Re: Final Warning Letter: December 22, 1998 Underground Storage Tank (UST)  
Upgrade Deadline and Facility Compliance Tags  
UST Site Number 10664  
Clark County

Dear Tank Owner/Operator:

According to our records, your facility has not fulfilled the December 22, 1998 upgrade requirements for underground storage tanks (USTs). Without the upgrades noted on the enclosed report, you will not be eligible to receive a facility compliance tag. **You can not legally have petroleum delivered to your USTs after December 22 1998, if you don't have a compliance tag displayed properly at your facility.** The Pollution Liability Insurance Agency has informed the Washington State Department of Ecology (Ecology) that as a condition of continuing your pollution liability insurance you must be in compliance with all applicable laws and regulations. If the information listed on the report is incorrect, please respond by November 30 so we will have time to correct our data and get you a compliance tag before the December 22 deadline.

When the upgrade information is submitted to Ecology, we will issue a compliance tag for your facility. The purpose of the compliance tag effort is to make it clear to people delivering fuel, Ecology inspectors, and the public which facilities have upgraded their USTs and which ones have not. The compliance tag must be displayed at the emergency shutoff switch or in the absence of such a device, in close proximity to the fill pipes and clearly identifiable to the persons delivering fuel, or they can not legally deliver fuel.

Last summer the Department of Ecology sent owners and operators of USTs a letter informing them that Ecology is implementing a facility compliance tagging program for USTs. The necessary forms and instructions were included with that letter. In order to receive a compliance tag for your facility you need to meet the following requirements:

◆ All regulated USTs on a facility must be upgraded with spill, overflow, and corrosion protection (tanks and piping), have pollution liability insurance, and master business license UST

endorsements, or

◆ USTs must be temporarily or permanently closed. However, USTs in this category will not receive a compliance tag.

The enclosed report shows current Ecology information taken from our UST database. The report also shows whether this facility is eligible to receive a compliance tag or gives the reasons why it is not eligible.

In an effort to update our files and give tank owners credit for upgrades that have been performed, please provide the following applicable information:

◆ If the tanks have been replaced, please provide closure information for the old tanks and register the new tanks with the Department of Licensing.

◆ If any tanks have been upgraded, please provide information on the retrofit or cathodic protection checklist, whichever form is applicable.

Ecology is not including previously mailed forms in this mailing. Please call 1-800-826-7716 if you need forms. Ecology will only accept signed forms from International Fire Code Institute certified contractors as proof that a tank and piping system has been upgraded with spill, overfill, and corrosion protection.

**Please provide the required information by November 30, 1998 so that we can update our database and provide your facility with a compliance tag as soon as possible.** Information should be mailed to:

Department of Ecology  
Attn: Lisa Shriver  
Toxics Cleanup Program, UST  
PO Box 47655  
Olympia, WA 98504-7655

Thank you for your assistance and cooperation.  
Your Ecology contact person is Mark Henderson of our Southwest Regional Office.  
Mr. Henderson can be reached at (360) 407-6263.

Sincerely,

Barry Rogowski  
UST Coordinator

Re: UST Site Number 10664

Dear Tank Owner/Operator:

Washington State has passed a new law that affects owners and operators of regulated underground storage tanks (USTs).

The Department of Ecology is implementing a Facility Compliance Tagging program. All owners and/or operators of regulated USTs must have a facility compliance tag properly displayed where fuel distributors can see it at properties with USTs to legally receive delivery of petroleum after December 22, 1998. Ecology is planning to issue compliance tags to all facilities with upgraded underground storage tanks on or before the December 22, 1998, deadline for upgrading. In order to receive a facility compliance tag, all of the regulated USTs at your facility will need to meet the following requirements:

- ◆ All regulated USTs on a facility must be upgraded with spill, overflow, and corrosion protection (tanks and piping), have valid pollution liability insurance, and master business license UST endorsement, or
- ◆ USTs must be temporarily or permanently closed.

Persons delivering petroleum after December 22, 1998, will not legally be permitted to deliver to USTs at facilities that do not have a facility compliance tag properly displayed. The tag must be displayed at the emergency shutoff device or other location visible to the fuel delivery person.

The enclosed report shows the information that Ecology currently has in the UST database for the UST systems at this facility in Washington State. The report also shows whether this facility is eligible to receive a compliance tag or gives reasons why it is ineligible.

In an effort to upgrade our files and give tank owners credit for upgrades that have been performed, please provide the following applicable information. If any of the tanks have been replaced, please provide closure information (enclosures #2 and 3) for the old tanks and register the new tanks with the Department of Licensing (enclosures #4 and 5). If any tanks have been

upgraded, please provide information on the enclosed retrofit or cathodic protection checklist (enclosure #6), whichever form is applicable. The Department understands that your UST's may be in compliance. We are currently in the process of updating our records so that a compliance tag can be issued as soon as possible.

The Department of Ecology will only accept signed forms from International Fire Code Institute certified contractors as proof that a tank and piping system has been upgraded with spill, overfill, and corrosion protection. Enclosed is a list of the current information that Ecology has for USTs at the HOESLY AUTO SERVICE INDIVIDUAL site(s).

Your Ecology contact person is Mark Henderson of our Southwest Regional Office. Mr. Henderson can be reached at (360) 407-6263.

Please provide the required information within 30 days of receiving this notification so that we can update our database and provide your facility with compliance tags as soon as possible. This should be mailed to:

Washington State Department of Ecology  
Attn: Underground Storage Tank Section  
PO Box 47655  
Olympia, WA 98504-7600

Thank you for your assistance and cooperation.

Sincerely,

Barry Rogowski  
UST Coordinator

## NOTICE OF OVERDUE PAYMENT

You were previously billed for the enclosed regulated underground storage tank(s). Payment is now more than 30 days delinquent. This billing is mandated by the Underground Storage Tank Law, Chapter 90.76 RCW. There is potentially a substantial fine for non-payment of the fee. Any disputes of this billing need to be in writing.

Please send a response or the payment to the Department of Ecology, P.O. Box 47655, Olympia, WA 98504-7655. It is very important to include both the invoice number and site number with remittance.

Temporarily closed tanks are still subject to their annual fees. We must received closure documentation for temporarily and/or permanently closed tanks. Permanently closed tanks that have not been closed in accordance with federal and state regulations are also still subject to their annual fees. If you would like to discuss these matters, please call Lisa Shriver at (360) 407-7203.

# WASHINGTON STATE UNDERGROUND STORAGE TANK NOTIFICATION FORM

**IMPORTANT: PLEASE READ ALL INSTRUCTIONS ON PAGES I-1 AND I-2 BEFORE ENTERING INFORMATION.**

- ABOVEGROUND TANKS MUST BE REPORTED IF THE CONNECTED UNDERGROUND PIPING COMPRISES AT LEAST 10% OF THE OVERALL STORAGE SYSTEM (TANK AND PIPING).
- A SEPARATE FORM MUST BE USED FOR EACH SITE, EXCEPT FOR SITES WITH ONLY ONE TANK EACH. SEE THE GENERAL INSTRUCTIONS (PAGE I-2) FOR THE DEFINITION OF A SITE AND DETAILS ON REPORTING SITES WITH ONE TANK EACH.
- THERE IS ROOM IN SECTION VI FOR INFORMATION CONCERNING 15 TANKS. IF YOU HAVE MORE THAN 15 TANKS, PHOTOCOPY BOTH PAGES OF SECTION VI BEFORE ENTERING ANY INFORMATION. (IF YOU HAVE MORE THAN ONE SITE, EITHER OBTAIN MORE FORMS FROM THE DEPARTMENT OF ECOLOGY OR BE SURE TO ALSO PHOTOCOPY THIS PAGE.)
- PLEASE TYPE, OR PRINT IN INK; THE SIGNATURE UNDER "CERTIFICATION" (SECTION V) MUST BE SIGNED IN INK.

DEPT. OF ECOLOGY
