

DETERMINATION OF NONSIGNIFICANCE
(DNS)

Description of Proposal:

Spokane River Metals Remediation Project: Islands Lagoon. The primary goal of this project is isolation of contaminants. An approximate 1 foot thickness of gravel cover will be constructed over approximately ¼ acre of the shoreline. A 1/3rd foot thick layer of filter rock will be incorporated into the lower portion of the cover to prevent loss of underlying fine-grained sediment. A line of boulders will be anchored along, and incorporated into, this face to prevent on-going erosion and to increase recreational user safety.

Proponent:

Washington State Department of Ecology

Location of Proposal:

South side of Spokane River near S. Wellesley Ave and N. Evergreen Rd. Spokane Valley, WA

Lead Agency:

Washington State Department of Ecology

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). This decision was made after review of the Environmental Checklist and other information on file with the lead agency. This information is available to the public on request.
