Environmental Interest/Information System

QUINTON INSTRUMENT CO SEA (Continued) **1000322668**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Date form received by agency:	01/27/2016
Facility name:	SEATTLE CANCER CARE ALLIANCE
Facility address:	825 EASTLAKE AVE E SEATTLE, WA 98109
EPA ID:	WAH000013235
Contact:	JASON GOOD
Contact address:	825 EASTLAKE AVE. E. MS: J3-200 SEATTLE, WA 98109-1023
Contact country:	US
Contact telephone:	(206)667-4250
Contact email:	JGOOD@FHCRC.ORG
EPA Region:	10
Land type:	Other land type
Classification:	Large Quantity Generator
Description:	Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Owner/Operator Summary:

Owner/operator name:	SEATTLE CANCER CARE ALLIANCE
Owner/operator address:	825 EASTLAKE AVE E SEATTLE, WA 98109
Owner/operator country:	US
Owner/operator telephone:	(206)288-7222
Legal status:	Other
Owner/Operator Type:	Operator
Owner/Op start date:	Not reported
Owner/Op end date:	Not reported

Owner/operator name:	SEATTLE CANCER CARE ALLIANCE
Owner/operator address:	825 EASTLAKE AVE E SEATTLE, WA 98109

Handler Activities Summary:

SEATTLE CANCER CARE ALLIANCE (Continued) **1005445072**

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 11024.2

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

SEATTLE CANCER CARE ALLIANCE (Continued) **1005445072**

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 774

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington

SEATTLE CANCER CARE ALLIANCE (Continued) **1005445072**

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ALLEY 24 WEST LLC (Continued) **1000659668**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: WSQG
. Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

MONTEREY APARTMENTS SITE (Continued) **1000199654**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

GRAPHICOLOR INC (Continued) **1000347201**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: WSQG
. Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

SEATTLE PORT TERM 66 (Continued) **1001600666**

. Waste code: WT02
. Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/05/2016

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 08/05/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey
Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

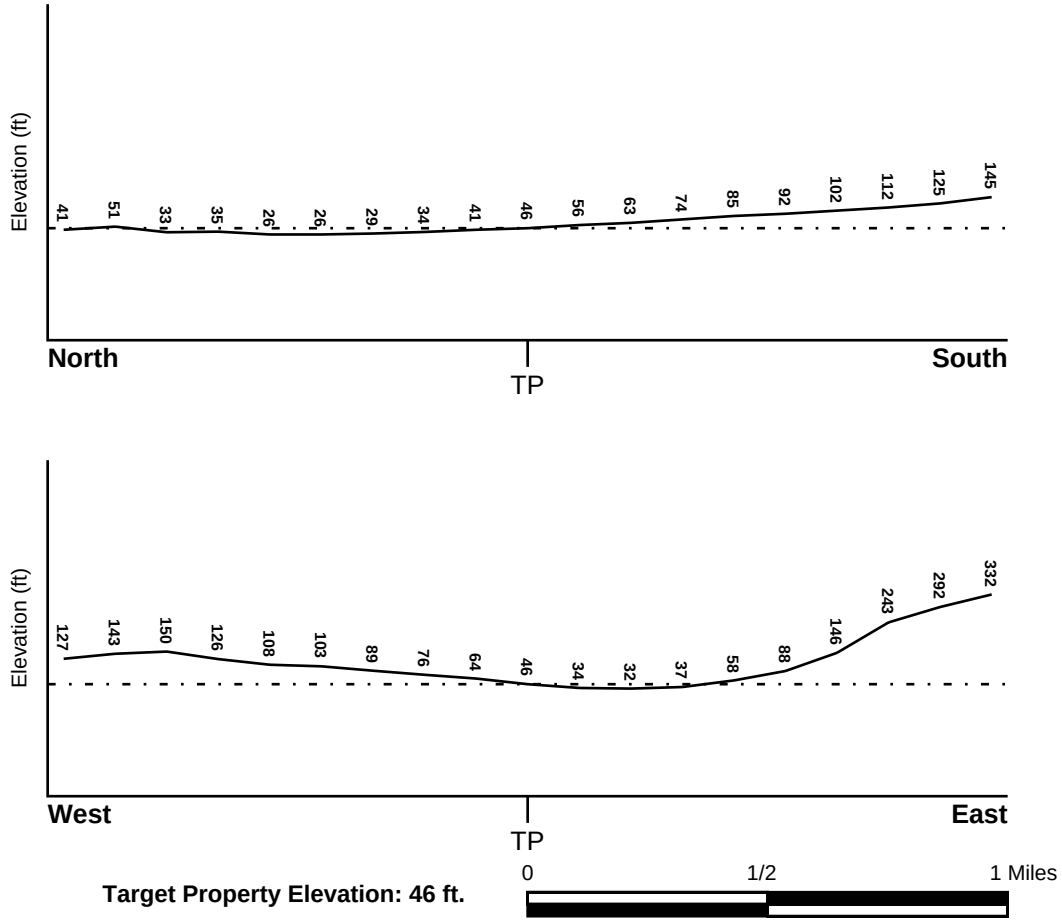
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 46 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
53033C0340F	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type
53033C0630F	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SEATTLE NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile ESE
Site Name:	MASTERCRAFT METAL FINISHING
Site EPA ID Number:	WAD063346597
Groundwater Flow Direction:	N TOWARD AND INTO LAKE UNION
Inferred Depth to Water:	20 feet
Hydraulic Connection:	The site vicinity is underlain by sand and gravel to a depth of approximately 215 feet. Clay that effectively inhibits the downward flow of ground water exists at a depth of 215 feet to 250 feet.
Sole Source Aquifer:	A sole source aquifer is not persent at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

9	1/2 - 1 Mile SSW	Not Reported
11	1/2 - 1 Mile SE	Not Reported
12	1/2 - 1 Mile WSW	SSW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	PILCHUCK
Soil Surface Texture:	loamy sand
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	20 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.10
2	20 inches	38 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 5.60
3	38 inches	60 inches	gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 7.30 Min: 6.10
4	60 inches	70 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam
silt loam
gravelly - loam
silty clay loam
muck
gravelly - coarse sand
loam

Surficial Soil Types: fine sandy loam
silt loam
gravelly - loam
silty clay loam
muck
gravelly - coarse sand
loam

Shallow Soil Types: fine sandy loam

silt loam
silty clay loam
peaty - silt loam
loam
sandy loam

Deeper Soil Types: silt loam
stratified
very gravelly - coarse sand
silty clay loam
loamy fine sand
very gravelly - sand
sapric material
sand
loamy sand
very gravelly - loamy sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TAX ROLL HISTORY

This is a government owned parcel.
Change to state law (RCW 84. 40.045 and 84.40.175) by the 2013 Legislature eliminated revaluation of government owned parcels.

Re: No Further Action at the Following Site:

- **Site Name:** WA UW 815 Mercer
- **Site Address:** 815 Mercer Street, Seattle, WA 98109
- **Facility/Site No.:** 95373825
- **VCP Project No.:** NW2567

Dear Ms. Buker:

The Washington State Department of Ecology (Ecology) received your request for an opinion on your independent cleanup of the WA UW 815 Mercer facility (Site). This letter provides our opinion. We are providing this opinion under the authority of the Model Toxics Control Act (MTCA), Chapter 70.105D RCW.

Issue Presented and Opinion

Is further remedial action necessary to clean up contamination at the Site?

NO. Ecology has determined that no further remedial action is necessary to clean up contamination at the Site.

This opinion is based on an analysis of whether the remedial action meets the substantive requirements of MTCA, Chapter 70.105D RCW, and its implementing regulations, Chapter 173-340 WAC (collectively "substantive requirements of MTCA"). The analysis is provided below.

Description of the Site

This opinion applies only to the Site described below. The Site is defined by the nature and extent of contamination associated with the following releases:

- Gasoline, diesel, oil-range petroleum hydrocarbons and associated compounds of benzene, toluene, ethylbenzene, xylenes (BTEX), carcinogenic polynuclear aromatic hydrocarbons (cPAHs) into the soil.
- Diesel-range petroleum hydrocarbons and BTEX into the ground water.

Enclosure A includes a detailed description and diagram of the Site, as currently known to Ecology.

Please note a parcel of real property can be affected by multiple sites. At this time, we have no information that the parcel(s) associated with this Site are affected by other sites.

Basis for the Opinion

This opinion is based on the information contained in the following documents:

1. Response to Ecology Comments on the UW Medicine Cleanup Action Report. Prepared by Floyd Snider dated September 2, 2011.

2. Cleanup Action Report for the University of Washington School of Medicine Site, VCP Site No. NW1518. Project Number: Vulcan UW-MED.01000. Prepared by Floyd Snider dated February 18, 2011.

3. Geotechnical Data Report, University of Washington School of Medicine, South Lake Union, Seattle, Washington. Prepared by Shannon & Wilson, Inc. dated March 25, 2005.

4. Report of Environmental Services, Modified Transaction Screen and Phase II Environmental Site Assessment (ESA), Mercer Building Property, 815 Mercer Street, Seattle, Washington. Prepared by GeoEngineers dated December 18, 2000.

5. Summary Report, Underground Storage Tank Removal, Mercer Street Office Building. Prepared by Pinnacle GeoSciences, Inc. dated March 27, 1998.

6. Interim Report of Findings, Limited Phase I/Phase II Site Characterization, 815 Mercer Street, Seattle, Washington, K/J 936018.00. Prepared by Kennedy/Jenks Consultants dated March 26, 1993.

7. Underground Storage Tank Site Assessment and Soil Remediation Report, Washington Natural Gas, 815 Mercer Street, Seattle, Washington. Prepared by SEACOR dated April 10, 1992.

Those documents are kept in the Central Files of the Northwest Regional Office of Ecology (NWRO) for review by appointment only. You can make an appointment by calling the NWRO resource contact at (425) 649-7190.

This opinion is void if any of the information contained in those documents is materially false or misleading.

Analysis of the Cleanup

Ecology has concluded that **no further remedial action** is necessary to clean up contamination at the Site. That conclusion is based on the following analysis:

1. Characterization of the Site.

Ecology has determined your characterization of the Site is sufficient to establish cleanup standards and select a cleanup action. The Site is described above and in **Enclosure A.**

8. Establishment of cleanup standards.

i. Cleanup levels.

Soil:

The Site is located in a mixed residential and commercial area. Soil cleanup levels suitable for unrestricted land uses are therefore applicable to this Site.

Soil cleanup levels protective of terrestrial species are also potentially applicable. However, they were deemed not-applicable for this Site based on the exclusion relating to proximity of undeveloped land in accordance with WAC 173-340-7491(1)(c)(i).

Because the cleanup at this Site was relatively straight forward and involved few hazardous substances, the MTCA Method A cleanup levels for unrestricted land uses were deemed applicable and appropriate. Note that the Method A cleanup levels were established based on protection of ground water and direct contact.

Ground Water:

Cleanup levels were set for ground water based on its use as a potential drinking water source. The MTCA Method A cleanup levels are appropriate for this purpose, and were selected as the cleanup levels for this Site.

ii. Points of compliance.

Soil:

The point of compliance for soil is throughout the Site in order to protect against direct contact and ground water.

Ground Water:

The standard point of compliance for ground water is throughout the Site from the uppermost level of the saturated zone extending vertically to the lowest most depth which could potentially be affected by the Site.

3. Selection of cleanup action.

Ecology has determined the cleanup action you selected for the Site meets the substantive requirements of MTCA.

The selected cleanup actions included removal of underground storage tanks and excavation of contaminated soils and off-site disposal, followed by confirmation sampling. This cleanup action is considered permanent under MTCA and meets the minimum criteria for cleanup actions.

4. Cleanup.

Ecology has determined the cleanup you performed meets the cleanup standards established for the Site.

The cleanup actions completed to date have included the following:

- 1992: Five 150-gallon lubricating oil USTs and one 300-gallon waste oil UST were removed and the petroleum-contaminated soil was excavated. However, contaminated soil was left in the north sidewall due to presence of utilities.

- 1998: Two 6,000-gallon gasoline USTs, one fuel island, and associated piping were excavated and removed from the southern portion of the Property. Approximately 130 cubic yards of petroleum-contaminated soil was excavated and treated off-site at the TPS facility in Tacoma. The final base of the excavation was about 8 feet below ground surface (bgs) on average, and extended to a maximum depth of about 11 feet bgs beneath the USTs. However, petroleum-contaminated soil was left in the base, north and south excavation sidewalls and beneath the product dispensers.

- 2006: Further excavation was conducted during the Phase 2 development. One 1,000-gallon gasoline UST was removed from between the two above storage manufactured gas tanks. One 100-gallon diesel UST was removed along the southern Property boundary. A 55-gallon drum containing gasoline or Stoddard solvent/mineral spirits was removed from the northwestern portion of the Property. All contaminated soils above the cleanup levels were excavated, except in a small area near the UST along the southern sidewall in the southern area of the Property. The remaining contamination in this area was addressed in 2007 as described in the next paragraph. Excavation reached depth of 37.5 feet bgs in the southern portion of the Site, and approximately 20 feet bgs in the northwestern portion of the Site. No perched ground water was encountered during the excavation. However, since excavation extended about 5 feet into the native outwash layer, 8 dewatering wells were installed to lower the water table. Water was pumped to an on-site Baker Tank and then discharged to the sewer system under a permit.

- 2007: The remaining contamination near the UST along the southern sidewall in the southern area of the Property was excavated. In addition, further excavation was conducted in the center and eastern portions of the Site for construction of loading locks. Confirmation samples were collected at the end of excavation and results proved that all petroleum contaminated soils were removed.

Listing of the Site

Based on this opinion, Ecology will remove the Site from our Confirmed and Suspected Contaminated Sites List and Leaking Underground Storage Tank List.

Limitations of the Opinion

1. Opinion does not settle liability with the state.

Liable persons are strictly liable, jointly and severally, for all remedial action costs and for all natural resource damages resulting from the release or releases of hazardous substances at the Site. This opinion **does not**:

- Resolve or alter a person's liability to the state.
- Protect liable persons from contribution claims by third parties.

To settle liability with the state and obtain protection from contribution claims, a person must enter into a consent decree with Ecology under RCW 70.105D.040(4).

2. Opinion does not constitute a determination of substantial equivalence.

To recover remedial action costs from other liable persons under MTCA, one must demonstrate that the action is the substantial equivalent of an Ecology-conducted or Ecology-supervised action. This opinion does not determine whether the action you performed is substantially equivalent. Courts make that determination. *See* RCW 70.105D.080 and WAC 173-340-545.

3. State is immune from liability.

The state, Ecology, and its officers and employees are immune from all liability, and no cause of action of any nature may arise from any act or omission in providing this opinion. *See* RCW 70.105D.030(1)(i).

Termination of Agreement

Thank you for cleaning up the Site under the Voluntary Cleanup Program (VCP). This opinion terminates the VCP Agreement governing this project (#NW2567).

For more information about the VCP and the cleanup process, please visit our web site: www.ecy.wa.gov/programs/tcp/vcp/vcpmain.htm. If you have any questions about this opinion or the termination of the Agreement, please contact me by phone at (425) 649-4310 or e-mail at jliu461@ecy.wa.gov.

Sincerely,

Jing Liu

Enclosure: A – Description and Diagrams of the Site

cc: Sonia Fernández, VCP Administrator, Ecology
Dolores D Mitchell, VCP Financial Manager, Ecology

ecc: Tom Colligan, Floyd Snider
Stephen Bentsen, Floyd Snider

Enclosure A
Description and Diagram of the Site

Site: The Site comprises petroleum hydrocarbon releases to soil and ground water at a property located at 815 Mercer Street in Seattle (the Property). The Property and the Site are shown on the attached Site Diagram.

Area Description: The area is heavily developed with commercial business operations and some residential developments. Most surfaces are paved or covered by buildings. The Property encompasses a city block, bounded by Mercer and Republican Streets on the north and south, and Eighth and Ninth Avenues North on the west and east, in the South Lake Union area of Seattle.

Property History and Current Use: The Property and surrounding area were first developed in the late 1800s and early 1900s. The Property used to be occupied by PSE's Seattle Headquarters approximately from the early 1900s to 2000, when it was purchased by City Investors VII, LLC for redevelopment.

The Property used to have two one million-gallon above ground storage tanks (ASTs) for storage of manufactured coal gas from the early 1900s through the mid to late 1950's. The two ASTs were removed during site development in 1963 and 1964 when a building (PSE Headquarters), a vehicle maintenance garage and a paved parking area were constructed. The building was renovated during a Phase 1 development in 2004-2005. Three new buildings, including a 3-story below grade parking garage was constructed during a Phase 2 development in 2006 and 2007.

Sources of Contamination: Potential contamination sources consist of leaks and spills associated with the historical operations at the Property, including manufactured gas storage and on-site vehicle fueling/maintenance. The type of contamination expected would mostly be gasoline, diesel, and oil, although non-chlorinated solvents (e.g.,mineral spirits) and chlorinated solvents (e.g., trichloroethylene) could also potentially be present. Other less likely contaminants include PCBs in waste oil, and heavy metals such as cadmium and lead from battery fluids.

Physiographic Setting: The Property and surrounding area generally slopes gently from southwest to northeast towards Lake Union, although most areas of the Property are fairly flat. The elevation is about 50 feet above Mean Sea Level.

Surface/Storm Water System: Water runoff in the area is collected in municipal storm drains. There are no creeks in the immediate vicinity of the Site. The closest surface water body is Lake Union, located about 800 feet north of the Site.

Ecological Setting: There is little terrestrial or aquatic habitat in the area. The area is heavily developed, with most surfaces paved or covered by buildings with the exception of small landscaped areas.

Geology: Shallow geologic conditions at the Site consist of 5 to 15 feet of fill, consisting of loose to medium dense sand with varying amounts of gravel, silt, and clay. The fill is generally thicker in the north and northeastern portion of the Property. The fill is underlain by 10 to 15 feet of till which transitions to stiff clayey silt. These fine grained deposits in turn overlie a dense sandy gravel advance outwash.

Ground Water: Minor perched and discontinuous water bearing zones were present at depths of 5 to 7 feet below ground surface beneath the site. Fully saturated conditions occur at depths of 17 to 25 feet, and ground water flow is to the north towards Lake Union.

Water Supply: No known ground water wells exist in the area. The City of Seattle provides water for the area.

Release and Extent of Contamination - Soil: Petroleum contaminated soil was encountered in the south, middle-west, and northwest portions of the Property. Petroleum contaminated soil were limited to the upper 15 feet at the Site except in the southern area, where it extended to approximately 20 feet bgs.

Extent of Contamination – Ground Water: Petroleum and associated BTEX were detected in grab water samples collected in 1993 from the western portion of the Property. However, those samples were not likely representing actual ground water situation since analytical results tend to be biased high due to high turbidity usually associated with grab water samples. Results from subsequent ground water sampling all indicated meeting cleanup levels. Groundwater is not likely being impacted.

Ecology NWRO Initial Investigations Coordinator

SUBJECT: Initial Investigation: No Further Action (NFA) Determination
Amazon VI
515 Westlake Ave N, Seattle, WA
Facility Site ID: 7811
Cleanup Site ID: 12471

Ecology has determined that no further action is necessary (at the Initial Investigation stage) due to independent remediation.

Ecology received the following report:

- HWA GeoSciences Inc., 2013, Block 44 UST Site Assessment Report, Seattle, Washington. April 8, 2013.

The above report provides sufficient documentation that this cleanup was conducted to MTCA Method A cleanup levels for unrestricted land use.

Additional information about Ecology's review may be accessed here: https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=12471.

To view the documentation Ecology has available electronically, on the right-hand side of the page, click on View Electronic Documents.

STATE OF WASHINGTON
DEPARTMENT OF ECOLOGY

March 16, 2003

Mr. David M. Seaver
Environmental Management Services, Inc.
56 East 15th Avenue
Eugene, OR 97401

Dear Mr. Seaver

Re: Independent Remedial Action
Interstate Brands Corporation Facility
434 Aurora Avenue North
Seattle, Washington

Thank you for submitting the results of your independent remedial actions for review by the State of Washington Department of Ecology (Ecology). Ecology appreciates your initiative in pursuing this administrative option under the Model Toxics Control Act (MTCA).

Ecology's Toxics Cleanup Program has reviewed the following information regarding the Interstate Brands Corporation Facility located at 434 Aurora Avenue North, Seattle:

1. Hostess Bakery
   UST Assessment Report
   The Radix Ortega Group, dated August 26, 1997

2. Hostess Bakery
   UST # 4 Assessment Report
   The Radix Ortega Group, dated September 30, 1997

3. Voluntary Cleanup Program
   Site Summary Report
   Interstate Brands Corporation Facility
   434 Aurora Avenue North
   Seatttle, Washington
   Environmental Management Services, Inc., dated December 3, 2002

The reports listed above will be kept in the Central Files of the Northwest Regional Office (NWRO) of Ecology for review by appointment only. Appointments can be made by calling Sally Perkins at the NWRO at (425) 649-7190 or -7239.

Based upon the information in the reports listed above, Ecology has determined that, at this time, the release of petroleum hydrocarbon into the soil no longer poses a threat to human health or the environment.

Therefore, Ecology is issuing this determination that no further remedial action is necessary at this site under MTCA, chapter 70.105D RCW. However, please note that because your actions were not conducted under a consent decree with Ecology, this letter is written pursuant to RCW 70.105D.030(1)(i) and does not constitute a settlement by the state under RCW 70.105D.040(4) and is not binding on Ecology.

Ecology's no further action determination is made only with respect to the release identified in the reports listed above. This no further action determination applies only to the area of the property affected by the release identified in the reports at 434 Aurora Avenue North, Seattle. It does not apply to any other release or potential release at the property, any other areas on the property, nor any other properties owned or operated by Interstate Brands Corporation.

Ecology will update its Leaking Underground Storage Tank database to reflect this "No Further Action" determination. Your site will not appear in future publications of the LUST database.

The state, Ecology, and its officers and employees are immune from all liability and no cause of action of any nature may arise from any act or omission in providing this determination.

If you have any questions, please contact me at (425) 649-7265 or bsat461@ecy.wa.gov.

Sincerely,

Brian S. Sato, P.E.

CUSTOMER ALERT!

Site Inspection Required Prior to First Ground Disturbance–Call (206) 684-8900
A DPD site inspection is required prior to any ground disturbance related to this permit, including tree cutting, clearing, grubbing or grading.

Preconstruction Conferences, When Required–Call (206) 684-8860
A DPD PRECONSTRUCTION CONFERENCE should be scheduled prior to beginning work. A conference is required for the following types of work:
1. When any special inspections are indicated on the plan
2. When land use or design review conditions are indicated on the plan
3. When a DPD plans examiner specifies on plans unusual or complex inspection or occupancy requirements

Rules for Ufer Grounds–Call (206) 684-5383
If you have any questions or concerns regarding the rules (2005 NEC) for installation ufer grounds, please contact DPD's Electrical Technical Backup, Monday– Friday, 7a.m.–4:30p.m.

Required SDOT Permits and Inspections
STREET TREE INSPECTIONS: Protection and/or planting/pruning/removal of street trees requires SDOT inspection and approval.
Call prior to construction: Commercial/Multifamily Zones, (206) 684-5693; Single Family Zones, (206) 684-7997
STREET USE PERMITS:
Call prior to construction: (206) 684-5283

Water Service Inspection by SPU Required
All Water Service Piping On Property must be inspected prior to backfilling trench. For information and inspection, call Seattle Public Utilities (SPU) at (206) 684-5800. For water quality backflow protection information and inspection, call SPU at (206) 684-3536.

RESUME OF ENVIRONMENTAL PROFESSIONAL

Agnes C. Tirao, PE | Associate

EDUCATION
BS, Civil Engineering, University of Washington, 1994

REGISTRATION
Registered Professional Engineer, Civil, WA, 36954, 2000

PROFESSIONAL SUMMARY
Agnes is an engineer with 23 years of experience with a variety of environmental engineering projects. Agnes's field work experience includes performing Phase I and II environmental site assessments (ESAs); underground storage tank (UST) removals; hollow-stem auger, mud-rotary, horizontal, and cable tool drilling; hydraulic probing (soil and groundwater sampling); groundwater studies; and soil, surface water, and groundwater sampling. She has managed large multidisciplinary investigations for Sound Transit, WSDOT, BNSF, UPRR Railroads, and several local counties and cities.

RELEVANT EXPERIENCE

City of Seattle, Seattle City Light Department, On-call Environmental Support, Puget Sound, WA. Environmental Project Manager for an on-call contract to support Seattle City Light (SCL) with various environmental projects in the Puget Sound. The scope of the eighteen task orders included: Phase I and II ESAs; soil and groundwater sampling for characterization and waste disposal purposes; environmental studies to assist with real estate sales/purchase; stormwater management; and geotechnical studies (horizontal directional drilling and potential landslide area). Values of the task orders ranged in cost from about $3,000 to $27,500. Agnes managed as many as 7 task orders concurrently. Initially, the award was a one-year contract. However, based on Agnes's management of the contract and Shannon & Wilson's technical capabilities, SCL extended the contract another year and doubled the amount of the contract.

Seattle Center, Phase I ESA and Remedial/Corrective Actions, Seattle, WA. Project Engineer. Performed a Phase I ESA for the former Metro Bus Barn (the Seattle Center). The site was previously occupied by a fueling facility. An extensive historical review of 11 city blocks, site reconnaissance, and record search were conducted. Shannon & Wilson, Inc., was retained to review all of the existing historical site data, prepare an alternatives analysis, and oversee the corrective action. The alternatives analysis evaluated potential cleanup levels in consideration of potential regulatory changes, existing site conditions, and anticipated future land use. Cleanup levels and corrective action were recommended for each of several differently-contaminated areas on the property. Shannon & Wilson, Inc. then supervised the implementation of the corrective actions and establishment of a long-term groundwater monitoring program.

Sound Transit, On-call Environmental Due Diligence Services, Puget Sound Region, WA. Agnes is Project Manager for site assessments and characterization of environmental issues at commercial/industrial properties included within Sound Transit's University, Puyallup, Sumner, Tukwila, Auburn and Kent Stations. This fast-tracked project required the valuation, purchase, and remediation of a variety of industrial and residential properties that were redeveloped. Agnes completed and/or reviewed a Phase 1 and 2 ESAs, as well as assisted with preparation of construction specifications, cleanup action plans, and hazardous materials survey reports. She performed scoping and cost estimate negotiations for the task orders, and scheduling and

coordination of over ten subconsultants and Shannon & Wilson personnel. She interacted heavily with team appraisers and acquisition consultants regarding site access, potential contamination issues, and communication with property owners; performed QA/QC of the individual ESA and hazardous materials reports; and monitored the associated budgets totaling $2.5 million, including tracking of the M/WBE participation.

Sound Transit, Commuter Rail Stations, Environmental Site Assessment Services for Puget Sound Region, WA. Agnes was a Task Manager for site assessments and characterization of environmental issues at commercial/industrial properties included within Sound Transit's Puyallup, Sumner, Tukwila, Auburn and Kent Stations. This fast-tracked project required the valuation, purchase, and remediation of a variety of industrial and residential properties that were redeveloped. Agnes assisted with Phase 1 ESAs and was responsible for developing a template for Phase 2 ESAs, as well as assisted with preparation of construction specifications, cleanup action plans, hazardous materials survey reports, and remedial oversight of many of the sites under the state Voluntary Cleanup Program. She performed scheduling and coordination of seven subconsultants and several Shannon & Wilson employees to complete the Phase 1 and 2 ESAs, construction documents and remedial oversight. She interacted heavily with team appraisers and acquisition consultants regarding site access, potential contamination issues, and communication with property owners; performed QA/QC of the individual ESA and hazardous materials reports; and monitoring the associated budgets totaling $1 million, including tracking of the M/WBE participation.

City of Tukwila, Phase I ESA, Tukwila, WA. Project Engineer. Performed a modified Phase I ESA on a parcel of land the city was considering for development. Fill soils on an adjacent site included kiln dust, which was encountered during field exploration. Performed a historical review, site reconnaissance, and record search. Logged soil and collected analytical samples from test pits located along common property boundary. Performed surface water sampling and interpreted analytical result, and prepared report.

City of Lakewood, Phase I ESA, Lakewood Station Connection Pedestrian Bridge, Lakewood, WA. Environmental Project Manager. Shannon & Wilson completed a Phase I Environmental Site Assessment for three subject parcels in the vicinity of the Kendrick Street SW and 114th Street SW intersection in Lakewood, Washington. This study was conducted to assist the City of Lakewood with plans to acquire affected parcels, or portions of affected parcels, as part of the Lakewood Station Connection Project. The Lakewood Station Connection Project includes the design of a pedestrian over crossing of the Tacoma Rail tracks from the Lakewood Station to the street end of Kendrick Street SW, and the design of curb, gutter, and sidewalk from Kendrick Street SW terminus north to 111th Street SW. Based on an initial layout of the proposed roadway improvements, three parcels have been identified as being potentially affected by this project and may be acquired.

Blaine Nesbit | Environmental Engineer II

EDUCATION

BS, Environmental Engineering, California Polytechnic State University, 2014

REGISTRATION

Engineer-In-Training, California, 154900, 2015

While at Shannon & Wilson, Blaine has had the opportunity to work on a wide variety of environmental projects. Blaine has performed field testing for asbestos and lead in buildings throughout Washington, as well as field testing for contaminated soil and groundwater. Blaine also has field experience with slope inclinometer tests. In addition to field-related work, Blaine has been a part of environmental data analysis and report writing for multiple clients.

Prior to his employment at Shannon & Wilson, Blaine worked for an industrial hygiene consulting firm in Seattle. While at the industrial hygiene firm, Blaine conducted hazardous building materials surveys, lead in drinking water studies, respirator fit tests for hospital employees, and more. Blaine was also responsible for asbestos abatement oversight on demolitions projects throughout Washington.

RELEVANT EXPERIENCE

Nova Consulting Group, 107 Pine Lead Survey, Seattle, WA. Project Manager. The purpose of this survey was to identify lead-based paint and lead-containing surface materials before the renovation of a building into a hotel. The scope of work included using a portable x-ray fluorescence analyzer and bulk sampling to identify and quantify lead-based paint which may pose a worker and environmental hazard. Blaine was the project manager, field technician, and report writer for this project.

Sound Transit, Phase II Environmental Site Assessments, Multiple Cities, WA. Environmental Professional. Sound Transit plans to expand rail service across the Puget Sound, and are acquiring properties for the expansion. Blaine has conducted Phase II environmental site assessments at property's in Puyallup and Bellevue. For some sites, Blaine coordinated subcontractors for location services, drilling services, and laboratory services. Blaine was the field technician and report writer for these projects.

WSDOT, SR520, Slope Stability, Seattle, WA. Environmental Professional. The west side of the SR520 bridge is built on a historical landslide area. Blaine has used an inclinometer to gather data on ground movement in the soil beneath the bridge. Blaine was the field technician for this project.

JBLM, Flora Pond Environmental Investigation, Tacoma, WA. Environmental Professional. JBLM has built a two-pond system from storm water retention and infiltration. The infiltration pond has not been effective in dispersing standing water into the groundwater, and JBLM has had to excavate out soil and stockpile on-site. Blaine used a boat and a dredge sampler to take soil samples from the bottom of each pond as well as dig pits in the stockpile to sample soil from. Blaine was the field technician for this project.

South Puget Sound Salmon Enhancement Group, Kay's House Restoration Design, Hazardous Material Investigation, Tacoma, WA. Environmental Professional. Kay's House restoration design is part of a larger shoreline restoration project at Titlow Park in Tacoma, WA. A former residence on the west portion of what is now park property has been demolished along with removal of the bulkhead in front of the house and re-grading of the shoreline similar to natural conditions for shoreline restoration. Blaine collected and logged soil from soil cells distributed throughout the project site. Soil samples were analyzed for contaminants related to the historic Tacoma Smelter. Results of the chemical analyses inform areas where soils are adequate for reuse on site, soils requiring remediation, and how to dispose of removed soil. Samples which exceeded MTCA Method A cleanup criteria could be mixed, removed, or capped depending on the concentration of chemical exceeding criteria.

IMPORTANT INFORMATION ABOUT YOUR ENVIRONMENTAL SITE ASSESSMENT/EVALUATION REPORT

SHANNON & WILSON, INC.
Geotechnical and Environmental Consultants

Attachment to and part of Report 21-1-21417-001

Date: January 25, 2018
To: Mr. John McMillan
KPFF Consulting Engineers

IMPORTANT INFORMATION ABOUT YOUR ENVIRONMENTAL SITE ASSESSMENT/EVALUATION REPORT

ENVIRONMENTAL SITE ASSESSMENTS/EVALUATIONS ARE PERFORMED FOR SPECIFIC PURPOSES AND FOR SPECIFIC CLIENTS.

This report was prepared to meet the needs you specified with respect to your specific site and your risk management preferences. Unless indicated otherwise, we prepared your report expressly for you and for the purposes you indicated. No one other than you should use this report for any purpose without first conferring with us. No one is authorized to use this report for any purpose other than that originally contemplated without our prior written consent.

The findings and conclusions documented in this site assessment/evaluation have been prepared for specific application to this project and have been developed in a manner consistent with that level of care and skill normally exercised by members of the environmental science profession currently practicing under similar conditions in this area. The conclusions presented are based on interpretation of information currently available to us and are made within the operational scope, budget, and schedule constraints of this project. No warranty, express or implied, is made.

OUR REPORT IS BASED ON PROJECT-SPECIFIC FACTORS.

Our environmental site assessment is based on several factors and may include (but not be limited to): reviewing public documents to chronicle site ownership for the past 30, 40, or more years; investigating the site's regulatory history to learn about permits granted or citations issued; determining prior uses of the site and those adjacent to it; reviewing available topographic and real estate maps, historical aerial photos, geologic information, and hydrologic data; reviewing readily available published information about surface and subsurface conditions; reviewing federal and state lists of known and potentially contaminated sites; evaluating the potential for naturally occurring hazards; and interviewing public officials, owners/operators, and/or adjacent owners with respect to local concerns and environmental conditions.

Except as noted within the text of the report, no sampling or quantitative laboratory testing was performed by us as part of this site assessment. Where such analyses were conducted by an outside laboratory, Shannon & Wilson relied upon the data provided and did not conduct an independent evaluation regarding the reliability of the data.

CONDITIONS CAN CHANGE.

Site conditions, both surface and subsurface, may be affected as a result of natural processes or human influence. An environmental site assessment/evaluation is based on conditions that existed at the time of the evaluation. Because so many aspects of a historical review rely on third party information, most consultants will refuse to certify (warrant) that a site is free of contaminants, as it is impossible to know with absolute certainty if such a condition exists. Contaminants may be present in areas that were not surveyed or sampled, or may migrate to areas that showed no signs of contamination at the time they were studied.

Unless your consultant indicates otherwise, your report should not be construed to represent geotechnical subsurface conditions at or adjacent to the site and does not provide sufficient information for construction-related activities. Your report also should not be used following floods, earthquakes, or other acts of nature; if the size or configuration of the site is altered; if the location of the site is modified; or if there is a change of ownership and/or use of the property.

INCIDENTAL DAMAGE MAY OCCUR DURING SAMPLING ACTIVITIES.

Incidental damage to a facility may occur during sampling activities. Asbestos and lead-based paint sampling often require destructive sampling of pipe insulation, floor tile, walls, doors, ceiling tile, roofing, and other building materials. Shannon & Wilson does not provide for paint repair. Limited repair of asbestos sample locations are provided. However, Shannon & Wilson neither warranties repairs made by our field personnel, nor are we held liable for injuries or damages as a result of those repairs. If you desire a specific form of repair, such as those provided by a licensed roofing contractor, you need to request the specific repair at the time of the proposal. The owner is responsible for repair methods that are not specified in the proposal.

READ RESPONSIBILITY CLAUSES CAREFULLY.

Environmental site assessments/evaluations are less exact than other design disciplines because they are based extensively on judgment and opinion, and there may not have been any (or very limited) investigation of actual subsurface conditions. Wholly unwarranted claims have been lodged against consultants. To limit this exposure, consultants have developed a number of clauses for use in their contracts, reports, and other documents. These responsibility clauses are not exculpatory clauses designed to transfer the consultant's liabilities to other parties; rather, they are definitive clauses that identify where responsibilities begin and end. Their use helps all parties involved recognize their individual responsibilities and take appropriate action. Some of these definitive clauses may appear in this report, and you are encouraged to read them closely. Your consultant will be pleased to give full and frank answers to your questions.

Consultants cannot accept responsibility for problems that may develop if they are not consulted after factors considered in their reports have changed, or conditions at the site have changed. Therefore, it is incumbent upon you to notify your consultant of any factors that may have changed prior to submission of the final assessment/evaluation.

An assessment/evaluation of a site helps reduce your risk, but does not eliminate it. Even the most rigorous professional assessment may fail to identify all existing conditions.

ONE OF THE OBLIGATIONS OF YOUR CONSULTANT IS TO PROTECT THE SAFETY, HEALTH, PROPERTY, AND WELFARE OF THE PUBLIC.

If our environmental site assessment/evaluation discloses the existence of conditions that may endanger the safety, health, property, or welfare of the public, we may be obligated under rules of professional conduct, statutory law, or common law to notify you and others of these conditions.

The preceding paragraphs are based on information provided by the
ASFE/Association of Engineering Firms Practicing in the Geosciences, Silver Spring, Maryland
