Re: Petition for Removal from the Hazardous Sites List
Former Truck City Site
3216 Old Highway 99 South, Mount Vernon, Washington
Facility Site No. 2673/Cleanup Site ID 5176/Agreed Order 15 200056 2

Dear Mr. Myers:

On behalf of Skagit County, Maul Foster & Alongi, Inc. (MFA) is submitting this Petition for Removal from the Hazardous Sites List for the above referenced Site.

Ecology may remove a site from the Hazardous Sites List when it determines that all remedial actions have been completed and compliance with cleanup standards has been achieved in accordance with Washington Administrative Code (WAC) 173-340-330(7)(a)(i). Site owners may petition Ecology for removal by providing thorough documentation of all investigations, cleanup, and compliance monitoring evidencing that the criteria for removal have been met (WAC 173-340-330(7)(b)).

Skagit County has completed all remedial actions at the Site as required under the Agreed Order for Final Cleanup Action and Compliance Monitoring. The final tasks completed for the Site are documented in the attached Final Cleanup Action Report, which demonstrates that compliance with the cleanup standards has been achieved. Hence, we request that Ecology remove the Site from the Hazardous Sites List.

We look forward to receiving your verification and approval of this petition based on the successful cleanup of the Site. Please do not hesitate to contact the undersigned should you have any questions.

Sincerely,

Maul Foster & Alongi, Inc.
