Effective September 11, 2017, Ecology has determined that no further action is necessary (at the Initial Investigation stage) due to independent remediation.

The following reports were submitted as documentation of a completed cleanup:

- Soil Remediation Report, Redmond, WA. Vestige Environmental, Woodinville, WA. June 30, 2015.

Ecology reviewed the documentation regarding the cleanup action. There is sufficient evidence that this cleanup was conducted to MTCA Method A cleanup levels for unrestricted land use. The Pollution Liability Insurance Agency (PLIA), has recommended no further action at this site, and Ecology concurs.

Additional information about PLIA and Ecology's review of this site cleanup may be accessed here: <https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=14381>.
