the valve. Never insert an object (e.g., wrench, screwdriver, pry bar) into cap openings; doing so may damage the valve and cause a leak. Use an adjustable strap wrench to remove over-tight or rusted caps. Open valve slowly. If valve is hard to open, discontinue use and contact your supplier. For other precautions, see Section 16.

For additional information on storage and handling, refer to Compressed Gas Association (CGA) pamphlet P-1, *Safe Handling of Compressed Gases in Containers*, available from the CGA. Refer to Section 16 for the address and phone number along with a list of other available publications.

OTHER HAZARDOUS CONDITIONS OF HANDLING, STORAGE, AND USE:

Flammable liquid and gas under pressure. Do not get liquid or vapours in eyes, on skin, or clothing. Safety showers and eyewash fountains should be immediately available. Use only in a closed system. Use piping and equipment adequately designed to withstand pressures to be encountered. Use only spark-proof tools and explosion-proof equipment. Keep away from heat, sparks, and open flame. **May form explosive mixtures with air.** Ground all equipment. Store and use with adequate ventilation at all times. Close valve after each use; keep closed even when empty. **Prevent reverse flow.** Reverse flow into cylinder may cause rupture. Use a check valve or other protective device in any line or piping from the cylinder. **When returning cylinder to supplier, be sure valve is closed, then install valve outlet plug tightly. Never work on a pressurized system.** If there is a leak, close the cylinder valve. Vent the system down in a safe and environmentally sound manner in compliance with all federal, provincial, and local laws; then repair the leak. **Never place a compressed gas cylinder where it may become part of an electrical circuit.**

8. Exposure Controls/Personal Protection

VENTILATION/ENGINEERING CONTROLS:

LOCAL EXHAUST: An explosion-proof local exhaust system is acceptable. See SPECIAL.

MECHANICAL (general): See SPECIAL.

SPECIAL: Use only in a closed system.

OTHER: See SPECIAL.

PERSONAL PROTECTION:

RESPIRATORY PROTECTION: Use respirable fume respirator or air supplied respirator when working in confined space or where local exhaust or ventilation does not keep exposure below TLV. Select in accordance with the provincial regulations or guidelines. Selection should also be based on the current CSA standards Z94.4, "Selection, care and use of respirators". Respirators should be approved by NIOSH and MSHA.

SKIN PROTECTION: Neoprene gloves.

EYE PROTECTION: Wear safety glasses when handling cylinders.

Select in accordance with the current CSA standard Z94.3, "Industrial Eye and Face Protection", and any provincial regulations, local bylaws or guidelines.

OTHER PROTECTIVE EQUIPMENT: Metatarsal shoes for cylinder handling. Protective clothing where needed. Cuffless trousers should be worn outside the shoes. Select in accordance with the current CSA standard Z195, "Protective Foot Wear", and any provincial regulations, local bylaws or guidelines.

9. Physical and Chemical Properties

PHYSICAL STATE: Gas. (Compressed Gas)	FREEZING POINT: -138.36°C (-217°F)	pH: Not applicable.
BOILING POINT -0.51°C (31.1°F)	VAPOUR PRESSURE 114 kPa (@ 20°C)	MOLECULAR WEIGHT: 58.124 g/mole
SPECIFIC GRAVITY: LIQUID (Water = 1) 0.57 @ 20/4 C	SOLUBILITY IN WATER, Very slightly soluble in cold water.	
SPECIFIC GRAVITY: VAPOUR (air = 1) 2.11	EVAPORATION RATE (Butyl Acetate=1): >1 compared to (Butyl Acetate=1)	COEFFICIENT OF WATER/OIL DISTRIBUTION: Not applicable.
VAPOUR DENSITY: 0.00254 g/ml	% VOLATILES BY VOLUME: 100% (v/v).	ODOUR THRESHOLD: Not available.

APPEARANCE & ODOUR: Colourless.

Odour: Disagreeable. (Slight.)

10. Stability and Reactivity

STABILITY:	The product is stable.
CONDITIONS OF CHEMICAL INSTABILITY:	Elevated temperatures > 435 C.
INCOMPATIBILITY (materials to avoid):	Oxidizing agents. Nickel carbonyl and oxygen mixtures.
HAZARDOUS DECOMPOSITION PRODUCTS:	Thermal decomposition or burning may produce carbon monoxide/carbon dioxide.
HAZARDOUS POLYMERIZATION:	Will not occur.
CONDITIONS OF REACTIVITY:	None known.

11. Toxicological Information

See section 3.

12. Ecological Information

No adverse ecological effects expected. This product does not contain any Class I or Class II ozone-depleting chemicals. The components of this mixture are not listed as marine pollutants by TDG Regulations.

13. Disposal Considerations

WASTE DISPOSAL METHOD: Do not attempt to dispose of residual or unused quantities. Return cylinder to supplier.

14. Transport Information

TDG/IMO SHIPPING NAME: Butane (n-Butane)

HAZARD CLASS: CLASS 2.1 : Flammable gas.	IDENTIFICATION #: UN1011	PRODUCT RQ: 100 L
---	------------------------------------	-----------------------------

SHIPPING LABEL(s): Flammable gas

PLACARD (when required): Flammable gas

SPECIAL SHIPPING INFORMATION:

Cylinders should be transported in a secure position, in a well-ventilated vehicle. Cylinders transported in an enclosed, nonventilated compartment of vehicle can present serious safety hazards.

15. Regulatory Information

The following selected regulatory requirements may apply to this product. Not all such requirements are identified. Users of this product are solely responsible for compliance with all applicable federal, provincial, and local regulations.

WHMIS (Canada) CLASS A: Compressed gas.
CLASS B-1: Flammable gas.

International Regulations

- EINECS Not available.
- DSCL (EEC) This product is not classified according to the EU regulations.
- International Lists No products were found.

16. Other Information

MIXTURES:

When two or more gases, or liquefied gases are mixed, their hazardous properties may combine to create additional, unexpected hazards. Obtain and evaluate the safety information for each component before you produce the mixture. Consult an Industrial Hygienist, or other trained person when you make your safety evaluation of the end product. Remember, gases and liquids have properties which can cause serious injury or death.

HAZARD RATING SYSTEM:

HMIS RATINGS:

- HEALTH 0
- FLAMMABILITY 4
- PHYSICAL HAZARD 0

STANDARD VALVE CONNECTIONS FOR U.S. AND CANADA:

- THREADED: CGA-510
- PIN-INDEXED YOKE: Not available.
- ULTRA-HIGH-INTEGRITY CONNECTION: Not available.

Use the proper CGA connections. **DO NOT USE ADAPTERS.** Additional limited-standard connections may apply. See CGA pamphlets V-1 and V-7 listed below.

Ask your supplier about free Praxair safety literature as referred to in this MSDS and on the label for this product. Further information about this product can be found in the following pamphlets published by the Compressed Gas Association, Inc. (CGA), 4221 Walney Road, 5th Floor, Chantilly, VA 20151-2923, Telephone (703) 788-2700, Fax (703) 961-1831, website: www.cganet.com.

 PRODUCT NAME: REDUCER
 SYNONYMS: None
 ISSUE DATE: 06/22/2007
 EDITION NO.: 5
 CHEMICAL FAMILY: SOLVENT BLEND

EMERGENCY OVERVIEW:

Flammable. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke. Extinguish all flames and pilot lights. Turn off stoves, heaters, electrical motors, and other sources of ignition during use and until all vapors/odors are gone. CAUSES SEVERE EYE IRRITATION. MAY CAUSE MODERATE SKIN IRRITATION. MAY BE ABSORBED THROUGH THE SKIN. VAPOR AND/OR SPRAY MIST MAY BE HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT. HARMFUL IF SWALLOWED.

SECTION 2 - COMPOSITION INFORMATION

The following ingredient(s) marked with an "x" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

Material/ CAS Number	Percent	Hazardous	
METHYL ETHYL KETONE 78-93-3	15 - 40	X	
1-METHOXY-2-PROPYL ACETATE 108-65-6	10 - 30	X	
TOLUENE 108-88-3	10 - 30	X	
V.M. AND P. NAPHTHA 8032-32-4	10 - 30	X	
NAPHTHA 64742-89-8	1 - 5	X	
N-HEPTANE 142-82-5	1 - 5	X	
METHYLCYCLOHEXANE 108-87-2	1 - 5	X	
2-METHOXY-1-PROPYL ACETATE 70657-70-4	0.1-1.0	X	
(As Rubber solvent (Naphtha)) 8032-32-4	*	X	See Sections 8 and 15 for information.

SECTION 3 - HAZARDS IDENTIFICATION

ACUTE OVEREXPOSURE EFFECTS

EYE CONTACT:

Causes severe eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

SKIN CONTACT:

May cause moderate skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

SKIN ABSORPTION:

May be absorbed through the skin.

INHALATION:

Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat.

INGESTION:

Harmful if swallowed.

SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. This product contains toluene. Toluene inhalation in animals (greater than 1500 ppm) and intentional inhalation of toluene-containing products by humans (e.g. glue) has caused adverse fetal development effects. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

SECTION 4 - FIRST AID MEASURES

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

EYE CONTACT:

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given. Never give anything by mouth to an unconscious person. Contact a poison control center, emergency room or physician right away as further treatment may be necessary.

SECTION 5 - FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES

FLASHPOINT: 23 Degrees F (-5 Degrees C)

FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

LEL: 1.5

AUTOIGNITION TEMPERATURE:

Not Available.

EXTINGUISHING MEDIA:

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class IB flammable liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

SECTION 6 - ACCIDENTAL RELEASE MEASURE

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

SECTION 7 - HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE:

Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches.

STORAGE:

Do not store above 120 degrees F.(48 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class IB flammable liquids.

SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

PERSONAL PROTECTIVE EQUIPMENT

EYES:

Wear chemical-type splash goggles when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapors.
SKIN/GLOVES:

Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: butyl, neoprene, or nitrile rubber. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positive-pressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective, its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

Material/ CAS Number	Percent	ACGIH TLV	ACGIH STEL	OSHA PEL	OSHA STEL
METHYL ETHYL KETONE 78-93-3	15 - 40	200 ppm	300 ppm	200 ppm	300 ppm

Reproductive Toxicity:
This has not been tested for this product.

SECTION 9 - PHYSICAL & CHEMICAL PROPERTIES
(FORMULA VALUES, NOT SALES SPECIFICATIONS)

SPECIFIC GRAVITY: .829
PHYSICAL STATE: Liquid
Percent Solids: .00
Percent Volatile by Volume: 100.000
pH: Not available.
ODOR THRESHOLD: Not available.
Vapour Pressure: 41.4 mmHg
ODOR/APPEARANCE: Non-viscous liquid with an odor characteristic of the ingredients listed in Section 2.
HEAVIER THAN AIR
VAPOR DENSITY: 346
Evaporation Rate: 172- 302Degrees F
BOILING POINT OR RANGE: Not Applicable.
Freezing Point or Range: Not Applicable.
Melting Point or Range(°C): Not Applicable.
Partition coefficient (n-octanol/water): Not Applicable.
WEIGHT PER GALLON: 6.91 (U.S.)/ 8.2 (IMPERIAL)

SUPPLEMENTAL HEALTH INFORMATION:

Material/ CAS Number	Percent	Ingredient Specific Animal Data:
METHYL ETHYL KETONE 78-93-3	15 - 40	This product contains methyl ethyl ketone (MEK). MEK has been shown to cause minor embryotoxic/fetotoxic effects in laboratory animals exposed for prolonged periods at high concentrations via inhalation. The potential for human exposure to high concentrations is expected to be low due to the irritating effects of MEK at low concentrations.
2-METHOXY-1-PROPYL ACETATE 70657-70-4	0.1-1.0	Possible reproductive hazard. An ingredient(s) in this product has adversely affected reproductive tissues and fetal development in test animals.

SECTION 10 - STABILITY AND REACTIVITY

STABILITY:
This product is normally stable and will not undergo hazardous reactions.
CONDITIONS TO AVOID:
None Known.
INCOMPATIBLE MATERIALS:
Avoid contact with strong alkalis, strong mineral acids, or strong oxidizing agents.
HAZARDOUS POLYMERIZATION:
None Known.
HAZARDOUS DECOMPOSITION PRODUCTS:
- Carbon monoxide - Carbon dioxide

SECTION 12 - ECOLOGICAL INFORMATION

POTENTIAL ENVIRONMENTAL EFFECTS
Ecotoxicity: No Information Available.
ENVIRONMENTAL FATE
Mobility: No information available.
Biodegradation: No information available.
Bioaccumulation: No Information Available.

CHRONIC TOXICITY

Ingredient Target Organ/Chronic Effects:
- Ear - Reproductive - Embryotoxin - Teratogen - Brain - Central nervous system - Lung

PHYSICAL/CHEMICAL

Hydrolysis: No information available.
Photolysis: No information available.

SECTION 13 - DISPOSAL CONSIDERATIONS

Provide maximum ventilation, only personnel equipped with proper respiratory and skin and eye protection should be permitted in the area. Take up spilled material with sawdust, vermiculite, or other absorbent material and place in containers for disposal.
Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations. Empty containers should be recycled by an appropriately licensed reconditioner/salvager or disposed of through a permitted waste management facility. Additional disposal information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.

SECTION 14 - TRANSPORTATION INFORMATION

Proper Shipping Name: Paint Related Material
NOS Technical Name: None
Hazard Class: 3
Subsidiary Class(es): None
UN Number: UN1263
Packing Group: II

USA - RQ Hazardous Substances: Toluene, Methyl Ethyl Ketone
USA-RQ Hazardous Substance Toluene>5263.21 Pounds, Methyl

*** END OF MSDS ***

MATERIAL SAFETY DATA SHEET

QuietCar, QuietCoat, QuietAir, QuietRail, QuietBoat, QuietShip, QuietTruck

1. Product And Company Identification			
<p>Supplier Quiet Solution, Inc. 522 Almanor Ave. Sunnyvale, CA 94085</p> <p>Company Contact: Kevin Surace Telephone Number: 408-523-4000 FAX Number: 408-715-2560 E-Mail: info@quietsolution.com Web Site: www.quietsolution.com</p>	<p>Manufacturer Quiet Solution, Inc. 522 Almanor Ave. Sunnyvale CA 94085</p> <p>Company Contact: Kevin Surace Telephone Number: 408-523-4000 FAX Number: 408-715-2560 E-Mail: info@quietsolution.com Web Site: www.quietsolution.com</p>		
<p>Supplier Emergency Contacts & Phone Number None Given</p>	<p>Manufacturer Emergency Contacts & Phone Number None Given</p>		
<p>Issue Date: 1/6/2003</p> <p>Product Name: QuietCar, QuietCoat, QuietAir, QuietRail, QuietBoat, QuietShip, QuietTruck, NK-118</p> <p>CAS Number: NE</p> <p>Chemical Family: latex paint</p> <p>MSDS Number: 754</p> <p>Product/Material Uses - Sprayable Sound Damping Compound for Machinery, Appliances and Miscellaneous Construction.</p>			
2. Composition/Information On Ingredients			
	Ingredient Name	CAS Number	Percent Of Total Weight
	modified acrylic latex resin	NE	
	aluminum silicate	1335-30-4	
	calcium carbonate	471-34-1	
	mica	12001-26-2	
EMERGENCY OVERVIEW			
CAUTION: May cause irritation of the upper respiratory tract and eyes.			
3. Hazards Identification			
<p>Eye Hazards - Contact may cause discomfort to the eyes resulting in irritation, redness and swelling.</p> <p>Skin Hazards - Not expected to be irritating from brief contact. Prolonged contact with material may cause mechanical irritation and discomfort.</p> <p>Ingestion Hazards - None known. Ingestion of large enough amounts to cause significant health hazards is considered unlikely.</p> <p>Inhalation Hazards - May cause irritation of the respiratory tract resulting in sneezing, coughing and nausea.</p> <p>Note: May contain trace amounts of silica. Avoid excessive or prolonged inhalation.</p>			
4. First Aid Measures			
<p>Eye - DO NOT let the victim rub his eye(s). In case of contact, hold eyelids apart and immediately flush eyes with plenty of water for at least 15 minutes.</p> <p>Skin - Wash with soap and water. Get medical attention if irritation (redness, rash, swelling) develops.</p> <p>Ingestion - If swallowed, seek medical attention. If victim is fully conscious, give one or two cups of water or milk to drink. Unless advised otherwise by the poison control center or physician, induce vomiting by giving 2 tablespoons of syrup of ipecac (adult dose) followed by a cup of water. Never give anything by mouth to an unconscious victim.</p>			

MATERIAL SAFETY DATA SHEET

QuietCar, QuietCoat, QuietAir, QuietRail, QuietBoat, QuietShip, QuietTruck

4. First Aid Measures - Continued

Inhalation - If adverse effects occur, remove to an uncontaminated area. Keep the victim warm and quiet. Seek medical attention. If breathing has stopped, give artificial respiration.

5. Fire Fighting Measures

Flammability Class: Non-Flammable

Fire And Explosion Hazards - None. Non-flammable. Material can splash and splatter above 212 deg F. Closed containers may rupture and explode when exposed to extreme heat.

Extinguishing Media - Use the appropriate extinguishing media for the surrounding fire.

Fire Fighting Instructions - Water can be used to cool and protect exposed material.

6. Accidental Release Measures

Contain and/or absorb spill with inert material (e.g. paper towel, sand, vermiculite). Pick up released product with appropriate implements and place in container for disposal.

Handling & Storage (Pictograms)

7. Handling And Storage

Handling And Storage Precautions - Keep containers tightly closed. Wash thoroughly after handling.

Keep from freezing. Store between 5 and 40 deg C. Apply between 45 to 100 deg F (7 to 38 deg C).

Protective Clothing (Pictograms)

8. Exposure Controls/Personal Protection

Engineering Controls - Use with adequate general and local exhaust ventilation. Use with local exhaust ventilation if needed to control mists and vapors.

Eye/Face Protection - Safety glasses with side shields or goggles recommended.

Skin Protection - Chemical-resistant gloves made of polyvinyl chloride (PVC) recommended.

Respiratory Protection - General room ventilation is normally adequate. In case of inadequate ventilation, use a NIOSH-approved respirator for particulates (e.g., N95).

Ingredient(s) - Exposure Limits

calcium carbonate

ACGIH TLV-TWA: 10 mg/m³ ; OSHA PEL-TWA: 15 mg/m³ (total dust) ; OSHA PEL-TWA: 5 mg/m³ (respirable dust)

mica

ACGIH TLV-TWA: 3 mg/m³ ; OSHA PEL-TWA: 20 mppcf

9. Physical And Chemical Properties

Appearance - Gray liquid

Odor - May have a characteristic latex odor during application. Odorless after curing.

Chemical Type: Mixture

Physical State: Liquid

MATERIAL SAFETY DATA SHEET

QuietCar, QuietCoat, QuietAir, QuietRail, QuietBoat, QuietShip, QuietTruck

9. Physical And Chemical Properties - Continued

Specific Gravity: 1650 kg/m³
Percent VOCs: <30g/l Fully Compliant with all state regulations
Solubility: soluble
Viscosity: 400,000 cp

10. Stability And Reactivity

Stability: Stable
Hazardous Polymerization: Will Not Occur

Incompatible Materials - None known
Hazardous Decomposition Products - None known.

11. Toxicological Information

Chronic/Carcinogenicity - May contain trace quantities of silica and formaldehyde. Overexposure to these substances is not expected under normal conditions of use.

12. Ecological Information

Ecotoxicological Information - Believed to be non-toxic to fish and plants.

13. Disposal Considerations

Dispose in accordance with applicable federal, state and local government regulations. Dispose of material in an approved landfill.
RCRA Information - Product is not a RCRA Hazardous Waste.

14. Transport Information

Proper Shipping Name - Not regulated

15. Regulatory Information

SARA Hazard Classes

Acute Health Hazard

SARA Section 313 Notification - This product does not contain any ingredients regulated under Section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 or 40 CFR 372.

Ingredient(s) - State Regulations

calcium carbonate

Pennsylvania - Workplace Hazard

mica

New Jersey - Workplace Hazard; Pennsylvania - Workplace Hazard; Massachusetts - Hazardous Substance

Canadian Regulatory Information - This product is not classified as hazardous under WHMIS.

III. Hazardous Identification:

Hazard Category:

Acute Chronic Fire Pressure Reactive

Hazardous Identification Information:

Danger: Flammable. Harmful or fatal if swallowed. Eye and skin irritant. Contents under pressure.

Level 3 Aerosol

IV. First Aid Measures:

Route(s) of Entry:

Absorption, Inhalation, and Ingestion.

Health Hazards (Acute and Chronic):

See signs and symptoms below

Signs and Symptoms:

Eye Contact: Irritant. Prolonged contact may cause conjunctivitis.

Skin Contact: Irritant. Defatting of tissue, dermatitis may occur.

Inhalation: Irritant to mucous membranes. Repeated exposure may cause narcosis, dizziness, respiratory or lung irritation.

Ingestion: HARMFUL OR FATAL IF SWALLOWED. May cause burns to mouth, throat & stomach.

MSDS - Material Safety Data Sheet

Product Name: LIQUID WRENCH SUPER LUBRICANT

MSDS No.: L212

Medical Conditions Generally Aggravated by Exposure:

None Known

Emergency and First Aid Procedures:

Eye Contact: Flush eyes with clean water for 15 minutes while lifting eyelids. Get prompt medical attention.

Skin Contact: Wash with soap and water thoroughly. If adverse effects persist, get prompt medical attention. Launder contaminated clothing before reuse.

Inhalation: Remove to fresh air. If breathing becomes difficult give oxygen and get prompt medical attention. If breathing stops, give artificial respiration and get prompt medical attention.

Ingestion: DO NOT INDUCE VOMITING! Call Poison Control Center, physician, or hospital emergency room immediately.

Aspiration of vomitus into the lungs can cause pneumonitis, which can be fatal.

Other Health Warnings:

Vomiting and subsequent aspiration into the lungs may lead to chemical pneumonia and pulmonary edema which is a potentially fatal condition.

V. Fire Fighting Measures:

Flash Point: 132F

Lower Explosive Limit: 0.7%

Upper Explosive Limit: 5%

F.P. Method: TCC

Fire Extinguishing Media: Water Fog, Foam, Carbon Dioxide, Dry Chemical

Special Fire Fighting Procedures:

Wear self-contained positive pressure breathing apparatus and protective clothes. Cool containers with a water fog. Do not use forced water stream as this could cause the fire to spread. Use equipment or shielding to protect personnel against venting, rupturing, or bursting containers.

Unusual Fire and Explosion:

Contents under pressure. At elevated temperatures, container may vent, rupture, or burst violently.

VI. Accidental Release Measures:

Steps to be Taken in Case Material is Released or Spilled:

Eliminate all ignition sources. Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed. Dike or contain spill and absorb with inert materials (sand, sawdust, absorbent sweeping compounds, rags, etc). Place contaminated material into an approved chemical waste container. Where possible, vacuum spilled liquid using an explosion proof vacuum to recover material. Prevent run-off to sewers, streams, or other bodies of water. If run-off occurs, notify proper authorities as required that a spill has occurred.

VII. Handling and Storage:

Precautions to be Taken:

Use with adequate ventilation and proper protective equipment.

Do not use or store near fire, sparks, or open flame. Do not puncture or incinerate container. Exposure to temperatures above 120° may cause container to vent, rupture, or burst.

Other Precautions:

MSDS - Material Safety Data Sheet

Product Name: LIQUID WRENCH SUPER LUBRICANT

MSDS No.: L212

Do not used in confined area without proper ventilation. Contact lenses may cause further damage in case of splash into eye.
KEEP AWAY FROM CHILDREN AND ANIMALS! Danger: Flammable.

VIII. Exposure Controls/Personal Protection:

Ventilation Requirements:

Use with adequate ventilation. If TLV is exceeded, wear NIOSH approved respirator.

Personal Protective Equipment:

See Section 2 for applicable exposure limits. For prolonged exposure wear protective safety glasses, gloves, and apron.

IX. Physical and Chemical Properties:

Boiling Point: 320 F

Melting Point: N/A

Evaporation Rate (Butyl Acetate = 1): N/A

Vapor Pressure (mm Hg.): N/A

Specific Gravity (H₂O = 1): 0.80500

Vapor Density (AIR = 1): N/A

Solubility In Water: Insoluble

Appearance and Odor: Clear light yellow with sweet vanilla odor

Other Information: N/D

X. Stability and Reactivity:

Stability:

Product is stable

Incompatibility (Materials to Avoid):

Avoid contact with strong oxidizers

Decomposition/By Products:

Normal products of combustion, smoke, carbon dioxide, carbon monoxide, and sulfur trioxides.

Hazardous Polymerization:

Will not occur

XI. Toxicological Information:

N/D

XII. Ecological Information:

N/D

XIII. Disposal Considerations:

DISPOSAL: This container may be recycled in aerosol recycling centers when empty. Before offering for recycling, empty the can by using the product according to the label. DO NOT PUNCTURE! If recycling is not available, wrap the container and discard in the trash. Dispose of unused product in accordance with all local, state government and federal laws and regulations.

XIV. Transport Information:

DOT Hazard Class: ORM-D

Shipping Name: Consumer Commodity

MSDS - Material Safety Data Sheet

Product Name: LIQUID WRENCH SUPER LUBRICANT

MSDS No.: L212

XV. Regulatory Information:

See Section 2 for SARA Reportable Chemicals.

USA TSCA: All components of this material are listed on the US TSCA Inventory.

Warning: This product contains a chemical(s) known to the State of California to cause cancer or birth defects or other reproductive harm.

XVI. Other Information:

Do not used in confined area without proper ventilation. Contact lenses may cause further damage in case of splash into eye.
KEEP AWAY FROM CHILDREN AND ANIMALS!

While Radiator Specialty Company believes this data is accurate as of the revision date, we make no warranty with respect to the data and we expressly disclaim all liability for reliance thereon. The data is offered solely for information, investigation, and verification. Various government agencies may have specific regulations regarding the transportation, handling, storage, use, or disposal of this product which may not be covered by this MSDS. The user is responsible for full compliance.

SECTION 1 - PRODUCT IDENTIFICATION	
Product Name/Class	AWS A5.10, ER: 4043, 5356 Aluminum Welding Wire
Product Number	004020
Manufacturer	Radnor Welding Products, 259 N. Radnor-Chester Road, Suite 100, Radnor, PA 19087-5283

SECTION 2 - HAZARDOUS INGREDIENTS			
Ingredient	CAS Number	Percent	Exposure Limits
Aluminum wire		100	TLV PEL 10*
Aluminum***	7429-90-5	87-100	10 10
Magnesium (5356 only)	7439-95-4	<5	10* 10*
Silicon (4043 only)	7440-21-3	5-13	10* 10*

Supplemental Information: (*) Not listed. Nuisance value maximum is 10 mg/m³ per cubic meter. PEL value for iron oxide is 10 mg/m³.

SECTION 3 - PHYSICAL CHARACTERISTICS

Boiling Point:	Specific Gravity (H ₂ O = 1):
N/A	N/A
Vapor Pressure (mm Hg):	Melting Point:
N/A	N/A
Vapor Density (Air = 1):	Evaporation Rate (Butyl Acetate=1):
N/A	N/A

Appearance and Odor: Metallic wire with no odor.

SECTION 4 - FIRE and EXPLOSION HAZARD DATA

Flash Point (Method Used):	Flammable Limits:
N/A	LEL: N/A UEL: N/A

Extinguishing Media: N/A
 Special Fire Fighting Procedures: Welding arc and sparks can ignite combustibles and flammables. Refer to American National Standard Z49.1 for fire prevention during the use of welding and allied procedures.
 Unusual Fire and Explosion Hazards: N/A

SECTION 5 - REACTIVITY DATA

azardous Decomposition Products: Welding fumes and gases cannot be classified simply. The composition and quantity of both are dependent upon the metal being welded, the process, procedures, and electrodes used. Other conditions which also influence the composition and quantity of the fumes and gases to which workers may be exposed include: coatings on the metal being welded (such as paint, latex, or galvanizing), the number of welders and the volume of the work area, the quality and amount of ventilation, the position of the welder's head with respect to the fume plume, as well as the presence of contaminants in the atmosphere (such as chlorinated hydrocarbon vapors from cleaning and degreasing activities). When the electrode is consumed, the fume and gas decomposition products generated are different in percent and form from the ingredients listed in Section 2. Decomposition products of normal operation include those originating from the volatilization, reaction, or oxidation of the materials shown in Section 2, plus those from the base metal and coating, etc., as noted above. It is understood, however, that elements and/or oxides to be mentioned are virtually always present as complex oxides and not as metals. (Characterization of Arc Welding Fume: American Welding Society). The elements or oxides listed below correspond to the ACGIH categories located in (TLV) Threshold Limit Values for Chemical Substances and Physical Agents in the Workroom Environment). Reasonably expected constituents of the fume would include: primarily iron oxide and fluorides; secondarily complex oxides of aluminum, titanium, chromium, magnesium, manganese, nickel, potassium, silicon, sodium and zirconium when used with recommended fluxes. Primarily iron oxide, manganese oxide, and complex chromium oxides; secondarily complex oxides of molybdenum and nickel when used with gas shielding.

Stability	Unstable <input type="checkbox"/>	Conditions to Avoid: Avoid breathing fumes created by the welding process.
	Stable <input checked="" type="checkbox"/>	

Compatibility (Materials to Avoid): N/A
 Hazardous Decomposition or Byproducts: Welding fumes and gases cannot be classified simply. The composition and quantity of both are dependent upon the metal being welded, the process, procedure and electrodes used.

Hazards	May Occur <input type="checkbox"/>	Conditions to Avoid: N/A
Polymerization	Will Not Occur <input checked="" type="checkbox"/>	

SECTION 6 - HEALTH HAZARD DATA

Threshold Limit Value: The exposure level for welding fume has been established at 5 mg/m³ with OSHA's PEL and ACGIH's TLV. TLV-TWAs should be used as a guide in the control of health hazards and not as fine lines between safe and excessive concentrations. Effects of Overexposure: Electric arc welding may create one or more of the following health hazards: Fumes and Gases can be dangerous to your health. Common entry is by inhalation. Other possible routes are skin contact and ingestion. Short-Term (Acute) Overexposure to welding fumes may result in discomfort such as metal fume fever, dizziness, nausea, or dryness or irritation of nose, throat or eyes. May aggravate pre-existing respiratory problems (e.g. asthma, emphysema). Chromates present in the fume have been known to cause severe irritation of the bronchial tubes and lungs. Asthma has been reported. Exposure to extremely high levels of fluorides can cause abdominal pain, diarrhea, muscular weakness and convulsions. In extreme cases it can cause loss of consciousness and death. Long-Term (Chronic) Overexposure may lead to siderosis (iron deposits in lungs) and is believed by some investigators to affect pulmonary functions. Manganese overexposure can affect the central nervous system, resulting in impaired speech and movement. Bronchitis and some lung fibrosis have been reported. Chromates may cause ulceration and perforation of the nasal septum. Liver damage and allergic reactions, including skin rash, have been reported. Repeated exposure to fluorides may cause excessive calcification of the bone and calcification of ligaments of the ribs, pelvis, and spinal column. May cause skin rash. Chromium and nickel and their compounds are on the IARC (International Agency for Research on Cancer) and NTP (National Toxicology Program) lists as posing a carcinogenic risk to humans. Rays can injure eyes and burn skin. Electric Shock can kill. Emergency and First Aid Procedures. Call for medical aid. Employ first aid techniques recommended by the American Red Cross. Eyes & Skin: If irritation or flash burns develop after exposure, consult a physician. Carcinogenicity: The composition of welding fumes may contain carcinogens, depending on several factors that are unknown and unknowable to the product manufacturer (see Section 5). Always assume that welding fumes may contain toxic and/or carcinogenic materials, and follow sound Work/Hygiene practices as recommended by ANSI Z49.1.

HMS Rating	HMS Scale	NFPA Rating	NFPA Scale
Health = 2 Flammability = 0 Reactivity = 0	4 = Severe Hazard 3 = Serious Hazard 2 = Moderate Hazard 1 = Slight Hazard 0 = Minimal Hazard	Health = 1 Flammability = 0 Reactivity = 0 Other = 0	4 = Severe Hazard 3 = Serious Hazard 2 = Moderate Hazard 1 = Slight Hazard 0 = Minimal Hazard

SECTION 7 - PRECAUTIONS for SAFE HANDLING and USE

Read and understand the manufacturer's instructions and precautionary label on the product. See American National Standard Z49.1, "Safety in Welding and Cutting", published by the American Welding Society, P.O. Box 351040, Miami, FL 33135 and OSHA Publication 2206 (29CFR1910), U.S. Government Printing Office, Washington, D.C. 20402 for more details on many of the following:

Steps to Be Taken in Case Material Is Released or Spilled: N/A

Waste Disposal Method: Discard any product, residue, disposable container, or liner as ordinary waste in an environmentally acceptable manner according to Federal, State and Local Regulations unless otherwise noted.

SECTION 8 - CONTROL MEASURES

Respiratory Protection (Specify Type): Use respirable fume respirator or air supplied respirator when welding in confined space or general work area when local exhaust or ventilation does not keep exposure below TLV. Ventilation: Use enough ventilation, local exhaust at the arc, or both to keep the fumes and gases from the worker's breathing zone; and the general area. Train the welder to keep his head out of the fumes. Keep exposure as low as possible.

Eye Protection: Wear helmet or use face shield with filter lens shade number 12* or darker. Shield others by providing screens and flash goggles. (*) No specific recommendation for submerged arc.

Other Protective Clothing or Equipment: Wear hand, head, and body protection which help to prevent injury from radiation, sparks and electrical shock. See Z49.1. At a minimum this includes welder's gloves and a protective face shield, and may include arm protectors, aprons, hats, shoulder protection, as well as dark substantial clothing. Train the welder not to permit electrically live parts or electrodes to contact skin or clothing or gloves if they are wet. Insulate from work and ground.

Work/Hygiene Practices: Maintain exposure below the PEL/TLV. Use industrial hygiene monitoring to ensure that your use of this material does not create exposures which exceed PEL/TLV. Always use exhaust ventilation. Refer to the following sources for important additional information: ANSI Z49.1 The American Welding Society, P.O. Box 351040, Miami, FL 33135 - OSHA (29CFR1910) U.S. Dept. of Labor, Washington, D.C. 20210.

OTHER INFORMATION REQUIRED BY STATE OR FEDERAL LAW

California Proposition 65 Information: Warning: This product contains a chemical known to the State of California to cause cancer.
 New Jersey Right-To-Know Information: 5 most predominant ingredients/hazardous and non-hazardous
 1. Aluminum; 2. Silicon; 3. Magnesium
 SARA Title III Notification Information: All chemical compounds marked with an asterisk (*) are toxic chemicals subject to the reporting requirements of Section 313 of Title III of the Super Fund Amendments and Reauthorization Act (SARA) of 1986 and 40 CFR Part 372.
 Disclaimer of Expressed and Implied Warranties: The information in this document is believed to be correct as of the date issued. However, no warranty of merchantability, fitness for any particular purpose, or any other warranty is expressed or is to be implied regarding the accuracy or completeness of this information, the results to be obtained from the use of this information or the product, the safety of this product, or the hazards related to its use.

MATERIAL SAFETY DATA SHEET
 This Material Safety Data Sheet (MSDS) complies with the requirements of OSHA's Hazard Communication Standard.
 For a MSDS in ANSI Z400.1 format, please call 888-838-0615 or visit the Airgas Web site at www.airgas.com

ANTI-SPATTER AEROSOL SPRAY

Emergency Phone Number:
 800-949-9737

Product Information Number: 888-838-0615

SECTION 1 - PRODUCT IDENTIFICATION

Product Name/Class	Anti-Spatter Aerosol Spray; 1620A Anti-Spatter
Product Number	004001
Manufacturer	Radnor Welding Products 259 N. Radnor-Chester Road Suite 100 Radnor, PA 19087-5283

SECTION 2 - HAZARDOUS INGREDIENTS

Ingredient	CAS Number	Percent	Exposure Limits	
			TLV	PEL
*Methylene Chloride	75-09-2	73-84	50ppm (8 hr TWA)	25ppm (8 hr TWA)
Carbon Dioxide	124-38-9	17	5000ppm	5000ppm

SECTION 3 - PHYSICAL CHARACTERISTICS

Boiling Point:	Specific Gravity (H ₂ O = 1):
104°F	1.32
Vapor Pressure (mm Hg):	% Volatile:
390	100
Vapor Density (Air = 1):	Appearance and Odor:
2.9	Clear, colorless liquid with a chloroform-like odor.

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point (Method Used):	Flammable Limits:
None to boiling	LEL: N/A
Extinguishing Media:	UEL: N/A
Carbon dioxide, dry chemical or foam.	
Special Fire Fighting Procedures:	
Pressure-demand, self-contained protection should be provided for protection. Storage containers exposed to fire should be kept cool with water.	
Unusual Fire and Explosion Hazards:	
At high temperatures, over-pressurization of containers can result.	

SECTION 5 - REACTIVITY DATA

Stability	Unstable <input type="checkbox"/>	Conditions to Avoid:
	Stable <input checked="" type="checkbox"/>	Systems. Open flames & electrical arcs.
Incompatibility (Materials to Avoid):		
reactive metals (i.e. aluminum, potassium, sodium, etc.)		
Hazardous Decomposition or Byproducts:		
Combustion prior to evaporation of methylene chloride may yield carbon monoxide, carbon dioxide, hydrogen chloride and traces of phosgene.		
Hazards	May Occur <input type="checkbox"/>	Conditions to Avoid: N/A
Polymerization	Will Not Occur <input checked="" type="checkbox"/>	

SECTION 6 - HEALTH HAZARD DATA

Routes of Entry:	<input checked="" type="checkbox"/> Inhalation	<input checked="" type="checkbox"/> Skin	<input checked="" type="checkbox"/> Ingestion
Health Hazards (Acute and Chronic):	INHALATION: In confined or poorly ventilated areas, vapors can readily accumulate and can cause unconsciousness and death. Minimal anesthetic or narcotic effects may be seen in 500-1000 ppm range. Progressively higher levels over 1000 ppm can cause dizziness, drunkenness, concentrations as low as 10000 ppm can cause unconsciousness and death. These high levels may also cause cardiac arrhythmias. Excessive exposure may cause irritation to upper respiratory tract. Excessive exposure may cause carboxyhaemoglobinemia.		
Carcinogenicity: **	NTP: Yes IARC: Yes OSHA Regulated: Yes		

**Comments: An evaluation of the metabolism of methylene chloride in mice indicates that tumor formation in mice is the result of their metabolism by a particular pathway at exposure concentrations greater than 500 ppm. This pathway does not play a significant role in metabolism by mice at exposure levels less than 500 ppm. The metabolic pathway associated with carcinogenicity is less active in rats and appears to play a negligible role in metabolism by hamsters and humans. Inhalation of methylene chloride produced limited evidence of liver damage in laboratory animals. The relevance of these findings to humans is uncertain. Pre-existing liver and blood disorders may be aggravated by exposure to this material. Persons with pre-existing heart disorders may be more susceptible to irregular heartbeats (arrhythmias) if exposed to high concentrations of this material. Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage (painters' syndrome). Intentional misuse by deliberately concentrating and inhaling this product may be harmful or fatal.

***Mutagenicity (effects on genetic material): Negative or equivocal results have been obtained in mutagenicity tests using mammalian cells or animals. This is consistent with the lack of interaction with DNA in rats and hamsters. Although results of Ames bacterial tests have generally been positive, overall the data suggest that genotoxic potential does not appear to be a significant factor in the toxicity of methylene chloride.

Signs and Symptoms of Exposure: Light-headedness & nausea. Irritating to the eyes and the skin.

Medical Conditions Generally Aggravated by Exposure: Prolonged contact with high concentrations can lead to serious kidney and liver damage.

Emergency and First Aid Procedures: Eyes - flush with water for 15 minutes. Skin - wash area with soap & water. Ingestion - drink water, DO NOT INDUCE VOMITING. Inhalation - remove to fresh air. If breathing has stopped, start CPR.

HMIS Rating	HMIS Scale	NFPA Rating	NFPA Scale
Health = 3	4 = Severe Hazard	Health = 2	4 = Severe Hazard
Flammability = 1	3 = Serious Hazard	Flammability = 1	3 = Serious Hazard
Reactivity = 0	2 = Moderate Hazard	Reactivity = 0	2 = Moderate Hazard
	1 = Slight Hazard	Other = None	1 = Slight Hazard
	0 = Minimal Hazard		0 = Minimal Hazard

SECTION 7 - PRECAUTIONS FOR SAFE HANDLING AND USE

Steps to Be Taken in Case Material Is Released or Spilled: Spills should be soaked up with absorbent. Area should then be flushed with water. All rinsate should be containerized & labeled. Spills on areas that are not on pavement can be handled by removing the affected soils.

Waste Disposal Method: Waste disposal must be in accordance with appropriate U.S. Federal, State, and local regulations.

Precautions to Be Taken in Handling and Storing: Use and store this material in cool, dry, well ventilated areas away from heat and all sources of ignition. Keep containers closed. Keep away from incompatible materials (Section 5). Do not enter confined spaces such as tanks or pits without following proper entry procedures such as ASTM D-4276. The use of respiratory protection is advised when concentrations exceed the established exposure limits. Wash thoroughly after handling. Do not wear contaminated clothing or shoes. Use good personal hygiene practices. Empty containers retain residue and can be dangerous. All containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations. Do not spray into electric arc or through open flame. Wait 5 to 10 seconds after spraying before welding. Evaporation of methylene chloride occurs almost immediately if the correct amount of spray is used. Do not breathe the welding fumes.

SECTION 8 - CONTROL MEASURES

Respiratory Protection (Specify Type):	None, during normal use.	
Ventilation	Local Exhaust: Sufficient to maintain TLV.	Special: N/A
	Mechanical: General	Other: N/A
Protective Gloves:	Polyfluorinated polyethylene	Eye Protection: Face shield and goggles should be worn.
Other Protective Clothing or Equipment:	Leather welding gloves while welding.	
Work/Hygiene Practices:	Avoid getting this product on you or in you. Wash thoroughly after handling this product. Do not eat, drink, smoke, apply cosmetics or contact lenses while handling this product. Avoid breathing vapors or mists generated by this product. Use in a well-ventilated location. Remove contaminated clothing immediately. Read and comply with the requirements of 29 CFR §1910.1052.	

OTHER INFORMATION REQUIRED BY STATE OR FEDERAL LAW

California Proposition 65 Information: Methylene Chloride (the main component of this product) is on the California Proposition 65 lists. WARNING! This product contains a chemical known to the state of California to cause cancer and birth defects (or other reproductive harm).

New Jersey Right-To-Know Information: 5 most predominant ingredients/hazardous and non-hazardous

1. Methylene Chloride CAS #75-09-2;
2. Carbon Dioxide CAS #124-38-9;
3. Sova Lecithin CAS #8002-43-5

SARA Title III Notification Information: All chemical compounds marked with an asterisk (*) are toxic chemicals subject to the reporting requirements of Section 313 of Title III of the Super Fund Amendments and Reauthorization Act (SARA) of 1986 and 40 CFR Part 372.

Disclaimer of Expressed and Implied Warranties: The information in this document is believed to be correct as of the date issued. However, no warranty of merchantability, fitness for any particular purpose, or any other warranty is expressed or is to be implied regarding the accuracy or completeness of this information, the results to be obtained from the use of this information or the product, the safety of this product, or the hazards related to its use.

A-9 ALUMINUM CUTTING FLUID

		MATERIAL SAFETY DATA SHEET Meets requirements of 29 CFR 1910.1200 (Federal Hazard Communication Standard)	HMIS	
			Health	1
			Reactivity	1

 SECTION I

PRODUCT NAME OR NUMBER	A-9® ALUMINUM CUTTING FLUID		
MANUFACTURER'S NAME	Relton Corporation	EMERGENCY TELEPHONE NO	Chemtrec - (800) 424-9300
ADDRESS (Number, Street, City, State, and Zip Code)	317 Rolyn Place, Arcadia, CA 91007-2838	Non-Emergency Ph. No.	(323) 681-2551 (800) 423-1505
HAZARDOUS MATERIALS DESCRIPTION AND PROPER SHIPPING NAME (49 CFR 172.101)	NA	HAZARD CLASS (49 CFR 172.101)	NA
CHEMICAL FAMILY	Mixture: predominately hydrocarbon base with bland additives.	Formula	See Section II

 SECTION II - INGREDIENTS

	TLV	PEL	STEL	C.A.S. NO.	%
Mineral Oil	NE	NE	NE	64742-58-1	> 70
Bland Additive	NE	NE	NE	Trade secret	< 25
Bland Additive	NE	NE	NE	Trade secret	< 16
Perfume	NE	NE	NE	-- --	< 1
Green dye, Pharmacy Grade	NE	NE	NE	-- --	trace

(See Section V for Health data)

Data is based on testing mixture as a whole. Neither the mixture nor any of its ingredients is on the carcinogen or suspected-carcinogen list of the NTP, the IARC, or OSHA. Contains no Calif. Prop. 65 substance. Not reportable under SARA. All components are listed on the TSCA inventory.

 SECTION III - PHYSICAL DATA

BOILING POINT (X°F) (C°)	400° F	SPECIFIC GRAVITY (H ₂ O=1) @ 25° C	0.883	Freezing Point	-20° F
VAPOR PRESSURE (mm Hg)	100° F: .1 mm	PERCENT VOLATILE BY VOLUME (%)	NA	VOC	NA
VAPOR DENSITY (AIR=1)	NA	EVAPORATION RATE (WATER=1)	NA		
SOLUBILITY IN WATER	Negligible	pH=	NA		
APPEARANCE AND ODOR	light green oil with slight,fatty odor.		MATERIAL IS	LIQUID	SOLID
			GAS	PASTE	POWDER

 SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT (method used)	266° F CCC	FLAMMABLE LIMITS	LFL	UFL
		Non-Flammable	NA	NA
EXTINGUISHING MEDIA	Use CO ₂ , dry chemicals , foam, water as a mist only.			
SPECIAL FIRE FIGHTING PROCEDURES	Prefer CO ₂ or sand as with oil fire.			
UNUSUAL FIRE AND EXPLOSION HAZARDS	No unusual hazards			
Exposing containers to intense heat could cause drums to rupture. Cool fire-exposed containers with water spray to prevent rupture.				

 SECTION V - HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE	Eyes and skin: may cause mild irritation. Inhalation: may cause mild upper respiratory irritation. Ingestion: possible nausea.
EMERGENCY AND FIRST AID PROCEDURES	Eyes: flush for 15 min. with water. Skin: wash with soap and water. Inhalation: remove to fresh air. Ingestion: do not induce vomiting; give lots of water to a conscious person. Call Doctor

NE=not established NF=not found NA=not applicable ND=not determined

A-9 ALUMINUM CUTTING FLUID **SECTION VI - REACTIVITY DATA**

STABILITY	UNSTABLE		CONDITIONS TO AVOID: Flame, heat, strong oxidizing agents
	STABLE	X	
INCOMPATIBILITY (materials to avoid): Swells natural rubber and some plastics. Slight etching of light metals on prolonged exposure may occur.			
HAZARDOUS DECOMPOSITION PRODUCTS. CO, CO ₂ , and acrolein when combusted			
HAZARDOUS POLYMERIZATION	MAY OCCUR		CONDITIONS TO AVOID: NA
	WILL NOT OCCUR	X	

 SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED. Wear respirator and protective clothing. Treat as oil spill. Soak up on absorbent clay or sand and remove to containers.
WASTE DISPOSAL METHOD Transport in DOT-approved container to EPA-approved treatment, storage, and disposal facility. Follow local, State & Federal disposal regulations.

 SECTION VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION (specify type) Normally not needed. For oil-type mist, use NIOSH listed respirator.		
VENTILATION Local-mechanical to remove oil mist	LOCAL EXHAUST (Specify Rate) Adequate to avoid fumes and oil mists	SPECIAL Not required normally
	MECHANICAL (General) (Specify Rate) NA	OTHER
PROTECTIVE GLOVES Nitrile-type, oil resistant	EYE PROTECTION Chemical goggles or full faceshield.	
OTHER PROTECTIVE EQUIPMENT Clean clothes. Apron or chemical suit where splashing may occur.		

 SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING Avoid production of oil mist. Avoid excessive heat. Avoid repeated or prolonged skin or eye contact.
OTHER PRECAUTIONS While there is no TLV established for this product, airborne mist should be kept below the nuisance TLV for oil mist: 5Mg/meter ³ .

ADDITIONAL INFORMATION

DOT: No hazardous substance UN or NA#: Not applicable
No hazard class Freight Classification: Petroleum oil, lubricating
No DOT ID# It# 155250 Class 65

SARA: Not considered to be subject to Title III

TSCA: All components required to be listed on the inventory are listed.

IARC-NTP-OSHA: Neither the mixture nor any component is listed as a carcinogen or suspected carcinogen.

California Prop. 65 Material: None.

HMIS HAZARD RATING	
LEAST—0	SLIGHT— 1
MODERATE — 2	HIGH — 3
	EXTREME — 4

SECTION 2 - HAZARDOUS INGREDIENTS

None

SECTION 3 - PHYSICAL DATA

Appearance and Odor: Black liquid, mild odor.
Solubility in Water: Negligible.
Boiling Point: 410° F

Specific Gravity (H2O = 1): 1.15
Vapor Density (Air = 1): Greater than air.
Vapor Pressure (mm Hg): 68° F < 0

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point: 380° F
Extinguishing Media: Water, spray, dry chemical, CO2 foam.
Unusual Fire and Explosion Hazards: Under fire conditions, fumes, smoke, carbon monoxide.
Special Fire Fighting Procedures: Use self-contained breathing apparatus & protective clothing.

Method: PMCC

SECTION 5 - HEALTH HAZARD DATA

Effects Of Overexposure: No harmful effects expected from reasonably foreseeable exposure.
Skin First Aid: Flush skin with water.
Eye First Aid: Flush eyes with water.
Inhalation Exposure: No problem at room temperature.
Inhalation First Aid: Smoke formed at high temperature. Smoke formed at high temperature. Will be mildly irritating with prompt relief on removal to fresh air.

SECTION 6 - REACTIVITY DATA

Stability: Stable.
Incompatible Materials: Oxidizing agents, nitric acid, and strong acids.
Hazardous Decomposition Products: None.
Hazardous Polymerization: Will not occur.
Conditions to Avoid: None.

SECTION 7 - SPILL OR LEAK PROCEDURES

Steps to be Taken if Material is Released or Spilled: Contain with sand, earth or sawdust. Implement cleanup procedures. Use suitable absorbent.
Disposal Method: Incinerate in furnace or dispose as required under appropriate federal, state and local regulations.

SECTION 8 – SPECIAL PROTECTION INFORMATION

Respiratory Protection: None.
Ventilation: Mechanical.
Other Equipment: Eye bath and shower.

Eye Protection: Safety spectacles.
Protective Gloves: Advised.

SECTION 9 – SPECIAL PRECAUTIONS

Handling Precautions: Normal handling.

SECTION 2 - HAZARDOUS INGREDIENTS

Hazardous Components	CAS #	TLV (ACGIH)	OSHA PEL	Weight %
Di(2-Ethylhexyl) Phthalate	000117-81-7	5 mg/m ³ TWA 10 mg/m ³ STEL	5 mg/m ³ TWA 10 mg/m ³ STEL	72

SECTION 3 - PHYSICAL DATA

Appearance and Odor: Green liquid, mild odor.
 Solubility in Water: Negligible.
 Boiling Point:

Specific Gravity (H₂O = 1): 1.11
 Vapor Density (Air = 1): Greater than air.
 % Volatile by Volume: NIL

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point: 410° F Flammable Limits: N/A
 Extinguishing Media: CO₂, dry chemicals, foam.
 Unusual Fire and Explosion Hazards: Empty drums that contain residual material(s), which may decompose to emit toxic or irritating gasses if burned.
 Special Fire Fighting Procedures: Wear positive pressure self-contained breathing equipment.

SECTION 5 - HEALTH HAZARD DATA

Medical Conditions Aggravated by Exposure: Respiratory symptoms associated with pre-existing lung disorders.
 Skin: May cause mild skin irritation.
 Eye Contact: May cause slight eye irritation, stinging, tearing and redness.
 Inhalation: Exposure to vapor is unlikely. However, vapors or mists produced under certain conditions or use may cause irritation of the nose, throat and respiratory tract.
 Emergency and First Aid Procedures: Flush eyes with water for at least 15 minutes. Get medical attention if irritation develops or persists. Remove contaminated clothing and wash before reuse. If affected by vapors, remove patient to fresh air, get medical attention if necessary. If swallowed, do not induce vomiting. Get medical attention.
 Health Hazards (Acute and Chronic): None.
 Carcinogenicity: OSHA: Yes IARC: Yes

SECTION 6 - REACTIVITY DATA

Stability: Stable.
 Incompatibility: Strong oxidizing agents and alkalis.
 Hazardous Decomposition Products: Carbon monoxide (CO), carbon dioxide (CO₂).
 Hazardous Polymerization: Will not occur.

SECTION 7 – SPILL OR LEAK PROCEDURES

Steps to be Taken if Material is Released or Spilled: Contain spill & soak it up with an absorbent material. Place in containers for waste disposal.

Precautions to be Taken in Handling & Storage: Wash after handling. Store material indoors in closed containers when not in use. Use with adequate ventilation. Store at normal ambient temperature. Protect from moisture, heat and sun.

Waste Disposal Method: Dispose of waste materials in landfill in accordance with all federal, state and local regulations.

SECTION 8 – SPECIAL PROTECTION INFORMATION

Respiratory Protection: Provide effective ventilation to draw vapors or fumes away from workers in absence of proper ventilation. Use approved NIOSH/OSHA organic type respirator.

Ventilation: All thermoplastic materials will emit fumes and or vapors when heated. Use adequate exhaust to maintain exposure below limits.

Protective Gloves: Use natural rubber or neoprene gloves.

Eye Protection: Eye wash station should be available. Goggles are recommended for all industrial work areas.

Protective Clothing: Launder contaminated clothing before reuse.

SECTION 9 – SARA TITLE III REGULATORY INFORMATION

Chemical(s) subject to the reporting requirements of section 313 or Title III of the superfund amendments and reauthorization act (SARA) of 1986 and 40 CFR part 372: DI(2-Ethylexyl) Phthalate, copper compounds (less than 1% total copper), barium compounds (less than 1.5%).

- SARA (U.S.A.) section 311 and 312 hazard classification(s): Delayed (chronic) health hazard.
- California Proposition 65 (Safe Drinking Water and Toxic Enforcement act of 1986): Material(s) known to the state to cause cancer: DI (2-Ethylexyl) Phthalate.

HMS RATINGS

Health: 2

4 = Severe

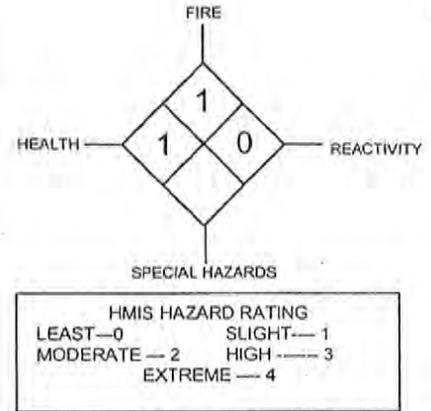

SECTION 11 - DISCLAIMER

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

PRODUCT NAME: INDIGO BLUE PIGMENT

SECTION 1 - MANUFACTURER IDENTIFICATION

MANUFACTURER'S NAME: Rhino Linings USA, Inc.
ADDRESS: 9151 Rehco Road, San Diego, CA, 92121
INFORMATION PHONE: 858-450-0441
EMERGENCY CONTACT: (CHEMTREC): 800-424-9300
DATE: April 16, 2001
SUPERSEDES: January 3, 1996

SECTION 2 - HAZARDOUS INGREDIENTS

Ingredients	CAS #	Concentration	OSHA	ACGIH	Toxicity Data
Barium Sulfate	7727-43-7	< 1.5%	Total dust 10 mg/m3	Total dust 10 mg/m3	None

SECTION 3 - PHYSICAL DATA

Appearance and Odor: Blue liquid, mild odor.
Solubility in Water: Negligible.
Boiling Point: 410° F

Specific Gravity (H2O = 1): 1.05
Vapor Density (Air = 1): Greater than air.
Vapor Pressure (mm Hg): 68° F < 0

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point: 380° F **Method:** PMCC
Extinguishing Media: Water, spray, dry chemical, CO2 foam.
Unusual Fire and Explosion Hazards: Under fire conditions, fumes, smoke, carbon monoxide.
Special Fire Fighting Procedures: Use self-contained breathing apparatus & protective clothing.

SECTION 5 - HEALTH HAZARD DATA

Effects Of Overexposure: No harmful effects expected from reasonably foreseeable exposure.
Skin First Aid: Flush skin with water.
Eye First Aid: Flush eyes with water.
Inhalation Exposure: No problem at room temperature.
Inhalation First Aid: Smoke formed at high temperature. Smoke formed at high temperature. Will be mildly irritating with prompt relief on removal to fresh air.

SECTION 6 - REACTIVITY DATA

Stability: Stable.
Incompatible Materials: Oxidizing agents, nitric acid, and strong acids.
Hazardous Decomposition Products: None.
Hazardous Polymerization: Will not occur.
Conditions to Avoid: None.

SECTION 7 - SPILL OR LEAK PROCEDURES

Steps to be Taken if Material is Released or Spilled: Contain with sand, earth or sawdust. Implement cleanup procedures. Use suitable absorbent.
Disposal Method: Incinerate in furnace or dispose as required under appropriate federal, state and local regulations.

SECTION 7 – SPILL OR LEAK PROCEDURES

Steps to be Taken if Material is Released or Spilled: Remove ignition sources. Cover the spill with absorbent material such as sawdust, sweeping compound, or diatomaceous earth. If spill is large, dike to contain. Collect and containerize absorbed material for recovery or disposal.

Disposal Method: Dispose of in accordance with federal, state, or local regulations regarding environmental control.

SECTION 8 – SPECIAL PROTECTION INFORMATION

Respiratory Protection: Not applicable.

Ventilation: Not applicable.

Eye Protection: Safety glasses or chemical goggles should be worn.

Protective Gloves: Solvent resistant gloves should be worn.

Other Equipment: Not applicable.

SECTION 9 – SPECIAL PRECAUTIONS

Handling Precautions: Handle in accordance with good industrial hygiene practices. Avoid unnecessary exposure.

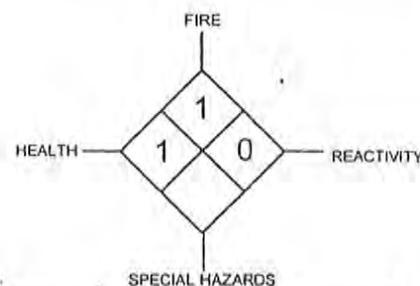

Storage Precautions: Store between 0° F and 120° F. If closed container of material is exposed to heat, pressure can build up.

SECTION 10 - DISCLAIMER

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

PRODUCT NAME: MOLY ORANGE PIGMENT
SECTION 1 - MANUFACTURER IDENTIFICATION

MANUFACTURER'S NAME: Rhino Linings USA, Inc.
ADDRESS: 9151 Rehco Road, San Diego, CA, 92121
INFORMATION PHONE: 858-450-0441
EMERGENCY CONTACT: (CHEMTREC): 800-424-9300
DATE: April 16, 2001
SUPERSEDES: January 3, 1996

HMIS HAZARD RATING
 LEAST—0 SLIGHT—1
 MODERATE—2 HIGH—3
 EXTREME—4

SECTION 2 - HAZARDOUS INGREDIENTS

Ingredients	CAS #	OSHA	ACGIH
C.I. Pigment Yellow # 34	1344-37-2	Not est.	0.05 mg/m3 (AS Pb)
Lead Chromate	7758-97-6	0.05 mg/m3 (AS Pb) TWA	0.012 mg/m3 (AS CR) TWA

SECTION 3 - PHYSICAL DATA

Appearance and Odor: Orange liquid, mild odor.
Solubility in Water: Negligible.
Boiling Point: 410° F

Specific Gravity (H2O = 1): 1.48
Vapor Density (Air = 1): Greater than air.
Vapor Pressure (mm Hg): 68° F < 0

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point: 380° F **Method:** PMCC
Extinguishing Media: Water, spray, dry chemical, CO2 foam.
Unusual Fire and Explosion Hazards: Under fire conditions, fumes, smoke, carbon monoxide.
Special Fire Fighting Procedures: Use self-contained breathing apparatus & protective clothing.

SECTION 5 - HEALTH HAZARD DATA

Effects Of Overexposure: No harmful effects expected from reasonably foreseeable exposure.
Skin First Aid: Flush skin with water.
Eye First Aid: Flush eyes with water.
Inhalation Exposure: No problem at room temperature.
Inhalation First Aid: Smoke formed at high temperature. Smoke formed at high temperature. Will be mildly irritating with prompt relief on removal to fresh air.

SECTION 6 - REACTIVITY DATA

Stability: Stable.
Incompatible Materials: Oxidizing agents, nitric acid, and strong acids.
Hazardous Decomposition Products: None.
Hazardous Polymerization: Will not occur.
Conditions to Avoid: None.

SECTION 7 - SPILL OR LEAK PROCEDURES

Steps to be Taken if Material is Released or Spilled: Contain with sand, earth or sawdust. Implement cleanup procedures. Use suitable absorbent.
Disposal Method: Incinerate in furnace or dispose as required under appropriate federal, state and local regulations.

SECTION 8 – SPECIAL PROTECTION INFORMATION

Respiratory Protection: None.
Ventilation: Mechanical.
Other Equipment: Eye bath and shower.

Eye Protection: Safety spectacles.
Protective Gloves: Advised.

SECTION 9 – SPECIAL PRECAUTIONS

Handling Precautions: Normal handling.

SECTION 10 – SARA TITLE III REGULATORY INFORMATION

Section 302: Extremely hazardous substances: None.
Section 311/312: Hazard Categories: Delayed health hazard.
Section 313: Toxic Chemicals:
Copper Compounds (less than 1% total copper)
Barium Compounds (less than 1.5%)

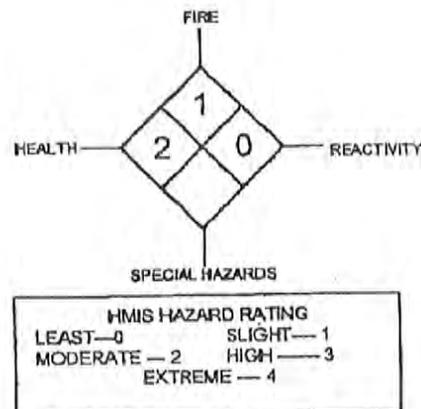

SECTION 11 - DISCLAIMER

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

PRODUCT NAME: ORGANIC YELLOW G.S. PIGMENT

SECTION 1 - MANUFACTURER IDENTIFICATION

MANUFACTURER'S NAME: Rhino Linings USA, Inc.
ADDRESS: 9151 Rehco Road, San Diego, CA, 92121.
INFORMATION PHONE: 858-450-0441
EMERGENCY CONTACT: (CHEMTREC): 800-424-9300
DATE: January 14, 2000
SUPERSEDES: April 16, 2001

SECTION 2 - HAZARDOUS INGREDIENTS

Hazardous Components	CAS #	TLV (ACGIH)	OSHA PEL	Weight %
DI(2-Ethylhexyl) Phthalate	000117-81-7	5 mg/m3 TWA 10 mg/m3 STEL	5 mg/m3 TWA 10 mg/m3 STEL	72

SECTION 3 - PHYSICAL DATA

Appearance and Odor: Yellow liquid, mild odor.
Solubility in Water: Negligible.
% Volatile by Volume: NIL

Specific Gravity (H₂O = 1): 1.21
Vapor Density (Air = 1): Greater than air.

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point: > 410° F
Extinguishing Media: CO₂, dry chemicals, foam.
Unusual Fire and Explosion Hazards: Empty drums that contain residual material which may decompose to emit toxic or irritating gasses if burned.
Special Fire Fighting Procedures: Wear positive pressure self-contained breathing equipment.

Flammable Limits: N/A

SECTION 5 - HEALTH HAZARD DATA

Inhalation Exposure: Exposure to vapor is unlikely. However, vapors or mists produced under certain conditions or use may cause irritation of the nose, throat and respiratory tract.
Skin Exposure: May cause mild skin irritation.
Eye Contact: May cause slight eye irritation, stinging, tearing and redness.
Health Hazards (Acute & Chronic): None
Carcinogenicity: OSHA: Yes IARC: Yes
Medical Conditions Aggravated by Exposure: Respiratory symptoms associated with pre-existing lung disorders.
Emergency & First Aid Procedures: Flush eyes with water for at least 15 minutes. Get medical attention if irritation develops or persists. Remove contaminated clothing and wash before re-use. If affected by vapors, remove patient to fresh air; get medical attention if necessary. If swallowed, do not induce vomiting. Get medical attention.

SECTION 6 - REACTIVITY DATA

Stability: Stable.
Incompatibility: Strong oxidizing agents and alkalis.
Hazardous Decomposition Products: Carbon Monoxide (CO), Carbon Dioxide (CO₂).
Hazardous Polymerization: Will not occur.

SECTION 7 - SPILL OR LEAK PROCEDURES

Steps to be Taken If Material Is Spilled: Contain spill & soak it up with an absorbent material. Place in containers for waste disposal.
Waste Disposal Method: Dispose of waste materials in landfill in accordance with all federal, state and local regulations.

SECTION 8 - SPECIAL PROTECTION INFORMATION

Respiratory Protection: Provide effective ventilation to draw vapors or fumes away from workers. In absence of proper ventilation, use approved NIOSH/OSHA organic type respirator.

Ventilation: All thermoplastic materials will emit fumes and/or vapors when heated. Use adequate exhaust to maintain exposure below limits.

Protective Gloves: Use natural rubber or neoprene gloves.

Eye Protection: Eye wash station should be available. Goggles are recommended for all industrial work areas.

Protective Clothing: Launder contaminated clothing before reuse.

SECTION 9 - SPECIAL PRECAUTIONS

Precautions to be Taken in Handling & Storage: Wash after handling. Store material indoors in closed containers when not in use. Use with adequate ventilation. Store at normal ambient temperature. Protect from moisture, heat and sun.

SECTION 10 - REGULATORY INFORMATION

D.O.T. Labels Required (CFR172.101-102): None.

D.O.T. Placards Required (CFR172.504): None

SARA Title III Regulatory Information

- Chemical(s) subject to the reporting requirements of section 313 or Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986 and 40 CFR Part 372: Di(2-Ethylhexyl) Phthalate.
- SARA (U.S.A.) Sections 311 and 312 Hazard Classification(s): Delayed (Chronic) Health Hazard.
- California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986): Material(s) Known To The State California To Cause Cancer: Di(2-Ethylhexyl) Phthalate.
- California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986): Material(s) Known To The State Of California To Cause Adverse Reproductive Effects: None.

SECTION 11 - DISCLAIMER

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

COMPANY DETAILS

COMPANY NAME:	RHINO LININGS AUSTRALASIA PTY LTD
COMPANY ADDRESS:	501 – 505 OLSEN AVENUE, MOLENDINAR QLD 4214
TELEPHONE:	+61 7 5597 2877
FACSIMILE:	+61 7 5539 6399

STATEMENT OF HAZARDOUS NATURE

Not classified as hazardous according to Worksafe Australia criteria.

IDENTIFICATION

PRODUCT NAME:	Tuff Stuff A-Side
SYNONYMS:	4,4'-diphenylmethane diisocyanate (MDI) MDI oligomer Tuffstuff Tough-stuff (misspelling)
PRODUCT CODE:	
U.N.NUMBER:	None
HAZCHEM CODE:	None
CAS RN No(s):	None
PACKING GROUP:	None
DANGEROUS GOODS CLASS & SUB RISK:	None
POISON SCHEDULE:	S6
USE:	Hardener component A of a polyurethane lining formulation. Always used in admixture with component B. Requires that the two parts be mixed by hand or mixer before use, in accordance with manufacturers directions. Mix only as much as is required. Do not return the mixed material to the original containers

PHYSICAL PROPERTIES/DESCRIPTION:

APPEARANCE:	Yellow or light straw coloured liquid; does not mix with water. Musty odour.
BOILING POINT:	Not available
MELTING POINT:	Not available
VAPOUR PRESSURE (kPa) (70°F):	Negligible
SPECIFIC GRAVITY:	1.192
FLASHPOINT / 0°:	>219
LOWER EXPLOSIVE LIMIT %:	Not applicable
UPPER EXPLOSIVE LIMIT %:	Not applicable
SOLUBILITY IN WATER %:	Immiscible
VISCOSITY:	180-250 cps @ 25 deg.C.

Material Safety Data Sheet
 CHEMWATCH 4944-79

Page 2 of 7
 Date of Issue: Thu 17-Apr-2003

HEALTH HAZARD INFORMATION

Skin Contact:	Sensitisation may result in allergic dermatitis responses including rash, itching, hives or swelling of extremities. Sensitisation reactions may appear suddenly after repeated symptom free exposures Bare unprotected skin should not be exposed to this material Toxic effects may result from skin absorption The material may cause skin irritation after prolonged or repeated exposure and may produce on contact skin redness, swelling, the production of vesicles, scaling and thickening of the skin.
Swallowed:	Considered an unlikely route of entry in commercial/industrial environments Ingestion may result in nausea, abdominal irritation, pain and vomiting
Eye Contact:	The material may produce moderate eye irritation leading to inflammation. Repeated or prolonged exposure to irritants may produce conjunctivitis
Inhalation:	The vapour/mist may be highly irritating to the upper respiratory tract and lungs; the response may be severe enough to produce bronchitis and pulmonary oedema. Possible neurological symptoms arising from isocyanate exposure include headache, insomnia, euphoria, ataxia, anxiety neurosis, depression and paranoia. Gastrointestinal disturbances are characterised by nausea and vomiting. Pulmonary sensitisation may produce asthmatic reactions ranging from minor breathing difficulties to severe allergic attacks; this may occur following a single acute exposure or may develop without warning for several hours after exposure. Sensitized people can react to very low doses, and should not be allowed to work in situations allowing exposure to this material. Continued exposure of sensitised persons may lead to possible long term respiratory impairment. Inhalation hazard is increased at higher temperatures. Inhalation of vapour may aggravate a pre-existing respiratory condition such as asthma, bronchitis, emphysema

CHRONIC HEALTH EFFECTS

Isocyanate vapours are irritating to the airways and can cause their inflammation, with wheezing, gasping, severe distress, even loss of consciousness and fluid in the lungs. Nervous system symptoms that may occur include headache, sleep disturbance, euphoria, inco-ordination, anxiety, depression and paranoia. Digestive effects include nausea and vomiting. Breathing difficulties may occur unpredictably after a period of tolerance and after skin contact. Allergic inflammation of the skin can occur, with rash, itching, blistering, and swelling of the hands and feet. Sensitive people can react to very low levels and should not be exposed to this material.

Respiratory sensitisation may result in allergic/asthma like responses; from coughing and minor breathing difficulties to bronchitis with wheezing, gasping. Sensitisation may give severe responses to very low levels of exposure, i.e. hypersensitivity. Sensitised persons should not be allowed to work in situations where exposure may occur.

FIRST AID

Skin Contact:	If solids or aerosol mists are deposited upon the skin: · Flush skin and hair with running water (and soap if available). · Remove any adhering solids with industrial skin cleansing cream. · DO NOT use solvents. · Seek medical attention in the event of irritation.

FIRST AID cont.

Swallowed:	<p>If poisoning occurs, contact a doctor or Poisons Information Centre.</p> <ul style="list-style-type: none"> · IF SWALLOWED, REFER FOR MEDICAL ATTENTION, WHERE POSSIBLE, WITHOUT DELAY. · For advice, contact a Poisons Information Centre or a doctor. <p>Where Medical attention is not immediately available or where the patient is more than 15 minutes from a hospital or unless instructed otherwise:</p> <ul style="list-style-type: none"> · Induce vomiting with fingers down the back of the of the throat, ONLY IF CONSCIOUS. · Lean patient forward or place on left side (head-down position if possible) to maintain open airway and prevent aspiration. <p>NOTE: Wear a protective glove when inducing vomiting by mechanical means.</p> <ul style="list-style-type: none"> · In the mean time, qualified first-aid personnel should treat the patient following observation and employing supportive measures as indicated by the patient's condition. · If the services of a medical officer or medical doctor are readily available, the patient should be placed in his/her care and a copy of the MSDS should be provided. Further action will be the responsibility of the medical specialist. · If medical attention is not available on the worksite or surroundings send the patient to a hospital together with a copy of the MSDS.
Eye Contact:	<p>If this product comes in contact with the eyes:</p> <ul style="list-style-type: none"> · Immediately hold eyelids apart and flush the eye continuously with running water. <p>Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.</p> <ul style="list-style-type: none"> · Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes. · Transport to hospital or doctor without delay. · Removal of contact lenses after an eye injury should only be undertaken by Skilled personnel.
Inhalation:	<ul style="list-style-type: none"> · If fumes or combustion products are inhaled remove from contaminated area. · Lay patient down. Keep warm and rested. · Prosthesis such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures. · Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if necessary. · Transport to hospital, or doctor, without delay.

ADVICE TO DOCTORS –

For sub-chronic and chronic exposures to isocyanates:

- This material may be a potent pulmonary sensitiser which causes bronchospasm even in patients without prior airway hyperreactivity.
- Clinical symptoms of exposure involve mucosal irritation of respiratory and gastrointestinal tracts.
- Conjunctival irritation, skin inflammation (erythema, pain vesiculation) and gastrointestinal disturbances occur soon after exposure.
- Pulmonary symptoms include cough, burning, substantial pain and dyspnoea.
- Some cross-sensitivity occurs between different isocyanates.
- Noncardiogenic pulmonary edema and bronchospasm are the most serious consequences of exposure. Markedly symptomatic patients should receive oxygen, ventilatory support and an intravenous line.
- Treatment for asthma includes inhaled sympathomimetics (epinephrine [adrenalin], terbutaline) and steroids.
- Activated charcoal (1 g/kg) and a cathartic (sorbitol, magnesium citrate) may be useful for ingestion.
- Mydriatics, systemic analgesics and topical antibiotics (Sulamyd) may be used for corneal abrasions.
- There is no effective therapy for sensitised workers. [Ellenhorn and Barceloux; Medical Toxicology]

ADVICE TO DOCTORS cont.

NOTE: Isocyanates cause airway restriction in naive individuals with the degree of response dependant on the concentration and duration of exposure. They induce smooth muscle contraction which leads to bronchoconstrictive episodes. Acute changes in lung function, such as decreased FEV1, may not represent sensitivity. [Karol & Jin, Frontiers in Molecular Toxicology, pp 56-61, 1992]

PRECAUTIONS FOR USE

Exposure Standards:	No data for Ultracoat Tuff Stuff A-Side.																				
Engineering Controls:	<p>Use in a well-ventilated area</p> <p>General exhaust is adequate under normal operating conditions. Local exhaust ventilation may be required in specific circumstances. If risk of overexposure exists, wear approved respirator. Correct fit is essential to obtain adequate protection. Provide adequate ventilation in warehouse or closed storage areas.</p> <p>Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to effectively remove the contaminant.</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 60%;">Type of Contaminant:</td> <td style="width: 40%;">Air Speed:</td> </tr> <tr> <td>solvent, vapours, degreasing etc., evaporating from tank (in still air).</td> <td>0.25-0.5 m/s (50-100 f/min)</td> </tr> <tr> <td>aerosols, fumes from pouring operations, intermittent container filling, low speed conveyer transfers, welding, spray drift, plating acid fumes, pickling (released at low velocity into zone of active generation)</td> <td>0.5-1 m/s (100-200 f/min.)</td> </tr> <tr> <td>direct spray, spray painting in shallow booths, drum filling, conveyer loading, crusher dusts, gas discharge (active generation into zone of rapid air motion) 1</td> <td>-2.5 m/s (200-500 f/min.)</td> </tr> <tr> <td>grinding, abrasive blasting, tumbling, high speed wheel generated dusts (released at high initial velocity into zone of very high rapid air motion).</td> <td>2.5-10 m/s (500-2000 f/min.)</td> </tr> </table> <p>Within each range the appropriate value depends on:</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%;">Lower end of the range</td> <td style="width: 50%;">Upper end of the range</td> </tr> <tr> <td>1: Room air currents minimal or</td> <td>1: Disturbing room air currents favourable to capture</td> </tr> <tr> <td>2: Contaminants of low toxicity or of</td> <td>2: Contaminants of high toxicity nuisance value only.</td> </tr> <tr> <td>3: Intermittent, low production.</td> <td>3: High production, heavy use</td> </tr> <tr> <td>4: Large hood or large air mass in</td> <td>4: Small hood-local control only motion</td> </tr> </table> <p>Simple theory shows that air velocity falls rapidly with distance away from the opening of a simple extraction pipe. Velocity generally decreases with the square of distance from the extraction point (in simple cases). Therefore the air speed at the extraction point should be adjusted, accordingly, after reference to distance from the contaminating source. The air velocity at the extraction fan, for example, should be a minimum of 1-2 m/s (200-400 f/min) for extraction of solvents generated in a tank 2 meters distant from the extraction point. Other mechanical considerations, producing performance deficits within the extraction apparatus, make it essential that theoretical air velocities are multiplied by factors of 10 or more when extraction systems are installed or used.</p> <p>Refer also to protective measures for the other component used with the product. Read both MSDS before using; store and attach MSDS together.</p>	Type of Contaminant:	Air Speed:	solvent, vapours, degreasing etc., evaporating from tank (in still air).	0.25-0.5 m/s (50-100 f/min)	aerosols, fumes from pouring operations, intermittent container filling, low speed conveyer transfers, welding, spray drift, plating acid fumes, pickling (released at low velocity into zone of active generation)	0.5-1 m/s (100-200 f/min.)	direct spray, spray painting in shallow booths, drum filling, conveyer loading, crusher dusts, gas discharge (active generation into zone of rapid air motion) 1	-2.5 m/s (200-500 f/min.)	grinding, abrasive blasting, tumbling, high speed wheel generated dusts (released at high initial velocity into zone of very high rapid air motion).	2.5-10 m/s (500-2000 f/min.) PRECAUTIONS FOR USE cont

Personal Protection:	<p>EYE Chemical goggles. Full-face shield. DO NOT wear contact lenses. Contact lenses pose a special hazard; soft contact lenses may absorb irritants and all lenses concentrate them.</p> <p>HANDS/FEET Neoprene gloves or Butyl rubber gloves PVC gloves Rubber boots DO NOT use skin cream unless necessary and then use only minimum amount. Isocyanate vapour may be absorbed into skin cream and this increases hazard.</p> <p>OTHER Overalls. Eyewash unit. DO NOT return unused product to containers. The local concentration of material, quantity and conditions of use determine the type of personal protective equipment required. For further information consult site specific CHEMWATCH data (if available), or your Occupational Health and Safety Advisor.</p>
----------------------	--

SAFE HANDLING INFORMATION

Storage and Transport:	<p>SUITABLE CONTAINER Metal can or drum · Packaging as recommended by manufacturer. · Check all containers are clearly labeled and free from leaks</p> <p>STORAGE INCOMPATIBILITY Avoid storage with oxidisers · Avoid contamination with water, alkalies and detergent solutions. · Material reacts with water and generates gas, pressurises containers with even drum rupture resulting. · DO NOT reseal container if contamination is suspected. · Open all containers with care.</p>
Storage and Transport: cont:	<p>STORAGE REQUIREMENTS Rotate all stock to prevent ageing. Use on FIFO (First In-First Out) basis Keep dry · Store in original containers. · Keep containers securely sealed. · No smoking, naked lights or ignition sources. · Store in a cool, dry, well-ventilated area. · Store away from incompatible materials and foodstuff containers. · Protect containers against physical damage and check regularly for leaks. · Observe manufacturer's storing and handling recommendations. Store at 16-38 deg.C.</p> <p>TRANSPORTATION No restrictions.</p>

The information provided herein and/or otherwise supplied to users is based on our current knowledge, accordingly any conclusions or recommendations are made without liability on the part of Rhino Linings Australasia Pty Ltd and/or any of the company's employees or associates. Factors outside of our control can affect the use of these products and we therefore cannot accept responsibility for any injury, loss or damage resulting from reliance upon such information.

SAFE HANDLING INFORMATION cont.

Spillages:	<p>MINOR SPILLS Clean up all spills immediately. Shut off all possible sources of ignition and increase ventilation. Avoid contact with skin and eyes. Wear protective clothing, impervious gloves and safety glasses. Contain and absorb spill with sand, earth, inert material or vermiculite. Trowel up/scrape up. Collect residues and place in labelled plastic containers with vented lids</p> <p>MAJOR SPILLS DO NOT touch the spill material Pollutant - contain spillage Clear area of personnel and move upwind · Wear full body protective clothing with breathing apparatus. · Prevent, by any means available, spillage from entering drains or water courses. Shut off all possible sources of ignition and increase ventilation. No smoking or naked lights within area. Stop leak if safe to do so. Contain and absorb spill with sand, earth, inert material or vermiculite. Collect residues and seal in labelled drums for disposal Wash spill area with detergent and water. DO NOT USE WATER OR NEUTRALISING AGENTS INDISCRIMINATELY ON LARGE SPILLS.</p> <p>DISPOSAL · DO NOT recycle spilled material. · Consult State Land Waste Management Authority for disposal. · Neutralise spill material carefully and decontaminate empty containers and spill residues with 10% ammonia solution plus detergent or a proprietary decontaminant prior to disposal. · DO NOT seal or stopper drums being decontaminated as CO₂ gas is generated and may pressurise containers. · Puncture containers to prevent re-use. · Bury or incinerate residues at an approved site.</p>
Fire/Explosion Risk	<p>EXTINGUISHING MEDIA</p> <p>SMALL FIRES Dry chemical powder. Carbon dioxide. Protein foam.</p> <p>LARGE FIRES Water spray or fog. Flooding quantities of water only. · Small quantities of water in contact with hot liquid may react violently with generation of a large volume of rapidly expanding hot sticky semi-solid foam. · Presents additional hazard when fire fighting in a confined space. · Cooling with flooding quantities of water reduces this risk.</p>

PRODUCT NAME: TUFF STUFF B-SIDE FR20

SECTION 1 - MANUFACTURER IDENTIFICATION

MANUFACTURER'S NAME: Rhino Linings USA, Inc.
ADDRESS: 9151 Rehco Road, San Diego, CA, 92121
INFORMATION PHONE: 858-450-0441
EMERGENCY CONTACT: (CHEMTREC): 800-424-9300
DATE: April 13, 2001
SUPERSEDES: November 1995

SECTION 2 - HAZARDOUS INGREDIENTS

Ingredients	CAS #	OCCUPATIONAL EXPOSURE LIMITS	
		OSHA PEL	ACGIH TLV
Glycol	111-46-6	N/E	N/E
Aromatic Amine	68479-98-1	N/E	N/E

*No toxic chemical(s) subject to the reporting requirements of Section 313 of Title III and of 40 CFR 372.

SECTION 3 - PHYSICAL DATA

Appearance and Odor: Yellow/gold liquid, slight odor.
Boiling Point: 586° F (308° C)
Vapor Density (Air = 1): Heavier than air.
Coating V.O.C.: N/A

Solubility in Water: N/E
Specific Gravity (H₂O = 1): 1.12
Evaporation Rate: Slower than ether.
V.O.C.s: None

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point: > 275° F (> 135° C) **Method:** TCC
Flammable Limits in Air by Volume: (Based on Diglycol) Lower: N/E Upper: N/E
Extinguishing Media: Dry chemical, alcohol foam, carbon dioxide.
Special Fire Fighting Protective Equipment: Wear NIOSH approved self contained breathing apparatus in positive pressure mode with full face piece. Boots, gloves (neoprene), goggles & full protective clothing are also required.
Unusual Fire and Explosion Hazards: Closed containers may rupture due to very high temperatures or induced pressure.

SECTION 5 - HEALTH HAZARD ASSESSMENT

Skin Contact: Frequent and prolonged contact can cause irritation. Skin sensitization and irritation may develop after repeated and/or prolonged contact with human skin.
Skin Absorption: Systematically toxic concentrations of this product will probably not be absorbed through human skin.
Skin First Aid: Wash material off of the skin with plenty of soap and water. If redness, itching, or a burning sensation develops, get medical attention. Wash contaminated clothing and decontaminate footwear before reuse.
Eye Contact: Can induce irritation or chemical burns on contact with eyes.
Eye First Aid: Immediately flush eyes with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Have eyes examined and treated by medical personnel.
Ingestion: Swallowing small amounts of this material is not likely to cause harmful effects. Swallowing large amounts may be harmful.
Ingestion First Aid: Give 1 or 2 glasses of water and induce vomiting. Call a physician immediately. (Never give anything by mouth to an unconscious person).
Inhalation: Vapors can irritate eyes, nose and respiratory passages. Overexposure may induce headache or dizziness. Severe overexposure to this material could cause stomach or intestinal upset, chronic cough, dizziness, or weakness.
Inhalation First Aid: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is labored, give oxygen. Consult medical personnel.

SECTION 5 – HEALTH HAZARD ASSESSMENT (Continued)

Carcinogenicity: NTP – No IARC Monographs – No OSHA Regulated – No
Health Hazards: **Acute:** Exposure may cause skin and eye irritation, respiratory tract irritation. Chemical burns may result due to overexposure. Effects of exposure may be delayed. **Chronic:** Repeated and prolonged exposure at low levels may result in adverse skin and eye effects, liver and kidney disorders.

SECTION 6 – REACTIVITY DATA

Stability: Stable under normal conditions.
Conditions to Avoid: Heat, high temperatures, open flame, sparks and moisture. Contact with incompatible materials in a closed system will cause buildup of pressure.
Incompatibility: Isocyanates and strong oxidizers.
Hazardous Decomposition Products: Organic vapors and other thermal decomposition products.
Hazardous Polymerization: Will not occur.

SECTION 7 – SPILL OR LEAK PROCEDURES

Steps To Be Taken In Case Material is Released Or Spilled: Wear skin, eye, and respiratory protection during cleanup. Soak up material with absorbent and shovel into a chemical waste container. Cover container, but do not seal, and remove from work area. Residues from spill cleanup may continue to be regulated under provisions of RCRA and require storage and disposal as hazardous waste. For major spills, call CHEMTREC (Chemical Transportation Emergency Center) at 800-424-9300.
Disposal Method: Spill cleanup residues may still be subject to RCRA storage and disposal requirements. Dispose of in compliance with all relevant local, state, and federal laws and regulations regarding treatment.

SECTION 8 – SPECIAL PROTECTION INFORMATION

Ventilation: Good general ventilation should be sufficient to control airborne levels.
Respiratory Protection: Use a NIOSH approved respirator as required to prevent overexposure. In accordance with 29 CFR 1910.134, use either an atmosphere supplying respirator or and air purifying respirator for organic vapors.
Protective Clothing: Gloves determined to be impervious under the options of use should be worn always when working with this product. Depending on conditions of use, additional protection may be reassured such as apron, arm covers, or full body suit. Wash contaminated clothing before wearing. Protective clothing should be selected and used in accordance with "Guidelines for the Selection of Chemical Protective Clothing" published by ACGIH.
Eye Protection: Chemical tight goggles and full face shield.
Other Protective Equipment: Unhindered access to safety shower and eye wash stations. As a general hygiene practice, wash hands and face after use. Showers and cleaning of clothes are recommended. Follow all label instructions. Educate and train employees in safe use of product.

SECTION 9 – SPECIAL PRECAUTIONS OR OTHER COMMENTS

Precautions To Be Taken In Handling & Storing: Keep in cool, dry, ventilated storage area, in closed container and out of direct sunlight. Keep liquid away from heat, sparks and flame, store in container above ground and surrounded by dikes to contain spills or leaks. Excessive heat or pressure may ignite or detonate even liquid product in the absence of sparks or open flames. Keep containers closed when not in use. Containers, even those that have been emptied, may contain explosive vapors. Do not cut, drill, grind, weld or perform similar operations on or near containers. Do not pressurize to empty them.

SECTION 10– REGULATORY INFORMATION

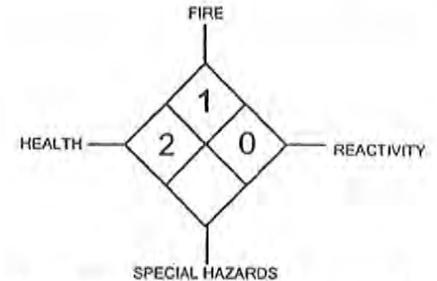

DOT Proper Shipping Name: Not regulated.
Toxic Substances Control Act (TSCA) Status: All chemicals comprising this product are listed on the TSCA inventory.
State Regulations: California – As per requirements of the State Drinking Water and Toxic Enforcement Act of CA, USA 1985 (Proposition 65), the public is warned that the materials used in this product may create an exposure to chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm. This warning required by Section 25249.6 of The California Health and Safety Code.

SECTION 11– SPECIAL PRECAUTIONS OR OTHER COMMENTS

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

This warning required by Section 25249.6 of The California Health and Safety Code.

SECTION 11– SPECIAL PRECAUTIONS OR OTHER COMMENTS

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc, makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

MATERIAL SAFETY DATA SHEET

Part No.: 70020

PRODUCT NAME: WHITE PIGMENT

SECTION 1 - MANUFACTURER IDENTIFICATION

MANUFACTURER'S NAME: Rhino Linings USA, Inc.

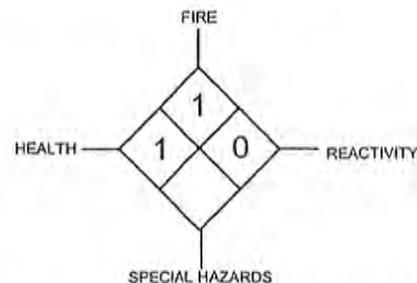

ADDRESS: 9151 Rehco Road, San Diego, CA, 92121

INFORMATION PHONE: 858-450-0441

EMERGENCY CONTACT: (CHEMTREC): 800-424-9300

DATE: April 16, 2001

SUPERSEDES: January 3, 1996

HMIS HAZARD RATING	
LEAST—0	SLIGHT—1
MODERATE—2	HIGH—3
EXTREME—4	

SECTION 2 - HAZARDOUS INGREDIENTS

None

SECTION 3 - PHYSICAL DATA

Appearance and Odor: White liquid, mild odor.

Solubility in Water: Negligible.

Boiling Point: 410° F

Specific Gravity (H₂O = 1): 1.47

Vapor Density (Air = 1): Greater than air.

Vapor Pressure (mm Hg): 68° F < 0

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point: 410° F

Method: PMCC

Extinguishing Media: Water, spray, dry chemical, CO₂ foam.

Unusual Fire and Explosion Hazards: Under fire conditions, fumes, smoke, carbon monoxide.

Special Fire Fighting Procedures: Use self-contained breathing apparatus & protective clothing.

SECTION 5 - HEALTH HAZARD DATA

Effects Of Overexposure: No harmful effects expected from reasonably foreseeable exposure.

Skin First Aid: Flush skin with water.

Eye First Aid: Flush eyes with water.

Inhalation Exposure: No problem at room temperature.

Inhalation First Aid: Smoke formed at high temperature. Smoke formed at high temperature. Will be mildly irritating with prompt relief on removal to fresh air.

SECTION 6 - REACTIVITY DATA

Stability: Stable.

Incompatible Materials: Oxidizing agents, nitric acid, and strong acids.

Hazardous Decomposition Products: None.

Hazardous Polymerization: Will not occur.

Conditions to Avoid: None.

SECTION 7 - SPILL OR LEAK PROCEDURES

Steps to be Taken if Material is Released or Spilled: Contain with sand, earth or sawdust. Implement cleanup procedures. Use suitable absorbent.

Disposal Method: Incinerate in furnace or dispose as required under appropriate federal, state and local regulations.

SECTION 8 – SPECIAL PROTECTION INFORMATION

Respiratory Protection: None.
Ventilation: Mechanical.
Other Equipment: Eye bath and shower.

Eye Protection: Safety spectacles.
Protective Gloves: Advised.

SECTION 9 – SPECIAL PRECAUTIONS

Handling Precautions: Normal handling.

SECTION 10 - DISCLAIMER

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

SAFETY DATA SHEET

RONSON BUTANE REFILL

1. IDENTIFICATION OF THE PREPARATION AND THE COMPANY

Product Name: Ronson Butane Refill
Synonyms, Trade Names: Butane Fuel 90ml to 400ml
Applications: Gas lighter fuel
Supplier: Ronson International Ltd.
International House, Old Brighton Road,
Lowfield Heath, Crawley, West Sussex. RH11 0QN
Emergency Telephone: 01293 843600 (office hours only)

2. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredient Name	CAS No	Contents	Health (class)	Risk (R No.)
Butane	106 - 97 - 8	99%		

Composition Comments Substances indicating a hazard do so under EC Directives 88/379 & 67/548
Aerosol classified as Flammable

3. HAZARDS IDENTIFICATION

Flammable
Substances not indicating a health hazard may have Occupational Exposure Limits detailed in Section 8 of this data sheet
Ingredients are below the levels to cause the product to be classified

4. FIRST AID MEASURES

General: Note! Keep affected person away from heat, sparks and flames!
Eyes: Promptly wash eyes with water while lifting the eyelids. Get medical attention immediately. Continue to rinse. Burns should be flushed with water to normalise Temperature. Cover eyes with sterile dressing. Do NOT apply ointments or powder.
Skin: Remove affected person from source of contamination. Promptly stop exposure and get medical attention if frostbite has occurred. Promptly flush contaminated skin with soap or mild detergent and water. Promptly remove clothing if penetrated and flush the skin with water.
Inhalation: Move the exposed person to fresh air at once. Perform artificial respiration if breathing has stopped. When breathing is difficult, properly trained personnel may assist affected person by administering 100% oxygen. Keep the affected person warm and at rest. Get prompt medical attention
Ingestion: NEVER MAKE AN UNCONCIOUS PERSON VOMIT OR DRINK FLUIDS.
DO NOT induce vomiting Get medical attention immediately.

5. FIRE FIGHTING MEASURES

Extinguishing Media Stop flow of material to fire. Fire can be extinguished using foam, dry chemicals, and sand dolomite etc.
Special Fire Fighting Procedures Use water to keep fire exposed cool and disperse vapours. Cool containers exposed to flames with water from side until well after fire is out. Move container from fire area if it can be done without risk.

SAFETY DATA SHEET

RONSON BUTANE REFILL

Vapour Pressure (mmHg)	1520 @ 18°C	Vapour Density (air = 1)	2.05
Melting Point	-137 °C		
Flash Point	-60 °C	Flash Point Method	CC (closed cup)
Auto ignition Temperature	405 °C		
Flammability Limit	lower % 1.90		
Flammability Limit	upper % 8.50		

10. STABILITY AND REACTIVITY

Stability	Avoid heat, sparks and flames
Materials to avoid	Strong oxidizing agents
Conditions to avoid	Evaporates easily in air. Reacts strongly with oxidizers.
Hazardous Decomposition Products	Toxic gases/vapours/fumes of carbon monoxide (CO) carbon dioxide (CO ₂)

11. TOXICOLOGICAL INFORMATION

Toxic Conc.-LC50	680 ppm/2h (inh - mus)
Target organs	Central nervous system, eyes, respiratory system and lungs
Health Warnings	Gas or vapour displaces oxygen available for breathing (asphyxiant). Narcotic effect
Medical Symptoms	May cause suffocation. Dizziness.
Acute and chronic health hazards	Contact with liquid form may cause frostbite.

12. ECOLOGICAL INFORMATION

13. DISPOSAL CONSIDERATIONS

Disposal Methods	Vent to atmosphere
Empty Containers	Dispose of empty containers without puncturing DO NOT INCINERATE

14. TRANSPORT INFORMATION

ROAD:			
UN No	1950	Hazchem Code	2WE
ADR Class	2	ADR Item No.	3b
ADR Hazard No.	23 Flammable Gas		
CEFIC TEC ® No.	276	ADR Label No.	3
Label for conveyance			

SAFETY DATA SHEET

RONSON BUTANE REFILL

AIR:
UN No. 1950 Air Transport Class No. 2
AIR Sub Class 3

SEA:
UN No. 1950 Sea Transport Class No. 2(2.1)

RAIL:
Rail Transport Class No 2 Road PT. 3b

15. REGULATORY INFORMATION

Label for Supply

Risk Phrases R 10 Flammable

Safety Phrases S - 9 Keep container in well ventilated place
S - 16 Keep away from sources of ignition - **NO SMOKING**
S - 33 Take precautionary measures against
Static discharges

16. OTHER INFORMATION

-User Notes This product is supplied in an aerosol form using a highly flammable gas as a propellant. Properly used for the intended purpose and in accordance to this safety data sheet should not present any undue hazard.

MATERIAL SAFETY DATA SHEET

FOR COATINGS AND RELATED MATERIALS

MOISTURE SCAVENGER

Part No. 50110

SECTION 1 - MANUFACTURER'S IDENTIFICATION

Rhino Linings USA, Inc.
9151 Rehco Road
San Diego, CA 92121
Phone: (858) 450-0441
Fax: (858) 450-6881
Emergency: (800) 424-9300

Date: May 1989
Supersedes: New
Product Name: Moisture Scavenger
Part No.: 50110

SECTION 2 - HAZARDOUS INGREDIENTS

<u>INGREDIENTS</u>	<u>CAS #</u>	<u>PERCENT BY WT.</u>	<u>OSHA PEL</u>
Sodium Potassium Alumina Silicate	12736-96-8		None. Est.
Castor Oil	8001-79-4	50	None Est.

Governmental Inventory Status: All components registered in accordance with TSCA.

SECTION 3 - TRANSPORTATION CLASSIFICATION

DOT Category: Oils, liquid or solidified
IMO Hazard Class: Not regulated

SECTION 4 - PHYSICAL DATA

Boiling Point (F & C): 595°F 312°C
Melting Point (F & C): 14°F -10°C
Vapor Density (Air = 1): >1*
Density (g/ml): 1.25

Solubility in H₂O: Insoluble
Appearance And Odor: Paste, White, Castor Oil
% Volatile by Volume: Negligible

SECTION 5 - FIRE AND EXPLOSION HAZARD DATA

Flash Point (F & C): 540°F 282°C*
Method: PMCC
Autoignition Temp (F & C): 840°F 449°C

Extinguishing Media: Dry chemical, carbon dioxide, halon water spray.

Fire and Explosion Hazards: May generate toxic fumes if combusted.

* Estimates based on properties of castor oil.

SECTION 6 - HEALTH HAZARD DATA

Primary Routes of Exposure: Contact with skin and eyes. Product ingestion is unlikely but may occur if proper safety/hygiene procedures are not followed. Exposure may also occur via inhalation or ingestion if the product is misted or sprayed during handling and/or processing. In order to minimize exposure to product, proper protective equipment should be used and proper safety/hygiene procedures should be followed.

Eye Exposure: Exposure to the liquid or product mists may cause eye irritation, including reddening and swelling of mucose membranes and tearing.

Eye First Aid: Flush with water for at least 15 minutes; if irritation persists, seek medical attention.

Skin Exposure: Repeated or prolonged skin contact with this product may cause dermatitis and in some individuals, an allergic response.

Skin First Aid: Remove from skin immediately. Flush skin with large amounts of water. Then wash the skin with a mild soap, rinsing with water. If skin irritation develops, seek professional medical attention.

Inhalation Exposure: Allergic asthmatic reactions may occur in persons previously exposed.

Inhalation First Aid: Remove from contaminated area. If unconscious, give artificial respiration and obtain professional medical attention.

Ingestion Exposure: May cause irritation of gastrointestinal tract and pelvic congestion.

Ingestion First Aid: Obtain professional medical attention.

SECTION 7 - REACTIVITY DATA

Stability: Stable under normal temperatures and pressure.

Conditions to Avoid: Oxidizing agents, water, high concentrations of olefins, HC1, heat sparks and flames.

Incompatible Materials: None known.

Hazardous Decomposition Products: CO, hydrocarbon and oxygenated hydrocarbon fragments (when combusted).

Hazardous Polymerization: None known.

SECTION 8 - SPILL OR LEAK PROCEDURES

Large Spills: Immediately isolate the affected areas and keep out all unauthorized personnel. Confine entry to the contaminated area to those persons who are properly protected. Remove all sources of ignition. Work from up-wind side of the spill area to prevent vapor inhalation.

Stop leak at the source. If possible, reposition, plug, or encapsulate the container to stop further leakage. Cut off and redirect surface runoff by trenching or diking. Spills should be contained through the use of a commercial oil absorbent, but other materials such as earth, sand, or sawdust may be more expedient to limit the extent of contamination.

Clean up contaminated surface with a generous amount of oil absorbent, soaking up as much liquid as possible. Contaminated material should be disposed of in accordance with Federal, State, and Local waste disposal regulations. Refer to WASTE DISPOSAL section.

Prevent the release of these materials into a waterway or plant sewer. If this should occur, follow the established plant procedures for waste water treatment. Product is essentially insoluble in water and can be removed from a water surface with floating absorbent pads.

Small Spills: Wear proper protective equipment. Absorb spilled material using a commercial oil absorbent soaking up as much material as possible. Contaminated material should be disposed of in accordance with waste disposal regulations. See WASTE DISPOSAL section.

Waste Disposal: General Waste: Waste material, including concentrated liquids, contaminated absorbent and materials from spill clean-up procedures, must be handled in accordance with Federal, State and Local regulations. Recommended disposal methods include incineration for liquids and for contaminated solids.

***Note:** Standard hydrocarbon spill procedures apply to this product.

SECTION 9 - SPECIAL PROTECTION INFORMATION

Respiratory Protection: Where natural ventilation is inadequate, use mechanical ventilation, other engineering controls or a NIOSH-approved self-contained breathing apparatus to prevent inhalation of product vapors.

Skin Protection: Gloves and work uniform as necessary to prevent repeated or prolonged skin contact.

Eye Protection: Chemical goggles or face shield as necessary to prevent eye contact.

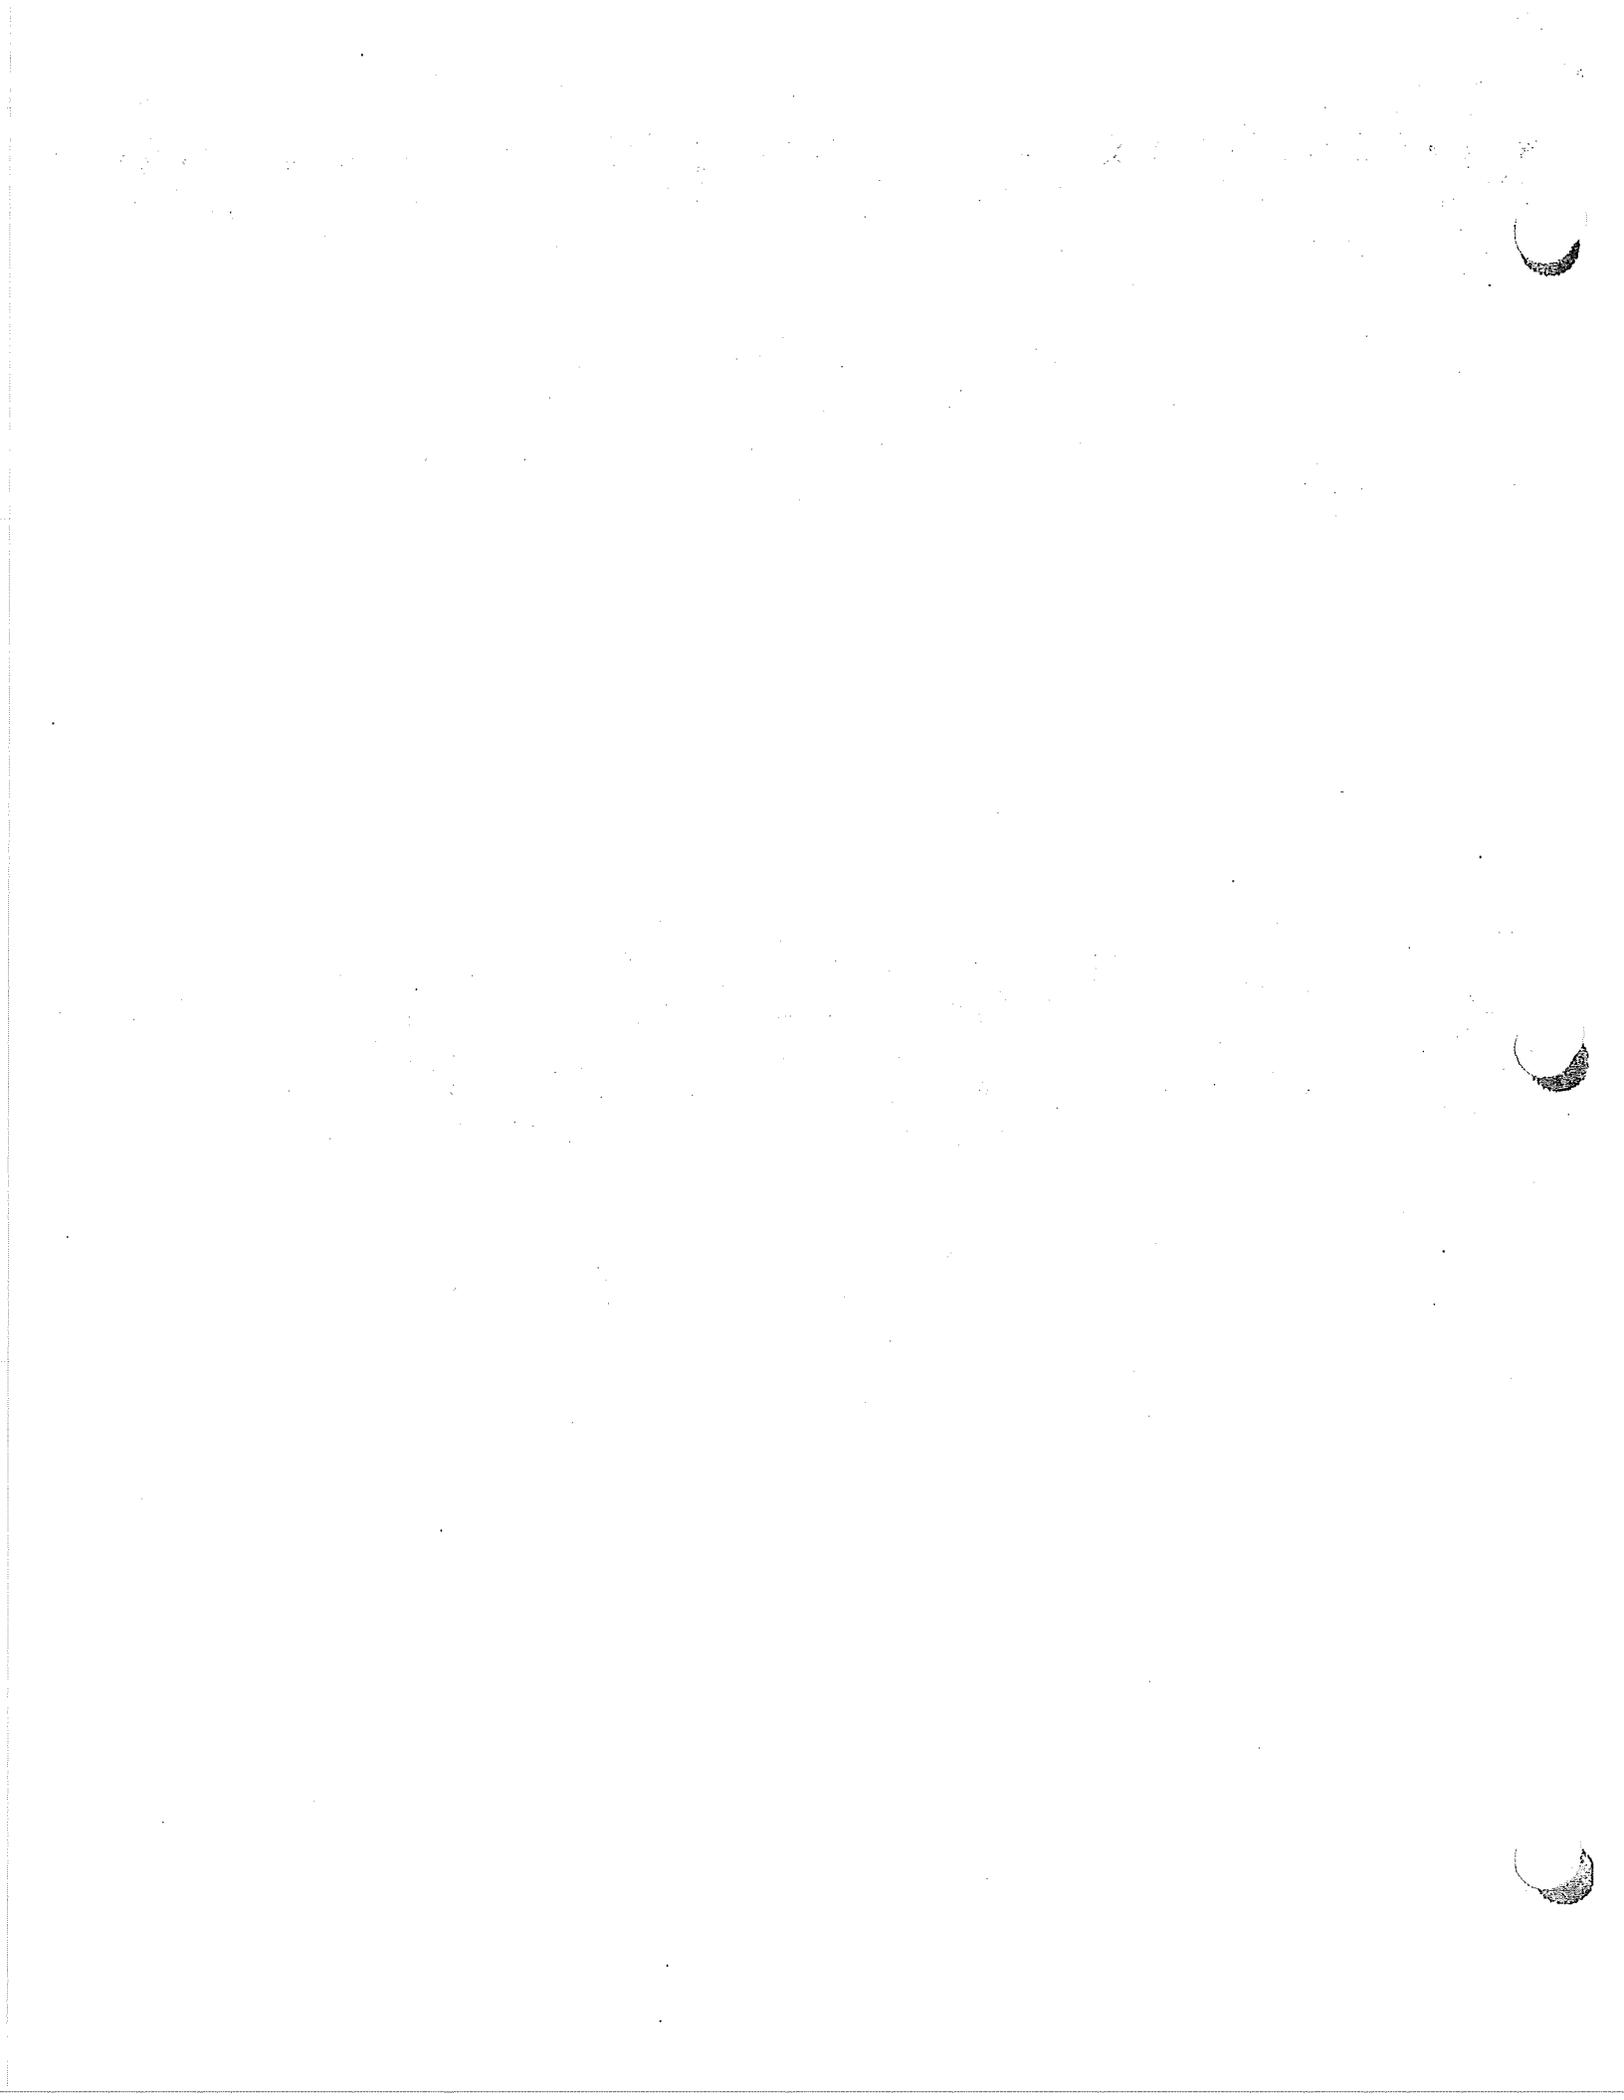

***Note:** Personal protection information shown above is based upon general information as to normal uses and conditions. Where special or unusual uses or conditions exist, it is suggested that the expert assistance of an industrial hygienist or other qualified personnel be sought.

SECTION 9 - SPECIAL PRECAUTIONS OR OTHER COMMENTS

Special Precautions and Other Comments: Store in tightly closed, properly labeled containers in a cool, well-ventilated area away from all ignition sources. Do not store near oxidizers. Avoid contact with skin and eyes. Avoid inhalation of product vapors. Do not take internally.

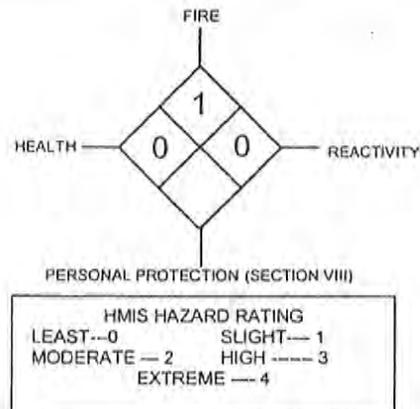

SECTION 11 - DISCLAIMER

Disclaimer : The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemical used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

PRODUCT NAME: RHINOFLUSH**SECTION 1 - MANUFACTURER IDENTIFICATION**

MANUFACTURER'S NAME: Rhino Linings USA, Inc.
ADDRESS: 9151 Rehco Road, San Diego, CA, 92121
INFORMATION PHONE: 858-450-0441
EMERGENCY CONTACT: (CHEMTREC): 800-424-9300
DATE: April 20, 2001
SUPERSEDES: March 21, 1998

**SECTION 2 - HAZARDOUS INGREDIENTS**

This product is not hazardous as defined in 29 CFR 1910.1200

SECTION 3 - PHYSICAL DATA

Appearance and Odor: Clear liquid, mild odor.
Boiling Point: Greater than 482° F
Vapor Pressure, mmHg: < 0.001 @ 68° F, 1 @ 392° F
Specific Gravity: 0.97 @ 68° F
Specific Gravity of Vapor (1 ATM (Air = 1)): Less than 0.1
Viscosity of Liquid (cSt @ °F): 102 @ 68° F.
Density: 8.1 lbs/gal @ 68° F
Solubility in Water (Weight % @ °F): Insoluble.
Freezing/Melting Point: - 54° F Pour point.

SECTION 4 - HAZARD SUMMARY**POTENTIAL HEALTH EFFECTS:**

Eye Contact: Slightly irritating but does not injure eye tissue.
Skin Contact: Low order of toxicity. Frequent or prolonged contact may irritate skin.
Inhalation: Negligible hazard at ambient temperature (- 18° C to 38° C, 0° F to 100° F).
Ingestion: Minimal toxicity.

SECTION 5 - FIRST AID MEASURES

Eye Contact: Flush eye with large amounts of water until irritation subsides. If irritation persists, get medical attention.
Skin Contact: Flush with large amounts of water, use soap if available.
Inhalation: Using proper respiratory protection, immediately remove the affected victim from exposure. Administer artificial respiration if breathing is stopped. Keep at rest. Call for prompt medical attention.
Ingestion: First aid is normally not required.

SECTION 6 - FIRE FIGHTING MEASURES

Flashpoint: 415° F **Method:** PMCC
Flammable Limits: Not available.
Autoignition Temperature: > 500° F
General Hazards: Low hazard, liquid can burn upon heating to temperatures at or above the flashpoint. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition: they may explode and cause injury or death. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner, or properly disposed of.
Fire Fighting: Use water spray to cool fire exposed surfaces and to protect personnel. Isolate "fuel" supply from fire. Use foam, dry chemical, or water spray to extinguish fire. Avoid spraying water directly into storage containers due to danger of boilover.
Decomposition Products Under Fire Conditions: Not unusual.

SECTION 7 – ACCIDENTAL RELEASE MEASURES

Land Spill: Eliminate sources of ignition. Prevent additional discharge of material, if possible to do so without hazard. For small spills implement cleanup procedures; for large spills implement cleanup procedures and, if in public area, keep public away and advise authorities. Also, if this product is subject to CERCLA reporting (see Section 11 REGULATORY INFORMATION) notify The National Response Center. Prevent liquid from entering sewers, watercourses, or low areas. Contain spilled liquid with sand or earth. Recover by pumping or with a suitable absorbent. If liquid is too viscous for pumping, scrape up. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

Water Spill: Remove from surface by skimming or with suitable absorbents. If allowed by local authorities and environmental agencies, sinking and/or suitable dispersants may be used in non-confined waters. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

SECTION 8 – STORAGE AND HANDLING

Storage Temperature: Ambient.

Storage/Transport Pressure, mmHg: Atmospheric

Storage and Handling: Keep container closed. Handle and open containers with care. Store in a cool, well ventilated place away from incompatible materials. DO NOT handle or store near an open flame, heat or other sources of ignition. Protect material from direct sunlight. This material is not a static accumulator. Use proper bonding and/or grounding procedures. DO NOT pressurize, cut, heat, or weld containers. Empty product containers may contain product residue. DO NOT reuse empty containers without commercial cleaning or reconditioning.

SECTION 9 – EXPOSURE CONTROL/PERSONAL PROTECTION

Exposure Controls: The use of local exhaust ventilation is recommended to control process emissions near the source. Laboratory samples should be handled in a lab hood. Provide mechanical ventilation of confined spaces. See respiratory protection recommendations.

Personal Protection: For open systems where contact is likely, wear safety glasses with side shields, long sleeves, and chemical resistant gloves. Where contact may occur, wear safety glasses with shields. Where concentrations in air may exceed the limits given in this Section and engineering, work practice or other means of exposure reduction are not adequate, NIOSH/MSHA approved respirators may be necessary to prevent overexposure by inhalation. Natural rubber, butyl rubber and vinyl are not suitable protective materials, neoprene is recommended.

Workplace Exposure Guidelines

Rhino Linings Recommends the Following Occupational Exposure Limits: A TWA of 5 mg/m³ for alkyl phthalates (C6-C12).

SECTION 10 – STABILITY AND REACTIVITY

Stability: Stable.

Conditions to Avoid: Not applicable.

Hazardous Polymerization: Will not occur.

Conditions to Avoid (Hazardous Polymerization): Not applicable.

Materials and Conditions to Avoid (Incompatibility): Oxidizing agents.

Hazardous Decomposition Products: None.

SECTION 11 – REGULATORY INFORMATION

TSCA: This product is listed on the TSCA Inventory as a UVCB (Unknown, Variable Composition or Biological) Chemical at CAS Registry Number 68515-48-0.

CERCLA: If this product is accidentally spilled, it is not subject to any special reporting under the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). We recommend you contact local authorities to determine if there may be other local reporting requirements.

SARA TITLE III: Under the provisions of Title III, Section 311/312 of the Superfund Amendments and Reauthorization Act, this product is classified into the following hazards categories: Not hazardous.

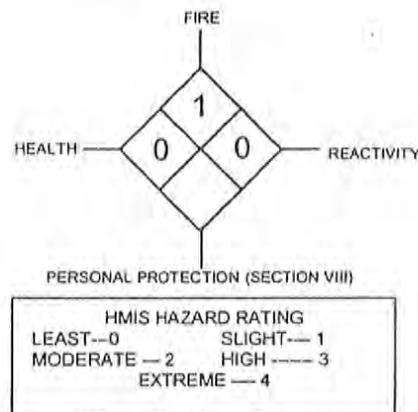

Department of Transportation (DOT): This product is not DOT regulated.

SECTION 12 - DISCLAIMER

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

PRODUCT NAME: RHINOFLUSH
SECTION 1 - MANUFACTURER IDENTIFICATION

MANUFACTURER'S NAME: Rhino Linings USA, Inc.
ADDRESS: 9151 Rehco Road, San Diego, CA, 92121
INFORMATION PHONE: 858-450-0441
EMERGENCY CONTACT: (CHEMTREC): 800-424-9300
DATE: April 20, 2001
SUPERSEDES: March 21, 1998

SECTION 2 - HAZARDOUS INGREDIENTS

This product is not hazardous as defined in 29 CFR 1910.1200

SECTION 3 - PHYSICAL DATA

<p> Appearance and Odor: Clear liquid, mild odor. Boiling Point: Greater than 482° F Vapor Pressure, mmHg: < 0.001 @ 68° F, 1 @ 392° F Specific Gravity: 0.97 @ 68° F Specific Gravity of Vapor (1 ATM (Air = 1)): Less than 0.1 </p>	<p> Viscosity of Liquid (cSt @ °F): 102 @ 68° F. Density: 8.1 lbs/gal @ 68° F Solubility in Water (Weight % @ °F): Insoluble. Freezing/Melting Point: - 54° F Pour point. </p>
---	---

SECTION 4 - HAZARD SUMMARY
POTENTIAL HEALTH EFFECTS:

Eye Contact: Slightly irritating but does not injure eye tissue.
Skin Contact: Low order of toxicity. Frequent or prolonged contact may irritate skin.
Inhalation: Negligible hazard at ambient temperature (- 18° C to 38° C, 0° F to 100° F).
Ingestion: Minimal toxicity.

SECTION 5 - FIRST AID MEASURES

Eye Contact: Flush eye with large amounts of water until irritation subsides. If irritation persists, get medical attention.
Skin Contact: Flush with large amounts of water, use soap if available.
Inhalation: Using proper respiratory protection, immediately remove the affected victim from exposure. Administer artificial respiration if breathing is stopped. Keep at rest. Call for prompt medical attention.
Ingestion: First aid is normally not required.

SECTION 6 - FIRE FIGHTING MEASURES

Flashpoint: 415° F **Method:** PMCC
Flammable Limits: Not available.
Autoignition Temperature: > 500° F
General Hazards: Low hazard, liquid can burn upon heating to temperatures at or above the flashpoint. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition: they may explode and cause injury or death. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner, or properly disposed of.
Fire Fighting: Use water spray to cool fire exposed surfaces and to protect personnel. Isolate "fuel" supply from fire. Use foam, dry chemical, or water spray to extinguish fire. Avoid spraying water directly into storage containers due to danger of boilover.
Decomposition Products Under Fire Conditions: Not unusual.

SECTION 7 – ACCIDENTAL RELEASE MEASURES

Land Spill: Eliminate sources of ignition. Prevent additional discharge of material, if possible to do so without hazard. For small spills implement cleanup procedures; for large spills implement cleanup procedures and, if in public area, keep public away and advise authorities. Also, if this product is subject to CERCLA reporting (see Section 11 REGULATORY INFORMATION) notify The National Response Center. Prevent liquid from entering sewers, watercourses, or low areas. Contain spilled liquid with sand or earth. Recover by pumping or with a suitable absorbent. If liquid is too viscous for pumping, scrape up. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

Water Spill: Remove from surface by skimming or with suitable absorbents. If allowed by local authorities and environmental agencies, sinking and/or suitable dispersants may be used in non-confined waters. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

SECTION 8 – STORAGE AND HANDLING

Storage Temperature: Ambient.

Storage/Transport Pressure, mmHg: Atmospheric

Storage and Handling: Keep container closed. Handle and open containers with care. Store in a cool, well ventilated place away from incompatible materials. DO NOT handle or store near an open flame, heat or other sources of ignition. Protect material from direct sunlight. This material is not a static accumulator. Use proper bonding and/or grounding procedures. DO NOT pressurize, cut, heat, or weld containers. Empty product containers may contain product residue. DO NOT reuse empty containers without commercial cleaning or reconditioning.

SECTION 9 – EXPOSURE CONTROL/PERSONAL PROTECTION

Exposure Controls: The use of local exhaust ventilation is recommended to control process emissions near the source. Laboratory samples should be handled in a lab hood. Provide mechanical ventilation of confined spaces. See respiratory protection recommendations.

Personal Protection: For open systems where contact is likely, wear safety glasses with side shields, long sleeves, and chemical resistant gloves. Where contact may occur, wear safety glasses with shields. Where concentrations in air may exceed the limits given in this Section and engineering, work practice or other means of exposure reduction are not adequate. NIOSH/MSHA approved respirators may be necessary to prevent overexposure by inhalation. Natural rubber, butyl rubber and vinyl are not suitable protective materials, neoprene is recommended.

Workplace Exposure Guidelines

Rhino Linings Recommends the Following Occupational Exposure Limits: A TWA of 5 mg/m³ for alkyl phthalates (C6-C12).

SECTION 10 – STABILITY AND REACTIVITY

Stability: Stable.

Conditions to Avoid: Not applicable.

Hazardous Polymerization: Will not occur.

Conditions to Avoid (Hazardous Polymerization): Not applicable.

Materials and Conditions to Avoid (Incompatibility): Oxidizing agents.

Hazardous Decomposition Products: None.

SECTION 11 – REGULATORY INFORMATION

TSCA: This product is listed on the TSCA Inventory as a UVCB (Unknown, Variable Composition or Biological) Chemical at CAS Registry Number 68515-48-0.

CERCLA: If this product is accidentally spilled, it is not subject to any special reporting under the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). We recommend you contact local authorities to determine if there may be other local reporting requirements.

SARA TITLE III: Under the provisions of Title III, Section 311/312 of the Superfund Amendments and Reauthorization Act, this product is classified into the following hazards categories: Not hazardous.

Department of Transportation (DOT): This product is not DOT regulated.

SECTION 12 - DISCLAIMER

Disclaimer: The data set forth in this sheet are based on information provided by the suppliers of the raw materials and chemicals used in the manufacture of the aforementioned product. Rhino Linings USA, Inc. makes no warranty with respect to the accuracy of the information provided by their suppliers, and disclaims all liability of reliance thereof.

SECTION 1 - MANUFACTURER'S IDENTIFICATION

Rhino Linings USA, Inc.
9151 Rehco Road
San Diego, CA 92121
Phone: (858) 450-0441
Fax: (858) 450-6881
Emergency: (800) 424-9300

Date: November 25, 1996
Supersedes: May 21, 1992
Product Name: N-Methyl Pyrrolidone (NMP)
Part No.: 50020

SECTION 2 - HAZARDOUS INGREDIENTS

Ingredient	CAS #	AMOUNT (WT.)
N-Methyl-Pyrrolidone (PEL/TLV Not Established)	872-50-4	> 99.8%
Water (PEL/TLV Not Established)	7732-18-5	< 0.1%

SECTION 3 - PHYSICAL DATA

Color: Clear
Form/Appearance: Liquid
Odor: Amine
Odor Intensity: Mild
Specific Gravity: Not available
Bulk Density: 1.028 G/CC
pH: 7.7 - 8 SU

pH Method: 100 G/L H₂O
Boiling Point: 395°F (202°C)
Freezing Point: 13°F (-25°C)
Decomposition Temperature: Not available
Solubility in Water Description: Complete
Vapor Pressure: <1 millibars @ 68°F (20°C)
Vapor Density (Air=1): 3.4

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flash Point: 196°F (91°C)
Method Used: ASTM D9373
Autoignition Temperature : 464-493°F (240-256°C)
Method Used: ASTM E 659
Flammable Limits: Lower: 1.3% Upper: 9.5%

Extinguishing Media: Use water fog, foam, CO₂ or dry chemical extinguishing media.
Fire Fighting Procedures: Firefighters should be equipped with self-contained breathing apparatus and turn out gear.
Unusual Hazards: Low when exposed to heat or flames. It can react with oxidizing material.

SECTION 5 - HEALTH EFFECTS

Routes of entry for solids and liquids include eye and skin contact, ingestion and inhalation. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.

Toxicology Test Data:

Rat, 3 month oral toxicity, dietary - @ 800-5000 PPM in diet
Body and organ weights, urine affected.
Dog, 90-Day Oral Toxicity - @ 25-250 MG/KG/Day
No compound related adverse effects.
Rat, Oral 2-Gen Reproduction Study-NOAEL:160 MG/KG/Day
Reduced fertility & pup survival @ 500.
Rat, Inhalation Development/Repro Test-10,50,116 PPM
No repro effects; Smaller pups @ 116 ppm.

Screening test for oral toxicity-
Moderate to Low Toxicity.
Screening test for inhalation toxicity
Sat vapor not lethal to 5 species tested.
Rat, 28 day oral study-250-2000 UL/KG
Testicular effects in highest dose group.
Rat, 6 week inhalation study (vapor)-SAT @ 25°C
Intense yellow urine, sl nasal discharge.

SECTION 5 - HEALTH EFFECTS (Continued)

Rat, 2 week (10 dose) inhalation study-6/HR/DAY @ 1 MG/L
No significant difference from control.

Rat, 2 week (10 dose) inhalation study-6/HR/DAY @ 1 MG/L
No deaths occurred.

Rat, 2 week (10 dose) inhalation study-6/HR/DAY @ 1 MG/L
No deaths occurred.

Rat, 2 week (10 dose) inhalation study-6/HR/DAY @ 1 MG/L
No deaths occurred.

Rat, 2 week (10 dose) inhalation study-6/HR/DAY @ 1 MG/L
80% deaths with coarse particle aerosol.

Rat, oral LD50-3.5 ML/KG

Moderately Toxic.

Mouse, Acute Intraperitoneal LD50-1.9 ML/KG

Moderately Toxic.

Rabbit, Primary Skin Irritation-Markedly Irritating

Tox Test Rating Not Found.

Rabbit, Eye Irritation-Markedly Irritating

Tox Test Rating Not Found.

Mouse, Subcutaneous LD50-20% SOLN;3 G/KG

Moderately Toxic.

Rat dermal teratology range finding test-NOEL: 0.5 G/KG

Maternal toxicity and embryoletality.

Rat, Dermal Developmental Toxicity Study-NOEL:237 MG/KG

Maternal toxicity and embryoletality.

Ames Salmonella Assay (Direct Plate)-NEGATIVE

No increase in mutation frequency.

Ames Salmonella Assay (Plate with S-9)-NEGATIVE

No increase in mutation frequency.

Ames Salmonella Assay (Direct Plate)-NEGATIVE

No increase in mutation frequency.

Ames Salmonella Assay (Plate with S-9)-NEGATIVE

No increase in mutation frequency.

Ames Salmonella Assay (Direct Plate)-NEGATIVE

No increase in mutation frequency.

Ames Salmonella Assay (Plate with S-9)-NEGATIVE

No increase in mutation frequency.

CHO/HGPRT Forward Mutation Assay-

No increase in mutation frequency.

CHO/HGPRT Forward Mutation (With S-9)-

No increase in mutation frequency.

Mouse Lymphoma Forward Mutation Assay-

No increase in mutation frequency.

Mouse Lymphoma Assay (with S-9)-

No increase in mutation frequency.

Rat Hepatocyte Unscheduled DNA Synthesis-NEGATIVE

No increase in nuclear labelling.

Rat Hepatocyte Unscheduled DNA Synthesis-NEGATIVE

No increase in nuclear labelling.

Chinese Hamster, cytogenetic study-6 WKS @ 800 PPM

No clastogenic effects reported.

Mouse Micronucleus Test: Bone Marrow-

No clastogenic effects reported.

Mouse, 3 month oral toxicity, dietary-@ 400-2500

Lower body wt. (males), liver wt. increase.

Rabbit, 28 day dermal toxicity study-0.4-1.6 ML/KG/DAY

Irritation at site of application.

Rat, 28 day aerosol inhalation study-NOEL:0.5 MG/L

Excessive mortality at 1 MG/L

Rat, Inhalation Oncogenicity Study- @ 0.04 & 0.4 MG/L

No evidence of carcinogenicity.

Rat, Inhalation Developmental Toxicity- @0.1 & 0.36 MG/L

No maternal or developmental toxicity.

Rat, 2 week (10 dose) inhalation study-

No compound Related Adverse Effects.

Mouse, IP Dominant Lethal Assay- @380 UL/KG

No increase in mutation frequency.

Rat, Oral Developmental Toxicity Study- @323 & 970 UL/KG

Embryoletality, malformations @ 790 ul/kg.

Mouse, IP developmental toxicity- @ 1525-610 UL/KG

Embryotoxic and teratogenic at high dose.

Mouse, Oral Developmental Toxicity Study- @ 2565, 1026 UL/

KG

Embryotoxic and teratogenic at high dose.

Rat, Inhalation Developmental Toxicity- NOM CONC 800

Neither embryotoxic nor teratogenic.

Rat, Inhalation Developmental Toxicity- NOM CONC 800

Neither embryotoxic nor teratogenic.

Rat, 3 month oral toxicity, dietary- @ 800-5000 PPM

Urinary parameters and female wt. effects.

Rat, Inhalation Safety Screen, 8 hr.- SLIGHTLY IRRITATING

No deaths after 8 hour exposure.

Rat, 4 hr. Inhalation LC50- >5.1 MG/L

Slightly Toxic.

Rabbit, Dermal LD50- <8000 MG/KG

Practically Nontoxic.

Rat, 90 day inhalation with recovery- 0, 0.5, 1, 3 MG/L

Testicular effects in highest dose group.

Rat, 28-Day Feeding Study- NOAEL: 6000 PPM IN DIET

Decreased body weights at high doses.

Mouse, 28 day dietary study-NOAEL: 2500 PPM IN DIET

Target organ: kidney

Rat, Oral LD50- 3.6 G/KG

Slightly Toxic.

Rat, Inhalation Risk Test; Sat. Vapor/20C-

No deaths, 8 hours, inhalation.

get immediate medical attention.

Skin: Wash affected areas with soap and water. Remove and launder contaminated clothing before reuse. If irritation develops, get medical attention.

Eyes: Immediately rinse eyes with running water for 15 minutes. If irritation develops, get medical attention.

Ingestion: If swallowed, dilute with water and immediately induce vomiting. Never give fluids or induce vomiting if the victim is unconscious or having convulsions. Get immediate medical attention.

Notes to Physicians: Not Applicable.

Aggravated Medical Conditions: No data is available which addresses medical conditions that are generally recognized as being aggravated by exposure to this product. Please refer to Section 5 (Effects of Overexposure) for effects observed in animals.

Special Precautions: Not Applicable.

Acute Overexposure Effects: Contact with the liquid results in moderate eye irritation and may cause temporary corneal clouding. Skin contact results in mild irritation. Prolonged skin contact may result in redness and dermatitis. Inhalation of the vapors of NMP may result in respiratory irritation. Accidental ingestion of the liquid cause gastric disturbances. Nausea and vomiting may result.

Chronic Overexposure Effects: In animal studies in rats and mice, N-Methylpyrrolidone (NMP) was embryotoxic by the oral and intraperitoneal routes at very high dose levels which were close to the LD(50). In a dermal exposure study with rats, NMP was only embryotoxic at the high dose level; this effect was attributed to maternal toxicity. Several inhalation studies in rats did not reveal any indication of maternal toxicity or embryotoxicity. In a 2 year inhalation study, NMP did not cause any life-shortening carcinogenic effects in rats at 0.04 or 0.4 mg/l (10 and 100 respectively).

First Aid Procedures:

Inhalation: Move to fresh air. Aid in breathing, if necessary, and

SECTION 6 - REACTIVITY DATA**Stability Data:** Stable**Incompatibility:** Oxidizing reagents and strong acids.**Conditions/Hazards to Avoid:** See Reactivity-Incompatibility section.**Hazardous Decomposition/Polymerization:** Hazardous decomposition products: CO, CO₂ and NO_x. Polymerization: Does not occur.**Corrosive Properties:** Not corrosive.**Oxidizer Properties:** Not an oxidizer.**SECTION 7 - PERSONAL PROTECTION****Clothing:** Manufacturer recommends the use of butyl rubber or FEP teflon gloves, coveralls, apron, and boots as necessary to prevent skin contact.**Eyes:** Chemical goggles; also wear a face shield if splashing hazard exists.**Respiration:** If vapors or mists are generated, wear a NIOSH/MSHA approved organic vapor/mist respirator or an air-supplied respirator as appropriate.**Ventilation:** Use local exhaust to control to recommended P.E.L.**Explosion Proofing:** See Section 4-Fire and Explosion Hazard Data.**Other Personal Protection Data:** Eyewash fountains and safety showers must be easily accessible. Shower after handling**SECTION 8 - SPILL OR LEAK / ENVIRONMENTAL****General:** Spills should be contained, solidified and placed in suitable containers for disposal in a licensed facility. This material is not regulated by RCRA or CERCLA ("Superfund"). Wear appropriate respiratory protection and protective clothing and provide adequate ventilation during clean-up.**Waste Disposal:** Incinerate or bury in a licensed facility. Do not discharge into water ways or sewer systems without proper authority.**Container Disposal:** Dispose of in a licensed facility. Recommend crushing or other means to prevent unauthorized reuse.**Environmental Toxicity Test Data:**Elimination (Method Not Specified) - >90%
Readily Biodegradable.Golden Orfe, static 96 hr. LC50 - 4000 MG/L
Insignificant Hazard.Daphnia magna, 24 hr. LC50 - >1000 MG/L
Insignificant Hazard.Acute Algal Toxicity, 72 hr. EC/LC50 - >500 MG/L
Practically Nontoxic.Toxicity to Bacteria - > 9000 MG/L
Insignificant Hazard.Biological Oxygen Demand, 5 day - 1,100 MG/L
TEST RATING NOT FOUND.Chemical Oxygen Demand - 1,600 MG/L
TEST RATING NOT FOUND.**SECTION 9 - STORAGE AND HANDLING****General:** Avoid exposure to moisture; this product is hygroscopic.**Other Storage and Handling Data:** Consult other sections of this MSDS for information on reactivity and flammability.**SECTION 10 - REGULATORY INFORMATION****TSCA Inventory Status:** Listed on Inventory: YES**SARA - 313 Listed Chemicals:****Name:** N-Methylpyrrolidone **CAS#:** 872-50-4 **Amount:** 99.8%**RCRA Hazard Waste No.:****CERCLA:** NO **Reportable Quantity:** (If Yes)

NMP is subject to the reporting requirements of SARA Title III, Section 313 and 40CFR372.

State Regulatory Information: (By Component)**NJ/PA/MA RTK:** No**CAS#:** 872-50-4**Name:** N-Methylpyrrolidone**State Regulatory Information: (By Component)****NJ/PA/MA RTK:** No**CAS#:** 7732-18-5**Name:** Water

RUST-OLEUM CORP.

WWW.RUSTOLEUM.COM

SECTION 1 - CHEMICAL PRODUCT/COMPANY INFORMATION

PRODUCT NAME: TURBOKRETE PART C

IDENTIFICATION NUMBER: 5494C

PRODUCT USE/CLASS: AGGREGATE/TURBOKRETE

SUPPLIER: RUST-OLEUM CORPORATION 11 HAWTHORN PARKWAY VERNON HILLS, IL 60061 USA

MANUFACTURER: RUST-OLEUM CORPORATION 11 HAWTHORN PARKWAY VERNON HILLS, IL 60061 USA

PREPARER: DEPARTMENT, REGULATORY

REVISION DATE: 09/17/2004

SECTION 2 - COMPOSITION/INFORMATION ON INGREDIENTS

Table with 5 columns: CHEMICAL NAME, CAS NUMBER, WEIGHT % LESS THAN, ACGIH TLV-TWA, ACGIH TLV-STEL. Rows include MICROCRYSTALLINE SILICA and CRYSTALLINE SILICA.

SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: HARMFUL IF INHALED. MAY CAUSE DELAYED LUNG DAMAGE.

EFFECTS OF OVEREXPOSURE - EYE CONTACT: IRRITATING, AND MAY INJURE EYE TISSUE IF NOT REMOVED PROMPTLY.

EFFECTS OF OVEREXPOSURE - SKIN CONTACT: LOW HAZARD FOR USUAL INDUSTRIAL HANDLING OR COMMERCIAL HANDLING BY TRAINED PERSONNEL.

EFFECTS OF OVEREXPOSURE - INHALATION: HARMFUL IF INHALED.

EFFECTS OF OVEREXPOSURE - INGESTION: EXPECTED TO BE A LOW INGESTION HAZARD.

EFFECTS OF OVEREXPOSURE - CHRONIC HAZARDS: CONTAINS CRYSTALLINE SILICA AS SILICON DIOXIDE. EXCESSIVE INHALATION OF RESPIRABLE CRYSTALLINE SILICA DUST MAY CAUSE LUNG DISEASE, SILICOSIS OR LUNG CANCER.

PRIMARY ROUTE(S) OF ENTRY: INHALATION

SECTION 4 - FIRST AID MEASURES

FIRST AID - EYE CONTACT: HOLD EYELIDS APART AND FLUSH WITH PLENTY OF WATER FOR AT LEAST 15 MINUTES. GET MEDICAL ATTENTION.

FIRST AID - SKIN CONTACT: WASH WITH SOAP AND WATER. GET MEDICAL ATTENTION IF IRRITATION DEVELOPS OR PERSISTS.

FIRST AID - INHALATION: REMOVE TO FRESH AIR. IF NOT BREATHING, GIVE ARTIFICIAL RESPIRATION. IF BREATHING IS DIFFICULT, GIVE OXYGEN. GET IMMEDIATE MEDICAL ATTENTION.

FIRST AID - INGESTION: SWALLOWING LESS THAN AN OUNCE WILL NOT CAUSE SIGNIFICANT HARM. FOR LARGER AMOUNTS, DO NOT INDUCE VOMITING, BUT GIVE ONE OR TWO GLASSES OF WATER TO DRINK AND GET MEDICAL ATTENTION.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POINT: NA F (SETAFLASH)

LOWER EXPLOSIVE LIMIT: N.A. % UPPER EXPLOSIVE LIMIT: N.A. %

EXTINGUISHING MEDIA: DRY CHEMICAL, FOAM, WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDS: NO INFORMATION.

SPECIAL FIREFIGHTING PROCEDURES: IF WATER IS USED, FOG NOZZLES ARE PREFERRED.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED: NO INFORMATION.

SECTION 7 - HANDLING AND STORAGE

HANDLING: USE WITH ADEQUATE VENTILATION.

STORAGE: KEEP CONTAINER CLOSED WHEN NOT IN USE.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: PROVIDE GENERAL DILUTION OF LOCAL EXHAUST VENTILATION IN VOLUME AND PATTERN TO KEEP TLV OF HAZARDOUS INGREDIENTS BELOW ACCEPTABLE LIMITS.

RESPIRATORY PROTECTION: A RESPIRATORY PROTECTION PROGRAM THAT MEETS OSHA 1910.134 AND ANSI Z88.2 REQUIREMENTS MUST BE FOLLOWED WHENEVER WORKPLACE CONDITIONS WARRANT A RESPIRATOR'S USE.

SKIN PROTECTION: USE GLOVES TO PREVENT PROLONGED SKIN CONTACT.

EYE PROTECTION: NO INFORMATION.

OTHER PROTECTIVE EQUIPMENT: REFER TO SAFETY SUPERVISOR OR INDUSTRIAL HYGIENIST FOR FURTHER INFORMATION REGARDING PERSONAL PROTECTIVE EQUIPMENT AND ITS APPLICATION.

HYGIENIC PRACTICES: WASH THOROUGHLY WITH SOAP AND WATER BEFORE EATING, DRINKING OR SMOKING.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

BOILING RANGE: N.A. - F

VAPOR DENSITY: N.A.

ODOR: N.A.

ODOR THRESHOLD: ND

APPEARANCE: GRANULAR POWDER

EVAPORATION RATE: SLOWER THAN ETHER

SOLUBILITY IN H2O: SLIGHT

FREEZE POINT: ND

SPECIFIC GRAVITY: 2.643

III. Hazardous Identification:

Hazard Category:

Acute Chronic Fire Pressure Reactive

Hazardous Identification Information:

Highly toxic and may be fatal if swallowed. May cause CNS depression. Eye and Skin Irritant.

IV. First Aid Measures:

Route(s) of Entry:

Absorption, Inhalation, and Ingestion.

MSDS - Material Safety Data Sheet

Product Name: DOT HEAVY DUTY BRAKE FLUID

MSDS No.: M4432

Health Hazards (Acute and Chronic):

Exposure to high concentrations of mist generated at room temperature may cause lung injury and liver dysfunction. Skin contact may cause sensitization and allergic skin reaction. Components of this formulation have caused slight embryofetal toxicity (delayed development), but no increase in birth defects in laboratory animals.

Signs and Symptoms:

EYE CONTACT: Causes severe irritation, experienced as discomfort or pain, excess blinking and tear production, marked excess redness and swelling of the conjunctiva.

SKIN CONTACT: Prolonged or repeated contact may cause discomfort and local redness. Prolonged or repeated contact may cause defatting and drying of the skin.

INHALATION: Short-term health effects are not expected from vapor generated at ambient temperature.

INGESTION: Slightly toxic. May cause abdominal discomfort, nausea, and vomiting.

Medical Conditions Generally Aggravated by Exposure:

Skin contact may aggravate an existing dermatitis.

Emergency and First Aid Procedures:

Eye Contact: Flush eyes with clean water for 15 minutes while lifting eyelids. Get prompt medical attention.

Skin Contact: Wash with soap and water thoroughly. If adverse effects persist, get prompt medical attention. Launder contaminated clothing before reuse.

Inhalation: Remove to fresh air. If breathing becomes difficult give oxygen and get prompt medical attention. If breathing stops, give artificial respiration and get prompt medical attention.

Ingestion: DO NOT INDUCE VOMITING! Call Poison Control Center, physician, or hospital emergency room immediately.

Aspiration of vomitus into the lungs can cause pneumonitis, which can be fatal.

Other Health Warnings:

Vomiting and subsequent aspiration into the lungs may lead to chemical pneumonia and pulmonary edema which is a potentially fatal condition.

V. Fire Fighting Measures:

Flash Point: 230°F

Lower Explosive Limit: ND

Upper Explosive Limit: ND

F.P. Method: TCC

Fire Extinguishing Media: Water Fog, Foam, Carbon Dioxide, Dry Chemical

Special Fire Fighting Procedures:

Wear self-contained positive pressure breathing apparatus and protective clothes. Cool containers with a water fog. Do not use forced water stream or direct foam as this could cause the fire to spread.

Unusual Fire and Explosion:

Use protective equipment and clothing. During a fire, oxides of nitrogen may be produced.

VI. Accidental Release Measures:

Steps to be Taken in Case Material is Released or Spilled:

Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed. Dike or contain spill and absorb with inert materials (sand, sawdust, absorbent sweeping compounds, rags, etc). Place contaminated material into an approved chemical waste container. Where possible, vacuum spilled liquid using an explosion proof vacuum to recover material. Prevent run-off to sewers, streams, or other bodies of water. If run-off occurs, notify proper authorities as required that a spill has occurred.

MSDS - Material Safety Data Sheet

Product Name: DOT HEAVY DUTY BRAKE FLUID

MSDS No.: M4432

VII. Handling and Storage:

Precautions to be Taken:

Avoid contact with eyes, skin, and clothing. Avoid repeated breathing of mist. Keep containers closed. Use with adequate ventilation. Wash thoroughly after handling.

Other Precautions:

Do not used in confined area without proper ventilation. Contact lenses may cause further damage in case of splash into eye.
KEEP AWAY FROM CHILDREN AND ANIMALS!

VIII. Exposure Controls/Personal Protection:

Ventilation Requirements:

General (mechanical) room ventilation is expected to be satisfactory. Avoid breathing mist.

As Ethylene Glycol Vapors ACGIH -TLV recommends a ceiling level of 39.4 ppm (v)
OSHA - PEL recommends a ceiling level of 50 ppm (v)

Personal Protective Equipment:

Safety glasses and goggles for bulk handling. Use PVC coated gloves. Other protective equipment: eye bath and shower.

IX. Physical and Chemical Properties:

Boiling Point: >450°F

Melting Point: NA

Evaporation Rate (Butyl Acetate = 1): <0.01

Vapor Pressure (mm Hg.): <0.1

Specific Gravity (H₂O = 1): 1.03900

Vapor Density (AIR = 1): 6

Solubility In Water: Soluble

Appearance and Odor: Transparent yellow to amber with mild ether like odor

Other Information: N/D

X. Stability and Reactivity:

Stability:

Stable

MSDS - Material Safety Data Sheet

Product Name: DOT HEAVY DUTY BRAKE FLUID

MSDS No.: M4432

Incompatibility (Materials to Avoid):

Strong alkalis. High temperatures in the presence of strong bases, acids, strong oxidizing agents. Do not mix this product with nitrites or other nitrosating agent because nitrosamines may be formed.

Decomposition/By Products:

Carbon monoxide and/or carbon dioxide. Oxides of nitrogen.

Hazardous Polymerization:

Will not occur.

XI. Toxicological Information:

Contains one or more amines which may react with nitrites to form nitrosamines.

XII. Ecological Information:

No data available

XIII. Disposal Considerations:

DISPOSAL: This container may be recycled in a recycling centers when empty. Before offering for recycling, empty the can or bottle by using the product according to the label. If recycling is not available, wrap the container and discard in the trash. Dispose of unused product in accordance with all local, state government and federal laws and regulations

XIV. Transport Information:

U.S. Department of Transportation (DOT)
Non-Bulk: Not Regulated
Bulk: Not Regulated

International Information:

Vessel: IMDG Regulated: no
Air: ICAO Regulated: no

XV. Regulatory Information:

USA TSCA: All chemicals used are listed on the TSCA Inventory.

CERCLA: The following components of this product are specifically listed as hazardous substances in 40 CFR 302.4 and are present at levels which could require reporting:

Ethylene Glycol Monoethyl Ether (CAS# 110-80-5) <= 0.010%

SARA, SECTION 313 TITLE III: This product contains glycol ethers which are subject to reporting requirement.

WARNING: This product contains chemicals known to the State of California to cause cancer and/or birth defects or other reproductive harm.

STATE/LOCAL:

Pennsylvania Right-to-Know Chemicals:

Diethylene Glycol (111-46-6)

Triethylene Glycol (112-27-6)

Triethylene Glycol Monobutyl Ether (143-22-6)

New Jersey Right-to-Know Chemicals:

Triethylene Glycol (143-22-6)

MSDS - Material Safety Data Sheet

Product Name: DOT HEAVY DUTY BRAKE FLUID

MSDS No.: M4432

XVI. Other Information:

Do not used in confined area without proper ventilation. Contact lenses may cause further damage in case of splash into eye.
KEEP AWAY FROM CHILDREN AND ANIMALS!

N/E: Not Established

N/D: Not Determined

N/A: Not Applicable

N/AV: Not Available

KEEP AWAY FROM CHILDREN AND ANIMALS. WEARING CONTACT LENSES IS INADVISABLE WHEN USING THIS PRODUCT.

While Radiator Specialty Company believes this data is accurate as of the revision date, we make no warranty with respect to the data and we expressly disclaim all liability for reliance thereon. The data is offered solely for information, investigation, and verification. Various government agencies may have specific regulations regarding the transportation, handling, storage, use, or disposal of this product which may not be covered by this MSDS. The user is responsible for full compliance.

**SAFETY DATA SHEET
SECONDARY BATTERY
(FORM : EEC Directive 93/112)**

Date of issue : APRIL 2003
REF. MSDS-IBG-Bdx-EN

1. IDENTIFICATION

- 1.1. **PRODUCT** NICKEL CADMIUM BATTERY (Rechargeable & Alkaline & vented)
Trade name : SRX, SRM, SM, SPH, STH, STM, NCX, VO, and other plastics/steel cells.
IEC Designation : KH ; KM ; KL acc. To IEC 60623
Proper shipping name : BATTERIES, WET, FILLED WITH ALKALI electric storage.
Electrochemical System : Nickel Cadmium, alkaline electrolyte.

Electrode Positive	Nickel hydroxide and Cobalt hydroxide Nickel Plated
Electrode Négative	Cadmium Hydroxyde on Nickel plated substrade
Electrolyte	Potassium Hydroxide + water
Nominal voltage	1,2 V

1.2. **SUPPLIER**

- NAME :** SAFT S.A. (HEADQUARTER)
Address : 12 rue Sadi Carnot - 93170 BAGNOLET - France -
Phone/Fax : +33 (0) 1 49 93 19 18 /+33 (0) 1 49 93 19 50
Nom de l'usine : SAFT Bordeaux
Address : 111/113 Boulevard Alfred DANEY - 33074 BORDEAUX - France -
Phone/Fax : +33 (0) 5 57 10 64 00/ +33 (0) 5 57 10 66 70

1.3. **EMERGENCY CONTACT :** www.saftbatteries.com look for « contact ».

2. COMPOSITION (weight percentage of basic materials)

2.1. **MEDIUM SIZE SINGLE CELL WITH STEEL CONTAINER**

Métals%	Plastic %	Other %
Steel Fe 43-51	Polypropylene 1,1-1,6	Potassium hydroxide 5,4-5,8
Nickel Ni 5-10		Lithium Hydroxyde 0,5
Cadmium Cd 5-12		
Chromium Cr 2,3-2,6		Water 27-31
Cobalt < 0.3		

2.2. **MEDIUM SIZE SINGLE CELL WITH PLASTIC CONTAINER**

Métals %	Plastic %	Other %
Steel Fe 20	Polypropylène 8-11	Potassium Hydroxyde 5,5-6,2
Nickel Ni 5-10		Lithium Hydroxyde 0,5
Cadmium Cd 5-12		
		Water 28-35

3. HAZARDS

3.1. PHYSICAL

No risk if batteries are used for its intended purpose and according to valid directions for use.

If the directions for use are not followed as regards ventilation, oxygen and hydrogen gas, which may developed during over charging the batteries, can be collected in battery box or room. If the gas is ignited by an electric spark or open fire, a violent explosion may occur.

3.2. CHEMICAL

In normal use the only chemical risk is the caustic nature of the electrolyte. Precautions must be taken when emptying and filling the battery cells. The properties of the electrode materials are hazardous only if the materials are released by crushing the battery or if it is exposed to fire.

CLASSIFICATION OF DANGEROUS SUBSTANCES CONTAINED INTO THE PRODUCT.

SUBSTANCES				CLASSIFICATION			
Name	Chemical	EINECS Number	CAS Number	Letter	Identification of danger	Special risk (1)	Safety advice -2
Nickel hydroxide	Ni (OH) ₂	235-008-5	12054-48-7	Xn	Harmful	R20/22 R40, R43	S2, S22, S26
Cadmium hydroxide	Cd (OH) ₂	244-168-5	21041-95-2	Xn	Harmful	R20/21/22 R50/53	S2, S60, S61
Potassium hydroxide	KOH	215-181-3	1310-58-3	C Xi	Corrosive Irritant	R35, R22, R36/37	S ^{1/2} , S26, S36/37/39, S45
Lithium hydroxide	Li OH	215-183-4	1310-65-2	C	Not classified	Not classified	Not classified
Cobalt hydroxide	Co (OH) ₂	244-166-4	21041-93-0	C	Not classified	Not classified	Not classified Not classified
Chromium	Cr	231-157-5	774-47-3		Not classified	Not classified	Not classified

(1) Nature of special risk

- R20/22 Harmful by inhalation and if swallowed
- R20/21/22 Harmful by inhalation, in contact with skin and if swallowed.
- R22 Harmful if swallowed.
- R35 Causes severe burns.
- R36/37 Irritating to eyes and respiratory system.
- R40 Limited evidence of a carcinogenic effect.
- R43 May cause sensitization by skin contact.
- R50/53 Very Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

(2) Safety advice

- S_{1/2} Keep locked up and out of the reach of children.
- S2 Keep out of the reach of children
- S22 Do not breathe dust
- S26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice
- S36/37/39 Wear suitable protective clothing, gloves and eyes/face protection.
- S45 In case of accident or if you feel unwell, seek medical advice immediately.
- S60 Must be disposed of as hazardous waste.
- S61 Avoid release to the environment.

4. FIRST AID MEASURES

When handling electrolyte, precautions must be taken to avoid personal to get in direct contact with it. If this accidentally happens the following must be exercised :

- 4.1. Inhalation :
Fresh air. Rinse mouth and nose with water. Medical treatment.
- 4.2. Skin contact :
Rinse immediately with plenty of water. Medical treatment.
- 4.3. Eyes contact:
Important : Rinse immediately with plenty of water during at least 15-30 minutes.
- 4.4. Ingestion :
If the injured is fully conscious : plenty of drink ; preferable milk. Do not induce vomiting. Immediately hospital treatment.

5. FIRE-FIGHTING MEASURES

- 5.1. Extinguishing media
Suitable : Class D-Dry chemical, Sand
Not to be used : Water
- 5.2. Special exposure hazards
Cells can be overheated by an external source or by internal shorting and develop potassium hydroxide mist and/or hydrogen gas. In fire situations fumes containing Cadmium, Nickel and Iron may be evolved.
- 5.3. Special protective equipment
Use self-contained breathing apparatus and full fire-fighting protective clothing.

6. ACCIDENTAL RELEASE MEASURES

Flush electrolyte spillage with plenty of water. Beware risk of slipping.

7. HANDLING AND STORAGE

Handle and store cells filled with electrolyte always with vents upwards.

Store in a dry place.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

When emptying or filling cells with electrolyte, eye protection glasses and protection gloves must be used.

Under normal condition of use no special personnel protection is required.

9. PHYSICAL PROPERTIES

- 9.1. Appearance
Physical shape and colour as supplied.

- 9.2. Temperature range (ambient °C)

Cell type	Continuous	Occasional
Steel container	-40 +50	-50 +85
Plastic container	-40 +50	-50 +70

- 9.3. Specific energy : 13-22 Wh/kg

Note: WH : Nominal voltage x rated Ah as defined in IEC standard.
Kg : Average battery weight in kg.

- 9.4. Specific instant power : 53-106 W/kg

Note : $W = 0.5 \times \text{nominal voltage} \times I_p$ with I_p = current in Amperes delivered by a fully charged battery for half the nominal voltage at one second.

Kg = Average battery weight in kg.

- 9.5. Mechanical resistance

As defined in relevant IEC standard.

10. STABILITY AND REACTIVITY

10.1. Conditions to avoid

Temperatures over 85°C. short-circuit of electrode connections. Deformation of cells.

10.2. Material to avoid

Do not fill cells with lead/acid battery electrolyte.

10.3. Hazardous decomposition products

Nickel compounds, Cadmium compounds, Caustic liquid.

11. TOXICOLOGICAL INFORMATION

Nickel hydroxide LD₅₀/ oral / rat : 1600mg / kg*

Cadmium Hydroxyde No data available

Potassium Hydroxyde LD₅₀/ oral / rat : 365 mg / kg*

Lithium Hydroxyde No data available.

* (INRS data)

12. ECOLOGICAL INFORMATION

See item n° 3

13. DISPOSAL CONSIDERATIONS

13.1. Incineration

Never incinerate NiCd cells.

13.2. Landfill

Never dispose NiCd cells as landfill.

13.3. Recycling

NiCd cells must be recycled. Contact local Saft dealer for information. Saft has a recycling plant for all types of NiCd cells.

14. TRANSPORT INFORMATION

14.1. United Nations

UN N° : 2795

Customs Code : 85 07 30 98

14.2. International conventions

Air : IATA
Sea : IMDG
Land : ADR (road) or RID (rail) Batteries exempt acc to special paragraph n° 598.

UN N°	NAME	RAIL & ROAD (ADR)				SEA (IMDG)					AIR (IATA)			
		CL	Code	Packing group	Labelling	CL	risk	EmS	Packing group	Labelling	CL	Risk	Packing group	Labelling
2795	BATTERIES, WET, FILLED WITH ALKALI Electric storage	8	C 11	***	None	8	***	8-10	III	8	8	***	***	8

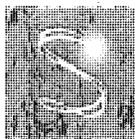

15. REGULATORY INFORMATION

According to item 14.2.

16. OTHER INFORMATIONS

None.

Disclaimer : This information has been compiled for sources considered to be dependable and is, to the best of our knowledge and belief, accurate and reliable as of the dated compiled. However, no representation, warranty (either expressed or implied) or guarantee is made to the accuracy, reliability or completeness of the information contained herein. This information relates to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. It is the user's responsibility to satisfy himself as to the suitability and completeness of this information for his own particular use. We do not accept liability for any loss or damage that may occur, whether direct, indirect, incidental or consequential, from the use of this information nor do we offer warranty against patent infringement. Additional information is available by calling the telephone number above designated for this purpose.

SAFT BRAND INDUSTRIAL NICKEL CADMIUM STORAGE BATTERY
HMIS RATINGS 3 Health 1 Flammability 2 Reactivity

1. HEALTH HAZARD INFORMATION

Effects of Overexposure

Eye Effects: Contact with electrolyte solution inside battery causes very rapid, severe damage. Extremely corrosive to eye tissues. May result in permanent blindness.

Skin Effects: Contact with electrolyte solution inside battery may cause serious burns to skin tissues. Contact with nickel compounds may cause skin sensitization, resulting in chronic eczema or nickel itch.

Ingestion: Ingestion of electrolyte solution causes tissue damage to throat area and gastro/respiratory tract. Ingestion of cadmium and/or nickel compounds causes nausea and intestinal disorders.

Inhalation: Mists generated during activation procedures may cause varying degrees of irritation to the nasal mucous membranes and respiratory tract tissues varying from mild irritation of nasal mucous membranes to damage of lung tissues proper. Inhalation of cadmium compounds may cause dry throat, cough, headache, vomiting, chest pain, and/or chills. Excessive overexposure may result in pulmonary edema, breathing difficulty, and prostration.

Carcinogenicity: NIOSH recommends that nickel and cadmium be treated as occupational carcinogens.

2. EMERGENCY FIRST AID

Battery Electrolyte

Eye Contact: Flush with plenty of water for at least 20 minutes. Get immediate medical attention.

Skin Contact: Remove contaminated clothing and flush affected areas with plenty of water for at least 20 minutes.

Ingestion: Do not induce vomiting. Dilute by giving large volumes of water or milk. Get immediate medical attention. Do not give anything by mouth to an unconscious person.

Inhalation: Remove to fresh air. Give oxygen or artificial respiration if needed. Get immediate medical attention.

Nickel and Cadmium Compounds

Skin contact: Wash with cold water and soap for 15 minutes.

3. SPECIAL PROTECTION INFORMATION

Perform activation procedures in a well-ventilated area. Battery operating areas must be well ventilated for removal of potentially dangerous and harmful gases generated. Normal reactions inside the battery liberate explosive and flammable hydrogen gas.

Respiratory Protection: Use NIOSH approved mist respirator during activation and actual usage to maintain exposure levels below the TWA.

Eye Protection: Use splash goggles or face shield whenever handling a battery.

Hand Protection: If exposure to electrolyte solution or dried salts is likely, use any water-insoluble, non-permeable glove, i.e., synthetic rubber. DO NOT use leather or wool.

Other protective Equipment: Rubber boots, rubber apron or rainwear, or equivalent if exposure to electrolyte solution is likely.

4. REACTIVITY DATA

CAUTION: NEVER ACTIVATE OR TOP OFF WITH ACID.

Incompatibilities: Aluminum, zinc, tin and other active metals, acid, chlorinated and aromatic hydrocarbons, nitrocarbons, halocarbons. Trichloroethylene will react with electrolyte solution to form dichloroacetylene which is spontaneously combustible.

Hazardous Decomposition Products: Nickel compounds, cadmium compounds, and potassium hydroxide.

Note that normal reactions inside battery liberate explosive and flammable hydrogen gas. Do not seal battery from atmosphere. Hazardous Polymerization will not occur.

5. FIRE AND EXPLOSION HAZARDS

Extinguishing Media:

CO₂, sand

	Melting Point	Boiling Point
Cadmium	608°F / 320°C	1410°F / 766°C
Cadmium hydroxide	N/A	2838°F / 1559°C (sublimes)
Copper	19891°F / 1083°C	4653°F / 2567°C
Nickel	2645°F / 1452°C	4950°F / 2732°C
Nickel hydroxide	N/A	445°F / 229°C (Decomposes to NiO)
Case material : Polamide 11	370-374°F / 188-190°C	N/A (burns may release toxic NO ₂ fumes)

Material Safety Data Sheet Nickel-Cadmium aircraft battery / cell

5. FIRE AND EXPLOSION HAZARDS - continued

Special Fire Fighting Procedures

Use self-contained breathing apparatus to avoid breathing toxic fumes. Wear protective clothing and equipment to prevent potential body contact with electrolyte solution or mixture of water and electrolyte solution. Disconnect or cut all cables to and from battery – especially ground connection.

Fire and Explosion Hazards

Electrolyte solution is corrosive to all human tissues. It will react violently with many organic chemicals, especially nitrocarbons and chlorocarbons. Electrolyte solution reacts with zinc, aluminum, tin and other active materials releasing flammable hydrogen gas.

Cadmium fumes may be released when batteries are subjected to high temperatures. In case of fire, do not breath smoke and fumes!

6. INGREDIENTS

	CAS#	EINECS#	EXPOSURE LIMITS	QUANTITY
Cadmium (as Cadmium and Cadmium Hydroxide)	7440-43-9 21041-95-2	231-152-8 244-168-5	5.0 mcg/m ³ dust – OSHA 0.05 mg/m ³ ACGIH CEILING-Fume	8% - 16%
Nickel (as Nickel and Nickel Hydroxide)	7440-02-0 12054-48-7	231-111-4 235-008-5	1 mg/m ³ – OSHA	19% - 36%
Electrolyte solution (18-30% Potassium Hydroxide)	1310-58-3	215-181-3	2 mg/m ³ ACGIH CEILING-Air	13% - 19%
Cobalt (as Cobalt Hydroxide)	21041-93-0	244-166-4	0.1 mg/m ³ OSHA	≈ 1%
Copper	7440-50-8	231-159-6	1 mg/ m ³ dust - OSHA	9% - 11%
Polyamide 11			None Established - OSHA	11% - 13%
Steel			None Established - OSHA	22% - 34%

7. PHYSICAL PROPERTIES

Boiling Point:	Not Applicable	Melting Point:	Not applicable
Vapor Pressure:	2 mm Hg at 68°F / 20°C	Vapor Density:	Not applicable
Specific Gravity:	1.17 - 1.30 (electrolyte)	Evaporation Rate:	Not Determined
Solubility in water:	Electrolyte solution is completely soluble.	Remainder:	is insoluble

8. SPILL MANAGEMENT PROCEDURES

Electrolyte Solution Spills

Small (up to 19 liters / 5 gallons): Flush with water and neutralize with dilute citric acid.

Large: Contain material in suitable containers or holding area. DO NOT allow material to enter sewers, streams, or storm conduits.

Recover material with vacuum truck and dispose of properly.

Reportable Quantity: 453.6 kg / 1000 pounds. 40 CFR-117.13.

9. DISPOSAL INFORMATION

Nickel-Cadmium aircraft batteries are universal wastes under RCRA. They may be returned to SAFT Valdosta or local collecting points mentioned in Saft website (www.saftbatteries.com) for recycling.

These batteries are TCLP Toxic. These batteries and the electrolyte solution they contain are considered to be corrosives. If not recycled, they must be disposed of in accordance with all federal, state, and local hazardous waste regulations.

10. PRECAUTIONS AND COMMENTS

These cells and the batteries constructed from them may be highly charged and are capable of high energy discharge. Care should be taken to handle cells properly to avoid shorting or misuse that will result in a rapid, uncontrolled electrical, chemical, or heat energy release.

Do not transport activated batteries without vent caps in place.

When removing battery from service, visually inspect for leakage prior to handling. If leakage has occurred follow Spill Management Procedures.

Keep away from exposed flames, sparks, and other ignition sources.

11. EPCRA REPORTING REQUIREMENTS

Section 313 Supplier Notification – This product contains the following EPCRA Section 313 chemicals subject to the reporting requirements of Section 313 if the Emergency Planning and Community Right-To-Know Act of 1986 (40 CFR 372):

CAS #	EINECS#	Chemical Name	Percent by Weight
7440-43-9	231-152-8	Cadmium	8%-16%
7440-48-4	231-158-0	Cobalt	1%
7440-50-8	231-159-6	Copper	9%-11%
7440-02-0	231-111-4	Nickel	19%-36%

A copy of this MSDS may be required to be filed with your local emergency planning commission, state emergency response commission, and local fire department in accordance with sections of the Emergency Planning and Community right-To-Know Act.

12. TRANSPORTATION INFORMATION

Batteries being forwarded or being returned to Saft for repair should be shipped as Hazardous Material using the following description:
Batteries, Wet, Filled with Alkali, 8, UN2795, PG III.

Spent batteries being sent to Saft Valdosta or local collecting points for recycling should be shipped as Universal Waste using the following description:

Used Batteries, Wet, Filled with Alkali, 8, UN2795, PG III.

3. HAZARDS IDENTIFICATION

EMERGENCY SUMMARY: WARNING !! SEVERE EYE, SKIN IRRITANT. CAN CAUSE BURNS WITH PROLONGED CONTACT. MAY CAUSE GASTROINTESTINAL TRACT BURNS IF SWALLOWED. CAN CAUSE CENTRAL NERVOUS SYSTEM DEPRESSION.

PRIMARY ROUTES OF ENTRY: DERMAL

4. FIRST AID MEASURES

SKIN: WASH AFFECTED AREAS WITH PLENTY OF SOAP AND WATER. GET MEDICAL ATTENTION IF CONDITION CONTINUES. REMOVE CLOTHING AND SHOES, DECONTAMINATE CLOTHING PRIOR TO RE-USE

INGESTION: IF SWALLOWED, GIVE A MINIMUM OF 3-4 GLASSES OF WATER BUT DO NOT INDUCE VOMITTING. DO NOT GIVE ANYTHING BY MOUTH TO A PERSON WHO IS CONVULSING OR IS UNCONSCIOUS. GET MEDICAL ATTENTION IMMEDIATELY. HAVE PHYSICIAN DETERMINE IF VOMITTING OR STOMACH EVACUATION IS NEEDED.

EYES: FLUSH EYES WITH PLENTY OF WATER. GET MEDICAL ATTENTION IF IRRITATION OCCURS.

INHALATION: MOVE PERSON FROM AREA INTO FRESH AIR. IF RESPIRATORY IRRITATION OR DIFFICULTY IN BREATHING DEVELOPS SEEK MEDICAL ATTENTION.

EFFECTIVE DATE: 1/11/2005

MATERIAL SAFETY DATA SHEET

No: 061102 -BP

SEA SPEED™ DTMV3

FIRE & EXPLOSION HAZARDS: COMBUSTION & DECOMPOSITION PRODUCTS MAY BE TOXIC

FLASH POINT: > 200° F (>93° C)

6. ACCIDENTAL RELEASE

WEAR PROTECTIVE GEAR. ABSORB WITH SAND OR OTHER SUITABLE MATERIAL. PUT INTO AN APPROVE CONTAINER FOR DISPOSAL. FLUSH CONTAMINATED AREA WITH WATER.

7. STORAGE & HANDLING

STORE IN A COOL DRY PLACE. KEEP CONTAINERS WELL SEALED TO PREVENT MOISTURE ABSORPTION OR CONTAMINATION. THIS PRODUCT IS FOR INDUSTRIAL USE ONLY. USE ONLY WITH GOOD VENTILATION. AVOID BREATHING VAPORS OR MIST. AVOID CONTACT WITH SKIN OR EYES. WASH THOROUGHLY AFTER USE.

8. PERSONAL PROTECTION/EXPOSURE CONTROLS

SKIN: WEAR IMPERVIOUS GLOVES

EYE PROTECTION: WEAR SPLASH PROOF CHEMICAL GOGGLES

RESPIRATORY: USE NIOSH APPROVED RESPIRATOR SUITABLE FOR ORGANIC VAPORS, IF REQUIRED. USE VENTILATION AND LOCAL EXHAUST IF NEEDED.

9. CHEMICAL AND PHYSICAL PROPERTIES

COLOR:	CLEAR YELLOW LIQUID
PHYSICAL STATE:	VISCOUS LIQUID
SOLUABILITY IN WATER:	NEGLIGIBLE
ODOR:	STRONG AMINE

10. REACTIVITY / STABILITY

STABILITY:	STABLE
INCOMPATIBILITY:	STRONG ACIDS, OXIDIZING AGENTS
HAZARDOUS POLYMERIZATION:	WILL NOT OCCUR
HAZARDOUS DECOMPOSITION PRODUCTS:	CARBON MONOXIDE, CARBON DIOXIDE, ALDEHYDES

11. TOXICOLOGICAL

SENSITIZATION:
SKIN IRRITATION:
EYE IRRITATION:

MAY CAUSE SENSITIZATION
MODERATE IRRITATION (RABBIT)
SEVERE IRRITATION (RABBIT)

3. HAZARDS IDENTIFICATION

EMERGENCY SUMMARY: WARNING !! CAUSES IRRITATION OR ALLERGIC SKIN REACTIONS

PRIMARY ROUTES OF ENTRY: DERMAL

4. FIRST AID MEASURES

SKIN: WASH AFFECTED AREAS WITH PLENTY OF SOAP AND WATER. GET MEDICAL ATTENTION IF CONDITION CONTINUES.

INGESTION: IF SWALLOWED, GIVE A MINIMUM OF 3-4 GLASSES OF WATER BUT DO NOT INDUCE VOMITTING. DO NOT GIVE ANYTHING BY MOUTH TO A PERSON WHO IS CONVULSING OR IS UNCONSCIOUS.

EYES: FLUSH EYES WITH PLENTY OF WATER. GET MEDICAL ATTENTION IF IRRITATION OCCURS.

INHALATION: MOVE PERSON FROM AREA INTO FRESH AIR. IF RESPIRATORY IRRITATION OR DIFFICULTY IN BREATHING DEVELOPS SEEK MEDICAL ATTENTION.

CONDITIONS AGGRAVATED BY EXPOSURE: ALLERGIES, ECZEMA OR SKIN CONDITIONS

OVEREXPOSURE EFFECTS: IRRITATION, SENSITIZATION, DERMATITIS

5. FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA: WATER SPRAY, DRY CHEMICAL, FOAM, CARBON DIOXIDE
FIRE FIGHTING EQUIPMENT: USE SCBA

* Indicates toxic chemical(s) subject to the reporting requirements of section 313 of Title III and of 40 CFR 372.

WARNING: CONTAINS CHEMICALS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER AND/OR BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM. TSCA CERTIFICATION: All chemicals in this product are listed, or are exempt from listing on the TSCA inventory.

===== SECTION III - PHYSICAL/CHEMICAL CHARACTERISTICS =====

BOILING RANGE: < 0 - 238 F

SPECIFIC GRAVITY (H2O=1): .75

VAPOR DENSITY: HEAVIER THAN AIR

EVAPORATION RATE: FASTER THAN n-BUTYL ACETATE

COATING V.O.C.: 5.25 lb/gal

MATERIAL V.O.C.: 3.23 lb/gal

SOLUBILITY IN WATER: INSOLUBLE
APPEARANCE AND ODOR: CLEAR LIQUID - SOLVENT

===== SECTION IV - FIRE AND EXPLOSION HAZARD DATA =====

FLASH POINT: PROPELLENT < 0 F **METHOD USED: TCC**
FLAMMABLE LIMITS IN AIR BY VOLUME- LOWER: 1.0 **UPPER: 13.0**

EXTINGUISHING MEDIA: FOAM, ALCOHOL FOAM, CO2, DRY CHEMICAL, WATER FOG

SPECIAL FIREFIGHTING PROCEDURES

WATER SPRAY MAY BE INEFFECTIVE, BUT MAY BE USED TO COOL CONTAINERS EXPOSED TO HEAT. WEAR SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS

VAPORS MAY IGNITE EXPLOSIVELY. EXPOSURE TO HEAT OR PROLONGED EXPOSURE TO SUN MAY CAUSE BURSTING. DO NOT EXPOSE TO HEAT OR STORE AT TEMPERATURES ABOVE 120 F DO NOT PUNCTURE OR INCINERATE (BURN) CONTAINER.

===== SECTION V - REACTIVITY DATA =====

STABILITY: STABLE

CONDITIONS TO AVOID

EXCESSIVE HEAT, OPEN FLAMES, SPARK SOURCES

INCOMPATIBILITY (MATERIALS TO AVOID)

OXIDIZING AGENTS

HAZARDOUS DECOMPOSITION OR BYPRODUCTS

CARBON DIOXIDE, CARBON MONOXIDE, VARIOUS HYDROCARBONS, OXIDES OF NITROGEN

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR

===== SECTION VI - HEALTH HAZARD DATA =====

INHALATION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

NASAL AND RESPIRATORY IRRITATION, DIZZINESS, HEADACHE, NAUSEA, POSSIBLE UNCONSCIOUSNESS, AND ASPHYXIATION.

SKIN AND EYE CONTACT HEALTH RISKS AND SYMPTOMS OF EXPOSURE

MODERATE IRRITATION, REDNESS, ITCHING AND BLURRED VISION. EXCESSIVE SKIN EXPOSURE MAY CAUSE BURNING SENSATION.

SKIN ABSORPTION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

MODERATE IRRITATION, REDNESS, DERMATITIS.

INGESTION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

GASTROINTESTINAL IRRITATION, VOMITING, DIARRHEA.

HEALTH HAZARDS (ACUTE AND CHRONIC)

EYES: IRRITATION, BLURRED VISION. SKIN: MODERATE IRRITATION, DERMATITIS. INHALATION: NASAL AND RESPIRATORY IRRITATION, NAUSEA, POSSIBLE UNCONSCIOUSNESS, ASPHYXIATION. INGESTION: GASTROINTESTINAL IRRITATION, VOMITING, DIARRHEA. CNS: INTOXICATION CAUSING SLIGHT EUPHORIA, DIZZINESS AND HEADACHE. OTHER: OVEREXPOSURE TO ETHYLENE GLYCOL MONOPROPYL ETHER CAN AFFECT LIVER AND KIDNEYS

CARCINOGENICITY: NTP CARCINOGEN: No IARC MONOGRAPHS: No OSHA REGULATED:
No

N/A

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE
BRONCHITIS, CNS DISORDERS, ALLERGIES, NAUSEA.

EMERGENCY AND FIRST AID PROCEDURES

EYES: FLUSH WITH LARGE AMOUNTS OF WATER LIFTING UPPER AND LOWER LIDS. GET MEDICAL ATTENTION. SKIN: THOROUGHLY WASH EXPOSED AREA WITH SOAP AND WATER. INHALATION: REMOVE TO FRESH AIR, GIVE ARTIFICIAL RESPIRATION IF NECESSARY. INGESTION KEEP PERSON WARM AND QUIET. SEEK IMMEDIATE MEDICAL ADVICE REGARDING INDUCTION OF VOMITING.

===== SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE =====

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

REMOVE ALL SOURCES OF IGNITION. ALLOW VOLATILE PORTION TO EVAPORATE COMPLETELY. AVOID BREATHING VAPORS AND REMOVE WITH INERT ABSORBENT.

WASTE DISPOSAL METHOD

DO NOT INCINERATE. DISPOSE OF IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL REGULATION. DO NOT CONTAMINATE LAKES, STREAMS OR OTHER WATER SUPPLY.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

DO NOT STORE OR USE NEAR HEAT, SPARKS OR FLAME. STORE IN WELL VENTILATED AREA. KEEP CLOSURE TIGHT AND CONTAINER UPRIGHT TO PREVENT LEAKAGE. DO NOT PUNCTURE OR INCINERATE. DO NOT SPRAY NEAR FIRE OR OPEN FLAMES.

OTHER PRECAUTIONS

REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVER-EXPOSURE TO SOLVENTS WITH PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL. AVOID SPONTANEOUS COMBUSTION OF CONTAMINATED RAGS OR OTHER IGNITABLE MATERIAL BY IMMEDIATE IMMERSION IN WATER. KEEP OUT OF THE REACH OF CHILDREN.

===== SECTION VIII - CONTROL MEASURES =====

RESPIRATORY PROTECTION

USE OF A NIOSH APPROVED CHEMICAL/MECHANICAL FILTER, DESIGNED TO REMOVE A COMBINATION OF PARTICLES AND VAPOR.

VENTILATION

PROVIDE SUFFICIENT MECHANICAL (GENERAL AND/OR LOCAL EXHAUST) VENTILATION TO MAINTAIN EXPOSURE BELOW TLV(S).

PROTECTIVE GLOVES

NEOPRENE OR BUTYL RUBBER GLOVES.

EYE PROTECTION

GOGGLES OR SIDE-SHIELD SAFETY GLASSES.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT

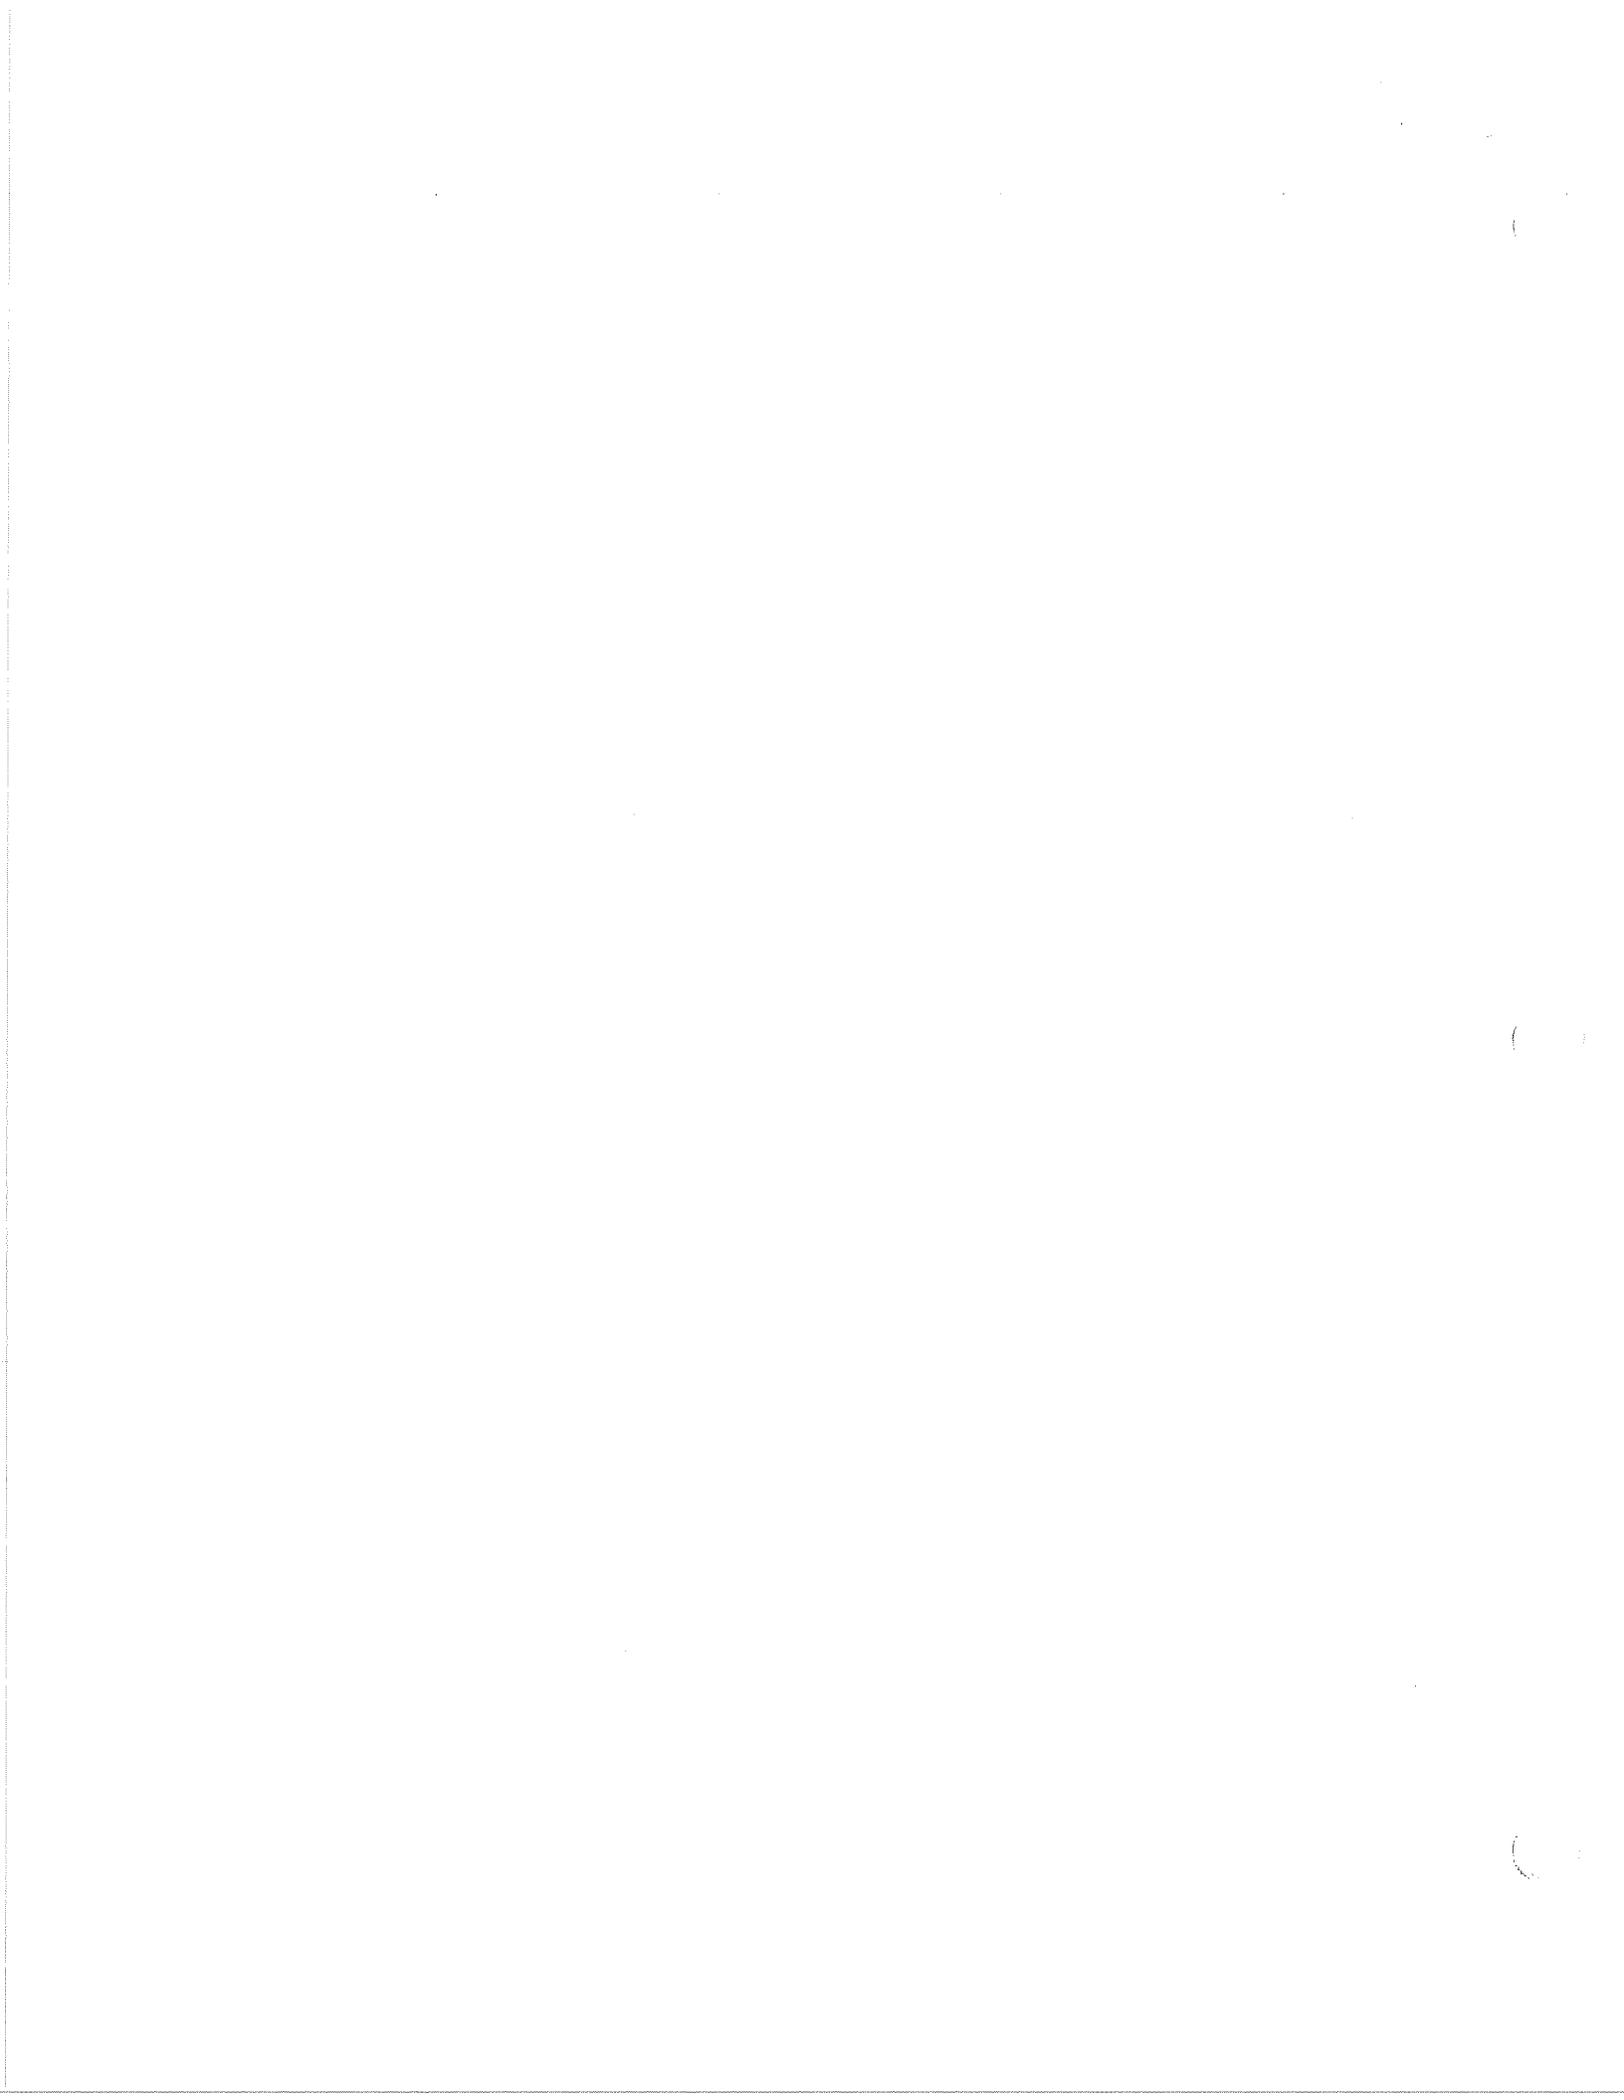

TO PREVENT REPEATED OR PROLONGED SKIN CONTACT, WEAR IMPERVIOUS CLOTHING AND BOOTS. WASH CONTAMINATED CLOTHING BEFORE RE-USE.

WORK/HYGIENIC PRACTICES

WASH HANDS BEFORE EATING, SMOKING OR USING THE WASHROOM.

===== SECTION IX - DISCLAIMER =====

THE INFORMATION ACCUMULATED HEREIN IS BELIEVED TO BE ACCURATE AND RELIABLE AS OF THE DATE INDICATED ABOVE, HOWEVER SEMI-CHEMICAL PRODUCTS, INC., MAKES NO REPRESENTATION, WARRANTY OR GUARANTEE NOR ASSUMES ANY LEGAL RESPONSIBILITY AS TO ITS ACCURACY, RELIABILITY OR COMPLETENESS. ULTIMATE DETERMINATION OF SUITABILITY FOR INTENDED USE IS THE RESPONSIBILITY OF THE USER.

Section 3 -- HAZARDS IDENTIFICATION

ROUTES OF EXPOSURE

INHALATION of vapor or spray mist.

EYE or SKIN contact with the product, vapor or spray mist.

EFFECTS OF OVEREXPOSURE

EYES: Irritation.

SKIN: Prolonged or repeated exposure may cause irritation.

INHALATION: Irritation of the upper respiratory system.

In a confined area vapors in high concentration may cause headache, nausea or dizziness.

SIGNS AND SYMPTOMS OF OVEREXPOSURE

Redness and itching or burning sensation may indicate eye or excessive skin exposure.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

None generally recognized.

CANCER INFORMATION

Continued on page 2

For complete discussion of toxicology data refer to Section 11.

Section 4 -- FIRST AID MEASURES

EYES: Flush eyes with large amounts of water for 15 minutes.
Get medical attention.
SKIN: Wash affected area thoroughly with soap and water.
Remove contaminated clothing and launder before re-use.
INHALATION: If affected, remove from exposure. Restore breathing.
Keep warm and quiet.
INGESTION: Do not induce vomiting.
Get medical attention immediately.

Section 5 -- FIRE FIGHTING MEASURES

FLASH POINT	LEL	UEL
>200 F PMCC	N.A.	N.A.

FLAMMABILITY CLASSIFICATION

Not Applicable

EXTINGUISHING MEDIA

Carbon Dioxide, Dry Chemical, Alcohol Foam

UNUSUAL FIRE AND EXPLOSION HAZARDS

Closed containers may explode (due to the build-up of pressure) when exposed to extreme heat.

During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention.

SPECIAL FIRE FIGHTING PROCEDURES

Full protective equipment including self-contained breathing apparatus should be used.

Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

Section 6 -- ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Remove all sources of ignition. Ventilate the area.
Remove with inert absorbent.

Section 7 -- HANDLING AND STORAGE

STORAGE CATEGORY

DOL Storage Class IIIIP

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE

Keep container closed when not in use. Transfer only to approved containers with complete and appropriate labeling. Do not take internally. Keep out of the reach of children.

Continued on page 3

B53B300

page 3

Section 8 -- EXPOSURE CONTROLS/PERSONAL PROTECTION

PRECAUTIONS TO BE TAKEN IN USE

Use only with adequate ventilation.

Avoid contact with skin and eyes. Avoid breathing vapor and spray mist.

Wash hands after using.

This coating may contain materials classified as nuisance particulates (listed "as Dust" in Section 2) which may be present at hazardous levels only during sanding or abrading of the dried film. If no specific dusts are listed in Section 2, the applicable limits for nuisance dusts are ACGIH TLV 10 mg/m³ (total dust), 3 mg/m³ (respirable fraction), OSHA PEL 15 mg/m³ (total dust), 5 mg/m³ (respirable fraction).

VENTILATION

Local exhaust preferable. General exhaust acceptable if the exposure to materials in Section 2 is maintained below applicable exposure limits. Refer to OSHA Standards 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION

If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly fitted organic vapor/particulate respirator approved by NIOSH/MSHA for protection against materials in Section 2.

When sanding or abrading the dried film, wear a dust/mist respirator approved by NIOSH/MSHA for dust which may be generated from this product, underlying paint, or the abrasive.

PROTECTIVE GLOVES

Wear gloves which are recommended by glove supplier for protection against materials in Section 2.

EYE PROTECTION

Wear safety spectacles with unperforated sideshields.

Section 9 -- PHYSICAL AND CHEMICAL PROPERTIES

CALIFORNIA PROPOSITION 65

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

TSCA CERTIFICATION

All chemicals in this product are listed, or are exempt from listing, on the TSCA Inventory.

Section 16 -- OTHER INFORMATION

This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

The above information pertains to this product as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to this product may substantially alter the composition and hazards of the product. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.

SUPER LUBE GREASE, page 2

SECTION V - REACTIVITY DATA

Stability: Unstable
Stable: YES Conditions to Avoid: None Known

Incompatibility (materials to avoid): May React with strong oxidizing agents.

Hazardous Decomposition or Byproducts: Burning may produce carbon monoxide.

Hazardous Polymerization: May occur
Will not occur: YES Conditions to Avoid: None Known

SECTION VI - HEALTH HAZARD DATA

Route(s) of Entry: INHALATION? SKIN? YES INGESTION? YES

Health Hazards (Acute and Chronic): No Evidence of adverse effect from available information on swallowing. SKIN ABSORPTION and INHALATION: May cause slight irritation in contact with skin and eyes.

Carcinogenicity: NTP? IARC MONOGRAPHS? OSHA REGULATIONS?
Not Listed Not Listed Not Listed

Signs and Symptoms of Exposure: Contact with Eye may result in slight irritation. Prolonged or repeated skin contact may cause mild irritation.

Medical Conditions Generally Aggravated by Exposure: N/E

Emergency and First Aid Procedures: SKIN: Remove by wiping and wash with soap and water. EYES: Wash with copious amounts of water.

SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE

Steps to be Taken in Case Material is Released or Spilled: Spills should be absorbed or scraped up.

Waste Disposal Method: Use method outlined in local EPA and Governmental Regulations. Contact your local EPA office.

Precautions to be Taken in Handling and Storage: Good manufacturing practices should be followed in handling and storage.

Other Precautions: Surface subject to spills with this product can become slippery.

SECTION VIII - CONTROL MEASURES

Respiratory Protection (Specify Type): None Required

Ventilation Local Exhaust: N/A Special: N/A
Mechanical (General) N/A Other: N/A

Protective Gloves: None under Normal Use

Eye Protection: None under Normal Use

Other Protective Clothing or Equipment: None under Normal Use

Work Hygienic Practices: Normal Precautions common to good manufacturing practices should be followed.

<u>Solubility in Water</u>	Not Soluble in Water		
<u>Appearance and Odor</u>	Translucent White to Slightly Yellow, Slight Odor		

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

Flash Point (Method used) >428°F (220°C) COC Flammable Limits: N/A LEL: N/E UEL: N/E

Extinguishing Media: Carbon Dioxide, Dry Chemical, Foam

Special Fire Fighting Procedures: Self-contained respiratory protection should be provided for fighting fires in confined areas.

Unusual Fire and Explosion Hazards: None Known

Other: Protective clothing(long sleeves, pants), eye wash, safety shower are always advisable when working with chemicals.

Engineering Controls

Ventilation In applications where sprays or mists may be generated, proper ventilation in accordance with good industrial hygiene should be provided

Section Nine Physical/Chemical Properties

Form	Liquid	pH	10.5	Color	None
Specific Gravity	1.050	Odor	None	Solubility	Complete
Boiling Point	190-212° F	Freezing Point	32° F	Evaporation Rate	> Water
% Volatile	> 70%				

Section Ten Stability and Reactivity

Stability: This product is stable at ambient temperatures and atmospheric pressures. It is not self-reactive and has a shelf life of at least one year under so called conditions. Conditions to avoid are temperatures above 130° F or below 32° F. Do not mix with other chemicals. Hazardous conditions may arise from improper mixing of chemicals.

Hazardous Decomposition Products: Thermal decomposition may generate toxic materials such as oxides of nitrogen.

Dangerous Polymerization: Will not occur. Conditions to avoid: None

Dangerous Reactions: May react with strong acids to give oxides of nitrogen

Section Eleven Toxicology Information

Acute Toxicity: This product has not been evaluated for its acute toxicology profile

Chronic Toxicity: This product has not been evaluated for its chronic toxicology profile

Carcinogenicity: This product does not contain a listed carcinogen from NTP, ACGIH or IARC.

Irritation: This product can be expected to be a skin and eye corrosive. No skin sensitization data is currently available.

Section Twelve Ecology Information

Ecotoxicity: The ecological toxicity of this product is not known.

Section Thirteen Disposal Considerations

Waste Disposal: Material that cannot be used according to label direction and is destined for disposal should be disposed of in accordance with all applicable regulations. Empty containers should be triple rinsed and offered for recycling or reconditioning, or disposed of in a sanitary landfill or for small containers(1 gallon or less), may be wrapped and discarded in trash. Waste generators are required to evaluate all waste material to determine if it is hazardous by characteristics or listing for compliance with RCRA and any local disposal procedures and regulations. NOTE: State and local regulations may be more stringent than Federal regulations

Section Fifteen Regulatory Information

Toxic Substances Control Act(TSCA): All of the components intentionally added to this product are listed on the on the U.S. EPA TSCA inventory. SARA Title III

Section 302 This product contains the following chemicals subject to SARA 302 reporting: None.

Section 311/312 This product is classified as an "immediate (acute) health hazard".

Section 313 *Chemicals marked with an asterisk in Section Two are subject to the reporting requirements for Section 313 of Title III of the Superfund Amendments

and Reauthorization Act(SARA) of 1986 and 40CFR Part 372. However, if this product is utilized for routine janitorial maintenance, it is exempted from this section, as stated in paragraph B.3.b Activity Exemptions of the Form R instructions.

(OSHA Hazard Communication Standard(29 CFR 1910.1200)

This product is hazardous by definition of the Hazard Communication Standard

NPCA Hazardous Material Identification System (HMIS Rating)

Health 2 Flammability 0 Reactivity 1 Personal Protective Eqpt. II

State Regulations

Pennsylvania/New Jersey/Massachusetts Right to Know

See "Section Two Composition" for listing of hazardous and top five ingredients present in concentration greater than 1%.

California Proposition 65: Components of this product which are present at a concentration which could require reporting under this statute are: None

Section Sixteen Other Information

Disclaimer: No representations or warranties, either expressed or implied, of merchantability, fitness for a particular purpose, or of any other nature, are made with respect to information concerning the product referred to in this document. The information contained herein is, to the best of our knowledge and belief, accurate. However, since the conditions of handling and use are beyond our control, it is impossible to foresee every health effect or exposure risk incurred by the use of this product. All chemicals present unknown health hazards and should always be used with caution. The information and recommendations contained herein are presented in good faith and are supplied pursuant to 29 CFR 1910.1200. The user should review this information in conjunction with their knowledge of the application intended to determine the suitability of this product for such purpose. In no event will the supplier be responsible for any damages of any nature whatsoever, resulting from the use, reliance upon, or the misuse of this information. Furthermore, it is the direct responsibility of the user to comply with all applicable Federal, State and local regulations governing the use and disposal of this material. Section Three Hazards Identification

Statement of Hazards: Caution. Causes eye and skin irritation
Fire and Explosion Hazards: This product is water based and represents little or no fire hazard at room temperature. Elevated temperatures may generate small quantities of combustible vapors, especially in enclosed spaces. Thermal decomposition products may include carbon monoxide, carbon dioxide and sulfur oxides.
Primary Route of Exposure: Skin and eye contact are the principal routes of exposure in this product.
Skin Contact: Skin contact can cause irritation with possible redness. Severity of action is highly dependent on contact time.
Eye Contact: Eye contact may cause irritation.
Ingestion: If swallowed, this product may cause irritation of mucosal linings of the mouth, throat, esophagus or stomach.
Inhalation: Inhalation may cause irritation of respiratory passages.
Carcinogenicity: IARC - No NTP - No OSHA - No ACGIH - No

Section Four First Aid Measures

Skin Contact: Remove contaminated shoes and clothing. Wash skin with soap and plenty of water for 15 minutes. Wash contaminated clothing before reuse.
Eye Contact: Flush immediately with water and remove contact lenses, if applicable. Then flush with large quantities of running water for 15 minutes. Hold eyelids apart during flushing to ensure complete rinsing of entire surface of eye and lids with water. Get medical attention, if necessary.
Ingestion: DO NOT induce vomiting. Rinse mouth with water. Then give 1-2 glasses of water or milk and call a physician or poison control center immediately. If vomiting occurs, keep head below hips to reduce risk of aspiration. Give water again. NEVER give anything by mouth to a person who is unconscious or convulsing. Get medical attention immediately.
Inhalation: Remove victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.
Medical Conditions Aggravated: No data is available that addresses medical conditions that are recognized as being aggravated by exposure to this product.
Note to Physician: Treat exposed patients symptomatically.

Section Five Fire Fighting Measures

Flash Point(Method): Not Established **Flammable Limits:** Not determined.
Extinguishing Media: Use water spray, dry chemical, carbon dioxide or foam extinguishing agents unless contraindicated by surrounding environment.
Special Fire Fighting Procedures: Prevent human exposure to fire, smoke, fumes or products of combustion. Evacuate non-essential personnel from fire area.
All ignition sources should be extinguished. Fire fighters should wear appropriate protective equipment, including self contained breathing apparatus and impervious clothing. Keep containers cooled with water spray to prevent rupture from excess heat.
Fire and Explosion Hazards: No unusual fire or explosion hazards of this product are known.
Hazardous Products: Thermal decomposition of this product may generate oxides of carbon and sulfur.

Section Six Accidental Release Measures

Caution: Ventilate area immediately. If spilled, floors may be extremely slippery. Wear appropriate protective gear to avoid skin or eye contact. Extinguish all ignition sources. Dike and contain spill with inert material(sand, clay). Transfer liquid and solids to separate containers for recovery or proper disposal. Keep spill out of storm sewers and open bodies of water. After removal, flush area with water. Follow good industrial hygiene practices. Wash thoroughly after clean-up. If uncertain about proper disposal, contact your local waste disposal provider or the regional office of the Environmental Protection Agency for guidance.

Section Seven Handling and Storage

Handling: Avoid contact with skin or eyes. Avoid breathing vapor, spray or mist. Use product only according to label directions. If unsure about safe use, contact your supervisor immediately. Wash with soap and water after handling.
Storage: Store in original container in a cool, dry, well ventilated area away from sources of ignition. Store away from food or feed. Containers should be kept tightly closed when not in use. Keep in an area inaccessible to small children.

Section Eight Exposure Controls/Personal Protection

Personal Protective Equipment
Respiratory: Respiratory protection is not expected to be necessary under normal conditions of use. Where exposure cannot be adequately controlled by general or local ventilation, use appropriate respiratory protection to prevent over exposure. An approved dust/mist respirator would be recommended.
Gloves: Use water impervious gloves, such as latex or neoprene rubber.
Eye Protection: Chemical resistant goggles or face shield are recommended.

INTENTIONAL MISUSE BY DELIBERATE INHALATION OF **TOLUENE** HAS BEEN ASSOCIATED WITH LIVER, KIDNEY, AND BRAIN DAMAGE IN HUMANS. OVEREXPOSURE TO **TOLUENE** HAS BEEN FOUND TO CAUSE LIVER, KIDNEY, NASAL, AND BRAIN DAMAGE IN LABORATORY ANIMALS. REPEATED OVEREXPOSURE TO HIGH VAPOR CONCENTRATIONS (1000ppm) OF **N-HEXANE** CAN CAUSE IRREVERSIBLE NERVE DAMAGE. THIS NEUROTOXICITY CAN BE ENHANCED BY THE PRESENCE OF **METHYL ETHYL KETONE**.

Consult physician on all above cases.

=====
SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE
=====

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Handle as a flammable liquid. Remove all ignition sources. Soak up wet material on a non-combustible absorbent and place in a closed metal container.

WASTE DISPOSAL METHOD

Dispose of in accordance with all local, state and federal regulations.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Store in cool, well ventilated area away from any ignition sources and strong oxidizing agents. Keep containers tightly closed when not in use. Do not transfer to plastic containers.

OTHER PRECAUTIONS

Ground and bond metal containers when not in use. No smoking in areas of use or storage. Use only non-sparking tools near wet adhesive or solvent vapors. Solvent vapor is much heavier than air and can collect in dangerous concentrations in floor drains or low areas.

=====
SECTION VIII - CONTROL MEASURES
=====

RESPIRATORY PROTECTION

Atmospheric levels should be maintained below the exposure guideline. For exposure to higher, or unknown, levels use an approved supplied air respirator or an approved positive pressure self-contained breathing apparatus if these levels are exceeded.

VENTILATION

Mechanical ventilation and/or local exhaust, sufficient in pattern and volume, to meet TLV requirements and prevent explosive concentrations of solvent vapors.

PROTECTIVE GLOVES

Use Neoprene, vinyl or natural rubber gloves.

EYE PROTECTION

Use safety glasses or chemical goggles.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT

Eye wash fountain or bottles.
Solvent insoluble barrier hand cream

WORK/HYGIENIC PRACTICES

Remove contaminated clothing. Wash skin and launder clothing before use.

=====
SECTION IX - DISCLAIMER
=====

ALL INFORMATION IS BASED UPON DATA FROM MFG'S AND/OR TECHNICAL SOURCE, & IS BELIEVED TO BE ACCURATE. CONDITIONS OF USE ARE BEYOND OUR CONTROL & THEREFORE USERS ARE RESPONSIBLE TO VERIFY THIS DATA UNDER THEIR OWN CONDITIONS TO DETERMINE SUITABILITY FOR THEIR PURPOSE, & THEY ASSUME ALL RISKS OF USE, HANDLING, & DISPOSAL, OR FORM USE OF INFO CONTAINED HEREIN.

THIS INFORMATION RELATES ONLY TO THE PRODUCT DESIGNATED HEREIN, AND DOES NOT RELATE TO ITS USE IN COMBINATION WITH OTHER MATERIAL OR IN ANY OTHER PROCESS.

ADDENDUM TO MSDS

UNUSUAL FIRE AND EXPLOSION HAZARDS

Volatile solvent constituent can readily form explosive or flammable mixtures in air. Vapors can flow along surfaces to distant ignition sources and flash back.

===== SECTION V - REACTIVITY DATA =====

STABILITY: STABLE

CONDITIONS TO AVOID

Keep away from all sources of ignition or heat.

INCOMPATIBILITY (MATERIALS TO AVOID)

Strong oxidizing agents can cause spontaneous combustion.

HAZARDOUS DECOMPOSITION OR BYPRODUCTS

Burning may produce fumes of carbon dioxide, carbon monoxide, hydrogen cyanide, phenols and nitrous oxides.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR

===== SECTION VI - HEALTH HAZARD DATA =====

INHALATION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

May cause headache, dizziness and drowsiness. High concentrations, or prolonged exposure to lower concentrations, may be irritating to mucous membranes and may cause CNS depression.

SKIN AND EYE CONTACT HEALTH RISKS AND SYMPTOMS OF EXPOSURE

SKIN-Prolonged or repeated exposure may result in drying of the skin, which can cause skin irritation or dermatitis. May cause temporary staining.

EYES-Liquid or high vapor concentrations can be severely irritating to the eyes.

SKIN ABSORPTION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

May be irritating. Skin contact may play a role in respiratory sensitization and protective rubber gloves should be worn at all times when working with this product.

INGESTION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

Moderate CNS depression may be shown by giddiness, headache, dizziness and nausea. If vomiting occurs, keep head below hips to prevent aspiration of liquid into lungs. Aspiration pneumonitis may be evidenced by coughing and cyanosis.

HEALTH HAZARDS (ACUTE AND CHRONIC)

Eye: May cause irritation with tearing.

Skin: May cause skin irritation, dermatitis, staining and allergic sensitivity.

Ingestion: May cause irritation and corrosion on the mouth and stomach tissue.

Inhalation: May cause irritation to upper respiratory tract and at higher concentrations narcosis or CNS depression. May cause respiratory sensitivity with asthma like symptoms.

CARCINOGENICITY: NTP? NO IARC MONOGRAPHS? NO OSHA REGULATED? NO

This product contains chemicals known to the state of California to cause cancer and/or birth defects or other reproductive harm.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE

Skin contact may aggravate an existing dermatitis. Preexisting eye and respiratory disorders may be aggravated.

EMERGENCY AND FIRST AID PROCEDURES

Eyes: Immediately irrigate with flowing water for 15 minutes.

Skin: Wash off in flowing water or shower.

Ingestion: Do not induce vomiting. If vomiting should occur spontaneously keep victims head below knees to prevent aspiration into the lungs.

Inhalation: Remove to fresh air. Restore breathing, if required.

EYES FLUSH EYES WITH FRESH WATER FOR AT LEAST 15 MINUTES.
SKIN WASH OFF WITH FRESH FLOW OF WATER OR TAKE A SHOWER.
INGESTION SEE A PHYSICIAN. DO NOT INDUCE VOMITING UNLESS DIRECTED
TO DO SO BY A PHYSICIAN.
INHALATION NO REACTIONS ARE EXPECTED. FRESH AIR.

SECTION FIVE FIRE FIGHTING

FLASH POINT 485F 252C
METHOD N/A
AUTOIGNITION TEMP. N/A
FLAMMABILITY
LIMITS UFL LFL N/A
HAZARDOUS COMBUSTION PRODUCTS: WATER, CARBON MONOXIDE, PHENOLICS.

EXTINGUISHING MEDIA: FOAM, CO2, DRY CHEMICAL, WATER SPRAY.

FIRE FIGHTING INSTRUCTIONS: SPRAY WITH WATER TO COOL. AND UNTIL FIRE IS OUT.
PROTECTIVE EQUIPMENT: POSITIVE PRESSURE BREATHING APPARATUS (SELF CONTAINED)
FULL PROTECTIVE CLOTHING.

SECTION SIX ACCIDENTAL SPILL

PROTECT PEOPLE ISOLATE HAZARD AREA AND KEEP PEOPLE AWAY.
PROTECT ENVIRONMENT CONTAIN WITH DIKE, CLOSE STORM DRAINS AND SEWERS,
KEEP SPARKS AWAY.
CLEANUP SOAK UP WITH ABSORBENT MATERIAL, SAND POLYPROPYLEN OR
FIBEROUS MATERIAL. WASH WITH HOT SOAPY WATER.
DO NOT USE SOLVENTS.

SECTION SEVEN HANDLING AND STORAGE

HANDLING PRACTICE SAFE HANDLING PRACTICES. AVOID GETTING ON SKIN, IN
EYES, BREATHING HEATED VAPORS. ALWAYS KEEP AWAY FROM
CHILDREN.
STORAGE MAY BE KEPT IN SEALED CONTAINERS AT AMBIENT TEMPERATURE
FOR 12-24 MONTHS.

SSCC

SOUND SPECIALTY COATINGS, CORP. MATERIAL SAFETY DATA SHEET

SECTION ONE IDENTIFICATION

PRODUCT NAME	AQUAPLY M
CHEMICAL FAMILY	EPOXY RESIN & CURTIVE AGENT
CHEMICAL NAME	BISPHENOL A/ EPICHLORCHYDRIN/POLYAMIDE BLEND
MANUFACTURER	SOUND SPECIALTY COATINGS, CORP. P.O. BOX 13160, BURTON, WA. 98013
TELEPHONE	206-517-2611
EMERGENCY NUMBER	206-517-2611
DATE PREPARED	02 MAY 96, updated, '98'00,'02,'04
INTENDED USE	ADHESIVE, COATING, LO VOC, HAP FREE

SECTION TWO INGREDIENTS

%	CAS NUMBER AND CHEMICAL NAME
100	025068-38-6 BISPHENOL A/EPICHLOROHYDRIN/POLYAMIDE BLEND
	OR
100	025085-99-8 BISPHENOL A/EPICHLOROHYDRIN/POLYAMIDE BLEND

THE REMAINING COMPONENTS ARE TRADE SECRET

SECTION THREE HAZARDS AND HEALTH EFFECTS

EXPOSURE LIMITS	CANCER-NOT CLASSIFIABLE AS A CARCINOGEN
BIRTH DEFECTS	UNLIKELY
REPRODUCTION	DOES NOT INTERFERE
EYES	MAY CAUSE SLIGHT IRRITATION
SKIN	MAY CAUSE ALLERGIC SKIN REACTION
INGESTION	SWALLOWING SMALL AMOUNTS IS NOT CONSIDERED TOXIC
INHALATION	UNLIKELY TO CAUSE ANY IRRITATION DUE TO LOW VAPOR CONTENT.

SECTION 7**TOXICOLOGICAL PROPERTIES**

ROUTES OF ENTRY

SKIN CONTACT.....no hazard in normal industrial use. Exposure to hot material may cause thermal burns.
EYES.....particulates may scratch eye surfaces cause mechanical irritation.
INHALATION.....negligible hazard at ambient temperature.
INGESTION.....attention contains allergen products.

CHRONIC OVER EXPOSURE EFFECTS..... some components are irritating and sensible for the skin and eyes.

CARCINOGENECITY.....presence due to aromatic fraction of hydrocarbon.

REPRODUCTIVE EFFECTS.....presence due to aromatic fraction of hydrocarbon

MUTAGENICITY.....small traces.

SECTION 8**PREVENTIVE MEASURES**

STORAGE AND HANDLING :

Store in a cool, dry location. Handle in a well ventilated area. Local exhaust recommended. Avoid contact with skin and eyes, inhalation of dust and vapours.

ENVIRONMENTAL TOXICITY DATA :

Environmental effects have not been determined.

WASTE DISPOSAL METHOD :

In accordance with local, provincial and federal regulations. Contact regional environmental agency.

RESPIRATORY PROTECTION :

(NIOSH/MSHA) approved for dusts and organic vapours.

PROTECTIVE GLOVES :

Impervious and thermal gloves.

EYE PROTECTION :

Chemical safety goggles.

VENTILATION

Local exhaust recommended. Wear respiratory protection in the absence of adequate ventilation.

SECTION 9**FIRST AID**

EYES.....Immediately flush with water for at least 15 minutes, get prompt medical attention.

SKIN.....wash thoroughly with soap and water. Remove contaminated clothing and wash before re-use.
Get medical attention if irritation persists or dermatitis develops.

INHALATION.....Remove to fresh air. Aid or restore breathings if necessary. Get medical attention.

INGESTION.....Have victim rinse mouth out with water. If conscious give two glasses of water.
If vomiting occurs naturally, rinse mouth and repeat administration of water. Get medical attention.

MATERIAL SAFETY DATA SHEET

4/29/05

OR10-0428

SECTION 1	HAZARDOUS INGREDIENTS OF MATERIAL	
CHEMICAL IDENTITY	CONCENTRATION	CAS
MAGNESIUM SILICATE	5-10%	14807-96-6
CARBON BLACK	10-30%	1333-86-4
ZINC OXIDE	1-5%	1314-13-2

SECTION 2	PREPARATION OF MATERIAL SAFETY DATA SHEET
PREPARED BY	TERRY JONES
PHONE NUMBER	1-819-864-4284
DATE PREPARED	APRIL 28, 2005

SECTION 3	MATERIAL IDENTIFICATION AND USE
MANUFACTURER'S NAME	SOUCY TECHNO
MANUFACTURER'S ADDRESS	468 ST-ROCH NORD C, ROCK FOREST PQ- JIN 2R6
MANUFACTURER'S PHONE	1-819-864-4284
PRODUCT IDENTIFIER	OR10-0428
PRODUCT USE	unvulcanized rubber compound

SECTION 4	PHYSICAL DATA OF PRODUCT
PHYSICAL STATE	solid
ODOUR AND APPEARANCE	typical odour of black rubber
SPECIFIC GRAVITY	1.241
COEFFICIENT OF WATER/OIL DISTRIBUTION	insoluble

SECTION 5	FIRE AND EXPLOSION HAZARD OF PRODUCT
CONDITIONS OF INFLAMMABILITY	flammable solid contact with combustible material may cause fire
MEANS OF EXTINCTION	use water, dry chemical, CO2, alcohol foam.
FLASHPOINT AND METHOD OF DETERMINATION	500 deg F, greater than decomposes
HAZARDOUS COMBUSTION PRODUCTS	oxygen, lean conditions may produce carbon monoxide and irritating smoke.

SECTION 6	REACTIVITY DATA
CHEMICAL STABILITY	stable
INCOMPATIBLE MATERIAL	strong oxidizing agents
CONDITIONS OF REACTIVITY	when heated, the rubber polymerizes
HAZARDOUS DECOMPOSITION PRODUCTS	we find in major part some carbon monoxide and dioxide, due to carbon black and hydrocarbon, at all temperatures, possible emission of sulphur, nitrogen and formaldehyde, avoid excessive heat.

SARA Toxic Release Inventory (TRI) (313):

There are no components in this product on the SARA 313 list.

Toxic Substances Control Act (TSCA) Status:

All component(s) of this material is(are) listed on the EPA/TSCA Inventory of Chemical Substances.

Other Chemical Inventories:

Component(s) of this material is (are) listed on the Australian AICS, Canadian DSL, European EINECS,

State Regulation

This material is not regulated by California Prop 65, New Jersey Right-to-Know Chemical List or Pennsylvania Right-To-Know Chemical List. However for details on your regulation requirements you should contact the appropriate agency in your state.

SECTION 16

OTHER INFORMATION

Revision#: 0

Revision Date: 12/20/2004

Review Date: 12/20/2004

Revisions since last change (discussion): This Material Safety Data Sheet (MSDS) has been created to fully comply with the guidance contained in the ANSI MSDS standard (ANSI Z400.1-1998). We encourage you to take the opportunity to read the MSDS and review the information contained therein.

SECTION 17

LABEL INFORMATION

READ AND UNDERSTAND MATERIAL SAFETY DATA SHEET BEFORE HANDLING OR DISPOSING OF PRODUCT. THIS LABEL COMPLIES WITH THE REQUIREMENTS OF THE OSHA HAZARD COMMUNICATION STANDARD (29 CFR 1910.1200) FOR USE IN THE WORKPLACE. THIS LABEL IS NOT INTENDED TO BE USED WITH PACKAGING INTENDED FOR SALE TO CONSUMERS AND MAY NOT CONFORM WITH THE REQUIREMENTS OF THE CONSUMER PRODUCT SAFETY ACT OR OTHER RELATED REGULATORY REQUIREMENTS.

PRODUCT CODE(S): 61526, 61538

QUAKER STATE™ Full Synthetic SAE 75W-90 GL-5

ATTENTION!

PROLONGED OR REPEATED SKIN CONTACT MAY CAUSE OIL ACNE OR DERMATITIS.

Precautionary Measures:

Avoid prolonged or repeated contact with eyes, skin and clothing. Wash thoroughly after handling.

FIRST AID

Inhalation: Remove victim to fresh air and provide oxygen if breathing is difficult. Get medical attention.

Skin Contact: Remove contaminated clothing and shoes and wipe excess from skin. Flush skin with water, then wash with soap and water. If irritation occurs, get medical attention. Do not reuse clothing until cleaned.

Eye Contact: Flush with water. If irritation occurs, get medical attention.

Ingestion: Do not induce vomiting. In general, no treatment is necessary unless large quantities of product are

ingested. However, get medical attention.

FIRE

In case of fire, Use water fog, 'alcohol foam', dry chemical or carbon dioxide (CO2) to extinguish flames. Do not use a direct stream of water. Material will float and can be re-ignited on surface of water.

SPILL OR LEAK

Dike and contain spill.

FOR LARGE SPILLS: Remove with vacuum truck or pump to storage/salvage vessels.

FOR SMALL SPILLS: Soak up residue with an absorbent such as clay, sand or other suitable material. Place in non-leaking container and seal tightly for proper disposal.

CONTAINS: Polyalphaolefin synthetic base oil, 68037-01-4; Proprietary additives, Mixture

NFPA Rating (Health, Fire, Reactivity): 0, 1, 0

TRANSPORTATION

US Department of Transportation Classification

This material is not subject to DOT regulations under 49 CFR Parts 171-180.

Oil: This product is an oil under 49CFR (DOT) Part 130. If shipped by rail or highway in a tank with a capacity of 3500 gallons or more, it is subject to these requirements. Mixtures or solutions containing 10% or more of this product may also be subject to this rule.

CAUTION: Misuse of empty containers can be hazardous. Empty containers can be hazardous if used to store toxic, flammable, or reactive materials. Cutting or welding of empty containers might cause fire, explosion or toxic fumes from residues. Do not pressurize or expose to open flames or heat. Keep container closed and drum bungs in place.

Name and Address

SOPUS Products
P.O. Box 4427
Houston, TX 77210-4427

ADMINISTRATIVE INFORMATION

MANUFACTURER ADDRESS: SOPUS Products, P.O. Box 4427, Houston, TX. 77210-4427

THE INFORMATION CONTAINED IN THIS DATA SHEET IS BASED ON THE DATA AVAILABLE TO US AT THIS TIME, AND IS BELIEVED TO BE ACCURATE BASED UPON THAT : IT IS PROVIDED INDEPENDENTLY OF ANY SALE OF THE PRODUCT, FOR PURPOSE OF HAZARD COMMUNICATION. IT IS NOT INTENDED TO CONSTITUTE PRODUCT PERFORMANCE INFORMATION, AND NO EXPRESS OR IMPLIED WARRANTY OF ANY KIND IS MADE WITH RESPECT TO THE PRODUCT, UNDERLYING DATA OR THE INFORMATION CONTAINED HEREIN. YOU ARE URGED TO OBTAIN DATA SHEETS FOR ALL PRODUCTS YOU BUY, PROCESS, USE OR DISTRIBUTE, AND ARE ENCOURAGED TO ADVISE THOSE WHO MAY COME IN CONTACT WITH SUCH PRODUCTS OF THE INFORMATION CONTAINED HEREIN.

TO DETERMINE THE APPLICABILITY OR EFFECT OF ANY LAW OR REGULATION WITH RESPECT TO THE PRODUCT, YOU SHOULD CONSULT WITH YOUR LEGAL ADVISOR OR THE APPROPRIATE GOVERNMENT AGENCY. WE WILL NOT PROVIDE ADVICE ON SUCH MATTERS, OR BE RESPONSIBLE FOR ANY INJURY FROM THE USE OF THE PRODUCT DESCRIBED HEREIN. THE UNDERLYING DATA, AND THE INFORMATION PROVIDED HEREIN AS A RESULT OF THAT DATA, IS THE PROPERTY OF SOPUS PRODUCTS AND IS NOT TO BE THE SUBJECT OF SALE OR EXCHANGE WITHOUT THE EXPRESS WRITTEN CONSENT OF SOPUS PRODUCTS.

43650-29832-100R-12/20/2004

SECTION 12**ECOLOGICAL INFORMATION****Environmental Impact Summary:**

There is no ecological data available for this product. However, this product is an oil. It is persistent and does not readily biodegrade. However, it does not bioaccumulate.

SECTION 13**DISPOSAL CONSIDERATIONS****RCRA Information:**

Under RCRA, it is the responsibility of the user of the material to determine, at the time of the disposal, whether the material meets RCRA criteria for hazardous waste. This is because material uses, transformations, mixtures, processes, etc. may affect the classification. Refer to the latest EPA, state and local regulations regarding proper disposal.

SECTION 14**TRANSPORT INFORMATION****US Department of Transportation Classification**

This material is not subject to DOT regulations under 49 CFR Parts 171-180.

Oil: This product is an oil under 49CFR (DOT) Part 130. If shipped by rail or highway in a tank with a capacity of 3500 gallons or more, it is subject to these requirements. Mixtures or solutions containing 10% or more of this product may also be subject to this rule.

International Air Transport Association

Not regulated under IATA rules.

International Maritime Organization Classification

Not regulated under International Maritime Organization rules.

SECTION 15**REGULATORY INFORMATION****Federal Regulatory Status****OSHA Classification:**

Under normal conditions of use or in a foreseeable emergency, this product does not meet the definition of a hazardous chemical when evaluated according to the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

WHMIS Classification: Not a controlled substance.

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

Ozone Depleting Substances (40 CFR 82 Clean Air Act):

This material does not contain nor was it directly manufactured with any Class I or Class II ozone depleting substances.

Superfund Amendment & Reauthorization Act (SARA) Title III:

There are no components in this product on the SARA 302 list.

SARA Hazard Categories (311/312):

health, an approved respirator must be worn. Respirator selection, use and maintenance should be in accordance with the requirements of the OSHA Respiratory Protection Standard, 29 CFR 1910.134.

Types of respirator(s) to be considered in the selection process include:

For Mist: Air Purifying, R or P style NIOSH approved respirator.

For Vapors: Air Purifying, R or P style prefilter & organic cartridge, NIOSH approved respirator.

Self-contained breathing apparatus for use in environments with unknown concentrations or emergency situations.

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Appearance & Odor: Liquid. Mild odor.
 Substance Chemical Family: Lubricants
 Physical State: Liquid

Flash Point	> 300 °F [Cleveland Open Cup]	Odor	Mild odor.
Pour Point	-40 °F	Specific Gravity	0.867
Viscosity	> 400 cSt @ 40 °C		

Odor Threshold: Not Determined
 Partition Coefficient: Not Determined
 pH: Not Determined

SECTION 10 REACTIVITY AND STABILITY

Stability:
 Material is stable under normal conditions.

Conditions to Avoid:
 Avoid heat and open flames.

Materials to Avoid:
 Avoid contact with strong oxidizing agents.

Hazardous Decomposition Products:

Thermal decomposition products are highly dependent on combustion conditions. A complex mixture of airborne solids, liquids and gases will evolve when this material undergoes pyrolysis or combustion. Aldehydes, Carbon Monoxide, Carbon Dioxide, Ketones and other unidentified organic compounds may be formed upon combustion.

SECTION 11 TOXICOLOGICAL INFORMATION

Acute Toxicity

TEST	Result	OSHA Classification	Material Tested
Dermal LD50	>2 g/kg(Rabbit)	Non-Toxic	Based on components(s)
Inhalation LC50	>5 mg/l(Rat)	Non-Toxic	Based on components(s)
Oral LD50	>2 g/kg(Rat)	Non-Toxic	Based on components(s)

Carcinogenicity Classification

Chemical Name	NTP	IARC	ACGIH	OSHA
Synthetic Gear Oil	No	Not Reviewed	No	No

FOR SMALL SPILLS: Soak up residue with an absorbent such as clay, sand or other suitable material. Place in non-leaking container and seal tightly for proper disposal.

Reporting:
 CERCLA: Product is covered by EPA's Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) petroleum exclusion. Releases to air, land, or water are not reportable under CERCLA (Superfund).

CWA: This product is an oil as defined under Section 311 of EPA's Clean Water Act (CWA). Spills into or leading to surface waters that cause a sheen must be reported to the National Response Center, 1-800-424-8802.

SECTION 7 HANDLING AND STORAGE

Precautionary Measures:
 Wash with soap and water before eating, drinking, smoking, applying cosmetics, or using toilet. Launder contaminated clothing before reuse. Properly dispose of contaminated leather articles such as shoes or belts that cannot be decontaminated. Avoid heat, open flames, including pilot lights, and strong oxidizing agents. Use explosion-proof ventilation to prevent vapor accumulation. Ground all handling equipment to prevent sparking.

Storage:
 Do not store in open or unlabeled containers. Store in a cool, dry place with adequate ventilation. Keep away from open flames and high temperatures.

Container Warnings:
 Keep containers closed when not in use. Containers, even those that have been emptied, can contain explosive vapors. Do not cut, drill, grind, weld or perform similar operations on or near containers.

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Chemical	Limit	TWA	STEL	Ceiling	Notation
Polyalphaolefin	ACGIH TLV	5 mg/m ³	10 mg/m ³		
Polyalphaolefin	OSHA PEL	5 mg/m ³			

Exposure Controls

Provide adequate ventilation to control airborne concentrations below the exposure guidelines/limits.

Personal Protection

Personal protective equipment (PPE) selections vary based on potential exposure conditions such as handling practices, concentration and ventilation. Information on the selection of eye, skin and respiratory protection for use with this material is provided below.

Eye Protection:
 Chemical Goggles, or Safety glasses with side shields

Skin Protection:
 Use protective clothing which is chemically resistant to this material. Selection of protective clothing depends on potential exposure conditions and may include gloves, boots, suits and other items. The selection(s) should take into account such factors as job task, type of exposure and durability requirements.

Published literature, test data and/or glove and clothing manufacturers indicate the best protection is provided by:
 Neoprene, or Nitrile Rubber

Respiratory Protection:
 If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker

Signs and Symptoms:
Irritation as noted above.

Aggravated Medical Conditions:
Pre-existing eye, skin and respiratory disorders may be aggravated by exposure to this product.

For additional health information, refer to section 11.

SECTION 4

FIRST AID MEASURES

Inhalation:

Remove victim to fresh air and provide oxygen if breathing is difficult. Get medical attention.

Skin:

Remove contaminated clothing and shoes and wipe excess from skin. Flush skin with water, then wash with soap and water. If irritation occurs, get medical attention. Do not reuse clothing until cleaned.

Eye:

Flush with water. If irritation occurs, get medical attention.

Ingestion:

Do not induce vomiting. In general, no treatment is necessary unless large quantities of product are ingested. However, get medical attention.

Note to Physician:

In general, emesis induction is unnecessary in high viscosity, low volatility products such as oils and greases.

SECTION 5

FIRE FIGHTING MEASURES

Flash Point [Method]: >300 °F/>148.89 °C [Cleveland Open Cup]

Upper Flammability Limit: Not Determined

Lower Flammability Limit: Not Determined

Extinguishing Media:

This material is non-flammable. Material will float and can be re-ignited on surface of water. Use water fog, 'alcohol foam', dry chemical or carbon dioxide (CO₂) to extinguish flames. Do not use a direct stream of water.

Fire Fighting Instructions:

Do not enter confined fire space without full bunker gear (helmet with face shield, bunker coats, gloves and rubber boots), including a positive pressure, NIOSH approved, self-contained breathing apparatus. This material is non-flammable.

Unusual Fire Hazards:

Material may ignite when preheated.

SECTION 6

ACCIDENTAL RELEASE MEASURES

Protective Measures:

May burn although not readily ignitable.

Wear appropriate personal protective equipment when cleaning up spills. Refer to Section 8.

Spill Management:

FOR LARGE SPILLS: Remove with vacuum truck or pump to storage/salvage vessels.

MATERIAL SAFETY DATA SHEET

Review Date: 12/20/2004

SECTION 1 PRODUCT AND COMPANY IDENTIFICATION

PRODUCT: **QUAKER STATE™ Full Synthetic SAE 75W-90 GL-5**

MSDS NUMBER: 402407LU - 0
PRODUCT CODE(S): 61525, 61538

PRODUCT USE: Gear lubricant

MANUFACTURER

SOPUS Products
P.O. Box 4427
Houston, TX, 77210-4427

TELEPHONE NUMBERS

Spill Information: (877) 242-7400
Health Information: (877) 504-9351
MSDS Assistance Number: (877) 276-7285

SECTION 2 PRODUCT/INGREDIENTS

INGREDIENTS	CAS#	CONCENTRATION
Synthetic Gear Oil	66037-01-4	90 - 99 %weight
Polyalphaolefin synthetic base oil	Mixture	1 - 10 %weight
Proprietary additives		

SECTION 3 HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Appearance & Odor: Liquid. Mild odor.
Health Hazards: No known immediate health hazards.
Physical Hazards: No known physical hazards.
NFPA Rating (Health, Fire, Reactivity): 0, 1, 0
Hazard Rating: Least - 0 Slight - 1 Moderate - 2 High - 3 Extreme - 4

Route(s) of Exposure: Skin

Inhalation:

Inhalation of vapors (generated at high temperatures only) or oil mist may cause mild irritation of the nose, throat, and respiratory tract.

Eye Irritation:

Lubricating oils are generally considered no more than minimally irritating to the eyes.

Skin Contact:

Lubricating oils are generally considered no more than minimally irritating to the skin. Prolonged and repeated contact may result in defatting and drying of the skin that may cause various skin disorders such as dermatitis, folliculitis or oil acne.

Ingestion:

Lubricating oils are generally no more than slightly toxic if swallowed.

IMPLEMENTED TO REDUCE EXPOSURE.

VENTILATION: PROVIDE SUFFICIENT MECHANICAL (GENERAL AND/OR LOCAL EXHAUST) VENTILATION TO MAINTAIN EXPOSURE BELOW TLV(S).

PROTECTIVE GLOVES: WEAR RESISTANT GLOVES (CONSULT YOUR SAFETY EQUIPMENT SUPPLIER).

EYE PROTECTION: CHEMICAL SPLASH GOGGLES IN COMPLIANCE WITH OSHA REGULATIONS ARE ADVISED; HOWEVER, OSHA REGULATIONS ALSO PERMIT OTHER TYPE SAFETY GLASSES. CONSULT YOUR SAFETY REPRESENTATIVE.

OTHER PROTECTIVE EQUIPMENT: TO PREVENT REPEATED OR PROLONGED SKIN CONTACT, WEAR IMPERVIOUS CLOTHING AND BOOTS.

SECTION IX

SPECIAL PRECAUTIONS OR OTHER COMMENTS:

CONTAINERS OF THIS MATERIAL MAY BE HAZARDOUS WHEN EMPTIED, SINCE EMPTIED CONTAINERS RETAIN PRODUCT RESIDUES (VAPOR, LIQUID AND/OR SOLID), ALL HAZARD PRECAUTIONS GIVEN IN THIS DATA SHEET MUST BE OBSERVED.

WARNING!!! SUDDEN RELEASE OF HOT ORGANIC CHEMICAL VAPORS OR MIST FROM PROCESS EQUIPMENT OPERATING AT ELEVATED TEMPERATURE AND PRESSURE OR SUDDEN INGRESS OF AIR INTO A VACUUM EQUIPMENT MAY RESULT IN IGNITIONS WITHOUT THE PRESENCE OF OBVIOUS IGNITION SOURCES. "AUTO IGNITION" OR "IGNITION" TEMPERATURE VALUES CANNOT BE TREATED AS SAFE OPERATING TEMPERATURES IN CHEMICAL PROCESSES WITHOUT ANALYSIS OF THE ACTUAL PROCESS CONDITIONS. ANY USE OF THIS PRODUCT IN ELEVATED TEMPERATURE PROCESSES SHOULD BE THOROUGHLY EVALUATED TO ESTABLISH AND MAINTAIN SAFE OPERATING CONDITIONS.

HYDROCARBON SOLVENTS ARE BASICALLY NON-CONDUCTORS OF ELECTRICITY AND CAN BECOME ELECTROSTATICALLY CHARGED DURING MIXING, FILTERING OR PUMPING AT HIGH FLOW RATES. IF THIS CHARGE REACHES A SUFFICIENTLY HIGH LEVEL, SPARKS CAN FORM THAT MAY IGNITE THE VAPORS OF FLAMMABLE LIQUIDS.

THE INFORMATION PROVIDED HEREIN OBTAINED FROM SOURCES BELIEVED TO BE RELIABLE. WE PROVIDE NO WARRANTIES, EITHER EXPRESSED OR IMPLIED FOR THE ACCURACY OR COMPLETENESS OF THE DATA CONTAINED HEREIN. THIS INFORMATION IS OFFERED FOR YOUR CONSIDERATION AND INVESTIGATION. YOU SHOULD INSURE THAT YOU HAVE ALL CURRENT DATA RELEVANT TO YOUR PARTICULAR USE.

BASED ON THE AVAILABLE INFORMATION, THIS MATERIAL CANNOT BE CLASSIFIED WITH REGARD TO CARCINOGENICITY.

THIS MATERIAL IS NOT LISTED AS A CARCINOGEN BY IARC, NTP OR OSHA.

SECTION VII

CONTROL MEASURES (SPILL OR LEAK PROCEDURES):

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

SMALL SPILL: ABSORB LIQUID ON VERMICULITE, FLOOR ABSORBENT OR OTHER ABSORBENT MATERIAL.

LARGE SPILL: ELIMINATE ALL IGNITION SOURCES (FLARES, FLAMES INCLUDING PILOT LIGHTS, ELECTRICAL SPARKS). PERSONS NOT WEARING PROTECTIVE EQUIPMENT SHOULD BE EXCLUDED FROM AREA OF SPILL UNTIL CLEAN-UP HAS BEEN COMPLETED. STOP SPILL AT SOURCE. PREVENT FROM ENTERING DRAINS, SEWERS, SEWERS STREAMS OR OTHER BODIES OF WATER. PREVENT FROM SPREADING. IF RUNOFF OCCURS, NOTIFY AUTHORITIES AS REQUIRED THAT A SPILL HAS OCCURRED. PUMP OR VACUUM TRANSFER SPILLED PRODUCT TO CLEAN CONTAINERS FOR RECOVERY. ABSORB UNRECOVERABLE PRODUCT. TRANSFER CONTAMINATED ABSORBENT, SOIL AND OTHER MATERIALS TO CONTAINERS FOR DISPOSAL.

WASTE DISPOSAL METHOD:

SMALL SPILL: DISPOSE OF IN ACCORDANCE WITH ALL LOCAL, STATE AND FEDERAL REGULATIONS.

LARGE SPILL: DISPOSE OF IN ACCORDANCE WITH ALL APPLICABLE LOCAL, STATE AND FEDERAL REGULATIONS.

SECTION VIII

PROTECTIVE EQUIPMENT TO BE USED:

RESPIRATORY PROTECTION: IF WORKPLACE EXPOSURE LIMIT(S) OF PRODUCT OR ANY COMPONENT IS EXCEEDED (SEE SECTION II), A NIOSH/MSHA APPROVED AIR SUPPLIED RESPIRATOR IS ADVISED IN ABSENCE OF PROPER ENVIRONMENTAL CONTROL CONDITIONS (SEE YOUR INDUSTRIAL HYGIENIST). ENGINEERING OR ADMINISTRATIVE CONTROLS SHOULD BE

VENTILATION AND IGNITED BY HEAT, PILOT LIGHTS, OTHER FLAMES AND IGNITION SOURCES AT LOCATIONS DISTANT FROM MATERIAL HANDLING POINT.

NFPA CODES: HEALTH - 1 FLAMMABILITY - 2 REACTIVITY - 0

SECTION V
REACTIVITY DATA:

PRODUCT IS STABLE.
INCOMPATIBILITY (MATERIALS TO AVOID): STRONG OXIDIZING AGENTS.
HAZARDOUS POLYMERIZATION: CANNOT OCCUR

SECTION VI
HEALTH HAZARD DATA:

PERMISSIBLE EXPOSURE LEVEL 100 PPM
THRESHOLD LIMIT VALUE 100 PPM

EFFECTS OF ACUTE OVEREXPOSURE:

EYES - EXPOSURE MAY CAUSE MILD EYE IRRITATION. SYMPTOMS MAY INCLUDE STINGING, TEARING, AND REDNESS.
SKIN - EXPOSURE CAUSES SKIN IRRITATION. PROLONGED OR REPEATED EXPOSURE MAY DRY THE SKIN. SYMPTOMS MAY INCLUDE REDNESS, BURNING, DRYING AND CRACKING. SKIN BURNS AND DAMAGE. PREEXISTING SKIN DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS MATERIAL. SKIN ABSORPTION IS POSSIBLE, BUT HARMFUL EFFECTS ARE NOT EXPECTED FROM THIS ROUTE OF EXPOSURE UNDER NORMAL CONDITIONS OF HANDLING AND USE.

BREATHING - EXPOSURE TO VAPOR OR MIST IS POSSIBLE.
SHORT-TERM INHALATION TOXICITY IS LOW. BREATHING SMALL AMOUNTS DURING NORMAL HANDLING IS NOT LIKELY TO CAUSE HARMFUL EFFECTS; BREATHING LARGE AMOUNTS MAY BE HARMFUL. SYMPTOMS ARE MORE TYPICALLY SEEN AT AIR CONCENTRATIONS EXCEEDING THE RECOMMENDED EXPOSURE LIMITS. SYMPTOMS OF EXPOSURE MAY INCLUDE:
- IRRITATION (NOSE, THROAT, RESPIRATORY TRACT) - PREEXISTING LUNG DISORDERS, E.G. ASTHMA-LIKE CONDITIONS, MAY BE AGGRAVATED BY EXPOSURE TO THIS MATERIAL.
- CENTRAL NERVOUS SYSTEM DEPRESSION (DIZZINESS, WEAKNESS, FATIGUE, NAUSEA, HEADACHE, UNCONSCIOUSNESS)

SWALLOWING - SINGLE DOSE ORAL TOXICITY IS LOW. SWALLOWING SMALL AMOUNTS DURING NORMAL HANDLING IS NOT LIKELY TO CAUSE HARMFUL EFFECTS; SWALLOWING LARGE AMOUNTS MAY BE HARMFUL. SYMPTOMS MAY INCLUDE:
- GASTROINTESTINAL IRRITATION (NAUSEA, VOMITING, DIARRHEA)
- CENTRAL NERVOUS SYSTEM DEPRESSION (DIZZINESS, WEAKNESS, FATIGUE, NAUSEA, HEADACHE, UNCONSCIOUSNESS)

THIS MATERIAL CAN ENTER THE LUNGS DURING SWALLOWING OR VOMITING AND CAUSE LUNG INFLAMMATION AND/OR DAMAGE.

FIRST AID :

IF ON SKIN : REMOVE CONTAMINATED CLOTHING. FLUSH EXPOSED AREAS WITH LARGE AMOUNTS OF WATER. IF SKIN IS DAMAGED, SEEK IMMEDIATE MEDICAL ATTENTION. IF SKIN IS NOT DAMAGED AND SYMPTOMS PERSIST, SEEK MEDICAL ATTENTION. LAUNDER CLOTHING BEFORE REUSE

Packing Density: 11.7 lb.s / gal

Vapor Pressure: N/A

Solubility: Insoluble

Viscosity: 2000 mPas @ 20C

VOC Content: 14.9 grams / liter

10. Stability And Reactivity

Stability: Stable

Hazardous Polymerization: Will not occur

Conditions To Avoid (Stability)

None Known

Incompatible Materials

None Known

Hazardous Decomposition Products

CO, CO₂

11. Toxicological Information

Miscellaneous Toxicological Information

This material releases trace levels of methanol (methyl alcohol) upon moisture curing (less than 1%). Upon completion of the curing process, methanol will no longer be released. According to literature, methanol (CAS No 67-56-1) irritates mucus membranes, has skin drying and narcotic effects up to coma or death. Absorption by the skin is possible.

12. Ecological Information

No Data Available...

13. Disposal Considerations

Dispose in accordance with applicable federal, state and local government regulations. Waste generators must determine whether a discarded material is classified as a hazardous waste. USEPA guidelines for the classification determination are listed in 40 CFR Parts 261.3. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification.

MATERIAL SAFETY DATA SHEET

Sikaflex® 521 UV

4. First Aid Measures

Eye

In case of contact, hold eyelids apart and immediately flush eyes with plenty of tepid water for at least 15 minutes. Get medical attention immediately if irritation develops and persists.

Skin

In case of contact, immediately flush skin with soap and plenty of tepid water for at least 15 minutes. Get medical attention immediately if irritation (redness, rash, blistering) develops and persists.

Ingestion

If swallowed, do not induce vomiting unless directed to do so by medical personnel. Seek medical attention immediately.

Inhalation

Remove to fresh air. If not breathing, give artificial respiration. Seek medical attention immediately.

5. Fire Fighting Measures

Flash Point: >212 °F >96 °C

Flash Point Method: TCC

Autoignition Point: N/AV °F

Lower Explosive Limit: N/AV

Upper Explosive Limit: N/AV

Extinguishing Media

In case of fire, use water spray (fog) foam, dry chemical, or CO₂.

Fire Fighting Instructions

In the event of a fire, firefighters should wear full protective clothing and NIOSH-approved self-contained breathing apparatus with a full facepiece operated in the pressure demand or other positive pressure mode.

6. Accidental Release Measures

Avoid release to the environment. Use appropriate personal protective equipment (PPE). Contain spill and collect with absorbent material and transfer into suitable containers. Ventilate enclosed area.

7. Handling And Storage

Handling And Storage Precautions

Keep containers tightly closed. Keep out of reach of children. Not for internal consumption.

Storage Precautions

Store in a dry place.

Work/Hygienic Practices

Wash thoroughly with soap and water after handling.

8. Exposure Controls/Personal Protection

Engineering Controls

Use with adequate general and local exhaust ventilation. Refer to the current edition of "Industrial Ventilation: A Manual of Recommended Practice" published by the American Conference of Governmental Industrial Hygienists for information on the design, installation, use, and maintenance of exhaust systems.

Eye/Face Protection

Safety glasses with side shields or goggles.

Skin Protection

Chemical-resistant gloves. Lab coat or other work clothing to prevent skin exposure (Long sleeve shirt and long pants). Launder before reuse.

All chemicals in this product are listed, or are exempt from listing, on the TSCA Inventory.

SECTION 16 — OTHER INFORMATION

This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

The above information pertains to this product as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to this product may substantially alter the composition and hazards of the product. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.

CONDITIONS TO AVOID

None known.

INCOMPATIBILITY

None known.

HAZARDOUS DECOMPOSITION PRODUCTS

By fire: Carbon Dioxide, Carbon Monoxide

HAZARDOUS POLYMERIZATION

Will not occur

SECTION 11 — TOXICOLOGICAL INFORMATION

CHRONIC HEALTH HAZARDS

Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

Ethylbenzene is classified by IARC as possibly carcinogenic to humans (2B) based on inadequate evidence in humans and sufficient evidence in laboratory animals. Lifetime inhalation exposure of rats and mice to high ethylbenzene concentrations resulted in increases in certain types of cancer, including kidney tumors in rats and lung and liver tumors in mice. These effects were not observed in animals exposed to lower concentrations. There is no evidence that ethylbenzene causes cancer in humans.

IARC's Monograph No. 93 reports there is sufficient evidence of carcinogenicity in experimental rats exposed to titanium dioxide but inadequate evidence for carcinogenicity in humans and has assigned a Group 2B rating. In addition, the IARC summary concludes, "No significant exposure to titanium dioxide is thought to occur during the use of products in which titanium is bound to other materials, such as paint."

SECTION 4 — FIRST AID MEASURES

- EYES:** Flush eyes with large amounts of water for 15 minutes. Get medical attention.
- SKIN:** Wash affected area thoroughly with soap and water.
Remove contaminated clothing and launder before re-use.
- INHALATION:** If affected, remove from exposure. Restore breathing. Keep warm and quiet.
- INGESTION:** Do not induce vomiting. Get medical attention immediately.

SECTION 5 — FIRE FIGHTING MEASURES

FLASH POINT	LEL	UEL	EXTINGUISHING MEDIA
Propellant < 0° F	0.8	12.8	Carbon Dioxide, Dry Chemical, Foam

UNUSUAL FIRE AND EXPLOSION HAZARDS

Containers may explode when exposed to extreme heat.
Application to hot surfaces requires special precautions.
During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention.

SPECIAL FIRE FIGHTING PROCEDURES

Full protective equipment including self-contained breathing apparatus should be used.
Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

SECTION 6 — ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

- Remove all sources of ignition. Ventilate the area.
- Remove with inert absorbent.

SECTION 7 — HANDLING AND STORAGE

STORAGE CATEGORY

Not Available

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE

Keep away from heat, sparks, and open flame. Vapors will accumulate readily and may ignite explosively.
During use and until all vapors are gone: Keep area ventilated - Do not smoke - Extinguish all flames, pilot lights, and heaters - Turn off stoves, electric tools and appliances, and any other sources of ignition.
Consult NFPA Code. Use approved Bonding and Grounding procedures.
Contents under pressure. Do not puncture, incinerate, or expose to temperature above 120F. Heat from sunlight, radiators, stoves, hot water, and other heat sources could cause container to burst. Do not take internally. Keep out of the reach of children.

SECTION 8 — EXPOSURE CONTROLS/PERSONAL PROTECTION

PRECAUTIONS TO BE TAKEN IN USE

Use only with adequate ventilation.
Avoid contact with skin and eyes. Avoid breathing vapor and spray mist.
Wash hands after using.

This coating may contain materials classified as nuisance particulates (listed "as Dust" in Section 2) which may be present at hazardous levels only during sanding or abrading of the dried film. If no specific dusts are listed in Section 2, the applicable limits for nuisance dusts are ACGIH TLV 10 mg/m³ (total dust), 3 mg/m³ (respirable fraction), OSHA PEL 15 mg/m³ (total dust), 5 mg/m³ (respirable fraction).

VENTILATION

Local exhaust preferable. General exhaust acceptable if the exposure to materials in Section 2 is maintained below applicable exposure limits.
Refer to OSHA Standards 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION

If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly fitted organic vapor/particulate respirator approved by NIOSH/MSHA for protection against materials in Section 2.
When sanding or abrading the dried film, wear a dust/mist respirator approved by NIOSH/MSHA for dust which may be generated from this product, underlying paint, or the abrasive.

PROTECTIVE GLOVES

None required for normal application of aerosol products where minimal skin contact is expected. For long or repeated contact, wear chemical resistant gloves.

EYE PROTECTION

Wear safety spectacles with unperforated sideshields.

OTHER PRECAUTIONS

Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

SECTION 2 — COMPOSITION/INFORMATION ON INGREDIENTS

SECTION 3 — HAZARDS IDENTIFICATION

ROUTES OF EXPOSURE

INHALATION of vapor or spray mist.
EYE or SKIN contact with the product, vapor or spray mist.

EFFECTS OF OVEREXPOSURE

EYES: Irritation.

SKIN: Prolonged or repeated exposure may cause irritation.

INHALATION: Irritation of the upper respiratory system.

May cause nervous system depression. Extreme overexposure may result in unconsciousness and possibly death.

Prolonged overexposure to solvent ingredients in Section 2 may cause adverse effects to the liver, urinary, cardiovascular and reproductive systems.

SIGNS AND SYMPTOMS OF OVEREXPOSURE

Headache, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mists.

Redness and itching or burning sensation may indicate eye or excessive skin exposure.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

None generally recognized.

CANCER INFORMATION

For complete discussion of toxicology data refer to Section 11.

2. Composition

Product	Ingredients				
	Non-Hazardous Ingredients % (w/w)	Respirable Silica (10µm particle size) % (w/w)	Exposure Limits/ACGIH ¹	LD ₅₀	LC ₅₀
Glass Abrasive	100	None	TLV-TWA: 10 mg/m ³ for nuisance dust	Not applicable	Not applicable
Vitro Grit	100	None	As above	Not applicable	Not applicable

¹ American Conference of Governmental Industrial Hygienists (ACGIH). Exposure limits may vary from time to time and from one jurisdiction to another. Check with local regulatory agency for the exposure limits in your area.

3. Hazards Identification

Routes of Entry:

Skin Absorption: No
Skin Contact: No
Eye Contact: Yes
Ingestion: No
Inhalation: Yes

Emergency Overview:

This product is manufactured from used, washed glass and contains no hazardous chemicals. Since the product consists of crushed/broken glass, there are physical hazards to be concerned with. See Section 7 for details on handling.

Target Products

When abrasive blasting, the abrasive is being used to remove and clean a surface. The substance that has been removed may contain materials that represent health hazards that cannot be addressed in the Material Safety Data Sheet. The employer must ensure that a risk assessment is done before any abrasive blasting activity which may cause release of a harmful level of an air contaminant from a surface or coating containing a toxic heavy metal or asbestos. This blasting abrasive must NOT be reused unless it is being used in a fully enclosed, vented cabinet designed to recirculate the abrasive material.

Acute Health Effects:

Inhalation:

Inhalation of glass particles may cause irritation to the upper respiratory tract. Exposure may cause sore throat, coughing, sneezing, and the production of phlegm in the throat. Nosebleeds may occur in cases of those with sensitive nose membranes due to abrasion of sensitive tissue.

Skin Contact:

This product is mildly abrasive to skin, but may aggravate tender skin causing rash, cuts or sores.

Skin Absorption:

Not applicable

Eye Contact:

Contact with the eye will cause tearing and irritation from the "foreign" object in the eye. Rubbing of the eye may cause abrasion of the cornea.

Ingestion:

No evidence of ill effects from ingestion of this product.

Chronic Health Effects:

The employer must determine the chronic effects of the contaminants which may result from the cleaning/blasting process. Prolonged contact with sand by sensitive skin may result in skin redness, rash and sores.

Medical Conditions Aggravated by Exposure:

Respiratory problems may be aggravated by pre-existing lung disease such as bronchitis, emphysema, or chronic obstructive pulmonary disease.

4. First Aid Measures

Inhalation:

If irritation causes coughing or phlegm, remove to fresh air. Call for medical assistance if coughing doesn't subside.

Skin Contact:

Wash affected area thoroughly. If irritation persists, seek medical attention.

Eye Contact:

Immediately and thoroughly flush eyes with water until the foreign object is flushed out of the eye. If irritation, pain, swelling, or lacrimation exists, get medical attention as soon as possible.

Target Products

Ingestion:

Ingestion of particulate is not considered to be injurious to health. Give fluids to aid in the passing of the product through the digestive system. Do not give anything by mouth to a convulsing or unconscious person. If patient shows discomfort, get immediate medical attention..

General Comments:

Good personal hygiene is essential. Avoid eating, smoking or drinking in work areas.

5. Fire Fighting Measures

Flammability: No

Flash Point: Not applicable

Autoignition Temperature: Not applicable

Lower Explosive Limit: Not applicable

Upper Explosive Limit: Not applicable

Explosion Data:

Sensitivity to Impact: No

Sensitivity to Static Discharge: No

Hazardous Combustion Products: None known

Conditions to Avoid: None

Extinguishing Media: These materials are not flammable and will not contribute to a conflagration.

Fire Fighting Instructions: Evacuate area and fight fire from a safe distance or a protected area. Firefighters must wear self-contained breathing apparatus and full protective clothing.

6. Accidental Release Measures

Personal Protection:

Wear adequate personal protection to prevent inhalation of dusts, contact with skin or eyes. See Section 8 for specific recommendations.

Environmental Precautions:

Prevent from spilling into waterways, sewers.

Cleanup Procedures:

Restrict access to area until completion of cleanup. Only adequately trained personnel, wearing properly selected personal protective equipment and clothing described in Section 8, should be involved in the spill response and cleanup.

7. Handling and Storage

Handling Procedures:

Handle bags in a manner that will ensure minimal generation of dusts. Do not breathe dust, which may generate accidentally. Follow safe work procedures and wear the appropriate personal protective equipment specified in Section 8. The workers must be instructed and trained in the safe work procedures.

Do not rely on sight to determine if dust is in the air. Contaminants may be in the air without a visible dust cloud. If dust cannot be kept below permissible limits, wear a high efficiency respirator approved for abrasive dust.

Used abrasive blasting materials must be removed from the work area at the end of the work shift and dust collection must be used to minimize airborne contaminant. Used abrasive blasting materials must not be dry-swept.

The operating controls for a sandblasting machine or jetting gun must be located near the nozzle in a position where the operator's hands will be when using the device.

Storage:

Store away from incompatible materials. See Section 10.

8. Exposure Controls, Personal Protection

Engineering Controls:

Engineering controls such as an enclosure or local exhaust ventilation with dust collection must be used to maintain airborne contaminations levels below the exposure limits, where practicable.

When an abrasive blasting operation is conducted inside an enclosure or cabinet, the enclosure or cabinet must have exhaust ventilation that maintains air pressure below the air pressure outside the enclosure or cabinet, so as to prevent the escape of air contaminants to other work areas, and minimize worker exposure inside the enclosure.

When abrasive blasting is conducted outside a structure, the process must be restricted to a work zone which is identified by signs or similar means as being contaminated. Only properly protected workers, who are necessary to perform the work, are permitted inside an enclosure or a restricted work zone where abrasive blasting is being conducted.

The operating controls for a abrasive blasting machine or jetting gun must be located near the nozzle in a position where the operator's hands will be when using the device.

Respiratory Protection:

Respirators must be NIOSH approved and properly selected, maintained and used when working with this product. Knowledge of respiratory hazards and respiratory protection is essential to ensure appropriate selection of respirators. Use an approved high efficiency NIOSH dust respirator with a minimum N95 rating. In selecting the appropriate respirator must reflect the contaminant likely to be present in the spent product.

Skin Protection:

Wear clothing to prevent contact with skin.

Eye and Face Protection:

Wear safety glasses to prevent contact with eyes and make immediately available appropriate emergency eye washing equipment (e.g. portable or plumbed) capable of flushing the eyes for at least 15 minutes.

9. Physical and Chemical Properties

	Physical State	Appearance	Odour	Odour Threshold	pH (supernatant)	Vapour Pressure	Vapour Density (Air=1)	Solubility in water	Melting Point	Boiling Point	Specific Gravity (Water=1)	Coefficient of water/oil Distribution	Evaporation Rate (Butyl Acetate=1)
Glass Abrasive	Solid	Clear, green or brown granules	None	None	N. App	N. App	N. App	No	> 1095 °C	> 1095 °C	2.3	N. App	N. App
Vitrogrit	Solid	Transparent or coloured particles	None	None	N. App	N. App	N. App	No	N. Est.	N. Est.	2.5	N. App	N. App

10. Stability and Reactivity

Chemical Stability: This product is stable.

Hazardous Polymerization: Will not occur.

Incompatibility: Yes. Product will react with hydrogen fluoride.

Reactivity: Product components may react with mineral acids such as hydrofluoric acid to produce a corrosive gas, silicon tetrafluoride.

Hazardous Decomposition Products: None

11. Toxicological Information

Effects of Acute Exposure: See Section 3

Effects of Chronic Exposure: See Section 3

Irritancy: Yes. See Section 3.

Skin Sensitization: None reported

Respiratory Sensitization: None reported

Neurotoxicity: No

Carcinogenicity: No

Embryotoxicity: No

Teratogenicity: No

Reproductive Toxicity: No

Mutagenicity: No

Synergistic Products: None reported

12. Ecological Information

Environmental Toxicity: No environmental impact for uncontaminated sand. Determination of sandblasting contamination is required to determine environmental impact.

Biodegradability: No

13. Disposal Considerations

Review federal, provincial or state, and local government requirements prior to disposal. Store material for disposal as indicated in storage conditions. Disposal by controlled incineration may be acceptable.

14. Transport Information

Canadian Transportation of Dangerous Goods Regulations: Not regulated

International Air Transport Association (IATA): Not regulated

International Maritime Organization (IMO): Not regulated

15. Regulatory Information

CANADIAN FEDERAL REGULATIONS:

CEPA, DOMESTIC SUBSTANCES LIST: Listed

WHMIS CLASSIFICATION: Not a WHMIS controlled product.

16. Other Information

Original Preparation Date: July 05, 2005

Prepared by: Kel-Ex Agencies Ltd., P.O. Box 52201, Lynnmour RPO, North Vancouver, BC, Canada, V7J 3V5

Disclaimer: This Material Safety Data Sheet was prepared in accordance with criteria and requirements of the Hazardous Products Act and the Controlled Products Regulations using information provided by the manufacturer and other sources including CCINFO (Chemical Information published by the Canadian Centre for Occupational Health and Safety). The information in the Material Safety Data Sheet is offered for your consideration and guidance when exposed to this product. Material Safety Data Sheet

Section I. PRODUCT INFORMATION			
Product Name: VitroGrit™	CAS No. 65997-17-3	Chemical Name: Soda-Lime Silicon Dioxide Glass	
Description: Sand manufactured from recycled glass		DOT Identification: Not regulated by DOT	
Section II. HAZARDOUS INGREDIENTS			
Glass sand is not classified as a hazardous material by the criteria of the OSHA Hazard Communication Standard, Title 29, Code of Federal Regulations, Section 1910.1200, <i>Hazard Communication</i> .			
Contains no free (or crystalline) silica; all components are amorphous/non-crystalline			
Nuisance Dust concern only			
Section III. PHYSICAL DATA			
Boiling Point (°F): N/A	Solubility in Water: Insoluble	Specific Gravity: 2.5	
Vapor Pressure: N/A	Evaporation Rate: N/A	% Volatile by Volume: N/A	
Vapor Density: N/A	Appearance & Odor: Odorless, transparent or colored particulate		
Section IV. FIRE & EXPLOSION DATA			
Non-flammable & non-hazardous inorganic material			
Section V. REACTIVITY DATA			
Stability: Material is stable	Hazardous Polymerization: Will not occur		
Materials to Avoid: Hydrofluoric Acid	Hazardous Decomposition Products: None		
Section VI. HEALTH HAZARD DATA			
Nuisance Dust (total): 10 mg/m ³ TLV (units) depends upon particle size			
Nuisance Dust (Respirable): 5 mg/m ³ TLV (units) depends upon particle size			
Routes of Entry:	Lungs (breathing): Yes	Ingestion: No	Skin: No
Health Hazard (Acute & Chronic): Dust in excess of recommended exposure limits may result in irritation to the respiratory tract.			
Carcinogenicity	NTP Not Listed	IARC Monographs: Not Listed	OSHA Regulation: Not Listed
Signs & Symptoms of Exposure: Eye and respiratory irritation may result if recommended exposure limits are exceeded.			
Medical Conditions Generally Aggravated by Exposure: Chronic lung conditions may be aggravated by exposure to high concentrations of dust.			
Emergency & First Aid Procedures: Eyes: Flush thoroughly with water. See a physician if discomfort persists. Respiratory: Remove to fresh air			
Section VII. PRECAUTIONS FOR SAFE HANDLING & USE			
Steps to be taken in case of material spill: Sweep up and discard; avoid excessive dusting			
Waste Disposal Method: Dispose in approved landfill in accordance with federal, state and local regulations.			
Precautions for handling & storing: Spillage may result in slippery conditions. When transferring material, care should be taken to avoid dusting.			
This material is not a SARA Title III reportable substance.			
Section VIII. CONTROL MEASURES			
Respiratory protection: If dust concentrations exceed recommended Permissible Exposure Limits, use NIOSH-approved respirators			
Ventilation: Local exhaust	Protective Gloves: None		
Eye Protection: NIOSH-approved safety glasses or goggles (tight fitting recommended)			
Other Protective Clothing or Equipment: None required.			

Abbreviations:

N/A - Not Applicable
mg/m³ - milligrams per cubic meter
TLV - threshold limit value
NIOSH - National Institute of Safety and Health

THIS PRODUCT CONTAINS ONE OR MORE MATERIALS SUBJECT TO THE REPORTING REQUIREMENTS OF SECTION 313 OF THE EMERGENCY PLANNING AND THE COMMUNITY RIGHT-TO-KNOW ACTS OF 1986 AND OF 40 CFR 372.

N.A. - NOT APPLICABLE

SECTION III - PHYSICAL DATA

BOILING RANGE	: 148-410 F	VAPOR DENSITY	: IS HEAVIER THAN AIR
ODOR	: CHARACTERISTIC	EVAPORATION RATE:	: IS SLOWER THAN ETHER
APPEARANCE	:	SOLUBILITY	: NOT APPLICABLE
VOLATILE BY WEIGHT:	33.8%	PRODUCT DENSITY	: 10.1 LBS./GAL. (U.S.)
VOLATILE BY VOLUME:	46.7%		

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION:

OSHA - FLAMMABLE LIQUID - CLASS IC
 DOT - FLAMMABLE LIQUID OR SOLID

FLASH POINT: 80 F
 (SETAFLASH CLOSED CUP)

LEL: 0.6 %
 UEL: 36.6 %

EXTINGUISHING MEDIA: CARBON DIOXIDE DRY CHEMICAL FOAM ALCOHOL FOAM

UNUSUAL FIRE AND EXPLOSION HAZARDS: EXTREMELY FLAMMABLE! VAPORS FORM AN EXPLOSIVE MIXTURE. CLOSED CONTAINERS MAY EXPLODE IF EXPOSED TO EXTREME HEAT. KEEP CONTAINERS CLOSED AND ISOLATED FROM HEAT, SPARKS AND OPEN FLAME.

SPECIAL FIREFIGHTING PROCEDURES: DO NOT ENTER FIRE AREA WITHOUT N.I.O.S.H. APPROVED SELF-CONTAINED BREATHING APPARATUS AND PROTECTIVE CLOTHING TO PREVENT CONTACT WITH SKIN AND EYES. WATER FOG SHOULD BE USED TO COOL CLOSED CONTAINERS TO PREVENT PRESSURE BUILD-UP AND POSSIBLE AUTOIGNITION OR EXPLOSION. AVOID SPREADING BURNING LIQUID WITH WATER USED FOR COOLING PURPOSES. DO NOT CONTAMINATE STREAMS AND WATERWAYS WITH WATER USED FOR FIREFIGHTING PURPOSES.

SECTION V - HEALTH HAZARD DATA

EFFECTS OF OVER EXPOSURE: INHALATION : VAPORS MAY BE IRRITATING TO THE NOSE, THROAT AND RESPIRATORY TRACT. SKIN CONTACT : POSSIBLE PRIMARY IRRITATION. BUTANOL VAPORS CAN CAUSE SPECIFIC INJURY TO THE CORNEA. BUTANOL IS ESPECIALLY TOXIC IF ASPIRATED. XYLENE CAUSES TO THE FETUS IN LABORATORY ANIMAL STUDIES. EYE CONTACT : CAUSES SEVERE IRRITATION. CONTACT: PRIMARY IRRITATION. REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN DAMAGE NERVOUS SYSTEM DAMAGE AND POSSIBLE CANCER HAZARD. INHALATION OF VAPORS MAY BE HARMFUL!! MAY CAUSE LIVER, KIDNEY, AND OR BLOOD EFFECTS.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE: NONE RECOGNIZED.

PRIMARY ROUTE(S) OF ENTRY: DERMAL INHALATION

EMERGENCY AND FIRST AID PROCEDURES: INHALATION : REMOVE VICTIM TO FRESH AIR AND GIVE OXYGEN IF BREATHING IS DIFFICULT. GIVE ARTIFICIAL RESPIRATION IF VICTIM IS NOT BREATHING. GET MEDICAL ATTENTION. SKIN CONTACT : REMOVE CONTAMINATED CLOTHING AND SHOES. WASH SKIN WITH SOAP AND WATER. IF IRRITATION OR REDNESS DEVELOPES AND PERSISTS, SEEK MEDICAL ATTENTION. DO NOT REUSE CLOTHING UNTIL CLEANED. EYE CONTACT : FLUSH EYES WITH LOW PRESSURE WATER FOR 15 MINUTES WHILE HOLDING EYELIDS OPEN. GET MEDICAL ATTENTION. INGESTION : NO HARMFUL EFFECTS EXPECTED.

SECTION VI - REACTIVITY DATA

STABILITY: THIS PRODUCT IS STABLE UNDER NORMAL STORAGE CONDITIONS.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR UNDER NORMAL CONDITIONS.

HAZARDOUS DECOMPOSITION PRODUCTS: MAY PRODUCE HAZARDOUS FUMES WHEN SUBJECT TO THERMAL DECOMPOSITION. FUMES MAY CONTAIN SOOT, SMOKE, CARBON DIOXIDE AND/OR CARBON MONOXIDE.

CONDITIONS TO AVOID: ELEVATED STORAGE TEMPERATURE AND INADEQUATE VENTILATION.

SECTION VI - REACTIVITY DATA

INCOMPATABILITY: STRONG OXIDIZING AGENTS

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: AVOID BREATHING VAPOR. REMOVE ALL SOURCES OF IGNITION (FLAMES/HOT SURFACES/ELECTRICAL, STATIC OR FRICTIONAL SPARKS). ENSURE ADEQUATE VENTILATION. SHUT OFF LEAK IF IT CAN BE DONE SAFELY. USE SAND OR EARTH DIKES TO CONTAIN THE SPILL. SPREAD INERT ABSORBENT ON SPILL AREA AND REMOVE TO A METAL CONTAINER USING NON-SPARKING TOOLS. SEAL CONTAINER USING NON-SPARKING TOOLS.

WASTE DISPOSAL METHOD: DISPOSE OF WASTE IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL REGULATIONS. DO NOT INCINERATE CLOSED CONTAINERS.

SECTION VIII - SAFE HANDLING AND USE INFORMATION

RESPIRATORY PROTECTION: N.I.O.S.H/O.S.H.A. APPROVED RESPIRATOR SUITABLE FOR MATERIALS LISTED IN SECTION II RECOMMENDED.

VENTILATION: SUFFICIENT VENTILATION, IN VOLUME AND PATTERN, SHOULD BE PROVIDED TO KEEP TLV OF MATERIALS LISTED IN SECTION II BELOW ACCEPTABLE LIMITS AND L.E.L. IN SECTION IV BELOW STATED LIMIT.

TECTIVE GLOVES: GLOVES REQUIRED FOR PROLONGED OR REPEATED CONTACT.

EYE PROTECTION: USE SAFETY EYEWEAR DESIGNED TO PROTECT AGAINST SPLASH OF LIQUID.

OTHER PROTECTIVE EQUIPMENT: CLOTHING ADEQUATE TO PROTECT SKIN REQUIRED. CONVENIENT EGRESS TO EYE BATH AND SAFETY SHOWER RECOMMENDED.

HYGENIC PRACTICES: WASH HANDS BEFORE EATING OR SMOKING. SMOKE ONLY IN DESIGNATED AREAS.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: AVOID PROLONGED OR REPEATED CONTACT WITH SKIN OR BREATHING OF VAPORS. STORE IN A COOL DRY AREA WITH VENTILATION SUITABLE FOR MATERIALS LISTED IN SECTION II.

OTHER PRECAUTIONS:

SECTION 1 - PRODUCT IDENTIFICATION AND USE

Product Identifier SEASTAR STEERING FLUID		Product Identification Number (PIN): N.Ap.	
Product Use High VI, ISO 15 Hydraulic Oil			
Manufacturer's Name: Teleflex Canada		Supplier's Name: Teleflex Canada	
Street Address: 3831 No. 6 Road		Street Address: 3831 No. 6 Road	
City: Richmond	Province: B.C.	City: Richmond	Province: B.C.
Postal Code: V6V 1P6	Emergency Telephone Number: (604) 270-6899	Postal Code: V6V 1P6	Emergency Telephone Number: (604) 270-6899

SECTION 2 - HAZARDOUS INGREDIENTS

Hazardous Ingredients	% (wt/wt)	CAS Number	LD50 of Ingredient <i>(specify species & route)</i>	LC50 of Ingredient <i>(specify species & route)</i>
Not a controlled product according to WHMIS regulations, I.A.T.A. regulations, D.O.T. regulations or M.O.T. (T.D.G.) regulations				

SECTION 3 - PHYSICAL DATA

Physical State Liquid	Odour & Appearance Clear yellow oil with a faint odour		Odour Threshold (ppm) N.Av.	
Vapour Pressure <i>(mmHg):</i> N.Av.	Vapour Density <i>(air=1):</i> N.Av.	Evaporation Rate N.Ap.	Boiling Point (°C) > 200	Freezing Point (°C) - 41 (pour point)
pH N.Ap.	Specific Gravity 0.847 @ 15.6°C		Coeff. Water/Oil Dist.: < 1	

SECTION 4 - FIRE & EXPLOSION DATA

Flammability: No	If yes, under which conditions?			
Means of extinction: Carbon dioxide, foam, dry chemical, halon				
Flashpoint (°C) and Method: 110 (COC)		Hazardous Combustion Products: Oxides of carbon, smoke and hydrocarbons		
Autoignition Temperature (°C): N.Av.		Upper Flammable Limit <i>(% by volume):</i> N.Av.	Lower Flammable Limit <i>(% by volume):</i> N.Av.	
Explosion Data		Sensitivity to impact: None known		Sensitivity to Static Discharge: None known

SECTION 5 - REACTIVITY DATA

Chemical Stability: Yes	If no, under which conditions?			
Incompatibility with other substances: Yes		If so, which ones? Strong oxidizing agents		
Reactivity, & under what conditions? None known				
Hazardous Decomposition Products? None known				

N. Av. = Not Available

N. Ap. = Not Applicable

Product Identifier SEASTAR STEERING FLUID

SECTION 6 - TOXICOLOGICAL PROPERTIES

Route of entry:
Skin contact () Skin Absorption () Eye contact () Inhalation () Ingestion ()

Effects of Acute Exposure to Product:
None known

Effects of Chronic Exposure to Product:
None known

Exposure Limits: ACGIH-TLV for oil mists(TWA) 5mg/m3 [1mg/m3 in BC]	Irritancy of Product: None known	Sensitization to Product: None known	Carcinogenicity: None known
--	--	--	---------------------------------------

Teratogenicity: None known	Reproductive Toxicity: None known	Mutagenicity: None known	Synergistic Products: None known
--------------------------------------	---	------------------------------------	--

SECTION 7 - PREVENTIVE MEASURES

Personal Protective Equipment:

Gloves (specify): Rubber/viton if handling	Respirator (specify): Not normally required	Eye (specify): CSA-approved safety glasses
--	---	--

Footwear (specify): Normal non-slip industrial footwear	Clothing (specify): Coveralls are normally sufficient	Other (specify): N.Ap.
---	---	----------------------------------

Engineering Controls (specify, eg. ventilation, enclosed process):
Maintain oil mists in air below exposure limit by process design, enclosure, ventilation or local extraction.

Leak and Spill Procedure:
Prevent from entering water system. Mop up, soak up, or contain in a closed vessel.

Waste Disposal: Send to a licensed reclaimer/waste disposal facility, incinerate or landfill to meet federal, provincial, state and local regulations.

Handling Procedures and Equipment:
Keep away from incompatible substances. Do not take internally. Avoid contact with skin and eyes.

Storage Requirements:
Store in a tightly closed container.

Special Shipping Requirements: TDG: Not regulated.	HMIS Rating Health - 1; Flammability - 1; Reactivity - 0
--	--

SECTION 8 - FIRST AID MEASURES

Specific measures:

EYES: Wash with water for 15 minutes. Consult a doctor if irritation persists.

SKIN: Wash with soap and water.

INGESTION: Do not induce vomiting. Call a physician.

INHALATION: Product is not volatile in form supplied. Remove person to fresh air.

SECTION 9 - PREPARATION DATE OF MSDS

"C" STANDARD

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION: OSHA: IA FLASH POINT: 0° F (-10° C) TCC
(EXTREMELY FLAMMABLE) UNIFORM FIRE CODE: LEVEL 3 AEROSOL (Propellant = -100° F)
EXTINGUISHING MEDIA: ALCOHOL FOAM, CO₂, DRY CHEMICAL LEL 1.0

UNUSUAL FIRE AND EXPLOSION HAZARDS:
Closed containers may explode and/or autoignite when exposed to extreme heat, vapors are heavier than air and may travel along the ground or may be moved by ventilation and ignited by pilot lights, other flames, sparks, heaters, smoking, electric motors or other locations distant from material handling point.

SPECIAL FIRE FIGHTING PROCEDURES:
Water spray may be ineffective. Water may be used to cool closed containers to prevent pressure build and possible autoignition or explosion when exposed to extreme heat. If water is used, fog nozzles are preferable over solid stream. Self-contained breathing apparatus with full face piece operated in pressure demand or other positive pressure mode.

SECTION V - HEALTH HAZARD DATA

ROUTE(S) OF ENTRY: INHALATION SKIN INGESTION EYES
CARCINOGENICITY: NTP IARC OSHA
Ingredients for product(s) listed in Section I are not found in these agencies list.

SYMPTOMS OF OVEREXPOSURE:

ACUTE: BREATHING - EXCESSIVE INHALATION OF VAPORS CAN CAUSE NASAL AND RESPIRATORY IRRITATION, DIZZINESS, WEAKNESS, FATIGUE, NAUSEA, HEADACHE, POSSIBLE UNCONSCIOUSNESS AND EVEN ASPHYXIATION.
EYE CONTACT - CAN CAUSE SEVERE IRRITATION, REDNESS, TEARING, BLURRED VISION.
SWALLOWING - CAN CAUSE GASTROINTESTINAL IRRITATION, NAUSEA, VOMITING, DIARRHEA.
SKIN CONTACT - CAN CAUSE IRRITATION FOR SOME PERSONS.

CHRONIC: None known for product(s) in Section I.

REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE, SEVERE OVEREXPOSURE IN LABORATORY ANIMALS HAS ALSO CAUSED LIVER ABNORMALITIES AND DAMAGE TO KIDNEYS, LUNGS, AND SPLEEN, HEART AND ADRENALS. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL.

MEDICAL CONDITIONS: Generally Aggravated By Exposure - Can cause respiratory and/or skin reaction.

FIRST AID:

EMERGENCY PROCEDURES: 1. IF BREATHED - REMOVE INDIVIDUAL TO FRESH AIR. IF BREATHING IS DIFFICULT, ADMINISTER OXYGEN. IF BREATHING IS STOPPED, GIVE ARTIFICIAL RESPIRATION AND SEEK MEDICAL HELP.
2. IF IN EYES - FLUSH WITH WATER FOR 15 MINUTES WHILE HOLDING EYELIDS OPEN.
3. IF SWALLOWED - DO NOT INDUCE VOMITING (ASPIRATION OF MATERIAL INTO LUNGS CAN CAUSE PNEUMONIC, WHICH CAN BE FATAL). KEEP PERSON WARM, QUIET AND GET MEDICAL ATTENTION / POISON CONTROL CENTER.
4. IF ON SKIN - WASH WITH SOAP AND WATER OR VARIOUS HAND CLEANERS, AND WASH CLOTHING.

SECTION VI - REACTIVITY DATA

STABILITY: UNSTABLE STABLE HAZARDOUS POLYMERIZATION: MAY OCCUR WILL NOT OCCUR
CONDITIONS TO AVOID: Heat, Sparks and open flame.
INCOMPATIBILITY (Materials to avoid): Avoid contact with strong oxidizing agents and heat.
HAZARDOUS DECOMPOSITION: May form toxic materials, carbon dioxide / carbon monoxide, various hydrocarbons, nitrogen compounds, etc., when burned.
CONDITIONS TO AVOID: Not applicable.

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
ELIMINATE ALL IGNITION SOURCES, VENTILATE AREA, ABSORB LIQUID ON PAPER, VERMICULITE, FLOOR ABSORBENT, OR OTHER ABSORBENT MATERIAL AND TRANSFER TO A CLOSED CONTAINER.

WASTE DISPOSAL METHOD: MATERIAL COLLECTED ON ABSORBENT MATERIAL MAY BE DEPOSITED IN A POSTED TOXIC SUBSTANCE LANDFILL IN ACCORDANCE WITH LOCAL, STATE, AND FEDERAL REGULATIONS.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: DO NOT PUNCTURE OR INCINERATE. DO NOT STORE IN AREAS ABOVE 120° F, OR IN DIRECT SUNLIGHT, OR NEAR HEAT OR OPEN FLAMES.

OTHER PRECAUTIONS: NONE.

STORAGE CATEGORY: STORE LARGE QUANTITIES IN BUILDING PROTECTED FOR STORAGE OF FLAMMABLE LIQUIDS.

SECTION VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION: FOR CASUAL / OCCASIONAL USE - TO AVOID BREATHING VAPORS OR SPRAY MIST, OPEN WINDOWS AND DOORS OR USE OTHER MEANS TO ENSURE FRESH AIR ENTRY DURING APPLICATION AND DRYING. IF YOU EXPERIENCE EYE WATERING, HEADACHE, OR DIZZINESS, INCREASE FRESH AIR, WEAR RESPIRATORY PROTECTION (NIOSH/MSHA TC23C OR EQUIVALENT), OR LEAVE THE AREA.

VENTILATION: FOR REGULAR / CONTINUOUS USE - PROVIDE SUFFICIENT MECHANICAL (GENERAL) AND/OR LOCAL EXHAUST VENTILATION TO MAINTAIN EXPOSURE BELOW TLV'S IN SECTION I.

PROTECTIVE GLOVES: WEAR CHEMICAL RESISTANT GLOVES, SUCH AS NEOPRENE, IF SKIN CONTACT IS TO BE AVOIDED.

EYE PROTECTION: CHEMICAL SPLASH GOGGLES, IN COMPLIANCE WITH OSHA REGULATIONS, ARE ADVISED.

OTHER EQUIPMENT: WHERE SPECIAL OR UNUSUAL CONDITIONS EXIST, SEEK THE EXPERT ASSISTANCE OF AN INDUSTRIAL HYGIENIST.

WORK/HYGIENE PRACTICES: WASH HANDS BEFORE EATING OR USING WASHROOM. AS WITH ALL CHEMICALS, MINIMIZE PERSONAL CONTACT.

THE INFORMATION CONTAINED ABOVE IS BELIEVED TO BE ACCURATE, BUT IS NOT WARRANTED. RECIPIENTS ARE ADVISED TO CONFIRM IN ADVANCE OF NEED THAT THE INFORMATION IS CURRENT, APPLICABLE, AND SUITABLE TO CIRCUMSTANCES.

MSDS SHEET PREPARED BY:

DATE:

REC'D MAR 17 1992

THE MARVEL OIL COMPANY, INC.
331 North Main Street
Port Chester, New York, 10573
914-937-4000

MATERIAL SAFETY DATA SHEET

PRODUCT NAME: Marvel Air Tool Oil
REVISION DATE: June 1, 1991
TRANSPORTATION EMERGENCY NO. 914-937-4000
CHEMICAL NAME: Fuel and Oil additive
NFPA CODE: HEALTH-1, FLAMMABILITY-1, REACTIVITY-0 CAS NO. N/A MIXTURE
HMIS CODE: HEALTH-1, FLAMMABILITY-1, REACTIVITY-0

SECTION 1-HAZARDOUS INGREDIENTS

Solvents-Mineral Spirits-30%-CAS # 64742 47-8
Naphthenic base oil distillate-67%-CAS # 64741 96-4 64742 63-8
OSHA-ACGIH see section 4 - Exposure limit 5 mg/m3

SECTION 2-PHYSICAL DATA

Vapor pressure: 2mm Hg. @ 68 Boiling Point: -313 F
Specific gravity: .9 Viscosity 100 F 58.5 SSU
Water solubility: negligible Viscosity 210 F 35.0 SSU
Percent volatile: not determined Pour Point -60 F
Vapor density: not determined
Evaporation rate: not determined
Odor: Mild
Appearance: red color liquid

SECTION 3-FIRE AND EXPLOSION DATA

Flash point: 140 F
Upper flammable limit: not determined
Lower flammable limit: not determined
Extinguishing media: CO2, dry chemical, foam, water spray, water fog.
Unusual fire & explosion hazards: do not store or mix with strong oxidants

SECTION 4-HEALTH HAZARD /ROUTES OF ENTRY

Eye irritation: mild
Skin irritation: One or more components of this material may cause skin irritation. Prolonged or repeated contact may cause redness, burning and drying and cracking of the skin.
Ingestion: Pulmonary aspiration hazard if swallowed. Do Not Induce Vomiting.
Exposure limits: Threshold Limit Value (TLV) = 5 mg/m3 as a mist.
COMMENT: This material is not known to contain any chemical listed as a carcinogen or suspected carcinogen by IARC or the National Toxicology Program (NTP). In accordance with the current OSHA Hazard Communication Standard criteria, this product does not require a cancer hazard warning.

SECTION 5-EMERGENCY FIRST AID PROCEDURES

Eye: flush with water until irritation subsides
Skin: wash with soap and water
Oral: do not induce vomiting, give milk or water to dilute stomach contents

SECTION 6-STABILITY

Stability: stable
Incompatibility: oxidizing agents
Polymerization: will not occur

SECTION 7-SPILL OR LEAK PROCEDURES

Spill procedures: recover free liquid, add absorbent to spill area.
Waste disposal: keep product out of sewers and watercourses
disposal should be in compliance with federal,
state and local laws

SECTION 8-SPECIAL PROTECTION

Ventilation: mechanical ventilation as needed
Gloves: use chemical resistant gloves if needed to avoid prolonged
or repeated skin contact
Eye protection: product minimally irritating to eyes, use safety
glasses when eye contact may occur
Other: use chemical resistant apron or other impervious clothing
if needed to avoid prolonged or repeated skin contact

SECTION 9-SPECIAL PRECAUTIONS

Keep away from heat and open flame, contains refined petroleum
distillates, if swallowed do not induce vomiting, if ingested
call physician immediately

SECTION 10-TRANSPORTATION INFORMATION

DOT shipping name: petroleum lubricating oil
DOT hazard class: combustible liquid
DOT ID number: NA 1270
UN ID number 1270
NMFC ID number: 155250

ALL INFORMATION, RECOMMENDATIONS, AND SUGGESTIONS APPEARING HEREIN
CONCERNING THIS PRODUCT ARE BASED UPON DATA OBTAINED FROM THE
MANUFACTURER AND/OR RECOGNIZED TECHNICAL SOURCES; HOWEVER, MARVEL
OIL COMPANY, INC. MAKES NO WARRANTY, REPRESENTATION OR GUARANTEE
AS TO THE ACCURACY, SUFFICIENCY OR COMPLETENESS OF THE MATERIAL SET
FORTH HEREIN. IT IS THE USER'S RESPONSIBILITY TO DETERMINE THE SAFETY,
TOXICITY AND SUITABILITY OF HIS OWN USE, HANDLING AND DISPOSAL OF THE
PRODUCT. ADDITIONAL PRODUCT LITERATURE IS AVAILABLE UPON REQUEST.
SINCE ACTUAL USE BY OTHERS IS BEYOND OUR CONTROL, NO WARRANTY, EXPRESS
OR IMPLIED, IS MADE BY MARVEL AS TO THE EFFECTS OF SUCH USE, THE RESULTS
TO BE OBTAINED OR THE SAFETY AND TOXICITY OF THE PRODUCT, NOR DOES
MARVEL ASSUME ANY LIABILITY ARISING OUT OF THE USE BY OTHERS OF THE
PRODUCT REFERRED TO HEREIN. THE DATA IN THIS MSDS RELATE TO THE SPECIFIC
MATERIAL DESIGNATED HEREIN AND DO NOT RELATE TO USE IN COMBINATION
WITH ANY OTHER MATERIAL OR IN ANY PROCESS.

SECTION 3 - HAZARDS IDENTIFICATION

POTENTIAL ACUTE HEALTH EFFECTS:

EYES: Can cause moderate irritation, redness, tearing, and blurred vision. Can cause severe injury -- damage reversible. Can cause burns.
SKIN: Prolonged or repeated contact can cause moderate irritation, defatting, and dermatitis. Material is readily absorbed through the skin in toxic amounts. Sensitizer -- Can cause allergic skin reaction which may be severe in certain individuals. Persons with pre-existing skin disorders may be more susceptible to the effects of this material.

INHALATION: May cause irritation of the mucous membranes, cough, discomfort, rapid or difficult breathing or shortness of breath. Sensitizer -- may cause allergic respiratory reaction. Can cause CNS effects including fatigue, weakness, headache, dizziness, nausea, vomiting, unconsciousness, coma, respiratory failure and death. Respiratory systems associated with pre-existing lung disorders (e.g., asthma-like conditions) may be aggravated by exposure to this material. Toxic by inhalation. Prolonged exposure can cause hearing impairment.

INGESTION: Single dose oral toxicity is low. Can cause irritation of the digestive tract, nausea, vomiting and diarrhea. May cause signs of nervous system depression including drowsiness, dizziness, loss of coordination, fatigue, headache, nausea and vomiting. Aspiration of material into the lungs can cause chemical pneumonitis which can be fatal.

POTENTIAL CHRONIC HEALTH EFFECTS: -- Prolonged and repeated breathing of vapors, spray mist and/or sanding dust over a period of years may cause diseases of the lungs. -- Prolonged overexposure to crystalline silica by inhalation may cause delayed lung injury/disease (silicosis). -- Reports have associated repeated and prolonged occupational overexposure to solvents with brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling this product may be

harmful or fatal. - overexposure can cause fibrosis (silicosis); symptoms can include coughing, difficulty breathing, tightness of chest, hemorrhage, and wheezing. This product or its pregnant components produces fetotoxic and/or teratogenic effects when absorbed through the skin. Women should use caution when handling long term excessive exposures may cause talcosis, pulmonary fibrosis with shortness of breath, chronic cough and respiratory-assisted heart failure. Prolonged exposure to talc can produce a mild symptomatic pneumoconiosis. The adverse chronic health effects associated with crystalline silica include silicosis, cancer, scleroderma, and tuberculosis. CARCINOGENICITY: - contains crystalline silica which can cause cancer based on animal data. (Risk of cancer depends on duration and level of exposure to dust from sanding surfaces or spray mist.) - ethylbenzene has been shown to cause cancer in laboratory animals. The relevance of this finding to humans is uncertain. IARC has classified ethylbenzene as a possible human carcinogen (Group 2B). - Carbon black has been shown to cause cancer in laboratory animals. The relevance of this finding to humans is uncertain. IARC has classified carbon black as a possible human carcinogen (Group 2B) however carbon black is not considered a carcinogen by the U.S. National Toxicology Program (NTP) or OSHA.

TARGET ORGANS: overexposure to this material or its components has been suggested as a cause of the following effects in laboratory animals and/or humans, and may aggravate pre-existing disorders of these organs in humans: Anemia, Birth defects which may include: Fetotoxicity, embryotoxicity, infertility and fetal malformations. Blood disorders, Brain damage, Cardiac abnormality, Liver damage, kidney damage, Ingestion may produce liver, kidney and blood forming organ damage. Liver abnormalities, Lung damage, Menstrual and fertility disorders, Nervous system damage, Skin damage, Spleen damage, Testicular damage, Respiratory system, Central nervous system (CNS), Peripheral nervous system (PNS)

SECTION 4 - FIRST AID MEASURES

PRIMARY ROUTES OF ENTRY (X) SKIN (X) BREATHING (X) SWALLOWING
 IF IN EYES: Flush eyes with water for at least 15 minutes while holding eyelids apart; Seek medical attention.
 IF ON SKIN: Remove contaminated clothing and flush contaminated skin with large amounts of water. If skin is damaged or if symptoms persist seek medical attention. Launder clothing before reuse.
 IF INHALED: If symptoms develop, immediately move individual away from exposure and into fresh air. Seek immediate medical attention; keep person warm and quiet. If individual is not breathing, begin artificial respiration. If breathing is difficult, administer oxygen.
 IF SWALLOWED: DO NOT induce vomiting unless directed to do so by medical personnel. Aspiration of material into lungs can cause chemical pneumonitis which may be fatal. If individual is drowsy or unconscious, place on their side with head down. Seek medical attention. If possible, do not leave individual unattended.

SECTION 5 - FIRE FIGHTING MEASURES

FIRE AND EXPLOSIVE PROPERTIES OF THE CHEMICAL: (Unless otherwise noted, data are derived from ingredients existing in this formula at concentrations of 1% by weight or greater, i.e., the flashpoint given is the lowest flashpoint of the ingredients listed in section 2.)
 Flashpoint : 51.0 F (10.5 C) (Actual)
 Explosion Level : Low - 1.1 High - 15.6
 Flammability Limits : Lower - 1.1 Higher - -N/A
 AUTO-ignition Temperature : -N/A
 EXTINGUISHING MEDIA: Use carbon dioxide or dry chemical for small fires; alcohol-type aqueous film-forming foam or water spray for large fires. Water may be ineffective but should be used to cool fire-exposed structures and vessels.
 UNUSUAL FIRE AND EXPLOSION HAZARDS: Keep away from heat, sparks, and flame. Do not smoke. Extinguish all pilot lights and turn off all sources of ignition, including heaters, fans and other non-explosion proof electrical equipment, during use and until all vapors are gone. Vapors may ignite explosively. Vapors may spread long distances and beyond closed doors. Prevent build up of vapors by maintaining a continuous flow of fresh air.
 FIRE-FIGHTING PROCEDURES AND EQUIPMENT: Self-contained breathing apparatus with full facepiece operated in pressure-demand or other positive pressure mode. In case of fire, use dry chemical, foam, CO2 or other approved method for treating a Class B fire. Summon professional firefighters. During a fire, toxic gases and smoke are irritants present from decomposition/combustion. Closed container may explode when exposed to extreme heat.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

CLEAN-UP: SMALL SPILL: Absorb liquid on inert material such as paper, vermiculite, floor absorbent, and transfer to hood. LARGE SPILL: Eliminate all ignition sources (flares, flames including pilot lights, electrical sparks). Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed. Stop spill at source, contain area of spill to prevent spreading, pump liquid to salvage tank. Remaining liquid may be absorbed with inert material such as sand, clay, earth, or floor absorbent, and shoveled into containers, with non-sparking tools. Prevent run-off to sewers, streams, or other bodies of water. If run-off occurs, notify the proper authorities as required that a spill has occurred.

SECTION 7 - HANDLING AND STORAGE

HANDLING: SENSITIVITY TO STATIC DISCHARGE - Grounding/Bonding required
 STORAGE: Keep container tight and upright to prevent leakage. Keep container closed when not in use. Do not store above 49 C/120 F. Do not transfer contents to bottles or unlabeled containers. Protect from freezing. Containers of this material may be hazardous when emptied because they retain product residues (vapor, liquid, and/or solid). When empty, may contain explosive vapors. Do not cut, puncture or weld on or near this container. All hazard precautions given in this data sheet must be observed for empty containers.

SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION

RESPIRATORY PROTECTION/VENTILATION: Use only with adequate ventilation. Maintain continuous flow of fresh air. - breathe vapors, spray mists, or sanding dusts. Use air purifying respirators fitted with orga- apor/HEPA cartridges only if air monitoring of the work area demonstrates

solvent and particulate levels do not exceed the respirator maximum use concentration. Use only properly fitted NIOSH approved respirators. Follow respirator manufacturer's instructions for use. Engineering and administrative controls should be implemented to reduce exposure to paint spray and exhaust. A general exhaust system is not recommended. It is advisable to use a respirator. PERSONAL PROTECTIVE EQUIPMENT: Use protective equipment to prevent contact with eyes, skin, or clothing. Use solvent resistant safety eyewear with splash guards. Protective garments such as Tyvek® coveralls by eally used to protect against vapors, splatters, and dust. Tyvek® coveralls recommended for messy applications. Nitrile or natural rubber gloves, Tyvek® used to protect from minor contact. For prolonged contact, neoprene gloves are better and butyl are best.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

Physical Appearance : -N/A Odor : -N/A
 Physical State : LIQUID PH : -N/A
 Vapor Density : 4.00
 Boiling Range : Lower - 175.0 F 79.4 C Higher - 288.0 F 142.2 C
 Freezing Point : -N/A Melting Point : -N/A
 Water Solubility : -N/A Specific Gravity : 1.475
 Formula Weight per Volume : 12.2768 Lb/gal. : 3.526 lbs./gal. or 423 g/l
 Evaporation Rate : -N/A
 Volatility : -N/A % Volatile by weight : 28.7360
 % Volatile by Volume : 50.9244 Coeff of Water-Oil Distribution : -N/A

SECTION 10 - STABILITY AND REACTIVITY

CONDITIONS TO AVOID AND INCOMPATIBILITIES: A reaction accompanied by large heat release occurs when the product is mixed with acids. Heat generated may be sufficient to cause vigorous boiling creating a hazard due to splashing or spattering of hot material. Strong mineral acids Hydrofluoric acid, Aluminum Alkalis, Alkanolamines, Aldehydes, Amines, Ammonia, Caustics, Chlorine, Chlorinated compounds, Cleaning solutions, such as chrome (sulfuric acid/dichromate) and aqua regia, halogenated hydrocarbons, Isocyanates, oxidizing agents, Ethylene oxide, This product will dissolve some plastics, rubber, and coatings, Acetaldehyde.
 HAZARDOUS DECOMPOSITION PRODUCTS (including thermal decomposition): Carbon dioxide and carbon monoxide, Toxic fumes, Various hydrocarbons, Nitrogen oxides, Sulfur oxide, Acrid smoke.
 POLYMERIZATION: - Will NOT occur. - Contamination with strong acids, bases, epoxy resins or isocyanates can cause polymerization.
 STABILITY: - Stable under ordinary conditions of use and storage.

SECTION 11 - TOXICOLOGICAL INFORMATION

No additional toxicological data available. Please refer to Sections 2 & 3.

SECTION 12 - ECOLOGICAL INFORMATION

No ecological data available for this product.

SECTION 13 - DISPOSAL CONSIDERATIONS

WASTE DISPOSAL METHOD: Dispose of contaminated absorbent, container and unused contents in accordance with local, state and federal regulations. Do not incinerate Closed containers.

SECTION 14 - TRANSPORT INFORMATION

DOT Hazard Class: 3
 DOT Label: Flammable Liquid
 DOT Placard: Flammable
 DOT Packing Group: II
 DOT Shipping Name: Paint
 UN/NA Number: 1263

SECTION 15 - REGULATORY INFORMATION

FEDERAL REGULATIONS:
 SARA 313 INFORMATION: This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

This product contains one or more Hazardous Air Pollutants (HAPs) which are regulated under Section 112 of the Clean Air Act.

This product contains no chemicals listed in the NTP Annual Report on Carcinogens, the IARC Monographs, listed by ACGIH, NIOSH or regulated as a carcinogen by OSHA.

This product contains one or more reported reproductive toxins or suspect/ experimental reproductive toxins.

This product contains one or more reported teratogens or suspect/ experimental teratogens. IMPORTANT! This product may be blended with other products prior to use. Read all warnings and precautions on the MSDS and labels of all products being blended as the combination may contain the hazards of each component.

SECTION 3 - HAZARDS IDENTIFICATION

POTENTIAL ACUTE HEALTH EFFECTS:
EYES: May cause moderate irritation, redness, tearing, and blurred vision. Can cause severe injury -- damage reversible.
SKIN: Prolonged or repeated contact can cause moderate irritation, defatting, and dermatitis. Material is readily absorbed through the skin in toxic amounts. Skin contact of high concentrations of vapor may cause irritation and toxic effects, including CNS depression, lung, liver and kidney injury. Symptoms include headache, nausea, vomiting and dizziness. This product has produced fetotoxic and teratogenic effects in laboratory animals when inhaled or absorbed through the skin. Pregnant women should avoid exposure to this product. May be a weak sensitizer. Can cause allergic skin reaction in certain individuals.

INHALATION: Can cause nasal and respiratory tract irritation. Can cause CNS effects including fatigue, weakness, headache, dizziness, nausea, vomiting, unconsciousness, coma, respiratory failure and death.
INGESTION: Slightly toxic by ingestion. Can cause irritation of the digestive tract, nausea, vomiting and diarrhea. May cause signs of nervous system depression, including drowsiness, dizziness, loss of coordination, fatigue, headache, nausea and vomiting.
ASPIRATION OF MATERIAL INTO THE LUNGS CAN CAUSE CHEMICAL PNEUMONITIS, WHICH CAN BE FATAL.
POTENTIAL CHRONIC HEALTH EFFECTS: Prolonged and repeated breathing of vapors, spray mist and/or sanding dust over a period of years may cause diseases of the lungs. Reports have associated repeated and prolonged occupational overexposure to solvents with brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling this product may be harmful or fatal.

TARGET ORGANS: overexposure to this material or its components has been suggested as a cause of the following effects in laboratory animals and/or humans, and may aggravate pre-existing disorders of these organs in humans:
- Reproductive system abnormalities
- Birth defects which may include: fetotoxicity, embryotoxicity, infertility and fetal malformations.
- Blood disorders
- Brain damage
- Cardiac abnormality
- Eye damage
- Kidney damage
- Liver abnormalities
- Lung damage
- Skin damage
- Spleen damage
- Testicular damage
- Respiratory system
- Gastrointestinal (GI) tract
- Central nervous system (CNS)
- Peripheral nervous system (PNS)

SECTION 4 - FIRST AID MEASURES

PRIMARY ROUTE(S) OF ENTRY (X) SKIN (X) BREATHING (X) SWALLOWING
IF IN EYES: Flush eyes with water for at least 15 minutes while holding eyelids apart; Seek medical attention.
IF ON SKIN: Remove contaminated clothing and flush contaminated skin with large amounts of water. If skin is damaged or if symptoms persist seek medical attention. Launder clothing before reuse.
IF INHALED: If symptoms develop, immediately move individual away from exposure and into fresh air. Seek immediate medical attention; keep person warm and quiet. If individual is not breathing, begin artificial respiration. If breathing is difficult, administer oxygen.
IF SWALLOWED: DO NOT induce vomiting unless directed to do so by medical personnel. Aspiration of material into lungs can cause chemical pneumonitis which may be fatal. If individual is drowsy or unconscious, place on their side with head down. Seek medical attention. If possible, do not leave individual unattended.

SECTION 5 - FIRE FIGHTING MEASURES

FIRE AND EXPLOSIVE PROPERTIES OF THE CHEMICAL: (Unless otherwise noted, data are derived from ingredients existing in this formula at concentrations of 1% by weight or greater, i.e., the flashpoint given is the lowest flashpoint of the ingredients listed in section 2.)
Flashpoint Level: Low - 47.0 F - 11.2
High - 13.0
Flammability Limits: Lower - -N/A
Higher - -N/A
Auto-ignition Temperature: -N/A

EXTINGUISHING MEDIA: Use carbon dioxide or dry chemical for small fires; alcohol-type aqueous film-forming foam or water spray for large fires. Water may be ineffective but should be used to cool fire-exposed structures and vessels.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Keep away from heat, sparks, and flame. Do not smoke. Extinguish all pilot lights and turn off all sources of ignition, including heaters, fans and other non-explosion proof electrical equipment, during use and until all vapors are gone. Vapors may ignite explosively. Vapors may spread long distances and beyond closed doors. Prevent build up of vapors by maintaining a continuous flow of fresh air.

FACE-FIGHTING PROCEDURES AND EQUIPMENT: Self-contained breathing apparatus with full facepiece operated in pressure-demand or other positive pressure mode. In case of fire, use dry chemical, foam, CO₂ or other approved method for treating a Class B fire. Summon professional firefighters. During a fire, toxic gases and smoke are irritants present from decomposition/combustion. Closed container may explode when exposed to extreme heat.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

CLEAN-UP:

SMALL SPILL: Absorb liquid on inert material such as paper, vermiculite, floor absorbent, and transfer to hood.

LARGE SPILL: Eliminate all ignition sources (flares, flames including pilot lights, electrical sparks). Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed. Stop spill at source, contain area of spill to prevent spreading, pump liquid to salvage tank. Remaining liquid may be absorbed with inert material such as sand, clay, earth, or floor absorbent, and shoveled into containers, with non-sparking tools. Prevent run-off to sewers, streams, or other bodies of water. If run-off occurs, notify the proper authorities as required that a spill has occurred.

SECTION 7 - HANDLING AND STORAGE

HANDLING: SENSITIVITY TO STATIC DISCHARGE - Grounding/Bonding required

STORAGE: Keep container tight and upright to prevent leakage. Keep container closed when not in use. Do not store above 49 C/120 F. Do not transfer contents to bottles or unlabeled containers. Protect from freezing. Containers of this material may be hazardous when emptied because they retain product residues (vapor, liquid, and/or solid). This empty, may contain explosive vapors. Do not cut, puncture or weld on or near this container. All hazard precautions given in this data sheet must be observed for empty containers.

SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION

RESPIRATORY PROTECTION/VENTILATION: Use only with adequate ventilation. Maintain continuous flow of fresh air. Do not breathe vapors, spray mists, or sanding dusts. Use air purifying respirators fitted with organic vapor/HEPA cartridges only if air monitoring of the work area demonstrates solvent and particulate levels do not exceed the respirator Maximum Use Concentration. Use only properly fitted NIOSH approved respirators. Follow respirator manufacturer's directions for use. Engineering or administrative controls should be implemented to reduce exposure. Paint spray booths, local exhaust, and general exhaust systems are advisable to minimize exposure.

PERSONAL PROTECTIVE EQUIPMENT: Use protective equipment to prevent contact with eyes, skin, or clothing. Use solvent resistant safety eyewear with splash guards. Protective garments such as nylon or Tyvek(R) coveralls typically used to protect from light overspray, splatters, etc. Saranex 23-P(R) coveralls recommended for messy applications. Nitrile or natural rubber gloves typically used to protect from minor contact. For prolonged contact, neoprene gloves are better and butyl are best.

Section 3 – Hazards Identification

*****EMERGENCY OVERVIEW*****

HMIS
H 1
F 1
R 0
PPE[†]
[†]Sec. 8

Summary of Risks: May irritate eyes. Prolonged or repeated skin contact may cause irritation. Inhalation of Oil mist or vapors from material at high temperatures may irritate respiratory passages. Polytetrafluoroethylene (PTFE), when thermally decomposed (over 290^oC), may cause polymer fume fever. Thermal decomposition of PTFE (over 290^oC) will generate hydrogen fluoride.

POTENTIAL HEALTH EFFECTS

Eye Contact: May cause irritation.

Skin Contact: Repeated or prolonged skin contact may cause irritation. Thermal decomposition of PTFE (over 290^oC) will generate hydrogen fluoride, which is corrosive, causing burns on contact with skin and other tissue.

Inhalation: Oil Mist and vapors at high temperatures may irritate respiratory passages. Inhalation of decomposition products of PTFE (over 290^oC) may cause polymer fume fever, a temporary flu-like illness accompanied by fever, chills, and sometimes cough, of approximately 24 hours duration. Repeated episodes of polymer fume fever may cause lung damage. Inhalation of fluorine compounds as decomposition products of PTFE (over 290^oC) may cause lung irritation and pulmonary edema.

Ingestion: May cause gastrointestinal irritation.

Primary Route(s) of Entry: Inhalation at high temperatures, eye contact, skin contact.

Target Organs: Respiratory passages at high temperatures, eyes, skin.

Medical Conditions Aggravated by Long-Term Exposure: Individuals with pre-existing diseases of the lungs may have increases susceptibility to the toxicity of excessive exposures from thermal decomposition products.

Carcinogenicity: IARC, NTP, and OSHA do not list TEF-GEL or its ingredients as carcinogens.

Section 4 – First Aid Measures

Eye Contact: Flush thoroughly with water for at least 15 minutes. Get immediate medical attention.

Skin Contact: Remove contaminated clothing. Wash exposed area with soap and water. Get medical attention if symptoms persists.

Inhalation: If symptoms develop, remove affected person from source of exposure into fresh air. Get immediate medical attention.

If person is not breathing, give artificial respiration. If breathing is difficult, administer oxygen if available.

Ingestion: Get immediate medical attention. Do not induce vomiting unless instructed to do so by a physician.

Section 5 – Fire – Fighting Measures

Flash Point: over 400° F (204°C)

Flash Point Method: CC, ASTM D93

Lower Flammable Limit (LFL): N/A

Upper Flammable Limit (UFL): N/A

Extinguishing Media: CO₂, Foam, Dry Chemical, Water Spray

Unusual Fire or Explosion Hazards: None

Hazardous Combustion Products: Hydrogen fluoride, carbonyl fluoride, carbon monoxide and small amount of other toxic fumes

Fire-Fighting Instructions: Wear a NIOSH approved positive pressure self-contained breathing apparatus with full protective clothing. Do not release runoff from fire control methods to sewers or waterways.

Section 6 – Accidental Release Measures

Spill Response: Observe precautions from other sections. Contain any spill with dikes or absorbents to prevent migration and entry into drains, sewers or bodies of water. Wipe or scrape up grease and place it in a proper container for disposal. Wash walking surfaces thoroughly to reduce slipping hazard. Follow applicable OSHA (29 CFR 1910.120), state and local regulations.

Section 7 – Handling and Storage

Handling Precautions: Exercise ordinary care in handling industrial lubricants. Avoid contamination of cigarettes or other tobacco products. Wash hands thoroughly before eating or smoking. Remove contaminated clothing and clean before reuse. Users should be alert to the possibility that very small percentages of the population may display unexpected allergic reactions to otherwise innocuous industrial lubricants and raw materials.

Storage Requirements: Do not store in open or unlabeled containers. Store away from incompatibles.

Section 8 – Exposure Controls / Personal Protection

Eye Protection: Avoid eye contact. Wear safety glasses or chemical goggles in accordance with OSHA 29 CFR 1910.133.

Skin Protection: Avoid skin contact. Wear chemical protective gloves. Depending upon conditions of use, additional protection may be necessary such as a face shield, apron, etc.

Ventilation: Local ventilation is generally not necessary under normal conditions of use with adequate general ventilation.

Ventilation and other forms of engineering controls are preferred means for controlling chemical exposures.

Respiratory Protection: Avoid breathing oil mist. Respiratory protection is generally not necessary under normal condition of use with adequate general ventilation.

Safety Stations: Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

Other Precautionary Information: Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, using the toilet, or applying cosmetics.

Section 9 – Physical and Chemical Properties

Appearance and Odor: Smooth, white grease with slight odor

Vapor Pressure: Negligible

Vapor Density: Not Determined

Formula Weight: Not Calculated

Specific Gravity (H²O=1, at 4°C): Not Determined

Water Solubility: Insoluble

Boiling Point: Not Volatile

Dropping Point: Non-melting

% Volatile: None

pH: Not Determined

Section 10 – Stability and Reactivity

Stability: Tef-Gel is stable at room temperature in closed containers under normal storage and handling conditions.

Polymerization: This product will not undergo hazardous polymerization.

Chemical Incompatibilities: Strong oxidizing materials.

Conditions to Avoid: Pyrolysis

Hazardous Decomposition Products: Thermal oxidative decomposition of Tef-Gel can produce hydrogen fluoride, carbonyl fluoride, carbon monoxide as well as small amounts of other toxic fumes.

Section 11 – Toxicological Information

Toxicity Data: None Available

Section 12 – Ecological Information

Environmental Fate and Effects: No data has been established for this product.

Section 13 – Disposal Considerations

Disposal: Contact a licensed waste-disposal contractor for detailed recommendations.

Disposal Regulatory Requirements: Many states classify waste lubricants as “hazardous”, which means disposal only by a licensed firm. Follow applicable Federal, state, and local regulations.

Section 14 – Transport Information

DOT Transportation Data (49 CFR 172.101): Not Regulated.

Section 15 – Regulatory Information

TSCA: All components of this product are listed on the TSCA inventory.

EPA Regulations:

SARA 311/312 Hazard Class (40 CFR 370)

Immediate (Acute) Health Hazard	No	Sudden Release of Pressure Hazard	No	Reactive Hazard	No
Delayed (Chronic) Health Hazard	No	Fire Hazard	No

SILICONE SPRAY

ZZ7025 **772199**
 2-3-0B
 (For Internal Use Only)

MATERIAL SAFETY DATA SHEET

SECTION 1 - PRODUCT IDENTIFICATION

Product: Silicone Spray Lube, with Heptane
Manufacturer: Valspar Corporation
Address: 411 North Darling, Fremont MI 49412

Code No.:
Telephone: (616)924-3950
SP Code: ZZ7025

SECTION 2 - PRODUCT COMPONENTS

	<u>Component Name</u>	<u>OSHA PEL</u>	<u>ACGIH TLV</u>	<u>Wt. %</u>	<u>CAS Number</u>
1)	Solvent naphtha (petroleum), medium aliphatic	100 ppm ¹	100 ppm ¹	60-75	64742-88-7
2)	Siloxanes and silicones, di-Me	---	---	1-10	63148-62-9
3)	Heptane	400 ppm	400 ppm	5-20	142-82-5
4)	Petroleum products, liquefied gas, sweetened	1,000 ppm	800 ppm	15-25	68476-86-8

SECTION 3 - PHYSICAL AND CHEMICAL CHARACTERISTICS⁴

Boiling Point:	161°F IBP	Specific Gravity:	0.778
Vapor Pressure:	ND	Water Soluble:	Nil
Vapor Density (Air = 1):	> 1	Water Reactive:	No
Volume % Volatile:	> 65	pH:	NA
Appearance and Odor:	Clear water white liquid, solvent odor.		

SECTION 4 - FIRE AND EXPLOSION INFORMATION

Flash Point (Method):	Extremely-Flammable Aerosol	Autoignition Temp.:	ND
Flammable Limits, LEL:	ND	UEL:	ND
Flame Extension:	> 18"	Flashback:	Yes
Extinguishing Media:	Foam, dry chemical, CO ₂		
Special Firefighting Procedures:	Use SCBA. Water is not suitable as an extinguishing media, but may be useful for cooling nearby containers.		
Unusual Fire and Explosion Hazards:	Aerosol containers may burst when exposed to temperatures in excess of 120°F.		

SECTION 5 - REACTIVITY DATA

Stable: Yes **Conditions to Avoid:** Heat, sparks, open flame.
Incompatibility: Strong oxidizers like chlorine or concentrated O₂.
Hazardous Decomposition Products: Fumes, smoke, various oxides of carbon
Polymerization: No **Conditions to Avoid:** None Known

ZZ7025
 11/15/01

SILICONE SPRAY LUBE. WITH HEPTANE MATERIAL SAFETY DATA SHEET, CONT.

SECTION 6 - HEALTH HAZARDS

Primary Routes of Entry: Oral: No Carcinogenic Listing: NTP: No
 Inhalation: Yes IARC: No
 Skin Absorb.: Yes ACGIH: No

HMS Rating¹: Health: 2 Flammability: 3 Reactivity: 0

Signs/Symptoms of Exposure: Headache, dizziness, nausea; eye, nose, and throat irritation from inhalation of vapor concentrations. May cause eye and throat irritation from contact.

Emergency First Aid Procedures

Eye Contact: Flush with running water for 15 minutes, holding lid open to expose surface. Contact physician.

Skin Contact: Remove contaminated clothing and shoes. Wash with mild soap and water, apply skin cream for irritation.

Inhalation: Remove to fresh air at once. Apply artificial respiration if necessary, contact physician immediately.

Ingestion: Do not induce vomiting, contact physician immediately.

Chronic Hazards: Health studies have shown that many petroleum hydrocarbons pose human health risks which may vary from person to person. Prolonged or repeated occupational overexposure to solvents has been linked to permanent brain and nervous system damage. Intentional misuse by deliberate concentration and inhalation may be harmful or fatal. As a precaution, exposure to liquids or vapors should be minimized.

SECTION 7 - SPECIAL PRECAUTIONS/SPILL & LEAK PROCEDURES

Precautions for Storage and Handling: Keep containers closed when not in use. Do not use or store near open flame or strong oxidizers.

Other Precautions: Avoid breathing vapors or mists; prolonged or repeated skin contact.

Spill or Leak Precautions: ** DANGER!! LEAKING AEROSOLS ARE AN EXTREME FIRE AND EXPLOSION HAZARD!! Remove ignition sources, check area with gas detector. Move leaking cans outdoors and empty into suitable container by depressing valve button. Small liquid spills may be taken up with absorbent material.

Waste Disposal Method: Comply with all applicable regulations.

SECTION 8 - SPECIAL PROTECTION & PRECAUTIONS

Respiratory Protection: None required in normal use.

Ventilation Type Required: Adequate to maintain level below established standards.

Local Exhaust: Yes Rate: >60 fpm Mech. (General) No³

Gloves: Chemical resistant

GLYCERINE

-----1. PRODUCT NAME -----

PRODUCT NAME: GLYCERINE

MSDS #: DZ08439

EFFECTIVE DATE: 7/10/00

-----2. COMPOSITION/INFORMATION ON INGREDIENTS -----

GLYCERINE, MINIMUM CAS# 000056-81-5 99.7%

-----3. HAZARDS IDENTIFICATION -----

EMERGENCY OVERVIEW:

WATER WHITE LIQUID. ODORLESS. NO SIGNIFICANT HAZARDS FOR EMERGENCY RESPONSE ARE KNOWN.

POTENTIAL HEALTH EFFECTS (SEE SECTION 11 FOR TOXICOLOGICAL DATA.):

EYE:
MAY CAUSE SLIGHT TRANSIENT (TEMPORARY) EYE IRRITATION. CORNEAL INJURY IS UNLIKELY.

SKIN:
PROLONGED OR REPEATED EXPOSURE NOT LIKELY TO CAUSE SIGNIFICANT SKIN IRRITATION. A SINGLE PROLONGED EXPOSURE IS NOT LIKELY TO RESULT IN THE MATERIAL BEING ABSORBED THROUGH SKIN ON HARMFUL AMOUNTS. MAY BE ABSORBED IN POTENTIALLY HARMFUL AMOUNTS WHEN APPLIED IN LARGE QUANTITIES TO SEVERE BURNS (SECOND OR THIRD DEGREE) OVER LARGE AREAS OF THE BODY AS PART OF A CREAM OR TOPICAL APPLICATION. ABSORPTION UNDER SUCH CIRCUMSTANCES CAN ELEVATE

METHOD USED: PHCC

AUTOIGNITION TEMPERATURE: 698F, 370C.

FLAMMABILITY LIMITS:

SERUM OSMOLALITY AND MAY RESULT IN OSMOTIC SHOCK.

INGESTION:

SINGLE DOSE ORAL TOXICITY IS CONSIDERED TO BE EXTREMELY LOW. SMALL AMOUNTS SWALLOWED INCIDENTAL TO NORMAL HANDLING OPERATIONS ARE NOT LIKELY TO CAUSE INJURY; SWALLOWING AMOUNTS LARGER THAN THAT MAY CAUSE INJURY. SIGNS AND SYMPTOMS OF EXCESSIVE EXPOSURE MAY BE CENTRAL NERVOUS SYSTEM EFFECTS AND INCREASED BLOOD SUGAR LEVELS.

INHALATION:

AT ROOM TEMPERATURE, VAPORS ARE MINIMAL DUE TO PHYSICAL PROPERTIES. IF HEATED OR SPRAYED AS AN AEROSOL, AIRBORNE MATERIAL MAY CAUSE UPPER RESPIRATORY IRRITATION.

SYSTEMIC (OTHER TARGET ORGAN) EFFECTS:

REPEATED EXCESSIVE EXPOSURES MAY CAUSE INCREASED FAT LEVELS IN BLOOD. OBSERVATIONS IN ANIMALS INCLUDE KIDNEY, LIVER, AND GASTROINTESTINAL EFFECTS WITH VERY LARGE ORAL DOSES.

CANCER INFORMATION: DID NOT CAUSE CANCER IN LONG-TERM ANIMAL STUDIES.

TERATOLOGY:

BIRTH DEFECTS ARE UNLIKELY. EXPOSURES HAVING NO ADVERSE EFFECTS ON THE MOTHER SHOULD HAVE NO EFFECT ON THE FETUS.

REPRODUCTIVE EFFECTS:

REPRODUCTIVE EFFECTS SEEN IN FEMALE ANIMALS ARE BELIEVED TO BE DUE TO ALTERED NUTRITIONAL STATUS RESULTING FROM EXTREMELY HIGH DOSES IN THEIR DIETS. SIMILAR EFFECTS HAVE BEEN SEEN IN ANIMALS FED SYNTHETIC DIETS.

-----4. FIRST AID -----

EYES: FLUSH EYES WITH PLENTY OF WATER.

SKIN: WASH OFF IN FLOWING WATER OR SHOWER.

INGESTION:

IF SWALLOWED, SEEK MEDICAL ATTENTION. DO NOT INDUCE VOMITING UNLESS DIRECTED TO DO SO BY MEDICAL PERSONNEL.

INHALATION: REMOVE TO FRESH AIR IF EFFECTS OCCUR. CONSULT A PHYSICIAN.

NOTE TO PHYSICIAN:

NO SPECIFIC ANTIDOTE. SUPPORTIVE CARE. TREATMENT BASED ON JUDGMENT OF THE PHYSICIAN IN RESPONSE TO REACTIONS OF THE PATIENT.

-----5. FIRE FIGHTING MEASURES -----

FLAMMABLE PROPERTIES:

FLASH POINT: 390F, 199C

STORAGE:

GLYCERINE FREEZES AT 64F. GLYCERINE SHOULD BE KEPT ABOVE 64F BUT BELOW 130F.

LFL: NOT DETERMINED.

UFL: NOT DETERMINED.

HAZARDOUS COMBUSTION PRODUCTS:

IF A FIRE, SMOKE MAY CONTAIN THE ORIGINAL MATERIAL IN ADDITION TO UNIDENTIFIED TOXIC AND/OR IRRITATING COMPOUNDS. HAZARDOUS COMBUSTION PRODUCTS MAY INCLUDE AND ARE NOT LIMITED TO: ALDEHYDES, CARBON MONOXIDE, CARBON DIOXIDE.

OTHER FLAMMABILITY INFORMATION:

VIOLENT STEAM GENERATION OR ERUPTION MAY OCCUR UPON APPLICATION OF DIRECT WATER STREAM.

EXTINGUISHING MEDIA:

WATER FOG OR FINE SPRAY, CARBON DIOXIDE, DRY CHEMICAL, FOAM. ALCOHOL RESISTANT FOAMS (AFC TYPE) OR PROTEIN FOAMS MAY FUNCTION, BUT MUCH LESS EFFECTIVELY. DO NOT USE DIRECT WATER STREAM. WILL SPREAD FIRE.

MEDIA TO BE AVOIDED: DO NOT USE DIRECT WATER STREAM.

FIRE FIGHTING INSTRUCTIONS:

KEEP PEOPLE AWAY. ISOLATE FIRE AREA AND DENY UNNECESSARY ENTRY. BURNING LIQUIDS MAY BE MOVED BY FLUSHING WITH WATER TO PROTECT PERSONNEL AND MINIMIZE PROPERTY DAMAGE. BURNING LIQUIDS MAY BE EXTINGUISHED BY DILUTION WITH WATER. DO NOT USE DIRECT WATER STREAM. MAY SPREAD FIRE.

PROTECTIVE EQUIPMENT FOR FIRE FIGHTERS:

WEAR POSITIVE-PRESSURE SELF-CONTAINED BREATHING APPARATUS (SCBA) AND PROTECTIVE FIRE FIGHTING CLOTHING (INCLUDES FIRE FIGHTING HELMET, COAT, BOOTS, AND GLOVES. IF PROTECTIVE EQUIPMENT IS NOT AVAILABLE OR NOT AVAILABLE, FIGHT FIRE FROM A PROTECTED LOCATION OR SAFE DISTANCE.

-----6. ACCIDENTAL RELEASE MEASURES -----

(SEE SECTION 15 FOR REGULATORY INFORMATION)

PROTECT PEOPLE:

KEEP UNNECESSARY PEOPLE AWAY; ISOLATE HAZARD AREA AND DENY UNNECESSARY ENTRY.

PROTECT THE ENVIRONMENT:

KEEP OUT OF SEWERS, STORM DRAINS, SURFACE WATER AND SOIL.

CLEANUP:

SMALL SPILLS: COVER WITH ABSORBENT MATERIAL, SOAK UP AND SWEEP INTO A DRUM.
LARGE SPILLS: DIKE AROUND SPILL AND PUMP INTO SUITABLE CONTAINERS.

-----7. HANDLING AND STORAGE -----

HANDLING: PRACTICE REASONABLE CARE AND CAUTION.

INCOMPATIBILITY WITH OTHER MATERIALS: OXIDIZING MATERIAL.

HAZARDOUS DECOMPOSITION PRODUCTS: ACOLEIN.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR.

-----11. TOXICOLOGICAL INFORMATION -----

-----8. EXPOSURE CONTROLS/PERSONAL PROTECTION -----

ENGINEERING CONTROLS:

PROVIDE GENERAL AND/OR LOCAL EXHAUST VENTILATION TO CONTROL AIRBORNE LEVELS BELOW THE EXPOSURE GUIDELINES.

PERSONAL PROTECTIVE EQUIPMENT:

EYE/FACE PROTECTION: USE SAFETY GLASSES.

SKIN PROTECTION:

NO PRECAUTIONS OTHER THAN CLEAN BODY-COVERING CLOTHING SHOULD BE NEEDED.

RESPIRATORY PROTECTION:

FOR MOST CONDITIONS, NO RESPIRATORY PROTECTION SHOULD BE NEEDED; HOWEVER, IF MATERIAL IS HEATED OR SPRAYED, USE AN APPROVED AIR-PURIFYING RESPIRATOR.

EXPOSURE GUIDELINE:

GLYCERIN:

ACGIH TLV IS 10 MG/M3.

OSHA PEL IS 10 MG/M3 TOTAL, 5 MG/M3 RESPIRABLE.

PELS ARE IN ACCORD THOSE RECOMMENDED BY OSHA, AS IN THE 1989 REVISION OF PELs.

-----9. PHYSICAL AND CHEMICAL PROPERTIES -----

APPEARANCE: WATER WHITE LIQUID.

ODOR: ODORLESS

VAPOR PRESSURE: <1.0 mmHg @ 20C

VAPOR DENSITY: 3.1

BOILING POINT: 554F, 290C

SOLUBILITY IN WATER: MISCIBLE

SPECIFIC GRAVITY: 1.2607 @ 25/25 (MIN.)

-----10. STABILITY AND REACTIVITY -----

CHEMICAL STABILITY: STABLE.

CONDITIONS TO AVOID:

AVOID STRONG OXIDIZING AGENT (SUCH AS SODIUM HYPOCHLORITE, HYPOCHLOROUS ACID).

DISPOSAL:

DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. ALL DISPOSAL METHODS MUST BE IN COMPLIANCE WITH ALL FEDERAL, STATE/PROVINCIAL AND LOCAL LAWS AND REGULATIONS. REGULATIONS MAY VARY IN DIFFERENT LOCATIONS. WASTE CHARACTERIZATIONS AND COMPLIANCE WITH APPLICABLE LAWS ARE THE RESPONSIBILITY SOLELY OF THE WASTE GENERATOR.

FOR UNUSED & UNCONTAMINATED PRODUCT, THE PREFERRED OPTIONS INCLUDE SENDING

(SEE SECTION 3 FOR POTENTIAL HEALTH EFFECTS. FOR DETAILED TOXICOLOGICAL DATA, WRITE OR CALL THE ADDRESS OR NON-EMERGENCY NUMBER SHOWN IN SECTION 1)

HE LD50 FOR SKIN ABSORPTION IN RABBITS IS >10,000 MG/KG.

INGESTION: THE ORAL LD50 FOR RATS IS 17,000 TO 27,200 MG/KG.

INHALATION: THE LC50 FOR 6 HOURS IN RATS WAS >4 MG/LITER.

MUTAGENICITY: IN VITRO MUTAGENICITY STUDIES WERE NEGATIVE.

-----12. ECOLOGICAL INFORMATION -----

(FOR DETAILED ECOLOGICAL DATA, WRITE OR CALL THE ADDRESS OR NON-EMERGENCY NUMBER SHOWN IN SECTION 1)

ENVIRONMENTAL FATE:

MOVEMENT & PARTITIONING:

BASED LARGELY OR COMPLETELY ON INFORMATION FOR SIMILAR MATERIAL(S), I.E. GLYCERINE. BIOCONCENTRATION POTENTIAL IS LOW (BCF LESS THAN 100 OR LOG POW LESS THAN 3). LOG OCTANOL/WATER COEFFICIENT (LOG POW) IS -1.76.

DEGRADATION & PERSISTENCE:

BASED LARGELY OR COMPLETELY ON INFORMATION FOR SIMILAR MATERIAL(S), I.E. GLYCERINE. BIODEGRADATION UNDER AEROBIC LABORATORY CONDITIONS IS HIGH (BOD20 OR BOD18/THOD GREATER THAN 40%). BIODEGRADATION IS EXPECTED TO BE ACHIEVABLE IN SECONDARY WASTEWATER TREATMENT PLANT. INHIBITORY CONCENTRATION (IC50) IN 5-DAY ACTIVATED SLUDGE RESPIRATION INHIBITION TEST (OECD TEST NO. 209) IS GREATER THAN 1000 MG/L. 5-DAY BIOCHEMICAL OXYGEN DEMAND (BOD5) IS 0.54 P/P. 10-DAY BIOCHEMICAL OXYGEN DEMAND (BOD10) IS 0.98 P/P. 20-DAY BIOCHEMICAL OXYGEN DEMAND (BOD20) IS 1.0 P/P. THEORETICAL OXYGEN DEMAND (THOD) IS CALCULATED TO BE 1.22 P/P.

ECOTOXICITY:

BASED LARGELY OR COMPLETELY ON INFORMATION FOR SIMILAR MATERIAL(S), I.E. GLYCERINE. MATERIAL IS PRACTICALLY NON-TOXIC TO FISH ON AN ACUTE BASIS (LC50 GREATER THAN 100 MG/L). ACUTE LD50 FOR FATHEAD MINNOW (PIPEPHALES PROMELAS) IS 44000 MG/L. ACUTE LD50 FOR GOLDFISH (CARASSIUS AURATUS) IS GREATER THAN 5000 MG/L.

PROPANE MSDS

ProductName: Propane
ChemicalName: Propane
Formula: C₃H₈ 4
ChemicalFamily: Alkane (hydrocarbon) 1 0
Use: Various
Synonyms: Dimethylmethane, LP-Gas, Liquefied petroleum gas (LPG)

◆ ◆

NFPA Fire: 4	HMIS Fire: 4	Acute: No
NFPA Health: 1	HMIS Health: 0	Chronic: No
NFPA Reactivity: 0	HMIS Reactivity: 0	Fire: Yes
NFPA Special Hazard:	Mixture: No	Reactive: No
		Sudden Release Pressure: Yes

02. INGREDIENTS - COMPOSITION & INFORMATION

COMPONENT	CAS No.	PERCENT		EXPOSURE GUIDELINES	
		(BY WT.)		OSHA - TWA	ACGIH - STEL
Propane	74-98-6	99.0%	100.0%	1000	Simple Asphyxiant

LD50: None; LC50: None.

03. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

Warning: Flammable liquid gas under pressure.
 Can form explosive mixtures with air.
 May cause frostbite.

Potential Health Effects Information:

Routes of Exposure:

Inhalation: Simple asphyxiant. It should be noted that before suffocation could occur, the lower flammability limit of propane in air would be exceeded; possibly causing both an oxygen-deficient and explosive atmosphere. Exposure to concentrations (> 10%) may cause dizziness. Exposure to atmospheres containing 8-10% or less oxygen will bring about unconsciousness without warning, and so quickly that the individuals cannot help or protect themselves. Lack of sufficient oxygen may cause serious injury or death.

Eye Contact: Contact with liquid or cold vapor can cause freezing of tissue.

Skin Contact: Contact with liquid or cold vapor can cause frostbite.

Chronic Effects: None.

Medical Conditions Aggravated By: None.

Overexposure:

Other Effects Of Overexposure: None.

Carcinogenicity: Propane is not listed by NTP, OSHA or IARC.

04. FIRST AID MEASURES

Inhalation: Persons suffering from lack of oxygen should be removed to fresh air. If victim is not breathing, administer artificial respiration. If breathing is difficult, administer

oxygen. Obtain prompt medical attention.

Eye: Contact with liquid or cold vapor can cause freezing of tissue. Gently flush eyes with lukewarm water. Obtain medical attention immediately.

Skin: Contact with liquid or cold vapor can cause frostbite. Immediately warm affected area with lukewarm water not to exceed 105°F (40°C).

Ingestion: None.

Notes To Physician: None.

05. FIRE FIGHTING MEASURES

Flash Point: -156F (-104C)

Autoignition: 842F (432C)

Flammable Limits - Lower: 2.2%

Flammable Limits - Upper: 9.5%

Extinguishing Media: CO₂, dry chemical, water spray or fog for surrounding area. Do not extinguish until propane source is shut off.

Fire Fighting Instructions: Evacuate all personnel from danger area. Immediately cool container with water spray from maximum distance, taking care not to extinguish flames. If flames are accidentally extinguished, explosive re-ignition may occur. Stop flow of gas if without risk while continuing cooling water spray.

Fire And Explosion Hazards: Propane is easily ignited. It is heavier than air, therefore, it may collect in low areas or travel along the ground where an ignition source may be present. Pressure in a container can build up due to heat, and it may rupture if pressure relief devices should fail to function.

Hazardous Combustion Products: None known.

Sensitivity To Static Discharge: Possible, container should be grounded.

Sensitivity To Mechanical Impact: None.

06. ACCIDENTAL RELEASE MEASURES

Evacuate: Evacuate the immediate area. Eliminate any possible sources of ignition, and provide maximum explosion-proof ventilation. Shut off source of propane, if possible. If leaking from cylinder, or valve, contact your supplier. Never enter a confined space or other area where the concentration is greater than 10% of the lower flammable limit which is 0.22%.

07. HANDLING AND STORAGE

Storage: Specific requirements are listed in NFPA 58. Cylinder storage locations should be well-protected, well-ventilated, dry, and separated from combustible materials. Cylinders should never knowingly be allowed to reach a temperature exceeding 125°F (52°C). Cylinders of propane should be separated from oxygen cylinders or other oxidizers by a minimum distance of 20 ft., or by a barrier of non-combustible material at least 5 ft. high having a fire resistance rating of at least ½ hour. Full and empty cylinders should be segregated. Use a first-in, first-out inventory system to prevent full containers from being stored for long periods of time.

Cylinders should be stored upright with valve protection cap in place and firmly secured to prevent falling or being knocked over. Protect cylinders from physical damage; do not drag, roll, slide or drop. Use a suitable hand truck for cylinder movement. Post "No Smoking or Open Flames" signs in the storage areas. There should be no sources of ignition. All electrical equipment should be explosion proof in the storage and use areas. Storage areas must meet national electric codes for class 1 hazardous areas.

Handling: Propane is heavier than air and may collect in low areas that are without proper ventilation. Leak check system with leak detection solution, never with flame. If user experiences difficulty operating cylinder valve, discontinue use and contact supplier. Never insert an object (e.g., wrench, screwdriver, pry bar, etc.) into valve cap openings. Doing so may damage valve, causing a leak to occur. Use an adjustable strap wrench to remove over-tight or rusted caps. Non-sparking tools

should be used. Never strike an arc on a compressed gas cylinder or make a cylinder a part of an electrical circuit. Electrically bond and ground cylinder when transferring liquid product. For additional precautions in using propane see Section 16 - Other Information.

08. EXPOSURE CONTROLS - PERSONAL PROTECTION

- Engineering Controls:
 - Ventilation: Natural or mechanical to prevent accumulation in worker's breathing zone above exposure limits. (See Section 2).
- Personal Protective Equipment (PPE):
 - Clothing: Cotton Clothing is recommended for use to prevent static electric buildup.
 - Glasses: Safety glasses are recommended when handling cylinders.
 - Shoes: Safety shoes are recommended when handling cylinders.
 - Gloves: Work gloves are recommended when handling cylinders.
 - Respirator: None required in general use.
 - Emergency Use: Self-contained breathing apparatus (SCBA) or positive pressure airline with mask are to be used in oxygen-deficient atmosphere. Respirators will not function. Before entering area, you must check for flammable and oxygen deficient atmospheres.

09. PHYSICAL AND CHEMICAL PROPERTIES

- Physical State: Gas
- Color: Colorless
- Odor: Unodorized propane has a slightly sweet odor. If an odorant has been added it will have a strong unpleasant odor.
- Molecular Weight: 44.097
- Boiling Point: -43.67°F (-42.04°C) @ 1 atm
- Specific Gravity: 1.5223 At 70°F (21.1°C) @ 1 atm, Air = 1
- Freezing/Melting Point: -305.84F (-187.69C) at 1 atm
- Vapor Pressure: 109.73 psig, (756.56 kPa) at 70°F (21.2°)
- Vapor Density: 0.110 lb./cu ft (1.1.77kg/CuM), At 70°F (21.1°C) @ 1 atm
- Water Solubility: .065 Vol./Vol. At 100° F (37.8°C)
- Expansion Ratio: 1 to 290 at 70°F (21.1°C)
- pH: Not applicable
- Odor Threshold: 1800 mg/CuM
- Evaporation Rate: Not Applicable - Gas
- Coefficient Of Water/Oil Distribution: Information not available

10. STABILITY AND REACTIVITY

- Chemical Stability: Stable
- Conditions To Avoid: None.
- Incompatibility With Other Materials: Oxidizing agents.
- Hazardous Decomposition Products: None.
- Hazardous Polymerization: Will not occur

11. TOXICOLOGICAL INFORMATION

- Other Studies Relevant To Material: Propane is nontoxic and is a simple asphyxiant, however it does have slight anesthetic properties and higher concentrations may cause dizziness.
- Irritancy Of Material: None.
- Reproductive Effects: None.
- Teratogenicity: None.
- Synergistic Materials: None.
- Sensitization To Material: None.
- Mutagenicity: None.

12. ECOLOGICAL INFORMATION

- ECOTOXICITY: No adverse ecological effects are expected. Propane does not contain any Class I

or Class II Ozone depleting chemicals (40 CFR Part 82). Propane is not listed as a marine pollutant by DOT (49 CFR Part 171).

13. DISPOSAL CONSIDERATIONS

Waste Disposal Method: Do not attempt to dispose of residual or unused quantities. Return cylinder to supplier.

Residual product within process system may be burned at a controlled rate, if a suitable burning unit (flare stack) is available on site. This shall be done in accordance with federal, state, and local regulations.

14. TRANSPORT INFORMATION

DOT/IMO Shipping Name: Propane

HAZARD CLASS: 2.1 (Flammable gas.)

Identification Number: UN 1978*

PIN: 1978

Product RQ: None.

Shipping Label: Flammable Gas.

Placard (When Required): Flammable gas.

Special Shipping Information: Cylinders should be transported in a secure position, in a well ventilated vehicle. The transportation of compressed gas cylinders in automobiles or in closed-body vehicles can present serious hazards and should be discouraged.

Special Shipping Information *For domestic transportation only: The identification number UN 1075 may be used in place of the identification number UN 1978. The identification number used must be consistent on package markings, shipping papers, and emergency response information (Special provision 19 from 49 CFR 172.101).

MATERIAL SAFETY DATA SHEET
VIKING OFFICE 2 PACK DUSTER

HMIS: 1-0-1-1

SECTION I - CHEMICAL INFORMATION

Trade Name: "Dymel" 134a
 Chemical Name: 1,1,1,2-Tetrafluoroethane
 Chemical Manufacturer: DuPont
 Address & Phone #: 1007 Market Street, Wilmington, DE 19898; 1-800-441-7515
 Product Manufacturer: Falcon Safety Products
 Address & Phone #: 25 Chubb Way Branchburg, NJ 08876 908-707-4900
 Emergency Phone #: Chemtrec 1-800-424-9300
 Mfg. Model No.: VPNXL2
 FSPID: 0095

SECTION II - HAZARDOUS INGREDIENTS

Ingredients	CAS #	%	TLV	PEL	UNITS
1,1,1,2-Tetrafluoroethane	811-97-2	100%			

SECTION III - FIRE AND EXPLOSION HAZARD DATA

Flash Point - Will not burn

Flammable Limits

LEL - NA

UEL - NA

HFC-134a is not flammable at ambient temperatures and atmospheric pressure. However, HFC-134a has been shown in tests to be combustible at pressure as low as 5.5 psig at 177 deg C (351 deg F) when mixed with air at concentrations of generally more than 60 volume % air. At lower temperatures, higher pressures are required for combustibility. Experimental data have also been reported which indicate combustibility of HFC-134a in the presence of certain concentrations of chlorine.

Fire and Explosion Hazards - Cylinders may rupture under fire conditions. Decomposition may occur.

Extinguishing Media - As appropriate for combustibles in area.

Special Fire Fighting Procedures - Cool cylinders with water spray. Self-contained breathing apparatus (SCBA) may be required if cylinders rupture or release under fire conditions.

SECTION IV - ACCIDENTAL RELEASE MEASURES

Safeguards (Personnel) - NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Accidental Release Measures: Ventilate area, especially low or enclosed places where heavy vapors might collect. Remove open flames. Use self-contained breathing apparatus (SCBA) if large spill or leak occurs.

Viking Air Duster
Stock# VPNXL2

Falcon Safety Products

Model #DPNXL

SECTION V - HAZARDS IDENTIFICATION

Potential Health Effects - Inhalation of high concentrations of vapor is harmful and may cause heart irregularities, unconsciousness of death. Intentional misuse or deliberate inhalation may cause death without warning. Vapor reduces oxygen available for breathing and is heavier than air. Liquid contact can cause frostbite.

Human Health Effects - Overexposure by inhalation to very high concentrations may cause temporary alteration of the heart's electrical activity with irregular pulse, palpitations, or inadequate circulation. Skin contact may cause frostbite.

Individuals with preexisting diseases of the central nervous or cardiovascular system may have increased susceptibility to the toxicity of excessive exposures.

Carcinogenicity Information - None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

SECTION VI - FIRST AID

Inhalation - If high concentrations are inhaled, immediately remove to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

Skin Contact - In cases of contact, immediately flush skin with plenty of water for at least 15 minutes. Remove contaminated clothing and shoes. Call a physician. Treat for frostbite if necessary by gently warming affected area. Wash contaminated clothing before reuse.

Eye Contact - In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

Ingestion - Ingestion is not considered a potential route of exposure.

Notes to Physicians - Because of possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, should be used with special caution only in situations of emergency life support.

SECTION VII - STORAGE

Storage - Clean, dry area. Do not heat above 52 deg C (125 deg F).

SECTION VIII - PHYSICAL DATA

Boiling Point	-26.5 C (-15.7F) @ 736 mm Hg
Vapor Pressure	96 psia at 25 deg C (77 deg F)
Vapor Density	3.60 (Air = 1.0) at 25 deg C (77 deg F)
% Volatiles	100 WT %
Solubility in Water	0.15 WT% @ 25 C (77 F) and 14.7 psia
Odor	Slight ethereal
Form	Liquefied gas
Color	Colorless
Density	1.21 g/cc at 25 deg C (77 deg F) - Liquid

Viking Air Duster
Stock# VPNXL2

Falcon Safety Products

Model #DPNXL

SECTION IX - HAZARDOUS REACTIVITY

Chemical Stability - Material is stable. However, avoid open flames and high temperatures.
Incompatibility with Other Materials - Incompatible with alkali or alkaline earth metal - powdered Al, Zn, Be, etc.
Decomposition - Decomposition products are hazardous. This material can be decomposed by high temperatures (open flames, glowing metal surfaces, etc.) forming hydrofluoric acid and possibly carbonyl fluoride.
Polymerization - Polymerization will not occur.

===== SECTION III - PHYSICAL/CHEMICAL CHARACTERISTICS =====

BOILING RANGE: -44 - 240 DEG. F
DENSITY: 6.26 lb/gl
V.O.C.: 4.84 lb/gl 581 g/l (less water and exempt solvents)
4.84 lb/gl 580 g/l (Emitted VOC)
LB HAP/ LB SOLIDS: 1.3
LB VOC/LB SOLIDS: 3.43
IDS % BY WEIGHT: 22.5
OR DENSITY: Heavier than air.
EVAPORATION RATE: Fast (compared to n-butyl acetate)
SOLUBILITY IN WATER: Negligible
APPEARANCE AND ODOR: Solvent odor.

===== SECTION IV - FIRE AND EXPLOSION HAZARD DATA =====

FLASH POINT: -216 DEG. F METHOD USED: theoretical
FLAMMABLE LIMITS IN AIR BY VOLUME- LOWER: 1 UPPER: 19
EXTINGUISHING MEDIA: FOAM, CO2, DRY CHEMICAL, WATER FOG
SPECIAL FIREFIGHTING PROCEDURES:

Evacuate all unnecessary personnel. Use full protective equipment, including self-contained breathing apparatus. Use water spray, preferably fog, to cool closed containers to prevent pressure build-up and possible explosion. Direct water stream is not recommended for oil base fires. Product may float and reignite on surface of water. Do not allow product or runoff from fire control to enter storm or sanitary sewers, lakes, rivers, streams or waterways.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

Explosive air-vapor mixtures may form which are dangerous when exposed to heat or flame. Vapors are heavier than air and may travel along the ground, or be moved by ventilation, and ignited by pilot lights, stoves, heaters, electric motors, sparks, flame, smoking, static discharge or other ignition sources even at locations distant from material handling site. Product is propelled with flammable propellant. Contents under pressure. Exposure to heat, or prolonged exposure to sun, may cause bursting.

=====
SECTION V - REACTIVITY DATA
=====

STABILITY:

Stable

CONDITIONS TO AVOID:

High temperature and humidity, ignition sources and vapor build-up.

INCOMPATIBILITY (MATERIALS TO AVOID):

Strong Oxidizing agents Acids Bases Halogenated Hydrocarbons Manganese Trioxide Trifluoride
Carbon Monoxide Carbon Dioxide Hydrocarbons Nitrogen Oxides Formaldehyde Other Organic Compounds Silicon
Tetrafluoride Phosphorous Compounds

HAZARDOUS POLYMERIZATION:

Will not occur.

=====
SECTION VI - HEALTH HAZARD DATA AND SYMPTOMS OF EXPOSURE
=====

PRIMARY ROUTE(S) OF EXPOSURE: Inhalation, skin contact.

INHALATION:

Vapors and mists cause severe irritation to nose, throat and lungs (burning, stinging, coughing). May cause headache, dizziness, nausea, weakness, shortness of breath and loss of coordination. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Exposure to extremely high vapor concentrations may cause unconsciousness and asphyxiation.

EYE CONTACT:

Contact with dusts and particles causes irritation (redness, watering, itching, stinging, blurred vision). Contact with liquid or vapors causes severe irritation (redness, watering, itching, stinging, blurred vision).

SKIN CONTACT:

Contact causes severe irritation (dryness, itching, cracking, rash and swelling).

SKIN ABSORPTION:

May be absorbed through the skin in harmful amounts. Repeated and prolonged contact may have a cumulative effect. Symptoms may include headache, dizziness, nausea, weakness, loss of coordination.

SWALLOWING:

Causes nausea, vomiting, diarrhea and central nervous system depression (headache, dizziness, giddiness, nausea, loss of coordination).

CHRONIC EFFECTS FROM LONG TERM EXPOSURE:

Contains ingredients suspected of causing or known to cause damage to: kidneys, liver, lungs, eyes, brain and nervous system, dermatitis or other skin disorders.
This product contains a form of Crystalline Silica. Long-term exposure to high levels of Crystalline Silica dusts may result in silicosis, a disabling lung disease. Always wear appropriate respiratory protection when exposed to sanding or

M A T E R I A L S A F E T Y D A T A S H E E T

910963.00-16

Page: 3
6/21/2007

...ding dusts.

The following statement is required by California Proposition 65. Warning! This product contains a chemical known to the state of California to cause cancer and birth defects, or other reproductive harm .

CARCINOGEN:

Crystalline Silicas are classified by IARC as potential human carcinogens. Inhalation of Crystalline Silica dusts may cause lung tumors. Risk of cancer depends on level and duration of exposure.

NTP CARCINOGEN: Yes

IARC MONOGRAPHS: Yes

OSHA REGULATED: No

MEDICAL CONDITIONS POSSIBLY AGGRAVATED BY EXPOSURE:

Respiratory tract irritation, nausea, eye disorders, skin disorders, sensitization to chemical substances.

=====**SECTION VII - EMERGENCY AND FIRST AID PROCEDURES**=====

INHALATION:

If affected by breathing odors or vapors, remove to fresh air. Get medical attention if symptoms persist.**EYE CONTACT:** Immediately flush with plenty of water for 15 minutes, while lifting upper and lower eyelids. Get medical attention.

SKIN CONTACT:

Immediately wash with soap and water. Remove contaminated clothing and shoes. Wash or clean thoroughly before reuse. Get medical attention if irritation persists.

SWALLOWING:

In case of accidental ingestion call Poison Control Center (1-800-222-1222) or physician immediately.**OTHER:** Have Material Safety Data Sheet available when calling Poison Control Center (1-800-222-1222) or physician; or when going to the emergency room.

=====**SECTION VIII - SAFE HANDLING AND USE INFORMATION**=====

RESPIRATORY PROTECTION:

Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates vapor/mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's instructions for use.

VENTILATION:

USE ONLY WITH ADEQUATE VENTILATION. Provide mechanical ventilation, local exhaust or other appropriate means of ventilation to prevent vapor build-up.

HAND PROTECTION:

Wear gloves to avoid skin contact.**EYE PROTECTION:**

Wear safety glasses, with side shields, designed to protect eyes against liquid splash and mists. Note: Contact lenses may contribute to the severity of an eye injury and should not be worn when working with chemicals.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT:

Wear protective clothing to avoid skin contact with liquid or mists.

WORK/HYGIENIC PRACTICES:

Eye washes and safety showers are recommended in the workplace. Wash hands after using and before eating, drinking or using tobacco products. Thoroughly clean contaminated clothing and shoes before reuse. Periodically monitor exposure levels to hazardous ingredients listed in section II and review permissible limits.

=====**SECTION IX - SPILL AND LEAK PROCEDURES**=====

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

Eliminate ignition sources and ventilate area. Evacuate unnecessary personnel. Wear full protective equipment. Dike and contain spill with inert material. Transfer liquid to containers for disposal or recovery. Prevent material from entering storm drains or sanitary sewers and open bodies of water.

WASTE DISPOSAL METHOD:

Empty material and empty containers must be disposed of in accordance with all local, state and federal environmental control regulations. Use only approved waste management facilities.

=====**SECTION X - SPECIAL PRECAUTIONS**=====

010963.00-16

KEEP OUT OF REACH OF CHILDREN.

FOR INDUSTRIAL USE ONLY!

RECAUTIONS TO BE TAKEN IN HANDLING AND STORING:

Keep liquid spray and vapors away from heat, sparks and flame. Turn off or remove all sources of ignition. Use proper methods of ventilation to prevent vapor build-up. Avoid spraying hot surfaces. Avoid breathing vapors, spray mists and grinding or grinding dusts. Avoid contact with eyes and skin. Do not take internally. Use adequate methods of ventilation, respiratory and personal protective equipment. Do not reuse, weld, drill or heat empty containers which may contain explosive vapors. Follow label warnings until thoroughly cleaned or sent for disposal. Do not heat, puncture or incinerate containers. Contents are under pressure and may contain explosive vapors, even when empty. Do not remove or deface label.

OTHER CAUTIONS:

Contents under pressure. Do not store above 120 deg. F (50 deg. C) or permit prolonged exposure to sunlight. Protect containers from damage. Store in buildings or areas designed and protected for storage of aerosols. Do not store where contact with incompatible material could occur, even during an accidental spill or release. To avoid spontaneous combustion, soak soiled oily rags and waste in water filled metal containers.

=====
SECTION XI - DISCLAIMER

DISCLAIMER: THE INFORMATION CONTAINED HEREIN HAS BEEN COMPILED FROM SOURCES CONSIDERED TO BE RELIABLE. TO THE BEST OF OUR KNOWLEDGE AND BELIEF ALL INFORMATION IS ACCURATE AND IS PROVIDED IN GOOD FAITH. HOWEVER, NO GUARANTEE OF ACCURACY IS MADE OR IMPLIED.

I. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Wesmar Products
1440 NW 45th ST
Seattle, WA 98107
(206) 782-8186

Emergency telephone number

1-800-ASHLAND
(1-800-274-5263)

Product name	WESMAR VLCD
Product code	CBWPC004G03-U
Product Use Description	No data

2. HAZARDS IDENTIFICATION

Emergency Overview

Appearance: liquid, fruity, white

WARNING! Moderate skin irritant, Severe eye irritant.

Potential Health Effects

Routes of Exposure
No data

Eye Contact
Can cause severe eye irritation. Symptoms include stinging, tearing, redness, and swelling of eyes. Can injure eye tissue.

Skin Contact
May cause mild skin irritation. Prolonged or repeated contact may dry the skin. Symptoms may include redness, burning, drying and cracking of skin, and skin burns.

Ingestion
Swallowing small amounts of this material during normal handling is not likely to cause harmful effects. Swallowing large amounts may be harmful. This material can get into the lungs during swallowing or vomiting. This results in lung inflammation and other lung injury.

Inhalation
Breathing small amounts of this material during normal handling is not likely to cause harmful effects. Breathing large amounts may be harmful.

ASHLAND SAFETY DATA SHEET

Page: 2
Revision Date: 04/03/2007
Print Date: 4/24/2007
MSDS Number: R0405707
Version: 1.

WESMAR VLCD CBWPC004G03-U

Aggravated Medical Condition

Preexisting disorders of the following organs (or organ systems) may be aggravated by exposure to this material: skin, lung (for example, asthma-like conditions)

Symptoms

Signs and symptoms of exposure to this material through breathing, swallowing, and/or passage of the material through the skin may include: stomach or intestinal upset (nausea, vomiting, diarrhea), irritation (nose, throat, airways), cough, difficult breathing, lung damage

Target Organs

Studies with rabbits indicate that sustained, occluded skin contact with undiluted surfactant may result in the development of inflammatory changes in the lung. Overexposure to this material (or its components) has been suggested as a cause of the following effects in laboratory animals: mild, reversible liver effects, mild, reversible kidney effects

Carcinogenicity

Based on the available information, this material cannot be classified with regard to carcinogenicity. This material is not listed as a carcinogen by the International Agency for Research on Cancer (IARC), the National Toxicology Program (NTP), or the Occupational Safety and Health Administration (OSHA).

Reproductive Hazard

There are no data available for assessing risk to the fetus from maternal exposure to this material.

Other Information

When heated to temperatures above 150 degrees C in the presence of air, this product can form formaldehyde vapors. Formaldehyde has been identified as a carcinogen by the International Agency for Research on Cancer (IARC), the National Toxicology Program (NTP) and the Occupational Safety and Health Administration (OSHA). Formaldehyde is irritating to the eyes, nose, throat, and airways, and can cause an allergic reaction (causes narrowing of the air passages of the lungs, sweating, flushing, hives, rapid heart rate, and lowered blood pressure). In addition, formaldehyde can cause an allergic skin reaction (delayed skin rash which may be followed by blistering, scaling and other skin effects). It is harmful if inhaled, swallowed or absorbed through skin.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Components	CAS-No.	Concentration

4. FIRST AID MEASURES

Eyes

If symptoms develop, immediately move individual away from exposure and into fresh air. Flush eyes gently with water for at least 15 minutes while holding eyelids apart; seek immediate medical attention.

Skin

Remove contaminated clothing. Wash exposed area with soap and water. If symptoms persist, seek medical attention. Launder clothing before reuse.

Ingestion

Seek medical attention. If individual is drowsy or unconscious, do not give anything by mouth; place individual on the left side with the head down. Contact a physician, medical facility, or poison control center for advice about whether to induce vomiting. If possible, do not leave individual unattended.

Inhalation

If symptoms develop, move individual away from exposure and into fresh air. If symptoms persist, seek medical attention. If breathing is difficult, administer oxygen. Keep person warm and quiet; seek immediate medical attention.

Notes to Physician

Hazards: This material is an aspiration hazard. Potential danger from aspiration must be weighed against possible oral toxicity (See Section 2 - Swallowing) when deciding whether to induce vomiting.

Treatment: No information available.

5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media

alcohol-resistant foam, Agents approved for class B hazards or water fog., carbon dioxide (CO₂), dry chemical

Hazardous Combustion Products

May form:, carbon dioxide and carbon monoxide, formaldehyde, hydrogen, silicon oxides, various hydrocarbons

WESMAR VLCD CBWPC004G03-U

Precautions for Fire-Fighting

Wear full firefighting turn-out gear (full Bunker gear), and respiratory protection (SCBA). DO NOT direct a solid stream of water or foam into hot, burning pools of liquid since this may cause frothing and increase fire intensity. Frothing can be violent and possibly endanger any firefighter standing too close to the burning liquid.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions

For personal protection see section 8. Spills of this material are very slippery.

Environmental Precautions

No data

Methods for Cleaning Up

Absorb liquid on vermiculite, floor absorbent or other absorbent material. Flush area with water. Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed. Stop spill at source, dike area of spill to prevent spreading, pump liquid to salvage tank. Remaining liquid may be taken up on sand, clay, earth, floor absorbent, or other absorbent material and shoveled into containers.

7. HANDLING AND STORAGE

Handling

Containers of this material may be hazardous when emptied. Since emptied containers retain product residues (vapor, liquid, and/or solid), all hazard precautions given in the data sheet must be observed. This material is slippery when wet. Ethylene oxide may accumulate in the headspace of shipping and storage containers and in enclosed areas where the product is being handled or used. Ethylene oxide is listed as carcinogenic by the International Agency for Research on Cancer (IARC), the National Toxicology Program (NTP) and the Occupational Safety and Health Administration (OSHA). Warning. Sudden release of hot organic chemical vapors or mists from process equipment operating at elevated temperature and pressure, or sudden ingress of air into vacuum equipment, may result in ignitions without the presence of obvious ignition sources. Published "autoignition" or "ignition" temperature values cannot be treated as safe operating temperatures in chemical processes without analysis of the actual process conditions. Any use of this product in elevated temperature processes should be thoroughly evaluated to establish and maintain safe operating conditions.

Storage

Store in closed containers in a dry, well-ventilated area.

WESMAR VLCD CBWPC004G03-U

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Guidelines

GLYCERINE		56-81-5	
ACGIH	time weighted average	10 mg/m3	Mist.
OSHA Z1	Permissible exposure limit	5 mg/m3	Respirable fraction.
OSHA Z1	Permissible exposure limit	15 mg/m3	Total dust.

General Advice

These recommendations provide general guidance for handling this product. Personal protective equipment should be selected for individual applications and should consider factors which affect exposure potential, such as handling practices, chemical concentrations and ventilation. It is ultimately the responsibility of the employer to follow regulatory guidelines established by local authorities.

Exposure Controls

Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below TLV(s). This product may contain small amounts of ethylene oxide which could potentially accumulate in the headspace of shipping and storage containers and in enclosed areas where the product is being handled or used. Provide adequate ventilation to control exposures to within the OSHA permissible exposure limits of 1 ppm (TWA) and 5 ppm (STEL). Provide adequate ventilation to control formaldehyde exposures to within the OSHA permissible exposure limits of 0.75 ppm (TWA) and 2 ppm (STEL) or 0.3 ppm (ACGIH ceiling).

Eye Protection

Chemical splash goggles and face shield (8" min.) in compliance with OSHA regulations are advised; however, OSHA regulations also permit other type safety glasses. (Consult your industrial hygienist.)

Skin and Body Protection

Wear resistant gloves (consult your safety equipment supplier). To prevent skin contact, wear impervious full-body protective clothing. Other protective equipment: eyewash station, emergency shower.

Respiratory Protection

If workplace exposure limit(s) of product or any component is exceeded (see exposure guidelines), a NIOSH-approved air supplied respirator is advised in absence of proper environmental control. OSHA regulations also permit other NIOSH respirators (negative pressure type) under specified conditions (see your industrial hygienist). Engineering or administrative controls should be implemented to reduce exposure.

WESMAR VLCD CBWPC004G03-U

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state	liquid
Form	No data
Colour	white
Odour	fruity
Boiling point/range	No data
pH	No data
Flash point	No data
Evaporation rate	No data
Explosion limits	No data
Vapour pressure	No data
Vapour density	No data
Density	1.01 g/cm ³ 8.4 lb/gal @ 60.00 °F / 15.56 °C
Solubility	No data
Partition coefficient (n-octanol/water)	No data
Autoignition temperature	No data

10. STABILITY AND REACTIVITY

Stability
Stable.

Conditions to Avoid

Incompatible Products
Avoid contact with:, strong oxidizing agents

Hazardous Decomposition Products
May form:, carbon dioxide, carbon monoxide, formaldehyde, hydrogen, silicon oxides, various hydrocarbons

Hazardous Reactions
Product will not undergo hazardous polymerization.

Thermal Decomposition
No data

WESMAR VLCD CBWPC004G03-U

11. TOXICOLOGICAL INFORMATION

Acute Oral Toxicity

GLYCERINE	LD 50 Rat: 12,600 mg/kg
SURFACTANT	LD 50 Rat: 3,000 mg/kg

Acute Inhalation Toxicity

GLYCERINE	LC 50 Rat: 570 mg/m3, 1 h

16. OTHER INFORMATION

The information accumulated herein is believed to be accurate but is not warranted to be whether originating with the company or not. Recipients are advised to confirm in advance of need that the information is current, applicable, and suitable to their circumstances.

This MSDS has been prepared by Ashland's Environmental Health and Safety Department (1-800-325-3751).

MATERIAL SAFETY DATA SHEET

Section 1 - Material Identity

Product Name: Vitreo Polymeric Shield Product #: TM 2408	Product Use: Polishing Compound
Manufacturer's Supplier's Name & Address	Telephone Number -
Wesmar Products, Inc. 1440 NW 45 th Street Seattle, WA 98107 (206)782-8186	Days: (607) 753-6893 Nights: CHEMTREC: 800/424-9300
DOT Proper Shipping Name: Cleaning Compound	EPA Hazardous Waste Class: N/A
DOT Shipping ID Number: Not Regulated	

Section 2 - Physical & Chemical Characteristics

Vapor Density (air=1): N/A	Solubility in Water by Weight: Medium	Boiling Point: 760 mmHg N/A
Appearance and Odor: Slightly-Thick purple liquid with coconut odor.	Specific Gravity: 0.80-1.00	Freezing Point: N/A
Vapor Pressure at 20°C: N/A	Percent Volatile by Volume: >50%	Evap. Rate (Butyl Acetate=1): N/A

Section 3 - Ingredients & Specifications

Materials	%	TVL Units	Hazard	CAS Number
Ethyl Acrylate	trace	none	Irritant	140-88-5
Aluminum Silicate	<25	10 mg/m3	dust	66402-68-4
Mineral Spirits	<35	100 ppm	Combustible	64742-48-9

Section 4 - Fire & Explosion Hazard Data

Flash Point & Method: 200 FT..O.C.
Extinguishing Media: Any
Special Fire Fighting Procedures: N/A
Unusual Hazards: N/A
Flammable Limits in Air % by volume: Lower: N/A Upper: N/A

Section 5 - Health Hazard Data

Route of Entry	a) Skin Ingestion
Effects of Acute Exposure:	a) Skin Contact: Mild irritation, avoid contact with abraded skin.
	b) Eye Contact: May cause irritation, redness, tearing.
	c) Swallowing: May cause mild irritation to gastrointestinal tract, vomiting, nausea, diarrhea.
	d) Skin Absorption: N/A
	e) Inhalation: Slight Irritation
Chronic Effects of Overexposure:	N/A
Other Health Hazards:	N/A

Emergency and First Aid Procedures:	a) Skin: Rinse with water. If irritated wash with mild soap and water. Contact physician.
	b) Eyes: Flush immediately with large amount of water for 15 minutes lifting upper and lower lids occasionally. Get medical attention.
	c) Swallowing: Do NOT induce vomiting. Give two (2) glasses of water. Contact physician immediately.
	d) Inhalation: Remove to fresh air. Administer oxygen if breathing is difficult. Contact physician.

Carcinogen Evaluation

Raw material components contained in this product are not known or suspected to be carcinogens.

Section 6 - Reactivity Data

Stability -	Yes
Conditions to Avoid for Stability	See below
Incompatibility (Materials to Avoid) -	Oxidizing Agents
Hazardous Polymerization -	Will not occur
Hazardous Decomposition/Byproducts	Thermal decomposition may yield acrylic monomer

Section 7 - Spill or Leak Procedures

Release/Spill Procedures	Steps to be Taken: Mop up spill for reuse/disposal
	Waste Disposal Method: Above in accordance with local, state and federal regulations

Section 8 - Special Protection Information

Protective Equipment	Eyes: Safety goggles
	Respirator: Not required
	Gloves: Protective gloves
Ventilation	Other: None
	General Mechanical: None required
	Other:

Section 9 - Special Precautions

Handling & Storage	General: N/A
	Other: N/A

Section 10- Other Information

The information contained herein is based on data considered accurate. However, the information is provided without any warranty, expressed or implied, regarding its correctness. The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility for personal injury or property damage to endees, users or third parties caused by the material. We also do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product.

MATERIAL SAFETY DATA SHEET

Westech Aerosol Corporation
Olympic View Industrial Park
5405 Constance Drive SW
Port Orchard, WA 98367

Chemtrec Emergency Phone: 800-424-9300
Westech Emergency Phone: 360-674-2051
Date Prepared: 5-31-01
Date Revised: 3-21-03

Section 1 - Identity (Canisters)

Label Name: WT-NFMP & WT-NFHS
Trade Name: Westech Non Flammable Adhesive

Section 2 - Hazardous Ingredients

Components- Hazardous Components 1% or greater; Carcinogens 0.1% or greater.

Chemical Name	CAS Number	Sara III List	OSHA (PPM)	ACGIH TLV(PPM)	Carcinogen Ref. Source
Trichloroethylene	79-01-6	YES	100	50	NO

Section 3 - Physical and Chemical Characteristics

Propellant: Non- Flammable Proprietary
VOC: 508 g/L for HS, 455 g/L for MP
Boiling Point: 189°F
Specific Gravity: Concentrate Only 1-1.8
Vapor Pressure: 58mm
Evaporation Rate: >1
Solubility in Water: Negligible
Water Reactive: No
Appearance and Odor: Clear, organic solvent odor

Section 4 - Fire and Explosion Hazard Data

Non -Flammable

Limits:

LEL: 8% @ 77°F

UEL: 10.5% @ 77°F

Extinguishing Media: Dry Chemical, CO2

Unusual Fire and Explosion Hazards: At elevated temperatures (over 130F), containers may vent, rupture or burst.

Section 5 - Health Hazard Data

Primary Routes of Entry: Inhalation and Skin
Acute Effects: Liquid is irritating to eyes and Skin. Prolonged exposure to skin can cause a burning sensation. Breathing vapors may cause lightheadedness, dizziness, headache, and nausea in extreme cases unconsciousness and death.
Chronic Effects: Prolonged and repeated exposure may produce depression, fatigue loss of appetite, vomiting, cough, loss of sense of balance, dermatitis and nerve damage.

Medical Conditions generally aggravated by Exposure: Existing eye, skin or upper respiratory conditions.

Emergency and First Aid Procedures:

Eye Contact: Flush with water for 15 minutes, seek medical attention
Skin Contact: Wash with soap and Water, if irritated seek medical attention
Inhalation: Remove to fresh air. Resuscitate if necessary, get medical attention
Ingestion: Do not induce vomiting, get medical attention.

Section 6 - Reactivity Data

Stability: Stable
Hazardous Polymerization: Will not occur
Incompatibility: Strong oxidizing agents
Conditions to Avoid: Open flames and high heat.

Section 7 - Precautions for Safe Handling

Use Respiratory Protection: If vapor concentration exceeds TLV, use respirator approved by NIOSH
Ventilation: Use ventilation to keep vapor concentration below TLV.
Eye Protection: Safety Goggles Recommended
Waste Disposal Method: Dispose of in accordance with all Federal, state, and local regulations.
Steps to be taken in Case Material is Released or Spilled: Remove all sources of ignition. Ventilate spill area to allow solvents to evaporate and collect in suitable containers for disposal. Use appropriate person protective equipment.
Precautions to be taken in Handling and Storage: Store containers in cool, dry area. Do not puncture inaccurate containers.

Section 8 - Control Measures

Respiratory Protection: If workplace exposure is exceeded a NIOSH approved respirator is advised.
Ventilation: Provide sufficient mechanical ventilation to maintain exposure below PEL.
Eye Protection: Use chemical splash goggles

Section 9 - Shipping Information

Proper Shipping Name: Trichloroethylene (mixture) **Hazard Class:** 6.1
Identification Number: UN1710 **Packing Group:** III
Supplemental Info: Adhesive

We believe the statements, technical information and recommendations contained herein are reliable, they are given without warranty or guarantee of any kind.

3. Hazards Identification

Emergency Overview

Danger! Extremely flammable. Keep away from heat, sparks, flame and all other sources of ignition. Vapors may cause flash fire or ignite explosively. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and all other sources of ignition during use and until all vapors are gone. Beware of static electricity that may be generated by synthetic clothing and other sources.

OSHA Regulatory Status: This material is classified as hazardous under OSHA regulations.

Health Hazards (Acute and Chronic)

Inhalation Acute Exposure Effects:

Vapor harmful. May cause dizziness; headache; watering of eyes; irritation of respiratory tract; weakness; drowsiness; nausea; numbness in fingers, arms and legs; depression of central nervous system; loss of appetite; fatigue; hallucinations; light headedness; visual disturbances; giddiness and intoxication; sleepiness; cough and dyspnea; cold, clammy extremities; diarrhea; vomiting; dilation of pupils; spotted vision. Severe overexposure may cause convulsions; unconsciousness; coma; and death. Intentional misuse of this product by deliberately concentrating and inhaling can be harmful or fatal.

Skin Contact Acute Exposure Effects:

May be absorbed through the skin. May cause irritation; numbness in the fingers and arms; drying of skin; and

MATERIAL SAFETY DATA SHEET

LACQUER THINNER

Page: 2

Printed: 12/13/2005

Revision: 06/16/2005

Supersedes Revision: 05/24/2005

dermatitis. May cause increased severity of symptoms listed under inhalation.

Eye Contact Acute Exposure Effects:

This material is an eye irritant. May cause irritation; burns; conjunctivitis of eyes; and corneal ulcerations of the eye. Vapors may irritate eyes.

Ingestion Acute Exposure Effects:

Poison. Cannot be made non-poisonous. May be fatal or cause blindness. May cause dizziness; headache; nausea; vomiting; burning sensation in mouth, throat, and stomach; loss of coordination; depression of the central nervous system; narcosis; stupor; gastrointestinal irritation; liver, kidney, and heart damage; diarrhea; loss of appetite; coma and death. May produce symptoms listed under inhalation.

Chronic Exposure Effects:

Reports have associated repeated and prolonged overexposure to solvents with neurological and other physiological damage. Prolonged or repeated contact may cause dermatitis. Prolonged skin contact may result in absorption of a harmful amount of this material. May cause conjunctivitis; gastric disturbances; insomnia; dizziness; headache; weakness; fatigue; nausea; heart palpitations; skin irritation; numbness in hands and feet; permanent central nervous system changes; some loss of memory; pancreatic damage; giddiness; visual impairment or blindness; kidney or liver damage; and death. May cause symptoms listed under inhalation.

Signs and Symptoms Of Exposure

Primary Routes of Exposure:

Inhalation, ingestion and dermal.

Medical Conditions Generally Aggravated By Exposure

Diseases of the skin, eyes, liver, kidneys, central nervous system and respiratory system.

OSHA Hazard Classes:

HEALTH HAZARDS : N/E

PHYSICAL HAZARDS : N/E

TARGET ORGANS & EFFECTS: N/E

4. First Aid Measures

Emergency and First Aid Procedures

Inhalation:

If user experiences breathing difficulty, move to air free of vapors, Administer oxygen or artificial medical assistance can be rendered.

Skin Contact:

Wash with soap and large quantities of water and seek medical attention if irritation from contact persists.

Eye Contact:

Flush with large quantities of water for at least 15 minutes and seek immediate medical attention.

Ingestion:

Call your local poison control center, hospital emergency room or physician immediately for instructions to induce vomiting.

Note to Physician

Poison. This product contains methanol. Methanol is metabolized to formaldehyde and formic acid. These metabolites may cause metabolic acidosis, visual disturbances and blindness. Since metabolism is required for these toxic symptoms, their onset may be delayed from 6 to 30 hours following ingestion. Ethanol competes for the same metabolic pathway and has been used as an antidote. Methanol is effectively removed by hemodialysis. Call your local poison control center for further information.

MATERIAL SAFETY DATA SHEET

LACQUER THINNER

Page: 3

5. Fire Fighting Measures

Flammability Classification: Class IB
Flash Pt: 4.00 F Method Used: TOC
Explosive Limits: LEL: 1.00 UEL: No data.
Autoignition Pt: No data.

Special Fire Fighting Procedures

Self-contained respiratory protection should be provided for fire fighters fighting fires in buildings or confined areas. Storage containers exposed to fire should be kept cool with water spray to prevent pressure build-up. Stay away from heads of containers that have been exposed to intense heat or flame.

Unusual Fire and Explosion Hazards

No data available.

Extinguishing Media

Use carbon dioxide, dry powder, or foam.

Unsuitable Extinguishing Media

No data available.

6. Accidental Release Measures

Steps To Be Taken In Case Material Is Released Or Spilled

Clean up:

Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind, out of low areas, and ventilate closed spaces before entering. Shut off ignition sources; keep flares, smoking or flames out of hazard area.

Small spills:

Take up with sand, earth or other noncombustible absorbent material and place in a plastic container where applicable.

Large spills:

Dike far ahead of spill for later disposal.

Waste Disposal:

Dispose in accordance with applicable local, state and federal regulations.

7. Handling and Storage

Precautions To Be Taken in Handling

Read carefully all cautions and directions on product label before use. Since empty container retains residue, follow all label warnings even after container is empty. Dispose of empty container according to all regulations. Do not reuse this container.

Precautions To Be Taken in Storing

Keep container tightly closed when not in use. Store in a cool, dry place. Do not store near flames or at elevated temperatures.

8. Exposure Controls/Personal Protection

Respiratory Equipment (Specify Type)

For OSHA controlled work place and other regular users. Use only with adequate ventilation under engineered air control systems designed to prevent exceeding appropriate TLV. For occasional use, where engineered air control is not feasible, use properly maintained and properly fitted NIOSH approved respirator for organic solvent vapors. A dust mask does not provide protection against vapors.

MATERIAL SAFETY DATA SHEET

LACQUER THINNER

Page: 4

Printed: 12/13/2005

Supercedes Revision: 05/24/2005

Eye Protection

Safety glasses, goggles or face shields are recommended to safeguard against potential eye contact, irritation, or injury. Contact lenses should not be worn while working with chemicals.

Protective Gloves

Wear impermeable gloves. Gloves contaminated with product should be discarded. Promptly remove clothing that becomes soiled with product.

Other Protective Clothing

Various application methods can dictate use of additional protective safety equipment, such as impermeable aprons, etc., to minimize exposure. A source of clean water should be available in the work area for flushing eyes and skin. Do not eat, drink, or smoke in the work area. Wash hands thoroughly after use. Before reuse, thoroughly clean any clothing or protective equipment that has been contaminated by prior use. Discard any clothing or other protective equipment that cannot be decontaminated, such as gloves or shoes.

Ventilation

Use only with adequate ventilation to prevent build-up of vapors. Open all windows and doors. Use only with a cross ventilation of moving fresh air across the work area. If strong odor is noticed or you experience slight dizziness, headache, nausea, or eye-watering - Stop - ventilation is inadequate. Leave area immediately.

9. Physical and Chemical Properties

Emergency Overview

Danger! Flammable! Keep away from heat, sparks, flame, and all other sources of ignition. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and all other sources of ignition during use and until all vapors are gone. Beware of static electricity that may be generated by synthetic clothing and other sources.

OSHA Regulatory Status: This material is classified as hazardous under OSHA regulations.

Potential Health Effects (Acute and Chronic)

Inhalation Acute Exposure Effects:

Vapor harmful. May cause dizziness, headache, watering of eyes, irritation of respiratory tract, irritation to the eyes, drowsiness, nausea, other central nervous system effects, spotted vision, dilation of pupils, and convulsions.

Skin Contact Acute Exposure Effects:

May cause irritation, drying of skin, redness, and dermatitis. May cause symptoms listed under inhalation. May be absorbed through damaged skin.

Eye Contact Acute Exposure Effects:

May cause irritation.

Ingestion Acute Exposure Effects:

Poison. Cannot be made non-poisonous. May be fatal or cause blindness. May produce fluid in the lungs and pulmonary edema. May cause dizziness, headache, nausea, drowsiness, loss of coordination, stupor, reddening of face and or neck, liver, kidney and heart damage, coma, and death. May produce symptoms listed under inhalation.

Precautions To Be Taken in Handling

Read carefully all cautions and directions on product label before use. Since empty container retains residue, follow all label warnings even after container is empty. Dispose of empty container according to all regulations. Do not reuse this container.

Precautions To Be Taken in Storing

Keep container tightly closed when not in use. Store in a cool, dry place. Do not store near flames or at elevated temperatures.

8. Exposure Controls/Personal Protection

Respiratory Equipment (Specify Type)

For OSHA controlled work place and other regular users. Use only with adequate ventilation under engineered air control systems designed to prevent exceeding appropriate TLV. For occasional use, where engineered air control is not feasible, use properly maintained and properly fitted NIOSH approved respirator for organic solvent vapors. A dust mask does not provide protection against vapors.

Eye Protection

Safety glasses, chemical goggles or face shields are recommended to safeguard against potential eye contact, irritation, or injury. Contact lenses should not be worn while working with chemicals.

Protective Gloves

Wear impermeable gloves. Gloves contaminated with product should be discarded. Promptly remove clothing that becomes soiled with product.

Other Protective Clothing

Various application methods can dictate the use of additional protective safety equipment, such as impermeable aprons, etc., to minimize exposure. A source of clean water should be available in the work area for flushing eyes and skin. Do not eat, drink, or smoke in the work area. Wash hands thoroughly after use. Before reuse, thoroughly clean any clothing or protective equipment that has been contaminated by prior use. Discard any clothing or other protective equipment that cannot be decontaminated, such as gloves or shoes.

Engineering Controls (Ventilation etc.)

Use only with adequate ventilation to prevent build-up of vapors. Open all windows and doors. Use only with a cross ventilation of moving fresh air across the work area. If strong odor is noticed or you experience slight dizziness, headache, nausea, or eye-watering -- Stop -- ventilation is inadequate. Leave area immediately.

Hazardous Components (Chemical Name)	CAS #	Concentration	OSHA PEL	ACGIH TWA	ACGIH STEL
1. Acetone	67-64-1	100.0 %	1000 ppm	500 ppm	750 ppm

3. Hazards Identification

Emergency Overview

Danger! Extremely Flammable. Keep away from heat, sparks, flame and all other sources of ignition. Vapors may cause flash fire or ignite explosively. Vapors may travel long distances to other areas and rooms away from the work site. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and all other sources of ignition anywhere in the structure, dwelling, or building during use and until all vapors are gone from the work site. Keep away from electrical outlets and switches. Beware of static electricity that may be generated by synthetic clothing and other sources.

OSHA Regulatory Status:

This material is classified as hazardous under OSHA regulations.

Potential Health Effects (Acute and Chronic)

Inhalation Acute Exposure Effects:

Vapor harmful. May cause dizziness, headache, watering of eyes, irritation of respiratory tract, drowsiness, nausea, and numbness in fingers, arms and legs.

Skin Contact Acute Exposure Effects:

May cause drying of skin, and numbness in fingers and arms. Liquid is absorbed readily.

Eye Contact Acute Exposure Effects:

This material is an eye irritant.

Ingestion Acute Exposure Effects:

Harmful if swallowed. May cause dizziness, headache, nausea, and irritation of the mouth, throat, and stomach.

Chronic Exposure Effects:

Reports have associated repeated and prolonged overexposure to solvents with neurological and other

Klean-Strip Acetone

Printed: 12/30/2008

Revision: 11/13/2008

Supersedes Revision: 03/13/2006

physiological damage. May cause weakness, fatigue, skin irritation, and numbness in hands and feet.

Signs and Symptoms Of Exposure

Primary Routes of Exposure:

Inhalation, ingestion, and dermal.

Medical Conditions Generally Aggravated By Exposure

Skin, eye, lung (asthma-like conditions)

4. First Aid Measures

Emergency and First Aid Procedures

Inhalation:

If user experiences breathing difficulty, move to air free of vapors. Administer oxygen or artificial respiration until medical assistance can be reached.

Skin Contact:

Wash with soap and water.

Eye Contact:

Flush with large quantities of water for at least 15 minutes and seek immediate medical attention.

Ingestion:

Call your poison control center, hospital emergency room, or physician immediately for instructions.

Note to Physician

Call your local poison control center for further instructions.

5. Fire Fighting Measures

Flammability Classification:

Class IB

Flash Pt:

-4.00 F Method Used: TAG Closed Cup

Explosive Limits:

LEL: 2.5 % at 77.0 F UEL: 13.0 % at 77.0 F

Autoignition Pt:

869.00 F

Fire Fighting Instructions

Self-contained respiratory protection should be provided for fire fighters fighting fires in buildings or confined areas. Storage containers exposed to fire should be kept cool with water spray to prevent pressure build-up. Stay away from heads of containers that have been exposed to intense heat or flame.

Flammable Properties and Hazards

Extremely Flammable!

Hazardous Combustion Products

carbon monoxide, carbon dioxide

Extinguishing Media

Use carbon dioxide, dry powder, or foam.

Unsuitable Extinguishing Media

No data available.

6. Accidental Release Measures

Steps To Be Taken In Case Material Is Released Or Spilled

Clean Up:

Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind, out of low areas, and ventilate closed spaces before entering. Shut off ignition sources; keep flares, smoking or flames out of hazard area. For small spills, take up liquid with sand, earth, or other noncombustible absorbent material and place in a container for disposal. For large spills, dike far ahead of spill and use sand, earth, or other noncombustible absorbent material and then place material in a container for disposal.

MATERIAL SAFETY DATA SHEET

Klean-Strip Acetone

Page: 3

Printed: 12/30/2008

Revision: 11/13/2008

Supercedes Revision: 03/13/2006

Waste Disposal:

Dispose in accordance with applicable local, state, and federal regulations.

7. Handling and Storage

Precautions To Be Taken in Handling

Read carefully all cautions and directions on product label before use. Since empty container retains residue, follow all label warnings even after container is empty. Dispose of empty container according to all regulations.

Do not reuse the container.

Precautions To Be Taken in Storing

Keep container tightly closed when not in use. Store in a cool, dry place. Do not store near flames or at elevated temperatures.

8. Exposure Controls/Personal Protection

Respiratory Equipment (Specify Type)

For OSHA controlled work place and other regular users. Use only with adequate ventilation under engineered air control systems designed to prevent exceeding appropriate TLV. For occasional use, where engineered air control is not feasible, use properly maintained and properly fitted NIOSH approved respirator for organic solvent vapors. A dust mask does not provide protection against vapors.

Eye Protection

Safety glasses, chemical goggles or face shields are recommended to safeguard against potential eye contact, irritation, or injury. Contact lenses should not be worn while working with chemicals.

Protective Gloves

Wear chemical resistant gloves suited for use with acetone. Gloves contaminated with product should be discarded. Promptly remove clothing that becomes soiled with product.

Other Protective Clothing

Various application methods can dictate use of additional protective safety equipment, such as impermeable aprons, etc., to minimize exposure.

Engineering Controls (Ventilation etc.)

Use only with adequate ventilation to prevent build-up of vapors. Open all windows and doors. Use only with a cross ventilation of moving fresh air across the work area. If strong odor is noticed or your experience slight dizziness, headache, nausea, or eye-watering - STOP - ventilation is inadequate. Leave area immediately.

Work/Hygienic/Maintenance Practices

A source of clean water should be available in the work area for flushing eyes and skin.

Do not eat, drink, or smoke in the work area.

Wash hands thoroughly after use.

Before reuse, thoroughly clean any clothing or protective equipment that has been contaminated by prior use.

Discard any clothing or other protective equipment that cannot be decontaminated, such as gloves or shoes.

9. Physical and Chemical Properties

3. Hazards Identification

Emergency Overview

Danger! Extremely flammable. Keep away from heat, sparks, flame and all other sources of ignition. Vapors may cause flash fire or ignite explosively. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and all other sources of ignition during use and until all vapors are gone. Beware of static electricity that may be generated by synthetic clothing and other sources.

OSHA Regulatory Status:

This material is classified as hazardous under OSHA regulations.

Potential Health Effects (Acute and Chronic)

Inhalation Acute Exposure Effects:

Vapor harmful. May cause dizziness; headache; watering of eyes; irritation of respiratory tract; weakness; drowsiness; nausea; numbness in fingers, arms and legs; depression of central nervous system; loss of appetite; fatigue; hallucinations; light headedness; visual disturbances; giddiness and intoxication; sleepiness; cough and dyspnea; cold, clammy extremities; diarrhea; vomiting; dilation of pupils; spotted vision. Severe overexposure may cause convulsions; unconsciousness; coma; and death. Intentional misuse of this product by deliberately concentrating and inhaling can be harmful or fatal.

Skin Contact Acute Exposure Effects:

May be absorbed through the skin. May cause irritation; numbness in the fingers and arms; drying of skin; and dermatitis. May cause increased severity of symptoms listed under inhalation.

Eye Contact Acute Exposure Effects:

This material is an eye irritant. May cause irritation; burns; conjunctivitis of eyes; and corneal ulcerations of the eye. Vapors may irritate eyes.

MATERIAL SAFETY DATA SHEET

Klean-Strip Lacquer Thinner

Page 2
Printed: 03/30/2006
Revision: 03/15/2006

Ingestion Acute Exposure Effects:

Poison. Cannot be made non-poisonous. May be fatal or cause blindness. May cause dizziness; headache; nausea; vomiting; burning sensation in mouth, throat, and stomach; loss of coordination; depression of the central nervous system; narcosis; stupor; gastrointestinal irritation; liver, kidney, and heart damage; diarrhea; loss of appetite; coma and death. May produce symptoms listed under inhalation.

Chronic Exposure Effects:

Reports have associated repeated and prolonged overexposure to solvents with neurological and other physiological damage. Prolonged or repeated contact may cause dermatitis. Prolonged skin contact may result in absorption of a harmful amount of this material. May cause conjunctivitis; gastric disturbances; insomnia; dizziness; headache; weakness; fatigue; nausea; heart palpitations; skin irritation; numbness in hands and feet; permanent central nervous system changes; some loss of memory; pancreatic damage; giddiness; visual impairment or blindness; kidney or liver damage; and death. May cause symptoms listed under inhalation.

Signs and Symptoms Of Exposure

Medical Conditions Generally Aggravated By Exposure

Diseases of the skin, eyes, liver, kidneys, central nervous system and respiratory system.

4. First Aid Measures

Emergency and First Aid Procedures

Inhalation:

If user experiences breathing difficulty, move to air free of vapors. Administer oxygen or artificial medical assistance can be rendered.

Skin Contact:

Wash with soap and large quantities of water and seek medical attention if irritation from contact persists.

Eye Contact:

Flush with large quantities of water for at least 15 minutes and seek immediate medical attention.

Ingestion:

Call your local poison control center, hospital emergency room or physician immediately for instructions to induce vomiting.

Note to Physician

Poison. This product contains methanol. Methanol is metabolized to formaldehyde and formic acid. These metabolites may cause metabolic acidosis, visual disturbances and blindness. Since metabolism is required for these toxic symptoms, their onset may be delayed from 6 to 30 hours following ingestion. Ethanol competes for the same metabolic pathway and has been used as an antidote. Methanol is effectively removed by hemodialysis. Call your local poison control center for further information.

5. Fire Fighting Measures

Flammability Classification: Class IB
Flash Pt: 4.00 F Method Used: TOC
Explosive Limits: LEL: 1.00 UEL:

Fire Fighting Instructions

Self-contained respiratory protection should be provided for fire fighters fighting fires in buildings or confined areas. Storage containers exposed to fire should be kept cool with water spray to prevent pressure build-up. Stay away from heads of containers that have been exposed to intense heat or flame.

Flammable Properties and Hazards

Extinguishing Media

Use carbon dioxide, dry powder, or foam.

Unsuitable Extinguishing Media

6. Accidental Release Measures

Steps To Be Taken In Case Material Is Released Or Spilled

Clean up:

Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind, out of low areas, and ventilate closed spaces before entering. Shut off ignition sources; keep flares, smoking or flames out of hazard area.

Small spills:

Take up with sand, earth or other noncombustible absorbent material and place in a plastic container where applicable.

3. Hazards Identification

Emergency Overview

Danger! Flammable. Keep away from heat, sparks, flame and all other sources of ignition. Vapors may cause flash fire or ignite explosively. Vapors may travel long distances to other areas and rooms away from work site. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and all other sources of ignition anywhere in the structure, dwelling or building during use and until all vapors are gone from the work site and all areas away from the work site. Keep away from electrical outlets and switches. Beware of static electricity that may be generated by synthetic clothing and other sources.

OSHA Regulatory Status: This material is classified as hazardous under OSHA regulations.

Health Hazards (Acute and Chronic)

Inhalation Acute Exposure Effects:

Vapor harmful. May cause dizziness, headache, watering of eyes, irritation of respiratory tract, drowsiness, nausea, and numbness in fingers, arms, and legs.

Skin Contact Acute Exposure Effects:

May cause drying of skin, and numbness in fingers and arms. Liquid is absorbed readily.

Eye Contact Acute Exposure Effects:

This material is an eye irritant. May cause irritation and pain, conjunctivitis of eyes, burns, corneal ulcerations of the eye, stinging, redness, and tearing. Vapors or mist can irritate eyes.

Ingestion Acute Exposure Effects:

Harmful if swallowed. May cause dizziness, headache, nausea, and irritation of mouth, throat, and stomach.

Chronic Exposure Effects:

Reports have associated repeated and prolonged overexposure to solvents with neurological and other physiological damage. May cause weakness, fatigue, skin irritation, and numbness in hands and feet.

Signs and Symptoms Of Exposure

No data available.

Medical Conditions Generally Aggravated By Exposure

None known.

OSHA Hazard Classes:

HEALTH HAZARDS : N/E

PHYSICAL HAZARDS : N/E

TARGET ORGANS & EFFECTS: N/E

4. First Aid Measures

Emergency and First Aid Procedures

Inhalation:

If user experiences breathing difficulty, move to air free of vapors. Administer oxygen or artificial respiration until medical assistance can be rendered.

Skin Contact:

Irritation may result. Immediately wash with soap and water.

Eye Contact:

Immediately flush with water, remove any contact lenses, continue flushing with water for at least 15 minutes, then get medical attention.

Ingestion:

Call you local poison control center, hospital emergency room, or physician immediately for instructions.

Note to Physician

Call your local poison control center for further information.

5. Fire Fighting Measures

Flammability Classification: OSHA Class IB
Flash Pt: 21.00 F Method Used: TCC
Explosive Limits: LEL: 1.80 UEL: No data.
Autoignition Pt: No data.

Special Fire Fighting Procedures

Self-contained respiratory protection should be provided for fire fighters fighting fires in buildings or confined areas. Storage containers exposed to fire should be kept cool with water spay to prevent pressure build-up. Stay away from heads of containers that have been exposed to intense heat or flame.

Unusual Fire and Explosion Hazards

No data available.

Extinguishing Media

Use carbon dioxide, dry powder, or foam.

Unsuitable Extinguishing Media

No data available.

6. Accidental Release Measures

Steps To Be Taken In Case Material Is Released Or Spilled

Cleanup:

Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind, out of low areas, and ventilate closed spaces before entering. Shut off ignition sources; keep flares, smoking or flames out of hazard area.

Small Spills:

Take up liquid with sand, earth or other noncombustible absorbent material and place in a plastic container where

applicable.

Large Spills:

Dike far ahead of spill for later disposal.

7. Handling and Storage

Precautions To Be Taken in Handling

Read carefully all cautions and directions on product label before use. Since empty container retains residue, follow all label warnings even after container is empty. Dispose of empty container according to all regulations.

Do not reuse this container.

Precautions To Be Taken in Storing

Keep container tightly closed when not in use. Store in a cool, dry place. Do not store near flames or at elevated temperatures.

8. Exposure Controls/Personal Protection

Respiratory Equipment (Specify Type)

For OSHA controlled work place and other regular users --Use only with adequate ventilation under engineered air control systems designed to prevent exceeding appropriate TLV. For occasional use, where engineered air control is not feasible, use properly maintained and properly fitted NIOSH approved respirator for organic solvent vapors. A dust mask does not provided protection against vapors.

Eye Protection

Safety glasses, chemical goggles or face shields are recommended to safeguard against potential eye contact, irritation, or injury. Contact lenses should not be worn while working with chemicals.

Protective Gloves

Wear impermeable gloves. Gloves contaminated with product should be discarded. Promptly remove clothing that becomes soiled with product.

Other Protective Clothing

Various application methods can dictate the use of additional protective safety equipment, such as impermeable aprons, etc., to minimize exposure. A source of clean water should be available in the work area for flushing eyes and skin. Do not eat, drink, or smoke in the work area. Wash hands thoroughly after use. Before reuse, thoroughly clean any clothing or protective equipment that has been contaminated by prior use. Discard any clothing or other protective equipment that cannot be decontaminated, such as gloves or shoes.

Ventilation

Use only with adequate ventilation to prevent buildup of vapors. Do not use in areas where vapors can accumulate and concentrate such as basements, bathrooms, or small enclosed areas. Whenever possible, use outdoors in an open area. If using indoors, open all windows and doors and maintain a cross ventilation of moving fresh air across the work area. If strong odor is noticed or you experience slight dizziness, headache, nausea or eye-watering -- Stop -- ventilation is inadequate. Leave area immediately. If the work area is not well ventilated, then do not use this product. A dust mask does not provide protection against vapors.

SEC. 313 SUPPLIER NOTIFICATION

The following information must be included in all MSDS that are copied and distributed for this material.

This product contains the following toxic chemicals subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 (40CFR 372):

DATE PRINTED: 9/15/88 SOLUTIONS/ARD R889 NO. 111818

SECTION 3. REACTIVITY INFORMATION

SUBSTANCE DESCRIPTION PERCENT BY WEIGHT CAS#
ACETONE (UPPER LIMIT) 67-64-1
METHYL ETHYL KETONE 10 78-93-3

CLEAN AIR ACT
This formula contains no known ozone depleting chemicals.

HAZARD COMMUNICATION STANDARD
This document is prepared in accordance with the OSHA Hazard Communication Standard (29 CFR 1910.1200). This MSDS contains thirteen (13) sections.

The following effects and/or symptoms are not expected to be experienced by persons who use this product properly and according to all instructions, precautions, and warnings. However, should the product user experience any questionable effects or symptoms, the product user should immediately seek medical attention.

SECTION 4. HAZARDS IDENTIFICATION

INHALATION ACUTE EXPOSURE EFFECTS
Vapor harmful. May cause dizziness, headache, watering of eyes, irritation of respiratory tract, drowsiness, nausea, and numbness in fingers, arms and legs.

SKIN CONTACT ACUTE EXPOSURE EFFECTS
May cause drying of skin, and numbness in fingers and arms. Liquid is absorbed readily.

EYE CONTACT ACUTE EXPOSURE EFFECTS
This material is an eye irritant.

INGESTION ACUTE EXPOSURE EFFECTS
Harmful if swallowed. May cause dizziness, headache, nausea, and irritation of mouth, throat and stomach.

CHRONIC EXPOSURE EFFECTS
Reports have associated repeated and prolonged overexposure to solvents with neurological and other physiological damage. May cause weakness, fatigue, skin irritation, and numbness in hands and feet.

MEDICAL CONDITIONS AGGRAVATED
None known.

PRIMARY ROUTE OF EXPOSURE
Inhalation, ingestion, and dermal.

SECTION 5. FIRST AID MEASURES

INHALATION
If user experiences breathing difficulty, move to air free of vapors. Administer oxygen or artificial respiration until medical assistance can be rendered.

SKIN CONTACT
Irritation may result. Immediately wash with soap and water.

EYE CONTACT
Immediately flush with water, remove any contact lens, continue flushing with water for at least 15 minutes, then get medical attention.

SECTION 5 FIRST AID MEASURES
(CONTINUED)

INGESTION
Call your poison control center, hospital emergency room, or physician immediately for instructions.

NOTE TO PHYSICIAN
This formula is registered with POISINDEX.
Call your local poison control center for further information.

GENERAL COMMENTS
OSHA Flammability: Class IB

EXTINGUISHING METHOD

Use carbon dioxide, dry powder, or foam.

FIRE FIGHTING PROCEDURES

Self-contained respiratory protection should be provided for fire fighters fighting fires in buildings or confined areas. Storage containers exposed to fire should be kept cool with water spray to prevent pressure build-up. Stay away from heads of containers that have been exposed to intense heat or flame.

FIRE AND EXPLOSION HAZARDS

IS EXTREMELY FLAMMABLE. KEEP AWAY FROM HEAT, SPARKS, FLAME OR DANGER! ALL OTHER SOURCES OF IGNITION. VAPORS MAY CAUSE FLASH FIRE OR AND ALL OTHER SOURCES OF IGNITION. VAPORS MAY TRAVEL LONG DISTANCES TO OTHER AREAS AND ROOMS AWAY FROM WORK SITE. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and all other sources of ignition anywhere in the structure dwelling or building during use and until all vapors are gone from the work site. Keep away from electrical outlets and switches. Beware of static electricity that may be generated by synthetic clothing and other sources.

SECTION 7. ACCIDENTAL RELEASE MEASURES

CLEAN-UP

Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind, out of low areas, and ventilate closed spaces before entering. Shut off ignition sources; keep smoking or flames out of hazard area. **SMALL SPILLS:** take up liquid with sand, earth or other noncombustible absorbent material and place in a plastic container where applicable. **LARGE SPILLS:** dike far ahead of spill for later disposal.

SECTION 7. ACCIDENTAL RELEASE MEASURES
(CONTINUED)

For transportation related spills contact Chemtrec at 1-800-424-9300 for emergency assistance.

WASTE DISPOSAL

Dispose in accordance with applicable local, state and federal regulations.

SECTION 8. HANDLING AND STORAGE

STORAGE
Keep container tightly closed when not in use. Store in a cool, dry place. Do not store near flames or at elevated temperatures.

HANDLING

Read carefully all cautions and directions on product label before use. Since empty container retains residue, follow all label warnings even after container is empty. Dispose of empty container according to all regulations. Do not reuse this container.

SECTION 9. TRANSPORT INFORMATION

TRANSPORTATION

For D.O.T. information, contact W.M. Barr Technical Services Department.

SECTION 10. EXPOSURE CONTROLS/PERSONAL PROTECTION

VENTILATION PROTECTION
USE ONLY WITH ADEQUATE VENTILATION TO PREVENT BUILDUP OF VAPORS. Do not use in areas where vapors can accumulate and concentrate such as basements, bathrooms or small enclosed areas. Whenever possible use outdoors in an open air area. If using indoors open all windows and doors and maintain a cross ventilation of moving fresh air across the work area. If strong odor is noticed or you experience slight dizziness, headache, nausea or eye-watering - STOP - ventilation is inadequate. Leave area immediately. IF THE WORK AREA IS NOT WELL VENTILATED, DO NOT USE THIS PRODUCT. A dust mask does not provide protection against vapors.

RESPIRATORY PROTECTION

For OSHA controlled work place and other regular users - Use only with adequate ventilation under engineered air control systems designed to prevent exceeding appropriate TLV. For occasional use, where engineered air control is not feasible, use properly maintained and properly fitted NIOSH approved respirator for organic solvent vapors. A dust mask does not provide protection against vapors.

SKIN PROTECTION

Wear impermeable gloves. Gloves contaminated with product should be discarded. Promptly remove clothing that becomes soiled with product.

EYE PROTECTION

Safety glasses, chemical goggles or face shields are recommended to safeguard against potential eye contact, irritation, or injury. Contact lenses should not be worn while working with chemicals.

OTHER PROTECTION

Various application methods can dictate use of additional protective safety equipment, such as impermeable aprons, etc, to minimize exposure. A source of clean water should be available in the work area for flushing eyes and skin. Do not eat, drink or smoke in the work area. Wash hands thoroughly after use. Before reuse, has been thoroughly clean any clothing or protective equipment that has been contaminated by prior use. Discard any clothing or other protective equipment that cannot be decontaminated, such as gloves

 *Trace quantities less than 0.1% and greater than 0.02%

UNUSUAL FIRE AND EXPLOSION HAZARDS: Explosive air-vapor mixtures may form which are dangerous when exposed to heat or flame. Vapors are heavier than air and may travel along the ground, or be moved by ventilation, and ignited by pilot lights, stoves, heaters, electric motors, sparks, flame, smoking, static discharge or other ignition sources even at locations distant from material handling site. Contents under pressure. Exposure to heat or prolonged exposure to sun may cause bursting.

HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, Carbon dioxide, Irritating fumes, Hydrocarbons, Water vapors, Ammonia fumes, Toxic materials.

INCOMPATIBILITY (MATERIALS TO AVOID): Strong oxidizing agents, Acids, Alkalis, Chlorinated compounds, Ammonia, Aldehydes, Amines, Isobutylene.

STABILITY: Stable.

HAZARDOUS POLYMERIZATION: Will not occur.

CONDITIONS TO AVOID: High temperature and humidity, ignition source, vapor build-up.

SECTION III - PHYSICAL/CHEMICAL CHARACTERISTICS

OILING RANGE: -44 to 232 DEG F.
 APOR DENSITY: HEAVIER THAN AIR
 ALGULATED V.O.C.: 4.68LB/GI (562GR/LT) (n-Butyl acetate-MEDIAN)
 SOLUBILITY IN WATER: NON-SOLUBLE
 APPEARANCE AND ODOR: LACK PIGMENTED LIQUID, SWEET ODOR

SECTION V - REACTIVITY DATA

HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, Carbon dioxide, Irritating fumes, Hydrocarbons, Water vapors, Ammonia fumes, Toxic materials.

INCOMPATIBILITY (MATERIALS TO AVOID): Strong oxidizing agents, Acids, Alkalis, Chlorinated compounds, Ammonia, Aldehydes, Amines, Isobutylene.

STABILITY: Stable.

HAZARDOUS POLYMERIZATION: Will not occur.

CONDITIONS TO AVOID: High temperature and humidity, ignition source, vapor build-up.

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

SHA FLAMMABILITY CLASS: Flammable Liquid - Class 1A

ULK PRODUCT FLASH POINT: -4 DEG F.
 ULK PROPELLANT FLASH POINT: -156 DEG F.

SECTION VI - HEALTH HAZARD DATA

PRIMARY ROUTE(S) OF EXPOSURE: Inhalation, skin contact.

ACUTE EFFECTS FROM SHORT TERM EXPOSURE:
 INHALATION: Vapors and mists cause severe irritation to nose, throat and lungs (burning, stinging, coughing). May cause headache, dizziness, nausea, weakness, shortness of breath and loss of coordination. Exposure to extremely high vapor concentrations may cause unconsciousness and asphyxiation. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.
 EYES: Contact with liquid or vapors causes severe irritation (redness, watering, itching, stinging, blurred vision).
 SKIN: Contact causes severe irritation (dryness, itching, cracking, rash and swelling).
 SKIN ABSORPTION: None known.
 SWALLOWING: Causes nausea, vomiting and diarrhea.

CHRONIC EFFECTS FROM LONG TERM/REPEATED EXPOSURE: Long-term or repeated overexposure, without proper ventilation or personal protection, may cause damage to the kidneys, liver, eyes, brain and nervous system. (Note: Toluene has been included on the Calif. Prop 65 list, for developmental toxicity, and requires the following statement: Warning: This product contains a chemical known to the State of Calif. to cause birth defects or other reproductive harm.).

OTHER: This product contains a form of Crystalline Silica. Long term exposure to Silica or Crystalline Silica DUSTS may result in silicosis, a disabling lung disease. Always wear appropriate respiratory protection when exposed to sanding or grinding dusts.

SECTION V - REACTIVITY DATA

HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, Carbon dioxide, Irritating fumes, Hydrocarbons, Water vapors, Ammonia fumes, Toxic materials.

INCOMPATIBILITY (MATERIALS TO AVOID): Strong oxidizing agents, Acids, Alkalis, Chlorinated compounds, Ammonia, Aldehydes, Amines, Isobutylene.

STABILITY: Stable.

HAZARDOUS POLYMERIZATION: Will not occur.

CONDITIONS TO AVOID: High temperature and humidity, ignition source, vapor build-up.

SECTION VI - HEALTH HAZARD DATA

PRIMARY ROUTE(S) OF EXPOSURE: Inhalation, skin contact.

ACUTE EFFECTS FROM SHORT TERM EXPOSURE:
 INHALATION: Vapors and mists cause severe irritation to nose, throat and lungs (burning, stinging, coughing). May cause headache, dizziness, nausea, weakness, shortness of breath and loss of coordination. Exposure to extremely high vapor concentrations may cause unconsciousness and asphyxiation. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.
 EYES: Contact with liquid or vapors causes severe irritation (redness, watering, itching, stinging, blurred vision).
 SKIN: Contact causes severe irritation (dryness, itching, cracking, rash and swelling).
 SKIN ABSORPTION: None known.
 SWALLOWING: Causes nausea, vomiting and diarrhea.

CHRONIC EFFECTS FROM LONG TERM/REPEATED EXPOSURE: Long-term or repeated overexposure, without proper ventilation or personal protection, may cause damage to the kidneys, liver, eyes, brain and nervous system. (Note: Toluene has been included on the Calif. Prop 65 list, for developmental toxicity, and requires the following statement: Warning: This product contains a chemical known to the State of Calif. to cause birth defects or other reproductive harm.).

OTHER: This product contains a form of Crystalline Silica. Long term exposure to Silica or Crystalline Silica DUSTS may result in silicosis, a disabling lung disease. Always wear appropriate respiratory protection when exposed to sanding or grinding dusts.

CARCINOGEN DATA: Crystalline Silicas are classified by IARC as potential human carcinogens. Inhalation of Crystalline Silica DUSTS may cause lung tumors. Trace quantities of Benzene may be present as a by-product from the refining process of petroleum based chemicals. Benzene is classified as a human carcinogen which produces myeloid leukemia and lymphoma by inhalation. Risk of cancer depends on level and duration of exposure. The following statement is required by California Proposition 65 (Safe Drinking Water and Toxic Reform Act of 1986) WARNING! THIS PRODUCT CONTAINS A CHEMICAL KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: Respiratory tract irritation; nose; skin and eye disorders; sensitization to chemical substances.

SECTION VII - EMERGENCY AND FIRST AID PROCEDURES

SWALLOWING: If person is conscious, give 1/2 glass milk or water. DO NOT induce vomiting. Call Poison Center, Emergency Room or Physician immediately.

INHALATION: Remove from exposure to fresh air. If breathing is difficult, give oxygen. If breathing has stopped, give artificial respiration. Keep person warm and quiet. Get medical attention immediately.

EYE: Immediately flush with plenty of water for 15 minutes, while lifting upper and lower eyelids. Get medical attention.

SKIN: Immediately remove by wiping, followed by waterless hand-cleanser and plenty of soap and water. Remove contaminated clothing and shoes. Wash or rinse thoroughly before reuse. Get medical attention if irritation persists.

OTHER: Have Material Safety Data Sheet available, if possible, when calling Poison Center, Emergency Room or Physician.

SECTION VIII - PERSONAL PROTECTION

PERSONAL PROTECTION: OUTDOOR OR OPEN AREAS: If necessary, because of wind, etc. use mechanical filter respirator or particle mask to avoid breathing spray mists. ENCLOSED OR RESTRICTED VENTILATION AREAS: Use NIOSH approved cartridge respirator to keep vapor/mist levels of hazardous ingredients (listed in Section II) below the occupational exposure limits (PEL and TLV). If exposure levels are unknown, or limits exceeded, a full facemask air-purifying cartridge respirator is recommended. Use filters to avoid breathing spray particles and sanding dusts. Follow respirator manufacturer's instructions for use.

VENTILATION: INDOOR OR ENCLOSED AREAS: Provide general mechanical ventilation or local exhaust to keep vapor concentrations below the PELs and TLVs in Section II and Lower Flammable Limits in Section IV.

HAND PROTECTION: When necessary, wear impermeable gloves to prevent skin contact. Consult safety equipment supplier for specific recommendation of construction material.

EYE PROTECTION: Wear safety glasses, with side shields, designed to protect eyes against liquid splash and mists. Note: Contact lenses may contribute to the severity of an eye injury and should not be worn when working with chemicals.

OTHER PROTECTIVE EQUIPMENT: When necessary, wear protective clothing, including hoodcap, to avoid skin contact with liquid or overspray.

WORK/HYGIENIC PRACTICES: Eye washes and safety showers are recommended in the workplace. Wash hands after using and before eating, drinking or using tobacco products. Thoroughly clean contaminated clothing and shoes before reuse. Periodically monitor exposure levels to hazardous ingredients listed in Section II and review permissible limits.

SECTION IX - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED: Eliminate ignition sources and ventilate area. Evacuate all unnecessary personnel. Wear full protective equipment. Dike drains to prevent entering storm or sanitary sewers, lakes, rivers, streams, or waterways. Contain spill and cover with inert absorbent material. Take up using non-sparking tools (aluminum, brass, or copper) and place mixture into containers for disposal. Note: Some spills or releases may require special reporting to local, state, or federal agencies.

WASTE DISPOSAL: Waste material and empty containers must be disposed of in accordance with all local, state and federal environmental control regulations. Use only approved waste management facilities.

SECTION X - SPECIAL PRECAUTIONS

HANDLING PRECAUTIONS: Keep liquid and vapors away from heat, sparks and flame. Turn off or remove all sources of ignition. Use proper labeling or ventilation to prevent vapor build-up. Avoid spraying or contact with eyes and skin. Do not take internally. Use caution in handling dusts. Avoid contact with respiratory and personal protective equipment. Do not heat containers. Incinerate containers. Contents are under pressure and may contain explosive vapors, even when empty. Do not remove or deface label.

SHIPPING AND STORAGE PRECAUTIONS: Contents under pressure. Do not store above 128 degrees F or permit prolonged exposure to sunlight. Protect containers from damage. Store in buildings or areas designed and protected for storage of aerosols. Keep out of reach of children.

OTHER PRECAUTIONS: N/A.

SECTION XI - DISCLAIMER

DISCLAIMER: THE INFORMATION CONTAINED HEREIN HAS BEEN COMPILED FROM SOURCES CONSIDERED TO BE RELIABLE. TO THE BEST OF OUR KNOWLEDGE AND BELIEF, ALL INFORMATION IS ACCURATE AND IS PROVIDED IN GOOD FAITH. HOWEVER, NO GUARANTEE OF ACCURACY IS MADE OR IMPLIED.

SECTION 2 - PHYSICAL AND CHEMICAL CHARACTERISTICS

PHYSICAL STATE LIQUID
 ODOR AND APPEARANCE : PINK LIQUID WITH ETHERAL ODOR
 SPECIFIC GRAVITY (water=1): 1.05
 SOLUBILITY IN WATER SOLUBLE
 VAPOR PRESSURE (mmHg)...: <20
 VAPOR DENSITY (Air=1)...: >1
 ODOR THRESHOLD: N/AV
 EVAPORATION RATE (ETHER=1): SLOWER
 pH: >13
 BOILING POINT (F)...: 212
 FREEZING POINT (F)...: 32

SECTION 3 - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT (F) AND METHOD...: N/AP
 FLAMMABLE LIMITS: LEL = N/AP UEL = N/AP
 EXTINGUISHING MEDIA: Product is not a fire hazard. Use extinguishing media appropriate for surrounding fires.
 SPECIAL FIRE FIGHTING PROCEDURES: Wear self-contained breathing apparatus with a full facepiece operated in the positive pressure demand mode when fighting fires. Keep containers cool with water spray.
 UNUSUAL FIRE AND EXPLOSION HAZARDS: Closed containers may rupture due to build up of pressure when exposed to extreme heat causing slippery conditions. Wear clothing and equipment to avoid body contact. May react with zinc, aluminum, tin and other active metals liberating flammable hydrogen gas.

SECTION 4 - REACTIVITY DATA

IS THE PRODUCT STABLE? YES CONDITIONS TO AVOID FOR STABILITY: N/AP
 INCOMPATIBILITY (Materials to Avoid): Avoid contact with acids and strong oxidizing agents and metal such as aluminum, zinc and tin.
 HAZARDOUS DECOMPOSITION PRODUCTS....: Oxides of carbon, nitrogen, sulfur and various hydrocarbons.
 WILL HAZARDOUS POLYMERIZATION OCCUR? NO CONDITIONS TO AVOID FOR POLYMERIZATION: N/AP

KEEP OUT OF REACH OF CHILDREN

N/AP - Not Applicable

MATERIAL SAFETY DATA SHEET

PRODUCT IDENTIFIER: CLEAN ALL CG 1153, CG 1153A, CG 1155

SECTION 5 - HEALTH HAZARD DATA

ROUTE OF ENTRY: a) Eye contact b) Skin contact c) Inhalation, if misted

EFFECTS OF ACUTE EXPOSURE: a) Eyes - Corrosive to eye tissues. Brief contact can cause severe eye damage and prolonged contact can cause permanent eye injury which may be followed by blindness. b) Skin - Corrosive, may cause chemical burns. Superficial irreversible skin destruction can result from repeated or prolonged contact with dilute solutions. c) Inhalation - Can cause mild to severe irritation, depending on exposure. Excessive inhalation of mists can burn respiratory tract tissues. d) Ingestion - Can cause chemical burns to the mouth, throat, esophagus and stomach.

EFFECTS OF CHRONIC EXPOSURE: May result in areas of destruction of skin tissue or primary irritant dermatitis. Similarly, inhalation of mists may cause varying degrees of damage to the affected tissues and also increase susceptibility to respiratory illness. Prolonged or repeated overexposure may result in kidney and/or liver damage.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Pre-existing eye, skin and respiratory disorders may be aggravated by exposure to the product.

EMERGENCY AND FIRST AID PROCEDURES:

- a) SKIN - Immediately flush with lots of running water for at least 15 minutes. Remove contaminated clothing and shoes. Get medical attention.
- b) EYES - Immediately flush eyes with lots of running water for 15 minutes, lifting the upper and lower eyelids occasionally. Get medical attention immediately.
- c) INHALATION - If affected remove individual to fresh air. If breathing is difficult, administer oxygen. If breathing has stopped, administer artificial respiration. Keep person warm and quiet and get medical attention.
- d) INGESTION - Do not induce vomiting. Call physician immediately. If conscious give lots of water or milk. Do not give anything by mouth to an unconscious or convulsing person.

SECTION 6 - CONTROL AND PROTECTIVE MEASURES

PERSONAL PROTECTIVE EQUIPMENT:

GLOVES....: Impervious RESPIRATOR...: NIOSH approved, if misted EYE....: Chemical splash goggles
FOOTWEAR...: Impervious boots CLOTHING....: Impervious OTHER...: N/AP

VENTILATION: LOCAL EXHAUST: Below TLV(s) MECHANICAL (General): RECOMMENDED

WORK/HYGIENIC PRACTICES: Eye wash and safety shower must be easily accessible. Provide adequate ventilation. Wash thoroughly after handling and before eating, drinking or smoking. Remove contaminated clothing promptly and wash it before reuse.

SECTION 7 - PRECAUTIONS FOR SAFE HANDLING AND USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Absorb all spills on suitable absorbant and collect for disposal.

WASTE DISPOSAL METHOD: Dispose of according to local, state and federal regulations.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Protect from physical damage and keep containers tightly closed. Do not store below freezing conditions or above 120° F. Do not store near acids or acidic materials and oxidizers.

MAINTENANCE PRECAUTIONS: Promptly clean all leaks and spills to avoid slippery conditions.

OTHER PRECAUTIONS: Containers, even those that are emptied will retain product residue and vapors. Always obey hazard warning.

SECTION 8 - REGULATORY INFORMATION

This product contains the following chemical or chemicals subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986 and 40 CFR Part 372:

Glycol ethers (category) 3-7%

SECTION III - HAZARDS IDENTIFICATION

PRIMARY ROUTE(S) OF ENTRY: Skin contact, Skin absorption, Eye contact, Inhalation, Ingestion.
 EFFECTS OF ACUTE EXPOSURE: Can cause gastro-intestinal irritation, nausea, vomiting and diarrhea. Vapors can produce headache, nausea, dizziness, disorientation, numbness in fingers and toes, and irritation of nose and throat. Irritation upon direct contact with eyes. Vapors can produce irritation. May be absorbed by the skin. Skin contact may cause defatting, drying and cracking of the skin. May lead to dermatitis. Skin contact may cause mild irritation.
 EFFECTS OF CHRONIC EXPOSURE: May cause nausea, headache, dizziness, and drowsiness. May cause damage to central nervous system, respiratory system, lungs, eyes, skin, gastrointestinal tract.

SECTION IV - FIRST AID MEASURES

EYES: Immediately flush eyes with running water for a minimum of 20 minutes. If irritation persists get medical attention immediately.
SKIN: Immediately wash skin with soap and plenty of water. Remove contaminated clothing. Get medical attention if symptoms occur. Wash clothing before reuse. Immediately flush with water for 15 minutes.
INHALATION: Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention.
INGESTION: Do not induce vomiting. Give large amounts of water if patient is conscious. Get medical attention immediately.

SECTION V - FIRE FIGHTING MEASURES

ASH POINT (G), METHOD: 7 deg G CC
 AUTO IGNITION TEMPERATURE (C): Not tested
 UPPER FLAMMABLE LIMIT (% vol): Not established
 LOWER FLAMMABLE LIMIT (% vol): Not established
 EXTINGUISHING MEDIA: Carbon Dioxide, Dry Chemical, Foam
 HAZARDOUS COMBUSTION PRODUCTS: Oxides of carbon.

SENSITIVITY TO:

MECHANICAL IMPACT: No
 STATIC DISCHARGE: Yes

SECTION VI - ACCIDENTAL RELEASE MEASURES

SPILL/LEAK PROCEDURE: Avoid runoff into sewers and ditches which lead to waterways. Eliminate all sources of pollution. Absorb spill with inert material, (e.g. dry sand or earth). Then place in a chemical waste container.

SECTION VII - HANDLING AND STORAGE

HANDLING PROCEDURES: Equipment must be grounded. Handle and open container with care. Handle away from all sources of ignition. Avoid smoking. Keep container closed. Maintain a good personal hygiene. Use non-metallic tools. Use adequate ventilation. Avoid contact with skin and eyes. Avoid contamination of food.
 STORAGE REQUIREMENT: Provide adequate ventilation to protect from these hazards and to keep below maximum exposure values. Store at room temperature. Avoid static electricity-ground containers when transferring product. Keep away from heat and flame. Keep container closed when not in use. Should be in standard liquid storage tanks.

SECTION VIII - EXPOSURE CONTROL/PERSONAL PROTECTION

PERSONAL PROTECTIVE EQUIPMENT:
 EYE/TYPE: Use chemical splash goggles and face shield (ANSI Zg7.1 or approved equivalent.)
 RESPIRATORY PROTECTION: Ventilate to keep air below TLV. NIOSH approved air supply masks for areas of concentrated vapors.
 GLOVES/TYPE: Chemical resistant rubber gloves.
 CLOTHING/TYPE: Appropriate clothing to avoid skin contact.
 FOOTWEAR/TYPE: Chemical resistant rubber boots.
 OTHER/TYPE: Safety shower and eye-bath located close to chemical exposed area.
 VENTILATION REQUIREMENTS: Ventilation system must be designed vapor and explosion proof for handling solvent vapors. Local exhaust ventilation may be necessary to control any air contaminants to within their TLV's during the use of this product.

SECTION IX - PHYSICAL PROPERTIES

PHYSICAL STATE: Liquid
 APPEARANCE AND ODOR: Solvent odor
 SPECIFIC GRAVITY: 7.8
 ODOR THRESHOLD (ppm): Not established
 VAPOR PRESSURE(mm Hg): Not established
 VAPOR DENSITY (Air=1): 1.0
 EVAPORATION RATE (Ether=1): Not established
 BOILING POINT (C): Not determined
 pH: Not applicable
 SOLUBILITY IN WATER (% W/W): Negligible
 WATER-OCTANOL PARTITION: Not applicable
 COEFFICIENT
 VOLATILE ORGANIC COMPOUND (%): By Weight: 50 approx.
 By volume: 30-50 @ 20 c

SECTION X - STABILITY AND REACTIVITY

INCOMPATIBILITY

STABILITY

REACTIVITY CONDITIONS: Excessive heat, sparks and open flames
 HAZARDOUS PRODUCTS OF DECOMPOSITION: Carbon Dioxide

Carbon Monoxide

HAZARDOUS POLYMERIZATION

SECTION XI - TOXICOLOGICAL INFORMATION

EXPOSURE LIMITS: See hazardous ingredients section (II)
 IRRITANCY OF PRODUCT: Refer to Acute Exposure Section
 SENSITIZATION TO PRODUCT: In susceptible individuals
 CARCINOGENICITY: NTP studies have shown that C12 chlorinated paraffins increased the incidence of tumors in laboratory animals when force fed in high doses in combination with corn oil, over long periods of time.
 TERATOGENICITY: Not indicated
 MUTAGENICITY: Not indicated
 REPRODUCTIVE EFFECTS: Not indicated
 SYNERGISTIC PRODUCTS: None known

SECTION XII - ECOLOGICAL INFORMATION

ENVIRONMENTAL: Keep out of waterways. BIODEGRADABILITY: Not tested.

SECTION XIII - DISPOSAL CONSIDERATIONS

WASTE DISPOSAL: Dispose of contaminated waste in accordance with municipal, provincial, state and federal regulations.

SECTION XIV - TRANSPORT INFORMATION

TDG CLASSIFICATION: Coating solution UN1139 Class 3.2 Packing Group 11

SECTION XV - OTHER INFORMATION

SECTIONS UPDATED SINCE: 3-23-95

REVISION: 8-22-96

COMPANY DISCLAIMER: The information provided in this Material Safety Data Sheet has been obtained from sources believed to be reliable. The supplier provides no warranties expressed or implied and assumes no responsibility for the accuracy or the completeness of the data contained herein.

SECTION III HEALTH HAZARD DATA

ACUTE HEALTH EFFECTS: Product is strongly alkaline: Contact with skin or eyes may result in chemical burns. Irreversible eye damage may occur. Inhalation of mists may irritate upper respiratory tract. Harmful if ingested.

CHRONIC HEALTH EFFECTS: None Known.

ROUTES OF ENTRY: Eyes, skin contact, ingestion, inhalation.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: None Known.

EMERGENCY AND FIRST AID PROCEDURES

EYE CONTACT: Immediately begin flushing with cool water and continue for at least 15 minutes. Hold eyelids open while flushing. Seek immediate medical attention.

SKIN CONTACT: Immediately remove all contaminated clothing. Flush all affected areas with water for at least 15 minutes. Seek medical attention if irritation occurs. Launder clothing before reuse.

INGESTION: Give plenty of water and get victim to a physician at once. Do not induce vomiting. Never give anything by mouth to an unconscious person.

INHALATION: Remove to fresh air and seek medical attention.

SECTION IV CHEMICAL DATA

Boiling Point (F): 220 F. Specific Gravity (H2O=1): 1.12
Vapor Pressure (mm Hg.): N/D Percent volatile by vol. (%): N/D
Vapor Density (Air=1): N/D Evaporation Rate (___=1): N/D

SOLUBILITY: Completely soluble in water.
APPEARANCE: Clear green-blue liquid with pleasant lime odor.

SECTION V
PHYSICAL HAZARD DATA
FLASH POINT: None.

FLAMMABLE LIMITS: NOT APPLICABLE
EXTINGUISHING MEDIA: Use media appropriate to primary cause of fire.
SPECIAL FIRE FIGHTING PROCEDURES: Avoid contact with fire fighting personnel as burns may result from contact with skin. Wear protective clothing and self-contained breathing apparatus.

UNUSUAL FIRE AND EXPLOSION HAZARDS: None.
INCOMPATIBILITY (Materials to Avoid): None.
HAZARDOUS DECOMPOSITION PRODUCTS: None.
HAZARDOUS POLYMERIZATION: Will not occur.

CONDITIONS TO AVOID: N/A
STABILITY: Stable.

SECTION VI
SPILL OR LEAK PROCEDURES
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Appropriate protective clothing and equipment must be worn by all clean-up personnel. Contain spillage in suitable containers or holding area. Material that cannot be absorbed with an inert material such as diatomaceous earth and placed in a suitable container. Do not allow soil to enter waterways, groundwater or sewer systems.

WASTE DISPOSAL METHOD: Dispose of in approved chemical disposal area or in a manner which complies with all local, state and federal regulations. Do not flush to sewer without permission from local authorities.

M A T E R I A L S A F E T Y D A T A S H E E T

COMPLIES WITH WAC 296-62-05413

COMMON NAME: DETSOL HD
SECTION VII
EXPOSURE CONTROL INFORMATION
RESPIRATORY PROTECTION: None required unless TLV is exceeded.

VENTILATION: Good general room ventilation.
PROTECTIVE GLOVES: Rubber or polyethylene.
EYE PROTECTION: Goggles.

OTHER PROTECTIVE EQUIPMENT: Overalls, rubber boots, protect all exposed skin.

OTHER ENGINEERING CONTROLS: None.
WORK PRACTICES: Safety eye wash/shower stations must be available in work area.

HYGIENIC PRACTICES: All food should be kept in a separate location away from the storage/use location. Hands and face should be thoroughly washed after using and before eating or drinking.

SECTION VIII
SPECIAL PRECAUTIONS
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Store in a cool, dry location away from food and feed stuffs. Handle with care and caution.

MAINTENANCE PERSONNEL: No special precautions.
OTHER PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Do not permit employees to handle without proper training and proper protective equipment.

COMPOSITION/INFORMATION ON INGREDIENTS

<u>COMPONENT RISK</u>	<u>CAS NO.</u>	<u>LEVEL</u>	<u>SYMBOL</u>	
STYRENE	100-42-5	11 - 25%	Xn - Harmful.	R10 R20

R36/38

HAZARDS IDENTIFICATION

INHALATION: May cause drowsiness and irritation of respiratory tract.

SKIN: May cause irritation on prolonged contact, redness.

EYES: Irritation and soreness.

INGESTION: Sore throat, stomachache, nausea.

FIRST AID MEASURES**INHALATION:**

Move affected person to the fresh air without delay.
If drowsiness persists seek medical attention.

SKIN CONTACT:

Wash affected area with warm soapy water. Do not use solvents.

EYE CONTACT:

Irrigate with copious quantities of water and seek medical attention immediately.

INGESTION:

Do not induce vomiting. Drink plenty of water and seek medical attention.

FIRE FIGHTING MEASURES

Fight fires with CO₂, dry powder, or chemical foam. Do not use water jets. Burning material emits toxic fumes and smoke, so avoid inhalation of burning products.

ACCIDENTAL RELEASE MEASURES

The product does not readily flow. Any spillage should be wiped or scraped away. Keep product away from drains. Avoid sources of ignition. Dispose of in accordance with the requirements of the Environmental Protection Act.

HANDLING AND STORAGE**HANDLING:**

Keep away from heat. Keep away from sources of ignition.
Avoid contact with skin and eyes. Use only in well ventilated areas.

STORAGE:

Store below 25°C in a dry well ventilated space in original closed containers.

EXPOSURE CONTROLS/PERSONAL PROTECTION

A good standard of personal and industrial hygiene should be maintained at all times. Persons who suffer from skin complaints or other allergic effects should not work with the product.

OEL (UK)	Component	8 HR TWA	10 mins STEL
	Styrene	100 ppm	250 ppm

EYE PROTECTION:

Not necessary.

PROTECTIVE CLOTHING:

Recommended.

RESPIRATORY PROTECTION:

Dust particle mask approved to FFP1SD-EN149 (when sanding cured product).

SKIN PROTECTION:

Barrier cream recommended.

PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE:	Putty like consistency.
ODOUR:	Slightly pungent, characteristic of Styrene.
DENSITY:	1.15 - 1.85.
FLASH POINT:	32°C (Styrene).
AUTOFLAMMABILITY TEMPERATURE :	490°C (Styrene).
EXPLOSIVE LIMITS:	Lower 1.1%. Upper 6.1% (Styrene).
VOLATILE CONTENT:	11 - 25%.
SOLUBILITY:	Insoluble in water.
VISCOSITY:	Approx. 500,000 - 1,000,000 centipoise.

STABILITY AND REACTIVITY

Can polymerise (solidify) if subjected to elevated temperatures over a period of time, exposed to UV/sunlight, or by the addition of free radical initiators e.g., organic peroxide. Heat increase may be sufficient to raise the temperature above the product flash point. Thermal decomposition can give rise to acrid fumes. Polymerisation in a closed container can give rise to pressure which may rupture the vessel.

TOXICOLOGICAL INFORMATION

For Styrene, the following values have been reported:-

An oral LD50 in rats of 5g/Kg.
LC50 in rats ranging between 2770 - 6000ppm.

Styrene odour is detectable at 25ppm. At 200-400ppm there is a transient irritant effect on nasal passages. At 400-1000ppm increasing systematic effects such as dizziness, nausea and headache at 800ppm and over becomes intolerable to mucous membranes. At 10000ppm and over may cause death in less than one hour.

There is no evidence that Styrene is carcinogenic in humans.

ECOLOGICAL INFORMATION

Marine pollutant and non biodegradeable.

Filler pastes are viscous compositions which lose solvents by evaporation or polymerisation, leaving a relatively inert residue which will not degrade significantly.

DISPOSAL CONSIDERATIONS

The uncured material and any contaminated container should be disposed of in accordance with the Environmental Protection Act.

TRANSPORT INFORMATION * PAINT RELATED MATERIAL OR POLYESTER RESIN KIT

SHIPPING NAME:

UNITED NATION NO: UN 1263 UN 3269

CLASS NO: 3.3. 3.3.

PACKING GROUP: III. III.

Complies with The Carriage of Dangerous Goods by Road and Rail (Classification, Packaging and Labelling) Regulations.

For current International Maritime Dangerous Goods Declaration, please contact our Export Department
Telephone No: 44-(0) 208 492 5950.

REGULATORY INFORMATION

CONTAINS: Styrene.

SYMBOL: Xn Harmful.

RISK PHRASES: R10 Flammable.
R20 Harmful by inhalation.
R36/38 Irritating to eyes and skin.

SAFETY PHRASES: S2 Keep out of reach of children.
S3 Keep in a cool place.
S46 If swallowed seek medical advice immediately and show this container or label.
S51 Use only in well ventilated areas.

FURTHER INFORMATION

The main hazard likely to be encountered during finishing operations is the production of dust clouds. Dust from any source in the right concentrations must be regarded as a potential danger to health. It is, therefore, of paramount importance that dust clouds are kept to an absolute minimum.

Our filler pastes have been specially formulated to be rubbed down wet. When using this method the surface will air dry in less than 30 seconds. Many experts consider that this will result in a better finish and obviate the dust problem.

1. To avoid dust and get the best use from our products we suggest either of the following work methods:-
 - (a) Take off excess bodyfiller with a sander incorporating a dust extractor and finish the job using wet and dry paper.
 - (b) Take off excess bodyfiller with a body file, and then finish the job with wet and dry paper.

If the above mentioned methods are not used, airborne dust will be produced whilst rubbing down in the traditional way. Therefore, it is advisable that the rubbing down be carried out by personnel properly protected, i.e., wearing dust masks in an area separate from the main working area and, most important, properly ventilated - preferably by dust extractors.

2. Whilst none of our products contain any form of asbestos, any dusts emitted from sanding filler pastes can be classified as "Nuisance" dusts which, to the best of our knowledge have a long history of little adverse effects to human health when exposures are kept under reasonable control.
3. Please note, for repairs using glassfibre filled materials it should be unnecessary to sand them, if applied according to instructions. However, if sanding is deemed to be necessary, then we recommend the wearing of a suitable dust mask, particularly where mechanical means are used.
4. Mineral filler (which is a constituent of most body fillers), "in excessive quantities", is considered a moderate risk and, therefore, it is advisable to provide proper working methods/machinery to minimise the risk.

Reference should be made to the following official publications:-

EH40, EH42, EH44, C.O.S.H.H. Regulations, Environmental Protection Act, Toxicity Review Styrene.

FLASH POINT METHOD USED: Tag Closed Cup

EXTINGUISHING MEDIA:

Use water fog, "alcohol" foam, dry chemical, or CO2.

SPECIAL FIRE FIGHTING PROCEDURES:

WARNING: Flammable Liquid. Clear fire area of unprotected personnel. Do not enter confined fire space without full bunker gear, including a positive pressure NIOSH approved SCBA. Cool fire exposed containers with water.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

When heated above the flash point this material emits flammable vapors which, when mixed with air, can burn or be explosive. Fine mist or spray may be flammable at temperatures below the flash point.

SECTION V - REACTIVITY DATA

STABILITY:

Stable

INCOMPATIBILITY:

Strong oxidizers.

HAZARDOUS DECOMPOSITION OR BY PRODUCTS:

Carbon monoxide and unidentified organic compounds may be formed during combustion.

HAZARDOUS POLYMERIZATION:

Will Not Occur

SECTION VI - HEALTH HAZARD DATA

ACUTE HEALTH EFFECT

EYE CONTACT: Liquid is moderately irritating to the eyes. High vapor concentrations may also be irritating.

INHALATION:

Vapors may be irritating to the nose, throat, and respiratory tract. High vapor concentrations may cause central nervous system (CNS) depression.

INGESTION:

Liquid is moderately toxic and may be harmful if swallowed; may produce CNS depression. Ingestion of product may result in vomiting, aspiration (breathing) of vomitus into the lungs must be avoided as even small quantities may result in aspir. pneumonia.

SKIN CONTACT:

Liquid is moderately irritating to the skin. Prolonged or repeated contact can result in defatting and drying of the skin which may result in skin irritation and dermatitis (rash).

SIGNS AND SYMPTOMS OF EXPOSURE:

Early to moderate CNS depression may be evidenced by giddiness, headache, lightheadedness, and nausea; in extreme cases, unconsciousness and death may occur. Aspiration pneumonia may be evidenced by coughing, labored breathing and cyanosis.

AGGRAVATED MEDICAL CONDITIONS:

May cause skin and liver disease, may attack respiratory tract. Laboratory studies have shown that petroleum distillates may cause kidney, liver, or lung damage. Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

SUPPLEMENTAL HEALTH INFORMATION:

Male rats exposed for 90 days by inhalation to vapors of similar solvents showed evidence of kidney damage. The relevance of this effect to humans is unknown. In one of the studies a low grade anemia was also observed.

EMERGENCY FIRST AID PROCEDURES

EYE CONTACT: Immediately flush eyes with plenty of water for at least 15 minutes while holding eyelids open. If irritation persists, get medical attention.

INHALATION: Remove victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, oxygen should be administered by qualified personnel. Get medical attention.

INGESTION: DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into the lungs. Get medical attention.

SKIN CONTACT: Remove contaminated clothing/shoes. Flush skin with water. Follow by washing with soap and water. If irritation occurs, get medical attention. Do not reuse clothing until cleaned.

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS SPILLED OR RELEASED:

WARNING: Flammable. Ventilate area of leak or spill. Remove all sources of ignition. Clean-up personnel require protective clothing and respiratory protection from vapors. Only specially trained or qualified personnel should handle the emergency.

WASTE DISPOSAL METHOD:

The preferred options for disposal are to send to licensed reclaimers, or to permitted incinerators. Any disposal practice must be in compliance with federal, state, and local regulations. Do not dump into sewers, ground, or any body of water.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

Keep away from heat, sparks, and flame. Surfaces that are hot may ignite even liquid product in the absence of sparks or flame. Extinguish pilot lights, cigarettes and turn off other sources of ignition prior to use and until all vapors are gone.

OTHER PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN! Empty containers retain product residue and can be dangerous. Do not pressure, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition.

SECTION VIII - CONTROL MEASURES

RESPIRATORY PROTECTION:

If exposure may or does exceed occupational exposure limits (Sec. 2) use a NIOSH approved respirator to prevent overexposure. In accord with 29 CFR 1910.134 use either an atmosphere-supplying respirator or an air-purifying respirator for organic vapors.

VENTILATION:

Provide adequate ventilation sufficient to keep the airborne concentration of this product below its exposure limits. Exhaust air may need to be cleaned by scrubbers or filters to reduce environmental contamination.

PROTECTIVE GLOVES:

Test data indicate the best protection is provided by nitrone, nitrile, and natural rubber gloves.

EYE PROTECTION:

Use chemical safety goggles and/or full face shield where splashing is possible. Contact lenses should not be worn when working with this material. Maintain eye wash fountain and quick-drench facilities in work areas.

SILICONE ADHESIVE REMOVER

SILICONE ADHESIVE REMOVER

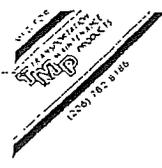

OTHER PROTECTIVE CLOTHING OR EQUIPMENT:

Where splashing is possible, full chemically resistant protective clothing (e.g., acid suit) and boots are required.

WORK/HYGIENE PRACTICES:

Use good personal hygiene when handling this product. Wash hands after use, before eating, drinking, smoking, or using the toilet.

The information contained herein is based on the data available to us and is believed to be accurate. However, equipment or methods regarding the accuracy of these data or the results to be obtained from the use thereof, makes no warranty, assumes no responsibility for injuries from the use of this product described herein.

MATERIAL SAFETY DATA SHEET

COMMERCIAL PRODUCT NAME: Graytex Chipguard (white, black, clear)
PRODUCT CODE: UP 0721- 0723
PREPARATION: PAINT PRODUCT CONTAINING XYLENE MIXTURE OF ISOMERS

WESMAR PRODUCTS, INC.
 1440 N.W. 45th STREET
 SEATTLE, WA 98107
 (206) 782-8186

EMERGENCY TELEPHONE NO.: 1-800 340 7824

COMPOSITION/INFORMATION ON INGREDIENTS

COMPONENT	CAS NO.	LEVEL	SYMBOL	RISK
XYLENE	1330-20-7	Approx. 40%	Xn - Harmful	R10 R30/21 F03

HAZARD IDENTIFICATION

INHALATION: May cause drowsiness and irritation of respiratory tract.
SKIN: May cause irritation on prolonged contact, which can lead to dermatitis.
EYES: Irritation and soreness.
INGESTION: Sore throat, stomachache, nausea.

FIRST AID MEASURES

INHALATION: Move affected person to the fresh air without delay. If drowsiness persists seek medical attention.
SKIN CONTACT: Wash affected area with warm soapy water. Do not use solvents.
EYE CONTACT: Irrigate with copious quantities of water and seek medical attention immediately.
INGESTION: Do not induce vomiting, drink plenty of water and seek medical attention.

FIRE FIGHTING MEASURES

Fight fires with CO₂, dry powder, or chemical foam. Do not use water jets. Burning material emits toxic fumes and smoke, so avoid inhalation of burning products.

ACCIDENTAL RELEASE MEASURES

The product will readily flow. Contain and collect any spillage with sand or earth. Keep product away from drains. Avoid sources of ignition. Dispose of in accordance with the requirements of the Environmental Protection Act.

HANDLING AND STORAGE

HANDLING: Keep away from heat. Keep away from sources of ignition. Avoid contact with skin and eyes. Use only in well ventilated areas, and for extensive spraying, in a suitable booth.
STORAGE: Store in accordance with The Highly Flammable Liquids and Liquefied Petroleum Gases Regulations

EXPOSURE CONTROL/PERSONAL PROTECTION

A good standard of personal and industrial hygiene should be maintained at all times. Persons who suffer from skin complaints or other allergic effects should not work with the product.

OEL (UK)	Component	8 HUCTVA	10 mins STEL
	Xylene	100 ppm	150 ppm

EYE PROTECTION: Not necessary

PROTECTIVE CLOTHING: Recommended.

RESPIRATORY PROTECTION: Suitable respiratory protection necessary, when spraying in areas of poor ventilation.

SKIN PROTECTION: Barrier cream recommended.

PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE: White, grey, or black liquid
ODOUR: Characteristic of Xylene.
DENSITY: Approx 1.2.
FLASH POINT: Approx 24°C.
AUTOFLAMMABILITY TEMPERATURE: 490°C (Xylene).
EXPLOSIVE LIMITS: Lower 1.0% Upper 6.0% (Xylene).
VOLATILE CONTENT: Approx. 10%.
SOLUBILITY: Insoluble in water.
VISCOSITY: Approx 150 centipoise.

STABILITY AND REACTIVITY

Stable under normal conditions. Heat increase may be sufficient to raise the temperature above the product flash point. Thermal decomposition can give rise to acid fumes.

TOXICOLOGICAL INFORMATION

For Xylene, the following values have been reported:

An oral LD50 in rats of 4.1g/Kg.
LC50 in rats of 3000 ppm/4 hours.

ECOLOGICAL INFORMATION

Marine pollutant and non biodegradable.

Paints are low viscosity compositions which lose solvents by evaporation, leaving a relatively inert residue which will not degrade significantly.

DISPOSAL CONSIDERATIONS

The material and any contaminated container should be disposed of in accordance with the Environmental Protection Act.

TRANSPORT INFORMATION

SHIPPING NAME: PAINT.
UNITED NATION NO: UN 1263
CLASS NO: 3.3
HARMONISED SYSTEMS NO: 320899 00 00
PACKING GROUP: III.

Complies with The Carriage of Dangerous Goods by Road and Rail (Classification, Packaging, and Labelling) Regulations.

For current International Maritime Dangerous Goods Declaration, please contact our Export Department Telephone No. 414(0)181-115-0172.

REGULATORY INFORMATION

CONTAINS: Xylene.

SYMBOL: Xn. Harmful.

RISK PHRASES:

R10 Flammable.
R20/21 Harmful by inhalation and in contact with skin.
R38 Irritating to the skin.

SAFETY PHRASES:

S2 Keep out of reach of children.
S23 Do not breathe vapour/spray.
S25 Avoid contact with the eyes.
S51 Use only in well ventilated areas.

S51 Use only in well ventilated areas.

FURTHER INFORMATION

The main hazard likely to be encountered during finishing operations is the production of dust clouds. Dust from any source in the right concentrations must be regarded as a potential danger to health. It is, therefore, of paramount importance that dust clouds are kept to an absolute minimum.

Our filler pastes have been specially formulated to be rubbed down wet. When using this method the surface will air dry in less than 30 seconds. Many experts consider that this will result in a better finish and obviate the dust problem.

1. To avoid dust and get the best use from our products we suggest either of the following work methods:-

- (a) Take off excess bodyfiller with a sander incorporating a dust extractor and finish the job using wet and dry paper.
- (b) Take off excess bodyfiller with a body file, and then finish the job with wet and dry paper.

If the above mentioned methods are not used, airborne dust will be produced whilst rubbing down in the traditional way. Therefore, it is advisable that the rubbing down be carried out by personnel properly protected, i.e., wearing dust masks in an area separate from the main working area and, most important, properly ventilated - preferably by dust extractors.

2. Whilst none of our products contain any form of asbestos, any dusts emitted from sanding filler pastes can be classified as "Nuisance" dusts which, to the best of our knowledge have a long history of little adverse effects to human health when exposures are kept under reasonable control.

3. Please note, for repairs using glassfibre filled materials it should be unnecessary to sand them, if applied according to instructions. However, if sanding is deemed to be necessary, then we recommend the wearing of a suitable dust mask, particularly where mechanical means are used.

4. Mineral filler (which is a constituent of most body fillers). "in excessive quantities", is considered a moderate risk and, therefore, it is advisable to provide proper working methods/machinery to minimise the risk.

Reference should be made to the following official publications:-

EH40, EH42, EH44, C.O.S.H.H. Regulations, Environmental Protection Act, Toxicity Review Styrene.

ISSUE DATE: 30/08/94

MATERIAL SAFETY DATA SHEET

CG 1625
PRODUCT IDENTIFIER: CG 1625A GLASS CLNR (30:1 CONC)

SECTION 5 - HEALTH HAZARD DATA

ROUTE OF ENTRY: a) Skin b) Inhalation c) Eye contact

EFFECTS OF ACUTE EXPOSURE: a) Eyes - Can cause severe irritation, redness, tearing, and blurred vision. b) Skin - Prolonged or repeated contact can cause moderate reddening, swelling and possible skin damage. 2-Butoxyethanol is readily absorbed through the skin. c) Inhalation - Can cause mild to moderate irritation of the respiratory passages. 2-Butoxyethanol is readily absorbed by epithelial tissues of the lungs. d) Ingestion - Harmful or fatal if swallowed.

EFFECTS OF CHRONIC EXPOSURE: Overexposure to glycol ether has apparently been found to cause liver, lung and kidney damage, anemia and other blood abnormalities in laboratory animals.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Pre-existing eye, skin and respiratory disorders may be aggravated by exposure to the product.

EMERGENCY AND FIRST AID PROCEDURES:

- SKIN - Wash skin with plenty of soap and water. If irritation develops, consult a physician.
- EYES - Immediately flush eyes with plenty of clear, running water for at least 15 minutes while carefully lifting the upper and lower lids. Get medical attention.
- INHALATION - If affected remove individual to fresh air. If breathing is difficult give oxygen. If breathing has stopped, administer artificial respiration. Keep person warm and quiet and get medical attention.
- INGESTION - Immediately drink two glasses of water and induce vomiting. Get medical attention immediately. Never give anything by mouth to an unconscious person.

SECTION 6 - CONTROL AND PROTECTIVE MEASURES

PERSONAL PROTECTIVE EQUIPMENT:

GLOVES....: Impervious recommended
FOOTWEAR...: N/AP

RESPIRATOR...: NIOSH approved, if needed
CLOTHING....: N/AP

EYE....: Safety glasses
OTHER...: N/AP

VENTILATION: LOCAL EXHAUST: Below TLV(s) MECHANICAL (General): Explosion proof

WORK/HYGIENIC PRACTICES: Eye wash and safety shower should be easily accessible. Provide adequate ventilation. Wash thoroughly after handling and before eating, drinking or smoking. Remove contaminated clothing promptly and wash it before reuse.

SECTION 7 - PRECAUTIONS FOR SAFE HANDLING AND USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Eliminate all ignition sources. Absorb on suitable absorbant and collect for disposal.

WASTE DISPOSAL METHOD: Contaminated absorbant may be disposed of according to local, state and federal regulations.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Keep away from heat, sparks and open flames. Protect from physical damage and keep tightly closed. Do not store under freezing conditions or above 120° F.

MAINTENANCE PRECAUTIONS: Never use welding or cutting torch on or near containers. Ground all metal containers while pouring.

OTHER PRECAUTIONS: Empty containers retain product residue and vapors. Always obey hazard warnings.

SECTION 8 - REGULATORY INFORMATION

This product contains the following chemical or chemicals subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986 and 40 CFR Part 372:

Glycol ethers (category) 10-30%

KEEP OUT OF REACH OF CHILDREN

N/AP - Not Applicable

N/AV - Not Available

ITEM NUMBER: CA 1314

PREPARER/CONTACT: GAYLE PAMMEYER/QUALITY AND MSDS COORDINATOR

Table with 4 columns: Health/Flammability/Reactivity/Protection, HMIS Rating, and other hazard indicators.

SECTION 1 - HAZARDOUS INGREDIENTS

THIS PRODUCT CONTAINS HAZARDOUS INGREDIENTS: YES

Table with 4 columns: Chemical/Common Name, CAS-Number, PEL-OSHA, TLV-ACGELH. Lists 2-Butoxyethanol, Butane, Propane, and 2-Propanol.

THIS PRODUCT CONTAINS CARCINOGENS (NTP, IARC, OR OSHA): NO

SECTION 2 - HEALTH HAZARD DATA

HEALTH EFFECTS (Acute and Chronic)-

- Acute:
a) Eyes - Can cause severe irritation, redness, tearing, and blurred vision.
b) Skin - Prolonged or repeated contact can cause moderate reddening, swelling, and possible skin damage.
c) Inhalation - Breathing of dust or mist can cause mild to severe irritation of nasal or respiratory passages.
d) Ingestion - Can cause gastrointestinal irritation, nausea, vomiting and diarrhea.

Chronic:
Overexposure to glycol ether (in its pure state) has apparently been found to cause anemia, liver abnormalities, kidney damage, lung damage, and blood abnormalities in laboratory animals.

PRIMARY ROUTES OF ENTRY- a) Skin b) Inhalation

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE
Pre-existing skin, eye and respiratory disorders may be aggravated by exposure to product.

EMERGENCY AND FIRST AID PROCEDURES

- a) SKIN - Wash with soap and water. Remove contaminated clothing and shoes. Wash before reuse.
b) EYES - In case of contact, immediately flush eyes with plenty of water. Consult a physician.
c) INHALATION - If affected, remove individual to fresh air. If breathing is difficult, administer oxygen. If breathing has stopped, give artificial respiration. Keep person warm, quiet, and get medical attention.
d) INGESTION - Do not induce vomiting. Call physician immediately. If conscious give lots of water or milk. Do not give anything by mouth to an unconscious or convulsing person.

SECTION 3 - CHEMICAL DATA

BOILING POINT (F): 200
VAPOR PRESSURE (mmHg): 20
VAPOR DENSITY (AIR=1): <1
PH: N/E
SPECIFIC GRAVITY (WATER=1): 0.98
PERCENT VOLATILE BY VOLUME: >80.0
EVAPORATION RATE (BUTYL ACETATE=1): <1
SOLUBILITY IN WATER: Soluble

APPEARANCE AND ODOR INFORMATION-
White liquid with pleasant odor.
ODOR THRESHOLD-
N/A

SECTION 4 - PHYSICAL HAZARD DATA

FLASH POINT (Method Used): 101 F(TCC)
FLAMMABLE LIMITS: LEL= 2 UEL= 12

EXTINGUISHING MEDIA -
Foam, dry chemical, carbon dioxide, water.

SPECIAL FIRE FIGHTING PROCEDURES-
Keep containers cool with water spray. Use shielding to protect personnel against bursting, rupturing or venting containers.

UNUSUAL FIRE AND EXPLOSION HAZARDS-
Do not expose aerosols to temperatures above 130 F. Containers may burst.

INCOMPATIBILITY (Materials to avoid)-
None

HAZARDOUS DECOMPOSITION PRODUCTS-
Oxides of carbon may be formed upon combustion.

WILL HAZARDOUS POLYMERIZATION OCCUR-
No.
CONDITIONS TO AVOID FOR POLYMERIZATION
N/A

IS THE PRODUCT STABLE-
Yes
CONDITIONS TO AVOID FOR STABILITY
N/A

WESMAR PRODUCTS, INC.
1440 N. W. 45TH STREET
SEATTLE WA 98107

SECTION 6 - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED-
Absorb spills on suitable absorbant and collect in DOT approved containers for disposal. Keep product out of sewers, storm drains, surface waters and soil.

WASTE DISPOSAL METHODS-

Dispose of contaminated product and materials used in spill clean up according to local, state and federal regulations for glycol ethers.

SECTION 6 - EXPOSURE CONTROL INFORMATION

VENTILATION-

LOCAL EXHAUST: Below TLV(s)

MECHANICAL (General): Explosion Proof

RESPIRATORY PROTECTION-

If TLV of the product or any component is exceeded, a NIOSH/MSHA jointly approved air supplied respirator is advised in absence of proper environmental control.

PROTECTIVE GLOVES-

Wear resistant gloves such as nitrile rubber, PVC, etc.

EYE PROTECTION-

Chemical splash goggles are strongly advised.

OTHER PROTECTIVE EQUIPMENT-

To prevent repeated and prolonged skin contact, wear impervious clothing and boots.

WORK PRACTICES-

Eye wash fountain and safety shower should be easily accessible. Discard properly such items as rags and trash soaked with the product. Provide adequate ventilation.

HYGIENIC PRACTICES-

Wash thoroughly after handling and before eating, drinking or smoking. Remove contaminated clothing promptly and wash thoroughly before reuse.

SECTION 7 - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE-

- Do not store under freezing conditions or above 120 degrees F.
- Protect from physical damage and keep tightly closed.
- Do not store near acids or acidic materials and oxidizers.

MAINTENANCE PRECAUTIONS-

When working with flammable material electrically ground all equipment and use only non-sparking tools.

OTHER PRECAUTIONS-

Containers, drums, etc. that have been emptied, will retain product residue and vapors. All MSDS hazard warnings.

SECTION 8 - REGULATORY INFORMATION

SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (SARA) TITLE III

This product contains the following chemicals subject to the reporting requirements of SARA Title III, Section 313:

2-Butoxyethanol CAS No. 111-76-2 <5%

KEEP OUT OF REACH OF CHILDREN

MATERIAL SAFETY DATA SHEET

COMMERCIAL PRODUCT NAME: Dolphin Pourable Putty (15 oz & 30 oz)

PRODUCT CODE: UP 0713 & UP 0714

PREPARATION: POLYESTER REPAIR PASTE CONTAINING STYRENE

WESMAR PRODUCTS, INC.
 1440 N.W. 45th STREET
 SEATTLE, WA 98107
 (206) 782-8186

EMERGENCY TELEPHONE NO.: 1-800-340-7824

COMPOSITION/INFORMATION ON INGREDIENTS

COMPONENT	CAS NO.	LEVEL	SYMBOL	RISK
STYRENE	100-42-5	11 - 25%	Xn - Harmful	R10 R20 R50/53

HAZARD IDENTIFICATION

INHALATION: May cause drowsiness and irritation of respiratory tract.

SKIN: May cause irritation on prolonged contact, redness.

EYES: Irritation and soreness.

INGESTION: Sore throat, stomachache, nausea.

FIRST AID MEASURES

INHALATION: Move affected person to the fresh air without delay. If drowsiness persists seek medical attention.

SKIN CONTACT: Wash affected area with warm soapy water. Do not use solvents.

EYE CONTACT: Irrigate with copious quantities of water and seek medical attention immediately.

INGESTION: Do not induce vomiting, drink plenty of water and seek medical attention.

FIRE FIGHTING MEASURES

Fight fires with CO₂, dry powder, or chemical foam. Do not use water jets. Burning material emits toxic fumes and smoke, so avoid inhalation of burning products.

ACCIDENTAL RELEASE MEASURES

The product does not readily flow. Any spillage should be wiped or scraped away. Keep product away from drains. Avoid sources of ignition. Dispose of in accordance with the requirements of the Environmental Protection Act.

HANDLING AND STORAGE

HANDLING: Keep away from heat. Keep away from sources of ignition. Avoid contact with skin and eyes. Use only in well-ventilated areas.

STORAGE: Store below 25°C in a dry, well-ventilated space in original closed containers.

EXPOSURE CONTROLS/PERSONAL PROTECTION

A good standard of personal and industrial hygiene should be maintained at all times. Persons who suffer from skin complaints or other allergic effects should not work with the product.

OEL (UK)	Component Styrene	8 HR TWV	100 ppm	10 min)	STEL	250 ppm
----------	-------------------	----------	---------	---------	------	---------

EYE PROTECTION: Not necessary

PROTECTIVE CLOTHING: Recommended

RESPIRATORY PROTECTION: Dust particle mask approved to FF-P1SD-EN149 (when handling cured product)

SKIN PROTECTION: Barrier cream recommended

PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE: Putty like consistency

ODOUR: Slightly pungent, characteristic of Styrene

DENSITY: 1.13 - 1.85

FLASH POINT: 32°C (Styrene)

AUTOFLAMMABILITY TEMPERATURE: 490°C (Styrene)

EXPLOSIVE LIMITS: Lower 1.1% Upper 6.1% (Styrene)

VOLATILE CONTENT: 11 - 25%

SOLUBILITY: Insoluble in water

VISCOSITY: Approx. 5000,000 - 1,000,000 centipoises

STABILITY AND REACTIVITY

Can polystyrene (solidify) if subjected to elevated temperatures over a period of time, exposed to UV/sunlight, or by the addition of free radical initiators e.g., organic peroxide. Heat increase may be sufficient to raise the temperature above the product flash point. Thermal decomposition can give rise to acid fumes. Polymerisation in a closed container can give rise to pressure which may rupture the vessel.

TOXICOLOGICAL INFORMATION

For Styrene, the following values have been reported:-

An oral LD50 in rats of 5g/kg
LC50 in rats ranging between 2770 - 6000ppm

Styrene odour is detectable at 25ppm. At 200-400ppm there is a transient irritant effect on nasal passages. At 400-1000ppm increasing systematic effects such as dizziness, nausea and headache at 800ppm and over becomes intolerable to mucous membranes. At 10000ppm and over may cause death in less than one hour.

There is no evidence that Styrene is carcinogenic in humans.

ECOLOGICAL INFORMATION

Marine pollutant and non biodegradable.

Filler pastes are viscous compositions which lose solvents by evaporation of polymerisation, leaving a relatively inert residue which will not degrade significantly.

DISPOSAL CONSIDERATIONS

The uncured material and any contaminated container should be disposed of in accordance with the Environmental Protection Act.

PERS: 1-800-633-8253

SECTION I – IDENTIFICATION

PRODUCT NAME: SUPREME RED
CHEMICAL FAMILY: MILDLY ALKALINE MATERIAL
FORMULA: N/A
CAS NUMBER: N/A

SECTION II – HAZARDOUS IDENTIFICATION

EMERGENCY OVERVIEW:

EYES:..... May cause severe eye irritation with possible permanent eye damage and impairment of vision.

SKIN (DERMAL):..... Prolonged and/or repeated exposure to concentrated product may result in irritation to the skin.

SWALLOWING (INGESTION): May cause severe gastrointestinal irritation and/or ulceration of the mouth and throat. Single dose oral LD50 has not been determined.

INHALATION:..... Vapors and mist may cause respiratory tract irritation.

MEDICAL CONDITION AGGRAVATED

BY EXPOSURE:..... Existing skin and/or respiratory disorders may be aggravated by exposure.

CHRONIC OVEREXPOSURE:.. None known

OSHA REGULATORY STATUS: Since this product is a mixture, there is no defined PEL's (Personal Exposure Limits) established by OSHA. ACGIH TLV's (Threshold Limit Values) for hazardous components are listed in the Hazardous Ingredients Section of this MSDS.

SECTION III – COMPOSITION INFORMATION ON INGREDIENTS

THRESHOLD LIMIT VALUE:.. The TLV in section in section III is the ACGIH/TLV-TWA (threshold limit value/time weighted average concentration for an eight hour work day). The STEL is the short term exposure limit and the (Ceil) is the ceiling limit.

HAZARDOUS INGREDIENT	PERCENT	CAS NO.	ACGIH/TWA	STEL/TLV
Sodium dodecylbenzene sulfonate	5-10	27176-87-0	NOT EST.	NOT EST.

(Also contains biodegradable surfactant(s), fragrance and dye.)

SECTION IV – FIRST AID DATA

EYES:..... In case of contact, immediately flush eyes with lots of running water for at least 15 minutes. Call for medical assistance.

Material Safety Data Sheet
SUPREME RED

SKIN (DERMAL):..... Wash skin with soap and water. Rinse with plenty of water. Remove and launder contaminated clothing before reuse.

SWALLOWING (INGESTION): NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. If swallowed, DO NOT INDUCE VOMITING. Give large quantities of water. (If available, give several glasses of milk) If vomiting occurs spontaneously, keep airway clear and give more water. GET MEDICAL ATTENTION IMMEDIATELY.

INHALATION:..... Remove to fresh air. Give artificial respiration if not breathing. Obtain medical attention.

SECTION V – FIRE FIGHTING MEASURES

FLASHPOINT:..... Non flammable, non combustible

LOWER EXPLOSIVE LIMIT:... N/A

UPPER EXPLOSIVE LIMIT:..... N/A

EXTINGUISHING MEDIA:..... Use extinguishing media appropriate to primary cause of fire.

SPECIAL FIRE FIGHTING PROCEDURES:..... Avoid contact with fire fighting personnel as burns may result from contact with skin. when fighting a fire near or involving this product, wear a self-contained breathing apparatus. (SCBA)

UNUSUAL FIRE AND EXPLOSION HAZARDS: None known

SECTION VI – ACCIDENTAL RELEASE MEASURES

SPILL/ LEAK PROCEDURES:.. Appropriate protective clothing must be worn by trained cleanup personnel. Dilute with large quantities of water and dispose in waste water treatment facilities. Check with local authorities first.

SECTION VII – HANDLING AND STORAGE

HANDLING INFORMATION:... Do not take internally. May be harmful if swallowed. Keep out of reach of children.

STORAGE REQUIREMENTS:.. Keep containers tightly closed when not in use. Empty container completely and dispose of in accordance with applicable regulations. **SPILLS:** Contain spill. Absorb with inert material and dispose in accordance with applicable regulations. Store away from food products.

SECTION VIII – EXPOSURE CONTROLS / PERSONAL PROTECTION

EYE PROTECTION:..... Chemical safety goggles. Contact lenses should not be worn when working with any chemicals.

RESPIRATORY PROTECTION: Respiratory protection should be worn if levels exceed defined PEL's for this product or any hazardous component listed in the Hazardous Ingredient Section of this MSDS.

OTHER PROTECTIVE EQUIPMENT: Rubber gloves, coveralls and protective footwear.

Material Safety Data Sheet
SUPREME RED

VENTILATION:..... Local exhaust sufficient to maintain TLV below permissible exposure limits.

SECTION IX – PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE:..... Clear red viscous liquid with pleasant odor.
BOILING POINT:..... Approx. 212° F.
VAPOR PRESSURE:..... NOT EST.
VAPOR DENSITY (AIR=1):..... NOT EST.
SPECIFIC GRAVITY:..... 1.02
pH:..... 9.0 - 9.9 AS IS
SOLUBILITY IN WATER:..... Completely soluble in water.

SECTION X – STABILITY AND REACTIVITY DATA

STABILITY: Stable
HAZARDOUS
POLYMERIZATION:..... Will not occur
INCOMPATIBILITY: Strong oxidizing agent, strong acids.
HAZARDOUS
DECOMPOSITION: Carbon monoxide and carbon dioxide upon thermal decomposition.

SECTION XI – TOXICOLOGICAL INFORMATION

TOXICOLOGICAL INFORMATION: Acute Oral Effects: Not determined. Acute toxicity via the oral route is expected to be low. Acute Dermal Effects: Not determined. Acute toxicity via the dermal route is expected to be low.

SECTION XII – ECOLOGICAL INFORMATION

ECOLOGICAL INFORMATION: No data available on the adverse effects of this material on the environment. Neither COD nor BOD data are available.

SECTION XIII – DISPOSAL CONSIDERATIONS

WASTE DISPOSAL:..... Consult all LOCAL, STATE, and FEDERAL regulations with regard to proper and suitable disposal methods.

SECTION XIV – TRANSPORTATION INFORMATION

PROPER SHIPPING NAME: N/A
HAZARD CLASS AND LABEL: NON HAZARDOUS
UN NUMBER: N/A

Material Safety Data Sheet
SUPREME RED

PACKAGING GROUP:N/A

SECTION XV – REGULATORY INFORMATION

LISTED CARCINOGEN: None known
TSCA STATUS: All components in this product are listed on the TSCA inventory.
SARA SECTION 313: This product does not contain any EPCRA section 313 chemicals subject to the reporting requirements of section 313 of the Emergency Planning Community Right-To-Know Act of 1986 (40CFR 372):
NFPA HEALTH: 2
NFPA FLAMMABILITY: 0
NFPA REACTIVITY: 0

SECTION XVI – OTHER INFORMATION

REFERENCES: The information contained herein has been compiled from sources believed to be reliable and accurate to the best of our knowledge at this date. It is provided without warranty, expressed or implied, as to the results of use of this information or to the product to which it relates. Wesmar Co. assumes no responsibility for injury to any person or property resulting from any use of the material. Each user assumes the risk in their use of this product and should review the data and recommendations in the specific context of their intended use.

FOOT NOTES: NOT EST. = Not Established, N/A = Not Applicable, (Ceil) = TLV ceiling limit.

COMPOSITION/INFORMATION ON INGREDIENTS

COMPONENT	CAS NO.	LEVEL	SYMBOL	RISK
XYLENE	1330-20-7	5 - 10%	Xn - Harmful.	R10 R20/21 R38
ACETONE	67-64-1	25 - 50%	F - Highly flammable	R11
BUTANE	106-97-8	10 - 25%	F+ - Extremely flammable	R12
PROPANE	74-98-6	10 - 25%	F+ - Extremely flammable	R12
AROMATIC HYDROCARBON	64742-95-6	1 - 5%	Xn - Harmful	R10

HAZARDS IDENTIFICATION

INHALATION:

May cause drowsiness and irritation of respiratory tract.

SKIN:

May cause irritation on prolonged contact, which can lead to dermatitis.

EYES:

Irritation and soreness.

INGESTION:

Sore throat, stomachache, nausea, but unlikely to be ingested.

FIRST AID MEASURES

INHALATION:

Move affected person to the fresh air without delay. If drowsiness persists seek medical attention.

SKIN CONTACT:

Wash affected area with warm soapy water. Do not use solvents.

EYE CONTACT:

Irrigate with copious quantities of water and seek medical attention immediately.

INGESTION:

Do not induce vomiting, drink plenty of water and seek medical attention.

FIRE FIGHTING MEASURES

Fight fires with CO₂, dry powder, or chemical foam. Do not use water jets. Burning material emits toxic fumes and smoke, so avoid inhalation of burning products.

ACCIDENTAL RELEASE MEASURES

The product will readily flow. Contain and collect any spillage with sand or earth. Keep product away from drains. Avoid sources of ignition. Dispose of in accordance with the requirements of the Environmental Protection Act.

HANDLING AND STORAGE

HANDLING:

Keep away from heat. Keep away from sources of ignition. Avoid contact with skin and eyes. Use only in well ventilated areas, and for extensive spraying, in a suitable booth.

STORAGE:

Store below 25°C in a dry well ventilated space in original containers. Keep away from sources of heat.

EXPOSURE CONTROL/PERSONAL PROTECTION

A good standard of personal and industrial hygiene should be maintained at all times. Persons who suffer from skin complaints or other allergic effects should not work with the product.

OEL (UK)	Component	8 HR TV/A	15 mins STEL
	Xylene	100 ppm	150 ppm
	Butane	600 ppm	750 ppm
	Acetone	750 ppm	1500 ppm

EYE PROTECTION:

Not necessary.

PROTECTIVE CLOTHING:

Recommended.

RESPIRATORY PROTECTION:

Suitable respiratory protection necessary, when spraying in areas of poor ventilation.

SKIN PROTECTION:

Barrier cream recommended.

PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE:

Beige liquid.

ODOUR:

Characteristic of Acetone.

DENSITY:

N/A.

FLASH POINT:

-40°C.

AUTOFIAMMABILITY TEMPERATURE:

>250°C.

EXPLOSIVE LIMITS:

Lower 0.8%. Upper 13.0%.

REGULATORY INFORMATION

VOLATILE CONTENT: Approx. 40%
SOLUBILITY: Insoluble in water.
VISCOSITY: N/A.
CONTAINS: Mixture of solvents.
SYMBOL: F+ Extremely flammable.
RISK PHRASES: N/A.
SAFETY PHRASES: S2 Keep out of reach of children.
S23 Do not breathe vapour/spray.
S25 Avoid contact with the eyes.
S51 Use only in well ventilated areas.
Pressurised container, protect from sunlight and do not expose to temperatures exceeding 50°C.
Do not pierce or burn even after use.
Do not spray on a naked flame or any incandescent material.

FURTHER INFORMATION

Reference should be made to the following official publications:-
EH40, COSHH Regulations, Environmental Protection Act.

ISSUE NUMBER: 0001

ISSUE DATE: 08/03/2000

STABILITY AND REACTIVITY

Stable under normal conditions. A void naked flames. Heat increase may be sufficient to raise the temperature above the product flash point. Thermal decomposition can give rise to acid fumes.

TOXICOLOGICAL INFORMATION

For Xylene, the following values have been reported:-

An oral LD50 in rats of 4.3g/Kg.
LC50 in rats of 5000 ppm/4 hours.

For Acetone, the following values have been reported:-

An oral LD50 in rats of 5.8g/Kg.
LC50 in rats of 50mg/L.

ECOLOGICAL INFORMATION

Marine pollutant and non biodegradable.

Paints are low viscosity compositions which lose solvents by evaporation, leaving a relatively inert residue which will not degrade significantly.

DISPOSAL CONSIDERATIONS

The material and any contaminated container should be disposed of in accordance with the Environmental Protection Act.

TRANSPORT INFORMATION

SHIPPING NAME: AEROSOLS.
UNITED NATION NO: UN 1950.
CLASS NO: 2.1
HARMONISED SYSTEMS NO: 320890 91 5.
PACKING GROUP: Not allocated.

Complies with The Carriage of Dangerous Goods by Road and Rail (Classification, Packaging and Labelling) Regulations.

For current International Maritime Dangerous Goods Declaration, please contact our Export Department
Telephone No: 44-(0)208 492 5950.

PRODUCT IDENTITY V.L.C.D.
 PRODUCT CODE NUMBER TM 1301-TM 1305
 PRODUCT USE AUTOMOTIVE RECONDITIONING PRODUCT
 DOT HAZARD CLASSIFICATION : NOT REGULATED

SECTION 1 - HAZARDOUS INGREDIENTS

HAZARDOUS INGREDIENTS	CAS NUMBER	Wgt. %	PEL-OSHA	EXPOSURE LIMITS TLV-ACGIH	OTHER	CARCINOGEN	NOTE
GLYCERINE (mist)	56-81-5	1-5	10 mg/m ³	10 mg/m ³	N/AV	NO	
ALKYLPHENOXYPOLYETHOXYETHANOL	MIXTURE	1-5	N/AV	N/AV	N/AV	NO	

SECTION 2 - PHYSICAL AND CHEMICAL CHARACTERISTICS

PHYSICAL STATE LIQUID
 ODOR AND APPEARANCE : MILKY BLUE LIQUID, CHERRY ODOR
 SPECIFIC GRAVITY (water=1): >1
 SOLUBILITY IN WATER DISPERSIBLE

VAPOR PRESSURE (mmHg)... <20
 VAPOR DENSITY (Air=1)... >1
 ODOR THRESHOLD N/AV
 EVAPORATION RATE (ETHER=1): SLOWER

pH 10
 BOILING POINT (F).... >212
 FREEZING POINT (F)... 32

SECTION 3 - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT (F) AND METHOD...: N/AP
 FLAMMABLE LIMITS: LEL = N/AP UEL = N/AP
 EXTINGUISHING MEDIA: Use alcohol foam, water fog, carbon dioxide or dry chemical.
 SPECIAL FIRE FIGHTING PROCEDURES: None
 UNUSUAL FIRE AND EXPLOSION HAZARDS: Product is not a fire hazard, but its residue may burn after water evaporates.

SECTION 4 - REACTIVITY DATA

IS THE PRODUCT STABLE? YES
 CONDITIONS TO AVOID FOR STABILITY: Strong oxidizing agents.
 INCOMPATIBILITY (Materials to Avoid): Avoid contact with strong oxidizing agents such as chlorine, permanganate, etc.
 HAZARDOUS DECOMPOSITION PRODUCTS....: Oxides of carbon, silicon, nitrogen, traces of hydrocarbons and acrolein.
 WILL HAZARDOUS POLYMERIZATION OCCUR? NO
 CONDITIONS TO AVOID FOR POLYMERIZATION: N/AP

KEEP OUT OF REACH OF CHILDREN

N/AP - Not Applicable

N/AV - Not Available

MATERIAL SAFETY DATA SHEET

PRODUCT IDENTIFIER: V.L.C.D. TM 1301-TM 1305

SECTION 5 - HEALTH HAZARD DATA

ROUTE OF ENTRY: a) Skin b) Inhalation c) Eye contact

EFFECTS OF ACUTE EXPOSURE: a) Eyes - May cause mild irritation. b) Skin - Prolonged or repeated contact can cause irritation, defatting and dermatitis. c) Inhalation - Can cause slight irritation of the respiratory passages. d) Ingestion - Can cause gastrointestinal irritation, nausea, vomiting and diarrhea.

EFFECTS OF CHRONIC EXPOSURE: Overexposure to high concentrations of mist may increase susceptibility to respiratory illness.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Pre-existing eye skin and respiratory disorders may be aggravated by exposure to the product.

EMERGENCY AND FIRST AID PROCEDURES:

- a) SKIN - Wash with plenty of soap and water. If irritation develops, consult a physician.
- b) EYES - Immediately flush with plenty of clear, running water for at least 15 minutes. Get medical attention.
- c) INHALATION - If affected, remove individual to fresh air. If breathing is difficult, give oxygen. If breathing has stopped, administer artificial respiration. Keep person warm and quiet, and get medical attention.
- d) INGESTION - Call a poison control center or physician immediately. Do not induce vomiting. Immediately drink two glasses of milk or water. Never give anything by mouth to an unconscious or convulsing person.

SECTION 6 - CONTROL AND PROTECTIVE MEASURES

PERSONAL PROTECTIVE EQUIPMENT:

GLOVES.....: Recommend impervious
FOOTWEAR...: N/AP

RESPIRATOR...: NIOSH-Approved, if needed
CLOTHING....: N/AP

EYE.....: Safety glasses
OTHER...: Splash goggles, if needed

VENTILATION: LOCAL EXHAUST: Below TLV MECHANICAL (General): Explosion proof

WORK/HYGIENIC PRACTICES: Eye wash and safety shower should be easily accessible. Provide adequate ventilation. Wash thoroughly after handling and before eating, drinking or smoking. Remove contaminated clothing promptly and launder before reuse.

SECTION 7 - PRECAUTIONS FOR SAFE HANDLING AND USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Absorb small spills on suitable absorbent, and collect for disposal. Dike large spills and pump liquid to salvage tank. Absorb remaining liquid on suitable absorbent and collect for proper disposal.

WASTE DISPOSAL METHOD: Dispose of contaminated absorbent in accordance with local, state and federal regulations.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Keep away from heat, sparks and open flames. Protect from physical damage and keep tightly closed. Do not store under freezing conditions or above 120 degrees F.

MAINTENANCE PRECAUTIONS: None

OTHER PRECAUTIONS: Empty containers retain product residue and vapors. Always obey hazard warnings.

SECTION 8 - REGULATORY INFORMATION

This product contains the following chemical or chemicals subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986 and 40 CFR Part 372:

NONE

KEEP OUT OF REACH OF CHILDREN

BUILDINGS 592 (TRIDENT SEAFOODS)

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

Date 06/19/13 Time: 9:50

Address: 401 Alexander Ave. Building 592 Tacoma, WA 98421

Building Owner: Port of Tacoma

Occupant Name: Trident Seafoods

Contact Name: Mark Schneider Telephone (home):253-502-5318 Telephone (work): Cell:

How long has owner/tenant/occupant/resident occupied building? 13 years

Occupation: Ship repair and maintenance

Number of Occupants Adults: 75-300 Ages: Children: Ages:

BUILDING CONSTRUCTION CHARACTERISTICS:

Building Use: Residential Commercial/Industrial X School/Institutional

Building Type: One story Two story X Apartment (# of units) Condominium (# of units) Other

General Description of Building Construction Materials: Brick, Siding, Wood, Stone, Stucco, Metal, Other Metal

Year Constructed: 1911

GARAGE: Do you have an attached garage? Yes No

Has the building been weatherized with any of the following? Insulation, Storm Windows, Energy-Efficient Windows, Other (specify) No

What type of basement does the building have?

Table with 5 columns: None, Finished, Unfinished, Depth below reference point (meters), and checkboxes for Partial, Full, Crawl space.

Number of floors at or above grade: 2

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

Depth of basement below grade: _____ ft. Basement Size: _____ ft²
Foundation construction: Poured concrete Cinder block Stone
Any visual evidence of leakage through basement walls or floor
Floor Construction: Poured concrete Wood Earth Brick Other: _____
Floor condition (cracks, drains): Cracks on floor/good

Condition at floor/wall joint (if visible): Good

Any exterior openings from the basement: NA

- Vents
- Fans
- Windows
- Wall openings
- Utility pipe penetrations
- Other: _____

Type of ground cover outside of building: grass / concrete / asphalt / other (specify): _____

Sub-slab vapor/moisture barrier in place? Yes / No / Don't know

Type of barrier: _____

Do you have a sump?: Yes No

Where: _____

If yes, sealed open NA

If yes, is there water in the sump?: Yes No

Is building serviced with municipal water? Yes No

Do you have a water well?: Yes No Don't know

Well location: _____

Do you drink the water obtained from the well? _____

What do you use the well for?: _____

Do you have a cistern?: Yes No

If yes, describe its location: _____

Do you have a septic system?: Yes No If Yes is it still active Yes No

If yes, describe its location: _____

If yes, describe how septic system is cleaned: _____

Have there ever been a fire in the building?: Yes No

If yes, describe its location and extent: _____

Is there a laundry room located inside the house?: Yes No

If yes, describe its location: NA

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

Is there a Radon System in the building: Yes No NA

HEATING AND VENTILATION SYSTEM(S) PRESENT:

What type of heating system(s) is/are used in the building?

Hot Air Circulation Heat Pump Steam Radiation Wood Stove
Hot Air Radiation Unvented Kerosene heater Electric Baseboard Other (specific)

Where are they located? Pump on 2nd floor/no warehouse heating

Is there outside air vent for heating system? Yes

What type(s) of fuel(s) are used in this building?

Natural Gas Electric Coal Other (specific) Propane
Fuel Oil Wood Solar

What type of mechanical ventilation systems are present and/or currently operating in the building? Chrome welding fumes

Central Air Conditioning Mechanical Fans Bathroom Ventilation
Fan Kitchen Range Hood Open Windows
Individual Air Conditioning Units Air-to-Air Heat Exchanger Other (specify)

Where are they located? Office building

Do you have a fireplace? Yes No
Does the fireplace have an outside combustion air vent? Yes No

SOURCES OF CHEMICAL CONTAMIANTS

- 1. When was the last time dry-cleaned clothes were brought into the building?
 0 to 5 days ago 6 to 10 days ago More than 10 days ago Don't dry-clean
- 2. How recently were the carpets installed?
 In the last six months More than six months ago No Carpet
- 3. When was the last time the carpet was cleaned?

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

In the last six months More than six months ago Never

4. Was there any recent remodeling or painting done in the building?

Yes No Details: 4 years ago/purchasing dept.

5. Are there any pressed wood products in the building (e.g., hardwood plywood wall paneling, particleboard, fiberboard)? NA

6. Are there any new upholstery, drapes, or textiles in the building? NA

7. Do you have any spot removers in the building?

Yes No Details: _____

8. Are there any hobbies include model building, arts and crafts, model railroading, or others that require paints, thinners, or glue undertaken in the building?

Yes No Details: _____

9. Do you perform automotive or other vehicle maintenance or repair within the building (e.g., attached garage)?

Yes No Details: Forklift maintenance

10. Which of these items are present in the building? (Check all that apply)

<i>Potential VOC Source</i>	<i>Location of Source</i>	<i>Removed 48 hours prior to sampling? (Yes/No/NA)</i>

Revision Number: 001.2

Issue date: 12/15/2011

1. PRODUCT AND COMPANY IDENTIFICATION

Product name: Marine Grade Anti-Seize
Product type: Lubricant
Company address: Henkel Corporation
 One Henkel Way
 Rocky Hill, Connecticut 06067

IDH number: 275026
Item number: 34026
Region: United States

Contact information:
 Telephone: 860.571.5100
 Emergency telephone: 860.571.5100
 Internet: www.henkelna.com

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Physical state:	paste	HEALTH:	1
Color:	black	FLAMMABILITY:	1
Odor:	mild	PHYSICAL HAZARD:	0
CAUTION:		Personal Protection:	See MSDS Section 8

CAUSES EYE, SKIN AND RESPIRATORY TRACT IRRITATION.

Relevant routes of exposure: Skin, Inhalation, Eyes

Potential Health Effects

Inhalation: Shortness of breath. Coughing. Moderate respiratory tract irritation.
Skin contact: Moderate skin irritation.
Eye contact: Moderate eye irritation. Redness. Excess tearing.
Ingestion: Principal hazard of ingestion is aspiration into the lungs and subsequent pneumonitis. Not expected to be harmful by ingestion.

Existing conditions aggravated by exposure: Eye, skin, and respiratory disorders.

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

See Section 11 for additional toxicological information.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Hazardous components	CAS NUMBER	%
Petroleum Based grease	Unknown	30 - 60
Calcium oxide	1305-78-8	10 - 30
Graphite	7782-42-5	10 - 30
Mineral oil light naphthenic hydrotreat. <3% DMSO	64742-53-6	5 - 10
Distillates (petroleum), hydrotreated heavy naphthenic	64742-52-5	5 - 10
Calcium distearate	1592-23-0	5 - 10
Boron nitride	10043-11-5	1 - 5

4. FIRST AID MEASURES

Inhalation: Move to fresh air. If symptoms develop and persist, get medical attention.

Skin contact: Immediately flush skin with plenty of water (using soap, if available). Remove contaminated clothing and footwear. If symptoms develop and persist, get medical attention. Wash clothing before reuse.

Eye contact: Get medical attention. Immediately flush eyes with plenty of water for at least 15 minutes.

Ingestion: Get medical attention. Keep individual calm. Do not induce vomiting: contains petroleum distillates and/or aromatic solvents.

5. FIRE FIGHTING MEASURES

Flash point: Not applicable

Autoignition temperature: Not available.

Flammable/Explosive limits - lower: Not available.

Flammable/Explosive limits - upper: Not available.

Extinguishing media: Water spray (fog), foam, dry chemical or carbon dioxide.

Special firefighting procedures: Wear a self-contained breathing apparatus with a full face piece operated in pressure-demand or other positive pressure mode.

Unusual fire or explosion hazards: None

Hazardous combustion products: Oxides of nitrogen. Oxides of carbon.

6. ACCIDENTAL RELEASE MEASURES

Use personal protection recommended in Section 8, isolate the hazard area and deny entry to unnecessary and unprotected personnel.

Environmental precautions: Do not allow product to enter sewer or waterways.

Clean-up methods: Scrape up as much material as possible. Clean residue with soap and water. Store in a partly filled, closed container until disposal.

7. HANDLING AND STORAGE

Handling: Prevent contact with eyes, skin and clothing. Do not breathe vapor and mist. Wash thoroughly after handling.

Storage: Keep container closed. Keep in a cool, well ventilated area.

For information on product shelf life contact Henkel Customer Service at (800) 243-4874.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Employers should complete an assessment of all workplaces to determine the need for, and selection of, proper exposure controls and protective equipment for each task performed.

Hazardous components	ACGIH TLV	OSHA PEL	AIHA WEEL	OTHER
Petroleum Based grease	5 mg/m3 TWA mist	5 mg/m3 TWA mist	None	None
Calcium oxide	2 mg/m3 TWA	5 mg/m3 TWA	None	None
Graphite	2 mg/m3 TWA Respirable fraction.	5 mg/m3 TWA Respirable fraction. 15 mg/m3 TWA Total dust. 15 MPPCF TWA	None	None
Mineral oil light naphthenic hydrotreat. <3% DMSO	5 mg/m3 TWA Inhalable fraction.	500 ppm (2,000 mg/m3) TWA 5 mg/m3 TWA Mist.	None	None
Distillates (petroleum), hydrotreated heavy naphthenic	5 mg/m3 TWA mist 10 mg/m3 STEL mist 5 mg/m3 TWA Inhalable fraction.	5 mg/m3 TWA mist 500 ppm (2,000 mg/m3) TWA 5 mg/m3 TWA Mist.	None	None
Calcium distearate	10 mg/m3 TWA 3 mg/m3 TWA Respirable fraction.	None	None	None
Boron nitride	None	None	None	None

Engineering controls:

Use local ventilation if general ventilation is insufficient to maintain vapor concentration below established exposure limits.

Respiratory protection:

Observe OSHA regulations for respiratory use (29 CFR 1910.134). Use NIOSH approved respirator if there is potential to exceed exposure limit(s).

Eye/face protection:

Safety goggles or safety glasses with side shields.

Skin protection:

Use impermeable gloves and protective clothing as necessary to prevent skin contact.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state:	paste
Color:	black
Odor:	mild
Odor threshold:	Not available.
pH:	Not available.
Vapor pressure:	Not available.
Boiling point/range:	Not available.
Melting point/ range:	Not available.
Specific gravity:	1.2648
Vapor density:	Not available.
Flash point:	Not applicable
Flammable/Explosive limits - lower:	Not available.
Flammable/Explosive limits - upper:	Not available.
Autoignition temperature:	Not available.
Evaporation rate:	Not available.
Solubility in water:	Insoluble
Partition coefficient (n-octanol/water):	Not available.
VOC content:	3 %; 38.4 g/l EPA Method 24

10. STABILITY AND REACTIVITY

Stability:	Stable
Hazardous reactions:	Will not occur.
Hazardous decomposition products:	None reasonably foreseeable.
Incompatible materials:	Strong acids and strong bases. Strong oxidizing agents. Strong reducing agents.
Conditions to avoid:	None known

11. TOXICOLOGICAL INFORMATION

Hazardous components	NTP Carcinogen	IARC Carcinogen	OSHA Carcinogen (Specifically Regulated)
Petroleum Based grease	No	No	No
Calcium oxide	No	No	No
Graphite	No	No	No
Mineral oil light naphthenic hydrotreat. <3% DMSO	No	No	No
Distillates (petroleum), hydrotreated heavy naphthenic	No	No	No
Calcium distearate	No	No	No
Boron nitride	No	No	No

Hazardous components	Health Effects/Target Organs
Petroleum Based grease	No Data
Calcium oxide	Irritant, Corrosive, Eyes
Graphite	Lung
Mineral oil light naphthenic hydrotreat. <3% DMSO	Irritant
Distillates (petroleum), hydrotreated heavy naphthenic	Irritant
Calcium distearate	No Target Organs
Boron nitride	Irritant, Corrosive

12. ECOLOGICAL INFORMATION

Ecological information: Not available.

13. DISPOSAL CONSIDERATIONS

Information provided is for unused product only.

Recommended method of disposal: Follow all local, state, federal and provincial regulations for disposal.

Hazardous waste number: Not a RCRA hazardous waste.

14. TRANSPORT INFORMATION

U.S. Department of Transportation Ground (49 CFR)

Proper shipping name: Not regulated
Hazard class or division: None
Identification number: None
Packing group: None

International Air Transportation (ICAO/IATA)

Proper shipping name: Not regulated
Hazard class or division: None
Identification number: None
Packing group: None

Water Transportation (IMO/MDG)

Proper shipping name:	Not regulated
Hazard class or division:	None
Identification number:	None
Packing group:	None

15. REGULATORY INFORMATION

United States Regulatory Information

TSCA 8 (b) Inventory Status:	All components are listed or are exempt from listing on the Toxic Substances Control Act Inventory.
TSCA 12(b) Export Notification:	None above reporting de minimus
CERCLA/SARA Section 302 EHS:	None above reporting de minimus
CERCLA/SARA Section 311/312:	Immediate Health
CERCLA/SARA 313:	None above reporting de minimus
California Proposition 65:	No California Proposition 65 listed chemicals are known to be present.

Canada Regulatory Information

CEPA DSL/NDSL Status:	All components are listed on or are exempt from listing on the Canadian Domestic Substances List.
WHMIS hazard class:	E, D.2.B

16. OTHER INFORMATION

This material safety data sheet contains changes from the previous version in sections: New Material Safety Data Sheet format.

Prepared by: Lou Fabrizio, Regulatory Affairs Specialist

DISCLAIMER: The data contained herein are furnished for information only and are believed to be reliable. However, Henkel Corporation and its affiliates ("Henkel") does not assume responsibility for any results obtained by persons over whose methods Henkel has no control. It is the user's responsibility to determine the suitability of Henkel's products or any production methods mentioned herein for a particular purpose, and to adopt such precautions as may be advisable for the protection of property and persons against any hazards that may be involved in the handling and use of any Henkel's products. In light of the foregoing, Henkel specifically disclaims all warranties, express or implied, including warranties of merchantability and fitness for a particular purpose, arising from sale or use of Henkel's products. Henkel further disclaims any liability for consequential or incidental damages of any kind, including lost profits.

MATERIAL SAFETY DATA SHEET

BELZONA® 5811 (IMMERSION GRADE) BASE

1 CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME	BELZONA® 5811 (IMMERSION GRADE) BASE		
INTERNAL ID	0305/1421/-/01		
PRODUCT USE	Base component of a two component system. Mix with Solidifier component before use. High performance barrier coating for protection of metallic and non-metallic surfaces against attack from aqueous solutions. Application by brush. Application by heated airless spray. Please refer to the relevant Belzona® Instructions For Use for further information. For use only by professional operators.		
SUPPLIER	Belzona Inc. 2000 N.W. 88 Court Miami FL 33172 ☎ 1-305-594-4994 Fax: 1-305-599-1140 belzona@belzona.com	MANUFACTURER	Belzona Polymerics Limited Claro Road, Harrogate North Yorkshire HG1 4AY, England ☎ +44 (0) 1423 567641 Fax: +44 (0) 1423 505967 belzona@belzona.co.uk
CONTACT PERSON	Prepared by the Regulatory Affairs Department; Phone: +44 (0) 1423 567 641		
EMERGENCY TELEPHONE	CHEMTREC: 800-424-9300 Toll free in United States CHEMTREC: 1-703-527-3887 For calls from outside the United States		

2 HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Beige or Black Paste. Epoxy odor. WARNING. May cause allergic skin reaction. May cause irritation to eyes or skin. Possible reproductive hazard; contains a component that may cause impaired fertility. Possible developmental hazard; contains a component that may cause harm to the unborn child. Combustible liquid - Class IIIB. Prevent the product from entering into soil, drains, sewers, ditches or waterways.

POTENTIAL HEALTH EFFECTS

INHALATION

Vapors that may collect in the container headspace during transit or prolonged storage may be harmful if inhaled. Inhalation of airborne droplets or aerosols may severely damage contacted tissue and produce scarring.

INGESTION

Ingestion is not normally an exposure risk arising from professional applications. Inadvertent ingestion of small amounts of this product through poor hygiene or cross contamination may cause irritation of mucous membranes.

SKIN CONTACT

Prolonged or repeated contact with the skin may cause irritation, blistering or dermatitis. Release during high pressure use may result in injection of material into the skin causing local necrosis.

EYE CONTACT

Splashes in the eyes may cause irritation and reversible local damage.

ROUTE OF ENTRY

Skin and/or eye contact. Ingestion. Inhalation. Injection.

TARGET ORGANS

Eyes. Skin. Respiratory system, lungs.

MEDICAL SYMPTOMS

Prolonged or repeated contact with the skin or mucous membrane may result in irritant symptoms such as redness, blistering or dermatitis. Onset of symptoms may be delayed. Eye contact may cause tearing and discomfort.

MEDICAL CONSIDERATIONS

Skin contact constitutes a pronounced hazard. Persons with a history of skin sensitization problems should only be employed in processes in which this product is used under appropriate medical supervision.

CARCINOGENICITY

Not available for the mixture, however none of the components in concentrations of 0.1% or greater are listed as carcinogens according to OSHA, NTP, ACGIH or IARC.

SENSITIZATION

There is no data on the product itself. This product contains one or more components that have caused skin sensitization in humans. See Section 11.

BELZONA® 5811 (IMMERSION GRADE) BASE**TOXIC TO REPRODUCTION**

There is no data on the product itself. This product contains one or more components that have shown reprotoxic effects in laboratory tests. See Section 11.

MUTAGENICITY

Not available for the mixture, however available information on the individual components does not indicate a mutagenic hazard.

DEVELOPMENTAL TOXICITY

There is no data on the product itself. This product contains one or more components that have shown fetotoxic and/or teratogenic effects in laboratory tests. See Section 11.

3 COMPOSITION/INFORMATION ON INGREDIENTS

Name	EC No.	CAS-No.	Weight
REACTION PRODUCT: BISPHENOL A-(EPICHLORHYDRIN)	500-033-5	25068-38-6	30-60%
DIISOHEPTYL PHTHALATE	276-158-1	71888-89-6	5-10%
SILICA, QUARTZ	238-878-4	14808-60-7	30-60%

COMPOSITION COMMENTS

The remaining constituents of this product are either considered to be non-hazardous or below the relevant concentration limits.

4 FIRST-AID MEASURES**GENERAL INFORMATION**

In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.

INHALATION

Remove to fresh air. Keep the patient warm and at rest. If breathing has stopped, administer artificial respiration. Give nothing by mouth. If unconscious, place in the recovery position and seek medical advice.

INGESTION

If accidentally swallowed obtain immediate medical attention. Keep at rest. Rinse mouth with plenty of water and drink plenty of water. Do NOT induce vomiting.

SKIN CONTACT

Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use a proprietary skin cleaner. Do NOT use solvents or thinners. If irritation or inflammation persists, seek medical attention. If material is injected under the skin, seek immediate medical attention. Even when there are few or no symptoms do not hesitate to refer the casualty to hospital.

EYE CONTACT

Contact lenses should be removed. Irrigate copiously with clean, fresh water for at least 15 minutes, holding the eyelids apart, and seek medical advice.

5 FIRE-FIGHTING MEASURES**EXTINGUISHING MEDIA**

Use: sand, alcohol resistant foam, carbon dioxide, chemical powder, water fog for larger fires.

Do NOT use water jet.

SPECIAL FIRE FIGHTING PROCEDURES

Fire will produce dense black smoke containing hazardous products of combustion (see Section 10). Exposure to decomposition products may be a hazard to health. Appropriate positive-pressure self-contained breathing apparatus (SCBA) and full fire fighting turn-out gear (Bunker gear) should be worn. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains, sewers, ditches or waterways.

UNUSUAL FIRE & EXPLOSION HAZARDS**SENSITIVITY TO MECHANICAL IMPACT**

The product is not sensitive to mechanical impact or physical shock.

SENSITIVITY TO STATIC DISCHARGE

May accumulate static charge during use.

AUTO IGNITION TEMPERATURE NIA
(°C)

FLAMMABILITY LIMIT - LOWER(%) NIA

FLAMMABILITY LIMIT - UPPER(%) NIA

FLASH POINT (°C) > 150 (302°F) CC (Closed cup).

FLAMMABILITY CLASS

3.2 Combustible Liquid IIIB

6 ACCIDENTAL RELEASE MEASURES

BELZONA® 5811 (IMMERSION GRADE) BASE

PERSONAL PRECAUTIONS

Avoid contact with eyes, skin and clothing. Refer to protective measures listed in Section 8.

ENVIRONMENTAL PRECAUTIONS

Prevent the product from entering into soil, drains, sewers, ditches or waterways in large quantities.

SPILL CLEAN UP METHODS

Scrape the majority of the product into a suitable labeled container. Cover the spill area with sand or other suitable inert material and sweep up into the container. Clean surfaces down with a water and detergent mixture. Refer to disposal methods listed in Section 13.

7 HANDLING AND STORAGE

HANDLING

GENERAL

Keep the container tightly closed until ready for use. Vapors may collect in the container headspace during transit or prolonged storage. Avoid breathing vapor when opening the container. Do not breathe spray during application. Prevent air-borne concentrations higher than the occupational exposure limits (see Section 8). Avoid contact with eyes, skin and clothing. Smoking, eating and drinking should be prohibited in areas of storage and use. For personal protection see Section 8. Always keep in containers made of the same material as the supply container. Good housekeeping methods and regular safe removal of waste materials should be observed. Ensure emergency equipment (for fires, spills, leaks, etc.) is readily available.

FIRE/EXPLOSION

This product is combustible. Exclude sources of heat, sparks and open flame.

SPECIAL

When applying the product by heated airless spray, ensure that temperatures are controlled to the minimum that achieves acceptable atomization. Exclude non-essential personnel. Minimise the number of employees exposed and the duration of their exposure. Do not breathe vapors/mists. Dry sanding or brush blasting of the cured coating may give rise to hazardous dust. Wet methods should be used wherever possible. If exposure cannot be avoided see Section 8 for further exposure control measures.

STORAGE

Observe the label precautions. Store between 5°C (41°F) and 30°C (86°F) unless otherwise stated in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. No smoking. Prevent unauthorized access. Store separately from oxidizing agents and strongly alkaline and strongly acidic materials.

ENVIRONMENTAL STORAGE PRECAUTIONS

Spillage, incorrect storage of chemicals or waste materials or unsuitable disposal activities can result in pollutants seeping through the soil, causing serious harm to groundwater- which is a vital source of drinking water. All wastes especially liquid wastes, should be securely stored on site in designated areas that are isolated from waterways and groundwater and diked to contain any spillages.

8 EXPOSURE CONTROLS/PERSONAL PROTECTION

COMPONENT	STD	TWA (8-hrs)	STEL (15 min)	TWA (8-hrs)	STEL (15 min)
DIISOHEPTYL PHTHALATE	SUP	5 mg/m3			

INGREDIENT COMMENTS

Consult local authorities for acceptable exposure limits. Those occupational exposure limits that are marked 'SUP' are assigned by the supplier of the substance.

ENGINEERING MEASURES

STANDARD APPLICATIONS

Open containers in a well ventilated area.

SPRAY APPLICATIONS

Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and/or vapors below the relevant occupational exposure limits, suitable respirators should be worn (see 'Respiratory Equipment' below).

RESPIRATORY EQUIPMENT

GENERAL GUIDANCE ON RESPIRATORY PROTECTION

It is essential that the concentration of the contaminant(s) in the application environment does not exceed the applicable occupational exposure limit(s) multiplied by the Assigned Protection Factor (APF) quoted for the respiratory protective equipment selected.

STANDARD APPLICATIONS

Respirators are not normally required, but may be required where adequate ventilation cannot be achieved.

SPRAY APPLICATIONS

Where necessary, it is recommended that an OSHA/NIOSH approved supplied-air respirator (SAR) equipped with a full facepiece is worn if exposure to the applicator or other people nearby cannot be controlled to below the occupational exposure limit and engineering methods cannot reasonably be improved.

EMERGENCY SITUATIONS

Where entry into unknown or Immediately Dangerous To Life or Health (IDLH) atmospheres is required, an OSHA/NIOSH approved pressure-demand self-contained breathing apparatus (SCBA) with a full facepiece or a pressure-demand supplied-air respirator (SAR) with a full facepiece in combination with an auxiliary pressure-demand SCBA respirator should be worn.

BELZONA® 5811 (IMMERSION GRADE) BASE**HAND PROTECTION****GENERAL GUIDANCE ON HAND PROTECTION**

The breakthrough time of the gloves selected should exceed the expected use period. Where this is not possible gloves should be changed in good time, and in any case before the breakthrough time is exceeded. Where doubt exists, advice should be sought from manufacturers or vendors of protective gloves in order to determine appropriate types for the particular circumstances. Barrier creams may help to protect exposed areas of skin but are not substitutes for full physical protection. They should not be applied once exposure has occurred.

SPECIFIC RECOMMENDATIONS

Use protective gloves made of: Neoprene. Nitrile.

STANDARD APPLICATIONS / SPRAY APPLICATIONS / EMERGENCY SITUATIONS

Medium-heavy weight gauntlet type gloves that provide wrist protection are suitable.

EYE PROTECTION**STANDARD APPLICATIONS**

It is recommended that eye protection, for example safety glasses with side shields or goggles are worn at all times during the handling and use of this material.

EMERGENCY SITUATIONS

Refer to 'Respiratory Equipment' above.

OTHER PROTECTION**STANDARD APPLICATIONS/SPRAY APPLICATIONS**

Synthetic polyethylene coveralls such as the Tyvek PRO-TECH® or equivalent coveralls manufactured to provide protection against liquid chemicals should be worn. Grossly contaminated clothing should be removed and the skin washed with soap and water or a proprietary skin cleaner.

EMERGENCY SITUATIONS

Wear chemical resistant splash suit and boots made from neoprene or PVC, as appropriate.

HYGIENE MEASURES

Wash at the end of each work shift and before eating, smoking and using the toilet. Ensure eye wash facilities (fountain, bottle, vials, etc.) are readily available. Do not put contaminated articles or equipment e.g. spatulas, applicators, brushes, cloths etc., into pockets. Where necessary, contaminated work clothing and shoes should be removed to prevent cross contamination of surfaces and the risk of inadvertent skin contact and ingestion.

9 PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE	Paste.		
COLOR	Beige. Black		
ODOR	Epoxy.		
PHYSICAL DATA COMMENTS	This section contains typical values for Health, Safety and Environmental guidance only and is not intended to represent a technical specification for the product. L = Low. LP = See Section 12.		
SOLUBILITY	Immiscible with water		
BOILING POINT (°C)	NIA	MELTING POINT (°C)	NIA
RELATIVE DENSITY	1.61 - 1.66 @ 20°C (68°F)	VAPOUR DENSITY (air=1)	>1
VAPOUR PRESSURE	L	EVAPORATION RATE	N.ap
pH-VALUE, CONC. SOLUTION	N.ap	VISCOSITY	NIA
DECOMPOSITION TEMPERATURE (°C)	NIA	ODOR THRESHOLD, LOWER	NIA
FLASH POINT (°C)	> 150 (302°F) CC (Closed cup).	PARTITION COEFFICIENT (N-Octanol/Water)	LP
VOLATILE ORGANIC CONTENT	0 g/litre		

10 STABILITY AND REACTIVITY

STABILITY

Stable under recommended storage and handling conditions (see Section 7). In a fire, hazardous decomposition products such as smoke, carbon monoxide, carbon dioxide may be produced.

CONDITIONS TO AVOID

Keep away from oxidizing agents and strongly alkaline and strongly acidic materials to prevent the possibility of exothermic reaction.

11 TOXICOLOGICAL INFORMATION

TOXICOLOGICAL INFORMATION

There is no data on the product itself.

Name	REACTION PRODUCT: BISPHENOL A-(EPICHLORHYDRIN)
Toxic Dose 1 - LD 50	>11,400 mg/kg (oral rat)
Toxic Dose 2 - LD 50	>23,500 mg/kg (dermal rat)
Toxic Conc. - LC 50	N.ap
Toxicological information	

BELZONA® 5811 (IMMERSION GRADE) BASE

Repeated skin contact may lead to sensitization with possibly cross-sensitization to other epoxies. In rare cases, low molecular weight liquid epoxy resins can cause an allergic respiratory reaction like asthma, based on limited human information. The evidence available is not however, considered to fall within the classification criteria as laid out within the OSHA Hazard Communication Standard nor the Controlled Products Regulations.

Name	DIISOHEPTYL PHTHALATE
Toxic Dose 1 - LD 50	>10,000 mg/kg (oral rat)
Toxic Dose 2 - LD 50	>3,160 mg/kg (dermal rbt)
Toxic Conc. - LC 50	NIA.

Toxicological information

Developmental/Reproductive toxicity studies: Has been shown to cause developmental effects at high doses in laboratory animals when administered orally by gavage in a developmental study and developmental and fertility effects when administered at high doses by feed in a two-generation reproduction study. Technologists have determined that the potential risk from occupational exposure is very low, based on the limited relevance of the rodent findings to humans and the large safety margins between exposure and effect levels.

12 ECOLOGICAL INFORMATION

ECOTOXICITY

PRODUCT COMPONENT AS SUPPLIED

There is no data on the product itself. The following information is provided on the basis of the individual component data available. The product should not be allowed to enter soil, drains, sewers, ditches and waterways or be deposited where it can affect ground or surface waters. See also Sections 5, 6, 7, 9 and 13.

CURED PRODUCT

When mixed, applied and cured in accordance with the Belzona® Instructions For Use (IFU) the resultant polymeric coating is not considered to be dangerous for the environment.

BIOACCUMULATION

Based on the individual component data, the product is expected to bioaccumulate. Log octanol/water partition coefficient (Log Pow) is expected to be greater than 3.0.

DEGRADABILITY

Based on the individual component data, the product is not expected to be readily biodegradable according to OECD/EC guidelines.

ACUTE FISH TOXICITY

Based on the individual component data, the product is expected to have experimental LC50/EC50/IC50 values between 1 and 10 mg/l in most sensitive species.

13 DISPOSAL CONSIDERATIONS

DISPOSAL METHODS

GENERAL

Do NOT dump into any sewers, on the ground, or into any body of water. The product as shipped in its intended condition does not exhibit any of the 'Characteristics' of hazardous waste as defined in 40 CFR 261.20-24. Disposal must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations are the responsibility solely of the waste generator.

COMPONENT DISPOSAL

TRANSIT PACKAGING: shrink or stretch wrap, boxes and fittings that have not been contaminated with product should be re-used or recycled. UNREACTED PRODUCT: empty uncleaned containers and contaminated packaging should be disposed of as non-hazardous solid waste. REACTED PRODUCT: that has been mixed and cured in accordance with the relevant 'Instructions For Use' will form an inert filled polymeric compound that may be able to be disposed of as non-hazardous solid waste. Refer to your local licensed, permitted waste agent or facility.

14 TRANSPORT INFORMATION

TRANSPORT NOTES

Non-regulated for transport under current Domestic, or International Air and Sea Regulations.
Transport within user's premises: always transport in closed containers that are upright and secure.
Ensure that persons transporting the product know what to do in the event of accident or spillage.

15 REGULATORY INFORMATION

SARA (311/312) HAZARD CATEGORIES

Acute Chronic

BELZONA® 5811 (IMMERSION GRADE) BASE**REGULATORY STATUS (US)**

This product is considered "Hazardous" as defined by the OSHA Hazard Communication Standard 29 CFR 1910.1200.

SECTION 313: This product does not contain toxic chemical subject to the reporting requirements of Section 313 of Title III of the Superfund Amendment and Reauthorization Act of 1986 and 40 CFR Part 372.

U.S California Safe Drinking Water & Toxic Enforcement Act (Proposition 65): To the best of our knowledge, this product does not contain any chemicals known to the State of California to cause cancer or reproductive toxicity.

Toxic Substance Control Act (TSCA): All constituents of this product are included on the Inventory or are not required to be listed.

2 HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Dark brown. Liquid Amine odor. DANGER. Causes skin and eye burns. May be harmful if swallowed or absorbed through the skin. May cause allergic skin or respiratory reaction. A component of the product may affect the central nervous system. Combustible liquid - Class IIIB. Prevent the product from entering into soil, drains, sewers, ditches or waterways.

POTENTIAL HEALTH EFFECTS

INHALATION

Exposure to vapors may result in irritation of the mucous membrane and the respiratory system; in severe cases burns may occur. Inhalation of airborne droplets or aerosols may severely damage contacted tissue and produce scarring.

INGESTION

Ingestion is not normally an exposure risk arising from professional applications. Inadvertent ingestion of small amounts of this product through poor hygiene or cross contamination may cause irritation or burns of the mouth, throat and stomach. May be harmful if swallowed.

SKIN CONTACT

Contact with skin or any living tissue may cause burns, in severe cases complete tissue destruction may occur. This product contains components that may be absorbed through the skin (see Section 8). May be harmful if absorbed through the skin. Release during high pressure use may result in injection of material into the skin causing local necrosis.

EYE CONTACT

Contact with eyes may cause severe irritation with corneal injury, which may result in permanent impairment of vision. Product vapor in low concentrations can cause tearing, conjunctivitis and corneal edema when absorbed into the tissue of the eye from the atmosphere. Low vapor concentrations of many amines can cause a visual disturbance known as 'blue haze' or 'halo vision'. Vision becomes foggy or blurred, objects may appear bluish, and halos may be seen around lights. Symptoms may be delayed. Eye discomfort or pain may not be experienced by affected persons. The effect normally clears up within a day and causes no permanent injury. The visual disturbance could contribute to accidents.

ROUTE OF ENTRY

Inhalation. Skin absorption. Ingestion. Skin and/or eye contact. Injection.

TARGET ORGANS

Eyes. Skin. Respiratory system, lungs. Central nervous system.

MEDICAL SYMPTOMS

Inhalation of vapor, skin absorption and ingestion may result in symptoms of central nervous system depression, such as headache, drowsiness, nausea and vomiting. Inhalation may result in asthmatic symptoms, wheezing and a tightness of the chest. Extreme irritation of eyes and mucous membranes, including burning and tearing. Contact with skin or any living tissue may cause burns, in severe cases complete tissue destruction may occur. Repeated contact with the skin may cause dermatitis or allergic skin reaction. Onset of symptoms may be delayed.

MEDICAL CONSIDERATIONS

Skin contact constitutes a pronounced hazard. Persons with a history of skin sensitization problems should only be employed in processes in which this product is used under appropriate medical supervision. Persons with a history of asthma, allergies or chronic or recurrent respiratory disease should not risk exposure to respiratory sensitizers.

BELZONA® 5811 (IMMERSION GRADE) SOLIDIFIER**CARCINOGENICITY**

Not available for the mixture, however none of the components in concentrations of 0.1% or greater are listed as carcinogens according to OSHA, NTP, ACGIH or IARC.

SENSITIZATION

There is no data on the product itself. This product contains one or more components that have caused allergic either skin or respiratory reactions in susceptible individuals. See Section 11.

TOXIC TO REPRODUCTION

Not available for the mixture, however available information on the individual components does not indicate a reprotoxic hazard.

MUTAGENICITY

Not available for the mixture, however available information on the individual components does not indicate a mutagenic hazard.

DEVELOPMENTAL TOXICITY

Not available for the mixture, however available information on the individual components does not indicate a developmental hazard.

3 COMPOSITION/INFORMATION ON INGREDIENTS

Name	EC No.	CAS-No.	Weight
BENZYL ALCOHOL	202-859-9	100-51-6	10-30%
CYCLOALIPHATIC AMINE PREPARATION	Proprietary	Proprietary	10-30%
DIETHYLENETRIAMINE	203-865-4	111-40-0	1-5%
TRIETHYLENETETRAMINE	203-950-6	112-24-3	1-5%
4,4'-METHYLENEBIS(CYCLOHEXANAMINE)	217-168-8	1761-71-3	1-5%

COMPOSITION COMMENTS

The remaining constituents of this product are either considered to be non-hazardous or below the relevant concentration limits.

4 FIRST-AID MEASURES**GENERAL INFORMATION**

In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.

INHALATION

Remove to fresh air. Keep the patient warm and at rest. If breathing has stopped, administer artificial respiration. Give nothing by mouth. If unconscious, place in the recovery position and seek medical advice.

INGESTION

If accidentally swallowed do NOT induce vomiting. Keep at rest. Rinse mouth with water and drink 1 cup of water every 10 minutes for 30 minutes. Seek immediate medical attention.

SKIN CONTACT

Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use a proprietary skin cleaner. Do NOT use solvents or thinners. If irritation or inflammation persists, seek medical attention. If material is injected under the skin, seek immediate medical attention. Even when there are few or no symptoms do not hesitate to refer the casualty to hospital.

EYE CONTACT

Contact lenses should be removed. Irrigate copiously with clean, fresh water for at least 15 minutes, holding the eyelids apart, and seek medical advice.

5 FIRE-FIGHTING MEASURES**EXTINGUISHING MEDIA**

Use: sand, alcohol resistant foam, carbon dioxide, chemical powder, water fog for larger fires.
Do NOT use water jet.

SPECIAL FIRE FIGHTING PROCEDURES

Fire will produce dense black smoke containing hazardous products of combustion (see Section 10). Exposure to decomposition products may be a hazard to health. Appropriate positive-pressure self-contained breathing apparatus (SCBA) and full fire fighting turn-out gear (Bunker gear) should be worn. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains, sewers, ditches or waterways.

UNUSUAL FIRE & EXPLOSION HAZARDS**SENSITIVITY TO MECHANICAL IMPACT**

The product is not sensitive to mechanical impact or physical shock.

SENSITIVITY TO STATIC DISCHARGE

The product has a high flashpoint and contains alcohols that are good at conducting electricity. Probably not sensitive to static discharge.

AUTO IGNITION TEMPERATURE NIA
(°C)

FLAMMABILITY LIMIT - NIA
LOWER(%)

BELZONA® 5811 (IMMERSION GRADE) SOLIDIFIER

FLAMMABILITY LIMIT - UPPER(%) NIA

FLASH POINT (°C) > 103 (217°F) CC (Closed cup).

FLAMMABILITY CLASS

3.2 Combustible Liquid IIIB

6 ACCIDENTAL RELEASE MEASURES**PERSONAL PRECAUTIONS**

Exclude sources of ignition and ventilate the area. Exclude non-essential personnel. Keep up-wind of spill to avoid breathing vapors. Do not get in eyes, on skin, or on clothing. Refer to protective measures listed in Section 8.

ENVIRONMENTAL PRECAUTIONS

Prevent the product from entering into soil, drains, sewers, ditches or waterways in large quantities.

SPILL CLEAN UP METHODS

Contain and collect spillages with non-combustible absorbent materials e.g. sand, earth, vermiculite, diatomaceous earth and place into a suitable labeled container. Clean surfaces down with a water and detergent mixture. Refer to disposal methods listed in Section 13.

7 HANDLING AND STORAGE**HANDLING****GENERAL**

Keep the container tightly closed when not in use. Vapors may collect in the container headspace during transit or prolonged storage. Avoid breathing vapor when opening the container. Where possible open containers and mix components in a well ventilated place away from the application area. Do not breathe spray during application. Prevent air-borne concentrations higher than the occupational exposure limits (see Section 8). Do not get in eyes, on skin, or on clothing. Smoking, eating and drinking should be prohibited in areas of storage and use. For personal protection see Section 8. Always keep in containers made of the same material as the supply container. Ensure emergency equipment (for fires, spills, leaks, etc.) is readily available. Good housekeeping methods and regular safe removal of waste materials should be observed.

FIRE/EXPLOSION

This product is combustible. Exclude sources of heat, sparks and open flame.

SPECIAL

When applying the product by heated airless spray, ensure that temperatures are controlled to the minimum that achieves acceptable atomization. Ammonia may be given off when heated. Do not breathe vapors/mists. Exclude non-essential personnel. Minimise the number of employees exposed and the duration of their exposure.

STORAGE

Observe the label precautions. Store between 5°C (41°F) and 30°C (86°F) unless otherwise stated in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. No smoking. Prevent unauthorized access. Store separately from oxidizing agents and strongly acidic materials.

ENVIRONMENTAL STORAGE PRECAUTIONS

Spillage, incorrect storage of chemicals or waste materials or unsuitable disposal activities can result in pollutants seeping through the soil, causing serious harm to groundwater- which is a vital source of drinking water. All wastes especially liquid wastes, should be securely stored on site in designated areas that are isolated from waterways and groundwater and diked to contain any spillages.

8 EXPOSURE CONTROLS/PERSONAL PROTECTION

COMPONENT	STD	TWA (8-hrs)	STEL (15 min)	TWA (8-hrs)	STEL (15 min)
BENZYL ALCOHOL	AIHA	10 ppm			
DIETHYLENTRIAMINE	OSHA (F)	1 ppm			
DIETHYLENTRIAMINE	ACGIH	1 ppm(Sk)		4.3 mg/m3(Sk)	
TRIETHYLENETETRAMINE	AIHA	1 ppm(Sk)			

INGREDIENT COMMENTS

'ACGIH' = Threshold Limit Value (TLV) set by ACGIH. 'OSHA (F)' = 'Final Rule' Permissible Exposure Limit (PEL) set by OSHA. 'AIHA' = American Industrial Hygiene Association. 'Sk' indicates a risk of exposure through skin absorption. Consult local authorities for acceptable exposure limits. During standard, non-spray applications, the risk of exposure by inhalation to hazardous concentrations of diethylenetriamine under normal working conditions in a well ventilated area is minimal.

ENGINEERING MEASURES**STANDARD APPLICATIONS**

Use in well ventilated areas or provide adequate mechanical ventilation.

SPRAY APPLICATIONS

Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and/or vapors below the relevant occupational exposure limits, suitable respirators should be worn (see 'Respiratory Equipment' below).

BELZONA® 5811 (IMMERSION GRADE) SOLIDIFIER

RESPIRATORY EQUIPMENT

GENERAL GUIDANCE ON RESPIRATORY PROTECTION

It is essential that the concentration of the contaminant(s) in the application environment does not exceed the applicable occupational exposure limit(s) multiplied by the Assigned Protection Factor (APF) quoted for the respiratory protective equipment selected.

STANDARD APPLICATIONS

Respirators are not normally required, but may be required where adequate ventilation cannot be achieved.

SPRAY APPLICATIONS

Where necessary, it is recommended that an OSHA/NIOSH approved supplied-air respirator (SAR) equipped with a full facepiece is worn if exposure to the applicator or other people nearby cannot be controlled to below the occupational exposure limit and engineering methods cannot reasonably be improved.

EMERGENCY SITUATIONS

Where entry into unknown or Immediately Dangerous To Life or Health (IDLH) atmospheres is required, an OSHA/NIOSH approved pressure-demand self-contained breathing apparatus (SCBA) with a full facepiece or a pressure-demand supplied-air respirator (SAR) with a full facepiece in combination with an auxiliary pressure-demand SCBA respirator should be worn.

HAND PROTECTION

GENERAL GUIDANCE ON HAND PROTECTION

The breakthrough time of the gloves selected should exceed the expected use period. Where this is not possible gloves should be changed in good time, and in any case before the breakthrough time is exceeded. Where doubt exists, advice should be sought from manufacturers or vendors of protective gloves in order to determine appropriate types for the particular circumstances. Barrier creams may help to protect exposed areas of skin but are not substitutes for full physical protection. They should not be applied once exposure has occurred.

SPECIFIC RECOMMENDATIONS

Use protective gloves made of: Neoprene. Nitrile.

STANDARD APPLICATIONS / SPRAY APPLICATIONS / EMERGENCY SITUATIONS

Medium-heavy weight gauntlet type gloves that provide wrist protection are suitable.

EYE PROTECTION

STANDARD APPLICATIONS

It is recommended that eye protection, for example safety glasses with side shields or goggles are worn at all times during the handling and use of this material.

EMERGENCY SITUATIONS

Refer to 'Respiratory Equipment' above.

OTHER PROTECTION

STANDARD APPLICATIONS

Synthetic polyethylene coveralls such as the Tyvek PRO-TECH® or equivalent coveralls manufactured to provide protection against liquid chemicals should be worn. Grossly contaminated clothing should be removed and the skin washed with soap and water or a proprietary skin cleaner.

EMERGENCY SITUATIONS

Wear chemical resistant splash suit and boots made from neoprene or PVC, as appropriate.

HYGIENE MEASURES

Wash at the end of each work shift and before eating, smoking and using the toilet. Ensure eye wash facilities (fountain, bottle, vials, etc.) are readily available. Do not put contaminated articles or equipment e.g. spatulas, applicators, brushes, cloths etc., into pockets. Where necessary, contaminated work clothing and shoes should be removed to prevent cross contamination of surfaces and the risk of inadvertent skin contact and ingestion.

9 PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE	Liquid		
COLOR	Dark brown.		
ODOR	Amine.		
PHYSICAL DATA COMMENTS	This section contains typical values for Health, Safety and Environmental guidance only and is not intended to represent a technical specification for the product. A = Alkaline. LP = See Section 12.		
SOLUBILITY	Partially miscible with water.		
BOILING POINT (°C)	> 200 (392°F) @ 760 mm Hg	MELTING POINT (°C)	NIA
RELATIVE DENSITY	1.18 - 1.22 @ 20°C (68°F)	VAPOUR DENSITY (air=1)	> 1
VAPOUR PRESSURE	< 1.38 kPa @ 21°C (70°F)	EVAPORATION RATE	NIA
pH-VALUE, CONC. SOLUTION	A	VISCOSITY	NIA
DECOMPOSITION TEMPERATURE (°C)	NIA	ODOR THRESHOLD, LOWER	NIA
FLASH POINT (°C)	> 103 (217°F) CC (Closed cup).	PARTITION COEFFICIENT (N-Octanol/Water)	LP
VOLATILE ORGANIC CONTENT	285 g/litre		

10 STABILITY AND REACTIVITY

STABILITY

Stable under recommended storage and handling conditions (see Section 7). In a fire, hazardous decomposition products such as smoke, carbon monoxide, carbon dioxide, oxides of nitrogen and ammonia may be produced.

BELZONA® 5811 (IMMERSION GRADE) SOLIDIFIER

CONDITIONS TO AVOID

Keep away from oxidizing agents and strongly acidic materials to prevent the possibility of exothermic reaction.

11 TOXICOLOGICAL INFORMATION

TOXICOLOGICAL INFORMATION

There is no data on the product itself.

Name	BENZYL ALCOHOL
Toxic Dose 1 - LD 50	1230-1660 mg/kg (oral rat)
Toxic Dose 2 - LD 50	2000 mg/kg (dermal rbt)
Toxic Conc. - LC 50	>500* mg/m3 (inh rat)

Toxicological information

Remarks: *Exposure duration not reported.

Exhibits a strong anesthetic effect when applied directly to the skin. May be absorbed through the skin. Developmental studies: Female rodent mice administered 750mg/kg/day over days 6-13 of gestation showed slight teratogenic effects in the offspring; slight reduced birth weight and weight gain, in the presence of significant maternal toxicity. Mutagenicity studies: In general human and animal bacterial tests have been negative (with and without activation). However, mutations were observed in Chinese hamster ovary cells (with activation).

Name	DIETHYLENETRIAMINE
Toxic Dose 1 - LD 50	1080 mg/kg (oral rat)
Toxic Dose 2 - LD 50	1090 mg/kg (dermal rbt)
Toxic Conc. - LC 50	NIA.

Toxicological information

Has caused skin sensitization in humans. Occupational respiratory sensitization has been documented. May be absorbed through the skin.

Name	TRIETHYLENETETRAMINE
Toxic Dose 1 - LD 50	2500 mg/kg (oral rat)
Toxic Dose 2 - LD 50	805 mg/kg (dermal rbt)
Toxic Conc. - LC 50	(See remarks.)

Toxicological information

Remarks: No deaths/4h saturated vapor.

Mutagenicity studies: positive in-vitro point mutations. However did not cause cancer in laboratory animals. Developmental studies: laboratory animals that were fed exaggerated doses of TETA showed embryotoxic and teratogenic effects in the presence of maternal toxicity that were believed to be associated with an observed copper deficiency. Has caused skin sensitization in humans.

Triethylenetetramine is closely related to ethylenediamine, which is a known respiratory sensitizer. There are a small number of case reports of occupational asthma that relate to triethylenetetramine exposure, but in most cases there was concurrent exposure to other respiratory sensitizers, in particular ethylenediamine. May be absorbed through the skin.

Name	4,4'-METHYLENEBIS(CYCLOHEXANAMINE)
Toxic Dose 1 - LD 50	625-1000 mg/kg (oral rat)
Toxic Dose 2 - LD 50	2110 mg/kg (dermal rbt)
Toxic Conc. - LC 50	NIA.

Toxicological information

Has caused skin sensitization in animals.

12 ECOLOGICAL INFORMATION

ECOTOXICITY

PRODUCT COMPONENT AS SUPPLIED

There is no data on the product itself. The following information is provided on the basis of the individual component data available. The product should not be allowed to enter soil, drains, sewers, ditches and waterways or be deposited where it can affect ground or surface waters. See also Sections 5, 6, 7, 9 and 13.

CURED PRODUCT

When mixed, applied and cured in accordance with the Belzona® Instructions For Use (IFU) the resultant polymeric coating is not considered to be dangerous for the environment.

BIOACCUMULATION

Based on the individual component data, the product is expected to bioaccumulate. Log octanol/water partition coefficient (Log Pow) is expected to be greater than 3.0.

DEGRADABILITY

Based on the individual component data, the product is not expected to be readily biodegradable according to OECD/EC guidelines.

ACUTE FISH TOXICITY

Based on the individual component data, the products LC50/EC50/IC50 are expected to be between 10 and 100 mg/l in most sensitive species.

13 DISPOSAL CONSIDERATIONS

BELZONA® 5811 (IMMERSION GRADE) SOLIDIFIER**DISPOSAL METHODS****GENERAL**

Do NOT dump into any sewers, on the ground, or into any body of water. The product as shipped in its intended condition exhibits the following 'Characteristics' of hazardous waste as defined in 40 CFR 261.20-24: 'Corrosivity'- RCRA Code: D002. Disposal must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations are the responsibility solely of the waste generator.

COMPONENT DISPOSAL

TRANSIT PACKAGING: shrink or stretch wrap, boxes and fittings that have not been contaminated with product should be re-used or recycled. **UNREACTED PRODUCT:** empty uncleaned containers and contaminated packaging should be disposed of as hazardous chemical waste. **REACTED PRODUCT:** that has been mixed and cured in accordance with the relevant 'Instructions For Use' will form an inert filled polymeric compound that may be able to be disposed of as non-hazardous solid waste. Refer to your local licensed, permitted waste agent or facility.

14 TRANSPORT INFORMATION**TRANSPORT NOTES**

Transport classification: labeling and packaging requirements may vary with pack and load size. Please refer to the current transport regulations.

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of accident or spillage.

Emergency Overview

WARNING: Vapor Harmful. Contents Under Pressure.

As defined by OSHA's Hazard Communication Standard, this product is hazardous.

Appearance & Odor: Colorless liquid, irritation odor at high concentrations.

Potential Health Effects:

ACUTE EFFECTS:

EYE: Liquid contact will produce mild eye irritation. Vapors may also cause irritation. Corneal injury is unlikely.

SKIN: Prolonged or repeated exposure can cause skin irritation, drying, flaking, defatting and possibly dermatitis or skin burns. A single prolonged exposure is not likely to result in the material being absorbed through skin in harmful amounts.

INHALATION: Exposure to vapors may cause respiratory tract irritation. High concentrations may cause central nervous system depression. Symptoms include dizziness and loss of coordination and could lead to unconsciousness or death. Excessive exposure may increase sensitivity to epinephrine and increase myocardial irritability.

INGESTION: Single dose toxicity is low. Swallowing an excessive amount can cause gastrointestinal disturbances and central nervous system depression. If aspirated into lungs, during swallowing or vomiting, liquid may be rapidly absorbed through the lungs and result in injury to other body systems.

CHRONIC EFFECTS: Chronic immersion of skin in this liquid may lead to absorption through skin. This may cause numbness in the immersed area. Excessive inhalation of vapors may increase sensitivity to epinephrine and increase myocardial irritability.

TARGET ORGANS: central nervous system; liver, kidney effects seen in laboratory animals

Medical Conditions Aggravated by Exposure: pre-existing skin conditions, respiratory conditions

Product Name: Heavy Duty Degreaser (aerosol)

Product Number (s): 03095, 03095T, 73095

See Section 11 for toxicology and carcinogenicity information on product ingredients.

Section 3: Composition/Information on Ingredients

COMPONENT	CAS NUMBER	% by Wt.
Tetrachloroethylene (PERC)	127-18-4	50 - 60
Trichloroethylene (TCE)	79-01-6	40 - 50
1,2-Butylene Oxide	106-88-7	< 0.5
Carbon dioxide	124-38-9	< 5

Section 4: First Aid Measures

Eye Contact: Immediately flush with plenty of water for 15 minutes. Call a physician if irritation persists.

Skin Contact: Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.

Inhalation: Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.

Ingestion: Do NOT induce vomiting. Contact physician or poison control center.

Note to Physicians: Because rapid absorption may occur through lungs if aspirated and cause systemic effects, the decision of whether to induce vomiting or not should be made by a physician. If lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Exposure may increase myocardial irritability. Do not administer sympathomimetic drugs unless absolutely necessary. No specific antidote.

Section 5: Fire-Fighting Measures

Flammable Properties: This product is nonflammable in accordance with aerosol flammability definitions. (See 16 CFR 1500.3(c)(6)) However, it can be made to burn under certain conditions.

Flash Point:	None (TCC)	Upper Explosive Limit:	44.8%
Autoignition Temperature:	ND	Lower Explosive Limit:	8.0%

Fire and Explosion Data:

Suitable Extinguishing Media: Use media suitable for surrounding fire.

Products of Combustion: Hydrogen chloride, trace amounts of phosgene, chlorine, and carbon monoxide.

Explosion Hazards: Aerosol containers, when exposed to heat from fire, may build pressure and explode.

Protection of Fire-Fighters: Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

Product Name: Heavy Duty Degreaser (aerosol)

Product Number (s): 03095, 03095T, 73095

Section 6: Accidental Release Measures

Personal Precautions: Use personal protection recommended in Section 8. Do NOT breathe vapors.

Environmental Precautions: Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

Methods for Containment & Clean-up: Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

Section 7: Handling and Storage

Handling Procedures: Prevent skin and eye contact. Wash hands after use and before contacting food. Avoid breathing vapors. Vapors are heavier than air and will collect in low areas or confined spaces. Make sure ventilation removes vapors from low areas. Use caution around energized equipment. The metal container will conduct electricity if it contacts a live source. This may result in injury to the user from electrical shock and/or flash fire. For product use instructions, please see the product label.

Storage Procedures: Store in a cool dry area out of direct sunlight. Aerosol cans must be maintained below 120°F / 49°C to prevent cans from rupturing.

Aerosol Storage Level: I

Section 8: Exposure Controls/Personal Protection

Exposure Guidelines:

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE	
Tetrachloroethylene	100	NE	25	100	NE		ppm
Trichloroethylene	100	200 (v)	10	25	5	mfr	ppm
1,2-Butylene oxide	N.E.	N.E.	N.E.	N.E.	2	AIHA	ppm
Carbon dioxide	5000	30000 v	5000	30,000	NE		ppm

N.E. – Not Established

(c) – ceiling

(s) – skin

(v) – vacated

mfr – manufacturer's recommendation

Controls and Protection:

Engineering Controls: Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

Respiratory Protection: None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with organic vapor cartridges. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

Eye/face Protection: For normal conditions, wear safety glasses. Where there is reasonable probability of liquid

Product Name: Heavy Duty Degreaser (aerosol)

Product Number (s): 03095, 03095T, 73095

contact, wear splash-proof goggles.

Skin Protection: Use protective gloves such as PVA or Viton. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.

Section 9: Physical and Chemical Properties

Physical State: liquid

Color: colorless

Odor: solvent odor

Odor Threshold: ND

Specific Gravity: 1.544

Initial Boiling Point: 189°F / 87°C

Freezing Point: ND

Vapor Pressure: > 12 mmHg @ 68°F / 20°C

Vapor Density: > 4 (air = 1)

Evaporation Rate: very fast

Solubility: slight

Coefficient of water/oil distribution: ND

pH: NA

Volatile Organic Compounds: wt %: 43.9 g/L: 677.8 lbs./gal: 5.65

Section 10: Stability and Reactivity

Stability: Stable

Conditions to Avoid: Avoid direct sunlight or ultraviolet sources. Avoid open flames, welding arcs, and other high temperature sources which induce thermal decomposition.

Incompatible Materials: Avoid contact with metals such as: aluminum powders, magnesium powders, potassium, sodium, and zinc powder. Avoid unintended contact with amines. Avoid contact with strong bases and strong oxidizers.

Hazardous Decomposition Products: Hydrogen chloride, trace amounts of chlorine and phosgene

Possibility of Hazardous Reactions: No

Section 11: Toxicological Information

Long-term toxicological studies have not been conducted for this product. The following information is available for components of this product.

Acute Toxicity:

<u>Component</u>	<u>Oral LD50 (rat)</u>	<u>Dermal LD50 (rabbit)</u>	<u>Inhalation LC50 (rat)</u>
Tetrachloroethylene	2629 mg/kg	> 10 g/kg	5200 mg/kg/4H
Trichloroethylene	4920 mg/kg	10,000 mg/kg	12,500 ppm/4H
1,2-Butylene oxide	500 mg/kg	2100 µL/kg	6300 mg/m ³ /4H
Carbon dioxide	No data	No data	470,000 ppm/30M

Product Name: Heavy Duty Degreaser (aerosol)

Product Number (s): 03095, 03095T, 73095

ground shipping until January 1, 2014.

If shipping as limited quantity by ground, note that shipping papers are not required.

Section 15: Regulatory Information

U.S. Federal Regulations:

Toxic Substances Control Act (TSCA):

All ingredients are either listed on the TSCA inventory or are exempt.

Comprehensive Environmental Response, Compensation and Liability Act (CERCLA):

Reportable Quantities (RQ's) exist for the following ingredients: tetrachloroethylene (100 lbs)
trichloroethylene (100 lbs)
1,2-butylene oxide (100 lbs)

Spills or releases resulting in the loss of any ingredient at or above its RQ require immediate notification to the National Response Center (800-424-8802) and to your Local Emergency Planning Committee.

Superfund Amendments Reauthorization Act (SARA) Title III:

Section 302 Extremely Hazardous Substances (EHS): None

Section 311/312 Hazard Categories:

Fire Hazard	No
Reactive Hazard	No
Release of Pressure	Yes
Acute Health Hazard	Yes
Chronic Health Hazard	Yes

Section 313 Toxic Chemicals: This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:
trichloroethylene (< 44%), tetrachloroethylene (< 54%), 1,2-butylene oxide (0.2%)

Clean Air Act:

Section 112 Hazardous Air Pollutants (HAPs): trichloroethylene, tetrachloroethylene, 1,2-butylene oxide

U.S. State Regulations:

Consumer Products VOC Regulations: This product is not compliant to be sold for use in California, Connecticut, Delaware, The District of Columbia, Illinois, Indiana, Maine, Maryland, Massachusetts, Michigan, New Jersey, New York, and Rhode Island. In other states with Consumer Products VOC Regulations, this product is compliant as a general purpose degreaser.

State Right to Know:

New Jersey: 79-01-6, 127-18-4, 124-38-9, 106-88-7
Pennsylvania: 79-01-6, 127-18-4, 124-38-9, 106-88-7
Massachusetts: 79-01-6, 127-18-4, 124-38-9, 106-88-7
Rhode Island : 79-01-6, 127-18-4, 124-38-9, 106-88-7

Canadian Regulations:

Controlled Products Regulations:

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

WHMIS Hazard Class: A, D1B, D2A, D2B

Canadian DSL Inventory: All ingredients are either listed on the DSL Inventory or are exempt.

Product Name: Heavy Duty Degreaser (aerosol)
Product Number (s): 03095, 03095T, 73095

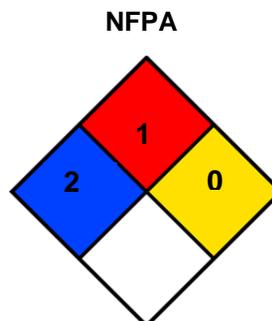

European Union Regulations:

RoHS Compliance: This product is compliant with Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003. This product does not contain any of the restricted substances as listed in Article 4(1) of the RoHS Directive.

Additional Regulatory Information: None

24-Hr Emergency (CHEMTREC)	(800) 424-9300

Section 2: Hazards Identification

Emergency Overview

Appearance & Odor: Reddish liquid, pleasant pine odor

DANGER

Harmful or fatal if swallowed. May cause eye and skin irritation. Contents under pressure.

As defined by OSHA's Hazard Communication Standard, this product is hazardous.

Potential Health Effects:

- EYE:** Liquid may cause mild irritation including stinging, tearing and redness.
- SKIN:** Liquid may cause mild to moderate skin irritation including redness, itching, and burning. Repeated contact may cause drying and cracking of skin.
- INHALATION:** Breathing small amounts of vapor during normal handling is not likely to cause harmful effects. Breathing large amounts may cause irritation to the nose and throat as well as headache, drowsiness, dizziness, confusion, or other nervous system effects.
- INGESTION:** Swallowing small amounts during normal handling is not likely to cause harmful effects. Swallowing large amounts may be harmful. Main hazard is aspiration of this material into the lungs during swallowing or vomiting. This can result in lung inflammation and other lung injury.
- CHRONIC EFFECTS:** Unknown
- TARGET ORGANS:** Inadequate data available for evaluation.

Medical Conditions Aggravated by Exposure: skin or respiratory conditions

See Section 11 for toxicology and carcinogenicity information on product ingredients.

Section 3: Composition/Information on Ingredients

COMPONENT	CAS NUMBER	% by Wt.
Hydrotreated middle distillates	64742-46-7	25 - 35
Aliphatic hydrocarbon	8052-41-3	20 - 30
Dipropylene glycol n-propyl ether	29911-27-1	8 - 15
Dipropylene glycol methyl ether acetate	88917-22-0	8 - 15
Pine resin distillate	8006-64-2	8 - 15
Diisobutyl ketone	108-83-8	4 - 8
Carbon dioxide	124-38-9	1 - 3

Section 4: First Aid Measures

Eye Contact: Immediately flush with plenty of water for 15 minutes. Call a physician if irritation persists.

Skin Contact: Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.

Inhalation: Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.

Ingestion: Do not induce vomiting due to aspiration hazard. Seek medical attention.

Note to Physicians: This material is an aspiration hazard.

Section 5: Fire-Fighting Measures

Flammable Properties: This product is not flammable in accordance with aerosol flammability definitions (16 CFR 1500.3(c)(6)).

Flash Point (liquid):	126 F (COC)	Upper Explosive Limit:	6.0 (estimate)
Autoignition Temperature	ND	Lower Explosive Limit:	1.0 (estimate)

Suitable Extinguishing Media: Use extinguishing media appropriate for a Class B fire.

Products of Combustion: Oxides of carbon

Protection of Fire-Fighters: Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

Section 6: Accidental Release Measures

Personal Precautions: Use personal protection recommended in Section 8.

Environmental Precautions: Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

Methods for Containment & Clean-up: Eliminate all sources of ignition. Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

Section 7: Handling and Storage

Handling Procedures: Do not use near flames, sparks or other sources of ignition. Do not use on energized equipment. If container makes contact with energized equipment it will conduct electricity. Do not heat product. Use with adequate ventilation in order to prevent vapor build-up and a flammable atmosphere. Avoid contact with skin and eyes. Avoid breathing vapors or mist.

Storage Procedures: Store in a cool dry area out of direct sunlight. Aerosol cans must be maintained below 120 F to prevent cans from rupturing.

Aerosol Storage Level: III

Section 8: Exposure Controls/Personal Protection

Exposure Guidelines:

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE	
Hydrotreated middle distillates	5*	NE	5*	10*	NE		mg/m ³
Aliphatic hydrocarbon	100 (v)	NE	100	NE	NE		ppm
Dipropylene glycol n-propyl ether	NE	NE	NE	NE	NE		
Dipropylene glycol methyl ether acetate	NE	NE	NE	NE	NE		
Pine resin distillate	100	NE	20	NE	NE		ppm
Diisobutyl ketone	50	NE	25	NE	NE		ppm
Carbon dioxide	5000	30000v	5000	30000	NE		ppm
N.E. – Not Established (c) – ceiling (s) – skin (v) – vacated							

Engineering Controls: Area should have ventilation to provide fresh air. Use local exhaust to prevent accumulation of vapors. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations

Respiratory Protection: None required for normal work where adequate ventilation is provided. Use a NIOSH-approved cartridge respirator with organic vapor cartridge if vapors exceed exposure limits. Use a self-contained breathing apparatus in confined spaces and for emergencies.

Eye/face Protection: For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

Skin Protection: Use protective gloves such as nitrile or other synthetic rubbers. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.

Section 9: Physical and Chemical Properties

Physical State: Liquid
 Color: reddish
 Odor: pleasant pine
 Specific Gravity: 0.84
 Initial Boiling Point: 315 F
 Freezing Point: ND
 Vapor Pressure: ND
 Vapor Density: > 1 (air = 1)
 Evaporation Rate: < 1 (ether = 1)
 Solubility: negligible
 pH: NA
 Volatile Organic Compounds: wt %: 43.3 g/L: 363.7 lbs./gal: 3.0

Section 10: Stability and Reactivity

Stability: Stable
 Conditions to Avoid: heat, sources of ignition
 Incompatible Materials: strong oxidizers, strong acids
 Hazardous Decomposition Products: oxides of carbon
 Possibility of Hazardous Reactions: No

Section 11: Toxicological Information

Long-term toxicological studies have not been conducted for this product. The following information is available for components of this product.

ACUTE EFFECTS

<u>Component</u>	<u>Test</u>	<u>Result</u>	<u>Route</u>	<u>Species</u>
Hydrotreated middle distillate	LD50	> 5 g/kg	Oral	Rat
Hydrotreated middle distillate	LD50	> 2 g/kg	Dermal	Rabbit
Hydrotreated middle distillate	LC50	> 5mg/L/4H	Inhalation	Rat
Aliphatic hydrocarbons	LD50	5 g/kg	Oral	Rat
Aliphatic hydrocarbons	LD50	3 g/kg	Dermal	Rabbit

CHRONIC EFFECTS

Carcinogenicity:

	<u>Component</u>	<u>Result</u>
OSHA:	None listed	
IARC:	None listed	
NTP:	None listed	

Mutagenicity: No data available.

Section 12: Ecological Information

Ecological studies have not been conducted for this product. The following information is available for components of this product.

Ecotoxicity: Hydrotreated middle distillate -- 96 Hr LC50 Pimephales promelas: 35 mg/L (flow-through)
 Dipropylene glycol methyl ether acetate -- 96 Hr LC50 Pimephales promelas: 151 mg/L

Persistence / Degradability: No data available

Bioaccumulation / Accumulation: No data available

Mobility in Environment: No data available

Section 13: Disposal Considerations

Disposal: The dispensed liquid product is a RCRA hazardous waste for the characteristic of ignitability with a waste code of D001. (See 40 CFR Part 261.20 – 261.33)
Aerosol containers should be emptied and depressurized before disposal. Empty containers may be recycled or discarded. Any liquids should be collected and properly disposed.

All disposal activities must comply with federal, state and local regulations. Local regulations may be more stringent than state or national requirements.

Section 14: Transport Information

Proper shipping description:

US DOT (ground): Consumer Commodity, ORM-D

Special Provisions: None

Section 15: Regulatory Information

U.S. Federal

Toxic Substances Control Act (TSCA):

All ingredients are either listed on the TSCA inventory or are exempt.

Comprehensive Environmental Response, Compensation and Liability Act (CERCLA):

Reportable Quantities (RQ's) exist for the following ingredients: None

Spills or releases resulting in the loss of any ingredient at or above its RQ require immediate notification to the National Response Center (800-424-8802) and to your Local Emergency Planning Committee.

Superfund Amendments Reauthorization Act (SARA) Title III:

Section 2: Hazards Identification

Emergency Overview

DANGER: Extremely Flammable. Harmful or Fatal if Swallowed. Contents Under Pressure.
As defined by OSHA's Hazard Communication Standard, this product is hazardous.
Appearance & Odor: Translucent to opaque gel paste, solvent odor

Potential Health Effects:

ACUTE EFFECTS:

EYE: May cause mild irritation including stinging and redness, but does not injure eye.

SKIN: Contact may cause redness, itching, burning and skin damage. Prolonged or repeated contact can worsen irritation by causing drying and cracking of the skin, leading to dermatitis (inflammation).

INHALATION: High vapor concentrations are irritating to the respiratory tract and may cause headaches, dizziness, anesthesia, drowsiness, unconsciousness and other central nervous system effects, including death. May cause peripheral nervous system disorder and/or damage.

INGESTION: Low order of toxicity by ingestion. Main hazard is aspiration into the lungs during swallowing or vomiting. Small amounts aspirated into the respiratory system may cause bronchopneumonia or pulmonary edema, possibly progressing to death.

CHRONIC EFFECTS: Overexposure to n-hexane may cause progressive and potentially irreversible damage to the peripheral nervous system, particularly in the arms and legs.

TARGET ORGANS: central nervous system, peripheral nervous system, respiratory system

Medical Conditions Aggravated by Exposure: skin and respiratory conditions

See Section 11 for toxicology and carcinogenicity information on product ingredients.

Section 3: Composition/Information on Ingredients

COMPONENT	CAS NUMBER	% by Wt.
Hexane isomers	64742-49-0	25 - 35
Heptane isomers	142-82-5	25 - 35
n-Hexane	110-54-3	2.2
Silicone fluid	63148-62-9 / 68611-44-9 / 70131-67-8	5 - 15
Liquefied petroleum gas	68476-86-8	25 - 35

Section 4: First Aid Measures

- Eye Contact: Immediately flush with plenty of water for 15 minutes. Call a physician if irritation persists.
- Skin Contact: Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.
- Inhalation: Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.
- Ingestion: Do NOT induce vomiting. Contact a physician immediately.
- Note to Physicians:* Treat symptomatically. Gastric lavage using a cuffed endotracheal tube may be performed at your discretion.

Section 5: Fire-Fighting Measures

Flammable Properties: This product is extremely flammable in accordance with aerosol flammability definitions. (See 16 CFR 1500.3(c)(6)).

Flash Point: < 20°F (TCC)
Autoignition Temperature: 489°F

Upper Explosive Limit: ND
Lower Explosive Limit: ND

Fire and Explosion Data:

Suitable Extinguishing Media: Class B fire extinguishers, dry chemical, foam or CO₂

Products of Combustion: Fumes, smoke, oxides of carbon, and hydrocarbons

Explosion Hazards: Aerosol containers, when exposed to heat from fire, may build pressure and explode. Vapors may accumulate in a confined space and create a flammable atmosphere.

Protection of Fire-Fighters: Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition. Do not spray water directly on fire; product will float and could be reignited on surface of water.

Section 6: Accidental Release Measures

Personal Precautions: Use personal protection recommended in Section 8.

Environmental Precautions: Take precautions to prevent contamination of ground and surface waters. Do not flush into

sewers or storm drains.

Methods for Containment & Clean-up: Dike area to contain spill. Remove all sources of ignition. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

Section 7: Handling and Storage

Handling Procedures: Use proper grounding and bonding procedures for transferring materials. Do not use product near any source of ignition. Avoid contact with eyes and skin. Avoid breathing vapors. Use caution around energized equipment. The metal container will conduct electricity if it contacts a live source. This may result in injury to the user from electrical shock and/or flash fire. For product use instructions, please see the product label.

Storage Procedures: Store in a cool dry area out of direct sunlight. Aerosol cans must be maintained below 120 F to prevent cans from rupturing.

Aerosol Storage Level: III

Section 8: Exposure Controls/Personal Protection

Exposure Guidelines:

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE

N.E. – Not Established (c) – ceiling (s) – skin (v) – vacated							

Controls and Protection:

Engineering Controls: Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

Respiratory Protection: None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with organic vapor cartridge. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

Eye/face Protection: For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

Skin Protection: Use protective gloves such as nitrile, PVA or Viton. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.

Section 9: Physical and Chemical Properties

Physical State: gel / paste
 Color: translucent to opaque
 Odor: solvent
 Odor Threshold: ND
 Specific Gravity: 0.646
 Initial Boiling Point: 140°F
 Freezing Point: ND
 Vapor Pressure: ND
 Vapor Density: > 1 (air = 1)
 Evaporation Rate: fast
 Solubility: negligible in water
 Coefficient of water/oil distribution: ND
 pH: NA
 Volatile Organic Compounds: wt %: 90.15 g/L: 582 lbs./gal: 4.85

Section 10: Stability and Reactivity

Stability: Stable
 Conditions to Avoid: Sources of ignition, temperature extremes
 Incompatible Materials: Strong oxidizers, strong acids
 Hazardous Decomposition Products: Oxides of carbon
 Possibility of Hazardous Reactions: No

Section 11: Toxicological Information

Long-term toxicological studies have not been conducted for this product. The following information is available for components of this product.

Acute Toxicity:

<u>Component</u>	<u>Oral LD50 (rat)</u>	<u>Dermal LD50 (rabbit)</u>	<u>Inhalation LC50 (rat)</u>
Hexane isomers	No data	No data	No data
Heptane isomers	No data	No data	103 mg/m ³ /4H
n-Hexane	28,710 mg/kg	3000 mg/kg	48,000 ppm/4H
Silicone fluid	No data	No data	No data
Liquefied petroleum gas	No data	No data	No data

Chronic Toxicity:

<u>Component</u>	<u>OSHA Carcinogen</u>	<u>IARC Carcinogen</u>	<u>NTP Carcinogen</u>	<u>Irritant</u>	<u>Sensitizer</u>
Hexane isomers	No	No	No	E (mild) / S (mild)	Unknown
Heptane isomers	No	No	No	E (mild) / S (moderate) / R (mild)	Unknown
n-Hexane	No	No	No	E (moderate) / S (moderate) / R (moderate)	Unknown
Silicone fluid	No	No	No	No	Unknown
Liquefied petroleum gas	No	No	No	No	No

E – Eye	S – Skin	R - Respiratory
---------	----------	-----------------

Reproductive Toxicity: No information available
Teratogenicity: No information available
Mutagenicity: No information available
Synergistic Effects: No information available

Section 12: Ecological Information

Ecological studies have not been conducted for this product. The following information is available for components of this product.

Ecotoxicity: n-hexane - 48 Hr EC50 water flea: 3.87 mg/L
 96 Hr LC50 Lepomis macrochirus: 4.12 mg/L
 n-heptane - 24 Hr EC50 Daphnia magna: >10 mg/L
 Persistence / Degradability: No information available
 Bioaccumulation / Accumulation: No information available
 Mobility in Environment: No information available

Section 13: Disposal Considerations

Waste Classification: The dispensed liquid product is a RCRA hazardous waste for the characteristic of ignitability with a waste code of D001. Pressurized containers are a D003 reactive waste. (See 40 CFR Part 261.20 – 261.33)
 Empty aerosol containers may be recycled. Any liquid product should be managed as a hazardous waste.

All disposal activities must comply with federal, state, provincial and local regulations. Local regulations may be more stringent than state, provincial or national requirements.

Section 14: Transport Information

US DOT (ground): Consumer Commodity, ORM-D
 ICAO/IATA (air): Consumer Commodity, ID8000, 9
 IMO/IMDG (water): Aerosols, UN1950, 2.1, Limited Quantity
 Special Provisions: None

Section 15: Regulatory Information

U.S. Federal Regulations:

Toxic Substances Control Act (TSCA):

All ingredients are either listed on the TSCA inventory or are exempt.

Comprehensive Environmental Response, Compensation and Liability Act (CERCLA):

Reportable Quantities (RQ's) exist for the following ingredients: n-hexane (5000 lbs)

Spills or releases resulting in the loss of any ingredient at or above its RQ require immediate notification to the National Response Center (800-424-8802) and to your Local Emergency Planning Committee.

Superfund Amendments Reauthorization Act (SARA) Title III:

Section 302 Extremely Hazardous Substances (EHS): None

Section 311/312 Hazard Categories:	Fire Hazard	Yes
	Reactive Hazard	No
	Release of Pressure	Yes
	Acute Health Hazard	Yes
	Chronic Health Hazard	Yes

Section 313 Toxic Chemicals: This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:
n-hexane (2.2%)

Clean Air Act:

Section 112 Hazardous Air Pollutants (HAPs): n-hexane

U.S. State Regulations:

California Safe Drinking Water and Toxic Enforcement Act (Prop 65):

This product may contain the following chemicals known to the state of California to cause cancer, birth defects or other reproductive harm: None

Consumer Products VOC Regulations: This product is not regulated

State Right to Know:

New Jersey: 75-83-2, 109-66-0, 78-78-4, 94-37-7, 110-54-3, 79-29-8, 68476-86-8, 142-82-5, 110-82-7
Pennsylvania: 107-83-5, 75-83-2, 110-54-3, 79-29-8, 68476-86-8, 142-82-5, 110-82-7
Massachusetts: 107-83-5, 75-83-2, 110-54-3, 79-29-8, 68476-86-8, 142-82-5, 110-82-7
Rhode Island: 110-54-3, 68476-86-8, 142-82-5, 110-82-7

Canadian Regulations:

Canadian DSL Inventory: All ingredients are either listed on the DSL Inventory or are exempt.

WHMIS Hazard Class: A, B5, D2B

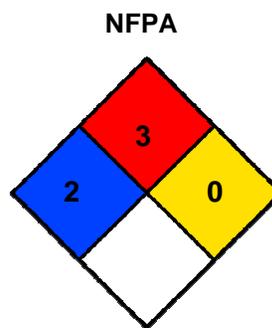

European Union Regulations:

RoHS Compliance: This product is compliant with Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003. This product does not contain any of the restricted substances as listed in Article 4(1) of the RoHS Directive.

Additional Regulatory Information: None

Section 16: Other Information

HMIS® (II)	
Health:	2
Flammability:	3
Reactivity:	0
PPE:	B

Ratings range from 0 (no hazard) to 4 (severe hazard)

MSDS - Material Safety Data Sheet

Product Name: ENGINE BRITE HEAVY DUTY ENGINE DEGREASER
(UPC: 078698502014) (AAP SKU: 7040104)

MSDS No.: EB1

I. Basic Information:

Manufacturer: RADIATOR SPECIALTY COMPANY

Contact: Robert Geer

Address: 600 RADIATOR ROAD

Information Telephone Number: 704-684--181 1

City, ST Zip: INDIAN TRAIL, NC 28079

Emergency Contact: RMPDC (877-740-5015)

Country:

Emergency Telephone Number: 303-623-5716

Emergency Restrictions:

Product Name: ENGINE BRITE HEAVY DUTY ENGINE DEGREASER (UPC: 078698502014) (AAP SKU: 7040104)

MSDS No.: EB1

Issue Date: 07/14/2010

Supersedes Date: 03/16/2010

II. Hazards Identification:**EMERGENCY OVERVIEW**

Flammable. Harmful or Fatal if Swallowed. Eye and Skin Irritant. Contents Under Pressure.

Level 3 Aerosol

OSHA Regulatory Status

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Potential Health Effects**Route(s) of Entry:**

Absorption, Eye, Inhalation, and Ingestion.

Health Hazards (Acute and Chronic):

See signs and symptoms below

Signs and Symptoms:

Eye Contact: Irritant. Prolonged contact may cause conjunctivitis.

Skin Contact: Irritant. Defatting of tissue, dermatitis may occur.

Inhalation: Irritant to mucous membranes. Repeated exposure may cause narcosis..

Ingestion: HARMFUL OR FATAL IF SWALLOWED.

Medical Conditions Generally Aggravated by Exposure:

None Known

Other Health Warnings:

Vomiting and subsequent aspiration into the lungs may lead to chemical pneumonia and pulmonary edema which is a potentially fatal condition.

Potential Environmental Effects

Not Available

III. Composition/Information on Ingredients:

Chemical Name	CAS No.	% Range	Trade Secret
Petroleum naphtha	64742-94-5	1.0 - 5.0	
1,2,4-Trimethylbenzene	95-63-6	0.1 - 1.0	
2-Butoxyethanol	111-76-2	0.1 - 1.0	
Carbon dioxide	124-38-9	1.0 - 5.0	
Naphthalene	91-20-3	1.0 - 5.0	
Petroleum distillate, Aliphatic	68476-34-6	60.0 - 100.0	
Polyoxyethylene Hexaoleate	57171-56-9	1.0 - 5.0	
Xylene (mixed isomers)	1330-20-7	0.1 - 1.0	

MSDS - Material Safety Data Sheet

***Product Name: ENGINE BRITE HEAVY DUTY ENGINE DEGREASER
(UPC: 078698502014) (AAP SKU: 7040104)***

MSDS No.: EBI

IV. First Aid Measures:

Emergency and First Aid Procedures:

Eye Contact: Flush eyes with clean water for 15 minutes while lifting eyelids. Get prompt medical attention.

Skin Contact: Wash with soap and water thoroughly. If adverse effects persist, get prompt medical attention. Launder contaminated clothing before reuse.

Inhalation: Remove to fresh air. If breathing becomes difficult give oxygen and get prompt medical attention. If breathing stops, give artificial respiration and get prompt medical attention.

Ingestion: DO NOT INDUCE VOMITING! Call Poison Control Center, physician, or hospital emergency room immediately. Aspiration of vomitus into the lungs can cause pneumonitis, which can be fatal.

Note to Physicians:

N/E

V. Fire Fighting Measures:

Suitable Extinguishing Media:

Water Fog, Foam, Carbon Dioxide, Dry Chemical

Unsuitable Extinguishing Media:

Do not use forced water stream as this could cause the fire to spread.

Products of Combustion:

High temperatures and ignition sources produce products of combustion: carbon monoxide, sulfur-like smoke.

Protection of Firefighters:

Wear self-contained positive pressure breathing apparatus and protective clothes. Use shield to protect from rupturing and venting containers. At elevated temperatures containers may vent, rupture or burst, even violently

VI. Accidental Release Measures:

Personal Precautions:

Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed.

Environmental Precautions:

Prevent run-off to sewers, streams, or other bodies of water. If run-off occurs, notify proper authorities as required that a spill has occurred. Run off to sewer may create fire or explosion hazard.

Methods for Containment:

Dike or contain spill and absorb with inert materials (sand, sawdust, absorbent sweeping compounds, rags, etc).

Methods for Cleanup:

Using a non-metallic scoop, place contaminated material into an approved chemical waste container. Where possible, vacuum spilled liquid using an explosion proof vacuum to recover material.

Other Information:

All equipment used with handling the concentrate must be grounded. If run-off occurs, notify proper authorities as required that a spill has occurred.

VII. Handling and Storage:

Handling Precautions:

Handling: Use with adequate ventilation and proper protective equipment.

Do not use near fire, sparks, or flame. Do not puncture or incinerate container. Avoid contact with eyes. Avoid prolonged or repeated breathing of vapors. If exposure may or does exceed occupational exposure limits, use a NIOSH approved respirator to prevent over-exposure.

Storage Precautions:

Store in cool, well ventilated area below 120°F away from heat sources. Do not store with oxidizers.

VIII. Exposure Controls/Personal Protection:

MSDS - Material Safety Data Sheet

**Product Name: ENGINE BRITE HEAVY DUTY ENGINE DEGREASER
(UPC: 078698502014) (AAP SKU: 7040104)**

1,2,4-Trimethylbenzene	N/E	25 ppm	Not Available
Polyoxyethylene Hexaoleate	Not Available	Not Available	Not Available

Engineering Controls:

See Section above for applicable exposure limits. Use with adequate ventilation. If TLV is exceeded, wear NIOSH approved respirator.

Personal Protective Equipment:

For prolonged exposure wear protective safety glasses, gloves, and apron.

IX. Physical and Chemical Properties:

Boiling Point: 305°F

Boiling Range: Not Available

Solubility In Water: Emulifies

Flash Point: 136°F

Odor Threshold: Not Available

Vapor Density (AIR = 1): 1.2

pH Range: Not Available

Decomposition Temp: Not Available

Lower Explosive Limit: N/E

Specific Gravity (H2O = 1): 0.86

Other Information: VOC Content: <15.0%

Melting Point: N/A

Freezing Point: Not Available

Evaporation Rate (Butyl Acetate = 1): N/D

Flash Point Method: TCC

Appearance and Odor: Amber liquid with petroleum odor

Vapor Pressure (mm Hg.): N/D

Partition Coefficient: Not Available

Auto-Ignition Temp: Not Available

Upper Explosive Limit: N/E

X. Stability and Reactivity:

Stability:

Stable

Conditions to Avoid:

See Incompatible Materials below.

Incompatible Materials:

Strong oxidizing agents.

Hazardous Decomposition Products:

High temperatures and ignition sources produce products of combustion: carbon monoxide, sulfur-like smoke.

Possibility of Hazardous Reactions:

Will not occur.

1. PRODUCT AND COMPANY IDENTIFICATION

Product information

Trade name : GLADE® AIR FRESHENER - CLEAN LINEN™

Use of the Substance/Mixture : Air Freshener

Company : S.C. Johnson and Son, Limited
1 Webster Street
Brantford ON N3T 5R1

Emergency telephone number : 24 Hour Transport & Medical Emergency Phone (866) 231-5406
24 Hour International Emergency Phone (952) 852-4647
24 Hour Canadian Transport Emergency Phone (CANUTEC) (613) 996-6666

2. HAZARDS IDENTIFICATION

Emergency Overview

Appearance / Odor : clear / aerosol / pleasant

Immediate Concerns

: Caution
Avoid contact with skin, eyes and clothing.
Keep away from heat, sparks and flame.
Contents under pressure.
Do not puncture or incinerate.
Do not store at temperatures above 120 Deg. F (50 Deg C), as container may burst.

Potential Health Effects

Exposure routes : Eye, Skin, Inhalation, Ingestion.

Eyes : May cause:
Mild eye irritation

Skin : Prolonged or repeated contact may dry skin and cause irritation.

Inhalation : Intentional misuse by deliberately concentrating and inhaling contents can be harmful or fatal.

Ingestion : May cause irritation to mouth, throat and stomach.
May cause abdominal discomfort.

Aggravated Medical : Persons with pre-existing skin disorders may be more

Condition susceptible to irritating effects.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous chemicals present at or above reportable levels as defined by OSHA 29 CFR 1910.1200 or the Canadian Controlled Products Regulations are listed in this table:

Chemical Name	CAS-No.	Weight percent
Isobutane	75-28-5	10.00 - 30.00
Propane	74-98-6	5.00 - 10.00

For additional information on product ingredients, see www.whatsinsidescjohnson.com.

4. FIRST AID MEASURES

- Eye contact : Rinse with plenty of water. Get medical attention if irritation develops and persists.
- Skin contact : Rinse with plenty of water. Get medical attention if irritation develops and persists.
- Inhalation : Remove to fresh air. If breathing is affected, get medical attention.
- Ingestion : Rinse mouth with water.

5. FIRE-FIGHTING MEASURES

- Suitable extinguishing media : Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
- Specific hazards during fire fighting : Aerosol Product - Containers may rocket or explode in heat of fire.
- Further information : Fight fire from maximum distance or protected area. Cool and use caution when approaching or handling fire-exposed containers. Wear full protective clothing and positive pressure self-contained breathing apparatus. In case of fire and/or explosion do not breathe fumes.
- Flash point : < -6.8 °C
< 19.76 °F
Method: Tag Closed Cup (TCC)
Note: Propellant

Lower explosion limit : Note: no data available
Upper explosion limit : Note: no data available
NFPA Classification : NFPA Level 1 Aerosol

6. ACCIDENTAL RELEASE MEASURES

Personal precautions : Remove all sources of ignition.
Wear personal protective equipment.
Environmental precautions : Outside of normal use, avoid release to the environment.
Methods for cleaning up : If damage occurs to aerosol can:
Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13).
Use only non-sparking equipment.
Clean residue from spill site.

7. HANDLING AND STORAGE

Handling

Advice on safe handling : Do not puncture or incinerate.
Avoid breathing vapors, mist or gas.
Do not spray toward face.
Do not use in areas without adequate ventilation.
Note: Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. For more information visit www.inhalant.org.
Use only as directed.
KEEP OUT OF REACH OF CHILDREN AND PETS.

Advice on protection against fire and explosion : Keep away from heat and sources of ignition.

Storage

Requirements for storage areas and containers : Do not store at temperatures above 120 Deg. F (50 Deg C), as container may burst.
Keep in a dry, cool and well-ventilated place.

Sea transport

- *IMDG:*

Proper shipping name UN 1950 AEROSOLS, Flammable, 2.1
|| Class: 2
|| UN number: 1950
Packaging group: None.
|| EmS: F-D, S-U
Note: Limited quantities derogation may be applicable to this product, please check transport documents.

Air transport

- *ICAO/IATA:*

Proper shipping name UN 1950 AEROSOLS, Flammable, 2.1
|| Class: 2.1
|| UN/ID No.: UN 1950
Packaging group: None.
Note: SC Johnson typically does not ship products via air, therefore it has not been determined if the product container meets current IATA/ICAO package criteria. Refer to IATA/ICAO Dangerous Goods Regulations for detailed instructions when shipping this item by air.

15. REGULATORY INFORMATION

Notification status : All ingredients of this product are listed or are excluded from listing on the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

Notification status : All ingredients of this product comply with the New Substances Notification requirements under the Canadian Environmental Protection Act (CEPA).

California Prop. 65 : This product is not subject to the reporting requirements under California's Proposition 65.

Material Safety Data Sheet

1. Product and Company Identification

Product Code: 2465.1
Product Name: Goof Off 2
Manufacturer Information
Company Name: W. M. Barr
2105 Channel Avenue
Memphis, TN 38113
Phone Number: (901)775-0100
Emergency Contact: 3E 24 Hour Emergency Contact (800)451-8346
Information: W.M. Barr Customer Service (800)398-3892
Web site address: www.wmbarr.com
Preparer Name: W.M. Barr EHS Dept (901)775-0100
Intended Use: Multi-Purpose Remover for grease, tar, ink, paint, adhesive, etc.
Synonyms
FG641, FG641TEMP

2. Hazards Identification

GHS Precaution Phrases

Avoid breathing mist/vapors/spray. Wash hands thoroughly after handling.

Emergency Overview

CAUTION: Eye Irritant.

OSHA Regulatory Status:

This material is classified as hazardous under OSHA regulations.

Health Hazards (Acute and Chronic)

This material has not been tested as a whole for health effects. Effects listed are those of the individually listed ingredients in this msds.

Eyes:

May cause irritation. May cause moderate corneal injury. Effects may include discomfort or pain, and redness. Effects may be slow to heal.

Skin:

Brief contact may cause slight skin irritation with local redness. Repeated exposure may cause irritation, even a burn. May cause more severe response on covered skin (under clothing, gloves).

Inhalation:

When used as directed, the consumer is not expected to experience any exposure effects. Excessive exposure may cause irritation to the upper respiratory tract. Symptoms may include a headache, dizziness, or nausea.

Ingestion:

Moderately toxic if swallowed. Small amounts swallowed incidentally as a result of normal handling operations are not likely to cause injury. However, swallowing larger amounts may cause injury.

Target Organs: Blood (Hemolysis), Kidneys, Liver, Central Nervous System.

Primary Routes of Entry: Inhalation, Ingestion

Signs and Symptoms Of Exposure

See Potential Health Effects.

Medical Conditions Generally Aggravated By Exposure

None known.

3. Composition/Information on Ingredients

Hazardous Components (Chemical Name)	CAS #	Concentration
1. Ethanol, 2-Butoxy- {Ethylene glycol n-butyl ether, (a glycol ether)}	111-76-2	3.0 -7.0 %
2. Benzenemethanol {Benzyl alcohol}	100-51-6	5.0 -10.0 %
3. Diethylene glycol monobutyl ether {2-(2-Butoxyethoxy)ethanol {(a glycol ether)}	112-34-5	1.0 -5.0 %
4. Propylene glycol phenyl ether {(not 313)}	770-35-4	1.0 -5.0 %

4. First Aid Measures

Emergency and First Aid Procedures

Skin:

Remove contaminated clothing. Immediately wash skin thoroughly with large amounts of water and mild soap, if available. Seek medical attention if irritation develops or persists.

Eyes:

Immediately begin to flush eyes with water, remove any contact lens. Continue to flush the eyes for at least 15 minutes. Seek medical attention.

Inhalation:

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.

Ingestion:

If swallowed, do NOT induce vomiting. Seek immediate medical attention. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

5. Fire Fighting Measures

Flammability Classification:

Not flammable or combustible

Flash Pt:

> 200.00 F Method Used: Setaflash Closed Cup (Rapid Setaflash)

Explosive Limits:

LEL: none UEL: none

Special Fire Fighting Procedures

Material is not flammable or combustible. No special fire fighting instructions required.

Unusual Fire and Explosion Hazards

No data available.

Hazardous Combustion Products

Material should not burn. Combustion product will be from surrounding materials involved in fire.

Suitable Extinguishing Media

Non-combustible liquid - use extinguishing media for underlying cause of fire.

Unsuitable Extinguishing Media

None known.

6. Accidental Release Measures

Steps To Be Taken In Case Material Is Released Or Spilled

Prevent entry into waterways, sewers, or confined areas. Absorb or cover with dry earth, sand, or other non-combustible material and transfer to compatible containers for proper disposal. For large spills, dike ahead of the spill.

7. Handling and Storage

Precautions To Be Taken in Handling

Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling. A source of clean water should be kept in the immediate work area for flushing of the eyes and skin.

Follow all MSDS/label precautions even after container is emptied because they may retain product residues.

Precautions To Be Taken in Storing

Keep containers closed when not in use. Store in a cool, dry place, out of direct sunlight.

8. Exposure Controls/Personal Protection

Hazardous Components (Chemical Name)	CAS #	OSHA PEL	ACGIH TLV	Other Limits
1. Ethanol, 2-Butoxy- {Ethylene glycol n-butyl ether, (a glycol ether)}	111-76-2	50 ppm	20 ppm	No data.
2. Benzenemethanol {Benzyl alcohol}	100-51-6	No data.	No data.	No data.
3. Diethylene glycol monobutyl ether {2-(2-Butoxyethoxy)ethanol {(a glycol ether)}	112-34-5	No data.	No data.	No data.
4. Propylene glycol phenyl ether {(not 313)}	770-35-4	No data.	No data.	No data.

Respiratory Equipment (Specify Type)

When used by the consumer following directions for use and with adequate ventilation, respiratory protection is not expected to be needed.

A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use.

If the work area is not properly ventilated to keep airborne levels below their exposure limits, you must use a properly fitted and maintained NIOSH approved respirator for organic vapors. A dust mask does not provide protection against vapors.

Eye Protection

Where contact with the eyes or face is likely from spraying or splashing, safety glasses, a faceshield or chemical goggles should be worn to prevent eye contact.

Protective Gloves

When used as directed, protective gloves should not be required. For prolonged or repeated contact, wear gloves with as much resistance to the chemical ingredients as possible. Glove materials such as natural rubber or nitrile rubber provide protection. Glove selection should be based on chemicals being used and conditions of use. Consult your glove supplier for additional information.

Other Protective Clothing

Various application methods can dictate use of additional protective safety equipment, such as impermeable aprons, etc., to minimize exposure.

Ventilation

Ventilation is normally not required when handling or using this product to keep exposure to airborne contaminants below the exposure limit.

Good general ventilation should be sufficient to control airborne levels.

Work/Hygienic/Maintenance Practices

Wash hands thoroughly after use and before eating, drinking, or smoking. Do not eat, drink, or smoke in the work area. Discard any clothing or other protective equipment that cannot be decontaminated.

9. Physical and Chemical Properties

Physical States:	[] Gas [X] Liquid [] Solid
Melting Point:	28.00 F
Boiling Point:	212.00 F
Autoignition Pt:	No data.
Flash Pt:	> 200.00 F Method Used: Setaflash Closed Cup (Rapid Setaflash)
Explosive Limits:	LEL: none UEL: none
Specific Gravity (Water = 1):	0.995
Density:	8.277 LB/GL
Bulk density:	No data.
Vapor Pressure (vs. Air or mm Hg):	< 0.1 MM HG
Vapor Density (vs. Air = 1):	> 1
Evaporation Rate (vs Butyl Acetate=1):	< 1
Solubility in Water:	Complete
Percent Volatile:	~ 87 % by weight.
VOC / Volume:	4.0000 % WT
Heat Value:	No data.
Particle Size:	No data.
Corrosion Rate:	No data.
pH:	8.3 - 9

Appearance and Odor

Slight yellow to clear, transparent, almond-like odor.

10. Stability and Reactivity

Stability: Unstable [] Stable [X]

Conditions To Avoid - Instability

None known.

Incompatibility - Materials To Avoid

Strong oxidizing agents, isocyanates, acetaldehyde, aluminum alkyl compounds and strong mineral acids.

Hazardous Decomposition Or Byproducts

Carbon monoxide, carbon dioxide

Possibility of Hazardous Reactions: Will occur [] Will not occur [X]

Conditions To Avoid - Hazardous Reactions

None known.

11. Toxicological Information

Material has not been tested as a whole. Data is for individual ingredients.

Acute Toxicity:

2-Butoxyethanol:

LD50 Rat oral 1.48 g/kg

LD50 Rabbit oral 0.32 g/kg

LD50 Rabbit dermal 400 mg/kg

LC50 Rat (male) inhalation 486 ppm/4 hr /from table/

LC50 Mouse inhalation 700 ppm/7 hr /from table/

MATERIAL SAFETY DATA SHEET

Goof Off 2

Page: 5

Printed: 05/27/2010

Revision: 05/26/2010

Supersedes Revision: 04/13/2010

LD50 Rabbit (male) iv 280 mg/kg /from table/

Benzyl Alcohol:

LD50 Rat oral 3.1 g/kg

LD50 Rabbit oral 1.94 g/kg

LC50 Rat inhalation 1000 ppm/8 hr

Diethylene Glycol Monobutyl Ether:

LD50 Mouse oral 2400 mg/kg bw

LD50 Rat oral 4500 mg/kg bw

LD50 Rabbit dermal 2700 mg/kg bw

Skin Corrosion/Irritation:

2-Butoxyethanol is irritating to the eyes, the skin and the respiratory tract.

Diethylene Glycol Monobutyl Ether: When humans were patch tested with undiluted material, a limited number of the volunteers developed reddening of the skin. The substance is not corrosive to the skin, eyes, or respiratory tract.

Serious Eye Damage/Irritation:

Studies have shown that undiluted benzyl alcohol was moderately irritating when applied to the depilated skin of guinea pigs for 24 hr. It was moderately irritating when applied to rabbit skin. Benzyl alcohol was severely irritating to the eyes of rabbits.

Respiratory or Skin Sensitization: No Data Available.

Aspiration Hazard: No Data available.

Chronic Toxicological Effects

Material has not been tested as a whole. Data is for individual ingredients.

Germ Cell Mutagenicity:

2-Butoxyethanol: In vitro genetic toxicity studies were predominantly negative. Animal genetic toxicity studies were negative.

Reproductive Toxicity/Birth Defects/Developmental Effects:

2-Butoxyethanol: In laboratory animal studies, effects on reproduction have been seen only at doses that produced significant toxicity to the parent animals.

STOT-Single Exposure: No data available.

STOT-Repeated Exposure: No data available.

Carcinogenicity/Other Information

No data available.

Hazardous Components (Chemical Name)	CAS #	NTP	IARC	ACGIH	OSHA

2. Benzenemethanol {Benzyl alcohol}	100-51-6	n.a.	n.a.	n.a.	n.a.
3. Diethylene glycol monobutyl ether {2-(2-Butoxyethoxy)ethanol {(a glycol ether)}	112-34-5	n.a.	n.a.	n.a.	n.a.
4. Propylene glycol phenyl ether {(not 313)}	770-35-4	n.a.	n.a.	n.a.	n.a.

12. Ecological Information

Not determined for this product as a whole.

Toxicity:

2-Butoxyethanol: Material is moderately toxic to aquatic organisms on an acute basis. LC50 Rainbow trout, 96 hr, 1,700 mg/L; LC50, water flea daphnia magna, 835 mg/L; EC50, Green Alga, biomass growth inhibition, 72 hr, 911 mg/L; LC50 Bacteria, >1000 mg/L

Persistence and Degradability:

2-Butoxyethanol: Material is readily biodegradable. Passes OECD test(s) for ready biodegradability.

Benzyl Alcohol is easily biodegradable by biological sewage treatment

Bioaccumulative Potential:

2-Butoxyethanol: Bioconcentration potential is low (BCF less than 100 or LOG POW less than 3).

Diethylene glycol monobutyl ether: According to a classification scheme(3), this BCF suggests the potential for bioconcentration in aquatic organisms is low(SRC).

An estimated BCF of 1 was calculated for benzyl alcohol(SRC), using a log Kow of 1.1(1) and a regression-derived equation(2). According to a classification scheme(3), this BCF suggests the potential for bioconcentration in aquatic organisms is low.

Mobility in Soil:

2 -Butoxyethanol: Potential for mobility in soil is high (KOC between 50 and 150).

Benzyl alcohol is expected to have very high mobility in soil.

Diethylene glycol mono-n-butyl ether is expected to have very high mobility in soil(SRC).

Other Adverse Effects: None known.

13. Disposal Considerations

Waste Disposal Method

Dispose of in accordance with all applicable local, state, and federal regulations. Do not dump into sewers or allow to enter waterways.

14. Transport Information

LAND TRANSPORT (US DOT)

DOT Proper Shipping Name Not regulated by D.O.T.

Additional Transport Information

The shipper/supplier may apply one of the following exceptions: Combustible Liquid, Consumer Commodity, Limited Quantity, Viscous Liquid, Does Not Sustain Combustion, or others, as allowed under 49CFR Hazmat Regulations. Please consult 49CFR Subchapter C to ensure that subsequent shipments comply with these

exceptions.

For D.O.T. information, contact W.M. Barr Technical Services at 1-800-398-3892.

MATERIAL SAFETY DATA SHEET
Anti Spatter Spray

Revision Date: 3/24/09

Supersedes: 11/25/08

MAWT

Section 1 – Identification

Product Name: Anti Spatter Spray
Part Number: 02116, C02116
Chemical Name: Water / surfactant mixture
Product Use: A water-based emulsion for releasing welding spatter.
Manufacturer Information: LPS Laboratories, 4647 Hugh Howell Rd., Tucker, GA, USA 30084
TEL: 1 770-243-8800
Emergency Telephone Number: 1-800-424-9300 Chemtrec;
Outside U.S.: (703) 527-3887
FAX: 1 770-243-8899
Website: <http://www.lpslabs.com>

PLAIN LANGUAGE HAZARD SUMMARY

Material Safety Data Sheets can be confusing. Federal and State laws require us to include a great deal of technical information that probably won't help the non-professional. LPS includes this "PLAIN LANGUAGE HAZARD SUMMARY" to address the questions and concerns of the average worker. If you have additional health, safety or product questions, don't hesitate to call us at 800/241-8334.

Worker Toxicity

LPS Anti-Spatter spray is a non-silicone, water-based material which casts a liquid film. It is a non-flammable, water-based emulsion containing a vegetable-derived agent designed for releasing welding spatter. It is not a hazardous substance as defined by 29CFR 1910.1200. For more exposure and first aid information, refer to MSDS Sections 2, 8 and 11.

Flammability

LPS Anti-Spatter spray does not have a flash point, and is non-flammable. Please refer to handling and storage section for further information

Disposal

Dispose of in accordance with local, state and federal regulations. See section 13 for more details.

Revision 4

MATERIAL SAFETY DATA SHEET

Anti Spatter Spray

Revision Date: 3/24/09

Supersedes: 11/25/08

Section 2 • Hazards Identification

This material is considered non-hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

Emergency Overview: Contents under pressure. Keep away from heat, sparks, and flame.

Primary route(s) of entry: Inhalation, eyes, skin.

Potential Acute Health Effects:

- Eyes:** Liquid may cause temporary irritation.
- Skin:** Repeated or prolonged contact may cause drying and defatting of skin.
- Inhalation:** May irritate mucosal tissue at high concentrations.
- Ingestion:** Not a likely route of exposure. Ingestion may result in nausea, abdominal discomfort, or diarrhea.

Potential Chronic Health Effects:

- Carcinogenic Effects:** NTP: No IARC: No OSHA: No
- Mutagenic Effects:** None
- Teratogenic Effects:** None
- Medical conditions aggravated by exposure:** None known.

Signs and Symptoms

Stinging in eyes. Repeated or prolonged skin contact can cause redness, irritation, and scaling of the skin (dermatitis).

Section 3 – Composition / Information on Ingredients

LPS Anti-Spatter is a fatty ester in an aqueous base. It is not a hazardous substance as defined by 29CFR 1910.1200. This preparation contains no ingredients at or above 0.1% that is classified as hazardous.

Section 4 – First Aid Measures

- Eyes:** Check for and remove contact lenses. If irritation or redness develops, flush eyes with cool, clean, low pressure water for at least 15 minutes. Hold eyelids apart to ensure complete irrigation of the eye and eyelid tissue. Do not use eye ointment. Seek medical attention if irritation takes place.
- Skin:** If irritation takes place, remove clothing and launder before reuse. Wash skin with soap and rinse with water for at least 15 minutes. Seek medical attention if irritation persists.
- Inhalation:** If liquid is inhaled and this causes irritation or some other health effect, immediately move victim to fresh air. If victim is not breathing, immediately begin rescue breathing. If heart has stopped, immediately begin cardiopulmonary resuscitation (CPR). If breathing is difficult, seek medical attention immediately.
- Ingestion:** Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If spontaneous vomiting is about to occur, place victim's head below knees. If victim is drowsy or unconscious, place on the left side with head down. Do not leave victim unattended. Seek medical attention immediately.

Revision 4

MATERIAL SAFETY DATA SHEET

Anti Spatter Spray

Revision Date: 3/24/09

Supersedes: 11/25/08

Section 5 – Fire Fighting Measures

Products of Combustion: Carbon Monoxide and Carbon Dioxide.

Firefighting media:

Small Fire: Use DRY chemical powder.

Large Fire: Foam, dry chemical, carbon dioxide. Cool containing vessels with water jet in order to prevent pressure build-up, auto ignition or explosions.

Sensitivity to Impact: None

Sensitivity to Static Discharge: None

Protection Clothing (Fire): Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

Special Remarks on Explosion Hazards: Aerosols may explode upon heating.

Section 6 – Accidental Release Measures

Containment Procedures **Small Spill and Leak:** Absorb with an inert material and dispose of properly.

Large Spill and Leak: Absorb with an inert material and dispose of properly.

Clean-Up Procedures Wear appropriate personal protective equipment. Absorb spill with an inert material such as clay, vermiculite or diatomaceous earth. Place slurry in an approved chemical waste container for disposal. Wash spill area with detergent and water. Before discharging rinse water to sanitary sewer system, consult local regulations.

Evacuation Procedures Ventilate area of leak or spill. Keep unnecessary and unprotected people away.

Special Procedures Ventilate area. Wear appropriate protective equipment during cleanup.

Section 7 – Handling and Storage

Handling procedures; DO NOT spray into or around ignition sources. After handling, always wash hands thoroughly with soap and water. Use only with adequate ventilation. Use appropriate personal protective equipment and avoid direct contact with skin.

Storage Precautions: Keep container in a cool, well-ventilated area. DO NOT store near sources of ignition (spark or flame). Store below 120°F. Keep out of the reach of children.

Revision 4

MATERIAL SAFETY DATA SHEET
Anti Spatter Spray

Revision Date: 3/24/09

Supersedes: 11/25/08

Section 8 – Exposure Controls / Personal Protection

Engineering measures Provide local and/or general exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective occupational exposure limits.

Personal protective equipment

Eye protection None normally anticipated. Safety goggles/Glasses should be worn if there is possibility of splashing.

Hand protection Use protective gloves as needed to prevent prolonged or repeated contact.

Respiratory protection None required.

Section 9 • Physical and Chemical Properties

Appearance:	Liquid	Color:	Straw, Opaque, Milky
Odor/Taste:	Bland	Vapor Pressure:	Not Established
Solubility Description:	Soluble in water	Evaporation Rate:	1(Water =1)
Boiling Point:	98.9°C (210°F)	Flash Point (°C):	None
Specific Gravity (Water=1):	0.985	Flash Point Method:	TCC
Vapor Density (air=1):	Not Established	Auto Ignition Temperature (°C):	Not Established
Flammable limits (estimated):	Not Established	Partition Coefficient (octanol/water):	Not Established
pH:	8.5 – 9.0	% Volatility volume:	25%

Section 10 – Chemical Stability and Reactivity

Chemical Stability: Product is stable under recommended storage conditions.

Conditions to Avoid: Extreme heat and freezing.

Incompatibility: None under typical use circumstances. Reacts with substances that react with water.

Hazardous Decomposition: Will not occur.

Hazardous Polymerization: Will not occur.

Section 11 – Toxicological Information

A: General Product Information

An acute toxicity study of this product has not been conducted. Information given in this section relates only to individual constituents contained in this preparation.

B: Component Analysis

This preparation contains no ingredients at or above 0.1% that is classified as hazardous.

MATERIAL SAFETY DATA SHEET

Anti Spatter Spray

Revision 4

Revision Date: 3/24/09

Supersedes: 11/25/08

Section 12 – Ecological Information

Mobility: Low volatility. Will absorb into soil. **Persistence and degradability:** 100% biodegradable / inert.

Bioaccumulative potential: No bioaccumulation potential **Other adverse effects:** None known.

Section 13 – Disposal Considerations

Waste Status: Aerosol products, if depressurized and emptied to less than 2.5 cm of fluid contents are classified as non-hazardous waste under 40 CFR 261.7 (U.S.). If disposed of in its received form, an aerosol carries waste codes D003. (U.S.).

Disposal: Waste must be disposed of in accordance with national, regional, provincial, and local environmental control regulations.

Note: Chemical additions to, processing of, or otherwise altering this material may make this waste management information inaccurate, incomplete, or otherwise inappropriate. Furthermore, state and local waste disposal requirements may be more restrictive than federal laws and regulations.

Section 14 – Transportation Information

Section 15 – Regulatory Information

U.S. Federal Regulations

RCRA Hazardous Waste No.: D003

Comprehensive Environmental Response and Liability Act of 1980 (CERCLA): None

Toxic Substances Control Act (TSCA):

All components of this product are TSCA inventory listed and/or are exempt.

Superfund Amendments and Reauthorization Act (SARA) Title III

SARA Section 311/312 (40 CFR 370) Hazard Categories:

Sudden Release of Pressure

This product contains the following toxic chemical(s) subject to reporting requirements of SARA Section 313 (40 CFR 372): None

Section 112 Hazardous Air Pollutants (HAPs): None

State Regulations

California: This product does not contain chemical(s) known to the State of California to cause cancer, birth defects or reproductive harm.

California and OTC States: This product is not regulated by consumer product regulations.

New Jersey Right to Know:

Water 7732-18-5 • Lecithin 8002-43-5 • Nitrogen 7727-37-9 • Nonylphenoxyethoxyethanol 127087-87-0 • 2-Amino-2-methyl-1-propanol 124-68-5

International Regulations

Canadian Environmental Protection Act: All of the components of this product are included on the Canadian Domestic Substances list (DSL).

Canadian Workplace Hazardous Materials Information System WHMIS:

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

WHMIS Classification: Class A

Montreal Protocol listed ingredients:	None.
Stockholm Convention listed ingredients:	None.
Rotterdam Convention listed ingredients:	None.
RoHS Compliant:	Yes.

TRADE NAME	TAP MAGIC PROTAP Cutting Fluid
CHEMICAL NAME & SYNONYMS	Hydrocarbon Mixture
DOT SHIPPING NAME	Not a Regulated Material
IATA SHIPPING NAME	No hazard label required, no limit on quantity
HMSI/NFPA CODE	Health 0; Fire 1; Reactivity 0
MANUFACTURING CODE NO.:	8358
COMMODITY CODE NO.:	332-9150

I. HAZARDOUS INGREDIENTS

This product contains no toxic or hazardous ingredients by OSHA criteria; however, as with any chemical product, exposure to liquids, vapors, mists and fumes should be minimized.

II. INGREDIENTS

Aliphatic Organic Acid	:	CAS# 112-80-1	>75% mixture
Aliphatic Organic Ester	:	CAS# 112-62-9	<15% mixture
Organic Polyol	:	CAS# None Assigned	<10% mixture

III. PHYSICAL DATA

BOILING RANGE, (760 mm Mercury)	:	680 to 1000° F
SPECIFIC GRAVITY (Water = 1) (lbs/gal)	:	(0.894) 7.46 lbs/gal
VAPOR PRESSURE (mm of Mercury) @ 75° F	:	Less Than 1
VAPOR DENSITY (Air = 1)	:	Greater Than 5
SOLUBILITY IN WATER, % by weight	:	Less Than 1 (Insoluble)
EVAPORATION RATE (Butyl Acetate = 1)	:	Less Than 0.01
% VOLATILE BY VOLUME @ 75° F	:	Less Than 1
APPEARANCE	:	Yellow Liquid
ODOR	:	Pleasant
pH	:	Nonaqueous

IV. FIRE & EXPLOSION DATA

LOWER FLAMMABLE LIMIT IN AIR (% by Volume)	:	1.0
UPPER FLAMMABLE LIMIT IN AIR (% by Volume)	:	15
FLASH POINT, PMCC	:	370° F
AUTOIGNITION TEMPERATURE	:	685° F
EXTINGUISHING MEDIA	:	Foam, Carbon Dioxide, Dry Chemical

V. HEALTH HAZARD INFORMATION

ROUTES OF ENTRY	:	Ingestion is the primary method of possible entry.
EFFECTS OF ACUTE OVEREXPOSURE:		INHALATION: (Unlikely due to low vapor pressure). Mist may cause headache, nasal, respiratory and eye irritation. INGESTION: Headache, drowsiness, nausea, fatigue. EYES: May cause pain and irritation.

EFFECTS OF CHRONIC OVEREXPOSURE: **SKIN CONTACT:** Prolonged or repeated exposure may cause irritation.

CARCINOGENICITY : Not a carcinogen or suspect carcinogen.

EMERGENCY AND FIRST AID PROCEDURES:**EYE:** Flush eyes gently with water for at least 15 minutes. Supportive treatment is recommended.

SKIN: Wash with mild soap and water. Remove wetted clothing.

INHALATION: Remove to fresh air.

INGESTION: Do not induce vomiting. Call a physician and/or transport to emergency medical facility.

VI. REACTIVITY DATA

Materials such as sawdust or cloth rags which have been wetted with lubricant may be subject to spontaneous combustion during storage.

VII. DISPOSAL, SPILL OR LEAK PROCEDURES

AQUATIC TOXICITY : Aquatic toxicity is low: Product is not soluble in water. Biodegradable.

SPILL OR LEAK PROCEDURES: Absorb with inert materials. Remove to out of doors and incinerate.

WASTE DISPOSAL METHOD : PROTAP contains no environmentally hazardous substances. Small amounts may be incinerated in compliance with local, state and federal regulations. The recommended method of disposal for large quantities is recycling by a reclaimer or incineration. "If inert absorbents are employed in spill containment or cleanup, these absorbents must be non-biodegradable materials if destined for landfill disposal. Suitable absorbents include natural minerals (clay), activated charcoal, man-made polymers (HD polyethylene)."

VIII. SPECIAL PROTECTION INFORMATION

EYE PROTECTION: Standard eye protection should be worn when using this product.

SKIN PROTECTION: No special protection is needed. However, good personal hygiene practices should be followed.

RESPIRATORY: If application to which this product is being applied generates excessive mist or fumes, then appropriate respiratory protective equipment should be used. No special requirements under ordinary condition and use and proper ventilation of work area.

VENTILATION: No special requirements under ordinary conditions of use and with adequate ventilation.

IX. SPECIAL PRECAUTIONS

Product is ignitable, keep away from open flames. Do not expose to ignition sources. Do not store with strong oxidizers such as nitrates or perchlorates or oxygen under pressure. May cause swelling of some plastics and synthetic rubbers.

X. ADDITIONAL INFORMATION

Tap Magic PROTAP DOES NOT CONTAIN 1,1,1-trichloroethane or any ozone depleting substances. PROTAP does not contain chlorine, phosphorous, active sulfur, nitrates, nitrite derivatives, amines, polynuclear aromatic compounds either as ingredients or trace contaminants. Shelf life is indefinite at ambient temperatures and left in original containers.

Tap Magic PROTAP does not contain any chemical compound listed on the SARA list of 'Extremely Hazardous Chemicals', and is in compliance with all of the requirements of the TSCA at the time of shipment.

Caution: Any cutting fluid can be "overworked" or "overheated", causing it to break down. This overuse is identified by the sight of or strong odor of vapors or fumes not normally present. The effects of these vapors or fumes on human health have not been fully determined. After use of this product, clean and lubricate

metal surfaces to avoid staining and/or corrosion.

Section 2: Hazards Identification

Emergency Overview

DANGER: Extremely Flammable. Vapors May Cause Flash Fires. Harmful or fatal if swallowed. Eye and Skin Irritant.

Appearance & Odor: Clear colorless liquid, solvent odor

Potential Health Effects:

ACUTE EFFECTS:

EYE: Eye irritant. Contact may cause moderate to severe eye irritation including stinging, watering and redness.

SKIN: Skin irritant. Contact may cause redness, itching, burning, and skin damage. Prolonged or repeated contact can worsen irritation by causing drying and cracking of the skin, leading to dermatitis (inflammation).

INHALATION: Low to moderate degree of toxicity by inhalation. Effects of overexposure may include irritation to the respiratory tract and signs of nervous system depression (headache, drowsiness, dizziness, loss of coordination, disorientation and fatigue).

INGESTION: Main hazard is aspiration. This material can enter lungs during swallowing or vomiting and cause lung inflammation and damage. Swallowing this material may also cause nausea and diarrhea. Acetone poisoning may result in liver and kidney damage.

CHRONIC EFFECTS: Exposure to high concentrations of this material may increase the sensitivity of the heart to certain drugs. Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

TARGET ORGANS: Liver, kidney, central nervous system

Medical Conditions Aggravated by Exposure: Skin disorders, respiratory (asthma-like) disorders

Product Name: Brakleen® Non-Chlorinated Brake Parts Cleaner (bulk) 50 State Formula
Product Number (s): 05051, 05052, 05053

See Section 11 for toxicology and carcinogenicity information on product ingredients.

Section 3: Composition/Information on Ingredients

COMPONENT	CAS NUMBER	% by Wt.
Heptane isomers	142-82-5	5 - 15
Acetone	67-64-1	85 - 95

Section 4: First Aid Measures

- Eye Contact:** Immediately flush with plenty of water for 15 minutes. Call a physician if irritation persists.
- Skin Contact:** Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.
- Inhalation:** Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.
- Ingestion:** Do NOT induce vomiting or give anything by mouth because material can enter the lungs and cause severe lung damage. Seek medical attention immediately.
- Note to Physicians:** Epinephrine and other sympathomimetic drugs may initiate cardiac arrhythmias in persons exposed to high concentrations of hydrocarbon solvents. The use of other drugs with less arrhythmogenic potential should be considered.

Section 5: Fire-Fighting Measures

Flammable Properties: As defined by OSHA, this product is a Class 1B flammable liquid.
Flash Point: < 0°F / -18°C (TCC) Upper Explosive Limit: 12.8
Autoignition Temperature: 869°F / 465°C Lower Explosive Limit: 2.5

Fire and Explosion Data:

- Suitable Extinguishing Media:** Dry chemical, carbon dioxide or foam is recommended.
- Products of Combustion:** Oxides of carbon
- Explosion Hazards:** Containers, when exposed to heat from fire, may build pressure and rupture. Vapors may accumulate in a confined space and create a flammable atmosphere.
- Protection of Fire-Fighters:** Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition. Avoid spreading burning liquid with water used for cooling purposes.

Section 6: Accidental Release Measures

- Personal Precautions:** Use personal protection recommended in Section 8.
- Environmental Precautions:** Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

Product Name: Brakleen® Non-Chlorinated Brake Parts Cleaner (bulk) 50 State Formula
Product Number (s): 05051, 05052, 05053

Methods for Containment & Clean-up: Eliminate all potential sources of ignition. Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

Section 7: Handling and Storage

Handling Procedures: Do not use on or around any potential sources of ignition or live equipment. Wash thoroughly after use and before handling food. Use proper grounding and bonding procedures when transferring material. For product use instructions, please see the product label.

Storage Procedures: Use and store this material in cool, dry, well-ventilated areas away from heat, direct sunlight, hot metal surfaces, and all sources of ignition. Keep away from incompatible material.

Aerosol Storage Level: NA

Section 8: Exposure Controls/Personal Protection

Exposure Guidelines:

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE	
Heptane isomers	500	NE	400	500	NE		ppm
Acetone	750 (v)	1000 (v)	500	750	NE		ppm

N.E. – Not Established (c) – ceiling (s) – skin (v) – vacated

Controls and Protection:

Engineering Controls: Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

Respiratory Protection: None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with organic vapor cartridge. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

Eye/face Protection: For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

Skin Protection: Use protective gloves such as nitrile, PVA or Viton®. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.

Section 9: Physical and Chemical Properties

Physical State: liquid
Color: clear, colorless
Odor: solvent
Odor Threshold: ND

Product Name: Brakleen® Non-Chlorinated Brake Parts Cleaner (bulk) 50 State Formula
Product Number (s): 05051, 05052, 05053

Specific Gravity: 0.780
Initial Boiling Point: 132°F / 56°C
Freezing Point: < -100°F / -73°C
Vapor Pressure: ND
Vapor Density: 2 (air = 1)
Evaporation Rate: fast
Solubility: slightly soluble in water
Coefficient of water/oil distribution: ND
pH: NA
Volatile Organic Compounds: wt %: 10 g/L: 78 lbs./gal: 0.65

Section 10: Stability and Reactivity

Stability: Stable

Conditions to Avoid: Sources of ignition, temperature extremes

Incompatible Materials: Avoid contact with acids and oxidizers such as chlorine and other halogens, chromates, perchlorates, peroxides and oxygen.

Hazardous Decomposition Products: Oxides of carbon

Possibility of Hazardous Reactions: No

Section 11: Toxicological Information

Long-term toxicological studies have not been conducted for this product. The following information is available for components of this product.

Acute Toxicity:

<u>Component</u>	<u>Oral LD50 (rat)</u>	<u>Dermal LD50 (rabbit)</u>	<u>Inhalation LC50 (rat)</u>
Heptane isomers	> 5000 mg/kg	> 3000 mg/kg	3400 ppm/4H
Acetone	5800 mg/kg	> 5000 mg/kg	> 16,000 ppm/4H

Chronic Toxicity:

<u>Component</u>	<u>OSHA Carcinogen</u>	<u>IARC Carcinogen</u>	<u>NTP Carcinogen</u>	<u>Irritant</u>	<u>Sensitizer</u>
Heptane isomers	No	No	No	Skin	No
Acetone	No	No	No	Eye	No

Reproductive Toxicity: No information available

Teratogenicity: No information available

Mutagenicity: No information available

Synergistic Effects: No information available

Section 12: Ecological Information

Ecological studies have not been conducted for this product. The following information is available for components of this product.

Product Name: Brakleen® Non-Chlorinated Brake Parts Cleaner (bulk) 50 State Formula
Product Number (s): 05051, 05052, 05053

Ecotoxicity: n-heptane - 24 Hr EC50 Daphnia magna: >10 mg/L
acetone - 48 Hr EC50 Daphnia magna: 12600 mg/L
Persistence / Degradability: No information available
Bioaccumulation / Accumulation: No information available
Mobility in Environment: No information available

Section 13: Disposal Considerations

Waste Classification: This product is a RCRA hazardous waste for the characteristic of ignitability with the following potential waste codes: D001, F003. (See 40 CFR Part 261.20 – 261.33)
Empty containers may be recycled. Any liquid product should be managed as a hazardous waste.

All disposal activities must comply with federal, state, provincial and local regulations. Local regulations may be more stringent than state, provincial or national requirements.

Section 14: Transport Information

US DOT (ground): UN1993, Flammable liquids, N.O.S. (Acetone & Heptane), 3, PGII
ICAO/IATA (air): UN1993, Flammable liquids, N.O.S. (Acetone & Heptane), 3, PGII
IMO/IMDG (water): UN1993, Flammable liquids, N.O.S. (Acetone & Heptane), 3, PGII
Special Provisions: None

Section 15: Regulatory Information

U.S. Federal Regulations:

Toxic Substances Control Act (TSCA):

All ingredients are either listed on the TSCA inventory or are exempt.

Comprehensive Environmental Response, Compensation and Liability Act (CERCLA):

Reportable Quantities (RQ's) exist for the following ingredients: Acetone (5000 lbs)

Spills or releases resulting in the loss of any ingredient at or above its RQ require immediate notification to the National Response Center (800-424-8802) and to your Local Emergency Planning Committee.

Superfund Amendments Reauthorization Act (SARA) Title III:

Section 302 Extremely Hazardous Substances (EHS): None

Section 311/312 Hazard Categories:	Fire Hazard	Yes
	Reactive Hazard	No
	Release of Pressure	No
	Acute Health Hazard	Yes
	Chronic Health Hazard	No

Section 313 Toxic Chemicals: This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:
None

Product Name: Brakleen® Non-Chlorinated Brake Parts Cleaner (bulk) 50 State Formula
Product Number (s): 05051, 05052, 05053

Clean Air Act:

Section 112 Hazardous Air Pollutants (HAPs): None

Occupational Safety and Health Administration:

This product is regulated by the Hazard Communications Standard.

U.S. State Regulations:

California Safe Drinking Water and Toxic Enforcement Act (Prop 65):

This product may contain the following chemicals known to the state of California to cause cancer, birth defects or other reproductive harm: toluene (< 0.005%)

Consumer Products VOC Regulations: In states with Consumer Products VOC regulations, this product is compliant as a Brake Cleaner.

State Right to Know:

New Jersey: 142-82-5, 67-64-1
Pennsylvania: 142-82-5, 67-64-1
Massachusetts: 142-82-5, 67-64-1
Rhode Island : 142-82-5, 67-64-1

Canadian Regulations:

Controlled Products Regulations:

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

WHMIS Hazard Class: B2, D2B

Canadian DSL Inventory: All ingredients are either listed on the DSL Inventory or are exempt.

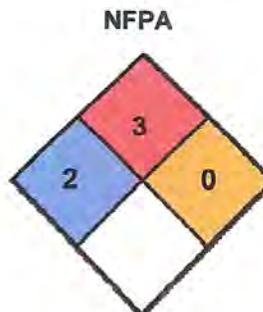

European Union Regulations:

RoHS Compliance: This product is compliant with Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003. This product does not contain any of the restricted substances as listed in Article 4(1) of the RoHS Directive.

Additional Regulatory Information: None

Section 16: Other Information

GHS Label elements, including precautionary statements

Pictogram: Harmful / Irritant

Signal Word: Warning

Hazard Statements

H303 - May be harmful if swallowed.
H313 - May be harmful in contact with skin.
H335 + H336 - May cause respiratory irritation, and drowsiness or dizziness.

Precautionary Statements

P102 - Keep out of reach of children.
P210 - Keep away from heat/sparks/open flames/hot surfaces. - No smoking
P240 - Ground/Bond container and receiving equipment
P261 - Avoid breathing dust/fume/gas/mist/vapors/spray
P262 - Do not get in eyes, on skin, or on clothing.
P264 - Wash hands thoroughly after handling.
P280 - Wear protective gloves/protective clothing/eye protection/face protection.
P301 + P310 - IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P362 - Take off contaminated clothing and wash before reuse.
EUH066 - Repeated exposure may cause skin dryness or cracking

Precautionary Statements - EU No. 1272/2008

SUMMARY OF ACUTE HAZARDS

Irritation to eyes, nose and throat; drowsiness, narcosis, tremors and other CNS effects at high concentration.

ROUTE OF EXPOSURE, SIGNS AND SYMPTOMS

INHALATION

Nasal and respiratory irritation, dizziness, narcosis, headache, nausea, CNS depression and unconsciousness.

EYE CONTACT

Watering, blurred vision, inflammation and irritation which can result in corneal injury.

SKIN CONTACT

Irritation, dermatitis.

INGESTION

Nausea, vomiting; CNS depression; irritation of gastrointestinal tract, liver and peritoneal wall; lung congestion.

SUMMARY OF CHRONIC HAZARDS

Skin irritation and dermatitis. Possible liver and kidney damage.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Individuals with pre-existing or chronic diseases of the eyes, skin, respiratory system, cardiovascular system, gastrointestinal system, liver or kidneys may have increased susceptibility to excessive exposures.

=====
Section 3 -- COMPOSITION/INFORMATION ON INGREDIENTS
=====

INGREDIENT: Diacetone Alcohol

PERCENTAGE BY WEIGHT: 20-30

CAS NUMBER: 123-42-2

EC# : 204-626-7
=====

Section 4 -- FIRST AID MEASURES
=====

If INHALED: If overcome by exposure, remove victim to fresh air immediately. Give oxygen or artificial respiration as needed. Obtain emergency medical attention. Prompt action is essential.

If on SKIN: Wash with soap and water. If irritation occurs, seek medical attention.

If in EYES: Flush eyes with large amounts of water for 15 minutes. Get medical attention.

If SWALLOWED: If swallowed, call a physician immediately. Only induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person.

=====
Section 5 -- FIRE FIGHTING MEASURES
=====

EXTINGUISHING MEDIA

Foam, dry chemical, carbon dioxide or water fog.

SPECIAL FIRE FIGHTING PROCEDURES: Wear self-contained breathing apparatus (SCBA) and other protective clothing. Hazardous decomposition products possible (see Section 10).

UNUSUAL FIRE AND EXPLOSION HAZARDS: Combustible - moderate flash point.

Vapors heavier than air and may travel along the ground or to low spots at considerable distances to a source of ignition resulting in potential flashback. Burning liquid may float on water. Heat may build up pressure and rupture containers.

=====
Section 6 -- ACCIDENTAL RELEASE MEASURES
=====

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Remove all sources of ignition. Use absorbent materials to prevent footing hazard and to contain. Ventilate area with natural or explosion-proof, forced air ventilation. Avoid flushing into sewers, drains, waterways, and soil. Wear protective clothing and respiratory protection during cleanup.

=====
Section 7 -- HANDLING AND STORAGE
=====

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Keep container closed and upright when not in use. Do not store near heat, sparks, or open flames.

OTHER PRECAUTIONS: Avoid prolonged or repeated contact with skin or clothing. Empty containers may contain residues; treat as if full and observe all products precautions. Do not reuse empty containers.

KEEP OUT OF REACH OF CHILDREN.

=====
Section 8 -- EXPOSURE CONTROLS/PERSONAL PROTECTION
=====

INGREDIENT UNITS

Diacetone Alcohol

ACGIH TLV 50 ppm

OSHA PEL 50 ppm
=====

RESPIRATORY PROTECTION (SPECIFY TYPE): In confined poorly ventilated areas, use NIOSH/MSHA approved air purifying or supplied air purifying or supplied air respirators.

VENTILATION - LOCAL EXHAUST: Acceptable

SPECIAL: Explosion-proof equipment.

MECHANICAL (GENERAL): Preferable

OTHER: N/A

PROTECTIVE GLOVES: Wear rubber gloves.

EYE PROTECTION: Chemical splash goggles (ANSI Z-87.1 or equivalent)

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Coveralls recommended.

WORK/HYGIENIC PRACTICES: Where use can result in skin contact, wash exposed areas thoroughly before eating, drinking, smoking, or leaving work area. Launder contaminated clothing before reuse.

Section 9 -- PHYSICAL AND CHEMICAL PROPERTIES

BOILING POINT: 322 F (161 C) @ 760mm Hg
SPECIFIC GRAVITY (H2O = 1): 1.38

 Section 2 -- HAZARDS IDENTIFICATION

GHS CLASSIFICATION

PHYSICAL HAZARDS: None

HEALTH HAZARDS

Acute Toxicity:

Oral: Not Classified

Dermal: Not Classified

Inhalation: Not Classified

Skin Corrosion/Irritation: Not Classified

Serious Eye Damage/Eye Irritation: Not Classified

Respiratory or Skin Sensitization: Not Classified

Germ Cell Mutagenicity: Not Classified

Carcinogenicity: Not Classified

Reproductive Toxicology: Not Classified

Target Organ Systemic Toxicity - Single Exposure: Not Classified

Target Organ Systemic Toxicity - Repeated Exposure: Not Classified

Aspiration Toxicity: Not Classified

ENVIRONMENTAL HAZARDS

Hazardous to the Aquatic Environment: Not Classified

Acute aquatic toxicity: Not Classified

Chronic aquatic toxicity: Not Classified

Bioaccumulation potential: Not Classified

Rapid degradability: Not Classified

GHS Label elements, including precautionary statements

Pictogram: None

Signal Word: None

Hazard Statements: None

Precautionary Statements:

P102 - Keep out of reach of children.

P264 - Wash hands thoroughly after handling.

Classification according to EU Directives 67/548/EEC or 1999/45/EC

LABELING SYMBOLS: None

RISK R-PHRASES: None

SAFETY S-PHRASES:

S2 : Keep out of the reach of children.

 SUMMARY OF ACUTE HAZARDS

May produce slight to moderate skin and eye irritation.

ROUTE OF EXPOSURE, SIGNS AND SYMPTOMS

INHALATION

None known.

EYE CONTACT

Irritation, watering may occur.

SKIN CONTACT

Frequent or prolonged contact may irritate and cause dermatitis.

INGESTION

May cause nausea and vomiting. Not expected to produce toxic effects unless large amounts are ingested.

SUMMARY OF CHRONIC HAZARDS

None known.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Individuals with pre-existing or chronic diseases of the eyes, skin or persons with chemical sensitivity may have increased susceptibility to excessive exposures.

Section 3 -- COMPOSITION/INFORMATION ON INGREDIENTS

% by WT	CAS No.	INGREDIENT	UNITS
None as defined by OSHA Hazard Communication Standard 29 CFR 1910.1200.			

Section 4 -- FIRST AID MEASURES

If INHALED: N/A

If on SKIN: Wash with soap and water. Seek medical attention if irritation persists.

If in EYES: Flush with large amounts of water. Get medical attention if irritation persists.

If SWALLOWED: If swallowed, call a physician immediately. Only induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person.

Section 5 -- FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA

Foam, dry chemical, carbon dioxide or water fog.

SPECIAL FIRE FIGHTING PROCEDURES: Wear self-contained breathing apparatus (SCBA) and other protective clothing. Hazardous decomposition products possible (see Section 10).

UNUSUAL FIRE AND EXPLOSION HAZARDS: Heat may build up pressure and rupture closed containers. Above 500 F (260 C) the fumes are acutely toxic.

Section 6 -- ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Wipe or scrape up spilled material to prevent footing hazard and place in trash.

Section 7 -- HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Keep container closed and upright when not in use.

OTHER PRECAUTIONS: Avoid prolonged or repeated contact with skin or clothing. Empty containers may contain residues; treat as if full and observe all products precautions. Do not reuse empty containers. KEEP OUT OF REACH OF CHILDREN.

Section 8 -- EXPOSURE CONTROLS/PERSONAL PROTECTION

RESPIRATORY PROTECTION (SPECIFY TYPE): None required.

VENTILATION - LOCAL EXHAUST: N/A

SPECIAL: N/A

MECHANICAL (GENERAL): N/A

OTHER: N/A

PROTECTIVE GLOVES: Wear rubber gloves.

EYE PROTECTION: Chemical splash goggles (ANSI Z-87.1 or equivalent)

SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

Commercial Product Name : HHS-K
 Product code : 0893106050
 MSDS-Identcode : 10039787
 Product Use Description : Polishing agent and lubricant
 Company : Wurth USA Inc.
 93 Grant St.
 07446 Ramsey, NJ
 USA
 Telephone : +1 201 825 27 10
 Telefax : +1 201 825 16 43
 Responsible/issuing person : prodsafe@wuerth.com
 Emergency telephone number : +1 800 255 3924

SECTION 2. HAZARDS IDENTIFICATION

Emergency Overview

Regulatory status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Signal Word : DANGER
 Form : aerosol
 Colour : brown
 Odour : solvent-like
 Odour - Control parameters : no data available

Carcinogenicity:
ACGIH

: No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by ACGIH.

NTP

: No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

IARC

: low boiling point hydrogen treated naphtha (CAS-No.: 64742-49-0)

OSHA

: No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.

CA Prop 65

: This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other reproductive harm.

Material Safety Data Sheet

HHS-K

Version 4.0

Revision Date 03/13/2013

Print Date 03/19/2013

Hazard Summary : Extremely flammable.
May cause fire.
Possible cancer hazard
Pressurized container. Protect from sunlight and do not
expose to temperatures exceeding 50°C / 122 °F.
Irritant

Potential Health Effects

Target Organs : Eyes
Skin
Respiratory system
Central nervous system

Eyes : May cause eye irritation.

Skin : May cause skin irritation.

Material Safety Data Sheet

HHS-K

Version 4.0

Revision Date 03/13/2013

Print Date 03/19/2013

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Component	CAS-No.	Weight percent- Weight percent
low boiling point hydrogen treated naphtha	64742-49-0	>= 35 - < 40
isobutane	75-28-5	>= 25 - < 35
propane	74-98-6	>= 3 - < 5
n-hexane	110-54-3	>= 1.5 - < 2
butane	106-97-8	>= 1.5 - < 2

SECTION 4. FIRST AID MEASURES

- General advice : If you feel unwell, seek medical advice (show the label where possible). First aider needs to protect himself. Move out of dangerous area. Never give anything by mouth to an unconscious person. Take off contaminated clothing and shoes immediately.
- Inhalation : If breathed in, move person into fresh air. In the case of inhalation of aerosol/mist consult a physician if necessary. Keep patient warm and at rest. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.
- Skin contact : In case of contact, immediately flush skin with soap and plenty of water. Do NOT use solvents or thinners. If skin irritation persists, call a physician.
- Eye contact : Protect unharmed eye. If easy to do, remove contact lens, if worn. In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- Ingestion : If swallowed, seek medical advice immediately and show this container or label. If swallowed, DO NOT induce vomiting. If a person vomits when lying on his back, place him in the recovery position.

SECTION 5. FIREFIGHTING MEASURES

- Form : aerosol
- Ignition temperature : ca.350 °C (662 °F)
- Lower explosion limit : 1.8 %(V)
- Upper explosion limit : 11.2 %(V)

Material Safety Data Sheet

HHS-K

Version 4.0

Revision Date 03/13/2013

Print Date 03/19/2013

- Suitable extinguishing media : Dry powder
Foam
Carbon dioxide (CO₂)
Water mist
- Unsuitable extinguishing media : High volume water jet
- Specific hazards during firefighting : Do not use a solid water stream as it may scatter and spread fire.
Hazardous decomposition products may be formed under fire conditions (see section 10).
Exposure to decomposition products may be a hazard to health.
- Special protective equipment for firefighters : In the event of fire, wear self-contained breathing apparatus.
Use personal protective equipment.
- Further information : Standard procedure for chemical fires.
Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
In the event of fire and/or explosion do not breathe fumes.
Use water spray to cool unopened containers.
Collect contaminated fire extinguishing water separately.
This must not be discharged into drains.
Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.
If the temperature rises there is danger of the vessels bursting due to the high vapor pressure.

SECTION 6. ACCIDENTAL RELEASE MEASURES

- Personal precautions : Refer to protective measures listed in sections 7 and 8.
Use personal protective equipment.
Remove all sources of ignition.
Avoid contact with skin and eyes.
Ensure adequate ventilation, especially in confined areas.
-

Material Safety Data Sheet

HHS-K

Version 4.0

Revision Date 03/13/2013

Print Date 03/19/2013

Contaminated surfaces will be extremely slippery.
Immediately evacuate personnel to safe areas.
Avoid inhalation of vapour or mist.
Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas.

Environmental precautions : Do not flush into surface water or sanitary sewer system. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities. Avoid release to the environment. Refer to special instructions/ Safety data sheets.

Methods for cleaning up : Clean contaminated surface thoroughly. Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations.

CERCLA Hazardous substances and corresponding RQs:

110-54-3	5,000 lbs <i>final RQ</i>
----------	---------------------------

SECTION 7. HANDLING AND STORAGE**Handling**

Handling : Limit the stocks at work place.
Use only in well-ventilated areas.
Do not breathe vapours or spray mist.
Avoid contact with skin and eyes.
Do not spray on a naked flame or any incandescent material.
Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits.
Take precautionary measures against static discharges.
Do not carry cloths that have come into contact with the product in your clothing.
For personal protection see section 8.
Use appropriate container to avoid environmental contamination.

Advice on protection : Normal measures for preventive fire protection.

Material Safety Data Sheet

HHS-K

Version 4.0

Revision Date 03/13/2013

Print Date 03/19/2013

against fire and explosion Vapours are heavier than air and may spread along floors.
 Vapours may form explosive mixtures with air.
 Keep away from heat and sources of ignition.
 Do not smoke.
 No sparking tools should be used.
 Electrical equipment should be protected to the appropriate standard.

Dust explosion class : not applicable

Storage

Requirements for storage areas and containers : Store in original container.
 BEWARE: Aerosol is pressurized. Keep away from direct sun exposure and temperatures over 50 °C. Do not open by force or throw into fire even after use. Do not spray on flames or red-hot objects.
 Keep containers tightly closed in a dry, cool and well-ventilated place.
 Please observe the storage instructions for aerosols!

Advice on common storage : Keep away from food, drink and animal feedingstuffs.
 Do not store together with oxidizing and self-igniting products.

Other data : No decomposition if stored and applied as directed.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Guidelines

Components	CAS-No.	List	Type:	Value	Update
low boiling point hydrogen treated naphtha	64742-49-0	OSHA P1	TWA	500 ppm 2,000 mg/m3	2007-01-01

		ACGIH	TWA	1,000 ppm	2007-01-01

- Engineering measures : Provide sufficient air exchange and/or exhaust in work rooms.
- Eye protection : Tightly fitting safety goggles
- Hand protection
Glove material : Nitrile rubber
- Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous substance and specific to place of work. For special applications, we recommend clarifying the resistance to chemicals of the aforementioned protective gloves with the glove manufacturer.
- Skin and body protection : Flame retardant antistatic protective clothing
Choose body protection according to the amount and concentration of the dangerous substance at the work place.
- Respiratory protection : When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
Product contains low-boiling liquids. Respiratory protective equipment must be air supplied respirators.
- Hygiene measures : Handle in accordance with good industrial hygiene and safety practice.
General industrial hygiene practice.
Do not inhale aerosol.
Avoid contact with skin, eyes and clothing.
When using do not eat, drink or smoke.
Wash hands before breaks and at the end of workday.
Follow the skin protection plan.
Wash contaminated clothing before re-use.

PREPARER: REGULATORY DEPARTMENT

SECTION 2 - COMPOSITION / INFORMATION ON INGREDIENTS

Table with 4 columns: CHEMICAL NAME, CAS NUMBER, WEIGHT %, ACGIH TLV-TWA LESS THAN. Rows include ACETONE, LIQUEFIED PETROLEUM GAS, TITANIUM DIOXIDE, MAGNESIUM SILICATE, n-BUTYL ACETATE, XYLENE, METHYL ETHYL KETONE, STODDARD SOLVENTS, ETHYLENE GLYCOL MONOBUTYL ETHER, TOLUENE, ETHYLBENZENE, AROMATIC HYDROCARBON, 1,2,4-TRIMETHYLBENZENE, PIGMENT BLACK 7, PIGMENT YELLOW 17, PIGMENT VIOLET 32, PIGMENT RED 122.

Table with 4 columns: CHEMICAL NAME, ACGIH TLV-STEL, OSHA PEL-TWA, OSHA PEL-CEILING. Rows include ACETONE, LIQUEFIED PETROLEUM GAS, TITANIUM DIOXIDE, MAGNESIUM SILICATE, n-BUTYL ACETATE, XYLENE.

Table with 4 columns: CHEMICAL NAME, TLV-TWA, STEL, PEL-CEILING. Rows include METHYL ETHYL KETONE, STODDARD SOLVENTS, ETHYLENE GLYCOL MONOBUTYL ETHER, TOLUENE, ETHYLBENZENE, AROMATIC HYDROCARBON, 1,2,4-TRIMETHYLBENZENE, PIGMENT BLACK 7, PIGMENT YELLOW 17, PIGMENT VIOLET 32, PIGMENT RED 122.

SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:
HARMFUL IF INHALED. MAY AFFECT THE BRAIN OR NERVOUS SYSTEM CAUSING DIZZINESS, HEADACHE OR NAUSEA. VAPORS MAY CAUSE FLASH FIRE OR EXPLOSION. EXTREMELY FLAMMABLE LIQUID AND VAPOR. CONTENTS UNDER PRESSURE. HARMFUL IF SWALLOWED.
EFFECTS OF OVEREXPOSURE - EYE CONTACT: CAUSES EYE IRRITATION.
EFFECTS OF OVEREXPOSURE - SKIN CONTACT: MAY BE HARMFUL IF ABSORBED THROUGH SKIN. PROLONGED OR REPEATED CONTACT MAY CAUSE SKIN IRRITATION. SUBSTANCE MAY CAUSE SLIGHT SKIN IRRITATION.
EFFECTS OF OVEREXPOSURE - INHALATION: HIGH VAPOR CONCENTRATIONS ARE IRRITATING TO THE EYES, NOSE, THROAT AND LUNGS. AVOID BREATHING VAPORS OR MISTS. HIGH GAS, VAPOR, MIST OR DUST CONCENTRATIONS MAY BE HARMFUL IF INHALED. HARMFUL IF INHALED.
EFFECTS OF OVEREXPOSURE - INGESTION: ASPIRATION HAZARD IF SWALLOWED; CAN ENTER LUNGS AND CAUSE DAMAGE. SUBSTANCE MAY BE HARMFUL IF SWALLOWED.

EFFECTS OF OVEREXPOSURE - CHRONIC HAZARDS:
IARC LISTS ETHYLBENZENE AS A POSSIBLE HUMAN CARCINOGEN (GROUP 2B). MAY CAUSE CENTRAL NERVOUS SYSTEM DISORDER (E.G., NARCOSIS INVOLVING A LOSS OF COORDINATION, WEAKNESS, FATIGUE, MENTAL CONFUSION, AND BLURRED VISION) AND/OR DAMAGE. REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVEREXPOSURE TO XYLENE WITH PERMANENT BRAIN AND NERVOUS SYSTEM DAMAGE. ABNORMALITIES, KIDNEY, LUNG, SPLEEN, EYE AND BLOOD DAMAGE AS WELL AS REPRODUCTIVE DISORDER. EFFECTS IN HUMANS, DUE TO CHRONIC OVEREXPOSURE, HAVE INCLUDED LIVER, CARDIAC ABNORMALITIES AND NERVOUS SYSTEM DAMAGE. OVEREXPOSURE TO TOLUENE IN LABORATORY ANIMALS HAS BEEN ASSOCIATED WITH LIVER ABNORMALITIES, KIDNEY, LUNG AND SPLEEN DAMAGE. EFFECTS IN HUMANS HAVE INCLUDED LIVER AND CARDIAC ABNORMALITIES. OVEREXPOSURE TO METHYL ETHYL KETONE IN LABORATORY ANIMALS HAS BEEN ASSOCIATED WITH LIVER ABNORMALITIES, KIDNEY AND LUNG DAMAGE. FETOTOXIC/EMBRYOTOMIC EFFECTS FROM INHALATION HAVE BEEN SEEN IN RATS EXPOSED TO >1000PPM DURING GESTATION.

CONTAINS CARBON BLACK. CHRONIC INFLAMMATION, LUNG FIBROSIS, AND LUNG TUMORS HAVE BEEN OBSERVED IN SOME RATS EXPERIMENTALLY EXPOSED FOR LONG PERIODS OF TIME TO EXCESSIVE CONCENTRATIONS OF CARBON BLACK AND SEVERAL INSOLUBLE FINE DUST PARTICLES. TUMORS HAVE NOT BEEN OBSERVED IN OTHER ANIMAL SPECIES (I.E., MOUSE AND HAMSTER) UNDER SIMILAR CIRCUMSTANCES AND STUDY CONDITIONS. EPIDEMIOLOGICAL STUDIES OF NORTH AMERICAN WORKERS SHOW NO EVIDENCE OF CLINICALLY SIGNIFICANT ADVERSE HEALTH EFFECTS DUE TO OCCUPATIONAL EXPOSURE TO CARBON BLACK.

CARBON BLACK IS LISTED AS A GROUP 2B - "POSSIBLY CARCINOGENIC TO HUMANS" BY IARC AND IS PROPOSED TO BE LISTED AS A4 - "NOT CLASSIFIED AS A HUMAN CARCINOGEN" BY THE AMERICAN CONFERENCE OF GOVERNMENTAL INDUSTRIAL HYGIENISTS. SIGNIFICANT EXPOSURE IS NOT ANTICIPATED DURING BRUSH APPLICATION OR DRYING. RISK OF OVEREXPOSURE DEPENDS ON DURATION AND LEVEL OF EXPOSURE TO DUST FROM REPEATED SANDING OF SURFACES OR SPRAY MIST AND THE ACTUAL CONCENTRATION OF CARBON BLACK IN THE FORMULA.

PRIMARY ROUTE(S) OF ENTRY:
SKIN CONTACT
SKIN ABSORPTION
INHALATION
EYE CONTACT

SECTION 4 - FIRST AID MEASURES

FIRST AID - EYE CONTACT:
HOLD EYELIDS APART AND FLUSH WITH PLENTY OF WATER FOR AT LEAST 15 MINUTES. GET MEDICAL ATTENTION.

FIRST AID - SKIN CONTACT:
WASH WITH SOAP AND WATER. GET MEDICAL ATTENTION IF IRRITATION DEVELOPS OR PERSISTS.

FIRST AID - INHALATION:
IF YOU EXPERIENCE DIFFICULTY IN BREATHING, LEAVE THE AREA TO OBTAIN FRESH AIR. IF CONTINUED DIFFICULTY IS EXPERIENCED, GET MEDICAL ASSISTANCE IMMEDIATELY.

FIRST AID - INGESTION:
ASPIRATION HAZARD: DO NOT INDUCE VOMITING OR GIVE ANYTHING BY MOUTH BECAUSE THIS MATERIAL CAN ENTER THE LUNGS AND CAUSE SEVERE LUNG DAMAGE. GET IMMEDIATE MEDICAL ATTENTION.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POINT: -156 F (SETAFLASH)
 LOWER EXPLOSIVE LIMIT: 0.7 %
 UPPER EXPLOSIVE LIMIT: 32.5 %

EXTINGUISHING MEDIA: DRY CHEMICAL, FOAM, WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDS:

FLASH POINT IS LESS THAN 20 DEG. F.:
 EXTREMELY FLAMMABLE LIQUID AND VAPOR.

WATER SPRAY MAY BE INEFFECTIVE. CLOSED CONTAINERS MAY EXPLODE WHEN EXPOSED TO EXTREME HEAT. VAPORS MAY FORM EXPLOSIVE MIXTURES WITH AIR. VAPORS CAN TRAVEL TO A SOURCE OF IGNITION AND FLASH BACK. KEEP CONTAINERS TIGHTLY CLOSED. ISOLATE FROM HEAT, ELECTRICAL EQUIPMENT, SPARKS AND OPEN FLAME. PERFORATION OF THE PRESSURIZED CONTAINER MAY CAUSE BURSTING OF THE CAN.

SPECIAL FIREFIGHTING PROCEDURES:
 EVACUATE AREA AND FIGHT FIRE FROM A SAFE DISTANCE.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:
 CONTAIN SPILLED LIQUID WITH SAND OR EARTH. DO NOT USE COMBUSTIBLE MATERIALS SUCH AS SAWDUST. REMOVE ALL SOURCES OF IGNITION, VENTILATE AREA AND REMOVE WITH INERT ABSORBENT AND NON-SPARKING TOOLS. DISPOSE OF ACCORDING TO LOCAL, STATE (PROVINCIAL) AND FEDERAL REGULATIONS. DO NOT INCINERATE CLOSED CONTAINERS.

SECTION 7 - HANDLING AND STORAGE

HANDLING:
 USE ONLY IN A WELL-VENTILATED AREA. AVOID BREATHING VAPOR OR MIST. FOLLOW ALL MSDS/LABEL PRECAUTIONS EVEN AFTER CONTAINER IS EMPTIED BECAUSE IT MAY RETAIN PRODUCT RESIDUES. WASH THOROUGHLY AFTER HANDLING. WASH HANDS BEFORE EATING.

STORAGE:
 CONTENTS UNDER PRESSURE. DO NOT EXPOSE TO HEAT OR STORE ABOVE 120 DEG. F. DO NOT STORE ABOVE 120 DEG. F. STORE LARGE QUANTITIES IN BUILDINGS DESIGNED AND PROTECTED FOR STORAGE OF NEPA CLASS 1 FLAMMABLE LIQUIDS. KEEP CONTAINERS TIGHTLY CLOSED. ISOLATE FROM HEAT, ELECTRICAL EQUIPMENT, SPARKS AND OPEN FLAME.

SECTION 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS:
 USE PROCESS ENCLOSURES, LOCAL EXHAUST VENTILATION, OR OTHER ENGINEERING CONTROLS TO CONTROL AIRBORNE LEVELS BELOW RECOMMENDED EXPOSURE LIMITS. PREVENT BUILD-UP OF VAPORS BY OPENING ALL DOORS AND WINDOWS TO ACHIEVE CROSS-VENTILATION. USE EXPLOSION-PROOF VENTILATION EQUIPMENT.

RESPIRATORY PROTECTION:
 A RESPIRATORY PROTECTION PROGRAM THAT MEETS OSHA 1910.134 AND ANSI Z89.2 REQUIREMENTS MUST BE FOLLOWED WHENEVER WORKPLACE CONDITIONS WARRANT A RESPIRATOR'S USE. A NIOSH/MSHA APPROVED AIR PURIFYING RESPIRATOR WITH AN ORGANIC VAPOR CARTRIDGE OR CANISTER MAY BE PERMISSIBLE UNDER CERTAIN CIRCUMSTANCES WHERE AIRBORNE CONCENTRATIONS ARE EXPECTED TO EXCEED EXPOSURE LIMITS.

PROTECTION PROVIDED BY AIR PURIFYING RESPIRATORS IS LIMITED. USE A POSITIVE PRESSURE AIR SUPPLIED RESPIRATOR IF THERE IS ANY POTENTIAL FOR AN UNCONTROLLED RELEASE. EXPOSURE LEVELS ARE NOT KNOWN, OR ANY OTHER CIRCUMSTANCES WHERE AIR PURIFYING RESPIRATORS MAY NOT PROVIDE ADEQUATE PROTECTION.

SKIN PROTECTION:
 NITRILE OR NEOPRENE GLOVES MAY AFFORD ADEQUATE SKIN PROTECTION. USE IMPERVIOUS GLOVES TO PREVENT SKIN CONTACT AND ABSORPTION OF THIS MATERIAL THROUGH THE SKIN.

EYE PROTECTION:
 USE SAFETY EYEWEAR DESIGNED TO PROTECT AGAINST SPLASH OF LIQUIDS.

OTHER PROTECTIVE EQUIPMENT:
 REFER TO SAFETY SUPERVISOR OR INDUSTRIAL HYGIENIST FOR FURTHER INFORMATION REGARDING PERSONAL PROTECTIVE EQUIPMENT AND ITS APPLICATION.

HYGIENIC PRACTICES:
 WASH THOROUGHLY WITH SOAP AND WATER BEFORE EATING, DRINKING OR SMOKING.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

BOILING RANGE: -34 - 900 F

ODOR: SOLVENT-LIKE

APPEARANCE: LIQUID

SOLUBILITY IN H2O: SLIGHT

FREEZE POINT: ND

VAPOR PRESSURE: ND

PHYSICAL STATE: LIQUID

VAPOR DENSITY: HEAVIER THAN AIR

ODOR THRESHOLD: ND

EVAPORATION RATE: FASTER THAN ETHER

SPECIFIC GRAVITY: 0.8660

pH: ND

(SEE SECTION 16 FOR ABBREVIATION LEGEND)

SECTION 10 - STABILITY AND REACTIVITY

CONDITIONS TO AVOID:

AVOID TEMPERATURES ABOVE 120 DEG. F. AVOID ALL POSSIBLE SOURCES OF IGNITION.

INCOMPATIBILITY:
 INCOMPATIBLE WITH STRONG OXIDIZING AGENTS, STRONG ACIDS AND STRONG ALKALIES.

HAZARDOUS DECOMPOSITION:
 BY OPEN FLAME, CARBON MONOXIDE AND CARBON DIOXIDE. WHEN HEATED TO DECOMPOSITION, IT EMITS ACRID SMOKE AND IRRITATING FUMES.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR UNDER NORMAL CONDITIONS.

STABILITY: THIS PRODUCT IS STABLE UNDER NORMAL STORAGE CONDITIONS.

SECTION 11 - TOXICOLOGICAL INFORMATION

PRODUCT LD50: ND

PRODUCT LC50: ND

CHEMICAL NAME	LD50	LC50
ACETONE	N.D.	N.D.
LIQUEFIED PETROLEUM GAS	N.D.	N.D.
TITANIUM DIOXIDE	>7500 MG/KG (ORAL, RAT)	N.D.
MAGNESIUM SILICATE	N.D.	TCLO: 11 MG/M3 1NH.
n-BUTYL ACRYLATE	13100 MG/KG (ORAL, RAT)	2000 PEM (INH 4 HR, RAT)
XYLENE	N.D.	N.D.
METHYL ETHYL KETONE	N.D.	N.D.
STODDARD SOLVENTS	N.D.	N.D.
ETHYLENE GLYCOL MONOBUTYL ETHER	1519 MG/KG (ORAL, MOUSE)	700 PEM (INH 7 HR, RAT)
TOLUENE	N.D.	N.D.
ETHYLBENZENE	3500 MG/KG (ORAL, RAT)	N.D.
AROMATIC HYDROCARBON	N.D.	N.D.
1,2,4-TRIMETHYLBENZENE	N.D.	18000 MG/M3 (RAT, 4 HR)
PIGMENT BLACK 7	>8000 MG/KG (ORAL, RAT)	N.D.
PIGMENT YELLOW 17	N.D.	N.D.
PIGMENT VIOLET 32	>10000 MG/KG (ORAL, RAT)	N.D.
PIGMENT RED 122	N.D.	N.D.

SECTION 12 - ECOLOGICAL INFORMATION

ECOLOGICAL INFORMATION: PRODUCT IS A MIXTURE OF LISTED COMPONENTS.

SECTION 13 - DISPOSAL INFORMATION

DISPOSAL INFORMATION:
 DISPOSE OF MATERIAL IN ACCORDANCE TO LOCAL, STATE AND FEDERAL REGULATIONS AND ORDINANCES. DO NOT ALLOW TO ENTER STORM DRAINS OR SEWER SYSTEMS.

SECTION 14 - TRANSPORTATION INFORMATION

DOT PROPER SHIPPING NAME: AEROSOL

DOT TECHNICAL NAME:

DOT HAZARD CLASS: 2.1

DOT UN/NA NUMBER: UN1950

PACKING GROUP:

HAZARD SUBCLASS:

RESP. GUIDE PAGE: 126

SECTION 15 - REGULATORY INFORMATION

CERCLA - SARA HAZARD CATEGORY:
 THIS PRODUCT HAS BEEN REVIEWED ACCORDING TO THE EPA "HAZARD CATEGORIES" PROMULGATED UNDER SECTIONS 311 AND 312 OF THE SUPERFUND AMENDMENT AND REAUTHORIZATION ACT OF 1986 (SARA TITLE III) AND IS CONSIDERED, UNDER APPLICABLE DEFINITIONS, TO MEET THE FOLLOWING CATEGORIES:

IMMEDIATE HEALTH HAZARD
 CHRONIC HEALTH HAZARD
 FIRE HAZARD

SARA SECTION 313:
 LISTED BELOW ARE THE SUBSTANCES (IF ANY) CONTAINED IN THIS PRODUCT THAT ARE SUBJECT TO THE REPORTING REQUIREMENTS OF SECTION 313 OF TITLE III OF THE SUPERFUND AMENDMENT AND REAUTHORIZATION ACT OF 1986 AND 40 CFR PART 372:

CHEMICAL NAME	CAS NUMBER
XYLENE	1330-20-7
METHYL ETHYL KETONE	78-93-3
ETHYLENE GLYCOL MONOBUTYL ETHER	111-76-2
TOLUENE	108-88-3
ETHYLBENZENE	100-41-4
1,2,4-TRIMETHYLBENZENE	95-63-6

TOXIC SUBSTANCES CONTROL ACT:

LISTED BELOW ARE THE SUBSTANCES (IF ANY) CONTAINED IN THIS PRODUCT THAT ARE SUBJECT TO THE REPORTING REQUIREMENTS OF TSCA 12(B) IF EXPORTED FROM THE UNITED STATES: NONE KNOWN

U.S. STATE REGULATIONS: AS FOLLOWS

NEW JERSEY RIGHT-TO-KNOW:
THE FOLLOWING MATERIALS ARE NON-HAZARDOUS, BUT ARE AMONG THE TOP FIVE COMPONENTS IN THIS PRODUCT.

CHEMICAL NAME	CAS NUMBER
ALKYD RESIN	MIXTURE

PENNSYLVANIA RIGHT-TO-KNOW:
THE FOLLOWING NON-HAZARDOUS INGREDIENTS ARE PRESENT IN THE PRODUCT AT GREATER THAN 3%.

CHEMICAL NAME	CAS NUMBER
ALKYD RESIN	MIXTURE
BARIUM SULFATE	7727-43-7
CALCIUM CARBONATE	1317-65-3
YELLOW IRON OXIDE	51274-00-1

CALIFORNIA PROPOSITION 65:

WARNING!

THIS PRODUCT CONTAINS A CHEMICAL(S) KNOWN BY THE STATE OF CALIFORNIA TO CAUSE CANCER.

WARNING!

THIS PRODUCT CONTAINS A CHEMICAL(S) KNOWN TO THE STATE OF CALIFORNIA TO CAUSE BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM.

INTERNATIONAL REGULATIONS: AS FOLLOWS

CANADIAN WHMIS:
THIS MSDS HAS BEEN PREPARED IN COMPLIANCE WITH CONTROLLED PRODUCT REGULATIONS EXCEPT FOR THE USE OF THE 16 HEADINGS.

Section 3: Hazards Identification

Emergency Overview: DANGER! Extremely Flammable. Contents Under Pressure.

Appearance/Odor: Liquid Spray Mist / Solvent Odor

Potential Health Effects: See Section 11 for more information.

Likely Routes of Exposure: Eye contact, skin contact, ingestion, and inhalation

Eye: Contact may cause redness, irritation, tearing, and blurred vision

Skin: Contact may dry skin causing cracks and irritation

Ingestion: May be harmful if swallowed

Inhalation: Exposure to high concentrations of vapors may cause drowsiness, breathing difficulty, respiratory irritation, or headaches. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

Product Description: **Material Safety Data Sheet**
NORD GEAR
9800001
STAINLESS SILVER

AP1

Medical Conditions Aggravated by Exposure:

Asthma and other respiratory ailments.

Target Organs: Kidney Liver Lung Brain

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage.

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Section 4: First Aid Measures

Eye Contact: Immediately flush eyes with water for at least 15 minutes. If irritation develops get medical attention.

Skin Contact: Remove contaminated clothing and wash before reuse. Wash skin with soap and water. Get medical attention if irritation develops.

Inhalation: Move to fresh air. Contact emergency medical support if breathing stops or is irregular.

Ingestion: Do NOT induce vomiting. Get medical attention immediately.

Section 5: Fire Fighting Measures

Suitable Extinguishing Media: CO₂ (Carbon Dioxide), dry chemical, or water fog.

Unsuitable Extinguishing Media: Water spray may be unsuitable. However, if water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible explosion when exposed to extreme heat.

Products of Combustion: These products are carbon oxides (CO, CO₂).

Protection of Firefighters: Full protective equipment including self-contained breathing apparatus should be used.

Section 6: Accidental Release Measures

Personal Precautions: Use personal protection recommended in Section 8.

Environmental Precautions: None known.

Product Description: **Material Safety Data Sheet**
 NORD GEAR
 9800001
 STAINLESS SILVER

API

Methods of Containment: Absorb spilled liquid in suitable material.
Methods of Clean-up: Use spark-proof tools to sweep or scrape up and containerize.
Other Information: Ventilate the area.

Section 7: Handling and Storage**Handling:**

Vapors may ignite explosively. Prevent buildup of vapors; use with adequate ventilation. Keep from sparks, heat, flame or other heat sources. Do not smoke. Turn off pilot lights, heaters, electric motors and other sources of ignition during use and until all vapors are gone. Do not puncture or incinerate (burn) container.

Storage:

Store in dry, well-ventilated area and in accordance with federal, state, and local regulations. Do not expose to heat or store at temperatures above 120 F (48 C). Storage conditions should comply with NFPA 30B and OSHA 1910.106. If storing in cold temperatures, allow product to warm to room temperature before use.

Section 8: Exposure Controls/Personal Protection**Exposure Guidelines**

#	COMPONENT	ACGIH TLV-STEL	ACGIH TLV-TWA	OSHA PEL-TWA
1	ACETONE	750 ppm	500 ppm	1000 ppm
2	PROPANE	1800 ppm	2500 ppm	1000 ppm
3	XYLENE	150 ppm	100 ppm	100 ppm
4	N-BUTANE	N/E	800 ppm	800 ppm
5	*ETHYLBENZENE	125 ppm	100 ppm	100 ppm
6	PM ACETATE	N/E		N/E
7	ETHYL ESTER	100 ppm	50 ppm	N/E

*See Section 15 and Section 11

Engineering Controls: Not generally required if product is applied in small quantities. If product is applied in larger quantities, provide ventilation to keep air contamination below OSHA permissible exposure limits and ACGIH TLV exposure levels.

Eye/face Protection: Wear safety glasses with side shields. Have eye wash facilities immediately available.

Skin Protection: Chemical resistant gloves if contact is likely.

Product Description: **Material Safety Data Sheet**
NORD GEAR
9800001
STAINLESS SILVER

API

Respiratory Protection: Use NIOSH-approved air-purifying respirator with organic cartridge or canister if exposure cannot be controlled within applicable limits with ventilation.

General Hygiene Considerations: Wash thoroughly after handling.

Section 9: Physical and Chemical Properties

Color: see product description
Odor: Solvent Odor
Physical State: Aerosol - Pressurized Liquid
Freezing Point: Not Established (mixture)
Boiling Range: N.A. (Pressurized Mixture)
Flash Point: <-18C/-28F (TCC)
Evaporation Rate: Faster than ether
Upper Flammability Limit: Not Established (mixture)
Lower Flammability Limit: Not Established (mixture)
Vapor Pressure: Approximately 50 psig @ 20 C (68 F)
Specific Gravity: 0.759 @15 C (60 F)
Solubility (water): Negligible
Percent Volatile, wt. %: 83.55
VOC Percent: 46.55
MIR Data: EFI (MAX 2.05) MIR - 1.602

Section 10: Stability and Reactivity

Stability: Stable under normal conditions.

Conditions to Avoid: Keep away from heat, sparks, and flames.

Incompatible Materials: Strong oxidizing agents.

Hazardous Decomposition Products: by fire - Carbon Dioxide and Carbon Monoxide

Possibility of Hazardous Reactions: Will not occur.

*See Section 15

See Section 3 for other acute effect information.

Chronic Effects: Prolonged over-exposure to solvent ingredients in Section 2 may cause adverse effects to the liver, urinary, cardiovascular and reproductive systems. Reports have associated the repeated and prolonged occupational OVER-EXPOSURE to solvents with brain and nervous system damage. The deliberate misuse by concentrating and inhaling the vapors may be harmful or fatal.
Carcinogenicity: See Section 2 for additional information.

Section 12: Ecological Information

No data available.

Section 13: Disposal Considerations

Do not puncture, incinerate or place container in trash compactor. Dispose of product in accordance with Federal, State, and Local regulations. Empty containers are 95% steel; recycle where allowed.

EMERGENCY OVERVIEW:

DANGER:

EXTREMELY FLAMMABLE. CONTENTS UNDER PRESSURE. CONTAINERS MAY EXPLODE WHEN HEATED. EYE AND SKIN IRRITANT. MAY CAUSE CHRONIC TOXIC EFFECTS. CONTAINS MATERIAL WHICH MAY CAUSE CANCER.

POTENTIAL SHORT TERM HEALTH EFFECTS:

ROUTES OF EXPOSURE: EYE, SKIN CONTACT, SKIN ABSORPTION, INHALATION.

EYES: MAY CAUSE IRRITATION. CONTACT WITH LIQUID MAY CAUSE FROSTBITE.

SKIN: MAY CAUSE IRRITATION. CONTACT WITH LIQUID MAY CAUSE FROSTBITE.

INHALATION:

EXCESSIVE INTENTIONAL INHALATION MAY CAUSE RESPIRATORY TRACT IRRITATION AND CENTRAL NERVOUS SYSTEM EFFECTS (HEADACHE, DIZZINESS).

INGESTION:

NOT A NORMAL ROUTE OF EXPOSURE. MAY CAUSE STOMACH DISTRESS, NAUSEA OR VOMITING.

TARGET ORGANS: EYES. SKIN. RESPIRATORY SYSTEM.

CHRONIC EFFECTS:

PROLONGED OR REPEATED EXPOSURE CAN CAUSE DRYING, DEFATTING AND DERMATITIS.

SIGNS AND SYMPTOMS:

SYMPTOMS MAY INCLUDE REDNESS, EDEMA, DRYING, DEFATTING AND CRACKING OF THE SKIN. SYMPTOMS OF OVEREXPOSURE MAY BE HEADACHE, DIZZINESS, TIREDNESS, NAUSEA AND VOMITING.

3. COMPOSITION / INFORMATION ON INGREDIENTS

INGREDIENT(S)	CAS #	PERCENT
SOLVENT NAPHTHA (PETROLEUM), LIGHT ALIPHATIC	64742-89-8	7 - 13
HYDROUS MAGNESIUM SILICATE	14807-96-6	3 - 7
ACETONE	67-64-1	15 - 40
BUTANE	106-97-8	10 - 30
PROPANE	74-98-6	10 - 30

2-PROPANOL, 1-METHOXY-, ACETATE	108-65-6	1 - 5
CARBONIC ACID CALCIUM SALT (1:1)	471-34-1	1 - 5
TITANIUM OXIDE	13463-67-7	1 - 5
1,2,4-TRIMETHYLBENZENE	95-63-6	0.1 - 1

4. FIRST AID MEASURES

FIRST AID PROCEDURES:

EYE CONTACT:

FLUSH WITH COOL WATER. REMOVE CONTACT LENSES, IF APPLICABLE, AND CONTINUE FLUSHING. OBTAIN MEDICAL ATTENTION IF IRRITATION PERSISTS.

SKIN CONTACT:

FLUSH WITH COOL WATER. WASH WITH SOAP AND WATER. OBTAIN MEDICAL ATTENTION IF IRRITATION PERSISTS. CLOTHING FROZEN TO THE SKIN SHOULD BE THAWED BEFORE BEING REMOVED.

INHALATION:

IF SYMPTOMS DEVELOP, MOVE VICTIM TO FRESH AIR. IF SYMPTOMS PERSIST, OBTAIN MEDICAL ATTENTION. IF BREATHING HAS STOPPED, TRAINED PERSONNEL SHOULD ADMINISTER CPR IMMEDIATELY.

INGESTION:

NOT A NORMAL ROUTE OF EXPOSURE. DO NOT INDUCE VOMITING. RINSE MOUTH WITH WATER, THEN DRINK ONE OR TWO GLASSES OF WATER. OBTAIN MEDICAL ATTENTION. NEVER GIVE ANYTHING BY MOUTH IF VICTIM IS UNCONSCIOUS, OR IS CONVULSING.

NOTES TO PHYSICIAN: SYMPTOMS MAY BE DELAYED.

GENERAL ADVICE:

IF YOU FEEL UNWELL, SEEK MEDICAL ADVICE (SHOW THE LABEL WHERE POSSIBLE). ENSURE THAT MEDICAL PERSONNEL ARE AWARE OF THE MATERIAL(S) INVOLVED, AND TAKE PRECAUTIONS TO PROTECT THEMSELVES. SHOW THIS SAFETY DATA SHEET TO THE DOCTOR IN ATTENDANCE.

5. FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES:

FLAMMABLE BY WHMIS/OSHA CRITERIA. CONTAINERS MAY EXPLODE WHEN HEATED.

EXTINGUISHING MEDIA:

SUITABLE EXTINGUISHING MEDIA:

CARBON DIOXIDE. ALCOHOL FOAM. DRY CHEMICAL. FOAM. WATER FOG.

UNSUITABLE EXTINGUISHING MEDIA: NOT AVAILABLE

PROTECTION OF FIREFIGHTERS:

SPECIFIC HAZARDS ARISING FROM THE CHEMICAL:

CONTENTS UNDER PRESSURE. PRESSURIZED CONTAINER MAY EXPLODE WHEN EXPOSED TO HEAT OR FLAME. COOL CONTAINERS WITH FLOODING QUANTITIES OF WATER UNTIL WELL AFTER FIRE IS OUT.

PROTECTIVE EQUIPMENT FOR FIREFIGHTERS:

FIREFIGHTERS SHOULD WEAR FULL PROTECTIVE CLOTHING INCLUDING SELF CONTAINED BREATHING APPARATUS.

HAZARDOUS COMBUSTION PRODUCTS:

MAY INCLUDE AND ARE NOT LIMITED TO: OXIDES OF CARBON. PHOSGENE.

EXPLOSION DATA:
 SENSITIVITY TO MECHANICAL IMPACT: NOT AVAILABLE
 SENSITIVITY TO STATIC DISCHARGE: NOT AVAILABLE

6. ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS:
 KEEP UNNECESSARY PERSONNEL AWAY. DO NOT TOUCH DAMAGED CONTAINERS OR SPILLED MATERIAL UNLESS WEARING APPROPRIATE PROTECTIVE CLOTHING. KEEP PEOPLE AWAY FROM AND UPWIND OF SPILL/LEAK.

METHODS FOR CONTAINMENT
 ELIMINATE ALL IGNITION SOURCES (NO SMOKING, FLARES, SPARKS, OR FLAMES IN IMMEDIATE AREA). STOP LEAK IF YOU CAN DO SO WITHOUT RISK. PREVENT ENTRY INTO WATERWAYS, SEWERS, BASEMENTS OR CONFINED AREAS.

METHODS FOR CLEANING UP:
 BEFORE ATTEMPTING CLEAN UP, REFER TO HAZARD DATA GIVEN ABOVE. REMOVE SOURCES OF IGNITION. ALTHOUGH THE CHANCE OF A SIGNIFICANT SPILL OR LEAK IS UNLIKELY IN AEROSOL CONTAINERS, IN THE EVENT OF SUCH AN OCCURRENCE, ABSORB SPILLED MATERIAL WITH A NON-FLAMMABLE ABSORBENT SUCH AS SAND OR VERMICULITE. NEVER RETURN SPILLS IN ORIGINAL CONTAINERS FOR RE-USE.

7. HANDLING AND STORAGE

HANDLING: USE GOOD INDUSTRIAL HYGIENE PRACTICES IN HANDLING THIS MATERIAL.

STORAGE:
 KEEP OUT OF REACH OF CHILDREN. DO NOT STORE AT TEMPERATURES ABOVE 49 DEG. C. KEEP AWAY FROM HEAT, OPEN FLAMES OR OTHER SOURCES OF IGNITION. STORE IN A TIGHTLY CLOSED CONTAINER.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

EXPOSURE LIMITS:

INGREDIENT (S)	EXPOSURE LIMITS
1,2,4-TRIMETHYLBENZENE	ACGIH-TLV: TWA: 25 PPM OSHA-PEL: TWA: 25 PPM
2-PROPANOL, 1-METHOXY-, ACETATE	ACGIH-TLV: NOT ESTABLISHED OSHA-PEL: NOT ESTABLISHED
ACETONE	ACGIH-TLV: TWA: 500 PPM STEL: 750 PPM OSHA-PEL: TWA: 1000 PPM
BUTANE	ACGIH-TLV: TWA: 1000 PPM OSHA-PEL: NOT ESTABLISHED
CARBONIC ACID CALCIUM SALT (1:1)	ACGIH-TLV: TWA: 10 MG/M3

HYDROUS MAGNESIUM SILICATE	OSHA-PEL: NOT ESTABLISHED ACGIH-TLV: TWA: 2 MG/M3
PROPANE	OSHA-PEL: NOT ESTABLISHED ACGIH-TLV: TWA: 1000 PPM
SOLVENT NAPHTHA (PETROLEUM), LIGHT ALIPHATIC	OSHA-PEL: TWA: 1000 PPM
TITANIUM OXIDE	ACGIH-TLV: NOT ESTABLISHED OSHA-PEL: NOT ESTABLISHED
	ACGIH-TLV: TWA: 10 MG/M3
	OSHA-PEL: TWA: 15 MG/M3

ENGINEERING CONTROLS:
USE ONLY UNDER GOOD VENTILATION CONDITIONS OR WITH RESPIRATORY PROTECTION.

PERSONAL PROTECTIVE EQUIPMENT:

EYE / FACE PROTECTION: SAFETY GOGGLES OR GLASSES.

HAND PROTECTION: RUBBER GLOVES. CONFIRM WITH A REPUTABLE SUPPLIER FIRST.

SKIN AND BODY PROTECTION: AS REQUIRED BY EMPLOYER CODE.

RESPIRATORY PROTECTION:
NOT NORMALLY REQUIRED IF GOOD VENTILATION IS MAINTAINED AND EXPOSURE GUIDELINES ARE NOT EXCEEDED. WHERE EXPOSURE GUIDELINE LEVELS MAY BE EXCEEDED, USE AN APPROVED NIOSH RESPIRATOR.

GENERAL HYGIENE CONSIDERATIONS:
HANDLE IN ACCORDANCE WITH GOOD INDUSTRIAL HYGIENE AND SAFETY PRACTICE. WHEN USING DO NOT EAT OR DRINK. WASH HANDS AND FACE BEFORE BREAKS AND IMMEDIATELY AFTER HANDLING THE PRODUCT.

9. PHYSICAL & CHEMICAL PROPERTIES

APPEARANCE: AEROSOL.

COLOR: TAN

FORM: SPRAY

ODOR: SOLVENT.

ODOR THRESHOLD: NOT AVAILABLE

PHYSICAL STATE: LIQUID

PH: NOT AVAILABLE

MELTING POINT: NOT AVAILABLE

FREEZING POINT: NOT AVAILABLE

BOILING POINT: NOT AVAILABLE

FLASH POINT: NOT DETERMINED

EVAPORATION RATE: <1 (ETHER = 1)

FLAMMABILITY LIMITS IN AIR, LOWER, % BY VOLUME: 1.8
 FLAMMABILITY LIMITS IN AIR, UPPER, % BY VOLUME: 12.8

VAPOR PRESSURE: NOT AVAILABLE

VAPOR DENSITY: NOT AVAILABLE

SPECIFIC GRAVITY: NOT AVAILABLE

OCTANOL/WATER COEFFICIENT: NOT AVAILABLE

AUTO-IGNITION TEMPERATURE: NOT AVAILABLE

PERCENT VOLATILE: NOT AVAILABLE

10. CHEMICAL STABILITY & REACTIVITY INFORMATION

CHEMICAL STABILITY: STABLE UNDER RECOMMENDED STORAGE CONDITIONS.

CONDITIONS TO AVOID:
 AEROSOL CONTAINERS ARE UNSTABLE AT TEMPERATURES ABOVE 49 DEG. C
 (120 DEG. F).

INCOMPATIBLE MATERIALS: STRONG ACIDS, ALKALIES AND OXIDIZING AGENTS.

HAZARDOUS DECOMPOSITION PRODUCTS:
 MAY INCLUDE AND ARE NOT LIMITED TO: OXIDES OF CARBON. PHOSGENE.

POSSIBILITY OF HAZARDOUS REACTIONS:
 HAZARDOUS POLYMERIZATION DOES NOT OCCUR.

11. TOXICOLOGICAL INFORMATION

COMPONENT ANALYSIS - LC50:

INGREDIENT(S)	LC50
1,2,4-TRIMETHYLBENZENE	3661 PPM RAT
2-PROPANOL, 1-METHOXY-, ACETATE	NOT AVAILABLE
ACETONE	>16000 MG/M3 RAT
BUTANE	658 MG/M3 RAT
CARBONIC ACID CALCIUM SALT (1:1)	NOT AVAILABLE
HYDROUS MAGNESIUM SILICATE	NOT AVAILABLE
PROPANE	NOT AVAILABLE
SOLVENT NAPHTHA (PETROLEUM), LIGHT ALIPHATIC	1400 MG/L/4H RAT
TITANIUM OXIDE	NOT AVAILABLE

COMPONENT ANALYSIS - ORAL LD50:

INGREDIENT(S)	LD50
1,2,4-TRIMETHYLBENZENE	3280 MG/KG RAT
2-PROPANOL, 1-METHOXY-, ACETATE	8532 MG/KG RAT

ACETONE	5800 MG/KG RAT
BUTANE	NOT AVAILABLE
CARBONIC ACID CALCIUM SALT (1:1)	6450 MG/KG RAT
HYDROUS MAGNESIUM SILICATE	NOT AVAILABLE
PROPANE	NOT AVAILABLE
SOLVENT NAPHTHA (PETROLEUM), LIGHT ALIPHATIC	5000 MG/KG RAT
TITANIUM OXIDE	24000 MG/KG RAT

EFFECTS OF ACUTE EXPOSURE:

EYE: MAY CAUSE IRRITATION. CONTACT WITH LIQUID MAY CAUSE FROSTBITE.

SKIN: MAY CAUSE IRRITATION. CONTACT WITH LIQUID MAY CAUSE FROSTBITE.

INHALATION:

EXCESSIVE INTENTIONAL INHALATION MAY CAUSE RESPIRATORY TRACT IRRITATION AND CENTRAL NERVOUS SYSTEM EFFECTS (HEADACHE, DIZZINESS).

INGESTION:

NOT A NORMAL ROUTE OF EXPOSURE. MAY CAUSE STOMACH DISTRESS, NAUSEA OR VOMITING.

SENSITIZATION: NON-HAZARDOUS BY WHMIS/OSHA CRITERIA.

CHRONIC EFFECTS:

REPEATED OR PROLONGED EXPOSURE TO HYDROUS MAGNESIUM SILICATE (TALC) MAY CAUSE SCARRING OF THE LUNGS WITH SHORTNESS OF BREATH, CHRONIC COUGH, AND HEART FAILURE.

CARCINOGENICITY: CONTAINS A POTENTIAL CARCINOGEN.

ACGIH - THRESHOLD LIMITS VALUES - CARCINOGENS:

ACETONE	67-64-1	A4 - NOT CLASSIFIABLE AS A HUMAN CARCINOGEN
HYDROUS MAGNESIUM SILICATE	14807-96-6	A4 - NOT CLASSIFIABLE AS A HUMAN CARCINOGEN (CONTAINING NO ASBESTOS FIBERS) A1 - CONFIRMED HUMAN CARCINOGEN (CONTAINING ASBESTOS FIBERS)
TITANIUM OXIDE	13463-67-7	A4 - NOT CLASSIFIABLE AS A HUMAN CARCINOGEN

IARC - GROUP 2B (POSSIBLY CARCINOGENIC TO HUMANS):

TITANIUM OXIDE	13463-67-7	MONOGRAPH 93 POSTED, MONOGRAPH 47 (1989)
----------------	------------	--

IARC - GROUP 3 (NOT CLASSIFIABLE):

HYDROUS MAGNESIUM SILICATE	14807-96-6	MONOGRAPH 93 POSTED (INHALED), SUPPLEMENT 7 (1987), MONOGRAPH 42 (1987)
----------------------------	------------	---

MUTAGENICITY: NON-HAZARDOUS BY WHMIS/OSHA CRITERIA.

REPRODUCTIVE EFFECTS: NON-HAZARDOUS BY WHMIS/OSHA CRITERIA.

TERATOGENICITY: NON-HAZARDOUS BY WHMIS/OSHA CRITERIA.

12. ECOLOGICAL INFORMATION

ECOTOXICITY:
COMPONENTS OF THIS PRODUCT HAVE BEEN IDENTIFIED AS HAVING POTENTIAL ENVIRONMENTAL CONCERNS.

ECOTOXICITY - FRESHWATER ALGAE DATA:

SOLVENT NAPHTHA (PETROLEUM), LIGHT ALIPHATIC	64742-89-8	72 HR EC50 SELENASTRUM CAPRICORNUTUM: 4700 MG/L
---	------------	--

		74-98-6	No	1000	1000	d
SECTION 2 - PHYSICAL/CHEMICAL CHARACTERISTICS						
Boiling Point: N/A			Specific Gravity (H2O=1): Concentrate Only = < 1			
Vapor Pressure: PSIG @ 70°F (Aerosols): 50-60			Vapor Pressure (Non-Aerosols)(mm Hg and Temperature): N/A			
Vapor Density (Air = 1): N/E			Evaporation Rate (= 1): N/E			
Solubility in Water: Soluble			Water Reactive: No			
Appearance and Odor: Clear liquid with fragrance.						
SECTION 3 - FIRE AND EXPLOSION HAZARD DATA						
FLAMMABILITY as per USA FLAME PROJECTION TEST (aerosols): flame projection with spray through cap: projection greater than 18" with flashback: Categorized as EXTREMELY FLAMMABLE			Auto Ignition Temperature N/E	Flammability Limits in Air by % in Volume: % LEL: N/E % UEL: N/E		
FLASH POINT AND METHOD USED (non-aerosols): N/A		SPECIAL FIRE FIGHTING PROCEDURES: Provide shielding for personnel. Wear self-contained breathing apparatus. Cool containers with water fog to prevent rupturing & spewing.				
EXTINGUISHER MEDIA: Foam, dry chemical, carbon dioxide, water.		Unusual Fire & Explosion Hazards: Do not expose aerosols to temperatures above 120°F or the container may rupture.				
SECTION 4 - REACTIVITY HAZARD DATA						
STABILITY <input checked="" type="checkbox"/> STABLE <input type="checkbox"/> UNSTABLE			HAZARDOUS POLYMERIZATION <input type="checkbox"/> WILL <input checked="" type="checkbox"/> WILL NOT OCCUR			
Incompatibility (Mat. to avoid): Alkalis, oxidizing materials, amines.			Conditions to Avoid: Open flame, welding arcs, heat.			
Hazardous Decomposition Products: CO, CO2.						
SECTION 5 - HEALTH HAZARD DATA						
PRIMARY ROUTES OF ENTRY: <input checked="" type="checkbox"/> INHALATION <input type="checkbox"/> INGESTION <input type="checkbox"/> SKIN ABSORPTION <input type="checkbox"/> EYE <input type="checkbox"/> NOT HAZARDOUS						
ACUTE EFFECTS Vapor concentrations around 1000 ppm may cause slight transient irritation to the upper respiratory tract.						
Inhalation: Excessive inhalation of vapors can be harmful and may cause headache, dizziness, asphyxia, anesthetic effects and possible unconsciousness.						
Eye Contact: Irritation.			Skin Contact: May cause slight irritation.			
Ingestion: Possible chemical pneumonitis if aspirated into lungs. Nausea.						
CHRONIC EFFECTS: (Effects due to excessive exposure to the raw materials of this mixture) May cause mucous membrane irritation, overnight headache, and general weakness.						
Medical Conditions Generally Aggravated by Exposure: May aggravate existing eye, skin, or upper respiratory conditions.						
EMERGENCY FIRST AID PROCEDURES						
Eye Contact: Flush with water for 15 minutes. If irritated, seek medical attention.						
Skin Contact: Wash with soap and water. If irritated, seek medical attention.						
Inhalation: Remove to fresh air. Resuscitate if necessary. Get medical attention.						
Ingestion: DO NOT INDUCE VOMITING. Drink two large glasses of water. Get immediate medical attention.						
SECTION 6 - CONTROL AND PROTECTIVE MEASURES						
Respiratory Protection (specify type): If vapor concentration exceeds TLV, use respirator approved by U.S. Bureau of Mines / NIOSH for organic vapor.						
Protective Gloves: Latex, if skin easily irritated.			Eye Protection: Safety glasses recommended.			
Ventilation Requirements: Adequate ventilation to keep vapor concentration below TLV.						
Other Protective Clothing & Equipment: None						
Hygienic Work Practices: Wash with soap and water before handling food. Remove contaminated clothing.						
SECTION 7 - PRECAUTIONS FOR SAFE HANDLING AND USE						
Steps To Be Taken If Material Is Spilled Or Released: Absorb with suitable medium. Incinerate or landfill according to local, state or federal regulations. DO NOT FLUSH TO SEWER.						
Waste Disposal Methods: Aerosol cans when vented to atmospheric pressure through normal use, pose no disposal hazard.						
Precautions To Be Taken In Handling & Storage: Do not puncture or incinerate containers. Do not store at temperatures above 120°F.						
Other Precautions &/or Special Hazards: KEEP OUT OF REACH OF CHILDREN. Avoid food contamination. Avoid breathing vapors. Remove ignition sources.						

We believe the statements, technical information and recommendations contained herein are reliable, but they are given without warranty or guarantee of any kind.

MATERIAL SAFETY DATA SHEET

Complies with ANSI Z400.1 Format

SECTION 1: PRODUCT IDENTIFICATION

Product: **WHITEBOARD CLEANER Sustainable Earth By Staples** ^{TM/MC}
This MSDS applies to Manufacturer Item Number: SEB500008-A MSDS CODE: SEB5000.0111

GENERIC DESCRIPTION	DATE ISSUED	SUPERSEDES	PREPARED BY
Whiteboard Cleaner	01-20-11	11-17-10	Regulatory Specialist

SECTION 2: HAZARDS IDENTIFICATION

Primary Entry Routes: Eyes and skin. **Signs & Symptoms of Exposure:** Incidental skin contact is not expected to cause any significant irritation. Eye contact may cause slight reddening. **Effects of Overexposure:** None known.

SECTION 3: COMPOSITION/ INFORMATION ON INGREDIENTS

Components	% by Wt.	CAS #	Exposure Limit
Ethanol	3-5	64-17-5	1000 ppm TLV-TW, 1000 ppm OSHA PEL
Glycol ether DPnB	1-3	29911-28-2	None established

Balance is water and similar non-hazardous ingredients. No fragrance or dye added.

SECTION 4: FIRST AID MEASURES

Emergency First Aid Procedures:

Eyes: Immediately flush eyes with water for at least 15 minutes while holding eyelids open. If reddening occurs and persists, seek medical attention or advice.

Skin: Rinse thoroughly with water.

Ingestion: Drink large amounts of water or milk, consult a physician.

SECTION 5: FIRE FIGHTING MEASURES

Flash Point: >130°F **Flammable Limits:** Not known. **Extinguishing Media:** Use standard firefighting measures to extinguish fires involving this material (water spray, dry chemicals or foam). **Special Fire Fighting Procedures:** Appropriate personal protective equipment. **Unusual Fire and Explosion Hazards:** Not known. Use water spray to cool nearby containers.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Release or Spill: Recover liquid with wet mop or wet/dry vacuum. Rinse area with water and flush residue to sanitary sewer. Keep spill out of storm sewers and waterways. Use care, floor may become slippery. Wear appropriate protective gear to avoid eye contact. Follow good industrial hygiene practices. Wash thoroughly after clean up.

SECTION 7: HANDLING AND STORAGE

Avoid contact with skin and eyes. Wash thoroughly after handling. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Keep containers closed until used. Store in original containers in areas inaccessible to children. Do not store on side. Avoid creasing or impacting of side walls.

SECTION 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

Engineering Controls: Use with adequate ventilation.

Respiratory Protection: No special requirements for normal use conditions.

Protective Gloves: No special requirements for normal use conditions.

Eye Protection: No special requirements for normal use conditions.

Other Protective Measures: Use good personal hygiene practices. Launder contaminated clothing/equipment.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Appearance/Odor: Clear, colorless liquid/Mild	Boiling Point: >212°F	Evap. Rate: Not known.
pH (as is): 7.0	Vapor Density: Not known.	Vapor Pressure: Not known.
Specific Gravity: 1.01	Solubility in Water: Soluble	V.O.C. Content (by weight): <5% (<50g/L)

SECTION 10: STABILITY AND REACTIVITY

Stability: Stable **Conditions to Avoid:** Heat, sparks and fire **Incompatibility:** None known.
Hazardous Decomposition Products: None known. **Hazardous Polymerization:** Will not occur.

SECTION 11: TOXICOLOGICAL INFORMATION

Oral Toxicity: This product is non-toxic based upon current information available to Staples Contract & Commercial, Inc. and provided by all ingredient manufacturers. **No PBTs:** This product contains none of the persistent, bioaccumulative and toxic chemicals (PBT) as listed by EPA: dioxins & furans, toxaphene, PCBs, Mirex, Mercury & compounds, Octachlorostyrene, alkyl-lead, DDT, Hexachlorobenzene, aldrin/dieldrin, benzo(a)pyrene and chlordane. **No Butyl:** Contains no 2-butoxyethanol (butyl). **No Endocrine Modifiers:** Based upon information provided by manufacturers of all ingredients used to manufacture this product, none of the ingredients used in this product contain APE, OPE, NPE or dibutyl phthalate.

SECTION 12: ECOLOGICAL INFORMATION

All components of this product are readily biodegradable based upon the Modified OECD screening tests. After this product's use, it will biodegrade in sewage systems and/or the environment. Contains no nonyl phenol ethoxylates or alkyl phenol ethoxylates. This product contains no ozone-depleting chlorinated compounds as specified by the Montreal Protocol. This product contains no paradichlorobenzene 1,4-dioxane, sodium hypochlorite, NTA or sodium EDTA.

SECTION 13: DISPOSAL CONSIDERATIONS

Waste Disposal Information: Discarded product is not a hazardous waste according to RCRA, 40 CFR 261. Dispose of in compliance with all Federal, state and local laws and regulations.

SECTION 14: TRANSPORT INFORMATION

DOT EMERGENCY 24-HR: 1-888-322-0912 **U.S. DOT Hazard Class:** Not regulated.
DOT LABEL: None **DOT Shipping Name:** Compound, Cleaning Liquid

SECTION 15: REGULATORY INFORMATION

There are no components in this product currently reportable or listed as carcinogens by NTP, IARC or OSHA; on CERCLA (Comprehensive Environmental Response, Compensation and Liability Act of 1980); on SARA Title III, Sections 302/304 or Section 313, or on California Proposition 65. All components of this product are listed or are excluded from listing on the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

SARA Title III Sections 311/312:

Chemical Name	CAS#	*Hazard Categories
Glycol ether DPnB	29911-28-2	A
Ethanol	64-17-5	A, C, F

*The five hazard categories are as follows: F=FIRE HAZARD; S=SUDDEN RELEASE OF PRESSURE; R=REACTIVE; A=IMMEDIATE (ACUTE) HEALTH HAZARD; C=DELAYED (CHRONIC) HEALTH HAZARD

MASSACHUSETTS Right-to-Know – The following components of this material are included in the Massachusetts Hazardous Substance List and are present at or above reportable levels:

Chemical Name	CAS #	Typical Maximum Concentration
Ethanol	64-17-5	5%

NEW JERSEY Right-to-Know – The following components of this material are included in the New Jersey Hazardous Substance List and are present at or above reportable levels:

Chemical Name	CAS #	Typical Maximum Concentration
Ethanol	64-17-5	5%

PENNSYLVANIA Right-to-Know – The following components of this material are included in the Pennsylvania Hazardous Substance List and are present at or above reportable levels:

Chemical Name	CAS #	Typical Maximum Concentration
Ethanol	64-17-5	5%

SECTION 16: OTHER INFORMATION

This product has been formulated in partnership with EPA Design for the Environment (DfE) Formulator Initiative.

Always follow label directions carefully when using this or any other chemical product. If information about this product is required, please contact Staples at 1-888-322-0912 or visit our website at www.staples.com. Keep MSD Sheets filed and organized in an area accessible to workers according to the OSHA Hazard Communication Standard.

All information contained in this Material Safety Data Sheet is provided to the best of Staples Contract & Commercial, Inc's knowledge. No warranty is made with respect to this information, expressed or implied, including warranties of merchantability or fitness for a particular purpose. Users are responsible for verifying the information under their own operating conditions to determine whether the products listed in the MSDS are suitable for their intended use. Users are responsible for compliance with all laws and regulations as may be required by their receipt of the information and use of the products provided with this MSDS. This MSDS was prepared for the sole purpose of compliance with the Occupational Safety and Health Administration's Hazard Communication Standard and that is its only intended use.

MSDS #: MSDS SEB5000

Clasificación Riesgos	HMIS	NFPA
Salud	1	1
Inflamabilidad	2	2
Reactividad	0	0
Especial	Ninguno	Ninguno

HOJA DE DATOS DE SEGURIDAD DE MATERIAL

Cumple con el Formato ANSI Z400.1

SECCIÓN 1: IDENTIFICACIÓN DEL PRODUCTO

Producto: PIZARRA LIMPIADOR Sustainable Earth By Staples^{TM/MC}

Este MSDS aplica a los artículos del fabricante con número: SEB500008-A

CÓDIGO DE MSDS: SEB5000.0111

DESCRIPCIÓN GENÉRICA	FECHA DE EXPEDICIÓN	REEMPLAZA	PREPARADO POR
Pizarra Limpiador	01-20-11	11-17-10	Especialista Regulador

SECCIÓN 2: IDENTIFICACIÓN DE RIESGOS

Principales rutas de entrada: Ojos y piel **Signos y síntomas de exposición:** No se espera que el contacto incidental con la piel provoque ninguna irritación significativa. El contacto con los ojos puede provocar un ligero enrojecimiento.

Efectos de la sobreexposición: Ninguno conocido.

SECCIÓN 3: COMPOSICIÓN / INFORMACIÓN SOBRE LOS INGREDIENTES

Componentes	% por peso	CAS #	Límite de Exposición
Etanol	3-5	64-17-5	1000 ppm TLV-TW, 1000 ppm OSHA PEL
Glicol éter BNDP	1-3	29911-28-2	Ninguno establecido

El balance es el agua e ingredientes similares no peligrosos. No hay perfume o colorante añadido.

SECCIÓN 4: MEDIDAS DE PRIMEROS AUXILIOS

Procedimientos de primeros auxilios en caso de emergencia:

Ojos: Enjuague inmediatamente los ojos con agua durante al menos 15 minutos, sosteniendo los párpados abiertos. En caso de enrojecimiento y si éste persiste, busque atención u orientación médica.

Piel: Enjuague abundantemente con agua.

Ingestión: Beba grandes cantidades de agua y consulte a un médico.

SECCIÓN 5: MEDIDAS PARA EL COMBATE DE INCENDIOS

Punto de inflamación: >130°F **Límites de inflamabilidad:** Desconocido **Medios de extinción:** Utilice las medidas contra incendios habituales para apagar incendios provocados por este material (agua atomizada, polvos químicos secos o espuma). **Procedimientos especiales para el combate de incendios:** Equipo de protección personal apropiado.

Riesgos inusuales de incendio y explosión: Desconocidos. Use agua atomizada para enfriar los recipientes cercanos.

SECCIÓN 6: MEDIDAS PARA LOS DERRAMES ACCIDENTALES

Fugas o derrames: Recupere el líquido con un trapeador húmedo o con una aspiradora en seco/húmedo. Enjuague el área con agua y tire los residuos a la alcantarilla sanitaria. Evite que el material derramado vaya al colector y los cauces de aguas pluviales. Tenga cuidado, el piso puede volverse resbaloso. Use el equipo de protección apropiado para evitar el contacto con los ojos. Cumpla con las buenas prácticas de higiene industrial. Lave abundantemente después de limpiar.

SECCIÓN 7: MANEJO Y ALMACENAMIENTO

Evite el contacto con la piel y los ojos. Lávese abundantemente después de manipular el producto. Al igual que con todos los productos químicos, se debe cumplir con las buenas prácticas de higiene industrial al manipular este material. Conserve los recipientes cerrados hasta su uso. Almacene el producto en los recipientes originales y en áreas fuera del alcance de los niños. No almacene de lado. Evite golpear las paredes.

SECCIÓN 8: CONTROLES DE EXPOSICIÓN Y PROTECCIÓN PERSONAL

Controles de ingeniería: Utilícese con ventilación adecuada.

Protección respiratoria: No hay requisitos especiales para las condiciones normales de uso.

Guantes de protección: No hay requisitos especiales para las condiciones normales de uso.

Protección para los ojos: No hay requisitos especiales para las condiciones normales de uso.

Otras medidas de protección: Cumpla con las buenas prácticas de higiene personal. Lave el equipo y la ropa contaminada.

SECCIÓN 9: PROPIEDADES FÍSICAS Y QUÍMICAS

Apariencia y olor: Líquido claro, incoloro/Suave **Punto de ebullición:** >212°F **pH (Como tal):** 7.0
Velocidad de evaporación: Desconocido **Densidad de vapor:** Desconocido **Presión de vapor:** Desconocido
Gravedad específica: 1.01 **Solubilidad en agua:** Soluble **Contenido de C.O.V. (por peso):** <5% (<50g/L)

SECCIÓN 10: ESTABILIDAD Y REACTIVIDAD

Estabilidad: Estable **Condiciones que se deben evitar:** calor, las chispas y el fuego **Incompatibilidad:** Ninguna conocida. **Productos peligrosos de la descomposición:** Ninguno conocido **Polimerización peligrosa:** No ocurrirá.

SECCIÓN 11: INFORMACIÓN TOXICOLÓGICA

Toxicidad oral: De acuerdo con la información actual disponible para Staples Contract & Commercial, Inc. y la proporcionada por los fabricantes de todos los ingredientes, este producto no es tóxico. Presenta valores orales agudos LD₅₀ mayores a 5 g/kg. **Sin PBT:** Este producto no contiene ninguno de los contaminantes químicos persistentes, bioacumulativos y tóxicos (**PBT**) señalados por la Agencia de Protección Ambiental de EE.UU. (EPA): dioxinas y furanos, toxafeno, PCB, Mirex, mercurio y sus compuestos, octaclorostireno, alquilo de plomo, DDT, hexaclorobenceno, aldrina o dieldrina, benzopireno y clordano. **Sin butilo:** No contiene 2-butoxietanol (butilo).
Sin modificadores endocrinos: De acuerdo con la información proporcionada por los fabricantes de todos los ingredientes empleados en la fabricación de este producto, ninguno de los ingredientes usados en este producto contiene APE, OPE, NPE o DBP.

SECCIÓN 12: INFORMACIÓN ECOLÓGICA

Todos los componentes de este producto son fácilmente biodegradables basados en las pruebas de detección de la OCDE modificada. Después de utilizar este producto, que se va a deshacer de los sistemas de alcantarillado y / o el medio ambiente. No contiene nonil fenol etoxilados y alquilfenoles etoxilados. Este producto no contiene compuestos que agotan el ozono con cloro como se especifica en el Protocolo de Montreal. Este producto no contiene paradiclorobenceno 1,4-dioxano, el hipoclorito de sodio, NTA o EDTA sódico.

SECCIÓN 13: CONSIDERACIONES PARA EL DESECHO

Información de eliminación de residuos: El producto desechado no es un desperdicio peligroso de acuerdo con la Ley de Conservación y Recuperación de Recursos de EE.UU. (RCRA), Título 40, Artículo 261 del Código de Reglamentos Federales de EE.UU. (CFR). Deséchese en cumplimiento con todas las leyes y reglamentos federales, estatales y locales.

SECCIÓN 14: INFORMACIÓN SOBRE TRANSPORTE

EMERGENCIA DEL DEPARTAMENTO DE TRANSPORTE DE EE.UU. (DOT) LAS 24 HORAS: 1-888-322-0912

Clase de riesgo del DOT: No regulado. **ETIQUETA DEL DOT:** Ninguna

Nombre para embarque del DOT: Compuesto, líquido limpiador

SECCIÓN 15: INFORMACIÓN NORMATIVA

Este producto no contiene componentes actualmente reportables o que estén enlistados como carcinógenos por el Programa Nacional de Toxicología de EE.UU. (NTP), la Agencia Internacional para la Investigación sobre el Cáncer (IARC) o la Administración de Seguridad y Salud Ocupacional de EE.UU. (OSHA); bajo la Ley de Responsabilidad, Compensación y Recuperación Ambiental de EE.UU. (CERCLA) de 1980; bajo los Artículos 302/304 o 313 del Título III de la Ley de Reautorización y Enmiendas de Superfondo de EE.UU. (SARA); o en la PROPUESTA 65 DE CALIFORNIA. Todos los componentes de este producto están enlistados o han sido excluidos del Inventario de Sustancias Químicas de la Ley de Control de Sustancias Tóxicas de EE.UU. (TSCA).

Artículos 311 y 312 del Título III de la Ley SARA:

Nombre químico	CAS No.	* Categorías de riesgo
Glicol éter BNDP	29911-28-2	A
Ethanol	64-17-5	A, C, F

* Las cinco categorías de riesgo son las siguientes: F = RIESGO DE INCENDIO; S = LIBERACIÓN REPENTINA DE PRESIÓN; R = REACTIVO; A = RIESGO INMEDIATO PARA LA SALUD (AGUDO); C = RIESGO RETRASADO PARA LA SALUD (CRÓNICO)

Derecho a Saber de MASSACHUSETTS – Los siguientes componentes de este material están incluidos en la Lista de Sustancias Peligrosas de Massachusetts y están presentes a los niveles reportables o por encima de ellos:

Nombre químico	CAS No.	Concentración máxima típica
Ethanol	64-17-5	5%

Derecho a Saber de NUEVA JERSEY – Los siguientes componentes de este material están incluidos en la Lista de Sustancias Peligrosas de Nueva Jersey y están presentes a los niveles reportables o por encima de ellos:

<u>Nombre químico</u>	<u>CAS No.</u>	<u>Concentración máxima típica</u>
Ethanol	64-17-5	5%

Derecho a Saber de PENNSILVANIA – Los siguientes componentes de este material están incluidos en la Lista de Sustancias Peligrosas de Pensilvania y están presentes a los niveles reportables o por encima de ellos:

<u>Nombre químico</u>	<u>CAS No.</u>	<u>Concentración máxima típica</u>
Etanol	64-17-5	5%

SECCIÓN 16: OTRA INFORMACIÓN

Este producto ha sido formulado en asociación con la Iniciativa del Programa de Diseño para el Medio Ambiente (DfE) de la EPA.

Al usar éste o cualquier otro producto químico, siempre siga cuidadosamente las instrucciones de la etiqueta. Si desea más información acerca de este producto, comuníquese a Staples al teléfono 1-888-322-0912 o visite nuestra página Web www.staples.com. Conserve las Hojas de Datos de Seguridad de Materiales archivadas y organizadas en un área accesible para los trabajadores de acuerdo con las Normas de Comunicación de Riesgos de la OSHA.

Este MSDS fue elaborado con el único objeto y fin previsto de cumplir con la Norma de Comunicación de Riesgos de la OSHA. Toda la información contenida en esta Hoja de Datos de Seguridad de Material es proporcionada al leal saber y entender de Staples Contract & Commercial, Inc. No existe garantía alguna respecto a esta información, expresa o implícita, incluyendo garantías de comerciabilidad o idoneidad para un objeto en particular. Los usuarios son responsables de verificar la información bajo sus propias condiciones de operación a fin de determinar si los productos enlistados en el MSDS son apropiados para el uso previsto. Asimismo, los usuarios son responsables de cumplir con todas las leyes y reglamentos que puedan requerir el receptor de la información y el uso de los productos que acompañan este MSDS.

1420 SEABOARD INDUSTRIAL BLVD.

ATLANTA, GA 30318

SECTION 2. HAZARDS IDENTIFICATION

*HAZARD DETERMINATION SYSTEM (HDS):

HEALTH 1

FLAMMABILITY 2

REACTIVITY 0

EMERGENCY OVERVIEW:

WARNING!

COMBUSTIBLE LIQUID AND VAPOR. CAUSES EYE IRRITATION.

HARMFUL IF SWALLOWED.

NOTE:

MSDS DATA PERTAINS TO THE PRODUCT AS DELIVERED IN THE ORIGINAL SHIPPING CONTAINER(S). RISK OF ADVERSE EFFECTS ARE LESSENERED BY FOLLOWING ALL PRESCRIBED SAFETY PRECAUTIONS, INCLUDING THE USE OF PROPER PERSONAL PROTECTIVE EQUIPMENT.

ACUTE EFFECTS:

ROUTES OF ENTRY: DERMAL CONTACT. INHALATION.

EYES:

CAUSES EYE IRRITATION. INFLAMMATION OF THE EYE IS CHARACTERIZED BY REDNESS, WATERING AND ITCHING.

SKIN:

MAY CAUSE SKIN IRRITATION. SKIN INFLAMMATION IS CHARACTERIZED BY ITCHING, SCALING, OR REDDENING.

INHALATION:

AVOID BREATHING VAPORS, SPRAY OR MISTS. OVER-EXPOSURE BY INHALATION MAY CAUSE RESPIRATORY IRRITATION. CAN CAUSE CENTRAL NERVOUS SYSTEM (CNS) DEPRESSION.

INGESTION:

HARMFUL IF SWALLOWED. ASPIRATION HAZARD IF SWALLOWED. CAN ENTER LUNGS AND CAUSE DAMAGE.

CHRONIC EFFECTS:

PROLONGED OR REPEATED CONTACT CAN DEFAT THE SKIN AND LEAD TO IRRITATION, CRACKING AND/OR DERMATITIS.

PRODUCT/INGREDIENT NAME: NOT AVAILABLE.

ADDITIONAL INFORMATION: SEE TOXICOLOGICAL INFORMATION (SECTION 11)

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

LIGHT ALIPHATIC NAPHTHA; SOLVENT NAPHTHA (PETROLEUM), MEDIUM ALIPHATICS	64742-88-7	90 - 100
--	------------	----------

SECTION 4. FIRST AID MEASURES

EYE CONTACT:

IMMEDIATELY FLUSH EYES WITH PLENTY OF WATER, OCCASIONALLY LIFTING THE UPPER AND LOWER EYELIDS. CHECK FOR AND REMOVE ANY CONTACT LENSES. CONTINUE TO RINSE FOR AT LEAST 10 MINUTES. GET MEDICAL ATTENTION IMMEDIATELY.

SKIN CONTACT:

FLUSH AFFECTED SKIN WITH PLENTY OF WATER. REMOVE CONTAMINATED CLOTHING AND SHOES. WASH CLOTHING BEFORE REUSE. GET MEDICAL ATTENTION IF IRRITATION DEVELOPS.

INHALATION:

MOVE EXPOSED PERSON TO FRESH AIR. IF BREATHING IS DIFFICULT, GIVE OXYGEN. IF NOT BREATHING, GIVE ARTIFICIAL RESPIRATION. GET MEDICAL ATTENTION.

INGESTION:

ASPIRATION HAZARD IF SWALLOWED. CAN ENTER LUNGS AND CAUSE DAMAGE. DO NOT INDUCE VOMITING UNLESS DIRECTED TO DO SO BY MEDICAL PERSONNEL. IF VOMITING OCCURS, THE HEAD SHOULD BE KEPT LOW SO THAT VOMIT DOES NOT ENTER THE LUNGS.

IF AFFECTED PERSON IS CONSCIOUS, GIVE PLENTY OF WATER TO DRINK. NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. GET MEDICAL ATTENTION IMMEDIATELY.

SECTION 5. FIRE FIGHTING MEASURES

NATIONAL FIRE PROTECTION ASSOCIATION (U.S.A.):

1
2
0

FLASH POINT:

CLOSED CUP: 61.667 DEG. C (143 DEG. F) (PENSKY-MARTENS.)

FLAMMABLE LIMITS:

LOWER: 1%
UPPER: 7%

FLAMMABILITY: COMBUSTIBLE LIQUID.

FIRE HAZARD:

COMBUSTIBLE LIQUID. IN A FIRE OR IF HEATED, A PRESSURE INCREASE WILL OCCUR AND THE CONTAINER MAY BURST, WITH THE RISK OF A SUBSEQUENT EXPLOSION. THE VAPOR/GAS IS HEAVIER THAN AIR AND WILL SPREAD ALONG THE GROUND. VAPORS MAY ACCUMULATE IN LOW OR CONFINED AREAS OR TRAVEL A CONSIDERABLE DISTANCE TO A SOURCE OF IGNITION AND FLASH BACK.

FIRE-FIGHTING PROCEDURES: USE DRY CHEMICAL, CO2, WATER SPRAY (FOG) OR FOAM.

SECTION 6. ACCIDENTAL RELEASE MEASURES

SPILL CLEAN UP:

ELIMINATE ALL IGNITION SOURCES. PUT ON APPROPRIATE PERSONAL PROTECTIVE EQUIPMENT (SEE SECTION 8). STOP LEAK IF WITHOUT RISK. MOVE CONTAINERS FROM SPILL AREA. DILUTE WITH WATER AND MOP UP IF WATER-SOLUBLE OR ABSORB WITH AN INERT DRY MATERIAL AND PLACE IN AN APPROPRIATE WASTE DISPOSAL CONTAINER. USE SPARK-PROOF TOOLS AND EXPLOSION-PROOF EQUIPMENT.

SECTION 7. HANDLING AND STORAGE

HANDLING:

PUT ON APPROPRIATE PERSONAL PROTECTIVE EQUIPMENT (SEE SECTION 8). AVOID CONTACT WITH EYES, SKIN AND CLOTHING. DO NOT BREATHE VAPOR OR MIST. DO NOT INGEST. USE ONLY WITH ADEQUATE VENTILATION. STORE AND USE AWAY FROM HEAT, SPARKS, OPEN FLAME OR ANY OTHER IGNITION SOURCE. WASH THOROUGHLY AFTER HANDLING. DO NOT REUSE CONTAINER.

STORAGE:

STORE IN ORIGINAL CONTAINER PROTECTED FROM DIRECT SUNLIGHT IN A DRY, COOL AND WELL-VENTILATED AREA, AWAY FROM INCOMPATIBLE MATERIALS (SEE SECTION 10) AND FOOD AND DRINK. ELIMINATE ALL IGNITION SOURCES. KEEP CONTAINER TIGHTLY CLOSED AND SEALED UNTIL READY FOR USE.

STORE BETWEEN THE FOLLOWING TEMPERATURES:

40 DEG. F - 120 DEG. F (4.4 DEG. C - 49 DEG. C). KEEP OUT OF THE REACH OF CHILDREN.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

PRODUCT NAME

EXPOSURE LIMITS

LIGHT ALIPHATIC NAPHTHA; SOLVENT
 NAPHTHA (PETROLEUM), MEDIUM
 ALIPHATICS

ACGIH TLV (UNITED STATES).
 TWA: 100 PPM 8 HOUR(S).

SUPPLIER SUGGESTED TLV (UNITED STATES).
 TWA: 100 PPM 8 HOUR(S).

PERSONAL PROTECTIVE EQUIPMENT (PPE):

SAFETY GLASSES
 GLOVES

EYES: SAFETY GLASSES.

BODY: WEAR APPROPRIATE PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT.
 RECOMMENDED: NEOPRENE GLOVES. RUBBER GLOVES. NITRILE GLOVES.

RESPIRATORY:

USE WITH ADEQUATE VENTILATION. PROVIDE EXHAUST VENTILATION OR OTHER ENGINEERING CONTROLS TO KEEP THE AIRBORNE CONCENTRATIONS OF VAPORS BELOW THEIR RESPECTIVE OCCUPATIONAL EXPOSURE LIMITS. WEAR APPROPRIATE RESPIRATOR WHEN VENTILATION IS INADEQUATE.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

PHYSICAL STATE: LIQUID.

COLOR: CLEAR. COLORLESS.

pH: NOT APPLICABLE

ODOR: SOLVENT. (SLIGHT)

BOILING POINT: 186.67 DEG. C (368 DEG. F)

VAPOR PRESSURE: 0.067 KPA (0.5 MMHg)

SPECIFIC GRAVITY: 0.79

VAPOR DENSITY: >1 (AIR = 1)

SOLUBILITY:

INSOLUBLE IN THE FOLLOWING MATERIALS: COLD WATER.

EVAPORATION RATE: 0.14 (BUTYL ACETATE. = 1)

VOC (CONSUMER): 100% (789 G/L; 6.58 LBS/GAL)

SECTION 10. STABILITY AND REACTIVITY

STABILITY AND REACTIVITY: THE PRODUCT IS STABLE.

INCOMPATIBILITY: KEEP AWAY FROM HEAT, SPARKS AND FLAME.

REACTIVE OR INCOMPATIBLE WITH THE FOLLOWING MATERIALS: OXIDIZING MATERIALS.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR.

HAZARDOUS DECOMPOSITION PRODUCTS: CARBON OXIDES (CO, CO2)

SECTION 11. TOXICOLOGICAL INFORMATION

ACUTE TOXICITY: NOT AVAILABLE.

SECTION 12. ECOLOGICAL INFORMATION

ENVIRONMENTAL EFFECTS: NO KNOWN SIGNIFICANT EFFECTS OR CRITICAL HAZARDS.

AQUATIC ECOTOXICITY: NOT AVAILABLE.

SECTION 13. DISPOSAL CONSIDERATIONS

WASTE INFORMATION:

WASTE MUST BE DISPOSED OF IN ACCORDANCE WITH FEDERAL, STATE AND LOCAL ENVIRONMENTAL CONTROL REGULATIONS. CONSULT YOUR LOCAL OR REGIONAL AUTHORITIES FOR ADDITIONAL INFORMATION.

WASTE STREAM: NON-HAZARDOUS WASTE

SECTION 14. TRANSPORT INFORMATION

REGULATORY INFORMATION	UN NUMBER	PROPER SHIPPING NAME	CLASSES	PG*	LABEL
DOT CLASSIFICATION	NOT REGULATED.	NOT A DOT CONTROLLED MATERIAL (UNITED STATES).			

IMDG CLASS

NOTE:
DOT CLASSIFICATION APPLIES TO MOST PACKAGE SIZES. FOR SPECIFIC CONTAINER SIZE CLASSIFICATIONS OR FOR SIZE EXCEPTIONS, REFER TO THE BILL OF LADING WITH YOUR SHIPMENT.

PG*: PACKING GROUP

SECTION 15. REGULATORY INFORMATION

U.S. FEDERAL REGULATIONS:

SARA 313 TOXIC CHEMICAL NOTIFICATION AND RELEASE REPORTING:
NO PRODUCTS WERE FOUND.

CLEAN WATER ACT (CWA) 307: NO PRODUCTS WERE FOUND.

CLEAN WATER ACT (CWA) 311: NO PRODUCTS WERE FOUND.

CLEAN AIR ACT (CAA) 112 REGULATED TOXIC SUBSTANCES: NO PRODUCTS WERE FOUND.

ALL COMPONENTS OF THIS PRODUCT ARE LISTED OR EXEMPT FROM LISTING ON TSCA INVENTORY.

STATE REGULATIONS:

CALIFORNIA PROP 65: NO PRODUCTS WERE FOUND.

SECTION 16. OTHER INFORMATION

TO THE BEST OF OUR KNOWLEDGE, THE INFORMATION CONTAINED HEREIN IS ACCURATE. HOWEVER, NEITHER THE ABOVE NAMED SUPPLIER NOR ANY OF ITS SUBSIDIARIES ASSUMES ANY LIABILITY WHATSOEVER FOR THE ACCURACY OR COMPLETENESS OF THE INFORMATION CONTAINED HEREIN.

FINAL DETERMINATION OF SUITABILITY OF ANY MATERIAL IS THE SOLE RESPONSIBILITY OF THE USER. ALL MATERIALS MAY PRESENT UNKNOWN HAZARDS AND SHOULD BE USED WITH CAUTION. ALTHOUGH CERTAIN HAZARDS ARE DESCRIBED HEREIN, WE CANNOT GUARANTEE THAT THESE ARE THE ONLY HAZARDS THAT EXIST.

*NOTE :

HAZARD DETERMINATION SYSTEM (HDS) RATINGS ARE BASED ON A 0-4 RATING SCALE, WITH 0 REPRESENTING MINIMAL HAZARDS OR RISKS, AND 4 REPRESENTING SIGNIFICANT HAZARDS OR RISKS ALTHOUGH THESE RATINGS ARE NOT REQUIRED ON MSDSS UNDER 29 CFR 1910.1200, THE PREPARER MAY CHOOSE TO PROVIDE THEM. HDS RATINGS ARE TO BE USED WITH A FULLY IMPLEMENTED PROGRAM TO RELAY THE MEANINGS OF THIS SCALE.

BUILDINGS 59) (TRIDENT SEAFOODS)

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

Date 3/7/14 Time: 11:30 am

Address: 401 Alexander Ave E, Building 595, Tacoma WA 98421

Building Owner: Port of Tacoma

Occupant Name: Trident Seafoods

Contact Name: Steve Besaw Telephone (work): 253-502-5318

Cell:

How long has owner/tenant/occupant occupied building? 1911

Occupation: Boat Repair and Maintenance

Number of Occupants Adults: 1 Ages: 30 Children: Ages:

BUILDING CONSTRUCTION CHARACTERISTICS:

Building Use: Commercial/Industrial

Building Type: One story X Two storey Other

General Description of Building Construction Materials: Metal, Other

Year Constructed: NA

GARAGE: Do you have an attached garage? Yes No

Has the building been weatherized with any of the following? Insulation, Storm Windows, Energy-Efficient Windows, Other (specify) No

What type of basement does the building have?

Table with 5 columns: None, Finished, Unfinished, Depth below reference point (meters), and checkboxes for Partial, Full, Crawl space.

Number of floors at or above grade:

Depth of basement below grade: ft. Basement Size: ft²

Foundation construction: Poured concrete X Cinder block Stone

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

Any visual evidence of leakage through basement walls or floor

Floor Construction: Poured concrete Wood Earth Brick Other: _____

Floor condition (cracks, drains): _____

Condition at floor/wall joint (if visible): _____

Any exterior openings from the basement:

- Vents
- Fans
- Windows
- Wall openings
- Utility pipe penetrations
- Other: _____

Type of ground cover outside of building: grass / concrete / **asphalt** / other (specify): _____

Sub-slab vapor/moisture barrier in place? Yes / No / **Don't know**

Type of barrier: _____

Do you have a sump?: Yes No

Where: _____

If yes, sealed open NA

If yes, is there water in the sump?: Yes No

Is building serviced with municipal water? Yes No

Do you have a water well?: Yes No Don't know

Well location: _____

Do you drink the water obtained from the well? _____

What do you use the well for?: _____

Do you have a cistern?: Yes No

If yes, describe its location: _____

Do you have a septic system?: Yes No If Yes is it still active Yes No

If yes, describe its location: _____

If yes, describe how septic system is cleaned: _____

Have there ever been a fire in the building?: Yes No

If yes, describe its location and extent: _____

Is there a laundry room located inside the house?: Yes No

If yes, describe its location: _____

Is there a Radon System in the building: Yes No

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

HEATING AND VENTILATION SYSTEM(S) PRESENT:

What type of heating system(s) is/are used in the building?

Hot Air Circulation Heat Pump Steam Radiation Wood Stove
Hot Air Radiation Unvented Kerosene heater Electric Baseboard Other (specific)

Where are they located? _____ None _____

Is there outside air vent for heating system? _____ No _____

What type(s) of fuel(s) are used in this building?

Natural Gas Electric Coal Other (specific)
Fuel Oil Wood Solar

What type of mechanical ventilation systems are present and/or currently operating in the building?

Central Air Conditioning Mechanical Fans Bathroom Ventilation
Fan Kitchen Range Hood Open Windows
Individual Air Conditioning Units Air-to-Air Heat Exchanger Other (specify)

Where are they located? _____ None _____

SOURCES OF CHEMICAL CONTAMINANTS

1. When was the last time dry-cleaned clothes were brought into the building?
 0 to 5 days ago 6 to 10 days ago More than 10 days ago Don't dry-clean

2. How recently were the carpets installed?
 In the last six months More than six months ago No Carpet

3. When was the last time the carpet was cleaned?
 In the last six months More than six months ago Never

4. Was there any recent remodeling or painting done in the building?
 Yes No Details: _____

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

5. Are there any pressed wood products in the building (e.g., hardwood plywood wall paneling, particleboard, fiberboard)? No

6. Are there any new upholstery, drapes, or textiles in the building? No

7. Do you have any spot removers in the building?

Yes No Details: None

8. Do you perform automotive or other vehicle maintenance or repair within the building (e.g., attached garage)?

Yes No Details: None

9. Which of these items are present in the building? (Check all that apply)

<i>Potential VOC Source</i>	<i>Location of Source</i>	<i>Removed 48 hours prior to sampling? (Yes/No/NA)</i>
-----------------------------	---------------------------	--

- Paints or paint thinners
- Gas-powered equipment
- Gasoline storage cans
- Cleaning solvents
- Air fresheners
- Oven cleaners
- Carpet/upholstery cleaners
- Hairspray

Material Safety Data Sheet

1. CHEMICAL PRODUCT AND COMPANY INFORMATION

Chemical Product Name	Sodium Chloride (Salt) - Treated with Yellow Prussiate of Soda (YPS)
Chemical Family	Alkali Metal/Halide
Chemical Name	Sodium Chloride
Formula	NaCl
Molecular Weight	58.44
Commercial Name	Diamond Crystal® Granulated Salt, Flo-Ever® Evaporated Salt - CMF®, Gulf Shore Boat & Boil® Salt, Flo-Ever® Fine Evaporated Salt - CMF®, Top-Flo® Plus Evaporated Salt, Top-Flo® Evaporated Salt, Hi-Tex® Evaporated Salt, Fine Blending Evaporated Salt - YPS Treated, Premier Extra Coarse Flake Salt, Premier Select Coarse Flake Salt, Premier Topping Flake Salt, Premier Fine Flake Salt, Dendritic Salt, Purified Sea Salt with YPS, Private Label Granulated Salt, Seafarer's® Fine Salt

Manufacturer
Cargill Incorporated
Salt Division
P. O. Box 5621
Minneapolis, MN 55440

Emergency Telephone Numbers
CHEMTREC (800) 424-9300

2. COMPOSITION/INFORMATION ON INGREDIENTS

Description
White crystalline solid.

Ingredient Name	Exposure Limits	Concentration (%)
CAS Number Sodium Chloride 7647-14-5		99.9987 - 99.9995
Sodium Ferrocyanide Decahydrate 13601-19-9		0.0005 - 0.0013

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

None for Salt - GRAS Substance (Generally Recognized As Safe)

Potential Health Effects

Route(s) Of Entry: Ingestion, skin/eye contact, inhalation.

Human Effects and Symptoms of Overexposure:

Acute Inhalation: Irritation of the respiratory tract.

Chronic Inhalation: No applicable information found for chronic systemic effects

Acute Skin Contact: Large amounts can cause irritation and if applied to damaged skin, absorption can occur with effects similar to those via ingestion.

Chronic Skin Contact: No applicable information found for chronic systemic effects.

Acute Eye Contact: Irritation with burning and tearing (salt concentrations greater than the normal saline present).

Chronic Eye Contact: No applicable information found for chronic systemic effects.

Acute Ingestion: Intake of large amounts has generally occurred for deliberate reasons: suicide, absorption, and to induce vomiting. The following effects were observed; nausea and vomiting, diarrhea, cramps, restlessness, irritability, dehydration, water retention, nose bleed, gastrointestinal tract damage, fever, sweating, sunken eyes, high blood pressure, muscle weakness, dry mouth and nose, shock, cerebral (fluid on brain) or pulmonary edema (fluid in lungs), blood cell shrinkage, and brain damage (due to dehydration of brain cells). Death is generally due to cardiovascular collapse or CNS damage. Less than a few grams would not be harmful. For larger quantities, drink large amounts of water or milk.

Chronic Ingestion: No applicable information found for chronic systemic effects.

Carcinogenicity

NTP: Not listed as a carcinogen or mutagen.

IARC: Not listed as a carcinogen or mutagen.

OSHA: Not listed as a carcinogen or mutagen.

Medical Conditions Aggravated by Exposure: In some cases of confirmed hypertension, ingestion may result in elevated blood pressure.

HMIS Health: 1, Flammability: 0, Reactivity: 0, Protective Equipment: A

4. FIRST AID MEASURES

First Aid For Eyes: For eye contact, flush with water immediately, lifting eyelids occasionally.

First Aid For Skin: Remove clothing from affected area. Wash skin thoroughly. Rinse carefully.

First Aid For Inhalation: If person breathes large quantities, remove to fresh air at once. If breathing stops, apply artificial respiration immediately.

First Aid For Ingestion: Less than a few grams would not be harmful. For larger quantities, drink large amounts of water or milk.

5. FIRE AND MEASURES

Flash Point: N/A

Extinguishing Media: N/A. This product is nonflammable.

Special Fire Fighting Procedures: N/A.

6. ACCIDENTAL RELEASE MEASURES

Spill or Leak Procedures: Contain spills to prevent contamination of water supply or sanitary sewer system. Vacuum or sweep into containers for proper disposal.

7. HANDLING AND STORAGE

Storage Temperature (min./max.): Avoid humid or wet conditions as product will cake and become hard.

Special Sensitivity: Avoid contact with strong acids.

Handling and Storage Precautions: Becomes hygroscopic at 70% Relative Humidity

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Eye Protection Requirements: Eyeglasses or goggles should be worn in dusty areas.

Skin Protection Requirements: Protective clothing may be worn in dusty areas, but is generally not required.

Respiratory/Ventilation Requirements: NIOSH/MSHA approved respirator for particulates.

Exposure Limits: Not listed.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical Form: White crystalline solid with slight halogen odor.

Color: White crystalline solid

Odor: Halogen odor

Boiling Point (760mm Hg) (°C): 760 mm Hg. 1465 degrees C.

Melt Point/Freeze Point (°C): 801 degrees C.

PH: 4.0 – 9.0

Solubility In Water (g/cc, %): 26.4%

Specific Gravity (H₂O=1): 2.16 (H₂O)

Bulk Density: 53-83 Lbs/Ft³

% Volatile By Weight: N/A

Vapor Pressure (mm Hg/747°C): = 2.4

Vapor Density (Air=1): (Air=1) N/A

10. REACTIVITY

Stability: Stable

Incompatibilities: Avoid contact with strong acids. Becomes corrosive to metals when wet.

Decomposition Products: May evolve chlorine gas when in contact with strong acids.

11. TOXICOLOGICAL INFORMATION

Description: Not Listed

12. ECOLOGICAL INFORMATION

Ecotoxicity: Not Listed.

Environmental Degradation: Not Listed.

13. DISPOSAL CONSIDERATIONS

Waste Disposal Method: Follow applicable Federal, state and local regulations.

BUILDINGS 59* (TRIDENT SEAFOODS)

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

Date 3/7/14 Time: 11:30 am

Address: 401 Alexander Ave E, Building 596, Tacoma WA 98421

Building Owner: Port of Tacoma

Occupant Name: Trident Seafoods

Contact Name: Steve Besaw Telephone (work): 253-502-5318

Cell:

How long has owner/tenant/occupant occupied building? 1911

Occupation: Boat Repair and Maintenance

Number of Occupants Adults: 75-300 Ages: 25-55 Children: Ages:

BUILDING CONSTRUCTION CHARACTERISTICS:

Building Use: Commercial/Industrial

Building Type: One story Two storey X Other

General Description of Building Construction Materials: Metal, Other

Year Constructed: NA

GARAGE: Do you have an attached garage? Yes No

Has the building been weatherized with any of the following? Insulation, Storm Windows, Energy-Efficient Windows, Other (specify) No

What type of basement does the building have?

Table with 5 columns: None, Finished, Unfinished, Depth below reference point (meters), and checkboxes for Partial, Full, Crawl space.

Number of floors at or above grade:

Depth of basement below grade: ft. Basement Size: ft²

Foundation construction: Poured concrete X Cinder block Stone

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

Any visual evidence of leakage through basement walls or floor

Floor Construction: Poured concrete Wood Earth Brick Other: _____

Floor condition (cracks, drains): _____

Condition at floor/wall joint (if visible): _____

Any exterior openings from the basement:

- Vents
- Fans
- Windows
- Wall openings
- Utility pipe penetrations
- Other: _____

Type of ground cover outside of building: grass / **concrete** / asphalt / other (specify): _____

Sub-slab vapor/moisture barrier in place? Yes / No / **Don't know**

Type of barrier: _____

Do you have a sump?: Yes No

Where: _____

If yes, sealed open NA

If yes, is there water in the sump?: Yes No

Is building serviced with municipal water? Yes No

Do you have a water well?: Yes No Don't know

Well location: _____

Do you drink the water obtained from the well? _____

What do you use the well for?: _____

Do you have a cistern?: Yes No

If yes, describe its location: _____

Do you have a septic system?: Yes No If Yes is it still active Yes No

If yes, describe its location: _____

If yes, describe how septic system is cleaned: _____

Have there ever been a fire in the building?: Yes No

If yes, describe its location and extent: _____

Is there a laundry room located inside the house?: Yes No

If yes, describe its location: _____

Is there a Radon System in the building: Yes No

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

HEATING AND VENTILATION SYSTEM(S) PRESENT:

What type of heating system(s) is/are used in the building?

Hot Air Circulation Heat Pump Steam Radiation Wood Stove
Hot Air Radiation Unvented Kerosene heater **Electric Baseboard** Other (specific)

Where are they located? _____ office _____

Is there outside air vent for heating system? _____ No _____

What type(s) of fuel(s) are used in this building?

Natural Gas **Electric** Coal Other (specific)
Fuel Oil Wood Solar

What type of mechanical ventilation systems are present and/or currently operating in the building?

Central Air Conditioning **Mechanical Fans** Bathroom Ventilation
Fan Kitchen Range Hood Open Windows
Individual Air Conditioning Units Air-to-Air Heat Exchanger Other (specify)

Where are they located? _____

SOURCES OF CHEMICAL CONTAMINANTS

1. When was the last time dry-cleaned clothes were brought into the building?
 0 to 5 days ago 6 to 10 days ago More than 10 days ago Don't dry-clean

2. How recently were the carpets installed?
 In the last six months More than six months ago No Carpet

3. When was the last time the carpet was cleaned?
 In the last six months More than six months ago Never

4. Was there any recent remodeling or painting done in the building?
 Yes No Details: _____

FORM 1: BUILDING PHYSICAL SURVEY QUESTIONNAIRE

5. Are there any pressed wood products in the building (e.g., hardwood plywood wall paneling, particleboard, fiberboard)? No

6. Are there any new upholstery, drapes, or textiles in the building? No

7. Do you have any spot removers in the building?

Yes No Details: None

8. Do you perform automotive or other vehicle maintenance or repair within the building (e.g., attached garage)?

Yes No Details: None

9. Which of these items are present in the building? (Check all that apply)

<i>Potential VOC Source</i>	<i>Location of Source</i>	<i>Removed 48 hours prior to sampling? (Yes/No/NA)</i>
-----------------------------	---------------------------	--

- Paints or paint thinners**
- Gas-powered equipment
- Gasoline storage cans
