Elevation (feet)	Depth (feet)	SAMPLE: Testing Sample	SAMPLE: Sample Name Testing	Graphic Log	Group Classification	MATERIAL DESCRIPTION	Sheen	Headspace Vapor	Notes
2345	1				SP-SM	Brown fine to coarse sand with silt, gravel and occasional cobbles (medium dense, moist) (fill)			
2344	2				CL	Brown clay with sand (medium stiff, moist) (fill)			
2343	3				SP/ MSW	Brown fine to coarse sand with trace silt, occasional gravel and cobbles, and MSW (wood, plastic, household garbage)			
2342	4								
2341	5								
2340	6								
2339	7								
2338	8				SP	Brown fine to coarse sand with trace silt and occasional gravel, and cobbles			
2337	9								

Test pit completed at 9½ feet below ground surface
No groundwater seepage observed
No caving observed
MSW = municipal solid waste

Notes: See Figure E-1 for explanation of symbols.
The depths on the test pit logs are based on an average of measurements across the test pit and should be considered accurate to ½ foot.

					SP-SM/ MSW	Brown fine to coarse sand with silt, gravel and occasional cobbles, and MSW (medium dense, moist)			
2338	5								
2337	6								

Test pit completed at 6½ feet
No groundwater seepage observed
No caving observed
MSW = municipal solid waste

Notes: See Figure E-1 for explanation of symbols.
The depths on the test pit logs are based on an average of measurements across the test pit and should be considered accurate to ½ foot.

APPENDIX G
Laboratory Analytical Reports and Data Validation

Project:	Marshall Landfill Site 2015 Samples
GEI File No:	00504-104-00
Date:	January 27, 2017

This report documents the results of a United States Environmental Protection Agency (EPA)-defined Stage 2A data validation (EPA Document 540-R-08-005; EPA 2009) of analytical data from the analyses of soil, water, and air samples collected as part of the 2015 sampling events, and the associated laboratory quality control samples. The samples were obtained from the Marshall Landfill site located in Spokane County, Washington.

In summary and in our opinion, the quality and accuracy of the analytical data are acceptable for the intended use, with the qualifications applied from the data validation. The primary data validation qualifiers were: (1) GeoEngineers, Inc. (GeoEngineers) qualified selected data as estimated (J/UJ) because of holding time, accuracy, and precision outliers; (2) GeoEngineers qualified selected data as non-detected (U) because of method blank contamination; (3) GeoEngineers qualified one data result as rejected (R) because of an accuracy outlier; and (4) GeoEngineers qualified one data result as estimated (J) because of instrument calibration range exceedance.

The evaluation criteria and qualifications are discussed in greater detail below; a summary of qualified samples is listed in Table 2.

OBJECTIVE AND QUALITY CONTROL ELEMENTS

GeoEngineers completed the data validation consistent with the EPA Contract Laboratory Program National Functional Guidelines for Superfund Organic Methods Data Review (EPA 2008) and Inorganic Superfund Data Review (EPA 2010) (National Functional Guidelines) to determine if the laboratory analytical results meet the project objectives and are usable for their intended purpose. Data usability was assessed by determining if:

- The samples were analyzed using well-defined and acceptable methods that provide reporting limits below applicable regulatory criteria;
- The precision and accuracy of the data are well-defined and sufficient to provide defensible data; and
- The quality assurance/quality control (QA/QC) procedures utilized by the laboratory meet acceptable industry practices and standards.

In accordance with the Quality Assurance Project Plan (QAPP), Appendix B of the Remedial Investigation/Feasibility Study Work Plan (GeoEngineers 2015), the data validation included review of the following QC elements:

- Data Package Completeness
- Chain-of-Custody Documentation
- Holding Times and Sample Preservation
- Surrogate Recoveries

- Method Blanks
- Matrix Spikes/Matrix Spike Duplicates
- Laboratory Control Samples/Laboratory Control Sample Duplicates
- Laboratory Duplicates
- Miscellaneous

VALIDATED SAMPLE DELIVERY GROUPS

This data validation included review of the sample delivery groups (SDGs) listed below in Table 1.

TABLE 1: SUMMARY OF VALIDATED SAMPLE DELIVERY GROUPS

Laboratory SDG	Samples Validated
590-1109-1	MW-15:(164-165)
590-1230-1	LFB-1: (30-31), LFB-2: (52-53)
590-1281-1	LFB-3:(68-69), LFB-4 :(92-93), LFB-5:(49-50)
590-1429-1	LFB-8 (17-18), LFB-9 (11-12), LFB-10 (45-46), MW-16 (69-70)
590-1460-1	LFB-11 (42-43)
590-1569-1	LFB-12 (29-30), LFB-13 (72-73), LFB-14 (97-98), LFB-15 (35-37), LFB-16 (35-37), LFB-17 (42-43)
590-1655-1	SB-12 (235-236.5)
590-1807-1	MW-7D (169-170.5), MW-15A (204-205)
590-1968-1	LFB-3:091615, LFB-4:091615, LFB-5:091615, LFB-8:091615, LFB-9:091615, LFB-10:091615, LFB-11:091615, LFB-15:091615, LFB-16:091615, LFB-17:091615

CHEMICAL ANALYSIS PERFORMED

TestAmerica Laboratories, Inc. (TestAmerica), located in Spokane, Washington, performed laboratory analyses on the samples using one or more of the following methods:

Soil

- Hydrocarbon Identification (NWTPH-HCID) by Method NWTPH-HCID;
- Volatile Organic Compounds (VOCs) by Method SW8260B;
- Semi-volatile Organic Compounds (SVOCs) by Method SW8270C;
- Polychlorinated Biphenyls (PCBs) by Method SW8082A;
- Organochlorine Pesticides by Method SW8081A;
- Organophosphorous Pesticides by Method SW8141A;
- Chlorinated Herbicides by Method SW8151A;
- Total Metals by Methods EPA6020A/7471B; and
- Total Cyanide by Method EPA9012A.

Air

- VOCs in Air (VOCs-Air) by Method TO-15

DATA VALIDATION SUMMARY

The results for each of the QC elements are summarized below.

Data Package Completeness

TestAmerica provided the required deliverables for the data validation according to the National Functional Guidelines. The laboratory followed adequate corrective action processes and the identified anomalies were discussed in the relevant laboratory case narrative.

Chain-of-Custody Documentation

Chain-of-custody (COC) forms were provided with the laboratory analytical reports. The COCs were accurate and complete when submitted to the laboratory, with the following exception:

SDG 590-1655-1: The sample ID for MW-14 (235-236.5), as listed on the COC, was changed to SB-12 (235-236.5) at GeoEngineers' request.

Holding Times and Sample Preservation

The sample holding time is defined as the time that elapses between sample collection and sample analysis. Maximum holding time criteria exist for each analysis to help ensure that the analyte concentrations found at the time of analysis reflect the concentration present at the time of sample collection. Established holding times were met for each analysis, with the exceptions noted below. The sample coolers arrived at the laboratory within the appropriate temperatures of between 2 and 6 degrees Celsius, with the exceptions noted below.

SDG 590-1109-1: The sample cooler temperature recorded at the laboratory was 7.1 degrees Celsius. The sample was received at the laboratory the same day it was collected. It is possible that the elevated sample cooler temperature has impacted the resulting analytical data; however, the degree of impact cannot be quantified.

(VOCs) The 48-hour holding time for sample extraction in unpreserved samples for VOC analysis was exceeded by 5 days in Sample MW-15:(164-165). The positive result for methylene chloride and the reporting limits for the remaining VOC target analytes were qualified as estimated (J and UJ, respectively) in this sample.

SDG 590-1230-1: (VOCs) The 14-day holding time for sample extraction for VOC analysis was exceeded by 13 days in Samples LFB-1: (30-31) and LFB-2: (52-53). The positive results for benzene, methylene chloride, and toluene and the reporting limits for the remaining VOC target analytes were qualified as estimated (J and UJ, respectively) in Sample LFB-1: (30-31). The positive results for methylene chloride and trichlorofluoromethane and the reporting limits for the remaining VOC target analytes were qualified as estimated (J and UJ, respectively) in Sample LFB-2: (52-53).

SDG 590-1281-1: (VOCs) The 14-day holding time for sample extraction for VOC analysis was exceeded by 8 to 9 days (depending on the sample) in Samples LFB-3:(68-69), LFB-4:(92-93), and LFB-5:(49-50). The positive results and reporting limits for the VOC target analytes were qualified as estimated (J and UJ, respectively) in these samples. See Table 2 for a full list of qualified analytes.

SDG 590-1460-1: The sample cooler temperature recorded at the laboratory was 7.8 degrees Celsius. It is possible that the elevated sample cooler temperature has impacted the resulting analytical data; however, the degree of impact cannot be quantified.

(VOCs) The 48-hour holding time for sample extraction in unpreserved samples for VOC analysis was exceeded by 11 days in Sample LFB-11 (42-43). The reporting limits for the VOC target analytes were qualified as estimated (UJ) in this sample.

SDG 590-1807-1: The sample cooler temperature recorded at the laboratory was 0.5 degrees Celsius. Since the samples were not frozen, this temperature should likely not affect the sample analytical results.

Surrogate Recoveries

A surrogate compound is a compound that is chemically similar to the organic analytes of interest, but unlikely to be found in an environmental sample. Surrogates are used for organic analyses and are added to the samples, standards, and blanks to serve as an accuracy and specificity check of each analysis. The surrogates are added to the samples at a known concentration and percent recoveries are calculated following analysis. The surrogate percent recoveries for field samples were within the laboratory control limits, with the following exceptions:

SDG 590-1230-1: (Organochlorine Pesticides) The percent recovery for surrogate decachlorobiphenyl was less than the control limits in Sample LFB-2: (52-53). The reporting limits for organochlorine pesticides target analytes were qualified as estimated (UJ) in this sample.

SDG 590-1281-1: (PCBs) The percent recovery for surrogate decachlorobiphenyl was less than the control limits in Sample LFB-5:(49-50). The positive result for PCB-1254 and the reporting limits for the remaining PCB target analytes were qualified as estimated (J and UJ, respectively) in this sample.

SDG 590-1569-1: (NWTPH-HCID) The percent recovery for surrogate n-Triacontane-d62 was greater than the control limits in Sample LFB-15 (35-37). The positive result for residual-range organics was qualified as estimated (J) in this sample.

(VOCs) The percent recovery for surrogate 1,2-Dichloroethane-d4 was less than the control limits in Sample LFB-17 (42-43); however, the sample was spiked with four additional surrogates and in each case the percent recoveries were within their respective control limits. No action was required for this outlier.

(PCBs) The percent recovery for surrogate decachlorobiphenyl was less than the control limits in Samples LFB-12 (29-30) and LFB-16 (35-37). The reporting limits for PCB target analytes were qualified as estimated (UJ) in these samples.

SDG 590-1807-1: (VOCs) The percent recoveries for surrogates 1,2-Dichloroethane-d4 and dibromofluoromethane were less than the control limits in Sample MW-15A (204-205); however, the sample was spiked with three additional surrogates and in each case the percent recoveries were within their respective control limits. No action was required for these outliers.

SDG 590-1968-1: (VOCs-Air) The percent recovery for surrogate 4-Bromofluorobenzene was greater than the control limits in Samples LFB-3:091615 and LFB-4:091615; however, the samples were spiked with two additional surrogates and in each case the percent recoveries were within their respective control limits. No action was required for these outliers.

Method Blanks

Method blanks are analyzed to ensure that laboratory procedures and reagents do not introduce measurable concentrations of the analytes of interest. A method blank was analyzed with each batch of samples, at a frequency of 1 per 20 samples. For each sample batch, method blanks for the applicable methods were analyzed at the required frequency. None of the analytes of interest were detected in the method blanks, with the following exceptions:

SDG 590-1109-1: (VOCs) There was a positive result for methylene chloride detected above the method detection limit, but below the reporting limit in the method blank extracted on 6/25/2015. The positive result for methylene chloride was greater than 10X the concentration in the method blank for Sample MW-15:(164-165); therefore, no qualification was required.

(SVOCs) There were positive results for bis(2-ethylhexyl) phthalate and butyl benzyl phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 7/1/2015. The positive results for bis(2-ethylhexyl) phthalate and butyl benzyl phthalate were qualified as non-detected (U) in Sample MW-15:(164-165).

SDG 590-1230-1: (SVOCs) There was a positive result for butyl benzyl phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 7/2/2015. The positive results for butyl benzyl phthalate were qualified as non-detected (U) in Samples LFB-1: (30-31) and LFB-2: (52-53).

SDG 590-1281-1: (SVOCs) There were positive results for butyl benzyl phthalate and diethyl phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 7/8/2015. The positive results for butyl benzyl phthalate and diethyl phthalate were qualified as non-detected (U) in Samples LFB-3:(68-69), LFB-4:(92-93), and LFB-5:(49-50).

SDG 590-1429-1: (SVOCs) There were positive results for butyl benzyl phthalate and diethyl phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 7/21/2015. The positive results for diethyl phthalate were qualified as non-detected (U) in Samples MW-16 (69-70) and LFB-10 (45-46). The positive result for butyl benzyl phthalate was qualified as non-detected (U) in Sample LFB-8 (17-18). There were no positive results for butyl benzyl phthalate in Samples MW-16 (69-70) and LFB-10 (45-46); there were no positive results for diethyl phthalate in Sample LFB-8 (17-18); and there were no positive results for butyl benzyl phthalate and diethyl phthalate in Sample LFB-9 (11-12); therefore, no qualifications were required.

(Herbicides) There was a positive result for 2,4-DB detected above the method detection limit, but below the reporting limit in the method blank extracted on 7/27/2015. The positive result for 2,4-DB was qualified as non-detected (U) in Sample LFB-8 (17-18). There were no positive results for 2,4-DB in Samples LFB-9 (11-12) and LFB-10 (45-46); therefore, no qualifications were required.

SDG 590-1460-1: (VOCs) There was a positive result for methylene chloride detected above the method detection limit, but below the reporting limit in the method blank extracted on 7/30/2015. The positive result for methylene chloride was qualified as non-detected (U) in Sample LFB-11 (42-43).

(SVOCs) There was a positive result for benzyl alcohol detected above the method detection limit, but below the reporting limit in the method blank extracted on 7/28/2015. The positive result for benzyl alcohol was qualified as non-detected (U) in Sample LFB-11 (42-43).

(Herbicides) There was a positive result for 2,4-DB detected above the method detection limit, but below the reporting limit in the method blank extracted on 7/27/2015. The positive result for 2,4-DB was qualified as non-detected (U) in Sample LFB-11 (42-43).

SDG 590-1569-1: (VOCs) There was a positive result for methylene chloride detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/7/2015. The positive results for methylene chloride were qualified as non-detected (U) in Samples LFB-12 (29-30), LFB-13 (72-73), LFB-14 (97-98), LFB-16 (35-37), and LFB-17 (42-43). There were no positive results for methylene chloride in Sample LFB-15 (35-37); therefore, no qualification was required.

(Metals) There was a positive result for total beryllium detected above the method detection limit, but below the reporting limit in the method blank digested on 8/11/2015. The positive results for total beryllium were qualified as non-detected (U) in Samples LFB-12 (29-30), LFB-13 (72-73), LFB-14 (97-98), and LFB-16 (35-37). The positive results for total beryllium were greater than 10X the concentration in the method blank for Samples LFB-15 (35-37) and LFB-17 (42-43); therefore, no qualifications were required.

SDG 590-1655-1: (VOCs) There was a positive result for methylene chloride detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/19/2015. The positive result for methylene chloride was qualified as non-detected (U) in Sample SB-12 (235-236.5).

(SVOCs) There was a positive result for diethyl phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/18/2015. The positive result for diethyl phthalate was qualified as non-detected (U) in Sample SB-12 (235-236.5).

SDG 590-1807-1: (VOCs) There was a positive result for methylene chloride detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/28/2015. The positive results for methylene chloride were greater than 10X the concentration in the method blank for Samples MW-7D (169-170.5) and MW-15A (204-205); therefore, no qualifications were required.

(PCBs) There was a positive result for PCB-1254 detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/28/2015. There were no positive results for PCB-1254 in Samples MW-7D (169-170.5) and MW-15A (204-205); therefore, no qualifications were required.

(Metals) There was a positive result for total copper detected above the method detection limit, but below the reporting limit in the method blank digested on 9/1/2015. The positive results for total copper were greater than 10X the concentration in the method blank for Samples MW-7D (169-170.5) and MW-15A (204-205); therefore, no qualifications were required.

SDG 590-1968-1: (VOCs-Air) There was a positive result for toluene detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/30/2015. The positive results for toluene were greater than 2X the concentration in the method blank for Samples LFB-8:091615, LFB-9:091615, LFB-10:091615, LFB-11:091615, LFB-15:091615, and LFB-16:09161; therefore, no qualifications were required.

There were positive results for m,p-Xylene, o-Xylene, and styrene detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/29/2015. The positive results for m,p-Xylene and o-Xylene were greater than 2X the concentration in the method blank for Sample LFB-3:091615; the positive results for m,p-Xylene, o-Xylene, and styrene were greater than 2X the concentration in the method blank for Samples LFB-4:091615, LFB-5:091615, and LFB-17:091615; and

there were no positive results for styrene in Sample LFB-3:091615; therefore, no qualifications were required.

Matrix Spikes/Matrix Spike Duplicates

Since the actual analyte concentration in an environmental sample is not known, the accuracy of a particular analysis is usually inferred by performing a matrix spike (MS) analysis on one sample from the associated batch, known as the parent sample. One aliquot of the sample is analyzed in the normal manner and then a second aliquot of the sample is spiked with a known amount of analyte concentration and analyzed. From these analyses, a percent recovery is calculated. Matrix spike duplicate (MSD) analyses are generally performed for organic analyses as a precision check and analyzed in the same sequence as a matrix spike. Using the result values from the MS and MSD, the relative percent difference (RPD) is calculated. The percent recovery control limits for MS and MSD analyses are specified in the laboratory documents, as are the RPD control limits for MS/MSD sample sets.

One MS/MSD analysis should be performed for every analytical batch or every 20 field samples, whichever is more frequent. The frequency requirements were met for each analysis and the percent recovery and RPD values were within the proper control limits, with the following exceptions:

SDG 590-1109-1: (SVOCs) The laboratory performed an MS/MSD sample set on Sample MW-15:(164-165). The percent recoveries for benzo(g,h,i)perylene, dibenzo(a,h)anthracene, and indeno[1,2,3-cd]pyrene were less than the control limits in the MS/MSD extracted on 7/1/2015. The reporting limits for these target analytes were qualified as estimated (UJ) in Sample MW-15:(164-165).

(Metals) The laboratory performed an MS/MSD sample set on Sample MW-15:(164-165). The percent recoveries for total chromium and total vanadium were greater than the control limits in the MS digested on 6/23/2015; however, the percent recoveries for these target analytes were within the control limits in the corresponding MSD. No action was required for these outliers. Additionally, in the same MS/MSD sample set, the percent recoveries for total iron and total manganese were greater than the control limits. The parent sample concentration for these target analytes were greater than four times the amount spiked into the sample; therefore, no qualifications were required.

SDG 590-1230-1: (Total Cyanide) The laboratory performed an MS/MSD sample set on Sample LFB-1: (30-31). The percent recoveries for total cyanide were less than the control limits in the MS/MSD extracted on 7/1/2015. The reporting limit for total cyanide was qualified as estimated (UJ) in this sample.

SDG 590-1281-1: (SVOCs) The laboratory performed an MS/MSD sample set on Sample LFB-3:(68-69). The percent recoveries for 4-Nitrophenol were greater than the control limits in the MS/MSD extracted on 7/8/2015. There were no positive results for this target analyte in this sample; therefore, no qualification was required.

SDG 590-1429-1: (SVOCs) The laboratory performed an MS/MSD sample set on Sample LFB-8 (17-18). The percent recovery for hexachlorocyclopentadiene was less than the control limits in the MS and the percent recoveries for 2,4-Dinitrophenol and pentachlorophenol were less than the control limits in the MSD extracted on 7/21/2015; however, the percent recoveries for these target analytes were within the control limits in the corresponding MSD and MS. No action was required for these outliers.

Additionally, the same MS/MSD sample set, the percent recoveries for 4,6-Dinitro-2-methylphenol were less than the control limits and the percent recoveries for 4-Nitrophenol were greater than the control limits in both the MS and MSD. The reporting limit for 4,6-Dinitro-2-methylphenol was qualified as

estimated (UJ) in Sample LFB-8 (17-18). There were no positive results for 4-Nitrophenol in Sample LFB-8 (17-18); therefore, no qualification was required.

Lastly, in the same MS/MSD sample set, the percent recoveries for benzoic acid were less than the control limits in both the MS and MSD at 0%. Because the percent recovery was less than 10 percent, the reporting limit for this target analyte was qualified as rejected (R) in Sample LFB-8 (17-18).

SDG 590-1569-1: (SVOCs) The laboratory performed an MS/MSD sample set on Sample LFB-17 (42-43). The percent recovery for 4-Chloroaniline was less than the control limits and the percent recovery for bis(2-ethylhexyl) phthalate was greater than the control limits in the MS extracted on 8/3/2015; however, the percent recoveries for these target analytes were within the control limits in the corresponding MSD. No action was required for these outliers. Additionally, in the same MS/MSD sample set, the RPD for bis(2-ethylhexyl) phthalate was greater than the control limit. The positive result for this target analyte was qualified as estimated (J) in Sample LFB-17 (42-43).

(Organochlorine Pesticides) The laboratory performed an MS/MSD sample set on Sample LFB-12 (29-30). The percent recovery for endosulfan sulfate was less than the control limits in the MS extracted on 8/3/2015; however, the percent recovery for this target analyte was within the control limits in the corresponding MSD. No action was required for this outlier. Additionally, in the same MS/MSD sample set, the percent recoveries for endosulfan II and endrin aldehyde were less than the control limits in both the MS and MSD. The positive result for endrin aldehyde and the reporting limit for endosulfan II were qualified as estimated (J and UJ, respectively) in Sample LFB-12 (29-30).

(Herbicides) The laboratory performed an MS/MSD sample set on Sample LFB-13 (72-73). The percent recovery for silvex was less than the control limits in the MSD extracted on 8/2/2015; however, the percent recovery for this target analyte was within the control limits in the corresponding MS. No action was required for this outlier.

SDG 590-1655-1: (Metals) The laboratory performed an MS/MSD sample set on Sample SB-12 (235-236.5). The RPD for total mercury was greater than the control limit in the MS/MSD digested on 8/19/2015. The positive result for total mercury was qualified as estimated (J) in this sample.

Laboratory Control Samples/Laboratory Control Sample Duplicates

A laboratory control sample (LCS) is a blank sample that is spiked with a known amount of analyte and then analyzed. An LCS is similar to an MS, but without the possibility of matrix interference. Given that matrix interference is not an issue, the LCS/LCSD control limits for accuracy and precision are usually more rigorous than for MS/MSD analyses. Additionally, data qualification based on LCS/LCSD analyses would apply to all samples in the associated batch, instead of just the parent sample. The percent recovery control limits for LCS and LCSD analyses are specified in the laboratory documents, as are the RPD control limits for LCS/LCSD sample sets.

One LCS/LCSD analysis should be performed for every analytical batch or every 20 field samples, whichever is more frequent. The frequency requirements were met for all analyses and the percent recovery and RPD values were within the proper control limits, with the following exceptions:

SDG 590-1109-1: (VOCs) The percent recoveries for 1,1,1,2-Tetrachloroethane, 1,2-Dichlorobenzene, and methyl tert-butyl ether were greater than the control limits in the LCS extracted on 6/25/2015; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCSD. No action was required for these outliers.

(SVOCs) The percent recoveries for benzoic acid were less than the control limits and the RPD for benzoic acid was greater than the control limit in the LCS/LCSD extracted on 7/1/2015. The reporting limit for this target analyte was qualified as estimated (UJ) in Sample MW-15:(164-165).

SDG 590-1230-1: (SVOCs) The RPD for pentachlorophenol was greater than the control limit in the LCS/LCSD extracted on 7/2/2015. There were no positive results for this target analyte in the associated field samples; therefore, no qualifications were required.

(Organochlorine Pesticides) The percent recovery for aldrin was less than the control limits in the LCSD extracted on 7/7/2015; however, the percent recovery for this target analyte was within the control limits in the corresponding LCS. No action was required for this outlier.

SDG 590-1281-1: (Herbicides) The percent recoveries for dalapon and MCPP were greater than the control limits in the LCS extracted on 7/9/2015. There were no positive results for these target analytes in the associated field samples; therefore, no qualifications were required.

SDG 590-1429-1: (SVOCs) The percent recoveries for 4-Nitrophenol were greater than the control limits in the LCS/LCSD extracted on 7/21/2015. There were no positive results for this target analyte in the associated field samples; therefore, no qualifications were required.

SDG 590-1460-1: (VOCs) The percent recoveries for 1,1,2-Trichloroethane, 1,2-Dibromo-3-Chloropropane, ethylene dibromide, and trans-1,3-Dichloropropene were greater than the control limits in the LCS extracted on 7/30/2015; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCSD. No action was required for these outliers. Additionally, in the same LCS/LCSD sample set, the percent recoveries for 1,1,2,2-Tetrachloroethane, 1,2,3-Trichloropropane, 1,3-Dichloropropane, bromoform, dibromomethane, and methyl tert-butyl ether were greater than the control limits in both the LCS and LCSD. There were no positive results for these target analytes in the associated field sample; therefore, no qualifications were required.

SDG 590-1569-1: (VOCs) The percent recoveries for most of the VOC target analytes were greater than the control limits in the LCS/LCSD extracted on 8/7/2015. There were no positive results for the affected target analytes in the associated field samples and therefore, no qualifications were required, with the exception of 4-Isopropyltoluene and o-Xylene in Sample LFB-15 (35-37). The positive results for 4-Isopropyltoluene and o-Xylene were qualified as estimated (J) in Sample LFB-15 (35-37).

(SVOCs) The percent recovery for 4-Chloroaniline was less than the control limits in the LCS extracted on 8/3/2015; however, the percent recovery for this target analyte was within the control limits in the corresponding LCSD. No action was required for this outlier. Additionally, in the same LCS/LCSD sample set, the RPD values for 4,6-Dinitro-2-methylphenol and benzoic acid were greater than the control limits. There were no positive results for these target analytes in the associated field samples; therefore, no qualifications were required.

SDG 590-1655-1: (VOCs) The percent recoveries for 1,1,2,2-Tetrachloroethane, 1,2,3-Trichloropropane, 1,2-Dibromo-3-Chloropropane, and 1,2-Dichlorobenzene were greater than the control limits in the LCSD extracted on 8/19/2015; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers. Additionally, in the same LCS/LCSD sample set, the percent recoveries for 1,4-Dichlorobenzene were greater than the control limits in both the LCS and LCSD. There were no positive results for this target analyte in the associated field sample; therefore, no qualification was required.

(SVOCs) The percent recovery for di-n-octyl phthalate was less than the control limits in the LCS extracted on 8/18/2015; however, the percent recovery for this target analyte was within the control limits in the corresponding LCSD. No action was required for this outlier.

SDG 590-1807-1: (SVOCs) The percent recoveries for 4-Nitrophenol were greater than the control limits in the LCS/LCSD extracted on 8/27/2015. There were no positive results for this target analyte in the associated field samples; therefore, no qualifications were required.

SDG 590-1968-1: (VOCs-Air) The percent recovery for chloromethane was greater than the control limits in the LCSD extracted on 9/29/2015; however, the percent recovery for this target analyte was within the control limits in the corresponding LCS. No action was required for this outlier. Additionally, in the same LCS/LCSD sample set, the RPD for chloroethane was greater than the control limits. There were no positive results for chloroethane in Samples LFB-4:091615, LFB-5:091615, and LFB-17:091615; therefore, no qualifications were required.

The percent recovery for 1,2-Dichloro-1,1,2,2-tetrafluoroethane was greater than the control limits in the LCSD extracted on 9/30/2015; however, the percent recovery for this target analyte was within the control limits in the corresponding LCS. No action was required for this outlier.

LABORATORY DUPLICATES

Internal laboratory duplicate analyses are performed to monitor the precision of the analyses. Two separate aliquots of a sample are analyzed as distinct samples in the laboratory and the RPD between the two results is calculated. Duplicate analyses should be performed once per analytical batch. If one or more of the samples used has a concentration less than five times the reporting limit for that sample, the absolute difference is used instead of the RPD. The RPD control limits are specified in the laboratory documents. Laboratory duplicates were analyzed at the proper frequency and the specified acceptance criteria were met, with the following exceptions:

SDG 590-1109-1: (Total Metals) A laboratory duplicate analysis was performed on Sample MW-15:(164-165). The RPD values for total chromium and total lead were greater than the control limit. The positive results for these target analytes were qualified as estimated (J) in this sample.

SDG 590-1569-1: (Total Metals) A laboratory duplicate analysis was performed on Sample LFB-12 (29-30). The RPD for total mercury was greater than the control limit. The positive result for this target analyte was qualified as estimated (J) in this sample.

MISCELLANEOUS

SDG 590-1968-1: (VOCs-Air) The result for ethylbenzene exceeded the instrument calibration range in Sample LFB-4:091615. For this reason, the positive result for this target analyte was qualified as estimated (J) in this sample.

OVERALL ASSESSMENT

As was determined by this data validation, the laboratory followed the specified analytical methods. Accuracy was acceptable, as demonstrated by the surrogate, LCS/LCSD, and MS/MSD percent recovery values, with the exceptions noted above. Precision was acceptable, as demonstrated by the LCS/LCSD, MS/MSD, and laboratory duplicate RPD values, with the exceptions noted above.

The data are acceptable for the intended use, with the following qualifications listed below in Table 2.

TABLE 2: SUMMARY OF QUALIFIED SAMPLES

Sample ID	Analyte	Qualifier	Reason
LFB-1: (30-31)	Benzene	J	Holding Time
	Butyl benzyl phthalate	U	Method Blank Contamination
	Total cyanide	UJ	MS.MSD Recovery
	Methylene chloride	J	Holding Time
	Toluene	J	Holding Time
	All other VOC target analytes	UJ	Holding Time
LFB-2: (52-53)	Butyl benzyl phthalate	U	Method Blank Contamination
	Methylene chloride	J	Holding Time
	Trichlorofluoromethane	J	Holding Time
	All other VOC target analytes	UJ	Holding Time
	All organochlorine pesticides	UJ	Surrogate Recovery
LFB-3:(68-69)	Butyl benzyl phthalate	U	Method Blank Contamination
	Diethyl phthalate	U	Method Blank Contamination
	Methylene chloride	J	Holding Time
	All other VOC target analytes	UJ	Holding Time
LFB-4:(92-93)	Butyl benzyl phthalate	U	Method Blank Contamination
	Diethyl phthalate	U	Method Blank Contamination
	Methylene chloride	J	Holding Time
	All other VOC target analytes	UJ	Holding Time
LFB-4:091615	Ethylbenzene	J	See Miscellaneous
LFB-5:(49-50)	1,2,4-Trimethylbenzene	J	Holding Time
	1,3,5-Trimethylbenzene	J	Holding Time
	4-Isopropyltoluene	J	Holding Time
	Butyl benzyl phthalate	U	Method Blank Contamination
	cis-1,2-Dichloroethene	J	Holding Time
	Diethyl phthalate	U	Method Blank Contamination
	Ethylbenzene	J	Holding Time
	Isopropylbenzene	J	Holding Time
	Methylene Chloride	J	Holding Time
	m-Xylene & p-Xylene	J	Holding Time
	Naphthalene (VOCs)	J	Holding Time
	n-Butylbenzene	J	Holding Time
	PCB-1254	J	Surrogate Recovery
	Toluene	J	Holding Time
	All other VOC target analytes	UJ	Holding Time
	All other PCB target analytes	UJ	Surrogate Recovery
LFB-8 (17-18)	2,4-DB	U	Method Blank Contamination
	4,6-Dinitro-2-methylphenol	UJ	MS/MSD Recovery
	Benzoic acid	R	MS/MSD Recovery
	Butyl benzyl phthalate	U	Method Blank Contamination
LFB-10 (45-46)	Diethyl phthalate	U	Method Blank Contamination

Sample ID	Analyte	Qualifier	Reason
LFB-11 (42-43)	2,4-DB	U	Method Blank Contamination
	Benzyl alcohol	U	Method Blank Contamination
	Methylene chloride	UJ	Holding Time/Method Blank Contamination
	All other VOC target analytes	UJ	Holding Time
LFB-12 (29-30)	Total beryllium	U	Method Blank Contamination
	Endosulfan II	UJ	MS/MSD Recovery
	Endrin aldehyde	J	MS/MSD Recovery
	Total mercury	J	Laboratory Duplicate RPD
	Methylene chloride	U	Method Blank Contamination
	All PCB target analytes	UJ	Surrogate Recovery
LFB-13 (72-73)	Total beryllium	U	Method Blank Contamination
	Methylene chloride	U	Method Blank Contamination
LFB-14 (97-98)	Total beryllium	U	Method Blank Contamination
	Methylene chloride	U	Method Blank Contamination
LFB-15 (35-37)	4-Isopropyltoluene	J	LCS/LCSD Recovery
	o-Xylene	J	LCS/LCSD Recovery
	Residual-range organics	J	Surrogate Recovery
LFB-16 (35-37)	Total beryllium	U	Method Blank Contamination
	Methylene chloride	U	Method Blank Contamination
	All PCB target analytes	UJ	Surrogate Recovery
LFB-17 (42-43)	Bis(2-ethylhexyl) phthalate	J	MS/MSD RPD
	Methylene chloride	U	Method Blank Contamination
MW-15:(164-165)	Benzo(g,h,i)perylene	UJ	MS/MSD Recovery
	Benzoic acid	UJ	LCS/LCSD Recovery and RPD
	Bis(2-ethylhexyl) phthalate	U	Method Blank Contamination
	Butyl benzyl phthalate	U	Method Blank Contamination
	Total chromium	J	Laboratory Duplicate RPD
	Dibenzo(a,h)anthracene	UJ	MS/MSD Recovery
	Indeno[1,2,3-cd]pyrene	UJ	MS/MSD Recovery
	Total Lead	J	Laboratory Duplicate RPD
	Methylene chloride	J	Holding Time
	All other VOC target analytes	UJ	Holding Time
MW-16 (69-70)	Diethyl phthalate	U	Method Blank Contamination
SB-12 (235-236.5)	Diethyl phthalate	U	Method Blank Contamination
	Total mercury	J	MS/MSD RPD
	Methylene chloride	U	Method Blank Contamination

Narrative

Receipt
The samples were received on 6/18/2015 3:40 PM; the samples arrived in good condition. The temperature of the cooler at receipt was 7.1º C.

GC/MS VOA Method 8260B:
The method blank for batch 193205 contained Methylene chloride above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

The laboratory control sample (LCS) for batch 193205 recovered outside control limits for the following analytes: 1,2-dichlorobenzene, Methyl tert-butyl ether and 1,1,1,2-Tetrachloroethane. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

The following sample was received as a bulk soil sample outside of the 48 hour holding time for unpreserved/unfrozen soil: MW-15: (164-165) (590-1109-22). Therefore, analysis was performed outside of hold and qualified results are reported.

The continuing calibration verification (CCV) analyzed in 580-193205 was outside the method criteria for the following analyte: vinyl chloride. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA Method 8270C:
The method blank for prep batch 580-193707 contained Butyl benzyl phthalate and Bis(2-ethylhexyl)phthalate above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

The following analytes recovered outside control limits for the LCS/LCSD associated with prep batch 580-193707: Benzoic acid. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported. Affected samples: MW-15:(164-165) (590-1109-22), (LCS 580-193707/2-A), (LCSD 580-193707/3-A), (590-1109-B-22-J MS) and (590-1109-B-22-K MSD)

The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-193707 recovered outside control limits for the following analytes: Benzoic acid.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1109-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-1109-22	MW-15:(164-165)	Solid	06/18/15 09:40	06/18/15 15:40

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
H	Sample was prepped or analyzed beyond the specified holding time
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
*	LCS or LCSD is outside acceptance limits.
*	RPD of the LCS and LCSD exceeds the control limits
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F1	MS and/or MSD Recovery is outside acceptance limits.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.
F3	Duplicate RPD exceeds the control limit
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1109-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-15
Washington	State Program	10	C569	01-06-16

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-16

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
6020A	3050B	Solid	Iron
8260B	5035	Solid	1,1,1,2-Tetrachloroethane
8260B	5035	Solid	1,1,1-Trichloroethane
8260B	5035	Solid	1,1,2,2-Tetrachloroethane
8260B	5035	Solid	1,1,2-Trichloroethane
8260B	5035	Solid	1,1-Dichloroethane
8260B	5035	Solid	1,1-Dichloroethene
8260B	5035	Solid	1,1-Dichloropropene
8260B	5035	Solid	1,2,3-Trichlorobenzene
8260B	5035	Solid	1,2,3-Trichloropropane
8260B	5035	Solid	1,2,4-Trichlorobenzene
8260B	5035	Solid	1,2,4-Trimethylbenzene
8260B	5035	Solid	1,2-Dibromo-3-Chloropropane
8260B	5035	Solid	1,2-Dichlorobenzene
8260B	5035	Solid	1,2-Dichloroethane
8260B	5035	Solid	1,2-Dichloropropane
8260B	5035	Solid	1,3,5-Trimethylbenzene
8260B	5035	Solid	1,3-Dichlorobenzene
8260B	5035	Solid	1,3-Dichloropropane
8260B	5035	Solid	1,4-Dichlorobenzene
8260B	5035	Solid	2,2-Dichloropropane
8260B	5035	Solid	2-Chlorotoluene
8260B	5035	Solid	4-Chlorotoluene
8260B	5035	Solid	4-Isopropyltoluene
8260B	5035	Solid	Benzene
8260B	5035	Solid	Bromobenzene
8260B	5035	Solid	Bromoform
8260B	5035	Solid	Bromomethane
8260B	5035	Solid	Carbon tetrachloride
8260B	5035	Solid	Chlorobenzene
8260B	5035	Solid	Chlorobromomethane
8260B	5035	Solid	Chlorodibromomethane
8260B	5035	Solid	Chloroethane
8260B	5035	Solid	Chloroform
8260B	5035	Solid	Chloromethane
8260B	5035	Solid	cis-1,2-Dichloroethene
8260B	5035	Solid	cis-1,3-Dichloropropene
8260B	5035	Solid	Dibromomethane
8260B	5035	Solid	Dichlorobromomethane
8260B	5035	Solid	Dichlorodifluoromethane

Laboratory: TestAmerica Seattle (Continued)

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-16

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8260B	5035	Solid	Ethylbenzene
8260B	5035	Solid	Ethylene Dibromide
8260B	5035	Solid	Hexachlorobutadiene
8260B	5035	Solid	Isopropylbenzene
8260B	5035	Solid	Methyl tert-butyl ether
8260B	5035	Solid	Methylene Chloride
8260B	5035	Solid	m-Xylene & p-Xylene
8260B	5035	Solid	Naphthalene
8260B	5035	Solid	n-Butylbenzene
8260B	5035	Solid	N-Propylbenzene
8260B	5035	Solid	o-Xylene
8260B	5035	Solid	sec-Butylbenzene
8260B	5035	Solid	Styrene
8260B	5035	Solid	tert-Butylbenzene
8260B	5035	Solid	Tetrachloroethene
8260B	5035	Solid	Toluene
8260B	5035	Solid	trans-1,2-Dichloroethene
8260B	5035	Solid	trans-1,3-Dichloropropene
8260B	5035	Solid	Trichloroethene
8260B	5035	Solid	Trichlorofluoromethane
8260B	5035	Solid	Vinyl chloride
8270C	3550B	Solid	1,2,4-Trichlorobenzene
8270C	3550B	Solid	1,2-Dichlorobenzene
8270C	3550B	Solid	1,3-Dichlorobenzene
8270C	3550B	Solid	1,4-Dichlorobenzene
8270C	3550B	Solid	1-Methylnaphthalene
8270C	3550B	Solid	2,4,5-Trichlorophenol
8270C	3550B	Solid	2,4,6-Trichlorophenol
8270C	3550B	Solid	2,4-Dichlorophenol
8270C	3550B	Solid	2,4-Dimethylphenol
8270C	3550B	Solid	2,4-Dinitrophenol
8270C	3550B	Solid	2,4-Dinitrotoluene
8270C	3550B	Solid	2,6-Dinitrotoluene
8270C	3550B	Solid	2-Chloronaphthalene
8270C	3550B	Solid	2-Chlorophenol
8270C	3550B	Solid	2-Methylnaphthalene
8270C	3550B	Solid	2-Methylphenol
8270C	3550B	Solid	2-Nitroaniline
8270C	3550B	Solid	2-Nitrophenol
8270C	3550B	Solid	3 & 4 Methylphenol
8270C	3550B	Solid	3,3'-Dichlorobenzidine
8270C	3550B	Solid	3-Nitroaniline
8270C	3550B	Solid	4,6-Dinitro-2-methylphenol
8270C	3550B	Solid	4-Bromophenyl phenyl ether
8270C	3550B	Solid	4-Chloro-3-methylphenol
8270C	3550B	Solid	4-Chloroaniline

Narrative

Receipt
The samples were received on 6/29/2015 5:20 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.5º C.

GC/MS VOA Method 8260B:
The following samples was analyzed outside of analytical holding time. LFB-1: (30-31) (590-1230-22) and LFB-2: (52-53) (590-1230-24).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA Method 8270C:
The method blank for prep batch 580-193860 contained Butyl benzyl phthalate above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-193860 recovered outside control limits for the following analyte: Pentachlorophenol. The individual LCS/LCSD recoveries were in control.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA Method 8151A:
Continuing calibration verification (CCVs) associated with 8151A batch 280-284920 recovered outside acceptance criteria, low biased, for 2,4-DB on the rear column. The front column was in-control. A reporting limit (RL) standard was analyzed below the reporting limit for 2,4-DB, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Continuing calibration verifications (CCVs) associated with 8151A batch 280-284920 recovered above the upper control limit for multiple targets on the back column. All samples were non-detects for the affected analytes; therefore, they did not need confirmation. The front column was in-control. All affected QC were reported from the in-control column. The confirmation column CCV did not adversely affect data quality.

GC Semi VOA Method 8081A:
In analytical batch 580-195465, the following samples from preparation batch 580-194135 and 580-194135 required a Florisil clean-up, via EPA Method 3620C, to reduce matrix interferences: LFB-1: (30-31) (590-1230-22), LFB-2: (52-53) (590-1230-24), (LCS 580-194135/2-A), (LCS 580-194135/24-A), (LCSD 580-194135/25-A), (LCSD 580-194135/3-A), (MB 580-194135/1-A), (580-51082-B-9-E), (580-51082-B-9-F MS) and (580-51082-B-9-G MSD). The Florisil lot used was ID: 1298295.

The following analyte recovered outside control limits for the LCSD associated with preparation batch 580-194135 and analytical batch 580-195465: Aldrin This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals Method 6020A:
The continuing calibration blank (CCB) for analytical batch 194353 contained chromium above the reporting limit (RL). All reported samples associated with this CCB contained this analyte at a concentration greater than 10X the value found in the CCB; therefore, re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 8151A: The following sample foamed when concentrated HCl was added: LFB-2: (52-53) (590-1230-24).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1230-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-1230-22	LFB-1: (30-31)	Solid	06/26/15 13:20	06/29/15 17:20
590-1230-24	LFB-2: (52-53)	Solid	06/26/15 09:20	06/29/15 17:20

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	RPD of the LCS and LCSD exceeds the control limits

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
X	Surrogate is outside control limits
*	LCS or LCSD is outside acceptance limits.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.

General Chemistry

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

8270C	3550B	Solid	Bis(2-chloroethoxy)methane
8270C	3550B	Solid	Bis(2-chloroethyl)ether
8270C	3550B	Solid	Bis(2-ethylhexyl) phthalate
8270C	3550B	Solid	Butyl benzyl phthalate
8270C	3550B	Solid	Carbazole
8270C	3550B	Solid	Chrysene
8270C	3550B	Solid	Dibenz(a,h)anthracene
8270C	3550B	Solid	Dibenzofuran
8270C	3550B	Solid	Diethyl phthalate
8270C	3550B	Solid	Dimethyl phthalate
8270C	3550B	Solid	Di-n-butyl phthalate
8270C	3550B	Solid	Di-n-octyl phthalate
8270C	3550B	Solid	Fluoranthene
8270C	3550B	Solid	Fluorene
8270C	3550B	Solid	Hexachlorobenzene
8270C	3550B	Solid	Hexachlorobutadiene
8270C	3550B	Solid	Hexachlorocyclopentadiene
8270C	3550B	Solid	Hexachloroethane

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1230-1

Laboratory: TestAmerica Seattle (Continued)

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-16

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8270C	3550B	Solid	Indeno[1,2,3-cd]pyrene
8270C	3550B	Solid	Isophorone
8270C	3550B	Solid	Naphthalene
8270C	3550B	Solid	Nitrobenzene
8270C	3550B	Solid	N-Nitrosodi-n-propylamine
8270C	3550B	Solid	N-Nitrosodiphenylamine
8270C	3550B	Solid	Pentachlorophenol
8270C	3550B	Solid	Phenanthrene
8270C	3550B	Solid	Phenol
8270C	3550B	Solid	Pyrene
9012A	9012A	Solid	Cyanide, Total

Job ID: 590-1281-1

Laboratory: TestAmerica Spokane

Narrative

Receipt
The samples were received on 7/2/2015 5:00 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.5º C.

GC/MS VOA Method 8260B:
The following samples was analyzed outside of analytical holding time. LFB-3:(68-69) (590-1281-1), LFB-4 :(92-93) (590-1281-3) and LFB-5:(49-50) (590-1281-4).

Internal standard responses were outside of acceptance limits for the following sample: LFB-5:(49-50) (590-1281-4). The sample showed evidence of matrix interference.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA Method 8270C:
The method blank for preparation batch 580-194254 and analytical batch 580-194603 contained Butyl benzyl phthalate and Diethyl phthalate above the method detection limit. This target analyte concentration was less than half the reporting limit; therefore, re-extraction and re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA Method 8151A:
The closing continuing calibration verification (CCV) associated with 8151A batch 280-286098 recovered above the upper control limit for all targets. The laboratory control sample recovered above the upper control limit for Dalapon and MCPP. 590-1281-3 had a detection for Dichlorprop above the method detection limit but estimated below the reporting limit indicated by the J-flag. The opening CCV was in-control, but the closing CCV recovered high at +30%D. The samples and method blank (MB) associated with this CCV were below the limit of quantitation for all analytes; therefore, the data have been reported.

GC Semi VOA Method 8081A:
In analytical batch 580-195727, the continuing calibration verification (CCV) associated with the following samples from preparation batch 580-194438 and 580-194438 recovered above the upper control limit for DCB Decachlorobiphenyl. The samples associated with this CCV were non-detects for the affected target analytes, and all sample DCB surrogate recoveries were not adversely affected by the high bias; therefore, the data have been qualified and reported.

GC Semi VOA Method 8082A:
Surrogate recovery for the following sample was outside control limits: LFB-5:(49-50) (590-1281-4). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 8151A: The following samples foamed after the addition of HCl: LFB-4 :(92-93) (590-1281-3) and LFB-5:(49-50) (590-1281-4).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1281-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-1281-1	LFB-3:(68-69)	Solid	06/30/15 09:00	07/02/15 17:00
590-1281-3	LFB-4 :(92-93)	Solid	07/01/15 11:40	07/02/15 17:00
590-1281-4	LFB-5:(49-50)	Solid	07/01/15 17:00	07/02/15 17:00

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	ISTD response or retention time outside acceptable limits

GC/MS Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.

GC Semi VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
X	Surrogate is outside control limits

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The samples were received on 7/16/2015 5:02 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.8º C.

GC/MS VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC/MS Semi VOA Method 8270D:
The continuing calibration verification (CCV) associated with batch 580-195628 recovered above the upper control limit for 4-Nitrophenol. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported. The following samples are impacted: MW-16 (69-70) (590-1429-1), LFB-8 (17-18) (590-1429-3), LFB-9 (11-12) (590-1429-4), LFB-10 (45-46) (590-1429-5), (CCVIS 580-195628/3), (LCS 580-195470/2-A), (LCSD 580-195470/3-A), (MB 580-195470/1-A), (590-1429-B-3-C MS) and (590-1429-B-3-D MSD).

The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 580-195470 and analytical batch 580-195628 recovered outside control limits for the following analyte: 4-Nitrophenol. The analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported. Affected samples: MW-16 (69-70) (590-1429-1), LFB-8 (17-18) (590-1429-3), LFB-9 (11-12) (590-1429-4), LFB-10 (45-46) (590-1429-5), (LCS 580-195470/2-A), (LCSD 580-195470/3-A), (590-1429-B-3-C MS) and (590-1429-B-3-D MSD)

The method blank for preparation batch 580-195470 and analytical batch 580-195628 contained Diethyl phthalate and Butyl benzyl phthalate above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA Method 8141A:
The grand mean exception, as outlined in EPA method 8000B, was applied to the continuing calibration verification (CCV) standard associated with batch 280-287000 for the following compounds: Naled and Dichlorvos. This rule states that when one or more compounds in the CCV fail to meet acceptance criteria, the initial calibration (ICAL) may be used for quantitation if the average %D (the grand mean) of all the compounds in the CCV is less than or equal to 15 %D. The associated samples were ND for the affected analytes. A calibration level 1 standard was run following the CCVs and all target analytes were detected.

GC Semi VOA Method 8151A:
The grand mean exception, as outlined in EPA method 8000B, was applied to the continuing calibration verification (CCV) standard associated with batch 280-290062 for the following compounds: MCPA and MCPP. This rule states that when one or more compounds in the CCV fail to meet acceptance criteria, the initial calibration (ICAL) may be used for quantitation if the average %D (the grand mean) of all the compounds in the CCV is less than or equal to 15 %D. The associated samples are ND for the affected compounds.

The laboratory control sample (LCS) in preparation batch 280-287783 and analytical batch 280-290062 recovered below the lower control limit on one column for MCPA and Dichlorprop. The associated samples are ND on both columns and are reported from the column which is in control in the LCS.

GC Semi VOA Method 8081A:
In analytical batch 580-195872, the following samples from preparation batch 580-195564 and 580-195564 required a Florisil clean-up, via EPA Method 3620C, to reduce matrix interferences: LFB-8 (17-18) (590-1429-3), LFB-9 (11-12) (590-1429-4), LFB-10 (45-46) (590-1429-5), (LCS 580-195564/2-A), (LCSD 580-195564/3-A), (MB 580-195564/1-A), (580-51670-B-7-E), (580-51670-B-7-F MS) and (580-51670-B-7-G MSD). The Florisil ID was: 1298295.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Job ID: 590-1429-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1429-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-1429-1	MW-16 (69-70)	Solid	07/14/15 15:30	07/17/15 17:02
590-1429-3	LFB-8 (17-18)	Solid	07/16/15 10:00	07/17/15 17:02
590-1429-4	LFB-9 (11-12)	Solid	07/16/15 11:20	07/17/15 17:02

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F1	MS and/or MSD Recovery is outside acceptance limits.

GC Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The sample was received on 7/20/2015 4:45 PM; the sample arrived in good condition. The temperature of the cooler at receipt was 7.8º C.

Receipt Exceptions

The following sample was received at the laboratory outside the required temperature criteria: LFB-11 (42-43) (590-1460-1).

GC/MS VOA Method 8260B:
The method blank for analytical batch 580-196522 contained Methylene Chloride above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-extraction and/or re-analysis of samples was not performed.

The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 580-196522 recovered outside control limits for the following analytes: Multi analytes. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

The following sample was prepared outside of the preparation holding time (48hrs for unfrozen bulk soil preparation) due to the preserved samples not being located until after the holding had expired. Sample reported and H flag qualifier has been added: LFB-11 (42-43) (590-1460-1).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA Method 8270C:
The method blank for preparation batch 580-196274 and analytical batch 580-196337 contained Benzyl alcohol above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA Method 8141A:
The grand mean exception, as outlined in EPA method 8000B, was applied to the continuing calibration verification (CCV) standard associated with batch 280-288625. This rule states that when one or more compounds in the CCV fail to meet acceptance criteria, the initial calibration (ICAL) may be used for quantitation if the average %D (the grand mean) of all the compounds in the CCV is less than or equal to 15 %D. The associated samples were ND for the affected analytes. Naled recoveries were over 80% low in the closing CCV, therefore naled is reported from a more diluted sample earlier in the run.

GC Semi VOA Method 8151A:
The grand mean exception, as outlined in EPA method 8000B, was applied to the continuing calibration verification (CCV) standard associated with batch 280-290062 for the following compounds: MCPA and MCPP. This rule states that when one or more compounds in the CCV fail to meet acceptance criteria, the initial calibration (ICAL) may be used for quantitation if the average %D (the grand mean) of all the compounds in the CCV is less than or equal to 15 %D. The associated samples are ND for the affected compounds.

The laboratory control sample (LCS) in preparation batch 280-287783 and analytical batch 280-290062 recovered below the lower control limit on one column for MCPA and Dichlorprop. The associated samples are ND on both columns and are reported from the column which is in control in the LCS.

GC Semi VOA Method 8081A:
In analytical batch 580-197011, the continuing calibration verification (CCV) associated with samples from preparation batch 580-196413 recovered above the upper control limit for DCB Decachlorobiphenyl, Methoxychlor and Toxaphene. The samples associated with this CCV were non-detects for the affected analytes, all sample DCB surrogate recoveries were not adversely affected by the high bias, and the Methoxychlor recoveries in the LCS, LCSD, MS and MSD were not adversely affected by the high bias; therefore, the data have been qualified and reported. The following samples are impacted: LFB-11 (42-43) (590-1460-1), (CCV 580-197011/56), (CCV 580-197011/65), (CCV 580-197011/66), (LCS 580-196413/2-A), (LCSD 580-196413/3-A), (MB 580-196413/1-A), (590-1460-B-1-K MS) and (590-1460-B-1-L MSD).

Job ID: 590-1460-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

In analytical batch 580-197011, the following samples from preparation batch 580-196413 required a Florisil clean-up, via EPA Method 3620C, to reduce matrix interferences: LFB-11 (42-43) (590-1460-1), (LCS 580-196413/2-A), (LCSD 580-196413/3-A), (MB 580-196413/1-A), (590-1460-B-1-K MS) and (590-1460-B-1-L MSD). The Florisil lot ID used was: 1298295.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.

GC Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
*	LCS or LCSD is outside acceptance limits.
^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1460-1

Client Sample ID: LFB-11 (42-43)
Date Collected: 07/17/15 11:30
Date Received: 07/20/15 16:45

Lab Sample ID: 590-1460-1
Matrix: Solid
Percent Solids: 93.7

Method: 8260B - Volatile Organic Compounds (GC/MS)

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	False	Cooler temperature outside required temperature criteria.
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The samples were received on 7/30/2015 9:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 6.1º C.

GC/MS VOA Method 8260B:
The continuing calibration verification (CCV) associated with batch 197353 recovered above the upper control limit for multi analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following sample is impacted: (CCVIS 580-197353/2).

The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for batch 197353 recovered outside control limits for the following analytes: multi analytes. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

The method blank for batch 197353 contained Methylene chloride above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

Internal standard responses were outside of acceptance limits, biased low, for the following samples: LFB-15 (35-37) (590-1569-4), LFB-16 (35-37) (590-1569-5) and LFB-17 (42-43) (590-1569-6). The samples show evidence of matrix interference which was confirmed by re-analysis. The data has been qualified as high biased and reported.

Internal standard responses were essentially non-existent for the following sample: LFB-15 (35-37) (590-1569-4). This may be due to the sample matrix containing more than double the recommended solid weight.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA Method 8270C:
The continuing calibration verification (CCV) associated with batch 580-198114 recovered above the upper control limit for Indeno(1,2,3-cd)pyrene. The affected analytes was not detected above the RL in the associated samples; therefore, the data have been reported. The following samples are impacted: LFB-12 (29-30) (590-1569-1), LFB-15 (35-37) (590-1569-4), LFB-16 (35-37) (590-1569-5), LFB-17 (42-43) (590-1569-6), (CCVIS 580-198114/3), (LCS 580-196778/2-A), (LCSD 580-196778/3-A), (MB 580-196778/1-A), (590-1569-C-6-C MS) and (590-1569-C-6-D MSD).

The following analyte recovered outside control limits for the LCS associated with preparation batch 580-196778 and analytical batch 580-198114: 4-Chloroaniline. The associated LCSD also failed the recovery criteria for Benzoic acid. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported. Affected samples: LFB-12 (29-30) (590-1569-1), LFB-13 (72-73) (590-1569-2), LFB-14 (97-98) (590-1569-3), LFB-15 (35-37) (590-1569-4), LFB-16 (35-37) (590-1569-5), LFB-17 (42-43) (590-1569-6), (LCS 580-196778/2-A) and (LCSD 580-196778/3-A)

The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-196778 recovered outside control limits for the following analytes: Benzoic acid and 4,6-Dinitro-2-methylphenol.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA Method 8141A:
The grand mean exception, as outlined in EPA method 8000B, was applied to the continuing calibration verification (CCV) standard associated with batch 280-289733. This rule states that when one or more compounds in the CCV fail to meet acceptance criteria, the initial calibration (ICAL) may be used for quantitation if the average %D (the grand mean) of all the compounds in the CCV is less than or equal to 15 %D. The associated samples were ND for the affected analytes. A calibration level 1 standard was run following the CCVs and all target analytes were detected.

GC Semi VOA Method 8151A:
The grand mean exception, as outlined in EPA method 8000B, was applied to the continuing calibration verification (CCV) standard associated with batch 280-290627 for the following compounds: MCPA and 2,4-D. This rule states that when one or more compounds in the CCV fail to meet acceptance criteria, the initial calibration (ICAL) may be used for quantitation if the average %D (the grand mean) of all the compounds in the CCV is less than or equal to 15%D.

Job ID: 590-1569-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

GC Semi VOA Method 8081A:
The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-196777 recovered outside control limits for the following analytes, however the %R is still within control limits: gamma-Chlordane.

GC Semi VOA Method 8082A:
Surrogate recovery for the following samples was outside control limits: LFB-12 (29-30) (590-1569-1) and LFB-16 (35-37) (590-1569-5). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

GC Semi VOA Method NWTPH-HCID:
Surrogate recovery for the following sample was outside control limits: LFB-15 (35-37) (590-1569-4). Evidence of matrix interference due to high target analytes is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	ISTD response or retention time outside acceptable limits
X	Surrogate is outside control limits

GC/MS Semi VOA

Qualifier	Qualifier Description
*	RPD of the LCS and LCSD exceeds the control limits
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F1	MS and/or MSD Recovery is outside acceptance limits.
F2	MS/MSD RPD exceeds control limits

GC Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
X	Surrogate is outside control limits
*	RPD of the LCS and LCSD exceeds the control limits

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	False	Sample splitting required for subcontract purposes.
Residual Chlorine Checked.	N/A

Case Narrative

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1655-1

Job ID: 590-1655-1

Laboratory: TestAmerica Spokane

Narrative

Receipt
The sample was received on 8/7/2015 9:15 AM; the sample arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 6.1° C.

Receipt Exceptions

Changed the sample ID of sample 590-1655-1 per the client's request.

GC/MS VOA Method 8260B:
The laboratory control sample (LCS) for 198369 recovered outside control limits for the following analytes: 1,4-Dichlorobenzene. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample duplicate (LCSD) for 198369 recovered outside control limits for the following analytes: 1,1,2,2-Tetrachloroethane, 1,2-Dichlorobenzene, 1,2,3-Trichloropropane, 1,2-Dibromo-3-Chloropropane and 1,4-Dichlorobenzene. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

The method blank for 198369 contained Methylene chloride above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA Method 8270C:
The continuing calibration verification (CCV) associated with batch 580-198347 recovered above the upper control limit for Hexachlorocyclopentadiene and 2,4-Dimethylphenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: SB-12 (235-236.5) (590-1655-1), (CCVIS 580-198347/3), (LCS 580-198177/2-A), (LCSD 580-198177/3-A) and (MB 580-198177/1-A).

The method blank for preparation batch 580-198177 and analytical batch 580-198347 contained Diethyl phthalate above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

The following analyte recovered outside control limits for the LCS associated with preparation batch 580-198177 and analytical batch 580-198347: Di-n-octyl phthalate. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

TestAmerica Job ID: 590-1655-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F2	MS/MSD RPD exceeds control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1655-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-15
Washington	State Program	10	C569	01-06-16

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-16

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
6020A	3050B	Solid	Iron
8260B	5035	Solid	1,1,1,2-Tetrachloroethane
8260B	5035	Solid	1,1,1-Trichloroethane
8260B	5035	Solid	1,1,2,2-Tetrachloroethane
8260B	5035	Solid	1,1,2-Trichloroethane
8260B	5035	Solid	1,1-Dichloroethane
8260B	5035	Solid	1,1-Dichloroethene
8260B	5035	Solid	1,1-Dichloropropene
8260B	5035	Solid	1,2,3-Trichlorobenzene
8260B	5035	Solid	1,2,3-Trichloropropane
8260B	5035	Solid	1,2,4-Trichlorobenzene
8260B	5035	Solid	1,2,4-Trimethylbenzene
8260B	5035	Solid	1,2-Dibromo-3-Chloropropane
8260B	5035	Solid	1,2-Dichlorobenzene
8260B	5035	Solid	1,2-Dichloroethane

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The samples were received on 8/24/2015 4:25 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.5º C.

GC/MS VOA Method 8260B:
The continuing calibration verification (CCV) associated with batch 199342 recovered above the upper control limit for Vinyl chloride. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

The method blank for batch 199342 contained Methylene chloride above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

Internal standard responses were outside of acceptance limits for the following sample: MW-15A (204-205) (590-1807-2). Matrix interference is suspected. The sample was re-analyzed with the remaining vial, however Chemstation had a random run error on the sample and data was not collected. Therefore matrix affects could not be confirmed. Internal standard responses were below method limits, therefore the data has a high bias associated with the results; all analytes were below the reporting limit. The data has been qualified and reported.

Surrogate recovery for the following sample was outside control limits: MW-15A (204-205) (590-1807-2). Matrix interference is suspected. The sample was re-analyzed with the remaining vial, however Chemstation had a random run error on the sample and data was not collected. Therefore matrix affects could not be confirmed. The data has been qualified and reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA Method 8270C:
The continuing calibration verification (CCV) associated with batch 580-199683 recovered above the upper control limit for 4-Nitrophenol and Indeno(1,2,3-cd)pyrene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-7D (169-170.5) (590-1807-1), MW-15A (204-205) (590-1807-2), (CCVIS 580-199683/3), (CCVL 580-199683/4), (LCS 580-199148/2-A), (LCSD 580-199148/3-A), (MB 580-199148/1-A), (580-52631-A-13-J), (580-52631-A-13-K MS) and (580-52631-A-13-L MSD).

The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-199683 was outside criteria for N-Nitrosodi-n-propylamine, Nitrobenzene, Isophorone and Bis(2-chloroethoxy)methane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated. A low level CCV (CCVL) is analyzed to prove sensitivity down to the reporting limit (RL) for all affected targets.

The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 580-199148 and analytical batch 580-199683 recovered above control limits for 4-Nitrophenol. This target was biased high in the LCS/LCSD and not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA Method 8141A:
The grand mean exception, as outlined in EPA method 8000B, was applied to the continuing calibration verification (CCV) standard associated with batch 280-293529. This rule states that when one or more compounds in the CCV fail to meet acceptance criteria, the initial calibration (ICAL) may be used for quantitation if the average %D (the grand mean) of all the compounds in the CCV is less than or equal to 15 %D. The associated samples were ND. Dichlorvos is reported from the primary column.

GC Semi VOA Method NWTPH-HCID:
Surrogate recovery for the following sample was outside the upper control limit: (MB 590-3161/1-A). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

Job ID: 590-1807-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described above in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-1807-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-1807-1	MW-7D (169-170.5)	Solid	08/17/15 16:30	08/24/15 16:25
590-1807-2	MW-15A (204-205)	Solid	08/24/15 10:30	08/24/15 16:25

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	ISTD response or retention time outside acceptable limits
X	Surrogate is outside control limits

GC/MS Semi VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
X	Surrogate is outside control limits

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	False	Sample splitting required for subcontract purposes.
Residual Chlorine Checked.	N/A

Job ID: 590-1968-1

Laboratory: TestAmerica Spokane

Narrative

Revision
Per the client's request the data has been converted and reported in mg/m3 instead of ppb v/v.

Receipt
The samples were received on 9/16/2015 4:20 PM; the samples arrived in good condition.

Air - GC/MS VOA Method(s) TO-15:
The laboratory control sample duplicate (LCSD) for 87541 recovered outside control limits for the following analytes: Chloromethane. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 87541 recovered outside control limits for the following analytes: Chloroethane.

Surrogate, 4-Bromofluorobenzene, recovery for the following samples was outside control limits: LFB-3:091615 (590-1968-5) and LFB-4:091615 (590-1968-6). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Internal standard (ISTD) response for the following sample was outside control limits: LFB-15:091615 (590-1968-7). The samples was re-analyzed with concurring results, and the original set of data has been reported.

The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 87719 recovered outside control limits for the following analytes: 1,2-Dichloro-1,1,2,2-tetrafluoroethane. The recovery of this analyte in the LCS and LCSD is within acceptance criteria, therefore there is no adverse effect on the data.

Surrogate 1,2-Dichloroethane-d4 (Surr) recovery for the following samples was outside control limits: (LCS 320-87719/26) and (LCSD 320-87719/42). This analyte is not used as a monitoring analyte.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Method(s) TO-15: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 87719 recovered outside control limits for the following analytes: 1,2-Dichloro-1,1,2,2-tetrafluoroethane. The recovery of this analyte in the LCS and LCSD is within acceptance criteria, therefore there is no adverse effect on the data.

Method(s) TO-15: Surrogate 1,2-Dichloroethane-d4 (Surr) recovery for the following samples was outside control limits: (LCS 320-87719/26) and (LCSD 320-87719/42). This analyte is not used as a monitoring analyte.

Qualifiers

Air - GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.
X	Surrogate is outside control limits
E	Result exceeded calibration range.
*	ISTD response or retention time outside acceptable limits
*	RPD of the LCS and LCSD exceeds the control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	False	Thermal preservation not required.
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Data Validation Report

523 East Second Avenue, Spokane, Washington 99202, Telephone: 509.363.3125 www.geoengineers.com

Project:	Marshall Landfill Site August and September 2016 Samples
GEI File No:	00504-104-00
Date:	November 16, 2016

This report documents the results of a United States Environmental Protection Agency (EPA)-defined Stage 2A data validation (EPA Document 540-R-08-005; EPA 2009) of analytical data from the analyses of water and air samples collected as part of the August 2016 and September 2016 sampling events, and the associated laboratory and field quality control samples. The samples were obtained from the Marshall Landfill site located in Spokane County, Washington.

In summary and in our opinion, the quality and accuracy of the analytical data are acceptable for the intended use, with the qualifications applied from the data validation. The primary data validation qualifiers were: (1) GeoEngineers, Inc. (GeoEngineers) qualified selected data as estimated (J/UJ) because of holding time, accuracy, and precision outliers; and (2) GeoEngineers qualified selected data as non-detected (U) because of method blank contamination; and (3) GeoEngineers qualified selected data as estimated (J) because of ion abundance ratio (dioxin/furans only) outliers.

The evaluation criteria and qualifications are discussed in greater detail below; a summary of qualified samples is listed in Table 2.

OBJECTIVE AND QUALITY CONTROL ELEMENTS

GeoEngineers completed the data validation consistent with the EPA Contract Laboratory Program National Functional Guidelines for Superfund Organic Methods Data Review (EPA 2008), Inorganic Superfund Data Review (EPA 2010), and Chlorinated Dioxin/Furan Data Review (EPA 2011) (National Functional Guidelines) to determine if the laboratory analytical results meet the project objectives and are usable for their intended purpose. Data usability was assessed by determining if:

- The samples were analyzed using well-defined and acceptable methods that provide reporting limits below applicable regulatory criteria;
- The precision and accuracy of the data are well-defined and sufficient to provide defensible data; and
- The quality assurance/quality control (QA/QC) procedures utilized by the laboratory meet acceptable industry practices and standards.

In accordance with the Quality Assurance Project Plan (QAPP), Appendix B of the Remedial Investigation/Feasibility Study Work Plan (GeoEngineers, 2015), the data validation included review of the following QC elements:

- Data Package Completeness
- Chain-of-Custody Documentation
- Holding Times and Sample Preservation
- Surrogate Recoveries

- Method Blanks
- Matrix Spikes/Matrix Spike Duplicates
- Laboratory Control Samples/Laboratory Control Sample Duplicates
- Laboratory and Field Duplicates
- Miscellaneous

VALIDATED SAMPLE DELIVERY GROUPS

This data validation included review of the sample delivery groups (SDGs) listed below in Table 1.

TABLE 1: SUMMARY OF VALIDATED SAMPLE DELIVERY GROUPS

Laboratory SDG	Samples Validated

CHEMICAL ANALYSIS PERFORMED

TestAmerica Laboratories, Inc. (TestAmerica), located in Spokane, Washington, performed laboratory analyses on the samples using one or more of the following methods:

Water

- Gasoline-range Hydrocarbons (NWTPH-Gx) by Method NWTPH-Gx;
- Petroleum Hydrocarbons (NWTPH-Dx) by Method NWTPH-Dx;
- Silica Gel Treated and Hexane Extractable Material - Oil and Grease by Method EPA1664B;
- Volatile Organic Compounds (VOCs) by Methods SW8260C/EPA624;
- 1,2-Dibromoethane (EDB) by Method SW8011;
- Semi-volatile Organic Compounds (SVOCs) by Method SW8270D;

- Polychlorinated Biphenyls (PCBs) by Method SW8082A;
- Organochlorine Pesticides by Method SW8081B;
- Organophosphorous Pesticides by Method SW8141B;
- Chlorinated Herbicides by Method SW8151A;
- Dioxins and Furans by Method SW8290A;
- Total Metals by Methods EPA207.7 Rev 4.4/EPA200.8/EPA245.1;
- Dissolved Metals by Methods EPA200.8/EPA245.1;
- Anions by Method EPA300.0;
- Total Cyanide by Method EPA335.4;
- Ammonia (as N) by Method EPA350.1;
- Chemical Oxygen Demand (COD) by Method EPA410.4;
- Total Organic Carbon (TOC) by Method SM5310C;
- pH by Method SM4500-HB; and
- Total Coliform and Escherichia coli by Method SM9223B.

Air

- Volatile Organic Compounds in Air (VOCs-Air) by Method TO-15

DATA VALIDATION SUMMARY

The results for each of the QC elements are summarized below.

Data Package Completeness

TestAmerica provided the required deliverables for the data validation according to the National Functional Guidelines. The laboratory followed adequate corrective action processes and the identified anomalies were discussed in the relevant laboratory case narrative.

Chain-of-Custody Documentation

Chain-of-custody (COC) forms were provided with the laboratory analytical reports. The COCs were accurate and complete when submitted to the laboratory, with the following exception:

SDG 590-4284-1: The laboratory noted that for Samples MW-2A-082216, MW-4A-082216, and MW-16A-082216 the sample vial labels listed a sample collection date of 8/22/2016 and COC listed a sample collection date of 8/23/2016. Per GeoEngineers, the samples were logged with the sample collection date of 8/22/2016.

Holding Times and Sample Preservation

The sample holding time is defined as the time that elapses between sample collection and sample analysis. Maximum holding time criteria exist for each analysis to help ensure that the analyte concentrations found at the time of analysis reflect the concentration present at the time of sample collection. Established holding times were met for each analysis, with the exceptions noted below. The sample coolers arrived at the laboratory within the appropriate temperatures of between 2 and 6 degrees Celsius, with the exceptions noted below.

SDG 590-4322-1: (Anions) The 48-hour holding time for nitrate as N analysis was exceeded by 2 days in Sample MW-1A-082516. The positive result for nitrate as N was qualified as estimated (J) in this sample.

(pH) The 15-minute holding time for pH was exceeded in Sample Tank-2:092816. The result for pH was qualified as estimated (J) in this sample.

Surrogate Recoveries

A surrogate compound is a compound that is chemically similar to the organic analytes of interest, but unlikely to be found in an environmental sample. Surrogates are used for organic analyses and are added to the samples, standards, and blanks to serve as an accuracy and specificity check of each analysis. The surrogates are added to the samples at a known concentration and percent recoveries are calculated following analysis. The surrogate percent recoveries for field samples were within the laboratory control limits, with the following exceptions:

SDG 590-4302-1: (SVOCs) The percent recovery for surrogate terphenyl-d14 was less than the control limits in Sample MW-14:082416; however, the sample was spiked with two additional base neutral surrogates and in each case the percent recoveries were within their respective control limits. No action was required for this outlier.

SDG 590-4339-1: (VOCs-Air) The percent recovery for surrogate 4-Bromofluorobenzene was greater than the control limits in Samples LFB-4-082616 and LFB-11-082616; however, the samples were spiked with two additional surrogates and in each case the percent recoveries were within their respective control limits. No action was required for these outliers.

SDG 590-4346-1: (SVOCs) The percent recoveries for surrogates 2-Fluorophenol and phenol-d5 were less than the control limits in Sample MW-16:082916; however, the sample was spiked with one additional acidic surrogate and the percent recovery was within the control limits. No action was required for these outliers.

Method Blanks

Method blanks are analyzed to ensure that laboratory procedures and reagents do not introduce measurable concentrations of the analytes of interest. A method blank was analyzed with each batch of samples, at a frequency of 1 per 20 samples. For each sample batch, method blanks for the applicable methods were analyzed at the required frequency. None of the analytes of interest were detected in the method blanks, with the following exceptions:

SDG 590-4267-1: (NWTPH-Dx) There was a positive result for diesel-range hydrocarbons detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/23/2016. There were no positive results for diesel-range hydrocarbons in the associated field samples; therefore, no qualifications were required.

(SVOCs) There were positive results for benzyl alcohol and bis(2-ethylhexyl) phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/26/2016. The positive results for benzyl alcohol and bis(2-ethylhexyl) phthalate were qualified as non-detected (U) in Samples MW-8A-082116, MW-8B-082116, and MW-9A-082116.

(Anions) There was a positive result for nitrate as N detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/22/2016. The associated field samples, MW-8A-082116 and MW-8B-082116, reported positive results detected at concentrations greater than

10X the concentration in the method blank for nitrate as N; and there were no positive results for nitrate as N in Sample MW-9A-082116; therefore, no qualifications were required.

(Dioxins/Furans) There were positive results for 1,2,3,4,6,7,8-HpCDF and 2,3,7,8-TCDF detected above the estimated detection limit, but below the reporting limit in the method blank extracted on 9/6/2016. There were no positive results for 2,3,7,8-TCDF and 1,2,3,4,6,7,8-HpCDF in Samples MW-8A-082116, MW-8B-082116, and MW-9A-082116; therefore, no qualifications were required.

SDG 590-4284-1: (VOCs) There were positive results for 1,2,3-Trichlorobenzene and 1,2,4-Trichlorobenzene detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/23/2016. There were no positive results for 1,2,3-Trichlorobenzene and 1,2,4-Trichlorobenzene in the associated field samples; therefore, no qualifications were required.

(SVOCs) There were positive results for benzyl alcohol and bis(2-ethylhexyl) phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/26/2016. The positive results for benzyl alcohol and bis(2-ethylhexyl) phthalate were qualified as non-detected (U) in Samples MW-2A-082216, MW-4A-082216, and MW-16A-082216.

(Dioxins/Furans) There was a positive result for OCDD detected at a concentration of less than 3X the reporting limit in the method blank extracted on 9/15/2016. The positive results for OCDD were qualified as non-detected (U) in Samples MW-2A-082216, MW-4A-082216, and MW-16A-082216.

SDG 590-4291-1: (SVOCs) There were positive results for benzyl alcohol and bis(2-ethylhexyl) phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/26/2016. The positive results for benzyl alcohol were qualified as non-detected (U) in Samples MW-3:082316, MW-5A-082316, and MW-15A-082316. There were no positive results for benzyl alcohol in Samples MW-5-082316 and MW-15-082316; therefore, no qualifications were required.

Also, the positive results for bis(2-ethylhexyl) phthalate were qualified as non-detected (U) in Samples MW-15-082316 and MW-15A-082316. The positive result for bis(2-ethylhexyl) phthalate was detected at a concentration greater than 5X the concentration in the method blank for Sample MW-5-082316; and there were no positive results for bis(2-ethylhexyl) phthalate in Samples MW-3:082316 and MW-5A-082316; therefore, no qualifications were required.

(Anions) There was a positive result for nitrate as N detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/24/2016. The positive results for nitrate as N were qualified as non-detected (U) in Samples MW-3:082316 and MW-15A-082316. The positive results for nitrate as N were detected at concentrations greater than 10X the concentration in the method blank in Samples MW-5-082316, MW-5A-082316, and MW-15-082316; therefore no qualifications were required.

SDG 590-4291-2: (Dioxins/Furans) There was a positive result for OCDD detected at a concentration of less than 3X the reporting limit in the method blank extracted on 9/15/2016. The positive result for OCDD was qualified as non-detected (U) in Sample MW-3:082316. There were no positive results for OCDD in Sample MW-5-082316; therefore, no qualification was required.

There was a positive result for OCDD detected at a concentration of less than 3X the reporting limit in the method blank extracted on 9/19/2016. The positive results for OCDD were qualified as non-detected (U) in Samples MW-5A-082316 and MW-15A-082316. There were no positive results for OCDD in Sample MW-15-082316; therefore, no qualification was required.

Also, there was a positive result for 1,2,3,4,6,7,8-HpCDD detected above the estimated detection limit, but below the reporting limit in the same method blank. The positive result for 1,2,3,4,6,7,8-HpCDD was

qualified as non-detected (U) in Sample MW-15A-082316. There were no positive results for 1,2,3,4,6,7,8-HpCDD in Samples MW-5A-082316 and MW-15-082316; therefore, no qualifications were required.

SDG 590-4302-1: (SVOCs) There were positive results for benzyl alcohol and bis(2-ethylhexyl) phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/26/2016. The positive result for bis(2-ethylhexyl) phthalate was qualified as non-detected (U) in Sample MW-14:082416. There were no positive results for bis(2-ethylhexyl) phthalate in Samples MW-7D:082416 and MW-11A:082416; and there were no positive results for benzyl alcohol in Samples MW-7D:082416, MW-11A:082416, and MW-14:082416; therefore, no qualifications were required.

(Dissolved Metals) There was a positive result for dissolved cadmium detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/31/2016. The positive results for dissolved cadmium were qualified as non-detected (U) in Samples MW-7D:082416 and MW-14:082416. There were no positive results for total cadmium in Sample MW-11A:082416; therefore, no qualification was required.

SDG 590-4302-2: (Dioxins/Furans) There was a positive result for OCDD detected at a concentration of less than 3X the reporting limit in the method blank extracted on 9/19/2016. The positive results for OCDD were qualified as non-detected (U) in Samples MW-7D:082416, MW-11A:082416, and MW-14:082416.

Also, there was a positive result for 1,2,3,4,6,7,8-HpCDD detected above the estimated detection limit, but below the reporting limit in the same method blank. The positive results for 1,2,3,4,6,7,8-HpCDD were qualified as non-detected (U) in Samples MW-7D:082416, MW-11A:082416, and MW-14:082416.

SDG 590-4322-1: (VOCs) There was a positive result for 1,2,3-Trichlorobenzene detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/27/2016. There were no positive results for 1,2,3-Trichlorobenzene in the associated field samples; therefore, no qualifications were required.

(SVOCs) There were positive results for benzyl alcohol, butyl benzyl phthalate, and di-n-butyl phthalate detected in the method blank extracted on 8/30/2016. The positive results for butyl benzyl phthalate were qualified as non-detected (U) in Samples MW-1A-082516, MW-7B-082516, and MW-12A-082516. The positive results for benzyl alcohol and di-n-butyl phthalate were qualified as non-detected (U) in Samples MW-1A-082516, MW-7B-082516, and DUP-082516. There were no positive results for butyl benzyl phthalate in Sample DUP-082516; and there were no positive results for benzyl alcohol and di-n-butyl phthalate in Sample MW-12A-082516; therefore, no qualifications were required.

(Total Metals) There was a positive result for total iron detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/30/2016. The positive result for total iron was detected at a concentration greater than 10X the concentration in the method blank in Sample DUP-082516; therefore no qualification was required.

(Dissolved Metals) There were positive results for dissolved cadmium and dissolved silver detected above the method detection limit, but below the reporting limit in the method blank extracted on 8/31/2016. The positive results for dissolved cadmium were qualified non-detected (U) in Samples MW-12A-082516 and DUP-082516. There were no positive results for dissolved silver in Samples MW-12A-082516 and DUP-082516; therefore, no qualifications were required.

SDG 590-4322-2: (Dioxins/Furans) There was a positive result for OCDD detected at a concentration of less than 3X the reporting limit in the method blank extracted on 9/19/2016. The positive results for

OCDD were qualified as non-detected (U) in Samples MW-1A-082516, MW-7B-082516, DUP-082516, and MW-12A-082516.

Also, there was a positive result for 1,2,3,4,6,7,8-HpCDD detected above the estimated detection limit, but below the reporting limit in the same method blank. The positive results for 1,2,3,4,6,7,8-HpCDD were qualified as non-detected (U) in Samples MW-1A-082516, MW-7B-082516, DUP-082516, and MW-12A-082516.

SDG 590-4339-1: (VOCs-Air) There were positive results for ethanol and toluene detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/2/2016. The positive results for toluene were detected at concentrations greater than 2X the concentration in the method blank for Samples LFB-3-082616, LFB-4-082616, LFB-5-082616, LFB-8-082616, LFB-9-082616, LFB-10-082616, LFB-11-082616, LFB-15-082616, LFB-16-082616, and LFB-17-082616; therefore, no qualifications were required. There were no positive results for ethanol in the associated field samples; therefore, no qualifications were required.

SDG 590-4346-1: (VOCs) There was a positive result for acetone detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/1/2016. There were no positive results for acetone in the associated field sample; therefore, no qualification was required.

(SVOCs) There were positive results for butyl benzyl phthalate and di-n-butyl phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/2/2016. The positive results for di-n-butyl phthalate were qualified as non-detected (U) in Sample MW-16:082916. There were no positive results for butyl benzyl phthalate in Sample MW-16:082916; therefore, no qualification was required.

(Total Metals) There were positive results for total antimony, total barium, total cadmium, total lead, and total silver detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/1/2016. The positive results for total antimony, total cadmium, total lead, and total silver were qualified as non-detected (U) in Sample MW-16:082916. The positive result for total barium was detected at a concentration greater than 10X the concentration in the method blank in Sample MW-16:082916; therefore no qualification was required.

There was a positive result for total mercury detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/13/2016. The positive result for total mercury was qualified as non-detected (U) in Sample MW-16:082916.

(Dissolved Metals) There was a positive result for dissolved mercury detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/13/2016. The positive result for dissolved mercury was qualified as non-detected (U) in Sample MW-16:082916.

SDG 590-4346-2: (Dioxins/Furans) There was a positive result for OCDD detected at a concentration of less than 3X the reporting limit in the method blank extracted on 9/19/2016. The positive result for OCDD was qualified as non-detected (U) in Sample MW-16:082916.

Also, there was a positive result for 1,2,3,4,6,7,8-HpCDD detected above the estimated detection limit, but below the reporting limit in the same method blank. The positive result for 1,2,3,4,6,7,8-HpCDD was qualified as non-detected (U) in Sample MW-16:082916.

SDG 590-4348-1: (VOCs) There was a positive result for acetone detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/1/2016. There were no positive results for acetone in the associated field sample; therefore, no qualification was required.

(SVOCs) There were positive results for butyl benzyl phthalate and di-n-butyl phthalate detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/2/2016. There were no positive results for butyl benzyl phthalate and di-n-butyl phthalate in the associated field sample; therefore, no qualifications were required.

(Total Metals) There were positive results for total antimony, total barium, total cadmium, total lead, and total silver detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/1/2016. The positive results for total antimony, total cadmium, total lead, and total silver were qualified as non-detected (U) in Sample SW-1:082916. The positive result for total barium was detected at a concentration greater than 10X the concentration in the method blank in Sample SW-1:082916; therefore no qualification was required.

There was a positive result for total mercury detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/13/2016. The positive result for total mercury was qualified as non-detected (U) in Sample SW-1:082916.

(Dissolved Metals) There was a positive result for dissolved mercury detected above the method detection limit, but below the reporting limit in the method blank extracted on 9/13/2016. The positive result for dissolved mercury was qualified as non-detected (U) in Sample SW-1:082916.

SDG 590-4348-2: (Dioxins/Furans) There was a positive result for OCDD detected at a concentration of less than 3X the reporting limit in the method blank extracted on 9/19/2016. The positive result for OCDD was qualified as non-detected (U) in Sample SW-1:082916.

Also, there was a positive result for 1,2,3,4,6,7,8-HpCDD detected above the estimated detection limit, but below the reporting limit in the same method blank. The positive result for 1,2,3,4,6,7,8-HpCDD was qualified as non-detected (U) in Sample SW-1:082916.

Matrix Spikes/Matrix Spike Duplicates

Since the actual analyte concentration in an environmental sample is not known, the accuracy of a particular analysis is usually inferred by performing a matrix spike (MS) analysis on one sample from the associated batch, known as the parent sample. One aliquot of the sample is analyzed in the normal manner and then a second aliquot of the sample is spiked with a known amount of analyte concentration and analyzed. From these analyses, a percent recovery is calculated. Matrix spike duplicate (MSD) analyses are generally performed for organic analyses as a precision check and analyzed in the same sequence as a matrix spike. Using the result values from the MS and MSD, the relative percent difference (RPD) is calculated. The percent recovery control limits for MS and MSD analyses are specified in the laboratory documents, as are the RPD control limits for MS/MSD sample sets.

One MS/MSD analysis should be performed for every analytical batch or every 20 field samples, whichever is more frequent. The frequency requirements were met for each analysis and the percent recovery and RPD values were within the proper control limits, with the following exceptions:

SDG 590-4267-1: (Anions) The laboratory performed an MS/MSD sample set on Sample MW-8B-082116. The percent recovery for chloride was less than the control limits in the MS/MSD extracted on 8/29/2016. The positive result for chloride was qualified as estimated (J) in Sample MW-8B-082116.

SDG 590-4284-1: (Total Cyanide) The laboratory performed an MS on Sample MW-2A-082216. The percent recovery for total cyanide was less than the control limit in the MS extracted on 8/26/2016. The percent recovery for this target analyte was within the control limits in the associated sample batch LCS,

which demonstrates the possibility of matrix interference; therefore, no qualification of the data was required.

SDG 590-4291-1: (VOCs) The laboratory performed an MS on Sample MW-3:082316. The percent recoveries for all VOC target analytes, with the exception of acetone, were less than the control limits in the MS extracted on 8/26/2016. The percent recoveries for these target analytes were within the control limits in the associated sample batch LCS, which demonstrates the possibility of matrix interference; therefore, no qualifications of the data were required.

(NWTPH-Gx) The laboratory performed an MS on Sample MW-5-082316. The percent recovery for gasoline-range hydrocarbons was less than the control limits in the MS extracted on 8/26/2016. The percent recovery for this target analyte was within the control limits in the associated sample batch LCS, which demonstrates the possibility of matrix interference; therefore, no qualification of the data was required.

(COD) The laboratory performed an MS on Sample MW-3:082316. There percent recovery of COD was greater than the control limits in the MS extracted on 8/29/2016. The positive result for COD was qualified as estimated (J) in Sample MW-3:082316.

SDG 590-4322-1: (VOCs) The laboratory performed an MS on Sample MW-7B-082516. The percent recoveries for many VOC target analytes were less than the control limits in the MS extracted on 8/27/2016. The percent recoveries for these target analytes were within the control limits in the associated sample batch LCS, which demonstrates the possibility of matrix interference; therefore, no qualifications of the data were required.

(Total Cyanide) The laboratory performed an MS on Sample MW-7B-082516. The percent recovery for total cyanide was less than the control limit in the MS extracted on 9/6/2016. The percent recovery for this target analyte was within the control limits in the associated sample batch LCS and LCSD, which demonstrates the possibility of matrix interference; therefore, no qualification of the data was required.

The laboratory performed an MS on Sample DUP-082516. The percent recovery for total cyanide was less than the control limit in the MS extracted on 9/6/2016. The percent recovery for this target analyte was within the control limits in the associated sample batch LCS and LCSD, which demonstrates the possibility of matrix interference; therefore, no qualification of the data was required.

SDG 590-4346-1: (Anions) The laboratory performed an MS/MSD sample set on Sample MW-16:082916. The percent recovery for nitrate as N was greater than the control limits in the MS/MSD extracted on 8/30/2016. The positive result for nitrate as N was qualified as estimated (J) in Sample MW-16:082916.

Laboratory Control Samples/Laboratory Control Sample Duplicates

A laboratory control sample (LCS) is a blank sample that is spiked with a known amount of analyte and then analyzed. An LCS is similar to an MS, but without the possibility of matrix interference. Given that matrix interference is not an issue, the LCS/LCSD control limits for accuracy and precision are usually more rigorous than for MS/MSD analyses. Additionally, data qualification based on LCS/LCSD analyses would apply to all samples in the associated batch, instead of just the parent sample. The percent recovery control limits for LCS and LCSD analyses are specified in the laboratory documents, as are the RPD control limits for LCS/LCSD sample sets.

One LCS/LCSD analysis should be performed for every analytical batch or every 20 field samples, whichever is more frequent. The frequency requirements were met for all analyses and the percent recovery and RPD values were within the proper control limits, with the following exceptions:

SDG 590-4267-1: (VOCs) The percent recovery for acetone was greater than the control limits in the LCS analyzed on 8/22/2016. There were no positive results for acetone in the associated field samples; therefore no qualifications were required.

(SVOCs) The percent recoveries for benzyl alcohol and bis(2-ethylhexyl) phthalate were greater than the control limits in the LCS and LCSD extracted on 8/26/2016; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCSD and LCS. No action was required for these outliers. Additionally, in the same LCS/LCSD sample set, the RPD values for 3,3'-Dichlorobenzidine, 4-Nitroaniline, benzyl alcohol, and bis(2-ethylhexyl) phthalate were greater than the control limits. After the qualification of benzyl alcohol and bis(2-ethylhexyl) phthalate due to method blank contamination, there were no positive results for these target analytes in the associated field samples; therefore, no qualifications were required.

SDG 590-4284-1: (VOCs) The percent recovery for acetone was greater than the control limits in the LCS analyzed on 8/23/2016. There were no positive results for acetone in the associated field samples; therefore no qualifications were required.

(SVOCs) The percent recoveries for benzyl alcohol and bis(2-ethylhexyl) phthalate were greater than the control limits in the LCS and LCSD extracted on 8/26/2016; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCSD and LCS. No action was required for these outliers. Additionally, in the same LCS/LCSD sample set, the RPD values for 3,3'-Dichlorobenzidine, 4-Nitroaniline, benzyl alcohol, and bis(2-ethylhexyl) phthalate were greater than the control limits. After the qualification of benzyl alcohol and bis(2-ethylhexyl) phthalate due to method blank contamination, there were no positive results for these target analytes in the associated field samples; therefore, no qualifications were required.

(Dioxin/Furans) The percent recovery for 1,2,3,6,7,8-HxCDF was greater than the control limits in the LCS extracted 9/15/2016; however, the percent recovery for this target analyte was within the control limits in the corresponding LCSD. No action was required for this outlier.

SDG 590-4291-1: (VOCs) The percent recovery for acetone was greater than the control limits in the LCS analyzed on 8/26/2016. There were no positive results for acetone in the associated field samples; therefore no qualifications were required.

(SVOCs) The percent recoveries for benzyl alcohol and bis(2-ethylhexyl) phthalate were greater than the control limits in the LCS and LCSD extracted on 8/26/2016; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCSD and LCS. No action was required for these outliers. Additionally, in the same LCS/LCSD sample set, the RPD values for 3,3'-Dichlorobenzidine, 4-Nitroaniline, benzyl alcohol, and bis(2-ethylhexyl) phthalate were greater than the control limits. The positive results for bis(2-ethylhexyl) phthalate were qualified as estimated (J) in Sample MW-5-082316. For the remaining associated field samples, after the qualification of benzyl alcohol and bis(2-ethylhexyl) phthalate due to method blank contamination, there were no positive results for these target analytes; therefore, no qualifications were required.

SDG 590-4291-2: (Dioxin/Furans) The percent recovery for 1,2,3,6,7,8-HxCDF was greater than the control limits in the LCS extracted 9/15/2016; however, the percent recovery for this target analyte was within the control limits in the corresponding LCSD. No action was required for this outlier.

SDG 590-4302-1: (VOCs) The percent recovery for acetone was greater than the control limits in the LCS analyzed on 8/26/2016. There were no positive results for acetone in the associated field samples; therefore no qualifications were required.

(SVOCs) The percent recoveries for benzyl alcohol and bis(2-ethylhexyl) phthalate were greater than the control limits in the LCS and LCSD extracted on 8/26/2016; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCSD and LCS. No action was required for these outliers. Additionally, in the same LCS/LCSD sample set, the RPD values for 3,3'-Dichlorobenzidine, 4-Nitroaniline, benzyl alcohol, and bis(2-ethylhexyl) phthalate were greater than the control limits. After the qualification of bis(2-ethylhexyl) phthalate due to method blank contamination, there were no positive results for these target analytes in the associated field samples; therefore, no qualifications were required.

SDG 590-4322-1: (VOCs) The percent recovery for acetone was greater than the control limits in the LCS analyzed on 8/26/2016. The positive result for acetone was qualified as estimated (J) in Sample MW-12A-082516.

The percent recovery for acetone was greater than the control limits in the LCS analyzed on 8/27/2016. There were no positive results for acetone in the associated field samples; therefore no qualifications were required.

(SVOCs) The percent recoveries for 2,6-Dinitrotoluene (6% and 8%), 4-Chloroaniline (8% and 4%), and hexachlorocyclopentadiene (6% and 13%) were less than the control limits in the LCS and LCSD, respectively, extracted on 8/30/2016. The positive result for 2,6-Dinitrotoluene was qualified as estimated (J) in Sample DUP-082516. The National Functional Guidelines state that if the percent recovery in the LCS or LCSD is less than 10% and the parent sample result is non-detected, the result should be labeled as unusable. For this reason, the reporting limits for 2,6-Dinitrotoluene, 4-Chloroaniline, and hexachlorocyclopentadiene were qualified as rejected (R) in Samples MW-1A-082516, MW-7B-082516, and MW-12A-082516; and the reporting limits for 4-Chloroaniline and hexachlorocyclopentadiene were qualified as rejected (R) in Sample DUP-082516.

Also, in the same LCS/LCSD sample set, the percent recoveries for benzyl alcohol, bis(2-ethylhexyl) phthalate, and butyl benzyl phthalate were greater than the control limits in the LCSD; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

Additionally, in the same LCS/LCSD sample set, the RPD values for 1,2,4-Trichlorobenzene, 1,2-Dichlorobenzene, 1,3-Dichlorobenzene, 1,4-Dichlorobenzene, 2-Nitroaniline, 4,6-Dinitro-2-methylphenol, 4-Chloroaniline, benzyl alcohol, bis(2-ethylhexyl) phthalate, hexachlorobutadiene, hexachlorocyclopentadiene, and hexachloroethane were greater than the control limits. The positive results for bis(2-ethylhexyl) phthalate were qualified as estimated (J) in Samples MW-1A-082516, MW-7B-082516, and DUP-082516. After the qualification of benzyl alcohol due to method blank contamination, there were no positive results for 1,2,4-Trichlorobenzene, 1,2-Dichlorobenzene, 1,3-Dichlorobenzene, 1,4-Dichlorobenzene, 2-Nitroaniline, 4,6-Dinitro-2-methylphenol, 4-Chloroaniline, benzyl alcohol, hexachlorobutadiene, hexachlorocyclopentadiene, and hexachloroethane in the associated field samples; therefore no qualifications were required.

SDG 590-4346-1: (VOCs) The percent recovery for acetone was greater than the control limits in the LCS analyzed on 9/1/2016. There were no positive results for acetone in the associated field sample; therefore no qualification was required.

(SVOCs) The percent recovery for 4-Chloroaniline was less than the control limits in the LCS extracted on 9/2/2016; however, the percent recovery for this target analyte was within the control limits in the corresponding LCSD. No action was required for this outlier. Additionally, in the same LCS/LCSD sample set, the RPD values for 3,3'-Dichlorobenzidine, 4-Chloroaniline, and 4-Nitrophenol were greater than the

control limits. There were no positive results for these target analytes in the associated field sample; therefore, no qualifications were required.

SDG 590-4348-1: (VOCs) The percent recovery for acetone was greater than the control limits in the LCS analyzed on 9/1/2016. There were no positive results for acetone in the associated field sample; therefore no qualification was required.

(SVOCs) The percent recovery for 4-Chloroaniline was less than the control limits in the LCS extracted on 9/2/2016; however, the percent recovery for this target analyte was within the control limits in the corresponding LCSD. No action was required for this outlier. Additionally, in the same LCS/LCSD sample set, the RPD values for 3,3'-Dichlorobenzidine, 4-Chloroaniline, and 4-Nitrophenol were greater than the control limits. There were no positive results for these target analytes in the associated field sample; therefore, no qualifications were required.

Laboratory Duplicates

Internal laboratory duplicate analyses are performed to monitor the precision of the analyses. Two separate aliquots of a sample are analyzed as distinct samples in the laboratory and the RPD between the two results is calculated. Duplicate analyses should be performed once per analytical batch. If one or more of the samples used has a concentration less than five times the reporting limit for that sample, the absolute difference is used instead of the RPD. The RPD control limits are specified in the laboratory documents. Laboratory duplicates were analyzed at the proper frequency and the specified acceptance criteria were met.

Field Duplicates

In order to assess precision, field duplicate samples were collected and analyzed along with the reviewed sample batches. The duplicate samples were analyzed for the same parameters as the associated parent samples. Precision is determined by calculating the RPD between each pair of samples. If one or more of the sample analytes has a concentration greater than five times the reporting limit for that sample, then the absolute difference is used instead of the RPD. The RPD control limit for water samples is 35 percent.

SDG 590-4322-1: One field duplicate sample pair, MW-7B-082516 and DUP-082516, was submitted with this SDG. The precision criteria for all target analytes were met for this sample pair, with the exception of dissolved antimony, dissolved arsenic, dissolved barium, dissolved chromium, dissolved copper, dissolved lead, dissolved manganese, dissolved nickel, dissolved zinc, total chromium, total copper, total iron, total lead, total manganese, total silver, and total zinc. The positive results for these target analytes were qualified as estimated (J) in this sample pair.

Miscellaneous

SDG 590-4267-1: (Dioxin/Furans) The positive results for 1,2,3,7,8-PeCDD, 1,2,3,4,7,8-HxCDF, 1,2,3,7,8,9-HxCDF, 2,3,4,7,8-PeCDF, and OCDD in Sample MW-8A-082116; the positive results for 1,2,3,4,6,7,8-HpCDD and OCDF in Sample MW-8B-082116; and the positive result for OCDD in Sample MW-9A-082116 were noted by the laboratory to represent the Estimated Maximum Possible Concentration for these compounds. This is typically due to the compound exhibiting ion abundance ratios that are outside of the allowable control limits set forth in the EPA method and the National Functional Guidelines. The results for these target analytes were qualified as estimated (J) in these samples, accordingly.

SDG 590-4284-1: (Dioxin/Furans) The positive results for 1,2,3,6,7,8-HxCDD and 1,2,3,4,6,7,8-HpCDD in Sample MW-4A-082216 were noted by the laboratory to represent the Estimated Maximum Possible Concentration for these compounds. This is typically due to the compound exhibiting ion abundance

ratios that are outside of the allowable control limits set forth in the EPA method and the National Functional Guidelines. The results for these target analytes were qualified as estimated (J) in this sample.

SDG 590-4322-1: (Anions) The laboratory reported two sets of results for nitrate as N and nitrite as N in Sample MW-1A-082516, an initial and a dilution (10X), because the results for nitrate as N exceeded the instrument calibration range in the initial sample. The initial reported result for nitrate as N and the dilution reported result for nitrite as N were labeled as do-not-report (DNR) and should not be used for any purpose.

SDG 590-4322-2: (Dioxin/Furans) The positive result for OCDF in Sample MW-1A-082516 was noted by the laboratory to represent the Estimated Maximum Possible Concentration for this compound. This is typically due to the compound exhibiting ion abundance ratios that are outside of the allowable control limits set forth in the EPA method and the National Functional Guidelines. The result for this target analyte was qualified as estimated (J) in this sample.

SDG 590-4348-2: (Dioxin/Furans) The positive result for 1,2,3,4,6,7,8-HpCDF in Sample SW-1:082916 was noted by the laboratory to represent the Estimated Maximum Possible Concentration for this compound. This is typically due to the compound exhibiting ion abundance ratios that are outside of the allowable control limits set forth in the EPA method and the National Functional Guidelines. The result for this target analyte was qualified as estimated (J) in this sample.

OVERALL ASSESSMENT

As was determined by this data validation, the laboratory followed the specified analytical methods. Accuracy was acceptable, as demonstrated by the surrogate, LCS/LCSD, and MS/MSD percent recovery values, with the exceptions noted above. Precision was acceptable, as demonstrated by the LCS/LCSD, MS/MSD, and laboratory/field duplicate RPD values, with the exceptions noted above.

The data are acceptable for the intended use, with the following qualifications listed below in Table 2.

TABLE 2. SUMMARY OF QUALIFIED SAMPLES

Sample ID	Analyte	Qualifier	Reason
MW-1A-082516	1,2,3,4,6,7,8-HpCDD	U	Method Blank Contamination
	2,6-Dinitrotoluene	R	LCS/LCSD Recovery
	4-Chloroaniline	R	LCS/LCSD Recovery
	Benzyl alcohol	U	Method Blank Contamination
	Bis(2-ethylhexyl) phthalate	J	LCS/LCSD Recovery
	Butyl benzyl phthalate	U	Method Blank Contamination
	Di-n-butyl phthalate	U	Method Blank Contamination
	Hexachlorocyclopentadiene	R	LCS/LCSD Recovery
	Nitrate as N	J	Holding Time
	OCDD	U	Method Blank Contamination
	OCDF	J	See Miscellaneous
MW-2A-082216	Benzyl alcohol	U	Method Blank Contamination
	Bis(2-ethylhexyl) phthalate	U	Method Blank Contamination
	OCDD	U	Method Blank Contamination
MW-3:082316	Benzyl alcohol	U	Method Blank Contamination
	COD	J	MS Recovery
	Nitrate as N	U	Method Blank Contamination

Sample ID	Analyte	Qualifier	Reason

TestAmerica Job ID: 590-4267-1

Job ID: 590-4267-1

Laboratory: TestAmerica Spokane

Narrative

Receipt
The samples were received on 8/22/2016 10:55 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.9º C.

Receipt Exceptions
Two 1L ambers for sample MW-9A-082116 (590-4267-3) were delayed by FedEx and received at the Denver lab at 11.4°C. Denver had received two containers for sample 3 on 8/23 in temp and in good condition,and these two are sufficient for requested analyses.

GC/MS VOA
Method 8260C: The native sample, matrix spike, and matrix spike duplicate (MS/MSD) associated with analytical batch 590-8202 contained target analytes above the instrument calibration range. Ethylbenzene, m,p-Xylene, o-Xylene, Toluene and Xylenes, Total in the MS/MSD have been reported as estimates.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-226191 recovered above the upper control limit for 3,3'-Dichlorobenzidine. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-8A-082116 (590-4267-1), MW-8B-082116 (590-4267-2), MW-9A-082116 (590-4267-3) and (CCVIS 580-226191/3).

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-226191 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 580-226029 and analytical batch 580-226191 recovered outside control limits for the following analytes: Benzyl alcohol (LCS only) and Bis(2-ethylhexyl) phthalate (LCSD only). These analytes were biased high in the LCS. The affected samples were either not detected for this analyte or had hits below the reporting limit but above the detection limit. Bis(2-ethylhexyl) phthalate is a common lab contaminant.

Method 8270D: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-226029 recovered outside control limits for the following analytes: 3,3'-Dichlorobenzidine, Bis(2-ethylhexyl) phthalate, 4-Nitroaniline and Benzyl alcohol.

Method 8270D: The method blank for preparation batch 580-226029 and analytical batch 580-226191 contained Benzyl alcohol and Bis(2-ethylhexyl) phthalate above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
Method 8151A: The continuing calibration verification (CCV) for 2,4-DB and Dalapon associated with analytical batch 280-340437 recovered outside the control limit on the back/confirmation column. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported from the front/primary column which is in control.

Method 8141B: The initial calibration verification (ICV) result for batch 280-341530 was outside control limits on the front column for simazine. Sample results were non-detects, and were reported off of the back, in control, column.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

IC
Method 300.0: The method blank for analytical batch 590-8198 contained Nitrate as N above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-analysis of samples was not performed.

Job ID: 590-4267-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

Method 300.0: The continuing calibration blank (CCB) for analytical batch 590-8311 contained Nitrate as N above the reporting limit (RL). All reported samples associated with this CCB were either ND for this analyte or contained this analyte at a concentration greater than 10X the value found in the CCB; therefore, re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin
Method 8290A: The bracketing continuing calibration verification (CCV) associated with batch 320-126274 has 1,2,3,4,7,8,9-HpCDF, 1,2,3,7,8,9-HpCDD, and OCDF with percent difference values that are between the method criteria of 20% to 25% deviation from the initial calibration curve. Per method guidelines, an average relative response factor (RRF) is calculated from the bracketing CCV and is used to quantitate any positive results in the associated samples for the affected analytes.

Method 8290A: The bracketing continuing calibration verification (CCV) associated with batch 320-126274 has 13C-OCDD with percent difference value that is between the method criteria of 30% to 35% deviation from the initial calibration curve. Per method guidelines, an average relative response factor (RRF) is calculated from the bracketing CCV and is used to quantitate the Isotope Dilution Analyte (IDA) recovery in the associated samples.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
Method 245.1: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 580-225830 and 580-226222.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Biology
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 3510C: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with batch 339570.

Method 8151A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with batch 339693.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4267-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-4267-1	MW-8A-082116	Water	08/21/16 15:10	08/22/16 10:55
590-4267-2	MW-8B-082116	Water	08/21/16 16:45	08/22/16 10:55
590-4267-3	MW-9A-082116	Water	08/21/16 18:25	08/22/16 10:55

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	RPD of the LCS and LCSD exceeds the control limits
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

HPLC/IC

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
F1	MS and/or MSD Recovery is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Dioxin

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
q	The reported result is the estimated maximum possible concentration of this analyte, quantitated using the theoretical ion ratio. The measured ion ratio does not meet qualitative identification criteria and indicates a possible interference.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4267-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-16
Washington	State Program	10	C569	01-06-17

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C583	08-03-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8141B	3510C	Water	Fenthion
8141B	3510C	Water	Propazine

Laboratory: TestAmerica Nashville

The certifications listed below are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C789	07-19-17

Laboratory: TestAmerica Sacramento

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
A2LA	DoD ELAP		2928-01	01-31-17

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4267-1

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis (2-chloroisopropyl) ether

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4267-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
NWTPH-Gx	Northwest - Volatile Petroleum Products (GC/MS)	NWTPH	TAL SPK
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8011	EDB, DBCP, and 1,2,3-TCP (GC)	SW846	TAL SPK
8081B	Organochlorine Pesticides (GC)	SW846	TAL SEA
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL SPK
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	TAL DEN
8151A	Herbicides (GC)	SW846	TAL DEN
NWTPH-Dx	Northwest - Semi-Volatile Petroleum Products (GC)	NWTPH	TAL SPK
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
8290A	Dioxins and Furans (HRGC/HRMS)	SW846	TAL SAC
200.8	Metals (ICP/MS)	EPA	TAL SEA
245.1	Mercury (CVAA)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH
350.1	Nitrogen, Ammonia	MCAWW	TAL NSH
410.4	COD	MCAWW	TAL NSH
SM 5310C	TOC	SM	TAL NSH
SM 9223B	Coliforms, Total, and E.Coli	SM	TAL SPK

COOLER RECEIPT FORM

590-4267 Chain of Custody

Cooler Received/Opened On 8/23/2016 @ 0850

Time Samples Removed From Cooler_____ Time Samples Placed In Storage_____ (2 Hour Window)

1. Tracking # 1780 (last 4 digits, FedEx) Courier: FedEx

IR Gun ID 17960357 pH Strip Lot HC564992 Chlorine Strip Lot 012516A

2. Temperature of rep. sample or temp blank when opened: 1.1c Degrees Celsius

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO...NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: 1 Side

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) Dw

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) PM

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES..NO..NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) PM

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) PM

I certify that I attached a label with the unique LIMS number to each container (intial) PM

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...#_____

BIS = Broken in shipment

Narrative

Receipt
The samples were received on 8/23/2016 9:50 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.6º C.

Receipt Exceptions
The container label for the following samples did not match the information listed on the Chain-of-Custody (COC): MW-4A-082216 (590-4284-1), MW-16A-082216 (590-4284-2) and MW-2A-082216 (590-4284-3). The container labels list a collection date of 8/22/2016, while the COC lists 08/23/2016. The client was contacted, and the lab was instructed to use a collection date of 08/22/2016.

GC/MS VOA
Method 8260C: The continuing calibration verification (CCV) associated with batch 590-8229 recovered above the upper control limit for 2-Butanone (MEK) and Acetone. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-4A-082216 (590-4284-1), MW-16A-082216 (590-4284-2) and MW-2A-082216 (590-4284-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-226191 recovered above the upper control limit for 3,3'-Dichlorobenzidine. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-4A-082216 (590-4284-1), MW-16A-082216 (590-4284-2), MW-2A-082216 (590-4284-3) and (CCVIS 580-226191/3).

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-226191 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 580-226029 and analytical batch 580-226191 recovered outside control limits for the following analytes: Benzyl alcohol (LCS only) and Bis(2-ethylhexyl) phthalate (LCSD only). These analytes were biased high in the LCS. The affected samples were either not detected for this analyte or had hits below the reporting limit but above the detection limit. Bis(2-ethylhexyl) phthalate is a common lab contaminant.

Method(s) 8270D: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-226029 recovered outside control limits for the following analytes: 3,3'-Dichlorobenzidine, Bis(2-ethylhexyl) phthalate, 4-Nitroaniline and Benzyl alcohol.

Method 8270D: The method blank for preparation batch 580-226029 and analytical batch 580-226191 contained Benzyl alcohol and Bis(2-ethylhexyl) phthalate above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
Method 8151A: The continuing calibration verification (CCV) for 2,4-DB and Dalapon associated with analytical batch 280-340437 recovered outside the control limit on the back/confirmation column. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported from the front/primary column which is in control.

Method 8141B: The initial calibration verification (ICV) result for batch 280-341530 was outside control limits on the front column for simazine. Sample results were non-detects and are reported off of the back, in control, column.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin
Method 8290A: The laboratory control sample (LCS) for 320-127279 recovered outside control limits for 1,2,3,6,7,8-HxCDF. This analyte

Job ID: 590-4284-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

was biased high in the LCS and was either not detected or detected as a 'J' flagged estimated value below the reporting limit (RL) in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
Method 200.8: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 580-225830 and 580-226123.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
Method 335.4: The matrix spike (MS) recoveries for preparation batch 490-365923 and analytical batch 490-365936 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Biology
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 8141B_3510C: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with batch 339570.

Method 8151A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 280-339876.

Method 8151A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with 339693.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4284-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-4284-1	MW-4A-082216	Water	08/22/16 11:02	08/23/16 09:50
590-4284-2	MW-16A-082216	Water	08/22/16 12:20	08/23/16 09:50
590-4284-3	MW-2A-082216	Water	08/22/16 15:30	08/23/16 09:50

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	RPD of the LCS and LCSD exceeds the control limits
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

HPLC/IC

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Dioxin

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
q	The reported result is the estimated maximum possible concentration of this analyte, quantitated using the theoretical ion ratio. The measured ion ratio does not meet qualitative identification criteria and indicates a possible interference.
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F1	MS and/or MSD Recovery is outside acceptance limits.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4284-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-16
Washington	State Program	10	C569	01-06-17

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C583	08-03-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8141B	3510C	Water	Fenthion
8141B	3510C	Water	Propazine

Laboratory: TestAmerica Nashville

The certifications listed below are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C789	07-19-17

Laboratory: TestAmerica Sacramento

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4284-1

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis (2-chloroisopropyl) ether

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4284-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
NWTPH-Gx	Northwest - Volatile Petroleum Products (GC/MS)	NWTPH	TAL SPK
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8011	EDB, DBCP, and 1,2,3-TCP (GC)	SW846	TAL SPK
8081B	Organochlorine Pesticides (GC)	SW846	TAL SEA
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL SPK
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	TAL DEN
8151A	Herbicides (GC)	SW846	TAL DEN
NWTPH-Dx	Northwest - Semi-Volatile Petroleum Products (GC)	NWTPH	TAL SPK
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
8290A	Dioxins and Furans (HRGC/HRMS)	SW846	TAL SAC
200.8	Metals (ICP/MS)	EPA	TAL SEA
245.1	Mercury (CVAA)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH
350.1	Nitrogen, Ammonia	MCAWW	TAL NSH
410.4	COD	MCAWW	TAL NSH
SM 5310C	TOC	SM	TAL NSH
SM 9223B	Coliforms, Total, and E.Coli	SM	TAL SPK

COOLER RECEIPT FORM

590-4284 Chain of Custody

Cooler Received/Opened On 8/24/2016 @ 0915

Time Samples Removed From Cooler 1100 Time Samples Placed In Storage 1155 (2 Hour Window)

1. Tracking # 1471 (last 4 digits, FedEx) Courier: FedEx

IR Gun ID 17960353 pH Strip Lot HC58117 Chlorine Strip Lot 71130

2. Temperature of rep. sample or temp blank when opened: 3.0 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: NA

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) SH

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence # NA

I certify that I unloaded the cooler and answered questions 7-14 (intial) AES

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES..NO..NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) AES

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) AES

I certify that I attached a label with the unique LIMS number to each container (intial) AES

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...# NA

BIS = Broken in shipment

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	Refer to Job Narrative for details.
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The samples were received on 8/24/2016 9:50 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.5º C.

GC/MS VOA
Method NWTPH-Gx: The matrix spike (MS) recoveries for analytical batch 590-8292 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8260C: The continuing calibration verification (CCV) associated with batch 590-8293 recovered above the upper control limit for Acetone and 2-Butanone (MEK). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. Because the recovery for Acetone was greater than 40%D, results for this analyte are estimates. The following samples are impacted: MW-3:082316 (590-4291-1), MW-5-082316 (590-4291-2), MW-5A-082316 (590-4291-3), MW-15-082316 (590-4291-4) and MW-15A-082316 (590-4291-5).

Method 8260C: The continuing calibration verification (CCV) associated with batch 590-8293 recovered outside acceptance criteria, low biased, for Dichlorodifluoromethane. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8260C: The matrix spike (MS) recoveries for analytical batch 590-8293 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8260C: The laboratory control sample (LCS) for analytical batch 590-8293 recovered outside control limits for the following analyte: Acetone. This analyte was biased high in the LCS and not detected above the reporting limit in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-226191 recovered above the upper control limit for 3,3'-Dichlorobenzidine. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-3:082316 (590-4291-1), MW-5-082316 (590-4291-2), MW-5A-082316 (590-4291-3), MW-15-082316 (590-4291-4), MW-15A-082316 (590-4291-5) and (CCVIS 580-226191/3).

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-226191 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 580-226029 and analytical batch 580-226191 recovered outside control limits for the following analytes: Benzyl alcohol (LCS only) and Bis(2-ethylhexyl) phthalate (LCSD only). These analytes were biased high in the LCS. The affected samples were either not detected for this analyte or had hits below the reporting limit but above the detection limit. Bis(2-ethylhexyl) phthalate is a common lab contaminant.

Method 8270D: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-226029 recovered outside control limits for the following analytes: 3,3'-Dichlorobenzidine, Bis(2-ethylhexyl) phthalate, 4-Nitroaniline and Benzyl alcohol.

Method 8270D: The method blank for preparation batch 580-226029 and analytical batch 580-226191 contained Benzyl alcohol and Bis(2-ethylhexyl) phthalate above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
Method 8151A: The continuing calibration verification (CCV) for 2,4-DB and Dalapon associated with analytical batch 280-340437

Job ID: 590-4291-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

recovered outside the control limit on the back/confirmation column. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported from the front/primary column which is in control.

Method 8141B: The initial calibration verification (ICV) for 8141 exceeded control criteria for mevinphos on the back (confirmation) column. The impacted samples were ND for mevinphos and are reported from the front, in control, column. Per the laboratory's SOP the ICV is acceptable if the average of the percent differences (%D) values for all of the analytes is within +/- 15% and the %D for all individual analytes is within +/- 30%. The data has been qualified and reported.

Method 8141B: The continuing calibration verification (CCV) associated with batch 280-343654 recovered below the lower control limit for Simazine on the confirmation column. The client samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported from the column in control (front). The following samples are impacted: MW-3:082316 (590-4291-1), MW-5-082316 (590-4291-2), MW-5A-082316 (590-4291-3), MW-15-082316 (590-4291-4) and MW-15A-082316 (590-4291-5).

IC

Method 300.0: The method blank for analytical batch 590-8241 contained Nitrate as N above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

Method 200.8: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 580-225917 and 580-226122.

Method 245.1: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 580-225917 and 580-226207.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Biology

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

Method 8151A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 280-339876.

Method 3510C: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-339916.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4291-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-4291-1	MW-3:082316	Water	08/23/16 10:30	08/24/16 09:50
590-4291-2	MW-5-082316	Water	08/23/16 11:32	08/24/16 09:50
590-4291-3	MW-5A-082316	Water	08/23/16 12:55	08/24/16 09:50
590-4291-4	MW-15-082316	Water	08/23/16 14:15	08/24/16 09:50

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	RPD of the LCS and LCSD exceeds the control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

HPLC/IC

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

General Chemistry

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4291-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-16
Washington	State Program	10	C569	01-06-17

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C583	08-03-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8141B	3510C	Water	Fenthion
8141B	3510C	Water	Propazine

Laboratory: TestAmerica Nashville

The certifications listed below are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C789	07-19-17

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis (2-chloroisopropyl) ether

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-4291-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
NWTPH-Gx	Northwest - Volatile Petroleum Products (GC/MS)	NWTPH	TAL SPK
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8011	EDB, DBCP, and 1,2,3-TCP (GC)	SW846	TAL SPK
8081B	Organochlorine Pesticides (GC)	SW846	TAL SEA
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL SPK
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	TAL DEN
8151A	Herbicides (GC)	SW846	TAL DEN
NWTPH-Dx	Northwest - Semi-Volatile Petroleum Products (GC)	NWTPH	TAL SPK
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
200.8	Metals (ICP/MS)	EPA	TAL SEA
245.1	Mercury (CVAA)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH
350.1	Nitrogen, Ammonia	MCAWW	TAL NSH
410.4	COD	MCAWW	TAL NSH
SM 5310C	TOC	SM	TAL NSH
SM 9223B	Coliforms, Total, and E.Coli	SM	TAL SPK

COOLER RECEIPT FORM

590-4291 Chain of Custody

Cooler Received/Opened On 8/25/2016 @ 0915

Time Samples Removed From Cooler_____ Time Samples Placed In Storage_____ (2 Hour Window)

1. Tracking # 1571 (last 4 digits, FedEx) Courier: _____

IR Gun ID_17610176___ pH Strip Lot HC564992 Chlorine Strip Lot 012516A

2. Temperature of rep. sample or temp blank when opened: 2.1 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: 1 Front

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) _____

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence # NA

I certify that I unloaded the cooler and answered questions 7-14 (intial) _____

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) _____

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) _____

I certify that I attached a label with the unique LIMS number to each container (intial) _____

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...#_____

BIS = Broken in shipment

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The samples were received on 8/24/2016 9:50 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.5º C.

Dioxin
Method 8290A: The laboratory control sample (LCS) for 320-127279 recovered outside control limits for 1,2,3,6,7,8-HxCDF. This analyte was biased high in the LCS and was either not detected or detected as a 'J' flagged estimated value below the reporting limit (RL) in the associated samples; therefore, the data have been reported.

Method 8290A: The Isotope Dilution Analyte (IDA 13C-OCDD) recovery associated with the ending Continuing Calibration Verification (CCV) is below the method recommended limit: CCV 320-129406/14. Generally, data quality is not considered affected if the IDA signal-to-noise ratio is greater than 10:1, which is achieved for this IDA in this CCV and all associated samples. The 13C-OCDD IDA recovery for all associated samples is within recovery limits.

Method 8290A: The bracketing continuing calibration verification (CCV) associated with batch 320-129408 1,2,3,4,7,8-HxCDD with percent difference values that are between the method criteria of 20% to 25% deviation from the initial calibration curve. Per method guidelines, an average relative response factor (RRF) is calculated from the bracketing CCV and is used to quantitate any positive results in the associated samples for the affected analytes.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifiers

Dioxin

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
q	The reported result is the estimated maximum possible concentration of this analyte, quantitated using the theoretical ion ratio. The measured ion ratio does not meet qualitative identification criteria and indicates a possible interference.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The samples were received on 8/24/2016 4:50 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.5º C.

GC/MS VOA
Method NWTPH-Gx: The matrix spike(MS) recoveries for analytical batch 590-8292 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8260C: The continuing calibration verification (CCV) associated with batch 590-8293 recovered above the upper control limit for Acetone and 2-Butanone (MEK). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. Because the recovery for Acetone was greater than 40%D, results for this analyte are estimates. The following samples are impacted: MW-14:082416 (590-4302-1), MW-11A:082416 (590-4302-2) and MW-7D:082416 (590-4302-3).

Method 8260C: The continuing calibration verification (CCV) associated with batch 590-8293 recovered outside acceptance criteria, low biased, for Dichlorodifluoromethane. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8260C: The matrix spike (MS) recoveries for analytical batch 590-8293 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8260C: The laboratory control sample (LCS) for analytical batch 590-8293 recovered outside control limits for the following analyte: Acetone. This analyte was biased high in the LCS and not detected above the reporting limit in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-226191 recovered above the upper control limit for 3,3'-Dichlorobenzidine. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-14:082416 (590-4302-1), MW-11A:082416 (590-4302-2), MW-7D:082416 (590-4302-3) and (CCVIS 580-226191/3).

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-226191 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 580-226029 and analytical batch 580-226191 recovered outside control limits for the following analytes: Benzyl alcohol (LCS only) and Bis(2-ethylhexyl) phthalate (LCSD only). These analytes were biased high in the LCS. The affected samples were either not detected for this analyte or had hits below the reporting limit but above the detection limit. Bis(2-ethylhexyl) phthalate is a common lab contaminant.

Method 8270D: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-226029 recovered outside control limits for the following analytes: 3,3'-Dichlorobenzidine, Bis(2-ethylhexyl) phthalate, 4-Nitroaniline and Benzyl alcohol.

Method 8270D: The method blank for preparation batch 580-226029 and analytical batch 580-226191 contained Benzyl alcohol and Bis(2-ethylhexyl) phthalate above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

Method 8270D: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: MW-14:082416 (590-4302-1). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 590-4302-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

GC Semi VOA
Method 8151A: The continuing calibration verification (CCV) for 2,4-D, Dalapon and 2,4-DB associated with analytical batch 280-340865 recovered outside the control limit on one column. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported from the column which is in control.

Method 8141B: The initial calibration verification (ICV) for 8141 exceeded control criteria for mevinphos on the back (confirmation) column. The impacted samples were ND for mevinphos and are reported from the front, in control, column. Per the laboratory SOP the ICV is acceptable if the average of the percent differences (%D) values for all of the analytes is within +/- 15% and the %D for all individual analytes is within +/- 30%. The data has been qualified and reported.

Method 8141B: The continuing calibration verification (CCV) associated with batch 280-343654 recovered below the lower control limit for Simazine on the confirmation column. The client samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported from the column in control (front). The following samples are impacted: MW-14:082416 (590-4302-1), MW-11A:082416 (590-4302-2) and MW-7D:082416 (590-4302-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
Method 245.1: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 580-226014 and 580-226457.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Biology
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 3510C: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-339916.

Method 8151A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with batch 340052.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	RPD of the LCS and LCSD exceeds the control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.
B	Compound was found in the blank and sample.
X	Surrogate is outside control limits

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
