Re: Notice of Potential Liability under the Model Toxics Control Act for the Release of Hazardous Substances at the following Site:

Site Name: Chevron Station 97348
Site Address: 500 and 510 N. Wenatchee Avenue, Wenatchee
(Formerly 502 N. Wenatchee Avenue)
Facility/Site No.: 15685336
Cleanup Site ID No: 5586

Dear Ms. Cameron:

Under the Model Toxics Control Act (MTCA), chapter 70.105D RCW, which governs the cleanup of contaminated sites in Washington State, the Department of Ecology (Ecology) may identify persons that it finds are liable for the release of hazardous substances at a site. Before making such a finding, Ecology must provide persons with notice and an opportunity to comment on the proposed finding. Any person whom Ecology finds, based on credible evidence, to be liable is known as a “potentially liable person” or “PLP”.

Proposed Finding of Liability

Based on credible evidence, Ecology is proposing to find Chevron Environmental Management Company liable under RCW 70.105D.040 for the release of hazardous substances at the Chevron Station 97348 site (Site). This proposed finding is based on the following evidence:

1. Releases of petroleum hydrocarbons (gasoline and oil) to soil and groundwater occurred at the former Chevron Station located at 500 and 510 N. Wenatchee Ave, Wenatchee, Washington, as documented in “Report of Environmental Site Assessment, Chevron Service Station #7348, 502 N Wenatchee Ave, Wenatchee, Washington”, prepared by Groundwater Technology, Inc., dated December 1990; “Report of Underground Storage Tank Closure, Chevron Service Station #7348, 502 N Wenatchee Ave, Wenatchee, Washington”, prepared by Groundwater Technology, Inc., dated April 1991; and in subsequent investigation reports. Additional soil and groundwater investigations were conducted between 2000 and 2007, on behalf of Chevron. No remediation activities have taken place at the Site in the last 27 years, based on review of Ecology’s files. Groundwater monitoring has taken place between 1991 and 2013, as documented in various monitoring reports prepared for Chevron.

2. The most recent groundwater monitoring data in Ecology's file from March and April 2013, includes exceedances of the MTCA Method A cleanup level for carcinogenic polycyclic aromatic hydrocarbons (PAHs). The previous groundwater monitoring round in December 2012, included MTCA Method A exceedances for heavy oil range total petroleum hydrocarbons and lead.
3. A Site hazard assessment was performed by the Department of Ecology (Ecology) in 2014, (reported in a letter dated January 6, 2015) resulted in a Site ranking of 2, on a scale of 1 to 5 (second highest ranking). This ranking indicates a threat to human health and the environment. Cleanup of the Site is therefore required.

Opportunity to Respond to Proposed Finding of Liability

In response to Ecology's proposed finding of liability, you may either:

1. Accept your status as a PLP without admitting liability and expedite the process through a voluntary waiver of your right to comment. This may be accomplished by signing and returning the enclosed form or by sending a letter containing similar information to Ecology;
2. Challenge your status as a PLP by submitting written comments to Ecology within thirty (30) calendar days of the date you receive this letter; or
3. Choose not to comment on your status as a PLP.

Please submit your waiver or written comments to the following address:

Frank P. Winslow
CRO-Toxics Cleanup Program
1250 W Alder Street
Union Gap, WA 98903

After reviewing any comments submitted or after 30 days if no response has been received, Ecology will make a final determination regarding your status as a PLP and provide you with written notice of that determination.

Identification of Other Potentially Liable Persons

If you are aware of any other persons who may be liable for the release of hazardous substances at the Site, Ecology encourages you to provide us with their identities and the reason you believe they are liable. Ecology also suggests you contact these other persons to discuss how you can jointly work together to most efficiently clean up the Site.

Ms. Cheryl Cameron
Chevron Environmental Management Company

Responsibility and Scope of Potential Liability

Please note that Ecology may either conduct or require PLPs to conduct remedial actions to investigate and clean up the release of hazardous substances at a site. PLPs are encouraged to initiate discussions and negotiations with Ecology and the Office of the Attorney General that may lead to an agreement on the remedial action to be conducted.

Please also note that each liable person is strictly liable, jointly and severally, for all remedial action costs and for all natural resource damages resulting from the release of hazardous substances at a site. If Ecology incurs remedial action costs in connection with the investigation or cleanup of real property and those costs are not reimbursed, then Ecology has the authority under RCW 70.105D.055 to file a lien against that real property to recover those costs.

Next Steps in Cleanup Process

In response to the release of hazardous substances at the Site, Ecology intends to conduct the following actions under MTCA:

- Ecology intends to enter negotiation with the cooperative PLPs to enter into an Agreed Order for this Site.

For a description of the process for cleaning up a site under MTCA, please refer to the enclosed fact sheet.

Ecology's policy is to work cooperatively with PLPs to accomplish the prompt and effective cleanup of contaminated sites. Please note that your cooperation in planning or conducting remedial actions at the Site is not an admission of guilt or liability.

If you have any questions regarding this letter or if you would like additional information regarding the cleanup of contaminated sites, please call me at (509) 454-7835. Thank you for your cooperation.

Sincerely,

Frank P. Winslow
