

Boulevard Park—State Environmental Policy Act Comment Period: August 7—21, 2017

The City of Bellingham (City) plans to conduct maintenance work on a portion of the Boulevard Park shoreline to repair damage from winter storms. Crews will stabilize the shoreline and remove an existing dock.

Under the State Environmental Policy Act (SEPA), the Department of Ecology (Ecology) has determined that the proposed work will not have significant adverse impacts on the environment. You can view Ecology's determination and associated documents at the locations indicated on the flip side of this postcard.

This portion of the Boulevard Park shoreline is located within the South State Street Manufactured Gas Plant contaminated site, which the City and Puget Sound Energy (PSE) are currently investigating with Ecology oversight under state cleanup law (Model Toxics Control Act). Before shoreline maintenance work can begin, the City, PSE and Ecology will amend an existing legal agreement. The City and PSE will then prepare a Work Plan for Ecology review and approval. These documents will be published at a future date for public review. You can view more information about the site at: <http://bit.ly/SouthStateStreet>
