RE: Change in Responsible Party Contact &
Anticipated Project Schedule
Rexam Beverage Can Company (Ball Corp)
1220 North 2nd Avenue
Kent, King County, WA 98032
Site No. 35918556
VCP Project No. NW1105

ENVISION Project ID: 302.REX

Dear Mr. Cook:

As requested in your April 16, 2018 e-mail, ENVISION ENVIRONMENTAL, INC. (ENVISION) is providing this anticipated schedule of both short-term and long-term remedial investigation and clean-up actions for the above-referenced property (Site). Please note that the timing and execution of several of these tasks are dependent on factors outside of the control of ENVISION and our client Ball Corp, including the obtaining of offsite property access to install downgradient monitoring wells, timeframes to obtain regulatory approvals and permits, any additional actions undertaken based on the findings of this work, etc. In addition, this facility operates around the clock, with minimal downtime for maintenance purposes. As a result, scheduling of some activities that are to be conducted inside the facility may be affected by the Site's production and maintenance schedule. ENVISION will keep you informed on the progress of the work described below, and will advise you of any needed scheduling modifications.

The following outlines the anticipated schedule of activities:

- By July 15, 2018, ENVISION will submit a report providing the results of the groundwater sampling conducted in February 2018. The report will also provide the results of ENVISION's review of Washington Department of Ecology (WA DOE) files pertaining to properties hydrogeologically downgradient of the Site, and will propose locations of offsite monitoring well(s) for downgradient delineation of the Site groundwater contaminant plume for WA DOE review and approval.
- Within 30 days of receipt of WA DOE approval of the above submission, ENVISION/Ball Corp will commence with obtaining Access Agreements needed to install the downgradient

offsite delineation monitoring well(s). It is assumed that the Access Agreements will be obtained by the end of the fourth quarter of 2018.

- Third Quarter 2018 - ENVISION has reviewed the final design of the two interior flammable material storage rooms that are to be installed at the Site and has found that source-area monitoring well MW-108 will be located beneath the anticipated footprint of the new rooms. As a result, ENVISION will contract with a Washington-licensed well drilling firm to properly abandon and replace the well. The well will be abandoned prior to initiation of the construction of the rooms and the new well will be installed as close as possible to the original location of MW-108 after completion of construction of the rooms. The Site is currently determining the schedule for the construction of the rooms and ENVISION will update this schedule once the room construction schedule has been finalized.
- Fourth Quarter 2018 - Within 45 days after the completion of the new flammable material storage rooms, ENVISION will conduct the indoor air (IA) sampling as proposed in the Vapor Intrusion Assessment Workplan, and as modified based on the review by, and ENVISION's subsequent discussions with, the former WA DOE Case Manager, Mr. Christer Loftenius.
- Fourth Quarter 2018/First Quarter 2019 - Installation of the downgradient offsite delineation monitoring wells. Following installation and development of the new wells (including the replacement well for MW-108), all onsite and offsite monitoring wells will be sampled for Volatile Organic Compounds (VOCs) and 1,4-dioxane.
- Second/Third Quarter 2019 - ENVISION will submit a comprehensive Remedial Investigation Report (RIR), which will include the results of the groundwater delineation sampling, the IA sampling, the derivation of Site cleanup levels, and identification of areas requiring remediation. The report will also include the review, assessment, and selection of remedial options for all impacted environmental media, and will include a Remedial Action Workplan (RAW) to carry out the selected options. Finally the report will contain an implementation schedule for the implementation of the RAW. Within 60 days of receiving WA DOE approval of the RIR/RAW, ENVISION will commence implementation of the RAW.

As customary, ENVISION will provide the WA DOE with two weeks' notice of the schedule for all field activities.

Again, please note that modification of the tasks and schedule described above may become necessary, whether due to factors outside of the control of ENVISION and Ball Corp (such as the time needed to obtain offsite property access) or due to findings of the investigation tasks described above. ENVISION will keep you informed of the progress and schedule of the project and any modifications based on the conditions identified.

Also enclosed is a completed WA DOE Change of Contact Form, which includes information on the new contact for the responsible party Rexam Beverage Can Company (Ball Corp).

Mr. Jason Cook
State of Washington

Please be assured that Ball Corp is committed to completing the VCP filing and remediating the impacted media at this Site. ENVISION looks forward to working with you on this project. Should you have any questions or wish to discuss the information provided, please feel free to contact us at any time.

Very truly yours,

A handwritten signature in blue ink, appearing to read "Mark Roman", is written over the typed name.

Washington State Department of Ecology
Toxics Cleanup Program

CHANGE OF CONTACT FORM

Use this form to notify the Department of Ecology (Ecology) of any changes to the designated points of contact for a project under the Voluntary Cleanup Program (VCP). Include any changes to the contact information for those persons (for example: phone number or address). Please submit only one form for each point of contact.

Step 1: IDENTIFY HAZARDOUS WASTE SITE

Please identify below the hazardous waste site for which you are providing new contact information. This information may be found on the VCP Agreement.

Facility/Site Name: Rexam Beverage Can Company (Ball Corp)

Facility/Site Address: 1220 North 2nd Avenue, Kent, King County, WA 98032

Facility/Site No: 35918556

VCP Project No.: NW1105

Step 2: IDENTIFY CONTACT PERSON

Please identify the role of the person for whom you are providing new contact information. Check all that apply.

- Project Manager
- Project Billing Contact
- Project Consultant
- Project Attorney
- Property Owner
- Other – please specify: Responsible Party Contact Person

Please provide below the new contact information for this person:

Name: Adam Musulin

Title: Sr. EHS Engineer

Organization: Ball Corporation/Rexam Beverage Can Company

Mailing address: 9300 W. 108th Circle

City: Westminster

State: CO

Zip code: 80021

Phone: (303) 460-5629

Fax:

E-mail: amusulin@ball.com

Step 3: IDENTIFY PRIOR CONTACT PERSON (IF APPLICABLE)

Is the new contact person replacing an existing point of contact?

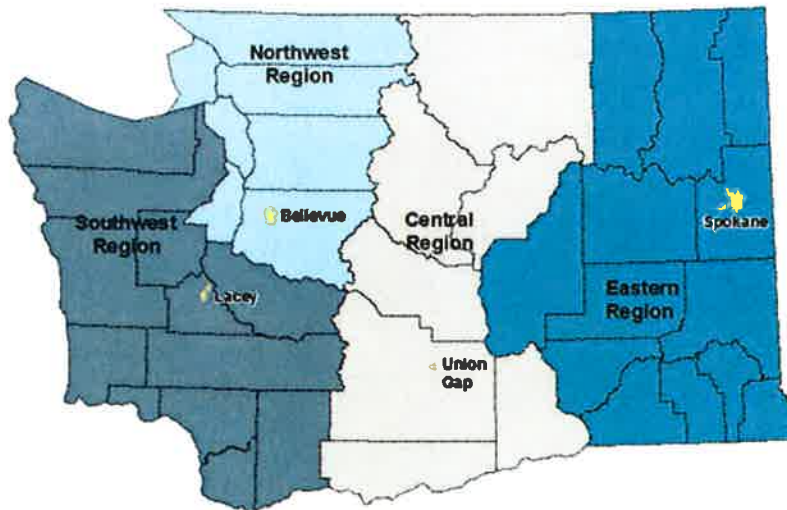

- Yes
 No

If you answered "YES" above, please identify below the person who is being replaced:

Name: James Kiser		Title: Asst. General Counsel	
Organization: Ball Corporation/Rexam Beverage Can Company			
Mailing address: 4201 Congress Street - Suite 340			
City: Charlotte		State: NC	Zip code: 28209
Phone: (704) 551-1500	Fax:	E-mail: james.kiser@ball.com	

Step 4: SUBMITTAL

Please mail your completed form to the Ecology site manager assigned to your Site. If a site manager has not yet been assigned, please mail your completed form to the Ecology regional office for the County in which your Site is located.

<p>Northwest Region: Attn: VCP Coordinator 3190 160th Ave. SE Bellevue, WA 98008-5452</p>	<p>Central Region: Attn: VCP Coordinator 1250 West Alder St. Union Gap, WA 98903-0009</p>
<p>Southwest Region: Attn: VCP Coordinator P.O. Box 47775 Olympia, WA 98504-7775</p>	<p>Eastern Region: Attn: VCP Coordinator N. 4601 Monroe Spokane WA 99205-1295</p>
