RE: Ecology approval of proposed modifications to the groundwater monitoring plan, Agency review draft of “Groundwater Monitoring Summary Report, December 2015 – December 2017, Chelan Chevron”

- Site Name: Chelan Chevron
- Address: 232 E. Woodin Avenue, Chelan
- Facility Site ID: 77751227
- Cleanup Site ID: 6660
- Agreed Order: DE 10629

Dear Mr. Roehl:

Thank you for the submittal of the above-referenced draft report. The Department of Ecology (Ecology) approves of the two proposed modifications to the groundwater monitoring program. These changes are as follows:

- Groundwater sampling frequency will be reduced from quarterly to a semiannual basis, with sampling events to be conducted during March and September of each year.
- Groundwater sample analysis for natural attenuation parameters will be suspended at this time. Therefore, analysis for ferrous iron, nitrate, sulfate, dissolved manganese, methane, and alkalinity will not be performed.

Mr. Eric Roehl
Chevron Environmental Management Company

The decision for either of the two modifications may be revisited in the context of further information obtained during the Remedial Investigation/Feasibility Study (RI/FS).

Sincerely,

A handwritten signature in blue ink that reads "John Mefford". The signature is written in a cursive, flowing style.
