Re: Most Western Limited Potentially Liable Person Status

As you are aware, on April 20, 2005, the Washington State Department of Ecology (Ecology) named Most Western Laundry & Dry Cleaning (Most Western Laundry) as a potentially liable person (PLP) for the release of hazardous substances at 16th and B Streets, Hoquiam, Washington. After naming Most Western Laundry as a PLP, Ecology learned that Most Western Laundry changed its name to Most Western Limited in 1994. In light of this name change, Ecology would like to clarify that Ecology considers Most Western Limited to be the same entity as Most Western Laundry. Therefore, Most Western Limited is considered to be a potentially liable person for this site.
