**RE: LANDSBURG MINE SITE
INTERIM GROUNDWATER MONITORING REPORT
NOVEMBER 2017 SAMPLING**

Dear Bill:

Golder Associates Inc. (Golder) completed an interim groundwater monitoring event at the Landsburg Mine Site during November 2017. Groundwater samples were collected from monitoring wells LMW-2, LMW-3, LMW-4, LMW-5, LMW-6, LMW-7, LMW-8, LMW-9, LMW-10, and LMW-11 (Figure 1). Monitoring wells LMW-2, LMW-4 and LMW-10 are completed to monitor shallow and deeper zones within the north end of the Rogers Coal Mine subsidence trench. Monitoring wells LMW-3, and LMW-5 are completed to monitor the shallow (~40 feet depth) and deeper zone (~250 feet depth), respectively, within the Rogers Coal Seam at the south end of the mine. Figure 2 presents a cross-section along the strike at the coal seam that also depicts the location of the monitoring wells. Monitoring well LMW-8 is receiving groundwater immediately before discharge from Portal 3 and the mine access incline at the south end of the Rogers Coal Mine. Surface water samples were collected from the north and south mine portals, Portal 2 and Portal 3, respectively. Groundwater samples were also collected from well LMW-9 and the deep well LMW-11, which monitor groundwater from within the Rogers Coal Mine near its south end. Wells LMW-9 and LMW-11 are receiving groundwater from near the top of the water table and near the bottom of the mine, respectively. Wells LMW-6 and LMW-7 monitor groundwater from the Frasier and Landsburg Coal Mines to the west and east of the Rogers Coal Mine, respectively.

Groundwater sampling was conducted in accordance with the *Compliance Monitoring Plan, Landsburg Mine Site* (Golder 2017)¹, and included the following activities:

- Measurement of static water levels at monitoring wells.
- Well purging to insure sample representativeness with the currently installed dedicated pumping systems.
- Measurement of field parameters including: pH, specific conductance, temperature, dissolved oxygen, redox potential (Eh), and turbidity.
- Collection of representative samples in appropriate containers; dissolved metals samples were field filtered (total metals were not). The dissolved metals samples were not analyzed.

¹ Golder Associates Inc. (Golder). 2017. Compliance Monitoring Plan, Landsburg Mine Site. Exhibit D of the Consent Decree, Redmond, Washington. June 7.

- Analyses of groundwater for volatile organic compounds (VOCs; United States Environmental Protection Agency [EPA] Method 8260C), semi-volatile organic compounds including 1,4-Dioxane (SVOCs, EPA Method 8270D), polychlorinated biphenyls (PCBs; EPA 8082A), pesticides (EPA 8081B), priority pollutant metals (EPA Method 6010C/200.8/7470A Series), and a petroleum hydrocarbon identification scan (NWTPH-HCID).

Appendix A presents the laboratory analytical reports for all analyses. Sampling activities were documented on Sample Integrity Data Sheets (SIDS). Copies of the completed SIDS are provided in Appendix B. Appendix C shows the validated data with added qualifiers. Table 1 presents groundwater depth measurements and elevations that were measured on November 27, 2017. Due to access issues on November 27, the water level in LMW-5 was measured on November 29, 2017 prior to sampling.

Following sample collection, all bottles were sealed, labeled, and placed in an iced cooler until delivery to the laboratory. All groundwater samples from monitoring wells were transported under chain-of-custody procedures to Analytical Resources Incorporated (ARI), of Tukwila, Washington, for analyses. Screening levels are based on maximum contaminant levels (MCLs) or State of Washington Model Toxics Control Act (MTCA) Method A or B groundwater cleanup levels, whichever value is less. In cases where an established MCL or Method A or B Cleanup Level does not exist, a similar (surrogate) compound regulatory screening level is identified for comparison.

The analytical results indicate no significant changes in groundwater conditions from those observed during the remedial investigation (RI) and on-going interim groundwater monitoring conducted since April 1994. Table 2 presents the field parameter measurements and laboratory analytical results for each groundwater sample. Laboratory analyses did not detect any PCBs, pesticides, or petroleum hydrocarbon (HCID) in any of the groundwater samples.

The laboratory data packages underwent data validation. Items of note are provided in a validation memorandum in Appendix C. In general, data were found to be acceptable with minor qualification. Carbon disulfide was detected in the method and trip blanks. Samples with carbon disulfide detections are qualified with U or J+ due to laboratory contamination. The laboratory control sample duplicate (LCSD) for 3-Nitroaniline had recovery below acceptance criteria, therefore samples have the UJ qualifier.

The parameters detected in groundwater or surface water samples during this sampling event were metals, acetone, carbon disulfide, and 1,4-Dioxane.

Metals were detected at concentrations that are naturally occurring, and were consistent with historic concentrations detected at the site. Several groundwater samples from site wells contained iron and manganese concentrations above State of Washington secondary drinking water levels (SMCLs) of 0.3 milligrams per liter (mg/L) and 0.05 mg/L, respectively, which are not health-based standards, but are protective of aesthetic qualities of water. Iron and manganese have been detected in mine groundwater above MTCA cleanup levels in every monitoring event at the site and are naturally occurring metals that are typically associated with groundwater from coal mines (Fuste et al. 1983)². The concentrations of iron and manganese detected during the November 2017 sampling event are similar to concentrations detected during the RI (Golder 1996)³ and the Interim Groundwater Sampling events previously conducted at the site.

The groundwater sample from the deep well (LMW-11) contained total arsenic at a concentration of 5.97 µg/L (0.00597 mg/L), which is less than the Washington State primary drinking water MCL (10 µg/L)

² Fuste, L.A., F.A. Packard, M.O. Fretwell, and D.P. Garland. 1983. Data Supplement To: Quality of Coal Mine Drainage in Washington, 1975-77. Open-File Report 83-205. Tacoma, Washington: US Geological Survey.

³ Golder Associates Inc. (Golder). 1996. Remedial Investigation and Feasibility Study for the Landsburg Mine Site. Landsburg PLP Steering Committee.

and greater than the MTCA Method A groundwater cleanup level (5 µg/L). Arsenic has been detected in groundwater from LMW-11 near or above MTCA cleanup levels during every monitoring event since LMW-11 was installed. Arsenic is also a naturally occurring metal commonly detectable in groundwater, especially in older more stagnant groundwater having low reduction-oxidation (REDOX) and dissolved oxygen levels. The MTCA groundwater cleanup level is based on typical groundwater background levels in the State of Washington. It is believed that the arsenic concentrations are naturally occurring deep within the mine where groundwater is more stagnant and its geochemistry may be different than shallow groundwater within the mine.

The acetone detections in LMW-2, Portal 2, and Portal 3 are estimated (J flagged). The trace level detections are estimated, because the detected concentrations were below the laboratory method reporting limit (MRL) but above the method detection limit (MDL). The acetone detections are significantly lower than the MTCA Method B groundwater cleanup level of 7200 µg/L. Acetone is a common laboratory contaminant, because it is used as a solvent in various laboratory methods.

Carbon disulfide was detected in LMW-10 at a concentration of 0.27 µg/L J+, which is considerably lower than the MTCA Method B groundwater cleanup level for carbon disulfide (800 µg/L). Carbon disulfide has been detected at these low levels in site groundwater in previous sampling events. The detection of carbon disulfide is attributed to being present in the coal bed material as a natural constituent.

1,4-Dioxane, was analyzed for the first time during the November 2017 sampling round. 1,4-Dioxane was detected in LMW-2 (2.0 µg/L) and LMW-4 (2.3 µg/L). 1,4-Dioxane was not detected in the Portal samples or in the other monitoring wells onsite. The low level detections of 1,4-Dioxane were confirmed by resampling LMW-2 and LMW-4 in February 2018. The resampling results were: LMW-2 (2.1 µg/L) and LMW-4 (2.3 µg/L). The detections are being addressed in cooperation with Ecology, and in accordance with the Cleanup Action Plan (Ecology 2017)⁴.

If you have any questions or require any additional information, please contact Gary Zimmerman at (425) 883-0777.

Sincerely,

GOLDER ASSOCIATES INC.

Notes:

NA = Not Analyzed

U - The analyte was not detected above the level of the reporting limit.

UJ - The analyte was not detected above the reporting limit and is estimated.

µS/cm = microsiemens per centimeter

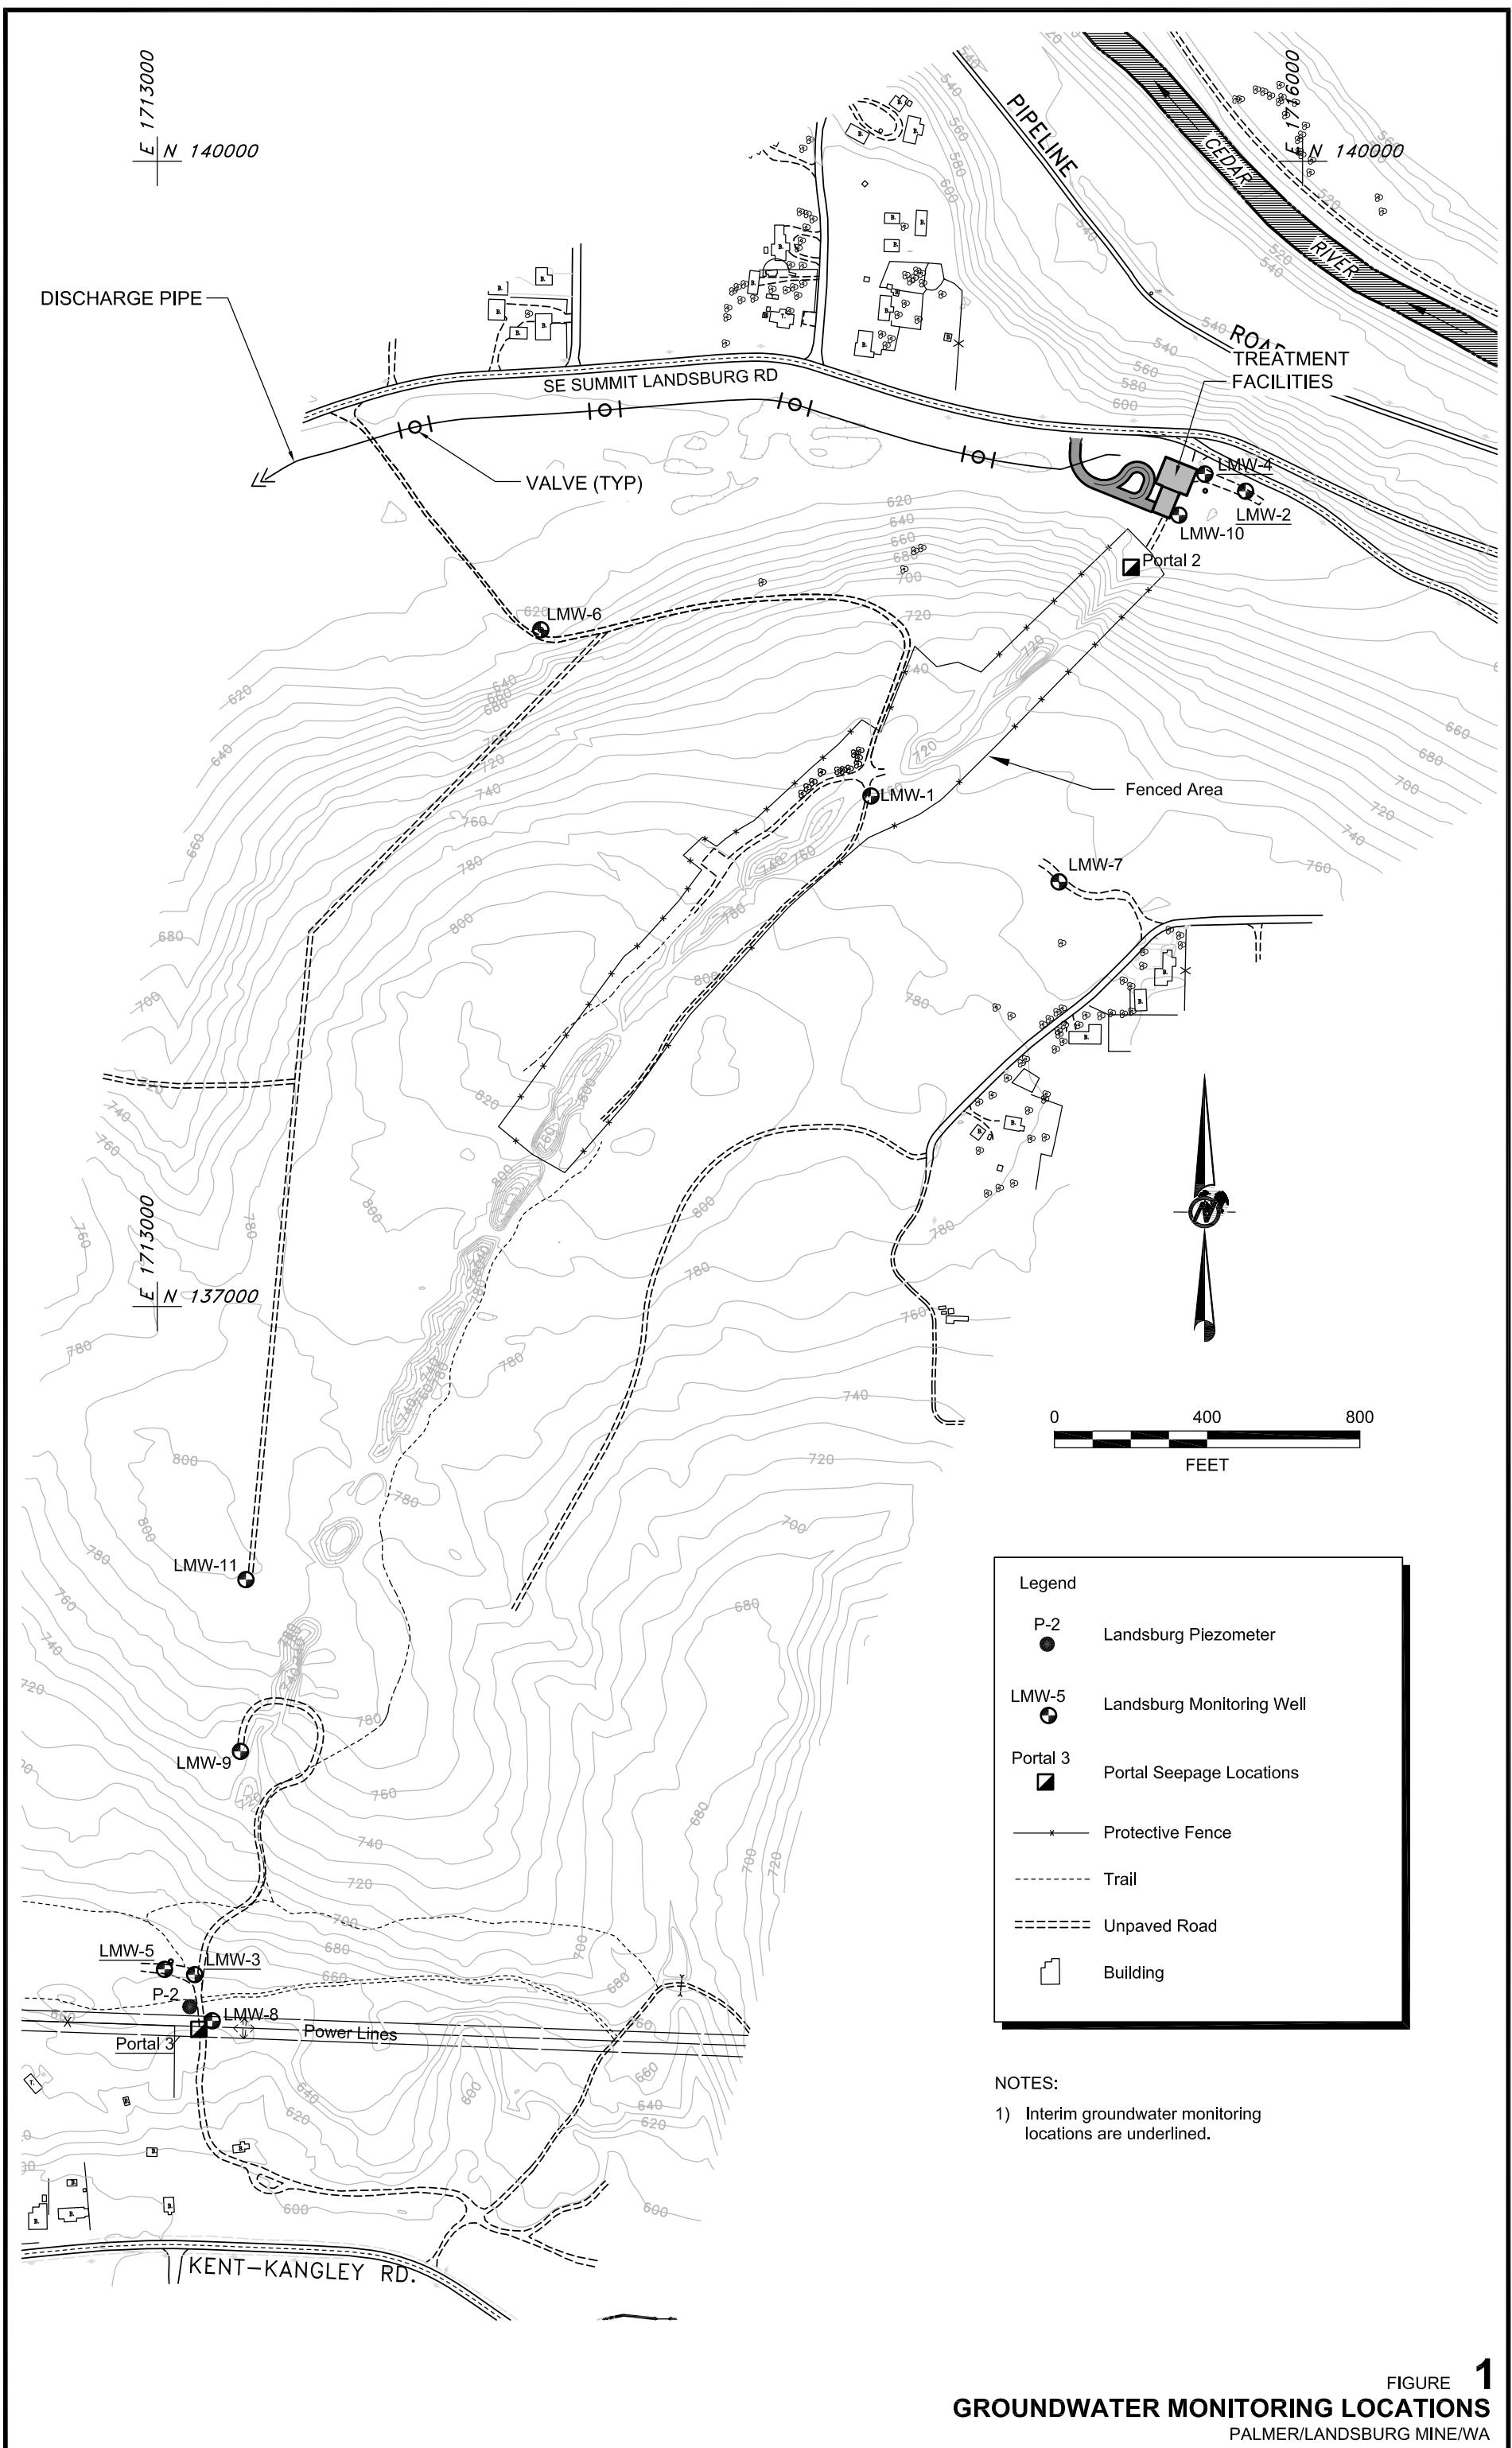

mg/L = milligrams per liter

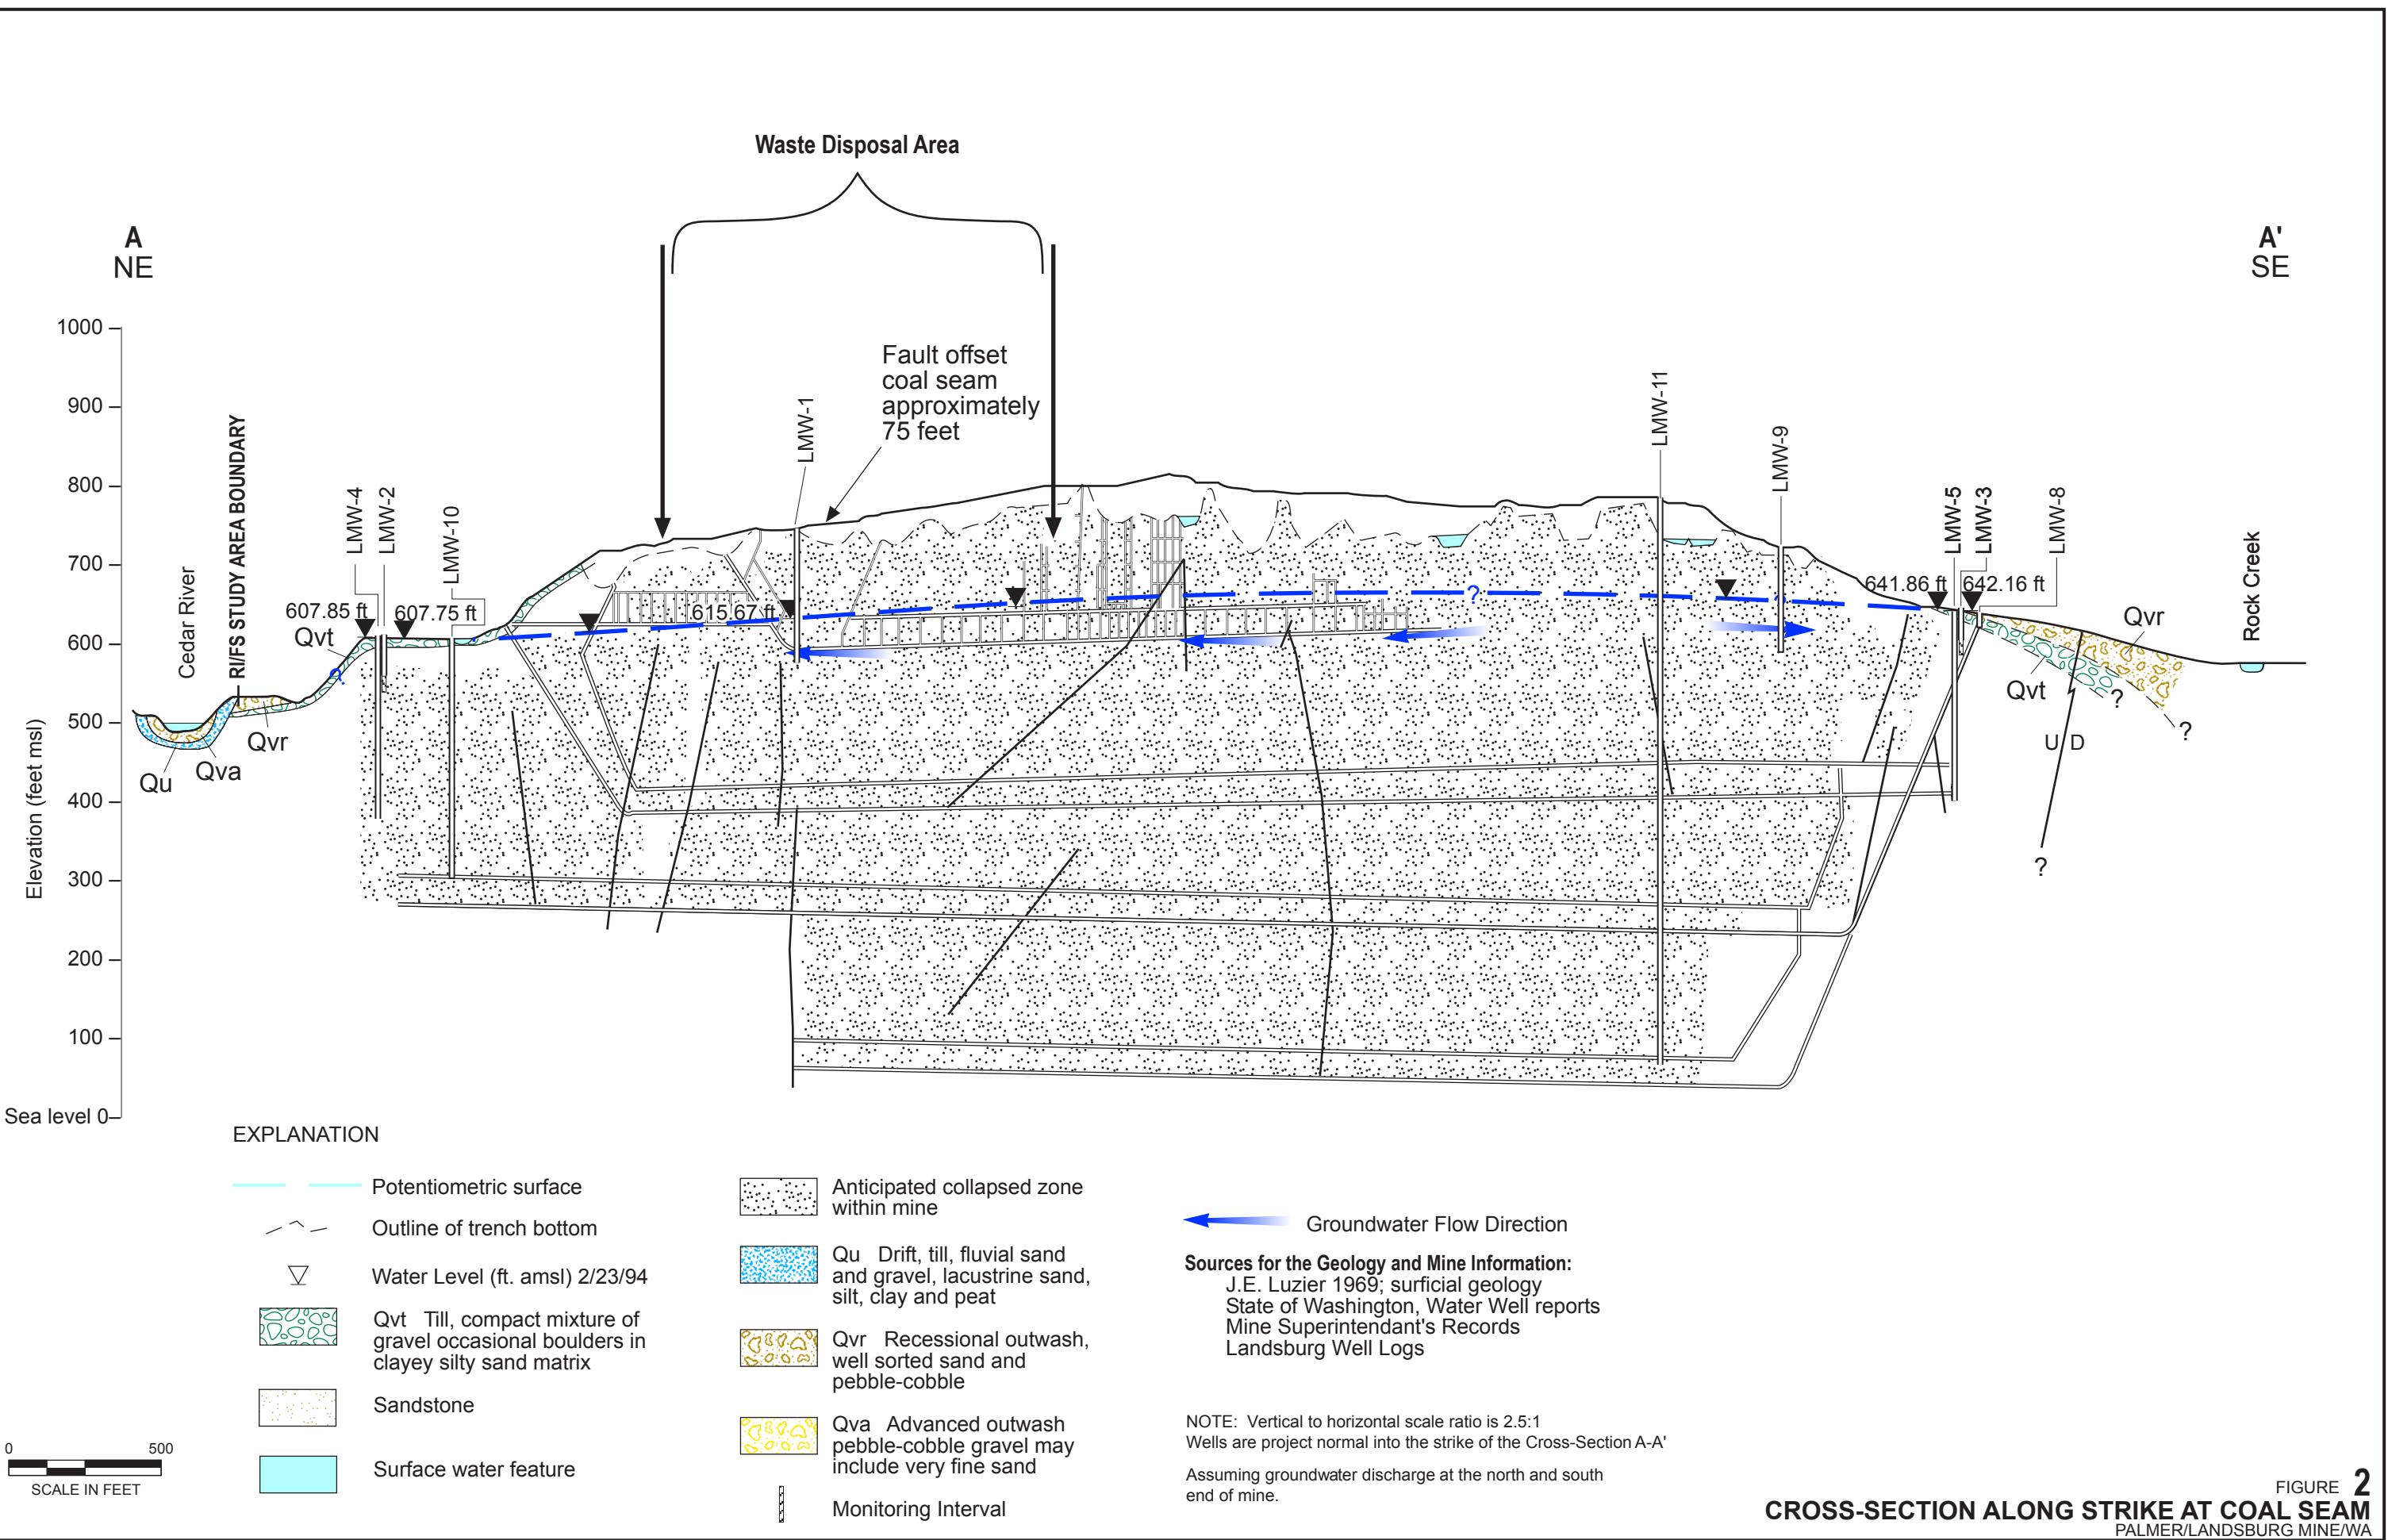

Rel mV = relative millivolts

NTU = nephelometric turbidity unit

µg/L = micrograms per liter

RE: Landsburg

Please find enclosed sample receipt documentation and analytical results for samples from the project referenced above.

Sample analyses were performed according to ARI's Quality Assurance Plan and any provided project specific Quality Assurance Plan. Each analytical section of this report has been approved and reviewed by an analytical peer, the appropriate Laboratory Supervisor or qualified substitute, and a technical reviewer.

Should you have any questions or problems, please feel free to contact us at your convenience.

Associated Work Order(s)
17L0001

Associated SDG ID(s)
N/A

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed in the enclose Narrative. ARI, an accredited laboratory, certifies that the report results for which ARI is accredited meets all the requirements of the accrediting body. A list of certified analyses, accreditations, and expiration dates is included in this report.

Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Analytical Resources, Inc.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Limits of Liability: ARI will perform all requested services in accordance with appropriate methodology following ARI Standard Operating Procedures and the ARI Quality Assurance Program. This program meets standards for the industry. The total liability of ARI, its officers, agents, employees, or successors, arising out of or in connection with the requested services, shall not exceed the Invoiced amount for said services. The acceptance by the client of a proposal for services by ARI release ARI from any liability in excess thereof, notwithstanding any provision to the contrary in any contract, purchase order or signed agreement between ARI and the Client.

Sample Retention Policy: All samples submitted to ARI will be appropriately discarded no sooner than 90 days after receipt or 60 days after submission of hardcopy data, whichever is longer, unless alternate retention schedules have been established by work-order or contract.

Limits of Liability: ARI will perform all requested services in accordance with appropriate methodology following ARI Standard Operating Procedures and the ARI Quality Assurance Program. This program meets standards for the industry. The total liability of ARI, its officers, agents, employees, or successors, arising out of or in connection with the requested services, shall not exceed the Invoiced amount for said services. The acceptance by the client of a proposal for services by ARI release ARI from any liability in excess thereof, notwithstanding any provision to the contrary in any contract, purchase order or signed agreement between ARI and the Client.

Sample Retention Policy: All samples submitted to ARI will be appropriately discarded no sooner than 90 days after receipt or 60 days after submission of hardcopy data, whichever is longer, unless alternate retention schedules have been established by work-order or contract.

Cooler Receipt Form

ARI Client: Golder

COC No(s): _____ NA

Assigned ARI Job No: 17L0001

Preliminary Examination Phase:

Were intact, properly signed and dated custody seals attached to the outside of to cooler? YES NO

Were custody papers included with the cooler? YES NO

Were custody papers properly filled out (ink, signed, etc.) YES NO

Temperature of Cooler(s) (°C) (recommended 2.0-6.0 °C for chemistry)
Time: _____

If cooler temperature is out of compliance fill out form 00070F

Cooler Accepted by: SBR

Date: 11/30/2017 Time: 1545

Temp Gun ID#: 005206

See final page

Complete custody forms and attach all shipping documents

Log-In Phase:

Was a temperature blank included in the cooler? YES NO

What kind of packing material was used? ... Bubble Wrap Wet Ice Gel Packs Baggies Foam Block Paper Other: YES NO

Was sufficient ice used (if appropriate)? YES NO

Were all bottles sealed in individual plastic bags? YES NO

Did all bottles arrive in good condition (unbroken)? YES NO

Were all bottle labels complete and legible? YES NO

Did the number of containers listed on COC match with the number of containers received? YES NO

Did all bottle labels and tags agree with custody papers? YES NO

Were all bottles used correct for the requested analyses? YES NO

Do any of the analyses (bottles) require preservation? (attach preservation sheet, excluding VOCs)... YES NO

Were all VOC vials free of air bubbles? YES NO

Was sufficient amount of sample sent in each bottle? YES NO

Date VOC Trip Blank was made at ARI..... YES NO

Was Sample Split by ARI : NA YES Date/Time: _____ Equipment: _____

Split by: 11/20/17

Samples Logged by: BF Date: 12/01/17 Time: 910

Case Narrative

Sample receipt

Samples as listed on the preceding page were received December 15, 2017 under ARI workorder 17L0001. For details regarding sample receipt, please refer to the Cooler Receipt Form.

Volatiles - EPA Method SW8260C

The samples were run within the recommended holding times.

Initial and continuing calibrations were within method requirements.

The initial calibration verification (ICV) for NT2 on 12/5/07 is outside of control limits high for all associated LCS/LCSD "Q" flagged analytes with the exception of Iodomethane, which is outside of control limits low. Associated samples and QC that contain these analytes have been flagged with a "Q" qualifier. No further corrective action was taken.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

Method blank BFL0100 has Carbon Disulfide detected above the reporting limit. Associated detected results have been flagged with an "B" qualifier. The method blank also has various compounds detected below the reporting limits, but above the method detection limits. These analytes have been flagged with a "J" qualifier on the method blank. No further corrective action was taken.

The LCS/LCSD percent recoveries and RPD were within control limits.

Semivolatiles - EPA Method SW8270D

The samples were extracted and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

The initial calibration verification (ICV) for NT6 on 12/11/17 is outside of control limits high for 2,4-Dinitrophenol. Associated samples and QC that contain this analyte have been flagged with a "Q" qualifier. No further corrective action was taken.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank was clean at the reporting limits.

The LCS percent recoveries were within control limits. The LCSD has low percent recovery for 3-Nitroaniline. This is due to a low calibration bias. No corrective action was taken.

Golder Associates
18300 NE Union Hill Road Suite 200
Redmond WA, 98052-3333

Project: Landsburg
Project Number: 923-1000-002 R273
Project Manager: Gary Zimmerman

Reported:
19-Dec-2017 13:08

1,4-Dioxane- EPA Method SW8270D

The samples were extracted and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank was clean at the reporting limits.

The LCS/LCSD percent recoveries and RPD were within control limits.

Hydrocarbon Identification (HCID) - WA-Ecology Method NW-HCID

The samples were extracted and analyzed within the recommended holding times.

The surrogate percent recoveries were within control limits.

The method blank was clean at the reporting limits.

Pesticides - EPA Method SW8081A

The samples were extracted and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank was clean at the reporting limits.

The LCS has high percent recovery for Dieldrin. The LCSD has high percent recoveries for various compounds. All of the samples were non-detect for these compounds. No corrective action was taken.

PCB Aroclors - EPA Method SW8082A

The samples were extracted and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

Internal standard areas were within limits.

Project Number: 923-1000-002 R273
Project Manager: Gary Zimmerman

Reported:
19-Dec-2017 13:08

The surrogate percent recoveries were within control limits.

The method blank was clean at the reporting limits.

The LCS/LCSD percent recoveries and RPD were within control limits.

Total Metals - EPA Method 6010C

The samples were digested and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank was clean at the reporting limits.

The LCS percent recoveries were within control limits.

A matrix spike and duplicate were prepared in conjunction with sample LMW-6-1117. The matrix spike percent recoveries and duplicate RPD were within QC limits.

Total Metals - EPA Method 200.8

The samples were digested and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank was clean at the reporting limits.

The LCS percent recoveries were within control limits.

A matrix spike and duplicate were prepared in conjunction with sample LMW-6-1117. The matrix spike percent recoveries and duplicate RPD were within QC limits.

Total Hg - EPA Method 7470/7471

The samples were digested and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank was clean at the reporting limits.

The LCS percent recoveries were within control limits.

A matrix spike and duplicate were prepared in conjunction with sample LMW-6-1117. The matrix spike percent recovery and duplicate RPD were within QC limits.

Notes and Definitions

- U This analyte is not detected above the applicable reporting or detection limit.
- Q Indicates a detected analyte with an initial or continuing calibration that does not meet established acceptance criteria (<20% RSD, <20% drift or minimum RRF)
- P1 The reported value is greater than 40% difference between the concentrations determined on two GC columns where applicable.
- M Estimated value for a GC/MS analyte detected and confirmed by an analyst but with low spectral match parameters.
- J Estimated concentration value detected below the reporting limit.
- H Hold time violation - Hold time was exceeded.
- D The reported value is from a dilution
- B This analyte was detected in the method blank.
- * Flagged value is not within established control limits.
- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the reporting limit
- NR Not Reported
- dry Sample results reported on a dry weight basis
- RPD Relative Percent Difference
- [2C] Indicates this result was quantified on the second column on a dual column analysis.

RE: Landsburg

Please find enclosed sample receipt documentation and analytical results for samples from the project referenced above.

Sample analyses were performed according to ARI's Quality Assurance Plan and any provided project specific Quality Assurance Plan. Each analytical section of this report has been approved and reviewed by an analytical peer, the appropriate Laboratory Supervisor or qualified substitute, and a technical reviewer.

Should you have any questions or problems, please feel free to contact us at your convenience.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed in the enclose Narrative. ARI, an accredited laboratory, certifies that the report results for which ARI is accredited meets all the requirements of the accrediting body. A list of certified analyses, accreditations, and expiration dates is included in this report.

Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Analytical Resources, Inc.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Limits of Liability: ARI will perform all requested services in accordance with appropriate methodology following ARI Standard Operating Procedures and the ARI Quality Assurance Program. This program meets standards for the industry. The total liability of ARI, its officers, agents, employees, or successors, arising out of or in connection with the requested services, shall not exceed the Invoiced amount for said services. The acceptance by the client of a proposal for services by ARI releases ARI from any liability in excess thereof, notwithstanding any provision to the contrary in any contract, purchase order or co-signed agreement between ARI and the Client.

Sample Retention Policy: All samples submitted to ARI will be appropriately discarded no sooner than 90 days after receipt or 60 days after submission of hardcopy data, whichever is longer, unless alternate retention schedules have been established by work-order or contract.

Case Narrative

1,4-Dioxane- EPA Method SW8270D

The sample(s) were extracted and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank(s) were clean at the reporting limits.

The LCS percent recoveries were within control limits.

COC No(s): _____ NA

Assigned ARI Job No: 18B0137

Preliminary Examination Phase:

Were intact, properly signed and dated custody seals attached to the outside of to cooler? YES NO

Were custody papers included with the cooler? YES NO

Were custody papers properly filled out (ink, signed, etc.) YES NO

Temperature of Cooler(s) (°C) (recommended 2.0-6.0 °C for chemistry)

Time: 12:10

6.1

Temp Gun ID#: D005206

If cooler temperature is out of compliance fill out form 00070F
Cooler Accepted by: L. Dohm Date: 02/09/18 Time: 12:10

Complete custody forms and attach all shipping documents

Log-In Phase:

Was a temperature blank included in the cooler? YES NO

What kind of packing material was used? ... Bubble Wrap Wet Ice Gel Packs Baggies Foam Block Paper Other: _____

Was sufficient ice used (if appropriate)? NA YES NO

Were all bottles sealed in individual plastic bags? YES NO

Did all bottles arrive in good condition (unbroken)? YES NO

Were all bottle labels complete and legible? YES NO

Did the number of containers listed on COC match with the number of containers received? YES NO

Did all bottle labels and tags agree with custody papers? YES NO

Were all bottles used correct for the requested analyses? YES NO

Do any of the analyses (bottles) require preservation? (attach preservation sheet, excluding VOCs)... NA YES NO

Were all VOC vials free of air bubbles? NA YES NO

Was sufficient amount of sample sent in each bottle? NA YES NO

Date VOC Trip Blank was made at ARI..... NA YES NO

Was Sample Split by ARI : NA YES Date/Time: _____ Equipment: _____ Split by: _____

Samples Logged by: SEF Date: 21/01/18 Time: 1250

APPENDIX C
**NOVEMBER 2017 LANDSBURG MINE SITE WATER QUALITY MONITORING DATA
VALIDATION AND QUALITY ASSURANCE / QUALITY CONTROL REVIEW MEMORANDUM**

TECHNICAL MEMORANDUM

Date: February 13, 2018

Project No.: 923-1000-002.R273

To: Bill Kombol

Company: Palmer Coking Coal Company

From: Jason Yabandeh, Staff Environmental Chemist

Email: jyabandeh@golder.com

**RE: LANDSBURG MINE SITE NOVEMBER 2017 DATA VALIDATION & QUALITY ASSURANCE /
QUALITY CONTROL REVIEW**

This Data Usability Summary Report (DUSR) presents the findings of the data quality assessment performed on the analyses of water samples collected November 28 through November 30, 2017 and water samples that were re-collected February 9, 2018 in Landsburg Mine Site in Washington (Site) as part of the Landsburg Groundwater sampling project. Samples in the laboratory sample delivery group (SDG) as indicated in Table 1 were reviewed in this DUSR to identify quality issues which could affect the use of the sample data for decision making purposes.

A total of fifteen (15) water samples (this includes one field duplicate, one trip blank, and one equipment blank) were collected by Golder Associates Inc. (Golder) in November. A total of three (3) water samples (this includes one field blank) were re-collected by Golder in February. Samples were analyzed by Analytical Resources Inc. of Tukwila, Washington for the following parameters (note that the re-collected samples were only analyzed for 1,4-Dioxane):

- Volatile organic compounds (VOCs) by United States Environmental Protection Agency (EPA) SW-846 method 8260C;
- Semivolatile Organic Compounds (SVOCs) by EPA SW-846 method 8270D;
- Polychlorinated Biphenyls (PCBs) by EPA SW-846 method 8082A;
- Chlorinated Pesticides by EPA SW-846 method 8081B;
- Northwest Total Petroleum Hydrocarbon Identification Scan (NWTPH-HCID) by NWTPH-HCID Method; and,
- Total Metals by EPA SW-846 method 6010C and EPA method 200.8; and total mercury by EPA SW-846 method 7470A.

Samples were analyzed in accordance with procedures described in Test Methods for Evaluating Solid Waste, Physical/Chemical Methods (EPA SW-846, 3rd edition; methods 8260C, 8270D, 8082A, 8081B, 6010C, and 7470A), EPA Methods for Chemical Analysis of Water and Wastes (MCAWW) method 200.8, and for Northwest Total Petroleum Hydrocarbon Methods. Quality assurance / quality control (QA/QC) reviews of laboratory data were performed in the laboratory in accordance with the laboratory quality assurance program plan.

The data validation QA/QC review focused primarily on laboratory result summary sheets and quality control data to ensure that work plan data quality objectives were met for the project. Data validation was conducted in accordance with the criteria outlined in the National Function Guidelines for Inorganic Review (EPA 2017) and National Functional Guidelines for Organic Review (EPA 2017), modified to include method specific requirements of the laboratory and laboratory standard operating procedures (SOPs). Where there was a discrepancy between the QC criteria in the Guidelines and the QC criterion established in the analytic methodology, method-specific criteria, the QAPP, or professional judgment was used.

In general, chemical results for the samples collected at the Site were evaluated on the basis of laboratory preservation, hold times, lab and field blank contamination, outlying precision or accuracy parameters, or on the basis of professional judgment. The following definitions provide brief explanations of the qualifiers which may have been assigned to data during the data validation process.

Data Qualifier Definitions

- J+ The result is an estimated quantity, but the may be biased high.
- U The constituent was analyzed for, but was not detected above the reported sample quantitation limit.
- UJ The constituent was not detected; the associated quantitation limit is an estimated value because quality control criteria were not met.

The validation level for the data is Tier 2A, and included the following:

- Data Package Completeness
- Verification of required deliverables
- Evaluation of holding times
- Laboratory narrative evaluation
- Evaluation and qualification of quality control elements for: Surrogates, Matrix Spike, Laboratory Control samples, Laboratory Duplicates, Method Blanks, and Field Blank and Field Duplicate evaluation as applicable
- Evaluation of detection limits

Raw data was not provided and calibration elements, including Gas Chromatograph (GC) instrument tuning and performance check, initial and continuing calibration, internal standard performance, and compound identification, were not evaluated unless information was provided by the lab in the case narratives. Data review and validation was performed by an experienced quality assurance chemist independent of the analytical laboratory and not directly involved in the project. Data qualifiers that were applied by the laboratory have been removed from the data summary report sheets, when applicable, and superseded by data validation qualifiers. Overall, the data review showed that data are acceptable for use except where

indicated by data qualifiers. For details about the data validation, refer to the data validation checklist in Attachment A. Table 2 is a summary of the qualifiers applied to the data.

Laboratory Case Narrative

a) Does the laboratory narrative indicate deficiencies? See notes _____

Note Deficiencies:

- Certain analytes in the ICV were outside of QC criteria in the VOC and SVOC analyses.
- Certain analytes were detected in the VOCs method blank.
- Certain LCS/LCSD recoveries were outside of QC limits in the SVOC and pesticide analyses.

These issues are addressed in the appropriate sections below.

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

f) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

DATA REVIEW CHECKLIST - QA LEVEL II

	YES	NO	NA	COMMENTS
Blanks				
a) Were analytes detected in the method blank(s)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	See note 5
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
c) Were analytes detected in the equipment blank(s)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	See note 5
d) Were analytes detected in the trip blank(s)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	See note 5
e) Were analytes detected in the storage blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Surrogate (System Monitoring) Compounds	YES	NO	NA	COMMENTS
a) Were surrogate compounds added to all samples?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Were recoveries within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
d) Were recoveries not calculated due to interference?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Laboratory Control Sample	YES	NO	NA	COMMENTS
a) Was a LCS analyzed at the appropriate frequency?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Was the LCS accuracy criteria met?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	See note 6
Matrix Spike/Matrix Spike Duplicate	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met? Recovery could not be calculated since sample contained high concentration of analyte?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Metals only
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
b) Was MSD accuracy criteria met? Recovery could not be calculated since sample contained high concentration of analyte?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
c) Were MS/MSD precision criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	See Table 1
b) Were field dup. precision criteria met (20%)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	All RPDs are <20% or results are <5x RL
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Metals only
d) Were lab dup. precision criteria met (Note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
ICP Serial Dilution (SD)	YES	NO	NA	COMMENTS
a) Was an ICP SD analyzed once per SDG?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
b) Was the ICP SD criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Overall Evaluation	YES	NO	NA	COMMENTS
a) Were there any other technical problems not previously addressed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	See notes 7 and 8
b) Checked for transcription errors?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Do target analytes fall within calibration ranges?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
d) Data are acceptable and usable except as noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

DATA REVIEW CHECKLIST - QA LEVEL II

Comments/Notes:

1. The lab noted that some sample VOA vials were received with headspace bubbles less than 6 mm in diameter. Bubbles of this size are not known to adversely affect VOC recovery. No further action necessary other than to note.
2. The lab noted on the Cooler Receipt Form that sample time for LMW-10-1117 was written as 0950 on the COC and 0955 on the bottle labels. When discrepancies in sample time exist between the COC and bottle labels, the lab defers to the COC for sample log in purposes. However, according to the Sample Integrity Data Sheet for LMW-10-1117, the correct sample time is 0955. The sample time should be corrected in the database.
3. The lab noted on the Cooler Receipt Form that 12 trip blank vials were received, while the COC only indicated 6. No further action necessary other than to note.
4. The lab noted on the Cooler Receipt Form that one bottle for sample P-3-1117 broke during the lab's log in procedure. There was still sufficient sample volume to perform all analyses. No further action necessary other than to note.
5. See table below for a summary of method, trip, and equipment blank contamination. Following the Guidelines and using professional judgment, when the blank contamination is greater than the RL, associated detections that are greater than the RL but less than 10x the blank contamination are qualified as estimated with high bias (J+), while associated detections that are less than the RL are qualified as non-detect (U) at the RL and associated non-detections do not require qualification. When the blank contamination is less than the RL, associated non-detections do not require qualification.

Blank ID	Method	Analyte	Result ($\mu\text{g/L}$)	Qualifier	RL ($\mu\text{g/L}$)
BFL0100-BLK1	SW8260C	Carbon Disulfide	0.13		0.10
BFL0100-BLK1	SW8260C	n-Butylbenzene	0.03	J	0.20
BFL0100-BLK1	SW8260C	Hexachlorobutadiene	0.11	J	0.20
Trip Blank	SW8260C	Carbon Disulfide	0.06	J,B	0.10
EB-1117	SW8260C	Toluene	0.06	J	0.20

6. See table below for a summary of LCS/LCSD recoveries that are outside of QC criteria. Following the Guidelines and using professional judgment, when LCS/LCSD recovery is below acceptance criteria, associated non-detections are qualified as estimated (UJ). When LCS/LCSD recovery is above acceptance criteria, associated non-detections do not require qualification.

LCS/LCSD ID	Method	Analyte	Recovery (%)	Recovery Limits (%)	RPD (%)	RPD Limit (%)
BFL0050-BS1 / BSD1	SW8270D	3-Nitroaniline	66.9 / 60.4	60.9-120	10.20	30
BFL0052-BS1 / BSD1	SW8081B	alpha-BHC	113 / 121	57-120	6.97	30
BFL0052-BS1 / BSD1	SW8081B	beta-BHC	113 / 121	59-120	6.78	30
BFL0052-BS1 / BSD1	SW8081B	Lindane	114 / 122	62-120	6.41	30
BFL0052-BS1 / BSD1	SW8081B	Heptachlor Epoxide	118 / 127	63-120	6.64	30
BFL0052-BS1 / BSD1	SW8081B	trans-Chlordane	119 / 126	63-120	5.74	30
BFL0052-BS1 / BSD1	SW8081B	cis-Chlordane	117 / 125	60-120	6.20	30
BFL0052-BS1 / BSD1	SW8081B	Endosulfan I	119 / 127	58-121	6.76	30
BFL0052-BS1 / BSD1	SW8081B	Dieldrin	121 / 129	62-120	7.02	30

7. The lab notes in the case narrative that the VOC and SVOC ICV recoveries were outside of control limits for some analytes. Review of calibration data is outside of the scope of a level II validation, and the calibration summaries were not provided by the lab as part of this data package. Using professional judgment, the ICV information provided in the case narrative was reviewed only to determine if serious deficiencies warranting data rejection were present. No rejection of data is required. Remove all "Q" qualifiers applied to primary samples.
8. See table below for a summary of samples that were named incorrectly during collection. Note that for the purpose of clarity samples are referred to by their original names in this data validation. The sample names should be corrected prior to database upload.

Original Sample Name	Correct Sample Name
P-2-1117	Portal-3-1117
P-3-1117	Portal 2-1117

Data Qualification: See Table 2.

Laboratory Case Narrative

- a) Does the laboratory narrative indicate deficiencies?

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
d) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
e) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
f) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

DATA REVIEW CHECKLIST - QA LEVEL II

	YES	NO	NA	
Blanks				COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
e) Were analytes detected in the storage blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Surrogate (System Monitoring) Compounds	YES	NO	NA	COMMENTS
a) Were surrogate compounds added to all samples?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Were recoveries within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
d) Were recoveries not calculated due to interference?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Laboratory Control Sample	YES	NO	NA	COMMENTS
a) Was a LCS analyzed at the appropriate frequency?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Matrix Spike/Matrix Spike Duplicate	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met? Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
b) Was MSD accuracy criteria met? Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)? <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>				
b) Were field dup. precision criteria met (Note RPD)? <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>				
c) Were lab duplicates analyzed (note original and duplicate samples)? <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>				
d) Were lab dup. precision criteria met (Note RPD)? <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>				
ICP Serial Dilution (SD)	YES	NO	NA	COMMENTS
a) Was an ICP SD analyzed once per SDG?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
b) Was the ICP SD criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Overall Evaluation	YES	NO	NA	COMMENTS
a) Were there any other technical problems not previously addressed?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
b) Checked for transcription errors?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Do target analytes fall within calibration ranges?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
d) Data are acceptable and usable except as noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

DATA REVIEW CHECKLIST - QA LEVEL II

Comments/Notes:

1. The lab notes on the cooler receipt form that the sample cooler was received at 6.1°C, which slightly exceeds the recommended storage temperature of 0-6°C. The cooler packed with ice was delivered to the laboratory within three hours of sample collection, which indicates that the samples did not have time to cool entirely. Following the Guidelines and using professional judgment, no qualification is necessary.

Data Qualification: No qualifiers applied; see Table 2.

Definitions:
