Cleanup is Complete

Cleanup is complete at the Dodge of Bellevue cleanup site. The site is located at 316 116th Avenue NE in Bellevue. Now, the Department of Ecology (Ecology) proposes to remove the Environmental Covenant that restricts use of groundwater at the site.

We invite your comments on the proposal to remove the Environmental Covenant through July 30, 2018. The box on the left shows where you can review the covenant removal request, and a draft No Further Action letter that describes how the site was cleaned up and why we believe it is complete.

Why This Cleanup Matters

Recent cleanup actions at this former automobile dealership removed remaining petroleum contamination from soil and groundwater. The covenant restricted domestic use of groundwater for personal use or food gardening due to residual petroleum concentrations.

Ecology has reviewed the cleanup work and determined that the cleanup actions at the site meet state cleanup standards and the covenant no longer applies. No further action is needed.

What Cleanup Occurred

To complete this cleanup, the property owners:

- Studied the site thoroughly to find all remaining petroleum contamination.
- Removed about 1,253 cubic yards of petroleum-contaminated soil to an approved off-site location.
- Tested the soil and groundwater to confirm cleanup.
