Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5101-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-17
Washington	State Program	10	C569	01-06-17

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C583	08-02-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8141B	3510C	Water	Fenthion
8141B	3510C	Water	Propazine

Laboratory: TestAmerica Nashville

The certifications listed below are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C789	07-19-17

Laboratory: TestAmerica Sacramento

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
A2LA	DoD ELAP		2928-01	01-31-17
Alaska (UST)	State Program	10	UST-055	12-18-17
Arizona	State Program	9	AZ0708	08-11-17
Arkansas DEQ	State Program	6	88-0691	06-17-17
California	State Program	9	2897	01-31-18
Colorado	State Program	8	CA00044	08-31-17
Connecticut	State Program	1	PH-0691	06-30-17
Florida	NELAP	4	E87570	06-30-17
Hawaii	State Program	9	N/A	01-31-17
Illinois	NELAP	5	200060	03-17-17
Kansas	NELAP	7	E-10375	10-31-17
Louisiana	NELAP	6	30612	06-30-17
Maine	State Program	1	CA0004	04-18-18
Michigan	State Program	5	9947	01-31-18
New Jersey	NELAP	2	CA005	06-30-17
New York	NELAP	2	11666	04-01-17
Oregon	NELAP	10	4040	01-29-17
Pennsylvania	NELAP	3	68-01272	03-31-17
Texas	NELAP	6	T104704399	07-31-17
US Fish & Wildlife	Federal		LE148388-0	10-31-17
USDA	Federal		P330-11-00436	12-30-17
USEPA UCMR	Federal	1	CA00044	11-06-18
Utah	NELAP	8	CA00044	02-28-17
Virginia	NELAP	3	460278	03-14-17
Washington	State Program	10	C581	05-05-17
West Virginia (DW)	State Program	3	9930C	12-31-16
Wyoming	State Program	8	8TMS-L	01-29-17

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5101-1

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis (2-chloroisopropyl) ether

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5101-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
NWTPH-Gx	Northwest - Volatile Petroleum Products (GC/MS)	NWTPH	TAL SPK
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8011	EDB, DBCP, and 1,2,3-TCP (GC)	SW846	TAL SPK
8081B	Organochlorine Pesticides (GC)	SW846	TAL SEA
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL SPK
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	TAL DEN
8151A	Herbicides (GC)	SW846	TAL DEN
NWTPH-Dx	Northwest - Semi-Volatile Petroleum Products (GC)	NWTPH	TAL SPK
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
8290A	Dioxins and Furans (HRGC/HRMS)	SW846	TAL SAC
200.8	Metals (ICP/MS)	EPA	TAL SEA
245.1	Mercury (CVAA)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH
350.1	Nitrogen, Ammonia	MCAWW	TAL NSH
410.4	COD	MCAWW	TAL NSH
SM 5310C	TOC	SM	TAL NSH
SM 9223B	Coliforms, Total, and E.Coli	SM	TAL SPK

COOLER RECEIPT FORM

590-5101 Chain of Custody

Cooler Received/Opened On 12/2/2016 @ 0950

Time Samples Removed From Cooler_____ Time Samples Placed In Storage_____ (2 Hour Window)

1. Tracking # 2297 (last 4 digits, FedEx) Courier: ____FedEx_____

   IR Gun ID__17960358__ pH Strip Lot NA Chlorine Strip Lot NA

2. Temperature of rep. sample or temp blank when opened: 3.2 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO...NA

4. Were custody seals on outside of cooler? YES...NO...NA

   If yes, how many and where: 1 Front

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) SLV

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

   Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? 12-2AT YES...NO...NA

   b. Was there any observable headspace present in any VOA vial? YES...NO...NA

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) AB

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES..NO...NA

   b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) SLV

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) SLV

I certify that I attached a label with the unique LIMS number to each container (intial) SLV

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...#_____

BIS = Broken in shipment

Data Validation Report

Project:	Marshall Landfill Site February 2017 Samples
GEI File No:	00504-104-00
Date:	March 31, 2017

This report documents the results of a United States Environmental Protection Agency (EPA)-defined Stage 2A data validation (EPA Document 540-R-08-005; EPA 2009) of analytical data from the analyses of water and air samples collected as part of the February 2017 sampling events, and the associated laboratory and field quality control samples. The samples were obtained from the Marshall Landfill site located in Spokane County, Washington.

In summary and in our opinion, the quality and accuracy of the analytical data are acceptable for the intended use, with the qualifications applied from the data validation. The primary data validation qualifiers were: (1) GeoEngineers, Inc. (GeoEngineers) qualified selected data as non-detected (U) because of method blank contamination; and (2) GeoEngineers qualified selected data as estimated (J) because of accuracy, precision, and ion abundance ratio (dioxin/furans only) outliers.

The evaluation criteria and qualifications are discussed in greater detail below; a summary of qualified samples is listed in Table 2.

OBJECTIVE AND QUALITY CONTROL ELEMENTS

GeoEngineers completed the data validation consistent with the EPA Contract Laboratory Program National Functional Guidelines for Superfund Organic Methods Data Review (EPA 2008), Inorganic Superfund Data Review (EPA 2010), and Chlorinated Dioxin/Furan Data Review (EPA 2011) (National Functional Guidelines) to determine if the laboratory analytical results meet the project objectives and are usable for their intended purpose. Data usability was assessed by determining if:

- The samples were analyzed using well-defined and acceptable methods that provide reporting limits below applicable regulatory criteria;
- The precision and accuracy of the data are well-defined and sufficient to provide defensible data; and
- The quality assurance/quality control (QA/QC) procedures utilized by the laboratory meet acceptable industry practices and standards.

In accordance with the Quality Assurance Project Plan (QAPP), Appendix B of the Remedial Investigation/Feasibility Study Work Plan (GeoEngineers 2015), the data validation included review of the following QC elements:

- Data Package Completeness
- Chain-of-Custody Documentation
- Holding Times and Sample Preservation

- Surrogate Recoveries
- Method Blanks
- Matrix Spikes/Matrix Spike Duplicates
- Laboratory Control Samples/Laboratory Control Sample Duplicates
- Laboratory and Field Duplicates
- Miscellaneous

VALIDATED SAMPLE DELIVERY GROUPS

This data validation included review of the sample delivery groups (SDGs) listed below in Table 1.

TABLE 1: SUMMARY OF VALIDATED SAMPLE DELIVERY GROUPS

Laboratory SDG	Samples Validated
590-5548-1	MW-8A:022017, MW-8B:022017, MW-16A:022017
590-5551-1	MW-2A:022117, MW-3:022117, MW-4A:022117, MW-11A:022117, MW-14:022117, MW-16:022117
590-5559-1	MW-5:022217, MW-5A:022217, MW-7B:022217, MW-7D:022217, MW-9A:022217, MW-12A:022217, Dup:022217, MW-15:022217, MW-15A:022217
590-5571-1	LFB-3:022417, LFB-4:022417, LFB-5:022417, LFB-8:022417, LFB-9:022417, LFB-10:022417, LFB-11:022417, LFB-15:022417, LFB-16:022417, LFB-17:022417
590-5564-1	SW-1:022317

CHEMICAL ANALYSIS PERFORMED

TestAmerica Laboratories, Inc. (TestAmerica), located in Spokane, Washington, performed laboratory analyses on the samples using one or more of the following methods:

Water

- Gasoline-range Hydrocarbons (NWTPH-Gx) by Method NWTPH-Gx;
- Petroleum Hydrocarbons with Silica Gel (SG) Cleanup (NWTPH-Dx/SG) by Method NWTPH-Dx/SG;
- Volatile Organic Compounds (VOCs) by Methods SW8260C;
- 1,2-Dibromoethane (EDB) by Method SW8011;
- Semi-volatile Organic Compounds (SVOCs) by Method SW8270D;
- Polychlorinated Biphenyls (PCBs) by Method SW8082A;
- Organochlorine Pesticides by Method SW8081B;
- Organophosphorous Pesticides by Method SW8141B;
- Chlorinated Herbicides by Method SW8151A;
- Dioxins and Furans by Method SW8290A;

- Total Metals by Methods EPA200.8/EPA245.1;
- Dissolved Metals by Methods EPA200.8/EPA245.1;
- Anions by Method EPA300.0;
- Total Cyanide by Method EPA335.4;
- Ammonia (as N) by Method EPA350.1;
- Chemical Oxygen Demand (COD) by Method EPA410.4;
- Total Organic Carbon (TOC) by Method SM5310C; and
- Total Coliform and Escherichia coli by Method SM9223B.

Air

Volatile Organic Compounds in Air (VOCs-Air) by Method TO-15

DATA VALIDATION SUMMARY

The results for each of the QC elements are summarized below.

Data Package Completeness

TestAmerica provided the required deliverables for the data validation according to the National Functional Guidelines. The laboratory followed adequate corrective action processes and the identified anomalies were discussed in the relevant laboratory case narrative.

Chain-of-Custody Documentation

Chain-of-custody (COC) forms were provided with the laboratory analytical reports. The COCs were accurate and complete when submitted to the laboratory, with the following exceptions:

SDG 590-5551-1: The laboratory noted that one 250mL unpreserved sample vial and one 100mL coliform bacteria sample vial were received without sample vial labels. The sample vials were identified through process of elimination to be for Samples MW-11A:022117 and MW-14:022117, respectively.

SDG 590-5559-1: The laboratory noted one 1L unpreserved glass amber sample vial for Samples MW-7B:022217, MW-7D:022217, and MW-15:022217 were not received by the laboratory on 2/2/2017. The laboratory notified GeoEngineers and the missing sample vial for these samples were received by the laboratory on 2/23/2017.

The laboratory noted that sample ID for Sample MW-5:022217 was changed from MW-5B:022217, as listed on the COC, at GeoEngineers request.

Holding Times and Sample Preservation

The sample holding time is defined as the time that elapses between sample collection and sample analysis. Maximum holding time criteria exist for each analysis to help ensure that the analyte concentrations found at the time of analysis reflect the concentration present at the time of sample collection. Established holding times were met for each analysis. The sample coolers arrived at the laboratory within the appropriate temperatures of between 2 and 6 degrees Celsius, with the exceptions noted below.

SDG 590-5548-1: One sample cooler temperature recorded at the laboratory was 0.3 degrees Celsius. Since the samples were not frozen, this temperature should likely not affect the sample analytical results.

SDG 590-5559-1: One sample cooler temperature recorded at the laboratory was 1.8 degrees Celsius. Since the samples were not frozen, this temperature should likely not affect the sample analytical results.

Surrogate Recoveries

A surrogate compound is a compound that is chemically similar to the organic analytes of interest, but unlikely to be found in an environmental sample. Surrogates are used for organic analyses and are added to the samples, standards, and blanks to serve as an accuracy and specificity check of each analysis. The surrogates are added to the samples at a known concentration and percent recoveries are calculated following analysis. The surrogate percent recoveries for field samples were within the laboratory control limits, with the following exceptions:

SDG 590-5571-1: (VOCs-Air) The percent recoveries for surrogate 4-Bromofluorobenzene were greater than the control limits in Samples LFB-4:022417 and LFB-11:022417; however, the samples were spiked with two additional surrogates and in each case the percent recoveries were within their respective control limits. No action was required for these outliers.

Method Blanks

Method blanks are analyzed to ensure that laboratory procedures and reagents do not introduce measurable concentrations of the analytes of interest. A method blank was analyzed with each batch of samples, at a frequency of 1 per 20 samples. For each sample batch, method blanks for the applicable methods were analyzed at the required frequency. None of the analytes of interest were detected in the method blanks, with the following exceptions:

SDG 590-5548-1: (VOCs) There was a positive result for dichlorofluoromethane detected above the method detection limit, but below the reporting limit in the method blank extracted on 3/1/2017. The positive result for dichlorofluoromethane was qualified as non-detected (U) in Sample MW-8A:022017. There were no positive results for dichlorofluoromethane in Samples MW-8B:022017 and MW-16A:022017; therefore, no qualifications were required.

(Total Metals) There was a positive result for total selenium detected above the method detection limit, but below the reporting limit in the method blank digested on 3/8/2017. The positive results for total selenium were qualified as non-detected (U) in Samples MW-8A:022017, MW-8B:022017, and MW-16A:022017.

(Dissolved Metals) There was a positive result for dissolved chromium detected above the method detection limit, but below the reporting limit in the method blank digested on 2/23/2017. The positive results for dissolved chromium were qualified as non-detected (U) in Samples MW-8A:022017, MW-8B:022017, and MW-16A:022017.

(Dioxins/Furans) There was a positive result for OCDD detected at a concentration of less than 3X the reporting limit in the method blank extracted on 3/8/2017. The positive results for OCDD were qualified as non-detected (U) in Samples MW-8A:022017, MW-8B:022017, and MW-16A:022017.

Additionally, there were positive results for 1,2,3,4,6,7,8-HpCDD, 1,2,3,4,6,7,8-HpCDF, 1,2,3,7,8-PeCDD, and 2,3,4,6,7,8-HxCDF detected above the estimated detection limit, but below the reporting limit in the

same method blank. The positive results for 1,2,3,4,6,7,8-HpCDD, 1,2,3,4,6,7,8-HpCDF, 1,2,3,7,8-PeCDD, and 2,3,4,6,7,8-HxCDF were qualified as non-detected (U) in Samples MW-8A:022017 and MW-8B:022017. The positive results for 1,2,3,4,6,7,8-HpCDD, 1,2,3,4,6,7,8-HpCDF, and 2,3,4,6,7,8-HxCDF were qualified as non-detected (U) in Sample MW-16A:022017. There were no positive results for 1,2,3,7,8-PeCDD in Sample MW-16A:022017; therefore, no qualification was required.

SDG 590-5551-1: (VOCs) There was a positive result for dichlorofluoromethane detected above the method detection limit, but below the reporting limit in the method blank extracted on 3/1/2017. The positive result for dichlorofluoromethane was qualified as non-detected (U) in Sample MW-16:022117. There were no positive results for dichlorofluoromethane in Samples MW-2A:022117, MW-3:022117, MW-4A:022117, MW-11A:022117, and MW-14:022117; therefore, no qualifications were required.

(Dissolved Metals) There was a positive result for dissolved selenium detected above the method detection limit, but below the reporting limit in the method blank digested on 3/1/2017. The positive results for dissolved selenium were qualified as non-detected (U) in Samples MW-4A:022117, MW-11A:022117, and MW-16:022117. There were no positive results for dissolved selenium in Samples MW-2A:022117, MW-3:022117, and MW-14:022117; therefore, no qualifications were required.

(Dioxins/Furans) There was a positive result for OCDF detected at a concentration of less than 3X the reporting limit in the method blank extracted on 3/9/2017. The positive results for OCDF were qualified as non-detected (U) in Samples MW-3:022117, MW-4A:022117, MW-11A:022117, MW-14:022117, and MW-16:022117. There were no positive results for OCDF in Sample MW-2A:022117; therefore, no qualification was required.

SDG 590-5559-1: (VOCs) There was a positive result for dichlorofluoromethane detected above the method detection limit, but below the reporting limit in the method blank extracted on 3/1/2017. The positive results for dichlorofluoromethane were qualified as non-detected (U) in Samples MW-5:022217 and Dup:022217. There were no positive results for dichlorofluoromethane in Samples MW-5A:022217, MW-7B:022217, MW-7D:022217, MW-9A:022217, MW-12A:022217, MW-15:022217, and MW-15A:022217; therefore, no qualifications were required.

(Dioxins/Furans) There was a positive result for OCDF detected at a concentration of less than 3X the reporting limit in the method blank extracted on 3/9/2017. The positive result for OCDF was qualified as non-detected (U) in Sample MW-7D:022217.

SDG 590-5564-1: (VOCs) There was a positive result for dichlorofluoromethane detected above the method detection limit, but below the reporting limit in the method blank extracted on 3/1/2017. There were no positive results for dichlorofluoromethane in Sample SW-1:022317; therefore, no qualification was required.

Matrix Spikes/Matrix Spike Duplicates

Since the actual analyte concentration in an environmental sample is not known, the accuracy of a particular analysis is usually inferred by performing a matrix spike (MS) analysis on one sample from the associated batch, known as the parent sample. One aliquot of the sample is analyzed in the normal manner and then a second aliquot of the sample is spiked with a known amount of analyte concentration and analyzed. From these analyses, a percent recovery is calculated. Matrix spike duplicate (MSD) analyses are generally performed for organic analyses as a precision check and analyzed in the same sequence as a matrix spike. Using the result values from the MS and MSD, the relative percent difference

(RPD) is calculated. The percent recovery control limits for MS and MSD analyses are specified in the laboratory documents, as are the RPD control limits for MS/MSD sample sets.

One MS/MSD analysis should be performed for every analytical batch or every 20 field samples, whichever is more frequent. The frequency requirements were met for each analysis and the percent recovery and RPD values were within the proper control limits, with the following exceptions:

SDG 590-5548-1: (Total Cyanide) The laboratory performed a matrix spike on Sample MW-16A:022017. The percent recovery for total cyanide was greater than the control limits in the MS extracted on 2/27/2017. There were no positive results for total cyanide in Sample MW-16A:022017; therefore, no qualification was required.

SDG 590-5551-1: (Anions) The laboratory performed an MS/MSD sample set on Sample MW-3:022117. The percent recoveries for chloride and sulfate were less than the control limits in the MS/MSD extracted on 2/22/2017. The positive results for chloride and sulfate were qualified as estimated (J) in Sample MW-3:022117.

SDG 590-5559-1: (Anions) The laboratory performed an MS/MSD sample set on Sample MW-5:022217. The percent recoveries for chloride were less than the control limits in the MS/MSD extracted on 2/23/2017. The positive result for chloride was qualified as estimated (J) in Sample MW-5:022217.

Laboratory Control Samples/Laboratory Control Sample Duplicates

A laboratory control sample (LCS) is a blank sample that is spiked with a known amount of analyte and then analyzed. An LCS is similar to an MS, but without the possibility of matrix interference. Given that matrix interference is not an issue, the LCS/LCSD control limits for accuracy and precision are usually more rigorous than for MS/MSD analyses. Additionally, data qualification based on LCS/LCSD analyses would apply to all samples in the associated batch, instead of just the parent sample. The percent recovery control limits for LCS and LCSD analyses are specified in the laboratory documents, as are the RPD control limits for LCS/LCSD sample sets.

One LCS/LCSD analysis should be performed for every analytical batch or every 20 field samples, whichever is more frequent. The frequency requirements were met for all analyses and the percent recovery and RPD values were within the proper control limits, with the following exceptions:

SDG 590-5548-1: (SVOCs) The percent recovery for 4-Chloroaniline was less than the control limits and the percent recovery for bis(2-ethylhexyl) phthalate was greater than the control limits in the LCSD extracted on 2/27/2017; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers. Additionally, in the same LCS/LCSD sample set, the RPD values for 4,6-Dinitro-2-methylphenol, 4-Chloroaniline, and bis(2-ethylhexyl) phthalate were greater than the control limits. There were no positive results for these target analytes in the associated field samples; therefore, no qualifications were required.

SDG 590-5551-1: (SVOCs) The percent recovery for 4-Chloroaniline was less than the control limits and the percent recovery for bis(2-ethylhexyl) phthalate was greater than the control limits in the LCSD extracted on 2/27/2017; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

Additionally, in the same LCS/LCSD sample set, the RPD values for 4,6-Dinitro-2-methylphenol, 4-Chloroaniline, and bis(2-ethylhexyl) phthalate were greater than the control limits. The positive results for bis(2-ethylhexyl) phthalate were qualified as estimated (J) in Samples MW-3:022117 and MW-11A:022117. There were no positive results for 4,6-Dinitro-2-methylphenol and 4-Chloroaniline in Samples MW-3:022117 and MW-11A:022117; and there were no positive results for 4,6-Dinitro-2-methylphenol, 4-Chloroaniline, and bis(2-ethylhexyl) phthalate in Samples MW-2A:022117, MW-4A:022117, MW-14:022117, and MW-16:022117; therefore, no qualifications were required.

SDG 590-5559-1: (SVOCs) The percent recovery for 4-Chloroaniline was less than the control limits and the percent recovery for bis(2-ethylhexyl) phthalate was greater than the control limits in the LCSD extracted on 2/27/2017; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

Additionally, in the same LCS/LCSD sample set, the RPD values for 4,6-Dinitro-2-methylphenol, 4-Chloroaniline, and bis(2-ethylhexyl) phthalate were greater than the control limits. The positive results for bis(2-ethylhexyl) phthalate were qualified as estimated (J) in Samples MW-5A:022217, MW-7D:022217, MW-15A:022217, and Dup:022217. There were no positive results for 4,6-Dinitro-2-methylphenol and 4-Chloroaniline in Samples MW-5A:022217, MW-7D:022217, MW-15A:022217, and Dup:022217; and there were no positive results for 4,6-Dinitro-2-methylphenol, 4-Chloroaniline, and bis(2-ethylhexyl) phthalate in Samples MW-5:022217, MW-7B:022217, MW-9A:022217, MW-12A:022217, and MW-15:022217; therefore, no qualifications were required.

SDG 590-5564-1: (SVOCs) The percent recovery for 4-Chloroaniline was less than the control limits and the percent recovery for bis(2-ethylhexyl) phthalate was greater than the control limits in the LCSD extracted on 2/27/2017; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers. Additionally, in the same LCS/LCSD sample set, the RPD values for 4,6-Dinitro-2-methylphenol, 4-Chloroaniline, and bis(2-ethylhexyl) phthalate were greater than the control limits. There were no positive results for these target analytes in the associated field sample; therefore, no qualifications were required.

LABORATORY DUPLICATES

Internal laboratory duplicate analyses are performed to monitor the precision of the analyses. Two separate aliquots of a sample are analyzed as distinct samples in the laboratory and the RPD between the two results is calculated. Duplicate analyses should be performed once per analytical batch. If one or more of the samples used has a concentration less than five times the reporting limit for that sample, the absolute difference is used instead of the RPD. The RPD control limits are specified in the laboratory documents. Laboratory duplicates were analyzed at the proper frequency and the specified acceptance criteria were met.

Field Duplicates

In order to assess precision, field duplicate samples were collected and analyzed along with the reviewed sample batches. The duplicate samples were analyzed for the same parameters as the associated parent samples. Precision is determined by calculating the RPD between each pair of samples. If one or more of the sample analytes has a concentration greater than five times the reporting limit for that sample, then the absolute difference is used instead of the RPD. The RPD control limit for water samples is 35 percent.

SDG 590-5559-1: One field duplicate sample pair, MW-12A:022217 and Dup:022217, was submitted with this SDG. The precision criteria for all target analytes were met for this sample pair, with the exception of total chromium. The positive results for this target analyte was qualified as estimated (J) in this sample pair.

MISCELLANEOUS

SDG 590-5548-1: (Dioxins/Furans) The positive results for 1,2,3,6,7,8-HxCDF, 1,2,3,7,8,9-HxCDD, 1,2,3,7,8-PeCDF, and 2,3,7,8-TCDD in Sample MW-8A:022017; the positive results for 1,2,3,4,7,8-HxCDF, 1,2,3,6,7,8-HxCDF, 2,3,4,7,8-PeCDF, 2,3,7,8-TCDD, and OCDF in Sample MW-8B:022017; and the positive results for 1,2,3,4,7,8-HxCDD, 1,2,3,4,7,8-HxCDF, 1,2,3,4,7,8,9-HpCDF, 1,2,3,7,8,9-HxCDD, 1,2,3,7,8,9-HxCDF, 2,3,4,7,8-PeCDF, and 2,3,7,8-TCDD in Sample MW-16A:022017 were noted by the laboratory to represent the Estimated Maximum Possible Concentration for these compounds. This is typically due to the compound exhibiting ion abundance ratios that are outside of the allowable control limits set forth in the EPA method and the National Functional Guidelines. The results for these target analytes were qualified as estimated (J) in these samples, accordingly.

SDG 590-5551-1: (Dioxins/Furans) The positive results for 1,2,3,6,7,8-HxCDF and 1,2,3,7,8,9-HxCDF in Sample MW-2A:022117; the positive results for 1,2,3,4,6,7,8-HpCDF, 1,2,3,6,7,8-HxCDF, 1,2,3,7,8,9-HxCDF, and OCDD in Sample MW-4A:022117; the positive result for OCDD in Sample MW-11A:022117; the positive result for 1,2,3,4,6,7,8-HpCDF in Sample MW-14:022117; and the positive results for 1,2,3,4,6,7,8-HpCDF, 1,2,3,4,7,8,9-HpCDF, 1,2,3,4,7,8-HxCDD, 1,2,3,6,7,8-HxCDD, 1,2,3,6,7,8-HxCDF, 1,2,3,7,8,9-HxCDD, 2,3,4,7,8-PeCDF, and OCDD in Sample MW-16:022117 were noted by the laboratory to represent the Estimated Maximum Possible Concentration for these compounds. This is typically due to the compound exhibiting ion abundance ratios that are outside of the allowable control limits set forth in the EPA method and the National Functional Guidelines. The results for these target analytes were qualified as estimated (J) in these samples, accordingly.

SDG 590-5559-1: (Dioxins/Furans) The positive results for 1,2,3,4,6,7,8-HpCDF, 1,2,3,7,8,9-HxCDF, and 2,3,4,6,7,8-HxCDF in Sample MW-5:022217; the positive results for 1,2,3,4,6,7,8-HpCDD, 1,2,3,4,6,7,8-HpCDF, 1,2,3,4,7,8,9-HpCDF, 1,2,3,7,8-PeCDF, and 2,3,4,6,7,8-HxCDF in Sample MW-5A:022217; the positive results for 1,2,3,4,6,7,8-HpCDD, 1,2,3,4,7,8-HxCDF, 1,2,3,6,7,8-HxCDF, 1,2,3,7,8-PeCDF, 2,3,4,6,7,8-HxCDF, 2,3,4,7,8-PeCDF, and 2,3,7,8-TCDF in Sample MW-7B:022217; the positive results for 1,2,3,4,6,7,8-HpCDF, OCDD, and OCDF in Sample MW-9A:022217; the positive results for 1,2,3,4,6,7,8-HpCDD and 1,2,3,4,6,7,8-HpCDF in Sample MW-12A:022217; the positive results for 1,2,3,4,7,8,9-HpCDF, 2,3,4,6,7,8-HxCDF, and OCDF in Sample Dup:022217; the positive results for 1,2,3,4,6,7,8-HpCDD, 1,2,3,6,7,8-HxCDF, and 1,2,3,7,8,9-HxCDF in Sample MW-15:022217; and the positive results for 1,2,3,4,6,7,8-HpCDD, 1,2,3,4,6,7,8-HpCDF, and OCDD in Sample MW-15A:022217 were noted by the laboratory to represent the Estimated Maximum Possible Concentration for these compounds. This is typically due to the compound exhibiting ion abundance ratios that are outside of the allowable control limits set forth in the EPA method and the National Functional Guidelines. The results for these target analytes were qualified as estimated (J) in these samples, accordingly.

SDG 590-5564-1: (Dioxins/Furans) The positive results 1,2,3,4,6,7,8-HpCDD, 1,2,3,4,6,7,8-HpCDF, and OCDD in Sample SW-1:022317 were noted by the laboratory to represent the Estimated Maximum Possible Concentration for these compounds. This is typically due to the compound exhibiting ion

abundance ratios that are outside of the allowable control limits set forth in the EPA method and the National Functional Guidelines. The results for these target analytes were qualified as estimated (J) in this sample.

OVERALL ASSESSMENT

As was determined by this data validation, the laboratory followed the specified analytical methods. Accuracy was acceptable, as demonstrated by the surrogate, LCS/LCSD, and MS/MSD percent recovery values, with the exceptions noted above. Precision was acceptable, as demonstrated by the LCS/LCSD, MS/MSD, and laboratory/field duplicate RPD values, with the exceptions noted above.

The data are acceptable for the intended use, with the following qualifications listed below in Table 2.

TABLE 2: SUMMARY OF QUALIFIED SAMPLES

Sample ID	Analyte	Qualifier	Reason
MW-2A:022117	1,2,3,6,7,8-HxCDF	J	See Miscellaneous
	1,2,3,7,8,9-HxCDF	J	See Miscellaneous
MW-3:022117	Bis(2-ethylhexyl) phthalate	J	LCS/LCSD RPD

Laboratory: TestAmerica Spokane

Narrative

Receipt
The samples were received on 2/21/2017 10:35 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 3 coolers at receipt time were 0.3º C, 2.9º C and 3.3º C.

GC/MS VOA
Method 8260C: The method blank for analytical batch 590-10912 contained Dichlorofluoromethane above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-239702 recovered outside acceptance criteria, low biased, for 2,4-Dinitrophenol and Benzoic acid. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-239702 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-239396 recovered outside control limits for the following analytes: 4,6-Dinitro-2-methylphenol, Bis(2-ethylhexyl) phthalate and 4-Chloroaniline.

Method 8270D: The following analytes recovered outside control limits for the LCSD associated with preparation batch 580-239396 and analytical batch 580-239702: 4-Chloroaniline and Bis(2-ethylhexyl) phthalate. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
Method 8141B: The surrogate recovery for the method blank associated with preparation batch 280-363590 and analytical batch 280-365610 was outside control limits (low). Surrogate recoveries for the associated samples were all within control limits and the samples were ND for all target analytes; therefore, the data is reported.

Method 8141B: The initial calibration verification (ICV) result for batch 280-365610 was below the lower control limit for Malathion on the front column and for Mevinphos on the back column. The back column was in control for Malathion and the front column was in control for Mevinphos. Sample results were non-detects for the affected analytes; therefore, the data have been reported from the column that was in control in the ICV.

Method 8081B: Surrogate Tetrachloro-m-xylene recovery for the following sample was outside the upper control limit: (CCB 580-239335/15) and (CCB 580-239335/32). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B: The following CCV fell outside the control limits for surrogate Tetrachloro-m-xylene on the primary column only. Since all associated samples had surrogate recoveries within the control limits on both columns, the data has been reported.

Method 8081B: The continuing calibration verification (CCV) associated with batch 580-239335 recovered outside acceptance criteria, low biased, for delta-BHC on the confirmation column only. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Job ID: 590-5548-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

Metals
Method 200.8: The method blank for prep batch 580-239965 contained Selenium above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-analysis of samples was not performed.

Method 200.8: The method blank for prep batch 580-239192 contained Chromium above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
Method 335.4: The matrix spike (MS) recovery for preparation batch 490-410666 and analytical batch 490-411080 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Biology
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 8151A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 280-363575.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5548-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-5548-1	MW-8A:022017	Water	02/20/17 10:14	02/21/17 10:35
590-5548-2	MW-8B:022017	Water	02/20/17 12:14	02/21/17 10:35

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	RPD of the LCS and LCSD exceeds the control limits
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
X	Surrogate is outside control limits

Dioxin

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
q	The reported result is the estimated maximum possible concentration of this analyte, quantitated using the theoretical ion ratio. The measured ion ratio does not meet qualitative identification criteria and indicates a possible interference.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F1	MS and/or MSD Recovery is outside acceptance limits.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5548-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-17
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C583	08-02-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8141B	3510C	Water	Fenthion
8141B	3510C	Water	Propazine

Laboratory: TestAmerica Nashville

The certifications listed below are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C789	07-19-17

Laboratory: TestAmerica Sacramento

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5548-1

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis (2-chloroisopropyl) ether

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5548-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
NWTPH-Gx	Northwest - Volatile Petroleum Products (GC/MS)	NWTPH	TAL SPK
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8011	EDB, DBCP, and 1,2,3-TCP (GC)	SW846	TAL SPK
8081B	Organochlorine Pesticides (GC)	SW846	TAL SEA
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL SPK
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	TAL DEN
8151A	Herbicides (GC)	SW846	TAL DEN
NWTPH-Dx	Northwest - Semi-Volatile Petroleum Products (GC)	NWTPH	TAL SPK
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
8290A	Dioxins and Furans (HRGC/HRMS)	SW846	TAL SAC
200.8	Metals (ICP/MS)	EPA	TAL SEA
245.1	Mercury (CVAA)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH
350.1	Nitrogen, Ammonia	MCAWW	TAL NSH
410.4	COD	MCAWW	TAL NSH
SM 5310C	TOC	SM	TAL NSH
SM 9223B	Coliforms, Total, and E.Coli	SM	TAL SPK

COOLER RECEIPT FORM

590-5548 Chain of Custody

Cooler Received/Opened On 2/22/2017 @ 0945

Time Samples Removed From Cooler 1555 Time Samples Placed In Storage 1556 (2 Hour Window)

1. Tracking # 4933 (last 4 digits, FedEx) Courier: _FedEx_

IR Gun ID 160656838 pH Strip Lot N/A Chlorine Strip Lot N/A

2. Temperature of rep. sample or temp blank when opened: 1.2 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO (NA)

4. Were custody seals on outside of cooler? (YES)..NO...NA

If yes, how many and where: 1 Front

5. Were the seals intact, signed, and dated correctly? (YES)..NO...NA

6. Were custody papers inside cooler? (YES)..NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) PM

7. Were custody seals on containers: YES (NO) and Intact YES...NO..(NA)

Were these signed and dated correctly? YES...NO..(NA)

8. Packing mat'l used? (Bubblewrap) Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: (Ice) Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? (YES)...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? (YES)..NO...NA

12. Did all container labels and tags agree with custody papers? (YES)..NO...NA

13a. Were VOA vials received? YES..(NO)..NA

b. Was there any observable headspace present in any VOA vial? YES...NO..(NA)

14. Was there a Trip Blank in this cooler? YES...NO..(NA) If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) HKG

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES..NO.(NA)

b. Did the bottle labels indicate that the correct preservatives were used (YES)..NO...NA

16. Was residual chlorine present? YES...NO..(NA)

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) HKG

17. Were custody papers properly filled out (ink, signed, etc)? (YES)..NO...NA

18. Did you sign the custody papers in the appropriate place? (YES)...NO...NA

19. Were correct containers used for the analysis requested? (YES)...NO...NA

20. Was sufficient amount of sample sent in each container? (YES)...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) HKG

I certify that I attached a label with the unique LIMS number to each container (intial) HKG

21. Were there Non-Conformance issues at login? YES..(NO) Was a NCM generated? YES..(NO)..#_____

BIS = Broken in shipment

Narrative

Receipt
The samples were received on 2/22/2017 11:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 6 coolers at receipt time were 2.1º C, 3.0º C, 3.9º C, 4.3º C, 4.5º C and 5.2º C.

Receipt Exceptions
A 250ml unpreserved poly container and 100ml coliform bacteria bottle were received not labeled. Using the process of elimination it was determined that the 250ml unpreserved container was MW-11A:022117 (590-5551-5) and the 100ml coliform bacteria bottle was MW-14:022117 (590-5551-3).

GC/MS VOA
Method 8260C: The method blank for analytical batch 590-10912 contained Dichlorofluoromethane above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-239702 recovered outside acceptance criteria, low biased, for 2,4-Dinitrophenol and Benzoic acid. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-239702 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-239396 recovered outside control limits for the following analytes: 4,6-Dinitro-2-methylphenol, Bis(2-ethylhexyl) phthalate and 4-Chloroaniline.

Method 8270D: The following analytes recovered outside control limits for the LCSD associated with preparation batch 580-239396 and analytical batch 580-239702: 4-Chloroaniline and Bis(2-ethylhexyl) phthalate. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
Method 8151A: The 2,4-Dichlorophenylacetic acid surrogate recovery for the following sample in preparation batch 280-363575 and analytical batch 280-363954 was outside acceptance limits (high biased) on the back/confirmation column due to matrix interference: MW-3:022117 (590-5551-6). The recovery is within acceptance limits on the other column. There is a non-target peak at the RT for the surrogate on the back/confirmation column.

Method 8141B: The surrogate recovery for the method blank associated with preparation batch 280-363590 and analytical batch 280-365610 was outside control limits (low). Surrogate recoveries for the associated samples were within control limits and the samples were ND for all target analytes; therefore, the data is reported.

Method 8141B: The Chlormefos surrogate recovery for the following sample was outside acceptance limits (low biased) on the front column: MW-2A:022117 (590-5551-4). The recovery was within acceptance limits on the back column; therefore, the surrogate is reported from the back column.

Method 8141B: The initial calibration verification (ICV) result for batch 280-365610 was below the lower control limit for Malathion on the front column and for Mevinphos on the back column. The back column was in control for Malathion and the front column was in control for Mevinphos. Sample results were non-detects for the affected analytes; therefore, the data have been reported from the column that was in control in the ICV.

Method 8081B: Surrogate Tetrachloro-m-xylene recovery for the following sample was outside the upper control limit: (CCB

Laboratory: TestAmerica Spokane (Continued)

580-239335/15) and (CCB 580-239335/32). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B: Surrogate Tetrachloro-m-xylene recovery for the following sample was outside the upper control limit: (CCB 580-239470/16) and (CCB 580-239470/37). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B: The following CCV fell outside the control limits for surrogate Tetrachloro-m-xylene on the primary column only. Since all associated samples had surrogate recoveries within the control limits on both columns, the data has been reported.

Method 8081B: The continuing calibration verification (CCV) associated with batch 580-239335 recovered outside acceptance criteria, low biased, for delta-BHC on the confirmation column only. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8081B: The continuing calibration verification (CCV) associated with batch 580-239470 recovered outside acceptance criteria, low biased, for delta-BHC on the confirmation column only. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect above the RL for this analyte, the data have been reported.

Method 8081B: The following CCV fell outside the control limits high for %D for surrogate Tetrachloro-m-xylene on the primary column only. All associated samples had surrogate recoveries within the control limits on both columns; therefore, the data has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
Method 200.8: The method blank for prep batch 580-239541 contained Selenium above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Biology
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 8151A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 280-363575.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5551-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-5551-1	MW-16:022117	Water	02/21/17 10:22	02/22/17 11:32

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	RPD of the LCS and LCSD exceeds the control limits
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
X	Surrogate is outside control limits

HPLC/IC

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.

Dioxin

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
q	The reported result is the estimated maximum possible concentration of this analyte, quantitated using the theoretical ion ratio. The measured ion ratio does not meet qualitative identification criteria and indicates a possible interference.
B	Compound was found in the blank and sample.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5551-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-17
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C583	08-02-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8141B	3510C	Water	Fenthion
8141B	3510C	Water	Propazine

Laboratory: TestAmerica Nashville

The certifications listed below are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C789	07-19-17

Laboratory: TestAmerica Sacramento

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-055	12-18-17
Arizona	State Program	9	AZ0708	08-11-17

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5551-1

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis (2-chloroisopropyl) ether

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5551-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
NWTPH-Gx	Northwest - Volatile Petroleum Products (GC/MS)	NWTPH	TAL SPK
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8011	EDB, DBCP, and 1,2,3-TCP (GC)	SW846	TAL SPK
8081B	Organochlorine Pesticides (GC)	SW846	TAL SEA
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL SPK
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	TAL DEN
8151A	Herbicides (GC)	SW846	TAL DEN
NWTPH-Dx	Northwest - Semi-Volatile Petroleum Products (GC)	NWTPH	TAL SPK
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
8290A	Dioxins and Furans (HRGC/HRMS)	SW846	TAL SAC
200.8	Metals (ICP/MS)	EPA	TAL SEA
245.1	Mercury (CVAA)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH
350.1	Nitrogen, Ammonia	MCAWW	TAL NSH
410.4	COD	MCAWW	TAL NSH
SM 5310C	TOC	SM	TAL NSH
SM 9223B	Coliforms, Total, and E.Coli	SM	TAL SPK

COOLER RECEIPT FORM

590-5551 Chain of Custody

Cooler Received/Opened On 2/24/2017 @ 0950

Time Samples Removed From Cooler 1341 Time Samples Placed In Storage 1518 (2 Hour Window)

1. Tracking # 5090 (last 4 digits, FedEx) Courier: FedEx

IR Gun ID 17960353 pH Strip Lot HC693124 Chlorine Strip Lot 081116K

2. Temperature of rep. sample or temp blank when opened: 0.2 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO..(NA)

4. Were custody seals on outside of cooler? (YES)...NO...NA

If yes, how many and where: 1 front

5. Were the seals intact, signed, and dated correctly? (YES)...NO...NA

6. Were custody papers inside cooler? (YES)...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) HRG

7. Were custody seals on containers: YES (NO) and Intact YES...NO...(NA)

Were these signed and dated correctly? YES...NO...(NA)

8. Packing mat'l used? (Bubblewrap) Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: (Ice) Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? (YES)...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? (YES)...NO...NA

12. Did all container labels and tags agree with custody papers? (YES)...NO...NA

13a. Were VOA vials received? YES...(NO)...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...(NA)

14. Was there a Trip Blank in this cooler? YES...(NO)...NA If multiple coolers, sequence #

I certify that I unloaded the cooler and answered questions 7-14 (intial) AT

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? (YES)..NO..NA

b. Did the bottle labels indicate that the correct preservatives were used (YES)...NO...NA

16. Was residual chlorine present? YES...(NO)...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) SLV

17. Were custody papers properly filled out (ink, signed, etc)? (YES)...NO...NA

18. Did you sign the custody papers in the appropriate place? (YES)...NO...NA

19. Were correct containers used for the analysis requested? (YES)...NO...NA

20. Was sufficient amount of sample sent in each container? (YES)...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) SLV

I certify that I attached a label with the unique LIMS number to each container (intial) SLV

21. Were there Non-Conformance issues at login? YES...(NO) Was a NCM generated? YES...(NO)...#

BIS = Broken in shipment

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	Lab does not accept radioactive samples.
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	False	Refer to Job Narrative for details.
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The samples were received on 2/23/2017 11:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 5 coolers at receipt time were 1.8º C, 2.2º C, 2.3º C, 2.4º C and 3.0º C.

Receipt Exceptions
The one liter unpreserved glass amber containers were not received for the following samples: MW-7D:022217 (590-5559-1), MW-7B:022217 (590-5559-2) and MW-15:022217 (590-5559-5). The client was aware of this at the time of sample submission. The containers were delivered and received by the lab 02/23/2017..

The client sample ID for sample MW-5:022217 (590-5559-4) was changed from MW-5B:022217 to MW-5:022217 per the client's request.

GC/MS VOA
Method 8260C: The method blank for analytical batch 590-10912 contained Dichlorofluoromethane above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-239702 recovered outside acceptance criteria, low biased, for 2,4-Dinitrophenol and Benzoic acid. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-239702 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-239396 recovered outside control limits for the following analytes: 4,6-Dinitro-2-methylphenol, Bis(2-ethylhexyl) phthalate and 4-Chloroaniline.

Method 8270D: The following analytes recovered outside control limits for the LCSD associated with preparation batch 580-239396 and analytical batch 580-239702: 4-Chloroaniline and Bis(2-ethylhexyl) phthalate. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
Method 8151A: The 2,4-Dichlorophenylacetic acid surrogate recovery for the following samples in preparation batch 280-363686 and analytical batch 280-364437 was outside acceptance limits (high biased) on the back/confirmation column: MW-7D:022217 (590-5559-1), MW-7B:022217 (590-5559-2), MW-5A:022217 (590-5559-3), MW-5:022217 (590-5559-4), MW-15:022217 (590-5559-5), MW-15A:022217 (590-5559-6), MW-9A:022217 (590-5559-7), MW-12A:022217 (590-5559-8), Dup:022217 (590-5559-9) and (LCSD 280-363686/3-A). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

Method 8151A: The continuing calibration verification (CCV) for MCPA associated with analytical batch 280-364437 recovered above the upper control limit on the front/primary column. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported from the back/confirmation column which is in control.

Method 8141B: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 280-363945 recovered outside control limits for the following analytes: Fenthion. The %R is within control limits for both samples.

Method 8141B: The Chlormefos surrogate recovery for the following sample in preparation batch 280-363945 and analytical batch 280-364803 was outside acceptance limits (low biased) on the front/primary column: MW-15A:022217 (590-5559-6). The recovery was within acceptance limits on the back column; therefore, the surrogate is reported from the back column.

Job ID: 590-5559-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

Method 8141B: The initial calibration verification (ICV) result for batch 280-364803 was below the lower control limit for Malathion on the front column. The back column was in control for Malathion. Sample results were non-detects for the affected analytes; therefore, the data have been reported from the column that was in control in the ICV.

Method 8081B: Surrogate Tetrachloro-m-xylene recovery for the following sample was outside the upper control limit: (CCB 580-239470/16) and (CCB 580-239470/37). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B: The continuing calibration verification (CCV) associated with batch 580-239470 recovered outside acceptance criteria, low biased, for delta-BHC on the confirmation column only. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect above the RL for this analyte, the data have been reported.

Method 8081B: The continuing calibration verification (CCV) associated with batch 580-239470 was outside the control limits high for %D for surrogate Tetrachloro-m-xylene on the primary column only. All associated samples had surrogate recoveries within the control limits on both columns; therefore, the data has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin
Method 8290A: The bracketing continuing calibration verification (CCV031317B) associated with batch 320-154960 has analyte (1,2,3,4,7,8-HxCDD) with percent difference value that is between the method criteria of 20% to 25% deviation from the initial calibration curve. Per method guidelines, an average relative response factor (RRF) is calculated from the bracketing CCV and is used to quantitate any positive results in the associated samples for the affected analytes.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Biology
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 3510C: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 280-363945.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	RPD of the LCS and LCSD exceeds the control limits
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.

HPLC/IC

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F1	MS and/or MSD Recovery is outside acceptance limits.

Dioxin

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
q	The reported result is the estimated maximum possible concentration of this analyte, quantitated using the theoretical ion ratio. The measured ion ratio does not meet qualitative identification criteria and indicates a possible interference.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5559-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-17
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C583	08-02-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8141B	3510C	Water	Fenthion
8141B	3510C	Water	Propazine

Laboratory: TestAmerica Nashville

The certifications listed below are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C789	07-19-17

Laboratory: TestAmerica Sacramento

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5559-1

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis (2-chloroisopropyl) ether

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5559-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
NWTPH-Gx	Northwest - Volatile Petroleum Products (GC/MS)	NWTPH	TAL SPK
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8011	EDB, DBCP, and 1,2,3-TCP (GC)	SW846	TAL SPK
8081B	Organochlorine Pesticides (GC)	SW846	TAL SEA
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL SPK
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	TAL DEN
8151A	Herbicides (GC)	SW846	TAL DEN
NWTPH-Dx	Northwest - Semi-Volatile Petroleum Products (GC)	NWTPH	TAL SPK
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
8290A	Dioxins and Furans (HRGC/HRMS)	SW846	TAL SAC
200.8	Metals (ICP/MS)	EPA	TAL SEA
245.1	Mercury (CVAA)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH
350.1	Nitrogen, Ammonia	MCAWW	TAL NSH
410.4	COD	MCAWW	TAL NSH
SM 5310C	TOC	SM	TAL NSH
SM 9223B	Coliforms, Total, and E.Coli	SM	TAL SPK

COOLER RECEIPT FORM

590-5559 Chain of Custody

Cooler Received/Opened On 2/24/2017 @ 0950

Time Samples Removed From Cooler 1341 Time Samples Placed In Storage 1518 (2 Hour Window)

1. Tracking # 5090 (last 4 digits, FedEx) Courier: ___FedEx___

IR Gun ID__17960353_ pH Strip Lot__HC693124_____ Chlorine Strip Lot__081116K_____

2. Temperature of rep. sample or temp blank when opened: 0.2 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO..(NA)

4. Were custody seals on outside of cooler? (YES)...NO...NA

If yes, how many and where: 1 front

5. Were the seals intact, signed, and dated correctly? (YES)...NO...NA

6. Were custody papers inside cooler? (YES)...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) HRG

7. Were custody seals on containers: YES (NO) and Intact YES...NO..(NA)

Were these signed and dated correctly? YES...NO..(NA)

8. Packing mat'l used? (Bubblewrap) Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: (Ice) Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? (YES)...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? (YES)...NO...NA

12. Did all container labels and tags agree with custody papers? (YES)...NO...NA

13a. Were VOA vials received? YES..(NO)...NA

b. Was there any observable headspace present in any VOA vial? YES...NO..(NA)

14. Was there a Trip Blank in this cooler? YES..(NO)..NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) AT

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? (YES)..NO..NA

b. Did the bottle labels indicate that the correct preservatives were used (YES)...NO...NA

16. Was residual chlorine present? YES..(NO)..NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) SW

17. Were custody papers properly filled out (ink, signed, etc)? (YES)..NO...NA

18. Did you sign the custody papers in the appropriate place? (YES)..NO...NA

19. Were correct containers used for the analysis requested? (YES)..NO...NA

20. Was sufficient amount of sample sent in each container? (YES)..NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) SW

I certify that I attached a label with the unique LIMS number to each container (intial) SW

21. Were there Non-Conformance issues at login? YES..(NO) Was a NCM generated? YES..(NO)..#_____

BIS = Broken in shipment

Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5571-1

Qualifiers

Air - GC/MS VOA

Qualifier	Qualifier Description
X	Surrogate is outside control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Note: Since laboratory accreditations are subject to change, TestAmerica Laboratories, Inc. places the ownership of method, analyte & accreditation compliance upon out subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/tests/matrix being analyzed, the samples must be shipped back to the TestAmerica laboratory or other instructions will be provided. Any changes to accreditation status should be brought to TestAmerica Laboratories, Inc. attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said complicance to TestAmerica Laboratories, Inc.

Possible Hazard Identification	*Sample Disposal (A fee may be assessed if samples are retained longer than 1 month)*
Unconfirmed	☐ *Return To Client* ☐ *Disposal By Lab* ☐ *Archive For* _____ *Months*

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	Lab does not accept radioactive samples.
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	Thermal preservation not required.
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	N/A	Thermal preservation not required.
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Narrative

Receipt
The sample was received on 2/23/2017 3:15 PM; the sample arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 5.8º C.

GC/MS VOA
Method 8260C: The method blank for analytical batch 590-10912 contained Dichlorofluoromethane above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-239702 recovered outside acceptance criteria, low biased, for 2,4-Dinitrophenol and Benzoic acid. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-239702 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 580-239396 recovered outside control limits for the following analytes: 4,6-Dinitro-2-methylphenol, Bis(2-ethylhexyl) phthalate and 4-Chloroaniline.

Method 8270D: The following analyte recovered outside control limits for the LCSD associated with preparation batch 580-239396 and analytical batch 580-239702: 4-Chloroaniline and Bis(2-ethylhexyl) phthalate. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
Method 8151A: The 2,4-Dichlorophenylacetic acid surrogate recovery associated with preparation batch 280-363884 and analytical batch 280-365316 was outside acceptance limits (high biased) on the confirmation column for the following samples: SW-1:022317 (590-5564-1) and (LCS 280-363884/2-A). The recovery was within acceptance limits on the front column; therefore the data is reported. Surrogate recoveries are reported from the front column.

Method 8151A: The laboratory control sample (LCSD) for preparation batch 280-363884 and analytical batch 280-365316 recovered outside control limits (low) for 2,4,5-TP (Silvex) on the front column. The back column was in control. All associated samples were ND for 2,4,5-TP (Silvex) on both columns; therefore, the 2,4,5-TP (Silvex) results were reported from the back (in control) column.

Method 8141B: The surrogate recovery for the method blank associated with preparation batch 280-363590 and analytical batch 280-365610 was outside control limits (low). Surrogate recoveries for the associated samples were all within control limits and the samples were ND for all target analytes; therefore, the data is reported.

Method 8141B: The initial calibration verification (ICV) result for batch 280-365610 was below the lower control limit for Malathion on the front column and for Mevinphos on the back column. The back column was in control for Malathion and the front column was in control for Mevinphos. Sample results were non-detects for the affected analytes; therefore, the data have been reported from the column that was in control in the ICV.

Method 8081B: Surrogate Tetrachloro-m-xylene recovery for the following sample was outside the upper control limit: (CCB 580-239470/16) and (CCB 580-239470/37). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B: The continuing calibration verification (CCV) associated with batch 580-239470 recovered outside acceptance criteria, low biased, for delta-BHC on the confirmation column only. A reporting limit (RL) standard was analyzed, and the target analyte was detected.

Job ID: 590-5564-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

Since the associated sample was non-detect above the RL for this analyte, the data have been reported.

Method 8081B: The following CCV fell high outside the control limits for %D for surrogate Tetrachloro-m-xylene on the primary column only. All associated samples had surrogate recoveries within the control limits on both columns; therefore, the data has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Dioxin
Method 8290A: The bracketing continuing calibration verification (CCV031317B) associated with batch 320-154960 has analyte (1,2,3,4,7,8-HxCDD) with percent difference value that is between the method criteria of 20% to 25% deviation from the initial calibration curve. Per method guidelines, an average relative response factor (RRF) is calculated from the bracketing CCV and is used to quantitate any positive results in the associated samples for the affected analytes.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
Method 245.1: Insufficient sample volume was available to perform a sample duplicate (DUP) associated with batch 240098.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Biology
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method 3510C_8141B: The following sample formed emulsions during the extraction procedure: SW-1:022317 (590-5564-1). The emulsions were broken up using the pour back method for the first and second extraction with MeCl2.

Method 8151A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-363884.

Method 8151A: The following sample formed emulsions during the extraction procedure: SW-1:022317 (590-5564-1). The emulsions were broken up using the pour back method for the first, second and third extraction with MeCl2.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Dioxin Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5564-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-5564-1	SW-1:022317	Water	02/23/17 13:50	02/23/17 15:15

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	RPD of the LCS and LCSD exceeds the control limits
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
X	Surrogate is outside control limits

Dioxin

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
q	The reported result is the estimated maximum possible concentration of this analyte, quantitated using the theoretical ion ratio. The measured ion ratio does not meet qualitative identification criteria and indicates a possible interference.
B	Compound was found in the blank and sample.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5564-1

Laboratory: TestAmerica Spokane

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Alaska (UST)	State Program	10	UST-071	10-31-17
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C583	08-02-17

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
8141B	3510C	Water	Fenthion
8141B	3510C	Water	Propazine

Laboratory: TestAmerica Nashville

The certifications listed below are applicable to this report.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C789	07-19-17

Laboratory: TestAmerica Sacramento

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5564-1

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis (2-chloroisopropyl) ether

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-5564-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
NWTPH-Gx	Northwest - Volatile Petroleum Products (GC/MS)	NWTPH	TAL SPK
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8011	EDB, DBCP, and 1,2,3-TCP (GC)	SW846	TAL SPK
8081B	Organochlorine Pesticides (GC)	SW846	TAL SEA
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL SPK
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	TAL DEN
8151A	Herbicides (GC)	SW846	TAL DEN
NWTPH-Dx	Northwest - Semi-Volatile Petroleum Products (GC)	NWTPH	TAL SPK
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
8290A	Dioxins and Furans (HRGC/HRMS)	SW846	TAL SAC
200.8	Metals (ICP/MS)	EPA	TAL SEA
245.1	Mercury (CVAA)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH
350.1	Nitrogen, Ammonia	MCAWW	TAL NSH
410.4	COD	MCAWW	TAL NSH
SM 5310C	TOC	SM	TAL NSH
SM 9223B	Coliforms, Total, and E.Coli	SM	TAL SPK

COOLER RECEIPT FORM

590-5564 Chain of Custody

Cooler Received/Opened On 02-25-2017 @ 09:20

Time Samples Removed From Cooler 1025 Time Samples Placed In Storage 1216 (2 Hour Window)

1. Tracking # 5252 (last 4 digits, FedEx) Courier: FedEx

IR Gun ID 31470366 pH Strip Lot HC689799 Chlorine Strip Lot 0871166 1C

2. Temperature of rep. sample or temp blank when opened: 0.2 Degrees Celsius

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: 1 (front)

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (initial) KA

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (initial) 2-25-17

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA 2-25-17

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (initial)

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (initial)

I certify that I attached a label with the unique LIMS number to each container (initial)

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...#_____

BIS = Broken in shipment

Note: Since laboratory accreditations are subject to change, TestAmerica Laboratories, Inc. places the ownership of method, analyte & accreditation compliance upon out subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/tests/matrix being analyzed, the samples must be shipped back to the TestAmerica laboratory or other instructions will be provided. Any changes to accreditation status should be brought to TestAmerica Laboratories, Inc. attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said complicance to TestAmerica Laboratories, Inc.

Project:	Marshall Landfill Site December 2017 Samples
GEI File No:	00504-104-00
Date:	January 24, 2018

This report documents the results of a United States Environmental Protection Agency (EPA)-defined Stage 2A data validation (EPA Document 540-R-08-005; EPA, 2009) of analytical data from the analyses of water samples collected as part of the December 2017 sampling events, and the associated laboratory and field quality control (QC) samples. The samples were obtained from the Marshall Landfill site located in Spokane County, Washington.

In summary and in our opinion, the quality and accuracy of the analytical data are acceptable for the intended use, with the qualifications applied from the data validation. The primary data validation qualifiers were: (1) GeoEngineers, Inc. (GeoEngineers) qualified selected data as non-detected (U) because of method blank contamination; and (2) GeoEngineers qualified selected data as estimated (J) because of accuracy and precision outliers.

The evaluation criteria and qualifications are discussed in greater detail below; a summary of qualified samples is listed in Table 2.

Objective and Quality Control Elements

GeoEngineers, Inc. completed the data validation consistent with the EPA Contract Laboratory Program National Functional Guidelines for Superfund Organic Methods Data Review (EPA, 2016a) and Inorganic Superfund Data Review (EPA, 2016b) (National Functional Guidelines) to determine if the laboratory analytical results meet the project objectives and are usable for their intended purpose. Data usability was assessed by determining if:

- The samples were analyzed using well-defined and acceptable methods that provide reporting limits below applicable regulatory criteria;
- The precision and accuracy of the data are well-defined and sufficient to provide defensible data; and
- The quality assurance/quality control (QA/QC) procedures utilized by the laboratory meet acceptable industry practices and standards.

In accordance with the Quality Assurance Project Plan (QAPP), Appendix B of the Remedial Investigation/Feasibility Study Work Plan (GeoEngineers, 2015), the data validation included review of the following QC elements:

- Data Package Completeness
- Chain-of-Custody Documentation
- Holding Times and Sample Preservation
- Surrogate Recoveries
- Method and Trip Blanks
- Matrix Spikes/Matrix Spike Duplicates

- Laboratory Control Samples/Laboratory Control Sample Duplicates
- Laboratory and Field Duplicates

Validated Sample Delivery Groups

This data validation included review of the sample delivery groups (SDGs) listed below in Table 1.

TABLE 1: SUMMARY OF VALIDATED SAMPLE DELIVERY GROUPS

Laboratory SDG	Samples Validated
590-7671-1	MW-4A:120617, MW-8A:120617, MW-8B:120617, MW-16A:120617, Trip Blank
590-7675-1	MW-2A-120717, MW-3-120717, MW-5A-120717, MW-5-120717, MW-4-120717, MW-12A-120717, MW-14-120717, MW-16-120717, Trip Blank
590-7679-1	MW-2, MW-15, Trip Blank
590-7685-1	MW-1A:121117, MW-11A:121117, MW-15A:121117, Trip Blank
590-7700-1	MW-7B:121217, Dup:121217, MW-7D:121217, Trip Blank
590-7713-1	MW-5A:121317, MW-9A:121317, MW-16:121317, Trip Blank

Chemical Analysis Performed

TestAmerica Laboratories, Inc. (TestAmerica), located in Spokane, Washington, performed laboratory analyses on the samples using one or more of the following methods:

- Volatile Organic Compounds (VOCs) by Methods SW8260C;
- Semi-volatile Organic Compounds (SVOCs) by Method SW8270D;
- 1,4-Dioxane by Method SW8270D-SIM;
- Chlorinated Herbicides by Method SW8151A;
- Total and Dissolved Metals by Method EPA200.8;
- Anions by Method EPA300.0; and
- Total Cyanide by Method EPA335.4

Data Validation Summary

The results for each of the QC elements are summarized below.

Data Package Completeness

TestAmerica provided the required deliverables for the data validation according to the National Functional Guidelines. The laboratory followed adequate corrective action processes and the identified anomalies were discussed in the relevant laboratory case narrative.

Chain-of-Custody Documentation

Chain-of-custody (COC) forms were provided with the laboratory analytical reports. The COCs were accurate and complete when submitted to the laboratory, with the following exceptions:

SDG 590-7675-1: The laboratory noted that for Samples MW-5A-120717 and MW-16-120717 the sample vials for VOCs analysis were received with significant headspace. The VOCs analysis for these samples were cancelled at the request of GeoEngineers.

SDG 590-7700-1: The laboratory noted that for Sample Trip Blank the sample vials for VOCs analysis were received with significant headspace.

SDG 590-7713-1: The laboratory noted that Sample Trip Blank was not received by the laboratory on 12/13/2017 as listed on the COC. The laboratory notified GeoEngineers and the sample was received by the laboratory on 12/14/2017.

Holding Times and Sample Preservation

The sample holding time is defined as the time that elapses between sample collection and sample analysis. Maximum holding time criteria exist for each analysis to help ensure that the analyte concentrations found at the time of analysis reflect the concentration present at the time of sample collection. Established holding times were met for each analysis. The sample coolers arrived at the laboratory within the appropriate temperatures of between 2 and 6 degrees Celsius, with the exceptions noted below.

SDG 590-7671-1: The sample cooler temperature recorded at the laboratory was 0.4 degrees Celsius. Since the samples were not frozen, this temperature should likely not affect the sample analytical results.

SDG 590-7679-1: The sample cooler temperature recorded at the laboratory was 0.7 degrees Celsius. Since the samples were not frozen, this temperature should likely not affect the sample analytical results.

Surrogate Recoveries

A surrogate compound is a compound that is chemically similar to the organic analytes of interest, but unlikely to be found in an environmental sample. Surrogates are used for organic analyses and are added to the samples, standards, and blanks to serve as an accuracy and specificity check of each analysis. The surrogates are added to the samples at a known concentration and percent recoveries are calculated following analysis. The surrogate percent recoveries for field samples were within the laboratory control limits.

Method and Trip Blanks

Method Blanks

Method blanks are analyzed to ensure that laboratory procedures and reagents do not introduce measurable concentrations of the analytes of interest. A method blank was analyzed with each batch of samples, at a frequency of 1 per 20 samples. For each sample batch, method blanks for the applicable methods were analyzed at the required frequency. None of the analytes of interest were detected in the method blanks, with the following exceptions:

SDG 590-7671-1: (Dissolved Metals) There was a positive result for dissolved antimony detected above the method detection limit, but below the reporting limit in the method blank digested on 12/13/2017. The positive results for dissolved antimony were qualified as non-detected (U) in Samples MW-4A:120617, MW-8A:120617, MW-8B:120617, and MW-16A:120617.

SDG 590-7675-1: (VOCs) There was a positive result for 1,2,3-Trichlorobenzene and 1,2,4-Trichlorobenzene detected above the method detection limit, but below the reporting limit in the method blank extracted on 12/8/2017. The positive results for 1,2,3-Trichlorobenzene and

1,2,4-Trichlorobenzene were qualified as non-detected (U) in Sample MW-2A-120717. There were no positive results for these target analytes in Samples MW-3-120717, MW-5-120717, MW-4-120717, MW-12A-120717, MW-14-120717, and Trip Blank; therefore, no qualifications were required.

SDG 590-7679-1: (VOCs) There was a positive result for 1,2,3-Trichlorobenzene and 1,2,4-Trichlorobenzene detected above the method detection limit, but below the reporting limit in the method blank extracted on 12/8/2017. There were no positive results for these target analytes in the associated field samples; therefore, no qualifications were required.

SDG 590-7685-1: (VOCs) There was a positive result for 1,2,3-Trichlorobenzene and 1,2,4-Trichlorobenzene detected above the method detection limit, but below the reporting limit in the method blank extracted on 12/13/2017. There were no positive results for these target analytes in the associated field sample; therefore, no qualifications were required.

(Dissolved Metals) There was a positive result for dissolved barium and dissolved thallium detected above the method detection limit, but below the reporting limit in the method blank digested on 12/18/2017. The reported results for dissolved barium were greater than 10X the concentration in the method blank and there were no positive results for dissolved thallium in the associated field samples; therefore, no qualifications were required.

SDG 590-7700-1: (Dissolved Metals) There was a positive result for dissolved barium and dissolved thallium detected above the method detection limit, but below the reporting limit in the method blank digested on 12/18/2017. The positive results for dissolved thallium were qualified as non-detected (U) in Samples MW-7B:121217, Dup:121217, and MW-7D:121217. The reported results for dissolved barium were greater than 10X the concentration in the method blank in the associated field samples; therefore, no qualifications were required.

Trip Blanks

Trip blanks are analyzed to provide an indication as to whether volatile compounds have cross contaminated other like samples within the transportation process to the laboratory. None of the analytes of interest were detected the trip blanks.

Matrix Spikes/Matrix Spike Duplicates

Since the actual analyte concentration in an environmental sample is not known, the accuracy of a particular analysis is usually inferred by performing a matrix spike (MS) analysis on one sample from the associated batch, known as the parent sample. One aliquot of the sample is analyzed in the normal manner and then a second aliquot of the sample is spiked with a known amount of analyte concentration and analyzed. From these analyses, a percent recovery is calculated. Matrix spike duplicate (MSD) analyses are generally performed for organic analyses as a precision check and analyzed in the same sequence as a matrix spike. Using the result values from the MS and MSD, the relative percent difference (RPD) is calculated. The percent recovery control limits for MS and MSD analyses are specified in the laboratory documents, as are the RPD control limits for MS/MSD sample sets.

One MS/MSD analysis should be performed for every analytical batch or every 20 field samples, whichever is more frequent. The frequency requirements were met for each analysis and the percent recovery and RPD values were within the proper control limits, with the following exceptions:

SDG 590-7671-1: (Dissolved Metals) The laboratory performed an MS/MSD sample set on Sample MW-8B:120617. The percent recovery for dissolved barium was less than the control limits in the MSD

digested on 12/13/2017; however, the percent recovery for this target analyte was within the control limits in the corresponding MS. No action was required for this outlier.

SDG 590-7675-1: (Total Cyanide) The laboratory performed a matrix spike on Sample MW-2A-120717. The percent recovery for total cyanide was greater than the control limits in the MS extracted on 12/13/2017. There were no positive results for this target analyte in Sample MW-2A-120717; therefore, no qualification was required.

SDG 590-7685-1: (Total Cyanide) The laboratory performed a matrix spike on Sample MW-15A:121117. The percent recovery for total cyanide was less than the control limits in the MS extracted on 12/15/2017. The reporting limit for total cyanide was qualified as estimated (UJ) in Sample MW-15A:121117.

Laboratory Control Samples/Laboratory Control Sample Duplicates

A laboratory control sample (LCS) is a blank sample that is spiked with a known amount of analyte and then analyzed. An LCS is similar to an MS, but without the possibility of matrix interference. Given that matrix interference is not an issue, the LCS/LCSD control limits for accuracy and precision are usually more rigorous than for MS/MSD analyses. Additionally, data qualification based on LCS/LCSD analyses would apply to all samples in the associated batch, instead of just the parent sample. The percent recovery control limits for LCS and LCSD analyses are specified in the laboratory documents, as are the RPD control limits for LCS/LCSD sample sets.

One LCS/LCSD analysis should be performed for every analytical batch or every 20 field samples, whichever is more frequent. The frequency requirements were met for all analyses and the percent recovery and RPD values were within the proper control limits, with the following exceptions:

SDG 590-7671-1: (SVOCs) The percent recoveries for benzo(b)fluoranthene, benzo(g,h,i)perylene, benzo(k)fluoranthene, and dibenz(a,h)anthracene were greater than the control limits in the LCSD extracted on 12/11/2017; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

SDG 590-7675-1: (VOCs) The percent recovery for trans-1,2-Dichloroethene was greater than the control limits in the LCSD extracted on 12/8/2017; however, the percent recovery for this target analyte was within the control limits in the corresponding LCS. No action was required for this outlier.

(SVOCs) The percent recoveries for benzo(b)fluoranthene, benzo(g,h,i)perylene, benzo(k)fluoranthene, and dibenz(a,h)anthracene were greater than the control limits in the LCSD extracted on 12/11/2017; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

SDG 590-7679-1: (VOCs) The percent recovery for trans-1,2-Dichloroethene was greater than the control limits in the LCSD extracted on 12/8/2017; however, the percent recovery for this target analyte was within the control limits in the corresponding LCS. No action was required for this outlier.

(SVOCs) The percent recoveries for benzo(b)fluoranthene, benzo(g,h,i)perylene, benzo(k)fluoranthene, and dibenz(a,h)anthracene were greater than the control limits in the LCSD extracted on 12/11/2017; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

SDG 590-7685-1: (VOCs) The percent recoveries for trans-1,2-Dichloroethene were greater than the control limits in the LCS/LCSD sample set extracted on 12/13/2017. There were no positive results for this target analyte in the associated field sample; therefore, no qualification was required.

Additionally, in the same LCS/LCSD sample set, the percent recovery for acetone was greater than the control limits in the LCS and the percent recoveries for 1,1,2-Trichlorotrifluoroethane, dichlorofluoromethane, and hexane were greater than the control limits in the LCSD; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCSD and LCS, respectively. No action was required for these outliers.

(SVOCs) The percent recoveries for 4-Nitrophenol were greater than the control limits in the LCS/LCSD sample set extracted on 12/14/2017. There were no positive results for this target analyte in the associated field samples; therefore, no qualifications were required.

Additionally, in the same LCS/LCSD sample set, the percent recoveries for benzo(k)fluoranthene and indeno(1,2,3-cd)pyrene were greater than the control limits in the LCSD; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

SDG 590-7700-1: (SVOCs) The percent recoveries for 4-Nitrophenol were greater than the control limits in the LCS/LCSD sample set extracted on 12/14/2017. There were no positive results for this target analyte in the associated field samples; therefore, no qualifications were required.

Additionally, in the same LCS/LCSD sample set, the percent recoveries for benzo(k)fluoranthene and indeno(1,2,3-cd)pyrene were greater than the control limits in the LCSD; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

SDG 590-7713-1: (SVOCs) The percent recoveries for 4-Nitrophenol were greater than the control limits in the LCS/LCSD sample set extracted on 12/14/2017. There were no positive results for this target analyte in the associated field sample; therefore, no qualification was required.

Additionally, in the same LCS/LCSD sample set, the percent recoveries for benzo(k)fluoranthene and indeno(1,2,3-cd)pyrene were greater than the control limits in the LCSD; however, the percent recoveries for these target analytes were within the control limits in the corresponding LCS. No action was required for these outliers.

Laboratory Duplicates

Internal laboratory duplicate analyses are performed to monitor the precision of the analyses. Two separate aliquots of a sample are analyzed as distinct samples in the laboratory and the RPD between the two results is calculated. Duplicate analyses should be performed once per analytical batch. If one or more of the samples used has a concentration less than five times the reporting limit for that sample, the absolute difference is used instead of the RPD. The RPD control limits are specified in the laboratory documents. Laboratory duplicates were analyzed at the proper frequency and the specified acceptance criteria were met, with the following exceptions:

SDG 590-7671-1: (Dissolved Metals) The laboratory performed a laboratory duplicate sample set on Sample MW-8B:120617. The RPD for dissolved chromium was greater than the control limit in the laboratory duplicate sample set digested on 12/13/2017. The positive results for dissolved chromium were qualified as estimated (J) in Samples MW-8A:120617 and MW-8B:120617.

SDG 590-7700-1: (Dissolved Metals) The laboratory performed a laboratory duplicate sample set on Sample Dup:121217. The RPD for dissolved chromium was greater than the control limit in the laboratory duplicate sample set digested on 12/18/2017. The positive results for dissolved chromium were qualified as estimated (J) in Samples MW-7B:121217 and Dup:121217.

Field Duplicates

In order to assess precision, field duplicate samples were collected and analyzed along with the reviewed sample batches. The duplicate samples were analyzed for the same parameters as the associated parent samples. Precision is determined by calculating the RPD between each pair of samples. If one or more of the sample analytes has a concentration less than five times the reporting limit for that sample, then the absolute difference is used instead of the RPD. The RPD control limit for water samples is 35 percent.

SDG 590-7700-1: One field duplicate sample pair, MW-7B:121217 and Dup:121217, was submitted with this SDG. The precision criteria for all target analytes were met for this sample pair, with the exception of total barium, total chromium, total copper, total iron, total lead, total manganese, total nickel, total silver, and total zinc. The positive results for these target analytes were qualified as estimated (J) in this sample pair.

Overall Assessment

As was determined by this data validation, the laboratory followed the specified analytical methods. Accuracy was acceptable, as demonstrated by the surrogate, LCS/LCSD, and MS/MSD percent recovery values, with the exceptions noted above. Precision was acceptable, as demonstrated by the LCS/LCSD, MS/MSD, and laboratory/field duplicate RPD values, with the exceptions noted above.

The data are acceptable for the intended use, with the following qualifications listed below in Table 2.

TABLE 2: SUMMARY OF QUALIFIED SAMPLES

Sample ID	Analyte	Qualifier	Reason
MW-2A-120717	1,2,3-Trichlorobenzene	U	Method Blank Contamination
	1,2,4-Trichlorobenzene (VOCs)	U	Method Blank Contamination
MW-4A:120617	Dissolved antimony	U	Method Blank Contamination
MW-7B:121217	Total barium	J	Field Duplicate Precision
	Total chromium	J	Field Duplicate Precision
	Dissolved chromium	J	Laboratory Duplicate RPD
	Total copper	J	Field Duplicate Precision
	Total iron	J	Field Duplicate Precision
	Total lead	J	Field Duplicate Precision
	Total manganese	J	Field Duplicate Precision
	Total nickel	J	Field Duplicate Precision
	Total silver	J	Field Duplicate Precision
	Dissolved thallium	U	Method Blank Contamination
	Total zinc	J	Field Duplicate Precision

Sample ID	Analyte	Qualifier	Reason
Dup:121217	Total barium	J	Field Duplicate Precision
	Total chromium	J	Field Duplicate Precision
	Dissolved chromium	J	Laboratory Duplicate RPD
	Total copper	J	Field Duplicate Precision
	Total iron	J	Field Duplicate Precision
	Total lead	J	Field Duplicate Precision
	Total manganese	J	Field Duplicate Precision
	Total nickel	J	Field Duplicate Precision
	Total silver	J	Field Duplicate Precision
	Dissolved thallium	U	Method Blank Contamination
	Total zinc	J	Field Duplicate Precision
MW-7D:121217	Dissolved thallium	U	Method Blank Contamination
MW-8A:120617	Dissolved antimony	U	Method Blank Contamination
	Dissolved chromium	J	Laboratory Duplicate RPD
MW-8B:120617	Dissolved antimony	U	Method Blank Contamination
	Dissolved chromium	J	Laboratory Duplicate RPD
MW-15A:121117	Total cyanide	UJ	MS Recovery
MW-16A:120617	Dissolved antimony	U	Method Blank Contamination

Narrative

Receipt
The samples were received on 12/7/2017 10:25 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.4º C.

GC/MS VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263313 recovered outside acceptance criteria, low biased, for Hexachlorobenzene. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The laboratory control sample duplicate (LCSD) for preparation batch 580-263185 and analytical batch 580-263313 recovered outside control limits for the following analytes: Benzo[b]fluoranthene, Benzo[g,h,i]perylene, Benzo[k]fluoranthene and Dibenz(a,h)anthracene. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-263313 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

IC
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
Method 200.8: The method blank for prep batch 580-263362 contained Antimony above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7671-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-7671-1	MW-8B:120617	Water	12/06/17 11:22	12/07/17 10:25
590-7671-2	MW-8A:120617	Water	12/06/17 12:20	12/07/17 10:25
590-7671-3	MW-4A:120617	Water	12/06/17 14:24	12/07/17 10:25
590-7671-4	MW-16A120617	Water	12/06/17 15:21	12/07/17 10:25

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F1	MS and/or MSD Recovery is outside acceptance limits.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.
F3	Duplicate RPD exceeds the control limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Accreditation/Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7671-1

Laboratory: TestAmerica Spokane

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Alaska (UST)	State Program	10	UST-071	12-31-17
Oregon	NELAP Primary AB	10	4137	12-07-18
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Nashville

The accreditations/certifications listed below are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C789	07-19-18

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but accreditation/certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis(chloroisopropyl) ether
8270D SIM	3520C	Water	1,4-Dioxane

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7671-1

12-8-17 1115 COOLER RECEIPT FOR

Cooler Received/Opened On 12/8/2017 @0935

Time Samples Removed From Cooler_____ Time Samples Placed In Storage_____ (2 Hour Window)

1. Tracking # 9613 (last 4 digits, FedEx) Courier: FedEx

IR Gun ID 14740456 pH Strip Lot_____ Chlorine Strip Lot_____

2. Temperature of rep. sample or temp blank when opened: 0.8 Degrees Celsius

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO...NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: 1 Front

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) _____

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

Larger than this.

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) ES

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) ES

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) ES

I certify that I attached a label with the unique LIMS number to each container (intial) ES

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...# ES

BIS = Broken in shipment

Narrative

Receipt
The samples were received on 12/7/2017 4:40 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 5.5º C.

Receipt Exceptions
The following volatile samples were received with significant headspace in the sample containers: MW-5A-120717 (590-7675-3) and MW-16-120717 (590-7675-8). Significant headspace is defined as a bubble greater than 6 mm in diameter. The client was notifed and the samples were canceled.

GC/MS VOA
Method 8260C: The continuing calibration verification (CCV) associated with batch 590-15000 recovered above the upper control limit for acetone and trans-1,2-dichloroethene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-2A-120717 (590-7675-1), MW-3-120717 (590-7675-2), MW-5A-120717 (590-7675-3), MW-5-120717 (590-7675-4), MW-4-120717 (590-7675-5), MW-12A-120717 (590-7675-6), MW-14-120717 (590-7675-7), MW-16-120717 (590-7675-8) and Trip Blank (590-7675-9).

Method 8260C: The laboratory control sample duplicate (LCSD) for analytical batch 590-15000 recovered outside control limits for the following analytes: trans-1,2-Dichloroethene. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8260C: The method blank for batch 590-15000 contained 1,2,3-Trichlorobenzene and 1,2,4-Trichlorobenzene above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263313 recovered outside acceptance criteria, low biased, for Hexachlorobenzene. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The laboratory control sample duplicate (LCSD) for preparation batch 580-263185 and analytical batch 580-263313 recovered outside control limits for the following analytes: Benzo[b]fluoranthene, Benzo[g,h,i]perylene, Benzo[k]fluoranthene and Dibenz(a,h)anthracene. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-263313 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered estimated.

Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263442 recovered above the upper control limit for 2,4-Dimethylphenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-12A-120717 (590-7675-6), MW-14-120717 (590-7675-7), MW-16-120717 (590-7675-8) and (CCVIS 580-263442/3).

Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263442 recovered outside acceptance criteria, low biased, for 2,2'-oxybis[1-chloropropane], Phenol, N-Nitrosodi-n-propylamine and Benzyl alcohol. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-263442 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered estimated.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

General Chemistry

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Accreditation/Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7675-1

Laboratory: TestAmerica Spokane

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Alaska (UST)	State Program	10	UST-071	12-31-17
Oregon	NELAP Primary AB	10	4137	12-07-18
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Nashville

The accreditations/certifications listed below are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C789	07-19-18

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but accreditation/certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis(chloroisopropyl) ether
8270D SIM	3520C	Water	1,4-Dioxane

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7675-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
8151A	Herbicides (GC/MS)	SW846	TAL SEA
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8270D SIM	Semivolatile Organic Compounds (GC/MS SIM)	SW846	TAL SEA
300.0	Anions, Ion Chromatography	MCAWW	TAL SPK
200.8	Metals (ICP/MS)	EPA	TAL SEA
335.4	Cyanide, Total	MCAWW	TAL NSH

COOLER RECEIPT FORM

Cooler Received/Opened On 12/9/2017 @ 09:40

Time Samples Removed From Cooler_____ Time Samples Placed In Storage_____ (2 Hour Window)

1. Tracking # 9760 (last 4 digits, FedEx) Courier: FedEx

IR Gun ID 17960358 pH Strip Lot_____ Chlorine Strip Lot_____

2. Temperature of rep. sample or temp blank when opened: 1.9 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: 1 (Front)

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) J.J.

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

Larger than this.

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) es

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) es

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) es

I certify that I attached a label with the unique LIMS number to each container (intial) es

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...# es

BIS = Broken in shipment

Job ID: 590-7679-1

Laboratory: TestAmerica Spokane

Narrative

Receipt
The samples were received on 12/8/2017 1:00 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.7º C.

GC/MS VOA
Method 8260C: The continuing calibration verification (CCV) associated with batch 590-15000 recovered above the upper control limit for acetone and trans-1,2-dichloroethene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-2 (590-7679-1), MW-15 (590-7679-2) and Trip Blank (590-7679-3).

Method 8260C: The laboratory control sample duplicate (LCSD) for analytical batch 590-15000 recovered outside control limits for the following analytes: trans-1,2-Dichloroethene. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8260C: The method blank for analytical batch 590-15000 contained 1,2,3-Trichlorobenzene and 1,2,4-Trichlorobenzene above the method detection limit (MDL) but below the reporting limit (RL). None of the samples associated with this method blank contained the target compound; therefore, re-extraction and/or re-analysis of samples were not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The laboratory control sample duplicate (LCSD) for preparation batch 580-263185 and analytical batch 580-263313 recovered outside control limits for the following analytes: Benzo[b]fluoranthene, Benzo[g,h,i]perylene, Benzo[k]fluoranthene and Dibenz(a,h)anthracene. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-263313 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263442 recovered above the upper control limit for 2,4-Dimethylphenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-2 (590-7679-1), MW-15 (590-7679-2) and (CCVIS 580-263442/3).

Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263442 recovered outside acceptance criteria, low biased, for 2,2'-oxybis[1-chloropropane], Phenol, N-Nitrosodi-n-propylamine and Benzyl alcohol. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-263442 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

Job ID: 590-7679-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7679-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-7679-1	MW-2	Water	12/08/17 09:35	12/08/17 13:00
590-7679-2	MW-15	Water	12/08/17 10:31	12/08/17 13:00

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Accreditation/Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7679-1

Laboratory: TestAmerica Spokane

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Alaska (UST)	State Program	10	UST-071	12-31-17
Oregon	NELAP Primary AB	10	4137	12-07-18
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Nashville

The accreditations/certifications listed below are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C789	07-19-18

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but accreditation/certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis(chloroisopropyl) ether
8270D SIM	3520C	Water	1,4-Dioxane

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7679-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK
8151A	Herbicides (GC/MS)	SW846	TAL SEA
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	TAL SEA
8270D SIM	Semivolatile Organic Compounds (GC/MS SIM)	SW846	TAL SEA

COOLER RECEIPT FORM

Cooler Received/Opened On 12/9/2017 @ 09:40

Time Samples Removed From Cooler_____ Time Samples Placed In Storage_____ (2 Hour Window)

1. Tracking # 9760 (last 4 digits, FedEx) Courier: FedEx

IR Gun ID 17960358 pH Strip Lot_____ Chlorine Strip Lot_____

2. Temperature of rep. sample or temp blank when opened: 1.9 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: 1 (Front)

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) J.J.

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

Larger than this.

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) ES

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) ES

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) ES

I certify that I attached a label with the unique LIMS number to each container (intial) ES

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...# ES

BIS = Broken in shipment

Laboratory: TestAmerica Spokane

Narrative

Receipt
The samples were received on 12/11/2017 4:30 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 5.3º C.

GC/MS VOA
Method 8260C: The continuing calibration verification (CCV) associated with batch 590-15078 recovered above the upper control limit for Acetone. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-11A:121117 (590-7685-1), MW-15A:121117 (590-7685-2) and MW-1A:121117 (590-7685-3).

Method 8260C: The continuing calibration verification (CCV) associated with batch 590-15052 recovered above the upper control limit for 1,1,2-Trichlorotrifluoroethane, 2-Butanone (MEK), Acetone, Chloromethane, 2,2-Dichloropropane, Dichlorofluoromethane and trans-1,2-Dichloroethene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. Because the %D for acetone was greater than 40, results for this analyte are estimates. The following sample is impacted: Trip Blank (590-7685-4).

Method 8260C: The laboratory control sample duplicate (LCSD) for analytical batch 590-15052 recovered outside control limits for the following analytes: 1,1,2-Trichlorotrifluoroethane, Dichlorofluoromethane, trans-1,2-Dichloroethene and Hexane. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8260C: The laboratory control sample (LCS) for analytical batch 590-15052 recovered outside control limits for the following analytes: Acetone and trans-1,2-Dichloroethene. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260C: The method blank for analytical batch 590-15052 contained 1,2,3-Trichlorobenzene and 1,2,4-Trichlorobenzene above the method detection limit (MDL) but below the reporting limit (RL). None of the samples associated with this method blank contained the target compound; therefore, re-extraction and/or re-analysis of samples were not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263784 recovered outside acceptance criteria, low biased, for Isophorone, Hexachlorocyclopentadiene, 2,2'oxybis[1-chloropropane], and 2,4,6-Trichlorophenol. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263784 recovered above the upper control limit for 4-Nitrophenol and 4-Nitroaniline. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8270D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 580-263471 and analytical batch 580-263784 recovered outside control limits for the following analytes: 4-Nitrophenol, Benzo[k]fluoranthene (LCSD only), and Indeno[1,2,3-cd]pyrene (LCSD only). These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8270D: Surrogate 2,4,6-Tribromophenol (Surr) was 2% low in the method blank (MB 580-263471/1-A). Since all other surrogates in the MB met acceptance criteria, the CCV associated with the MB was within the 20%D limits, and the LCS/LCSD pair and all samples met acceptance criteria for this surrogate data was reported. This appears to be an isolated event and any re-extraction would be outside of holding time, therefore data is qualified and reported.

Method 8270D: The continuing calibration verification (CCV) associated with batch 580-264116 recovered outside acceptance criteria, low biased, for Phenol, Benzyl alcohol, N-Nitrosodi-n-propylamine, Bis(2-ethylhexyl) phthalate, 2,2'-oxybis[1-chloropropane], and Di-n-octyl phthalate. A standard at or below the reporting limit (RL) was analyzed, and the target analytes were detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Job ID: 590-7685-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-264116 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-263784 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8151A: The continuing calibration verification (CCV) associated with batch 580-264093 recovered outside acceptance criteria, low biased, for 2,4,5-T. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
Method 200.8: The method blank for preparation batch 580-263646 and analytical batch 580-263734 contained Barium and Thallium above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-extraction and re-analysis of samples was not performed.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.
X	Surrogate is outside control limits

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Accreditation/Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7685-1

Laboratory: TestAmerica Spokane

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Alaska (UST)	State Program	10	UST-071	12-31-17
Oregon	NELAP Primary AB	10	4137	12-07-18
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Nashville

The accreditations/certifications listed below are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C789	07-19-18

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but accreditation/certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis(chloroisopropyl) ether
8270D SIM	3520C	Water	1,4-Dioxane

Method Summary

Client: GeoEngineers Inc

COOLER RECEIPT FORM

590-7685 Chain of Custody

Cooler Received/Opened On 12/13/2017 @ 0945

Time Samples Removed From Cooler 11:45 *Time Samples Placed In Storage* 11:49 (2 Hour Window)

1. Tracking # 4830 (last 4 digits, FedEx) Courier: _FedEx_

   IR Gun ID 17960357 pH Strip Lot_____ Chlorine Strip Lot_____

2. *Temperature of rep. sample or temp blank when opened:* 0.9 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO (NA)

4. Were custody seals on outside of cooler? YES (NO) NA

   If yes, how many and where:_____

5. Were the seals intact, signed, and dated correctly? YES...NO...(NA)

6. Were custody papers inside cooler? (YES)...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) ES

7. Were custody seals on containers: YES (NO) and Intact YES...NO...(NA)

   Were these signed and dated correctly? YES...NO...(NA)

8. Packing mat'l used? (Bubblewrap) Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: (Ice) Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? (YES)...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? (YES)...NO...NA

12. Did all container labels and tags agree with custody papers? (YES)...NO...NA

13a. Were VOA vials received? YES (NO) NA

b. Was there any observable headspace present in any VOA vial? YES...NO...(NA)

 Larger than this.

14. Was there a Trip Blank in this cooler? YES (NO)...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) JJ

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...(NA)

b. Did the bottle labels indicate that the correct preservatives were used (YES)...NO...NA

16. Was residual chlorine present? YES...NO...(NA)

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) JJ

17. Were custody papers properly filled out (ink, signed, etc)? (YES)...NO...NA

18. Did you sign the custody papers in the appropriate place? (YES)...NO...NA

19. Were correct containers used for the analysis requested? (YES)...NO...NA

20. Was sufficient amount of sample sent in each container? (YES)...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) JJ

I certify that I attached a label with the unique LIMS number to each container (intial) JJ

21. Were there Non-Conformance issues at login? YES...(NO) Was a NCM generated? YES...(NO)...#_____

BIS = Broken in shipment

Narrative

Receipt
The samples were received on 12/12/2017 3:45 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.3º C.

GC/MS VOA
Method 8260C: The continuing calibration verification (CCV) associated with batch 590-15078 recovered above the upper control limit for Acetone. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: Dup:121217 (590-7700-1), MW-7D:121217 (590-7700-2), MW-7B:121217 (590-7700-3) and Trip Blank (590-7700-4).

The following sample was received with headspace: Trip Blank (590-7700-4).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263784 recovered outside acceptance criteria, low biased, for Isophorone, Hexachlorocyclopentadiene, 2,2'oxybis[1-chloropropane], and 2,4,6-Trichlorophenol. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The laboratory control sample (LCS) and/or laboratory control sample duplicate (LCSD) for preparation batch 580-263471 and analytical batch 580-263784 recovered outside control limits for the following analytes: 4-Nitrophenol, Benzo[k]fluoranthene (LCSD only), and Indeno[1,2,3-cd]pyrene (LCSD only). These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8270D: Surrogate 2,4,6-Tribromophenol (Surr) was 2% low in the method blank (MB 580-263471/1-A). Since all other surrogates in the MB met acceptance criteria, the CCV associated with the MB was within the 20%D limits, and the LCS/LCSD pair and all samples met acceptance criteria for this surrogate data was reported. This appears to be an isolated event and any re-extraction would be outside of holding time, therefore data is qualified and reported.

Method 8270D: The continuing calibration verification (CCV) associated with batch 580-264116 recovered outside acceptance criteria, low biased, for Phenol, Benzyl alcohol, N-Nitrosodi-n-propylamine, Bis(2-ethylhexyl) phthalate, 2,2'-oxybis[1-chloropropane], and Di-n-octyl phthalate. A standard at or below the reporting limit (RL) was analyzed, and the target analytes were detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-264116 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-263784 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8151A: The continuing calibration verification (CCV) associated with batch 580-264093 recovered outside acceptance criteria, low biased, for 2,4,5-T. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals

Job ID: 590-7700-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

Method 200.8: The method blank for preparation batch 580-263646 and analytical batch 580-263734 contained Barium and Thallium above the method detection limit. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, re-extraction and re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7700-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-7700-1	Dup:121217	Water	12/12/17 08:00	12/12/17 15:45
590-7700-2	MW-7D:121217	Water	12/12/17 10:20	12/12/17 15:45
590-7700-3	MW-7B:121217	Water	12/12/17 11:25	12/12/17 15:45
590-7700-4	Trip Blank	Water	12/12/17 00:00	12/12/17 15:45

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.
X	Surrogate is outside control limits

HPLC/IC

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
F3	Duplicate RPD exceeds the control limit
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Accreditation/Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7700-1

Laboratory: TestAmerica Spokane

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Alaska (UST)	State Program	10	UST-071	12-31-17
Oregon	NELAP Primary AB	10	4137	12-07-18
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Nashville

The accreditations/certifications listed below are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C789	07-19-18

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but accreditation/certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis(chloroisopropyl) ether
8270D SIM	3520C	Water	1,4-Dioxane

Method Summary

Client: GeoEngineers Inc

COOLER RECEIPT FORM

590-7700 Chain of Custody

Cooler Received/Opened On 12/13/2017 @ 0945

Time Samples Removed From Cooler 1145 Time Samples Placed In Storage 1149 (2 Hour Window)

1. Tracking # 4830 (last 4 digits, FedEx) Courier: _FedEx_

IR Gun ID 17960357 pH Strip Lot_____ Chlorine Strip Lot_____

2. Temperature of rep. sample or temp blank when opened: 0.9 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO NA

4. Were custody seals on outside of cooler? YES NO NA

If yes, how many and where:_____

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) ES

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

Larger than this.

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) ZF

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) ZF

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) ZF

I certify that I attached a label with the unique LIMS number to each container (intial) ZF

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...#_____

BIS = Broken in shipment

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	Lab does not accept radioactive samples.
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	No analysis requiring residual chlorine check assigned.

Narrative

Receipt
The samples were received on 12/13/2017 4:10 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 5.2º C.

Receipt Exceptions
The following sample was listed on the Chain of Custody (COC); however, no sample was received: Trip Blank (590-7713-4). Client was notifed and the sample was delivered to the lab on 12/14/17.

GC/MS VOA
Method 8260C: The continuing calibration verification (CCV) associated with batch 590-15078 recovered above the upper control limit for Acetone. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-9A:121317 (590-7713-1), MW-5A:121317 (590-7713-2), MW-16:121317 (590-7713-3) and Trip Blank (590-7713-4).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The continuing calibration verification (CCV) associated with batch 580-263784 recovered outside acceptance criteria, low biased, for Isophorone, Hexachlorocyclopentadiene, 2,2'oxybis[1-chloropropane], and 2,4,6-Trichlorophenol. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The laboratory control sample (LCS) and/or laboratory control sample duplicate (LCSD) for preparation batch 580-263471 and analytical batch 580-263784 recovered outside control limits for the following analytes: 4-Nitrophenol, Benzo[k]fluoranthene (LCSD only), and Indeno[1,2,3-cd]pyrene (LCSD only). These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8270D: Surrogate 2,4,6-Tribromophenol (Surr) was 2% low in the method blank (MB 580-263471/1-A). Since all other surrogates in the MB met acceptance criteria, the CCV associated with the MB was within the 20%D limits, and the LCS/LCSD pair and all samples met acceptance criteria for this surrogate data was reported. This appears to be an isolated event and any re-extraction would be outside of holding time, therefore data is qualified and reported.

Method 8270D: The continuing calibration verification (CCV) associated with batch 580-264116 recovered outside acceptance criteria, low biased, for Phenol, Benzyl alcohol, N-Nitrosodi-n-propylamine, Bis(2-ethylhexyl) phthalate, 2,2'-oxybis[1-chloropropane], and Di-n-octyl phthalate. A standard at or below the reporting limit (RL) was analyzed, and the target analytes were detected. Since the associated samples were non-detect for this analyte, the data have been reported.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-264116 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8270D: The minimum response factor (RF) criteria for the continuing calibration verification (CCV) analyzed in batch 580-263784 was outside criteria for the following analyte: N-Nitrosodi-n-propylamine. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte is considered estimated.

Method 8151A: The continuing calibration verification (CCV) associated with batch 580-264093 recovered outside acceptance criteria, low biased, for 2,4,5-T. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Job ID: 590-7713-1 (Continued)

Laboratory: TestAmerica Spokane (Continued)

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Sample Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7713-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received
590-7713-1	MW-9A:121317	Water	12/13/17 12:34	12/13/17 16:10
590-7713-2	MW-5A:121317	Water	12/13/17 14:19	12/13/17 16:10
590-7713-3	MW-16:121317	Water	12/13/17 15:36	12/13/17 16:10
590-7713-4	Trip Blank	Water	12/13/17 00:01	12/13/17 16:10

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
*	LCS or LCSD is outside acceptance limits.
X	Surrogate is outside control limits

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Accreditation/Certification Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7713-1

Laboratory: TestAmerica Spokane

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Alaska (UST)	State Program	10	UST-071	12-31-17
Oregon	NELAP Primary AB	10	4137	12-07-18
Washington	State Program	10	C569	01-06-18

Laboratory: TestAmerica Nashville

The accreditations/certifications listed below are applicable to this report.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C789	07-19-18

Laboratory: TestAmerica Seattle

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
Washington	State Program	10	C553	02-17-18

The following analytes are included in this report, but accreditation/certification is not offered by the governing authority:

Analysis Method	Prep Method	Matrix	Analyte
200.8	200.8	Water	Iron
8270D	3520C	Water	1,2,4-Trichlorobenzene
8270D	3520C	Water	bis(chloroisopropyl) ether
8270D SIM	3520C	Water	1,4-Dioxane

Method Summary

Client: GeoEngineers Inc
Project/Site: Marshall 0504-104-00

TestAmerica Job ID: 590-7713-1

Method	Method Description	Protocol	Laboratory
8260C	Volatile Organic Compounds by GC/MS	SW846	TAL SPK

COOLER RECEIPT FORM

590-7713 Chain of Custody

Cooler Received/Opened On 12/14/17 @ 9:40

Time Samples Removed From Cooler 8:49 Time Samples Placed In Storage 8:56 (2 Hour Window)

1. Tracking # 4977 (last 4 digits, FedEx) Courier: _FedEx_

IR Gun ID 97310166 pH Strip Lot _____ Chlorine Strip Lot _____

2. Temperature of rep. sample or temp blank when opened: 1.3 *Degrees Celsius*

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES NO...NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: None

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (intial) J.J

7. Were custody seals on containers: YES NO and intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

Larger than this.

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence #_____

I certify that I unloaded the cooler and answered questions 7-14 (intial) J.J

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (intial) JJ

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (intial) JJ

I certify that I attached a label with the unique LIMS number to each container (intial) JJ

21. Were there Non-Conformance issues at login? YES...NO Was a NCM generated? YES...NO...#_____

APPENDIX H
Terrestrial Ecological Evaluation

APPENDIX H
TERRESTRIAL ECOLOGICAL EVALUATION

GeoEngineers conducted a terrestrial ecological evaluation (TEE) at the Marshall Landfill Site (Site) consistent with Model Toxics Control Act (MTCA) requirements (WAC 173-340-7490 through 7494). The goal of the MTCA TEE is the protection of plants, soil invertebrates, and wildlife. The MTCA TEE process includes three tiers: Tier 1 (WAC 173-340-7491; Exclusions from a TEE), Tier 2 (WAC 173-340-7492; Simplified TEE), and Tier 3 (WAC 173-340-7493; Site-specific TEE). Based on conditions at the Site, a Tier 3 evaluation (Site-specific TEE) is required.

The Site consists of two waste disposal areas: an approximately 25-acre "Main Landfill," which operated from 1970 through 1990, and an approximately 5-acre area known as the "Five-Acre Landfill," which operated from 1980 through 1984. The thicknesses of landfilled waste have been estimated at 100 feet in the Main Landfill and 45 feet in the Five-Acre Landfill. After disposal operations ceased in 1990, the Main Landfill was reportedly covered with a layer of fine to medium sand. A passive landfill gas venting system and a compacted-clay cap was installed in 1990 at the Five-Acre Landfill; however, the as-built condition of the clay cap is not well documented. Observations of the clay cap over the Five-Acre Landfill during recent Site visits indicate that the cap is not intact over the entire area of the landfill and some waste is exposed.

Tier 1 - Exclusions Evaluation

MTCA provides four criteria that, if any are met, result in no further evaluation of terrestrial ecological risk. The four criteria are as follows:

- **Criterion 1: All affected soil is, or will be, located below the point of compliance (POC).** Not met. Site-related contaminants are detected within the standard POC (ground surface to a depth of 15 feet below ground surface [bgs]). Only one soil sample (LFB-9) collected in 2015 was within the standard POC; however, landfill waste was identified within the standard POC in numerous landfill borings completed in 2015. Also, for the purpose of this TEE, we assumed the soil analytical results from the 2015 sampling, which are from soil samples generally collected between 30 and 100 feet below ground surface, are representative of soil within the standard POC. This assumption is discussed further in the hazard characterization section.
- **Criterion 2: All affected soil is, or will be, covered by buildings, paved roads, pavement, or other physical barriers that will prevent ecological exposure to the contaminated soil.** Not met**.** Site use plans do not include barriers over affected soil at the Site that would prevent potential ecological receptor exposure. However, as mentioned above and discussed in Section 3.2 of the Remedial Investigation (RI) report, the two landfills are generally covered with sand or clay caps a minimum of 1 to 4 feet thick.
- **Criterion 3: Undeveloped land on or within 500 feet of the site is less than a quarter of an acre if any highly-toxic constituents are detected in soil, or less than 1½ acres if highly toxic constituents are not detected in soil.** Not met. More than 1½ acres of undeveloped land are on or within 500 feet of the Site.

- **Criterion 4: Concentrations of constituents in the soil do not exceed natural background levels.** Not met. Contaminants are detected in soil at concentrations greater than natural background levels.

Because none of the four exclusion criteria are met, the Site does not qualify for a TEE exclusion.

Simplified TEE Qualification Evaluation

Once it has been determined that a site does not qualify for a TEE exclusion, the next step is to determine if the site qualifies for a simplified TEE, or if a site-specific TEE is required. MTCA provides four criteria for evaluating whether a site qualifies for a simplified TEE. If any of the four criteria are met, a site-specific TEE is required. The four criteria are as follows:

- **Criterion 1: The site is located on, or directly adjacent to, an area where management or land use plans will maintain or restore native or semi-native vegetation.** Met. According to the Generalized Zoning Map produced by Spokane County Building and Planning, the Marshall Landfill Site is in an area zoned as Rural Conservation (RCV). According to Spokane County Zoning Code (adopted 2004), the RCV zone applies to "environmentally sensitive areas, including critical areas and wildlife corridors." The RCV "encourages low-impact uses and utilizes rural clustering to protect sensitive areas and preserve open space."
- **Criterion 2: The site is used by: (a) a threatened or endangered species (T&E species); (b) a Washington State wildlife priority species or species of concern; or (c) a Washington State endangered, threatened, or sensitive plant species.** Not met. According to the Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) website (www.wdfw.wa.gov/conservation/phs/), there are no endangered, threatened, sensitive or candidate wildlife species identified in the Site vicinity. The PHS website does indicate that the Site is in an area that may be used by the Rocky Mountain Elk (*Cervus ellaphus nelson*). However, multiple factors indicate that if the Rocky Mountain Elk were to use the Site, the amount of time on site and subsequent exposure to landfill materials, would be minimal. These factors include the size of the Site relative to the elk's home range (30 acres versus 2,500 to 10,000 acres), the disturbed nature of the Site, the proximity of people or human activities (residents, gravel pit, vehicle traffic, etc.) and the presence of superior habitats in the area, including the Turnbull National Wildlife Refuge and multiple conservation areas. In addition, the Washington Department of Natural Resources' Natural Heritage Program (www.dnr.wa.gov/natural-heritage-program) does not identify any endangered, threatened or sensitive plant species in Township 24N, Range 42E, Section 21, which includes the Marshall Landfill Site.
- **Criterion 3: The site is located on a property that contains at least ten acres of native vegetation within 500 feet of the site.** Met. There are more than 10 acres of native vegetation, primarily lodgepole pine (*Pinus contorta*), east of both landfills.
- **Criterion 4: Ecology determines that the site may present a hazard to significant wildlife populations.** Likely not met. Based on site conditions and chemical analytical results for soil, it is unlikely that Ecology would make such a determination.

Because Criteria 1 and 3 are met, a site-specific TEE is required to assess ecological hazards.

Site-specific Terrestrial Ecological Evaluation

The site-specific TEE focuses on the identification of contaminants of potential ecological concern (COPECs), potentially complete exposure pathways, terrestrial receptors of concern and hazard characterization.

Contaminants of Potential Ecological Concern

COPECs in soil are identified in Tables H-1 and H-2. In Table H-1, the maximum detected concentrations of individual analytes are compared to soil screening levels protective of plants, soil biota and wildlife. Maximum detected concentrations were compiled from soil collected at all depths sampled at the site, because only one sample was collected within the POC. Analytes are considered preliminary COPECs if the maximum detected concentration in soil is greater than at least one screening level. Preliminary COPECs are evaluated further in Table H-2. Final COPECs are identified using exposure point concentrations (EPCs), which are discussed below.

The primary source for screening levels are the site-specific TEE indicator soil concentrations (ISCs) from MTCA Table 749-3. Screening levels for analytes without ISCs in MTCA Table 749-3 were identified as follows:

- Soil screening values from EPA Region 4's "Ecological Risk Assessment Supplemental Guidance, Interim Draft" dated December 2015 (interim draft ERA guidance).
- Surrogate compounds were used for compounds with similar structure and/or toxicity. For example, endrin was used as a surrogate for endrin aldehyde.

Six volatile organic compounds (VOCs) and two herbicides do not have soil screening levels. The VOCs are benzene- or toluene-based compounds with maximum detected concentrations ranging from 0.16 micrograms per kilogram (µg/kg) to 14 µg/kg. As a means of comparison, the screening levels for the other VOCs detected at the Site range from 120 µg/kg to 200,000 µg/kg. Based on these available screening levels, which include screening levels for benzene and toluene, it is unlikely that the six VOCs without screening levels are a potential hazard to ecological receptors at the Site. Dichlorprop (2,4-DP-p) and 2,4-DB are two herbicides detected in soil at the site. No screening levels are available for these two compounds; however, data compiled as part of the pesticide registration process suggest they have limited potential for toxicity to non-target species (EPA 2005 and 2007). Both chemicals are non-persistent, having half-lives on the order of weeks in aerobic surface soil. Neither chemical sorbs strongly to soil and both undergo rapid microbial and photo-degradation. In most cases, the recommended rate and interval of application would not result in an environmental concentration posing a risk to these receptors.

The EPA Region 4 soil screening values in Table H-1 are based on no-observed-adverse-effects-levels (NOAEL). These values were used to identify preliminary COPECs because they are conservative and are readily available in EPA Region 4's 2015 interim draft ERA guidance. EPA Region 4 obtained the NOAEL screening values from the Los Alamos National Laboratory's (LANL) ECORISK Database Release 3.2.

MTCA's site-specific TEE guidance (WAC 173-340-7493[4]) calls for the use of soil levels based on lowest-observed-adverse-effect-levels (LOAEL). Therefore, LOAEL-based soil screening values obtained from LANL's ECORISK Database Release 3.3 for bis(2-ethylhexyl)phthalate, dibutyl phthalate, endrin (to evaluate endrin aldehyde) and cyanide were used in Table H-2 to identify and evaluate site COPECs.

Final COPECs were identified in Table H-2 by comparing the EPC to the site-specific screening level for each preliminary COPEC. The EPC is the lowest of the maximum detected concentration and the 95 percent upper confidence limit of the mean (95 percent UCL). The 95 percent UCLs were calculated using US Environmental Protection Agency's (EPA) ProUCL version 5.0 software. Analytical data for bis(2-ethylhexyl)phthalate, dibutyl phthalate and endrin aldehyde were reported down to method detection limits, which were used in the 95 percent UCL calculations. Analytes are considered Final COPECs and are discussed below if the EPC is greater than the lowest applicable screening level. The following analytes are considered COPECs:

- Semi-volatile organic compounds: dibutyl phthalate
- Nitriles: cyanide
- Total petroleum hydrocarbons: lube oil-range hydrocarbons
- Metals: selenium and vanadium

Exposure Pathways and Receptors of Concern

The Site is situated northwest of Cheney-Spokane Road about one mile southwest of the town of Marshall, Washington and seven miles southwest of the city of Spokane, Washington. The Site is bounded on the east by South Cheney-Spokane Road, on the south by a former landfill property owned by Spokane County, and on the west and north by vacant land. The site consists of mixture of disturbed grassland habitat with lodgepole pine (*Pinus contorta*) forest. Surrounding land use includes industrial and transportation uses.

Terrestrial ecological receptors include plants, soil biota and wildlife. The MTCA site-specific TEE process focuses on mammalian and avian wildlife (specifically, shrews, voles and robins) based on the greater availability of toxicity information for these receptors. The shrew and robin are insectivorous species and vole is herbivorous; all three are exposed to soil-borne constituents. The shrew, robin, and vole are expected to occur on the Site due to the type of available habitat and their tolerance for disturbance and are identified as receptors of concern for this site-specific TEE. However, adjacent human activities likely restrict the natural wildlife density and diversity of larger animal species at this Site.

COPECs may be absorbed by plants, soil biota and wildlife. Plants are potentially exposed through direct contact with the soil. Soil biota are potentially exposed through direct contact with soil, ingestion of soil, and ingestion of plant and other soil biota. Wildlife are potentially exposed through ingestion of plants and soil biota, and incidental ingestion of soil. Exposure media for the TEE; therefore, include soil, plants and soil biota.

The shrew, vole and robin are target receptors for the site. Other species may occur at the site, but would likely be less exposed due to their greater home ranges. Specifically, resident predatory bird species such as red-tailed hawk (*Buteo jamaicensis*) and bald eagle (*Haliaeetus leucocephalus*) may occur at the site. There are also numerous other resident and migratory birds common within the Spokane area; however, the robin conservatively assesses their potential exposure. Smaller mammals likely present at the site, such as squirrels and chipmunks, are effectively assessed by the vole surrogate. Larger mammals that could use the site are not directly represented by use of a surrogate; however, mammals such as coyote (*Canis latrans*), porcupine (*Erethizon dorsatum*), white-tailed deer (*Odocoileus virginianus*), and Rocky Mountain elk (*Cervus elaphus nelson*) require large tracks of land for foraging, wintering, breeding and nesting such that their use of the site would be infrequent or unlikely. The home ranges of these species

would be an order of magnitude greater than that of the surrogates and therefore, the selected receptors represent a conservative assessment of potential risks at the site. Thus, no further evaluation is needed for assessment of these additional receptors.

Hazard Characterization

Potential ecological hazards are characterized by comparing the soil EPC to the site-specific screening levels for each analyte. A hazard quotient (HQ) is calculated by dividing the EPC by the lowest screening level for each analyte. An HQ greater than one indicates a potential ecological hazard. This evaluation is presented in Table H-2.

The HQs for the five COPECs identified for the Site range from 1.1 to 24. These HQs are based on potential exposures of birds to dibutyl phthalate and cyanide; potential soil biota exposures to lube oil-range hydrocarbons; potential exposures of wildlife (shrew) to selenium and potential exposures of plants to vanadium. The HQs for dibutylphthalate (HQ = 1.3), cyanide (HQ = 3.4), lube oil-range petroleum hydrocarbons (HQ = 2.3) and selenium (HQ = 2.9) are low and do not suggest significant ecological hazards at the site from these five COPECs. The HQ for vanadium (HQ = 24) is higher; however, as discussed below the vanadium concentrations detected are likely representative of background conditions.

The six COPECs are discussed below:

- **Dibutylphthalate (HQ = 1.3)**: Dibutyl phthalate was only detected in 2 of 19 soil samples at concentrations of 77 µg/kg and 140 µg/kg; the method detection limits for the other 17 sample ranged from 50 to 69 µg/kg. Only the maximum detected concentration is greater than the lowest screening level of 110 µg/kg. Dibutyl phthalate was identified as a COPEC because the EPC for was set at the maximum detected concentration due to the limited number of detections. The mean dibutylphthalate soil concentration, calculated using ProUCL and Kaplan_Meier, is 56.2 µg/kg. Based on the entire dibutyl phthalate soil data set, dibutyl phthalate does not appear to pose a threat to ecological receptors at the site.
- **Cyanide (HQ = 3.4)**: Cyanide was only detected in 1 of 19 soil samples at a concentration of 3.4 milligrams per kilogram (mg/kg), which is greater than the lowest screening level of 1.0 mg/kg. Cyanide was not detected in 18 of 19 soil samples with reporting limits ranging from 1.9 to 2.2 mg/kg. The cyanide EPC of 3.4 mg/kg, set at the maximum detected concentration due to the single cyanide detection, overestimates potential exposures and potential hazards to ecological receptors. Cyanide is unlikely to pose a risk to ecological receptors at the site.
- **Lube Oil-Range Petroleum Hydrocarbons (HQ = 2.3)**: Lube oil-range petroleum hydrocarbons were only detected in 1 of 19 soil samples. The EPC for lube oil-range petroleum hydrocarbons is, therefore, the maximum detected concentration of 450 mg/kg. The lube oil-range petroleum hydrocarbons reporting limits for the other 18 samples ranges from 93 mg/kg to 100 mg/kg, which are less than the soil screening level of 200 mg/kg. The EPC of 450 mg/kg overestimates the lube oil-range petroleum hydrocarbons concentrations at the Site and the potential hazards to ecological receptors at the site. Petroleum hydrocarbons are unlikely to pose a risk to ecological receptors at the site.
- **Selenium (HQ = 2.9)**: Selenium was detected in 19 of 19 soil samples collected at concentrations ranging from 0.51 mg/kg to 2 mg/kg. The selenium EPC is 1.2 mg/kg, which is greater than the lowest selenium screening level of 0.41 mg/kg. Ecology developed a statewide selenium background value based on a limited data set, but has not developed regional background values selenium

(Ecology 1994; Figure 47). The statewide background value is 0.78 mg/kg; detected selenium concentrations from the limited background data set range from 0.4 mg/kg to 0.84 mg/kg. The selenium background data set was limited because the detection limits for one of the methods were elevated (ranging from 5 mg/kg to 15 mg/kg). The selenium concentrations detected at the site are slightly higher than the background concentrations, but may still be representative of background conditions. As a comparison, selenium background concentrations were developed for 10 regions in Oregon (DEQ 2013). These regional selenium background concentrations, which are 95 percent upper prediction limits, range from 0.41 mg/kg to 1.5 mg/kg.

- **Vanadium (HQ = 24)**: Vanadium was detected in 19 of 19 soil samples collected at concentrations ranging from 25 to mg/kg to 85 mg/kg. The vanadium EPC is 47 mg/kg, which is greater than the lowest vanadium screening level of 2 mg/kg. Ecology has not developed statewide and regional background values for vanadium, except for the Spokane Basin region (Ecology 1994; Figure 47). The Spokane Basin vanadium background level is 45 mg/kg; detected vanadium concentrations from the regional background data set range from 8.23 mg/kg to 80.5 mg/kg. The vanadium concentrations detected at the Site are greater than the lowest screening level, but are consistent with the range of Spokane Basin background vanadium concentrations.

The results of this site-specific TEE suggest that the soil contaminants detected at the Site are not expected to pose a significant hazard to ecological receptors. In addition to the reasons discussed above, the presence of the sand or clay caps at the two landfills will significantly reduce any potential exposure by terrestrial ecological receptors to site-related contamination

Notes:

[1] Washington State background soil metals concentrations (Ecology 1994) for the Spokane Basin.

[2] WAC 173-340-900, Table 749-3.

[3] EPA Region 4 Ecological Risk Assessment, Supplemental Guidance, Interim Draft (EPA 2015), Table 3. Screening levels are based on no-observed-adverse-effect-levels (NOAELs).

[4] Values presented are the lowest available screening levels, adjusted for background.

[5] Analytes are identified as COPCs if the maximum detected concentrations is greater than the lowest screening level. Analytes without a screening level (No SL) are discussed in the text.

[6] Endrin used as surrogate for endrin aldehyde.

COPEC = Contaminant of potential ecological concern

FOD = Frequency of detection

n/a = not appropriate, soil screening values were calculated using equilibrium partitioning theory and water quality benchmarks (EPA 2015).

NE = not evaluated, Oregon and EPA Region 4 values were not evaluated for analytes with MTCA site-specific indicator soil concentrations.

mg/kg = milligrams per kilogram

ug/kg = micrograms per kilogram

Shading identifies lowest applicable screening level, which were exceeded by the maximum detected concentrations.

Table H-2

Identification of Contaminants of Potential Ecological Concern

Marshall Landfill Site

Spokane County, Washington

Analyte	Units	Maximum Detected Concentration	95% UCL[1]	Exposure Point Concentration[2]	Lowest Screening Level[3]	Screening Results[4]	Hazard Quotient[5]	Notes
Semivolatile Organic Compounds								
Bis(2-Ethylhexyl) Phthalate	ug/Kg	310	142	142	200	--	--	
Dibutyl Phthalate	ug/Kg	140	n/a	140	110	COPEC	1.3	Evaluated further in TEE
Pesticides/Herbicides								
Endrin Aldehyde	ug/Kg	14	n/a	14	14	--	--	
Nitriles								
Cyanide	mg/kg	3.4	n/a	3.4	1.0	COPEC	3.4	Evaluated further in TEE
Total Petroleum Hydrocarbons								
Lube Oil-range Hydrocarbons	mg/kg	450	n/a	450	200	COPEC	2.3	Evaluated further in TEE
Metals								
Arsenic	mg/kg	12	8.4	8.4	9	--	--	
Barium	mg/kg	170	100	100	102	--	--	
Copper	mg/kg	86	27	27	50	--	--	
Iron	mg/kg	48,000	30,100	30100	42,100	--	--	
Selenium	mg/kg	2.0	1.2	1.2	0.41	COPEC	2.9	Evaluated further in TEE
Silver	mg/kg	2.2	0.87	0.87	2	--	--	
Vanadium	mg/kg	85	47	47	2	COPEC	24	Evaluated further in TEE
Zinc	mg/kg	110	66	66	86	--	--	

Notes:

[1] 95 percent upper confidence limit on the arithmetic mean (95% UCL) calculated using EPA's ProUCL software Version 5.0.

[2] Exposure point concentrations are the lowest of the maximum detected concentration and the 95% UCL.

[3] Values presented are the lowest available screening levels, adjusted for background. Screening levels for bis(2-ethylhexyl)phthalate, dibutyl phthalate, endrin aldehyde and cyanide in this table are based on lowest-observed-adverse-effect-levels (LOAEL); see text for additional discussion.

[4] Analytes are identified as COPCs if the lowest of the maximum detected concentration and 95% UCL (if available) is greater than the lowest screening level.

[5] Hazard quotient is the lowest of the maximum detected concentration and 95% UCL (if available) divided by the lowest screening level.

COPEC = Contaminant of potential ecological concern

TEE = Terrestrial ecological evaluation; mg/kg = milligrams per kilogram; ug/kg = microgram per kilogram

Shading identifies screening levels that were exceeded by the lowest of the maximum detected concentrations and 95% UCL.

Voluntary Cleanup Program

Washington State Department of Ecology
Toxics Cleanup Program

TERRESTRIAL ECOLOGICAL EVALUATION FORM

Under the Model Toxics Control Act (MTCA), a terrestrial ecological evaluation is necessary if hazardous substances are released into the soils at a Site. In the event of such a release, you must take one of the following three actions as part of your investigation and cleanup of the Site:

1. Document an exclusion from further evaluation using the criteria in WAC 173-340-7491.
2. Conduct a simplified evaluation as set forth in WAC 173-340-7492.
3. Conduct a site-specific evaluation as set forth in WAC 173-340-7493.

When requesting a written opinion under the Voluntary Cleanup Program (VCP), you must complete this form and submit it to the Department of Ecology (Ecology). The form documents the type and results of your evaluation.

Completion of this form is not sufficient to document your evaluation. You still need to document your analysis and the basis for your conclusion in your cleanup plan or report.

If you have questions about how to conduct a terrestrial ecological evaluation, please contact the Ecology site manager assigned to your Site. For additional guidance, please refer to www.ecy.wa.gov/programs/tcp/policies/terrestrial/TEEHome.htm.

Step 1: IDENTIFY HAZARDOUS WASTE SITE	
Please identify below the hazardous waste site for which you are documenting an evaluation.	
Facility/Site Name: Marshall Landfill	
Facility/Site Address: Spokane County, Washington	
Facility/Site No:	VCP Project No.: Not applicable

Step 2: IDENTIFY EVALUATOR			
Please identify below the person who conducted the evaluation and their contact information.			
Name: Neil Morton		Title: Senior Toxicologist	
Organization: GeoEngineers, Inc.			
Mailing address: 600 Stewart Street, Suite 1700			
City: Seattle	State: WA	Zip code: 98101	
Phone: 206-239-3238	Fax:	E-mail: nmorton@geoengineers.com	

ECY 090-300 (07/2015) To request ADA accommodation including materials in a format for the visually impaired, call Ecology Toxic Cleanup Program 360-407-7170. Persons with impaired hearing may call Washington Relay Service at 711. Persons with speech disability may call TTY at 877-833-6341.

Step 3: DOCUMENT EVALUATION TYPE AND RESULTS

A. Exclusion from further evaluation.

1. Does the Site qualify for an exclusion from further evaluation?

☐ Yes *If you answered **"YES,"** then answer **Question 2**.*

☒ No or Unknown *If you answered **"NO" or "UKNOWN,"** then skip to **Step 3B** of this form.*

2. What is the basis for the exclusion? *Check all that apply. Then skip to **Step 4** of this form.*

Point of Compliance: WAC 173-340-7491(1)(a)

☐ All soil contamination is, or will be,* at least 15 feet below the surface.

☐ All soil contamination is, or will be,* at least 6 feet below the surface (or alternative depth if approved by Ecology), and institutional controls are used to manage remaining contamination.

Barriers to Exposure: WAC 173-340-7491(1)(b)

☐ All contaminated soil, is or will be,* covered by physical barriers (such as buildings or paved roads) that prevent exposure to plants and wildlife, and institutional controls are used to manage remaining contamination.

Undeveloped Land: WAC 173-340-7491(1)(c)

☐ There is less than 0.25 acres of contiguous[#] undeveloped[±] land on or within 500 feet of any area of the Site and any of the following chemicals is present: chlorinated dioxins or furans, PCB mixtures, DDT, DDE, DDD, aldrin, chlordane, dieldrin, endosulfan, endrin, heptachlor, heptachlor epoxide, benzene hexachloride, toxaphene, hexachlorobenzene, pentachlorophenol, or pentachlorobenzene.

☐ For sites not containing any of the chemicals mentioned above, there is less than 1.5 acres of contiguous[#] undeveloped[±] land on or within 500 feet of any area of the Site.

Background Concentrations: WAC 173-340-7491(1)(d)

☐ Concentrations of hazardous substances in soil do not exceed natural background levels as described in WAC 173-340-200 and 173-340-709.

* An exclusion based on future land use must have a completion date for future development that is acceptable to Ecology.

[±] "Undeveloped land" is land that is not covered by building, roads, paved areas, or other barriers that would prevent wildlife from feeding on plants, earthworms, insects, or other food in or on the soil.

[#] "Contiguous" undeveloped land is an area of undeveloped land that is not divided into smaller areas of highways, extensive paving, or similar structures that are likely to reduce the potential use of the overall area by wildlife.

ECY 090-300 (07/2015) To request ADA accommodation including materials in a format for the visually impaired, call Ecology Toxic Cleanup Program 360-407-7170. Persons with impaired hearing may call Washington Relay Service at 711. Persons with speech disability may call TTY at 877-833-6341.

B. Simplified evaluation.

1. Does the Site qualify for a simplified evaluation?

☐ Yes *If you answered **"YES,"** then answer **Question 2** below.*

☒ No or Unknown *If you answered **"NO"** or **"UNKNOWN,"** then skip to **Step 3C** of this form.*

2. Did you conduct a simplified evaluation?

☐ Yes *If you answered **"YES,"** then answer **Question 3** below.*

☐ No *If you answered **"NO,"** then skip to **Step 3C** of this form.*

3. Was further evaluation necessary?

☐ Yes *If you answered **"YES,"** then answer **Question 4** below.*

☐ No *If you answered **"NO,"** then answer **Question 5** below.*

4. If further evaluation was necessary, what did you do?

☐ Used the concentrations listed in Table 749-2 as cleanup levels. *If so, then skip to **Step 4** of this form.*

☐ Conducted a site-specific evaluation. *If so, then skip to **Step 3C** of this form.*

5. If no further evaluation was necessary, what was the reason? *Check all that apply. Then skip to **Step 4** of this form.*

Exposure Analysis: WAC 173-340-7492(2)(a)

☐ Area of soil contamination at the Site is not more than 350 square feet.

☐ Current or planned land use makes wildlife exposure unlikely. Used Table 749-1.

Pathway Analysis: WAC 173-340-7492(2)(b)

☐ No potential exposure pathways from soil contamination to ecological receptors.

Contaminant Analysis: WAC 173-340-7492(2)(c)

☐ No contaminant listed in Table 749-2 is, or will be, present in the upper 15 feet at concentrations that exceed the values listed in Table 749-2.

☐ No contaminant listed in Table 749-2 is, or will be, present in the upper 6 feet (or alternative depth if approved by Ecology) at concentrations that exceed the values listed in Table 749-2, and institutional controls are used to manage remaining contamination.

☐ No contaminant listed in Table 749-2 is, or will be, present in the upper 15 feet at concentrations likely to be toxic or have the potential to bioaccumulate as determined using Ecology-approved bioassays.

☐ No contaminant listed in Table 749-2 is, or will be, present in the upper 6 feet (or alternative depth if approved by Ecology) at concentrations likely to be toxic or have the potential to bioaccumulate as determined using Ecology-approved bioassays, and institutional controls are used to manage remaining contamination.

ECY 090-300 (07/2015) To request ADA accommodation including materials in a format for the visually impaired, call Ecology Toxic Cleanup Program 360-407-7170. Persons with impaired hearing may call Washington Relay Service at 711. Persons with speech disability may call TTY at 877-833-6341.

C. Site-specific evaluation. A site-specific evaluation process consists of two parts: (1) formulating the problem, and (2) selecting the methods for addressing the identified problem. Both steps require consultation with and approval by Ecology. *See* WAC 173-340-7493(1)(c).

1. Was there a problem? *See* WAC 173-340-7493(2).

☐ Yes *If you answered **"YES,"** then answer **Question 2** below.*

■ No *If you answered **"NO,"** then identify the reason here and then skip to **Question 5** below:*

☒ No issues were identified during the problem formulation step.

☐ While issues were identified, those issues were addressed by the cleanup actions for protecting human health.

2. What did you do to resolve the problem? *See* WAC 173-340-7493(3).

☐ Used the concentrations listed in Table 749-3 as cleanup levels. *If so, then skip to **Question 5** below.*

☐ Used one or more of the methods listed in WAC 173-340-7493(3) to evaluate and address the identified problem. *If so, then answer **Questions 3 and 4** below.*

3. If you conducted further site-specific evaluations, what methods did you use?
Check all that apply. See WAC 173-340-7493(3).

☐ Literature surveys.

☐ Soil bioassays.

☐ Wildlife exposure model.

☐ Biomarkers.

☐ Site-specific field studies.

☐ Weight of evidence.

☐ Other methods approved by Ecology. If so, please specify:

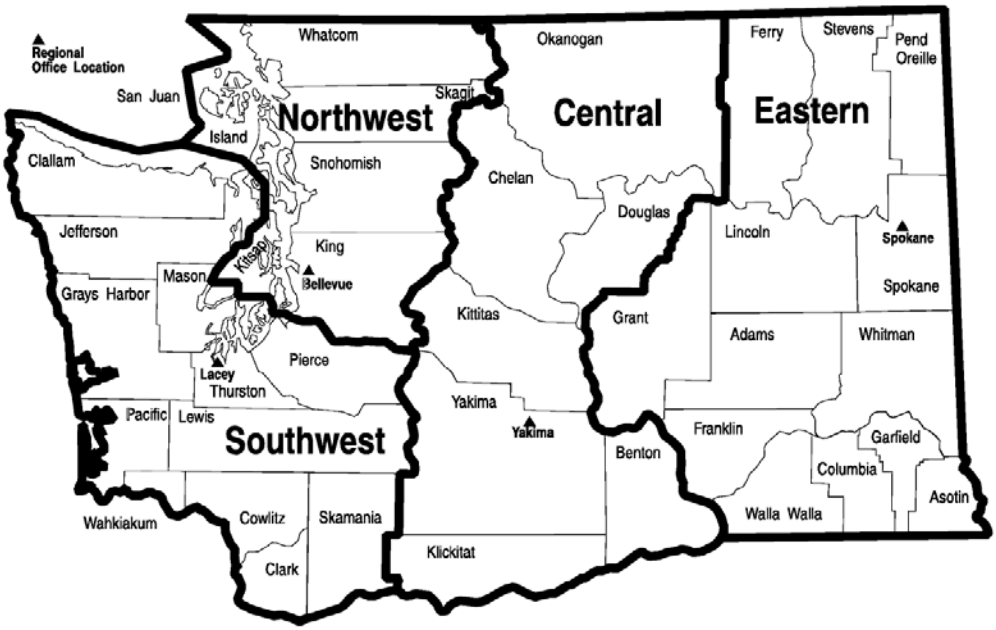
4. What was the result of those evaluations?

☐ Confirmed there was no problem.

☐ Confirmed there was a problem and established site-specific cleanup levels.

5. Have you already obtained Ecology's approval of both your problem formulation and problem resolution steps?

■ Yes If so, please identify the Ecology staff who approved those steps:
Huckleberry Palmer



☐ No

ECY 090-300 (07/2015) To request ADA accommodation including materials in a format for the visually impaired, call Ecology Toxic Cleanup Program 360-407-7170. Persons with impaired hearing may call Washington Relay Service at 711. Persons with speech disability may call TTY at 877-833-6341.

Step 4: SUBMITTAL

Please mail your completed form to the Ecology site manager assigned to your Site. If a site manager has not yet been assigned, please mail your completed form to the Ecology regional office for the County in which your Site is located.

Northwest Region: Attn: VCP Coordinator 3190 160th Ave. SE Bellevue, WA 98008-5452	**Central Region:** Attn: VCP Coordinator 1250 West Alder St. Union Gap, WA 98903-0009
