Frank P. Winslow
Toxics Cleanup Program
Department of Ecology – Central Regional Office
1250 W. Alder Street, Union Gap, WA 98903

Mr. Winslow,

In a meeting on December 3, 2018 with our consultant Dr. Michael Murray, HDR, and in your letter dated December 17, 2018, the Department of Ecology presented Simplot with two options for continuing remedial actions at the Sunnyside, Washington SGS site. The first option was to continue under the Voluntary Cleanup Program. The second option was a shift to an Agreed Order for formal management of the site. On behalf of Simplot, I would inform you that we would like to exercise the second option and shift to an Agreed Order. As requested, Simplot and its consultant will develop a work plan for additional remedial investigation of the site, to be submitted at the appropriate time under the Agreed Order. We look forward to the Department's direction on next steps.

Please call me at (208) 235-5674 if you have any questions or comments concerning this letter.

Sincerely,

A handwritten signature in blue ink, appearing to read "Monty Johnson".

Monty Johnson
Environmental Engineering Manager
