ENVIRONMENTAL PROFESSIONALS' STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as established in Part 312.10 of Title 40 of the Code of Federal Regulations (40 CFR 312.10) and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

EXECUTIVE SUMMARY

Farallon Consulting, L.L.C. (Farallon) has prepared this Phase I Environmental Site Assessment (Phase I ESA) Report for the 12th and Yesler property at 104 through 108 12th Avenue and 1206 East Yesler Way in Seattle, Washington (herein referred to as the Site). The Phase I ESA was conducted by Mr. Clifford Nale and was reviewed and approved by Ms. Tina Huff. Both are experienced Environmental Professionals in the field of Phase I ESAs and related environmental investigations.

This Phase I ESA Report was prepared for Spectrum Development Solutions, LLC (Spectrum) in accordance with the letter regarding Proposal for Environmental Due Diligence, 12th and Yesler, Seattle, Washington dated December 2, 2105, prepared by Farallon. The scope of work for this Phase I ESA is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13). ASTM E1527-13 is intended to assist the user in satisfying one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes “all appropriate inquiry” into the previous ownership, uses, and environmental conditions of a property consistent with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

There were no deviations from ASTM E1527-13 during the completion of this Phase I ESA, with the exception of additional environmental services requested by Spectrum. Limiting conditions encountered during the completion of this Phase I ESA were the presence of vehicles parked on exterior portions of the Site that prevented Farallon from observing the entire ground surface of the Site, and the presence of furniture and equipment in the Site building that prevented Farallon from observing the entire interior floor surface. Based on information obtained from the Site representative, these limiting conditions are not expected to hinder the conclusions of this report.

The purpose of the Phase I ESA was to identify, as practicable, recognized environmental conditions on or proximate to the Site that have caused and/or may cause an adverse environmental condition. This Phase I ESA Report provides the results of investigation into past and present ownership and uses of the Site, consistent with good commercial and/or customary practice.

The Site consists of King County Tax Parcel Nos. 806100-0025 and 806100-0035, which total 22,000 square feet (0.51 acre) of land. The western portion of the Site is developed with a two-story 20,000-square-foot masonry building that was constructed in 1926 and is occupied by Seattle Curtain Manufacturing Company and used for curtain manufacturing and office space. The eastern portion of the Site consists of paved parking and landscaped areas. Access to the Site is gained from East Yesler Way, south of the Site, and 12th Avenue, west of the Site. According to the King County Department of Assessments, the Site owner is Capeluto Morris.

At the time of the site reconnaissance, Farallon observed minor amounts of hazardous materials, including janitorial cleaning and maintenance supplies. The materials were observed to be properly labeled and stored in designated areas of the building. No staining or evidence of releases was observed in or around the containers at the time of the site reconnaissance.

Historically, the Site was depicted on Sanborn Fire Insurance Maps as a vacant lot from at least 1893 to 1926. By 1926, the current two-story masonry building was depicted on the western portion of the Site, and the eastern portion remained vacant. In the 1953 aerial photograph reviewed, the eastern portion of the Site was depicted as a paved parking lot, which has remained to the present. City directory listings for the Site address included an auto dealer, garage, and an auto paint shop in 1930, Twelfth Avenue Skating, and Coles Horticultural Products and Fertilizer Manufactures in 1940, the Washington Training Center for the Blind from at least 1949 to 1960, Atlas Salvage and Surplus Foods, Inc. in 1951, Handerest Inc. Neckwear Manufacturer and Basket Dealer from at least 1951 to 1960, T & T Foods in 1966, Reds – IGA Foods and Meats from at least 1955 to 1960, Yesler Tom Boy Groceries from at least 1970 to 1975, and Seattle Curtain Manufacturing Company from at least 1966 to the present. Based on the historical uses of the Site as an auto garage and painting facility and a fertilizer manufacturer, the potential release of hazardous substances in connection with former operations at the Site represents a recognized environmental condition in connection with the Site.

Adjacent properties at the time of Farallon's site reconnaissance included a restaurant to the southwest, a vacant lot and a small warehouse building to the north, a large warehouse building to the east, Bailey Gatzert Elementary School to the south, and a multifamily residential building to the west.

Historically, north-adjacent properties were vacant from at least 1893 to 1936. From 1943 to the present, restaurants, and retail and commercial businesses, including a dry cleaner facility, have occupied the north-adjacent properties that front 12th Avenue, with a vacant lot east of the structures. From 1949 to 1953, small residential structures occupied the eastern portion of north-adjacent properties. By 1956, the residences were redeveloped into a small warehouse building that remains to the present. The east-adjacent property was depicted as a vacant lot from at least 1893 to 1943, as small residential structures from 1949 to 1953, and as a large warehouse building from at least 1956 to the present. South-, southeast- and southwest-adjacent properties have been predominantly single-family and multifamily residences, with a gradual increase in the development of commercial facilities, which included former dry cleaning facilities and an auto service and heating oil distribution station southeast and southwest of the Site, respectively, from at least 1893 to 1990. By 1990, the properties south and southeast of the Site were redeveloped into a public elementary school, and a restaurant and a coffee and smoothie shop that remain to the present were developed southwest of the Site. West-adjacent properties were predominantly single-family residences from at least 1893 to the early 1920s; a mixture of commercial and residential properties, including dry cleaning facilities from the mid-1920s to 2010; a vacant lot from 2011 to 2014; and a multifamily residential building from late 2014 to the present.

City directory listings for adjacent properties included numerous private residences, restaurants, commercial businesses, County Voting Machine Warehouse, dry cleaning facilities, and gasoline and auto service stations from the 1930s to the 1990s, and numerous private residences, commercial businesses, King County Archives, and Bailey Gatzert Elementary School from the 1990s to the present. Based on the known use of chlorinated solvents and petroleum products associated with dry cleaner facilities and auto service and gasoline service stations, the potential migration of hazardous substances to the Site from these historical facilities represents a recognized environmental condition in connection with the Site.

The Environmental Data Resources, Inc. (EDR) database report prepared for the Site (EDR report) did not identify the Site in the regulatory databases reviewed. The EDR report identified several facilities in the vicinity of the Site in various regulatory databases. Numerous facilities cross- and up-gradient of the Site were identified with known or suspected releases of hazardous substances to soil and/or groundwater from historical uses. In addition, several historical dry cleaner facilities and auto repair and service stations were identified within 250 feet of the Site. These facilities are known to use chlorinated solvents and petroleum products. Based on their topographic location and/or relative distance from the Site, the potential migration of hazardous substance from these former facilities to the Site represents a recognized environmental condition in connection with the Site. Based on their current regulatory status, topographic location, and/or distance relative to the Site, the potential for migration of hazardous substances to the Site from facilities in the vicinity of the Site represents a recognized environmental condition in connection with the Site.

Based on review of the Site history, interviews with persons knowledgeable about the Site, reconnaissance of the Site and adjacent properties, and review of regulatory agency lists, this Phase I ESA identified the following recognized environmental condition in connection with the Site:

- The potential release of hazardous substances in connection with former operations at the Site;
- The potential migration of hazardous substances to the Site from historical operations on properties in the vicinity of the Site.

1.0 INTRODUCTION

This Phase I Environmental Site Assessment (Phase I ESA) Report was prepared by Farallon Consulting, L.L.C. (Farallon) for the 12th and Yesler property at 104 through 108 12th Avenue and 1206 East Yesler Way in Seattle, Washington (herein referred to as the Site) (Figure 1). This section discusses the project authorization, and the qualifications of the Environmental Professionals conducting and reviewing the Phase I ESA work. Also included in this section are the project purpose, objective, scope of services, deviations, limiting conditions, and data gaps.

1.1 PROJECT AUTHORIZATION

This Phase I ESA Report was prepared for Spectrum Development Solutions, LLC (Spectrum) in accordance with the letter regarding Proposal for Environmental Due Diligence, 12th and Yesler, Seattle, Washington dated December 2, 2105, prepared by Farallon. The scope of work for this Phase I ESA is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13).

1.2 PROFESSIONAL QUALIFICATIONS

The Phase I ESA was conducted by Mr. Clifford Nale and was reviewed and approved by Ms. Tina Huff. Both have an understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions, and the ability to develop opinions regarding conditions indicative of a release or threatened release of hazardous substances and petroleum products. These Environmental Professionals have developed and performed all appropriate inquiry, in conformance with the standards and practices set forth in Part 312 of Title 40 of the Code of Federal Regulations. The professional qualifications of Mr. Nale and Ms. Huff are provided in Appendix A.

1.3 PROJECT PURPOSE AND OBJECTIVE

The purpose of the Phase I ESA was to identify, as practicable, recognized environmental conditions on the Site and within the appropriate study area that have caused and/or may cause an adverse environmental impact. ASTM E1527-13 is intended to permit a user to satisfy one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes “all appropriate inquiry” into the previous ownership, uses, and environmental conditions of a property consistent with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

The objective of the Phase I ESA was to perform an appropriate inquiry into past and present ownership and uses of the Site, consistent with good commercial and/or customary practice. This Phase I ESA Report is to be used as a risk management tool to meet all appropriate inquiry

requirements and the Comprehensive Environmental Response, Compensation, and Liability Act liability defense. The Phase I ESA does not guarantee that there are no impacts to the Site.

For the purpose of this Phase I ESA Report, the term “recognized environmental condition” is defined as the presence or likely presence of any hazardous substance or petroleum product in, on, or at the Site due to releases to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. The term is not intended to include “de minimis conditions” that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the applicable governmental agencies.

The term “controlled recognized environmental condition” is defined as a recognized environmental condition resulting from a past release of a hazardous substance or petroleum product that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in-place subject to implementation of required controls.

The term “historical recognized environmental condition” is defined as a past release of any hazardous substance or petroleum product that has occurred in connection with the Site and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the Site to any required controls.

1.4 PROJECT SCOPE OF SERVICES

This Phase I ESA Report has been prepared in accordance with the scope of work presented in ASTM E1527-13 and the letter regarding Proposal for Environmental Due Diligence, 12th and Yesler, Seattle, Washington dated December 2, 2105, prepared by Farallon.

The scope of work for this Phase I ESA included a records review, literature research and review, a site reconnaissance, interviews with individuals familiar with the Site, interviews with local governmental officials, and preparation of this report.

1.5 DEVIATIONS

There were no deviations from ASTM E1527-13 during the completion of this Phase I ESA, with the exception of additional environmental services requested by Spectrum, discussed in Section 9, Additional Environmental Services.

1.6 LIMITING CONDITIONS

Limiting conditions encountered during the completion of this Phase I ESA were the presence of vehicles parked on exterior portions of the Site that prevented Farallon from observing the entire ground surface of the Site, and the presence of furniture and equipment in the Site building that prevented Farallon from observing the entire interior floor surface. Based on information

obtained from the Site representative, these limiting conditions are not expected to hinder the conclusions of this report.

1.7 DATA GAPS

Data gaps may affect the ability to identify recognized environmental conditions and Farallon's ability to render opinions and conclusions for presentation in the Phase I ESA Report. Farallon did not identify significant data gaps during the completion of this Phase I ESA.

2.0 SITE OVERVIEW

This section includes an overview of the Site location, improvements, and operations. A description of adjacent and surrounding land use also is provided.

2.1 SITE LOCATION

The Site is northeast of the intersection of 12th Avenue and East Yesler Way, at 104 through 108 12th Avenue and 1206 East Yesler Way in Seattle, King County, Washington. The location is in a commercial/residential area approximately 1 mile east of downtown Seattle. The Site vicinity is shown on Figure 1.

2.2 SITE DESCRIPTION

The Site consists of King County Tax Parcel Nos. 806100-0025 and 806100-0035, which total 22,000 square feet (0.51 acre) of land. The western portion of the Site is developed with a two-story 20,000-square-foot masonry building that was constructed in 1926 and is occupied by Seattle Curtain Manufacturing Company and used for curtain manufacturing and office space. The eastern portion of the Site consists of paved parking and landscaped areas. Access to the Site is gained from East Yesler Way, south of the Site, and 12th Avenue, west of the Site.

Figure 2 presents a plan map of the Site. Additional details pertaining to the Site are provided in Section 8.2, Site Reconnaissance Observations. Site photographs are presented in Appendix B.

2.3 SITE OPERATIONS

The Site building currently is occupied by Seattle Curtain Manufacturing Company and is used for curtain manufacturing and office space. According to the King County Department of Assessments, the Site owner is Capeluto Morris.

2.4 ADJACENT AND SURROUNDING LAND USE

Adjacent properties at the time of Farallon's site reconnaissance included a restaurant to the southwest, a vacant lot and a small warehouse building to the north, a large warehouse building to the east, Bailey Gatzert Elementary School to the south; and a multifamily residential building to the west. No visual evidence of recognized environmental conditions was observed on abutting or nearby properties during the site reconnaissance. Observations were restricted to areas readily observable from the Site, and to public rights-of-way within an approximately 0.25-mile radius of the Site.

3.0 PHYSICAL SETTING

The physical setting of the Site, including topography, geology, and hydrogeology, is described in this section. Farallon's assessment of sensitive receptors in the area also is discussed.

3.1 TOPOGRAPHY

Farallon reviewed the U.S. Geological Survey (USGS) topographic map for Seattle South, Washington dated 2014 provided by Environmental Data Resources, Inc. (EDR). The map depicts the Site at an elevation of approximately 204 feet above mean sea level. The Site topography is relatively flat. Regional topography is generally flat, with a slight slope down to the south, and hills to the south and east.

3.2 GEOLOGY AND HYDROGEOLOGY

The Puget Sound region is underlain by Quaternary sediments deposited by a number of glacial episodes. Deposition occurred during a number of glacial advances and retreats, which created the existing subsurface conditions. The regional sediments consist primarily of interlayered and/or sequential deposits of alluvial clays, silts, and sands that typically are situated over deposits of glacial till that consist of silty sand to sandy silt with gravel. Outwash sediments consisting of sands, silts, clays, and gravels were deposited by rivers, streams, and post-glacial lakes during the glacial retreats. With the exception of the most-recent recessional deposits, the outwash sediments have been over-consolidated by the overriding ice sheets.

The Site is located within the Puget Lowland, a north-south trending structural and topographic depression bordered on the west by Olympic Mountains and on the east by the Cascade Mountains. Soils deposited during and between repeated glacial advances and retreats in the Pleistocene Epoch underlie the Puget Lowland. According to the published geologic map of the Site vicinity, soils underlying the Site consist of a stratified mixture of sand, gravel, and sandy silt or occasional silt. Based on recent soil and groundwater cleanup activities conducted at west-adjacent properties, subsurface conditions in the vicinity of the Site consist of interlayered sand, silty sand, and silt to approximately 20 feet below ground surface (bgs).

Groundwater migration in the Puget Sound region generally is confined to the most-recent alluvial deposits of sands and gravel. These materials are commonly underlain and occasionally overlain by relatively impermeable glacial till deposits. Lateral and vertical migration of groundwater is impeded by the dense and relatively impermeable nature of the till, and by the commonly laterally discontinuous nature of the aquifer-bearing materials. Perched and discontinuous zones of shallow groundwater may be present seasonally and locally above the impervious till. Shallow groundwater flow direction typically can be estimated by examination of surface topography or by the location of nearby surface water bodies. Based on the topography in the vicinity of the Site, groundwater flow direction is presumed to be toward the south-southeast. In addition, based on recent soil and groundwater cleanup activities conducted

at west-adjacent properties, groundwater in the vicinity of the Site is present at depths ranging from 6 to 12 feet bgs, and shallow groundwater reportedly flows generally to the southeast.

3.3 SENSITIVE RECEPTORS

Farallon conducted a limited assessment of sensitive receptors on or in the vicinity of the Site that was confined to visually apparent features such as surface water bodies (e.g., low-lying wet areas, streams, ponds) and residential and recreational areas. Farallon's assessment of sensitive receptors included a review of readily ascertainable information relating to the presence of private, semiprivate, public, and industrial water supply wells.

According to The EDR Radius Map Report with GeoCheck prepared for the Site dated December 10, 2015 (EDR report), the Site is not in a 100- or 500-year flood plain. The closest federally designated wetlands are less than 1 mile southeast of the Site. One public water supply well was identified within 0.5 mile of the Site; no privately owned water wells were identified less than 0.5 mile of the Site. The surface water body nearest to the Site is Puget Sound, approximately 1 mile west of the Site.

4.0 USER-PROVIDED INFORMATION

Farallon understands that the user of this report, Spectrum, is seeking to follow the standards set forth in ASTM E1527-13 to complete an environmental assessment of the Site. The user has specific responsibilities for fulfilling ASTM E1527-13 requirements to help identify the possibility of recognized environmental conditions in connection with the Site. These responsibilities do not require the technical expertise of an Environmental Professional, and were not performed by the Environmental Professional who conducted the Phase I ESA at the Site.

To facilitate fulfillment of the ASTM E1527-13 requirements identified below, Farallon provided Spectrum with a copy of the *Phase I ESA User Questionnaire* (User Questionnaire) to complete. The User Questionnaire is provided in Appendix C of this Phase I ESA Report.

4.1 TITLE AND LIEN RECORDS

Spectrum indicated that it was not aware of environmental liens against the Site.

4.2 EXPERIENCE AND SPECIALIZED KNOWLEDGE

Spectrum indicated that it has no experience or specialized knowledge regarding the Site.

4.3 COMMONLY KNOWN INFORMATION

Spectrum indicated that it is not aware of commonly known information that would lead to identification of recognized environmental conditions in connection with the Site.

4.4 PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT USERS

Spectrum will rely on this Phase I ESA Report.

4.5 PREVIOUS ENVIRONMENTAL STUDIES

Farallon was not provided with previous reports pertaining to environmental studies at the Site. Farallon was provided with a Final Cleanup Action Report dated January 23, 2009 prepared by GeoEngineers, Inc. for the Seattle Housing Authority (2009 Report), the west-adjacent property. The 2009 Report summarized soil and groundwater cleanup activities conducted at the west-adjacent property known as the 12th Avenue Brownfield Cleanup Site at 109 through 117 12th Avenue, Seattle, Washington. The facility had confirmed soil and groundwater contamination consisting of gasoline-, diesel- and heavy oil-range petroleum hydrocarbons, benzene, ethylbenzene, toluene, xylenes, naphthalene, tetrachloroethene, trichloroethene, vinyl chloride, 1,2-dichloroethene, cis-1,2-dichloroethene, and 1,2-dichloropropane. Soil and groundwater contamination was related to leaking underground storage tanks (USTs) used to store heating oil and dry cleaning chemicals historically used at the facility. Site assessment investigations and remedial cleanup of contaminated soil and groundwater conducted from 2005 through 2009

resulted in Ecology's issuing a No Further Action determination for the property on May 10, 2010. Additional information regarding west-adjacent properties is provided in Section 6.2, Adjacent and Other Facility Listings.

5.0 SITE BACKGROUND AND HISTORY

Farallon reviewed the following historical sources during the completion of this Phase I ESA:

- Aerial photographs of the Seattle, Washington area dated 1936, 1943, 1953, 1956, 1965, 1969, 1977, 1980, 1985, 1990, 2006, 2009, and 2011 obtained from EDR; and dated 2012 through 2015 obtained from Google Earth;
- USGS topographic maps of Seattle, Washington dated 1894, 1897, 1908, and 1909; of Snohomish, Washington dated 1895; and of Seattle South dated 1968, 1973, 1983, and 2014 obtained from EDR;
- Cole Information Services and Polk City Directories of Seattle, Washington dated 1920, 1925, 1930, 1935, 1940, 1944, 1951, 1955, 1960, 1966, 1970, 1971, 1975, 1977, 1980, 1981, 1985, 1986, 1990, 1991, 1996, 2005, 2008, and 2013 obtained from EDR; and
- Sanborn Fire Insurance Maps for the Site dated 1893, 1904, 1905, 1916, 1949, 1950, and 1969 obtained from EDR.

Farallon is not responsible for the accuracy or completeness of the historical sources reviewed. The historical sources documented were reasonably ascertainable and practically reviewable during the completion of this Phase I ESA.

5.1 SITE

The Site was depicted on Sanborn Fire Insurance Maps as a vacant lot from at least 1893 to 1926. By 1926, the current one-story masonry building was depicted on the western portion of the Site, and the eastern portion remained vacant. In the 1953 aerial photograph, the eastern portion of the Site was depicted as a paved parking lot, which has remained to the present. City directory listings for the Site address included an auto dealer, a garage, and an auto paint shop in 1930; Twelfth Avenue Skating, and Coles Horticultural Products and Fertilizer Manufactures in 1940; the Washington Training Center for the Blind from at least 1949 to 1960; Atlas Salvage and Surplus Foods, Inc. in 1951; Handerest Inc. Neckwear Manufacturer and Basket Dealer from at least 1951 to 1960; T & T Foods in 1966, Reds – IGA Foods and Meats from at least 1955 to 1960; Yesler Tom Boy Groceries from at least 1970 to 1975; and Seattle Curtain Manufacturing Company from at least 1966 to the present. Based on the historical uses of the Site as an auto garage and painting facility and a fertilizer manufacturer, the potential release of hazardous substances in connection with former operations at the Site represents a recognized environmental condition in connection with the Site.

5.2 ADJACENT PROPERTIES

North-adjacent properties were vacant from at least 1893 to 1936. From 1943 to the present, retail and commercial businesses, restaurants, and a dry cleaning facility occupied the north-adjacent properties that front 12th Avenue, with a vacant lot east of the structures. From 1949 to

1953, small residential structures occupied the eastern portion of the north-adjacent properties. By 1956, the residences were redeveloped into a small warehouse building that remains to the present. The east-adjacent property was depicted as a vacant lot from at least 1893 to 1943, as small residential structures from 1949 to 1953, and as a large warehouse building from at least 1956 to the present. South-, southeast- and southwest-adjacent properties have been predominantly single-family and multifamily residences with a gradual increase in the development of commercial facilities, which included former dry cleaning facilities and an auto service and heating oil distribution station southeast and southwest of the Site, respectively, from at least 1893 to 1990. By 1990, the properties south and southeast of the Site were redeveloped into a public elementary school, and a restaurant and a coffee and smoothie shop that remain to the present were developed southwest of the Site. West-adjacent properties were predominantly single-family residences from at least 1893 to the early 1920s; a mixture of commercial and residential properties, including dry cleaning facilities from the mid-1920s to 2010; a vacant lot from 2011 to 2014; and a multifamily residential building from late 2014 to the present.

City directory listings for adjacent properties included numerous private residences, restaurants, commercial businesses, County Voting Machine Warehouse, dry cleaning facilities, and gasoline and auto service stations from the 1930s to the 1990s, and numerous private residences, commercial businesses, King County Archives, and Bailey Gatzert Elementary School from the 1990s to the present. Based on the known use of chlorinated solvents and petroleum products associated with dry cleaner facilities and auto repair and gasoline service stations, the potential migration of hazardous substances to the Site from these historical facilities represents a recognized environmental condition in connection with the Site. Additional information regarding adjacent properties is provided in Section 6.2, Adjacent and Other Facility Listings.

5.3 PUGET SOUND REGIONAL ARCHIVES

Farallon reviewed historical records for the Site at the Puget Sound Regional Archives at Bellevue College in Bellevue, Washington. According to historical assessor information reviewed by Farallon, the Site building was constructed in 1926 and was identified by the addresses 104, 106, and 108 12th Avenue South and 1206 East Yesler Way. Photo documentation on historical assessor data sheets indicated that the first level of the southeastern portion of the Site building was occupied by an auto dealer, garage with wash bay, and an auto paint shop in the late 1920s to mid-1930s, and by grocery and meat markets in the late 1950s to mid-1960s and in the 1980s. The paved parking lot on the eastern portion of the Site was constructed in 1953.

6.0 REGULATORY REVIEW

EDR conducted a review of environmental regulatory agency database listings to identify reported environmental issues related to the Site and facilities in the Site vicinity. Farallon used the greater of each approximate minimum search distance from the Site for each of the referenced federal and state environmental databases, as specified in ASTM E1527-13.

Farallon reviewed the results of the EDR report to note reported facilities in the vicinity of the Site that were considered to have a potential to adversely impact the Site (i.e., are known to have resulted in or are expected to result in a recognized environmental condition). Reported facilities identified in the EDR report were evaluated with respect to the nature and extent of a given release, the distance of the reported facility from the Site, the stratigraphy of soils, the expected soil permeability, and the topographic position of a reported facility with respect to known or expected local and/or regional groundwater flow direction.

At the request of Spectrum, Farallon performed environmental services in addition to those identified in ASTM E1527-13, including a Tier 1 Vapor Encroachment Screening (VES) in accordance with ASTM E2600-10, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*.

The descriptions of the databases searched, the complete database names for the abbreviations used in this Phase I ESA Report, and the associated search distances from the Site are provided in the EDR report presented in Appendix D.

6.1 ON-SITE LISTINGS

The Site was not identified in the environmental regulatory agency databases reviewed by EDR. Farallon searched the Washington State Department of Ecology (Ecology) Toxics Cleanup Program database (Ecology database) for the Site address, but found no listings.

6.2 ADJACENT AND OTHER FACILITY LISTINGS

Reported facilities within 0.25 mile up-gradient, 0.125 mile cross-gradient, or adjacent down-gradient of the Site are considered to have a potential to have impacted the Site. Facilities that were listed in the database search report but not identified as a reported facility (e.g., a facility listed as a hazardous waste generator but not as having had a release) and facilities that were listed as “Closed” were not considered to have a potential to have impacted the Site.

- **Robertson’s Laundry and Dry Cleaners** at 118 12th Avenue, north-adjacent to the Site and at a higher topographic elevation, was identified in the Historical Cleaners database. According to the EDR report, this facility was a cleaner and dyer from at least 1966 to 1970, with no reported violations. Farallon searched the Ecology database for the facility, but found no records. Because dry cleaning operations are known to use chlorinated solvents, the potential migration of hazardous substances from historical operation at this

facility to the Site represents a recognized environmental condition in connection with the Site.

- **Crane's Cleaners/Nu Way Cleaners/Dick's Central Cleaners/Seattle Housing Authority 12th Ave Brownfield Cleanup** at 109 through 117 12th Avenue, west-adjacent to the Site and at an equal topographic elevation, was identified in the VCP, Brownfields, ALLSITES, FINDS, CSCSL NFA, Historical Cleaners and UST databases. According to the EDR report, a 2,200-square-foot single-story building was constructed on this property in 1931. The structure was steam-heated by an oil-fired burner whose fuel was stored in a UST at the western end of the building. The original building was owned by E.A. Crane, who ran a dry cleaning business called Crane's Cleaners. By the 1960s, the business was called Nu Way Cleaners. The name of this business may have been changed to Dick's Central Cleaners in the 1980s, although the city directories reviewed listed 115 12th Avenue as the address for Dick's Cleaners. Three vent pipes for USTs were observed in back of the building, and a 4-inch vent was observed near the northwestern corner of the building. It is likely that the vents were connected to USTs that stored dry cleaning fluids such as Stoddard solvent and perchloroethylene, and heating oil fuel. Site investigations and remedial cleanup of contaminated soil and groundwater conducted from 2005 through 2009 resulted in Ecology's issuing a No Further Action determination for this property on May 10, 2010. Ecology determined that soil and groundwater has been remediated to satisfy the MTCA A cleanup levels. Based on the information provided in the EDR report and the Ecology database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site. Additional information regarding west-adjacent properties is provided in Section 4.5, Previous Environmental Studies.
- **Maxwell Petroleum Corporation/Herb's Texaco Service Station/Pancho's Automotive/Twelfth Avenue Station Oil Change/Frank's Avenue Station** at 130 12th Avenue, approximately 130 feet north of the Site and at a higher topographic elevation, was identified in the Historical Auto Stations database. According to the EDR report, the facility was a gasoline and oil service station from at least 1944 to 1980. Farallon searched the Ecology database for this facility, but found no records. Because auto and gasoline station operations are known to use chlorinated solvents and petroleum products, the potential migration of hazardous substances from historical operations at this facility to the Site represents a recognized environmental condition in connection with the Site.
- **H and I Auto Service/National Auto Body & Repair/Universal Auto Service/TD Auto Body & Repair** at 1209 East Fir Street, approximately 200 feet north of the Site and at a higher topographic elevation, was identified in the Historical Auto Station, HSL, CSCSL, ALLSITES, and FINDS databases. According to the EDR report, the facility was an automobile repair facility from at least 1955 to 2009. Farallon searched the Ecology database for this facility, which indicated that the facility had suspected soil and surface water contamination from metals, non-halogenated solvents, and unspecified petroleum products in 1993. In 2001, Ecology listed the facility in the HSL. No other information was located. Based on the information provided in the EDR report and the Ecology

database, its current regulatory status and topographic location and distance relative to the Site, this facility represents a recognized environmental condition in connection with the Site.

- **Twelfth Avenue Service Station/Roy's Auto Rebuild/Gregory Repair** at 150 12th Avenue, approximately 240 feet north of the Site and at a higher topographic elevation, was identified in the Historical Auto Stations database. According to the EDR report, the facility was a gasoline and automobile service station from at least 1925 to 1970. The facility was depicted on the 1969 Sanborn Fire Insurance Map with a typical fuel dispenser island and canopy. Farallon searched the Ecology database for the facility, but found no records. Because auto and gasoline station operations are known to use chlorinated solvents and petroleum products, the potential migration of hazardous substances from historical operations at the facility to the Site represents a recognized environmental condition in connection with the Site.
- **Star Laundry Inc./Gregory Repair** at 160 12th Avenue, approximately 300 feet north of the Site and at a higher topographic elevation, was identified in the CSCSL, ALLSITES, Historical Auto Station, and Historical Cleaners databases. According to the EDR report, the facility was an automobile repair station in 1975, and operated as a dry cleaning facility from at least 1975 to 1988. Numerous investigations conducted at the facility from 2002 to 2014 indicated that soil and groundwater have been contaminated by gasoline- and diesel-range petroleum hydrocarbons, benzene, tetrachloroethene, trichloroethene, vinyl chloride, and cis-1,2-dichloroethene. Farallon searched the Ecology database for the facility, which indicated that the facility is “awaiting cleanup.” Therefore, the potential migration of hazardous substances from historical operations at the facility to the Site represents a recognized environmental condition in connection with the Site.
- **Lloyd's Rocket & Heating Oil Company** at 110 Boren Avenue South, approximately 250 feet southwest of the Site and at a higher topographic elevation, was identified in the CSCSL, LUST, UST, ICR, ALLSITES, and Historical Auto Stations databases. According to the EDR report, the facility was a gasoline service station from at least 1951 to 1990. Farallon searched the Ecology database for the facility, which indicated that six USTs were removed in 1997. Numerous investigations conducted at the facility from 1997 to 2004 indicated that soil and groundwater have been contaminated by gasoline- and diesel-range petroleum hydrocarbons, benzene, ethylbenzene, toluene, and xylenes. Farallon searched the Ecology database for the facility, which indicated that the facility is “awaiting cleanup,” and the facility's Voluntary Cleanup Program agreement with Ecology was terminated in 2009 due to inactivity. Farallon has actual knowledge regarding this facility, and groundwater likely does not flow towards the Site; however, due to the contaminants present in soil and groundwater, the potential migration of hazardous substances from historical operations at the facility represents a recognized environmental condition in connection with the Site.
- **Spencer S Service Station/B & B Auto Repair Seattle** at 151 12th Avenue, approximately 250 feet northwest of the Site and at a higher topographic elevation, was identified in the CSCSL NFA, UST, VCP, ALLSITES, and Historical Auto Stations

databases. According to the EDR report, the facility was a gasoline and automotive service station from at least 1930 to 2009. Farallon searched the Ecology database for this facility, which indicated that the facility had been used for retail gasoline sales and automotive service since 1921, and two USTs operated at the facility. Site investigations and remedial cleanup of contaminated soil and groundwater conducted from 2005 through 2012 resulted in Ecology's issuing a No Further Action determination for this property in November 2012. Based on the information provided in the EDR report and the Ecology database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.

6.3 HISTORICAL AUTO STATIONS

Reported historical auto and gasoline stations within 250 feet of the Site are considered to have a potential to have impacted the Site. The EDR report identified six historical auto stations, including former retail gasoline stations and/or auto repair facilities, less than 250 feet from the Site and at equal or higher elevations. These facilities have been summarized in Section 6.2, Adjacent and Other Facility Listings. Although not all of these facilities have been identified by regulatory agencies as having a reported release or notice of violation, auto and gasoline station operations are known to use chlorinated solvents and petroleum products. Therefore, the potential migration of hazardous substances from these former facilities to the Site represents a recognized environmental condition in connection with the Site.

6.4 HISTORICAL DRY CLEANERS

Reported historical dry cleaner facilities within 250 feet of the Site are considered to have a potential to have impacted the Site. The EDR report identified 10 historical dry cleaner facilities within 250 feet of the Site and at equal or higher elevations. However, 5 of the facilities are related to the **Crane's Cleaners/Nu Way Cleaners/Dick's Central Cleaners/Seattle Housing Authority 12th Ave Brownfield Cleanup** on the west-adjacent property, which received a No Further Action determination from Ecology on May 10, 2010, as summarized in Section 6.2, Adjacent and Other Facility Listings. Although the former dry cleaning facilities north-adjacent to the Site and east-southeast of the Site have not been identified by regulatory agencies as having a reported release or notice of violation, dry cleaning facilities are known to use chlorinated solvents, the potential migration of hazardous substances from these former facilities to the Site represents a recognized environmental condition in connection with the Site.

6.5 UNMAPPABLE LISTINGS

EDR identified 18 facilities as "orphan sites" that EDR was unable to map due to inaccurate or inadequate address information. Farallon located these orphan sites and, according to the addresses provided by EDR, the facilities are not located within the respective search radii. The orphan sites located do not represent a recognized environmental condition in connection with the Site.

6.6 TIER 1 VAPOR ENCROACHMENT SCREENING

At the request of Spectrum, Farallon performed environmental services in addition to those identified in ASTM E1527-13, including a Tier 1 VES in accordance with ASTM E2600-10, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. The purpose of the VES was to identify the potential for hazardous substances to migrate to the Site as vapors. The purpose of the VES was to identify VECs, which are the presence or likely presence of hazardous substances as vapors in the subsurface at a site or at properties in the vicinity of a site that have the potential to impact the site and may require evaluation of vapor intrusion into structures on the site. The EDR report identified several facilities in the vicinity of the Site in various regulatory databases as discussed above. Based on the current regulatory status, topographic location, and/or distance of these facilities relative to the Site, VECs from these facilities have the potential to impact the Site and cannot be ruled out.

7.0 INTERVIEWS

Farallon conducted interviews with individuals familiar with the Site and contacted relevant local governmental agencies to obtain additional Site information. The responses from the parties contacted are provided below.

7.1 INTERVIEW WITH SITE REPRESENTATIVE

During the site reconnaissance, Farallon interviewed the tenant of the Site building and a representative of Spectrum on December 10, 2015. The following information was obtained from this interview:

- No known aboveground storage tanks (ASTs) or USTs are present on the Site.
- Curtain manufacturing operations do not include cleaning of the materials.
- Hazardous materials on the Site generally consist of janitorial cleaning supplies and maintenance materials.
- Utilities are provided by the local municipality. A boiler is present on the first floor of the building.
- No reportable spills or releases have occurred on the Site.

The Site building tenant stated that she had not been made aware of any pending, threatened, or past:

- Litigation relevant to hazardous substances or petroleum products in, on, or from the Site;
- Administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site; or
- Notices from a governmental entity regarding violations of environmental laws or liability relating to hazardous substances or petroleum products.

7.2 INTERVIEW WITH FIRE DEPARTMENT

Farallon contacted the Seattle Fire Department on December 10, 2015 regarding previous and current ASTs and USTs at the Site. No response from the Seattle Fire Department was received prior to completion of this Phase I ESA Report.

7.3 INTERVIEW WITH CITY

Farallon contacted the City of Seattle on December 10, 2015 to inquire whether notices of violations and/or reported hazardous spills at the Site were on file, and regarding previous and current ASTs and USTs at the Site. No response from the City of Seattle was received prior to completion of this Phase I ESA Report.

7.4 INTERVIEW WITH HEALTH DEPARTMENT

Farallon contacted Public Health – Seattle & King County on December 10, 2015 to inquire whether notices of violations and/or reported hazardous spills at the Site were on file. No response from Public Health – Seattle & King County was received prior to completion of this Phase I ESA Report.

8.0 SITE RECONNAISSANCE

Farallon conducted a site reconnaissance on December 10, 2015 to observe the Site for physical evidence of recognized environmental conditions. The methodology used for the site reconnaissance and the observations made during the reconnaissance are discussed below. A description of the Site is provided in Section 2.2, Site Description. Photographs taken during the site reconnaissance are presented in Appendix B.

8.1 SITE RECONNAISSANCE METHODOLOGY

Farallon completed a walk around the accessible exterior areas of the Site and inspected accessible interior portions of the Site building. Limiting conditions encountered during the completion of the Phase I ESA were the presence of vehicles parked on exterior portions of the Site that prevented Farallon from observing the entire ground surface of the Site, and the presence of furniture and equipment in the Site building that prevented Farallon from observing the entire interior floor surface. Based on information obtained during completion of this report, these limiting conditions are not expected to hinder the conclusions of this report.

8.2 SITE RECONNAISSANCE OBSERVATIONS

Weather conditions at the time of the reconnaissance were rainy, with a temperature of approximately 40 degrees Fahrenheit. No weather-related Site-access restrictions were encountered during the reconnaissance.

The Site consists of King County Tax Parcel Nos. 806100-0025 and 806100-0035, which total 22,000 square feet (0.51 acre) of land. The western portion of the Site is developed with a two-story 20,000-square-foot masonry building that was constructed in 1926 and is occupied by Seattle Curtain Manufacturing Company and used for curtain manufacturing and office space. The eastern portion of the Site consists of paved parking and landscaped areas. Access to the Site is gained from East Yesler Way, south of the Site, and 12th Avenue, west of the Site.

8.2.1 Interior Observations

Farallon's observations of the interior of the Site building during the site reconnaissance are documented in the table below. Comments pertaining to notable interior observations follow in Section 8.2.2. Photographs taken during the site reconnaissance are provided in Appendix B.

INTERIOR OBSERVATIONS	YES	NO
Odor		X
Heating/Cooling System	X	
Drain(s) and/or Sump(s)	X	
Staining and/or Corrosion		X

INTERIOR OBSERVATIONS	YES	NO
Storage Tank(s), Vent Pipe(s), Fuel Port(s), and/or Fill Pipes		X
Clarifier(s)		X
Discharge Area		X
Drum(s) and/or Other Container(s)		X
Pool(s) of Liquid		X
Automobile Lift(s)		X
Monitoring Well(s)		X
Hazardous Material(s) and/or Petroleum Product(s)	X	
Hazardous Waste		X

8.2.2 Interior Observation Comments

Heating/Cooling System

The Site building is heated by natural gas and steam, which is provided by Seattle City Light. Farallon observed a boiler on the first floor of the building.

Drain(s) and/or Sump(s)

Farallon observed a floor drain in the southeastern corner of the building near the bay door entrance to the building.

Hazardous Material(s) and/or Petroleum Product(s)

At the time of the site reconnaissance, Farallon observed minor amounts of hazardous materials, including janitorial cleaning supplies and maintenance-related products such as 1-gallon containers of paint, aerosol cans of paint, and WD-40. The materials were observed to be properly labeled and stored in containers of 1 gallon or less in designated areas of the building. No staining or evidence of releases was observed in or around the containers at the time of the site reconnaissance.

8.2.3 Exterior Observations

Farallon's observations of the exterior of the Site during the site reconnaissance are documented in the table below. Comments pertaining to notable exterior observations follow in Section 8.2.4. Photographs taken during the site reconnaissance are provided in Appendix B.

EXTERIOR OBSERVATIONS	YES	NO
Odor		X
Staining and/or Corrosion	X	

EXTERIOR OBSERVATIONS	YES	NO
Storage Tank(s), Vent Pipe(s), and/or Fuel Port(s)		X
Drum(s) and/or Other Container(s)		X
Pool(s) of Liquid		X
Hazardous Material(s) and/or Petroleum Product(s)		X
Hazardous Waste		X
Pit(s), Pond(s), and/or Lagoon(s)		X
Stressed Vegetation		X
Solid (Non-Hazardous) Waste—Evidence of Dumping		X
Wastewater		X
Domestic Water	X	
Water Well(s)		X
Septic/Sewer System	X	
Stormwater	X	
Transformer(s)		X
Significant Amount of Fill Material		X

8.2.4 Exterior Observation Comments

Staining and/or Corrosion

Farallon observed de minimis petroleum staining throughout paved areas of the Site that appeared to be from parked vehicles on the Site.

Domestic Water

Domestic water is supplied to the Site building by the City of Seattle.

Septic/Sewer System

Sanitary sewage generated at the Site discharges to the municipal sanitary sewer system.

Stormwater

Stormwater on the Site is directed into catch basins in adjacent streets, which discharge to the City of Seattle stormwater system.

9.0 ADDITIONAL ENVIRONMENTAL SERVICES

Farallon performed additional environmental services at the request of Spectrum. These services are considered non-scope items and are not required to satisfy ASTM E1527-13.

9.1 RADON

Radon is a colorless, tasteless, radioactive gas with a U.S. Environmental Protection Agency (EPA)-specified action level of 4.0 picocuries per liter (pCi/L) of air. Radon gas has a very short half-life of 3.8 days. The health-risk potential of radon is associated with its rate of accumulation in confined areas, particularly in confined areas near or in the ground such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways.

According to the EDR report, the Site is in Radon Zone 3, having a predicted average indoor radon screening level of less than 2 pCi/L. The EPA zone designation reflects the average short-term radon measurement that can be expected to be measured in a building without implementation of radon-control methods. Based on the Site location, radon is not expected to impact persons occupying the Site.

9.2 WATER SUPPLY/LEAD IN DRINKING WATER

Potable water is supplied to the Site by the City of Seattle, who conducts annual testing of its groundwater supply. The most-recent water supply data available are from 2014. Contaminants tested were under the Maximum Contaminant Levels established by EPA.

9.3 FEMA FLOOD MAP

Farallon reviewed Federal Emergency Management Agency Flood Insurance Map 53033C0630F dated May 16, 1995 provided in the EDR report. According to this source, the Site is not in a 100- or 500-year flood plain.

9.4 TIER 1 VAPOR ENCROACHMENT SCREENING

At the request of Spectrum, Farallon performed environmental services in addition to those identified in ASTM E1527-13, including a Tier 1 VES in accordance with ASTM E2600-10, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. The purpose of the VES was to identify potential for hazardous substances to migrate to the Site as vapors. The purpose of the VES was to identify VECs. The EDR report identified several facilities in the vicinity of the Site in various regulatory databases, as discussed in Section 6, Regulatory Review. Based on the current regulatory status, topographic location, and/or distance of these facilities relative to the Site, VECs from these facilities have the potential to impact the Site and cannot be ruled out.

10.0 FINDINGS AND OPINIONS

City directory listings for the Site address included an auto dealer, a garage, and an auto paint shop in 1930; Twelfth Avenue Skating and Coles Horticultural Products and Fertilizer Manufactures in 1940; the Washington Training Center for the Blind from at least 1949 to 1960; Atlas Salvage and Surplus Foods, Inc. in 1951; Handerest Inc. Neckwear Manufacturer and Basket Dealer from at least 1951 to 1960; T & T Foods in 1966, Reds – IGA Foods and Meats from at least 1955 to 1960; Yesler Tom Boy Groceries from at least 1970 to 1975; and Seattle Curtain Manufacturing Company from at least 1966 to the present. Based on the historical uses of the Site as an auto garage and painting facility and a fertilizer manufacturer, the potential release of hazardous substances in connection with former operations at the Site represents a recognized environmental condition in connection the Site.

Farallon observed de minimis petroleum staining throughout paved areas of the Site that appeared to be from parked vehicles on the Site.

Several historical dry cleaner facilities and auto repair and service stations were identified within 250 feet of the Site. These facilities are known to use chlorinated solvents and petroleum products. Based on their topographic location and/or relative distance from the Site, the potential migration of hazardous substances from these former facilities to the Site represents a recognized environmental condition in connection with the Site.

The EDR report identified several facilities in the vicinity of the Site in various regulatory databases. Numerous facilities cross- and up-gradient of the Site were identified with known or suspected releases of hazardous substances to soil and/or groundwater from historical uses. Based on their current regulatory status, topographic location, and/or distance relative to the Site, the potential for migration of hazardous substances to the Site from facilities in the vicinity of the Site represents a recognized environmental condition in connection with the Site.

11.0 CONCLUSIONS

Farallon conducted a Phase I ESA for the 12th and Yesler property at 104 through 108 12th Avenue and 1206 East Yesler Way in Seattle, Washington in conformance with the scope and limitations of ASTM E1527-13. Any exceptions to or deletions from this practice are described in Section 1.5, Deviations.

This assessment identified the following recognized environmental condition in connection with the Site:

- The potential release of hazardous substances in connection with former operations at the Site;
- The potential migration of hazardous substances to the Site from historical operations on properties in the vicinity of the Site.

13.0 STATEMENT OF LIMITATIONS

13.1 GENERAL LIMITATIONS

The conclusions contained in this report/assessment are based on professional opinions with regard to the subject matter. These opinions have been arrived at in accordance with currently accepted hydrogeologic and engineering standards and practices applicable to this location. The conclusions contained herein are subject to the following inherent limitations:

- **Accuracy of Information.** Farallon obtained, reviewed, and evaluated certain information used in this report/assessment from sources that were believed to be reliable. Farallon's conclusions, opinions, and recommendations are based in part on such information. Farallon's services did not include verification of its accuracy or authenticity. Should the information upon which Farallon relied prove to be inaccurate or unreliable, Farallon reserves the right to amend or revise its conclusions, opinions, and/or recommendations.
- **Reconnaissance and/or Characterization.** Farallon performed a reconnaissance and/or characterization of the Site that is the subject of this report/assessment to document current conditions. Farallon focused on areas deemed more likely to exhibit hazardous materials conditions. Contamination may exist in other areas of the Site that were not investigated or were inaccessible. Site activities beyond Farallon's control could change at any time after the completion of this report/assessment.

For the foregoing reasons, Farallon cannot and does not warrant or guarantee that the Site is free of hazardous or potentially hazardous substances or conditions, or that latent or undiscovered conditions will not become evident in the future. Farallon's observations, findings, and opinions can be considered valid only as of the date of the report hereof.

This report/assessment has been prepared in accordance with the contract for services between Farallon and Spectrum Development Solutions, LLC, and currently accepted industry standards. No other warranties, representations, or certifications are made.

13.2 LIMITATION ON RELIANCE BY THIRD PARTIES

Reliance by third parties is prohibited. This report/assessment has been prepared for the exclusive use of Spectrum Development Solutions, LLC to address the unique needs of Spectrum Development Solutions, LLC at the Site at a specific point in time. Services have been provided to Spectrum Development Solutions, LLC in accordance with a contract for services between Farallon and Spectrum Development Solutions, LLC, and generally accepted environmental practices for the subject matter at the time this report was prepared.

No other party may rely on this report unless Farallon agrees in advance to such reliance in writing. Any use, interpretation, or reliance upon this report/assessment by anyone other than

Spectrum Development Solutions, LLC is at the sole risk of that party, and Farallon will have no liability for such unauthorized use, interpretation, or reliance.

Do not rely on this report/assessment if:

- It was not prepared for you;
- It was not prepared for your project;
- It was not prepared for your specific Site; or
- It was not prepared under an approved scope of work for which you are under contract with Farallon.

CLIFFORD NALE

Project Geologist

BS Engineering Geology

20 years experience

Mr. Nale is a licensed geologist in the State of California and State of Washington with over 20 years of professional experience that includes management, oversight, and review of hundreds of All Appropriate Inquiries- and ASTM International Standard-compliant Phase I Environmental Site Assessments and other environmental assessments related to Sites with contaminated soil and groundwater issues. He has also managed and prepared Environmental Impact Reports for numerous transportation and development projects throughout California.

TINA M. HUFF

Principal Regulatory Specialist

BA Environmental Studies

14 years experience

Ms. Huff has a broad range of experience with environmental due diligence and regulatory requirements. She manages and conducts environmental due diligence for property transactions, including Phase I ESAs, risk assessment audits, environmental compliance audits, and Phase II Site Investigations throughout the western United States. She is Asbestos Hazard Emergency Response Act-certified for asbestos, and has completed training for ASTM E1527-13 Phase I ESA protocol and for mold in construction. Ms. Huff has certificates in Dangerous Waste Management and Occupational Safety and Health Administration Compliance.

USER QUESTIONNAIRE

PHASE I
ENVIRONMENTAL SITE ASSESSMENT REPORT
12th and Yesler Property:
104 through 108 12th Avenue and
1206 Yesler Way
Seattle, Washington

Farallon PN: 1200-003

PHASE I ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the Phase I Environmental Site Assessment (Phase I ESA) Report user must provide the following information (if available) to the environmental professional (Farallon Consulting, L.L.C.). Failure to provide this information could result in the determination that "all appropriate inquiry" has not been completed.

Date: 12/28/15

■ PROJECT/SITE INFORMATION

Client Name: Spectrum Development Solutions LLC Client Telephone: 206 535 2499

Client Address: 1809 7th Ave Suite 501

Asset #: Project/Site Name: Curtain Shop Site

Project Street Address: 104 12th Avenue

City: Seattle County: King State: WA Zip: 98122

Why is this Phase I ESA required?

Property Transaction:

☐ Sale ☒ Purchase ☐ Exchange ☐ Other

Comments:

■ PROPERTY USE & SPECIFICATIONS

☐ Single-Family Residential ☐ Vacant or Undeveloped Land

☐ Multi-Family Residential #Units: 156 ☐ Agricultural (*Specify type*):

☒ Commercial Office ☐ Industrial (*Specify type*):

☐ Commercial Retail ☐ Other (*Specify type*):

Provide a general Site description: Current use on site is a Curtain Shop where curtains and draperies are manufactured. Intended use will be as a new 156 unit multifamily development with ground floor commercial.

Legal description/plat plan/boundary survey available? ☐ Yes ☒ No ☐ Already provided

Current Property Status: ☐ Vacant ☒ Occupied ☐ Improved ☐ Unimproved

Total Property Size: 22,000 SF Original Construction Date: Unknown

Total # of Buildings: 1 Was Construction Phased? ☐ Yes ☐ No ☒ Unknown

Total Sq. Ft. of Buildings: 10,000 Date(s) of Renovation(s)/Phases: Unknown

Does Site have an undeveloped area equal to 1 acre or more? ☐ Yes ☒ No

Are any bodies of water on or immediately adjacent to the Site? ☐ Yes ☒ No If Yes, describe:
Comments:

Potable water source at Site? ☐ On-Site well ☒ Utility (*Specify provider*) SPU

Wastewater discharge at Site? ☐ Septic Tank/Drainfield ☒ Sanitary Sewer ☐ Other (*Specify*):

Building plans available at the Site? ☐ Yes ☒ No ☐ Unknown ☐ Already provided

■ OWNERS

Current Owner(s): Morris Capeluto

Previous Owner(s): Unknown

■ OCCUPANTS/TENANTS

Current Occupant(s)/Tenant(s) and operations: Curtain shop for the manufacturing of curtains and blinds.

Previous Occupant(s)/Tenant(s) and operations: Unknown

■ PREVIOUS PROPERTY USES

Describe previous use(s) of the Site: Unknown

■ PREVIOUS INVESTIGATIONS

Has any previous environmental investigation been conducted at Site? ☐ Yes ☒ No ☐ Unknown

If Yes, note type and describe: ☐ Phase I ESA ☐ Asbestos ☐ Lead Paint ☐ Lead in Water

☐ Radon ☐ Wetlands ☐ Indoor Air ☐ UST/AST ☐ Other (*Specify type below*)
Comments:

■ ON-SITE ENVIRONMENTAL CONDITIONS

Are you aware of any of the following environmental conditions at the Site, either current or former?

Environmental Condition/Issue	Response	Comment if Yes Response
Aboveground Storage Tank	☐ Yes ☒ No	
Underground Storage Tank	☐ Yes ☒ No	
Hazardous/Toxic Substance	☐ Yes ☒ No	
Stored Chemical	☐ Yes ☒ No	
Chemical Spill/Release	☐ Yes ☒ No	
Dump Area/Landfill	☐ Yes ☒ No	
Waste Treatment System	☐ Yes ☒ No	
Wastewater Discharge	☐ Yes ☒ No	
Air Stack/Vent/Odor	☐ Yes ☒ No	
Indoor Air Quality Complaint	☐ Yes ☒ No	

Floor Drain/Sump	☒ Yes ☐ No	Floor drains were viewed on-site
Pit, Pond, Lagoon	☐ Yes ☒ No	
Stained Soil/Vegetation Impact	☐ Yes ☒ No	

Other specialized knowledge of an environmental condition or issue at the Site?
None

■ ADDITIONAL ON-SITE ENVIRONMENTAL CONDITIONS

Are you aware of any of the following environmental conditions on the Site, either current or former?

Environmental Condition/Issue	Response	Comment if Yes Response
Pesticide/Herbicide Use	☐ Yes ☒ No	
Polychlorinated Biphenyls	☐ Yes ☒ No	
Electrical Transformer	☐ Yes ☒ No	
Hydraulic Lift	☐ Yes ☒ No	
Elevator	☐ Yes ☒ No	
Drycleaner Business	☐ Yes ☒ No	
Asbestos	☐ Yes ☒ No	
Lead Paint	☐ Yes ☒ No	
Lead Piping/Lead in Water	☐ Yes ☒ No	
Elevated Radon Level	☐ Yes ☒ No	
Fluorescent Light Fixture	☐ Yes ☒ No	
Wetland, Flooding	☐ Yes ☒ No	
Unique Wildlife Species	☐ Yes ☒ No	
Archeological Resource	☐ Yes ☒ No	
Historic/National Landmark	☐ Yes ☒ No	
Oil/Gas Well	☐ Yes ☒ No	
Water Well	☐ Yes ☒ No	
Environmental Cleanup	☐ Yes ☒ No	
Environmental Permit	☐ Yes ☒ No	

■ OFF-SITE ENVIRONMENTAL CONDITIONS

On adjoining property, are there any: Gasoline Stations? ☐ Yes ☒ No Drycleaners? ☐ Yes ☒ No

Are you aware of any other environmental conditions or concerns on adjacent or nearby properties?
☒ Yes ☐ No

Comments

The project across 12th Avenue (103 12th Avenue) has a No Further Action letter from DOE due to previous cleanup of a drycleaner.

(1) Environmental cleanup liens that have been filed or recorded against the Site (Part 312.25 of Title 40 of the Code of Federal Regulations [40 CFR 312.25])

Are you aware of any environmental cleanup liens against the Site that have been filed or recorded under federal, tribal, state, or local law?

No

(2) Activity and land use limitations that are in place at the Site or that have been filed or recorded in a registry (40 CFR 312.26)

Are you aware of any activity and land use limitation (such as engineering controls, land use restrictions, or institutional controls) that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

No

(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of the Phase I ESA Report, do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupant(s) of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

(4) Relationship of the purchase price to the fair market value of the Site if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this Site reasonably reflect the fair market value of the Site? If you conclude that there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Site?

Yes

(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the Site that would help Farallon Consulting, L.L.C. to identify conditions indicative of a chemical or other release or threatened release? For example, as user of the Phase I ESA Report:

Do you know the past use(s) of the Site? (If yes, please specify.)

No

Do you know of a specific chemical(s) present at the Site, or present at one time? (If yes, please specify.)

Do you know of a chemical and/or other spill(s) or release(s) that have taken place at the Site? (If yes, please specify.)

No

Do you know of any environmental cleanup(s) that have taken place at the Site? (If yes, please specify.)

No

(6) The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of the Phase I ESA Report, based on your knowledge and experience related to the Site, is there any obvious indicator(s) that point to the presence or likely presence of contamination at the Site? (If yes, please specify.)

No

Identify all parties who will rely on the Phase I ESA Report, including:

Name of Business: Spectrum Development Solutions LLC

Name of Contact: Jake McKinstry

Address: 1809 7th Ave Suite 501

Telephone Number: 206 535 2499

E-mail Address: jake@spectrumdevsolutions.com

Has any party that will rely on the Phase I ESA Report required services beyond the standard ASTM E1527-13? (For example, an asbestos, lead-based paint, lead in drinking water, or wetlands investigation) (If yes, please specify.)

Yes. Survey of building for asbestos and lead-based paint as well as soil investigation & classification.

Who is the Site contact, and how can the contact be reached?

Name of Business: Spectrum Development Solutions LLC

Name of Contact: Jake McKinstry

Address: 1809 7th Ave Suite 501

Telephone Number: 206 535 2499

E-mail Address: jake@spectrumdevsolutions.com

Are there any special terms and conditions that must be agreed upon by Farallon Consulting, L.L.C.?
(If yes, please specify.)

No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERCLIS-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS-NFRAP sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/19/2015 has revealed that there are 21 WA HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 07/21/2015 has revealed that there are 103 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal Brownfields sites

WA BROWNFIELDS: A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the WA BROWNFIELDS list, as provided by EDR, and dated 07/21/2015 has revealed that there are 2 WA BROWNFIELDS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 07/21/2015 has revealed that there are 14 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used

EXECUTIVE SUMMARY

whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

SEATTLE CITY LIGHT	361 4TH AVE S	WSW 1/2 - 1 (0.603 mi.)	AU216	867

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 18 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 21 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

113 12TH AVENUE
SEATTLE, WA 98122
Site 7 of 17 in cluster A

US BROWNFIELDS 1012174216
N/A

Relative:
Higher

US BROWNFIELDS:

Actual:
215 ft.

Recipient name: Seattle Housing Authority
Grant type: Cleanup
Property name: FORMER NU WAY CLEANERS
Property #: 9826700295
Parcel size: .16
Property Description: A 2,200 square foot single story building was constructed on the site in 1931. The structure was steam heated by an oil-fired burner whose fuel was stored in a UST at the western end of the building. The original building was owned by EA Crane who ran a dry cleaning business called Crane's Cleaners. By the 1960s it was called Nu Way Cleaners. The name may have been changed to Dick's Central Cleaners in the 1980s but the city directory shows the address of Dick's

Cleaners as 115 - 12th Ave. None of these names show up in city directories after 1994. Huberta M. Brown acquired the site by 1993 and transferred it to the Huberta M. Brown Family Limited Partnership in January 1997. From the property next door, three vent pipes for USTs can be observed in back of the building. In addition, a 4 inch vent can ben seen near the northwest corner of the building. It is assumed that these vents are connected to USTs that stored dry cleaning fluids like Stoddard solvents and perc as well as boiler fuel. Vacant parcel formerly occupied by Nu Way Cleaners. Single story 2,200 sqaure feet masonary building reportedly heated by steam with no information regarding USTs.

The name may have been changed to Dick's Central Cleaners in the 1980s but the city directory shows the address of Dick's Cleaners as 115 - 12th Ave. None of these names show up in city directories after 1994. Huberta M. Brown acquired the site by 1993 and transferred it to the Huberta M. Brown Family Limited Partnership in January 1997. From the property next door, three vent pipes for USTs can be observed in back of the building. In addition, a 4 inch vent can ben seen near the northwest corner of the building. It is assumed that these vents are connected to USTs that stored dry

Past Use: Multistory Not reported

Recipient name: Seattle Housing Authority
Grant type: Cleanup
Property name: FORMER NU WAY CLEANERS III
Property #: 9826700305
Parcel size: .05
Property Description: Vacant parcel with former single-story building occupied by convenience store.
Latitude: 47.60216
Longitude: -122.31719
HCM label: Address Matching-Other
Map scale: Not reported
Point of reference: Entrance Point of a Facility or Station
Datum: World Geodetic System of 1984
ACRES property ID: 102504
Start date: 07/22/2008 00:00:00
Completed date: 12/31/2008 00:00:00
Acres cleaned up: .05
Cleanup funding: 32190.94

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 20137.1

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 2691.2

FINDS:

Registry ID: 110000897398

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Registry ID: 110056450870

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Property name: 7TH AND JACKSON
Property #: 5247802765, 524780770, 5247802775
Parcel size: .6
Property Description: The single story 12,900 square foot concrete commercial building was constructed in 1916. City directories show that the major portion of the building has been used as an automobile garage and repair facility since at least 1944. A smaller portion of the building was used as a cabinet manufacturing site in the 1940s, and more recently as a retail store. The long-time site use for auto repairs, including an auto body shop that included auto painting, may have resulted in contamination by solvents, metals, and paints as well as petroleum products.

constructed in 1916. City directories show that the major portion of the building has been used as an automobile garage and repair facility since at least 1944. A smaller portion of the building was used as a cabinet manufacturing site in the 1940s, and more recently as a retail store. The long-time site use for auto repairs, including an auto body shop that included auto painting, may have resulted in contamination by solvents, metals, and paints as well as petroleum products.

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Recipient name: King County Solid Waste Division
Grant type: Assessment
Property name: SEVENTH AVENUE SERVICE
Property #: 5247802725
Parcel size: .31
Property Description: The site has been used as a gas station and garage since the 1930s. The contamination found in the bore holes has been attributed to leaking underground storage tanks over the past 80 plus years. However, the apparently low levels of soil contamination found during UST removal seems at odds with widespread contamination found in boreholes elsewhere on site. It suggests that there may be other sources, perhaps from UST piping, dispensers, other USTs, or historic releases from improper disposal of solvents.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Stream Comments:

Facility ID: 18768495
Data Year: 2006
Comments: A-7: Spent granular, corrosive solid used to scrub CO2 from patient breath during surgery. Managed as Special Waste.

Facility ID: 18768495
Data Year: 2006
Comments: B-5: Spent fixer solution is filtered through ion exchange resin to remove and recover dissolved silver.

Facility ID: 18768495
Data Year: 2006
Comments: A-7: Chemotherapy drug waste from patient treatment

Facility ID: 18768495
Data Year: 2007
Comments: A-7: Granular material to scrub CO2 and moisture from patient breath during surgery to allow anesthesia gas to be recycled. Managed as Special Waste.

Facility ID: 18768495
Data Year: 2007
Comments: B-5: Spent photographic fixer contaminated with silver transported off-site for silver recovery.

Waste Stream Comments:

Facility ID: 18768495
Data Year: 2006
Comments: A-7: Spent granular, corrosive solid used to scrub CO2 from patient breath during surgery. Managed as Special Waste.

Facility ID: 18768495
Data Year: 2006
Comments: B-5: Spent fixer solution is filtered through ion exchange resin to remove and recover dissolved silver.

Facility ID: 18768495
Data Year: 2006
Comments: A-7: Chemotherapy drug waste from patient treatment

Facility ID: 18768495
Data Year: 2007
Comments: A-7: Granular material to scrub CO2 and moisture from patient breath during surgery to allow anesthesia gas to be recycled. Managed as Special Waste.

Facility ID: 18768495
Data Year: 2007
Comments: B-5: Spent photographic fixer contaminated with silver transported

Waste Stream Comments:

Facility ID: 18768495
Data Year: 2006
Comments: A-7: Spent granular, corrosive solid used to scrub CO2 from patient breath during surgery. Managed as Special Waste.

Facility ID: 18768495
Data Year: 2006
Comments: B-5: Spent fixer solution is filtered through ion exchange resin to remove and recover dissolved silver.

Facility ID: 18768495
Data Year: 2006
Comments: A-7: Chemotherapy drug waste from patient treatment

Facility ID: 18768495
Data Year: 2007
Comments: A-7: Granular material to scrub CO2 and moisture from patient breath during surgery to allow anesthesia gas to be recycled. Managed as Special Waste.

Facility ID: 18768495
Data Year: 2007
Comments: B-5: Spent photographic fixer contaminated with silver transported off-site for silver recovery.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 01/27/2010

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US BROWNFIELDS:
Recipient name: King County Department of Natural Resources and Parks
Grant type: Cleanup
Property name: NINTH AND JEFFERSON STREET BUILDING
Property #: 8590900186, 8590900185
Parcel size: .34
Property Description: The property was residential until the 1960s. It was then developed for commercial use such as a laundromat, restaurants, and a beauty salon. It is believed that a dry cleaner operating in one of these commercial facilities created the solvent contamination discovered in the initial assessment.

Registry ID: 110016706117

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Registry ID: 110038748530

Environmental Interest/Information System

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WA MANIFEST:

Facility Site ID Number: 6153541
EPA ID: WAH000030871
NAICS: 812320
SWC Desc: Not reported
FWC Desc: F002
Form Comm: Investigation derived waste from a former drycleaner undergoing cleanup under the VCP.

Data Year: 2009
Permit by Rule: False
Treatment by Generator: False
Mixed radioactive waste: False
Importer of hazardous waste: False
Immediate recycler: False
Treatment/Storage/Disposal/Recycling Facility: False
Generator of dangerous fuel waste: False
Generator marketing to burner: False
Other marketers (i.e., blender, distributor, etc.): False
Utility boiler burner: False
Industry boiler burner: False
Industrial Furnace: False
Smelter defferal: False
Universal waste - batteries - generate: False
Universal waste - thermostats - generate: False
Universal waste - mercury - generate: False
Universal waste - lamps - generate: False
Universal waste - batteries - accumulate: False
Universal waste - thermostats - accumulate: False
Universal waste - mercury - accumulate: False
Universal waste - lamps - accumulate: False
Destination Facility for Universal Waste: False
Off-specification used oil burner - utility boiler: False
Off-specification used oil burner - industrial boiler: False
Off-specification used oil burner - industrial furnace: False

Form Comm: A dry cleaner historically operated at the site. Soil impacted from the historical release of tetrachloroethene was removed from the site during remedial activities.

Data Year: 2008

Permit by Rule: False

Treatment by Generator: False

Mixed radioactive waste: False

Importer of hazardous waste: False

Immediate recycler: False

Treatment/Storage/Disposal/Recycling Facility: False

Generator of dangerous fuel waste: False

Generator marketing to burner: False

Other marketers (i.e., blender, distributor, etc.): False

Utility boiler burner: False

Industry boiler burner: False

Industrial Furnace: False

Smelter defferal: False

Universal waste - batteries - generate: False

Universal waste - thermostats - generate: False

Universal waste - mercury - generate: False

Universal waste - lamps - generate: False

Universal waste - batteries - accumulate: False

Universal waste - thermostats - accumulate: False

Universal waste - mercury - accumulate: False

Universal waste - lamps - accumulate: False

Destination Facility for Universal Waste: False

Off-specification used oil burner - utility boiler: False

Off-specification used oil burner - industrial boiler: False

Off-specification used oil burner - industrial furnace: False

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Registry ID: 110056980860

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Tank Manifold: Not reported
Tank Release Detection: Automatic Tank Gauging
Tank SFC Type: Not reported
Pipe Material: Fiberglass
Pipe Construction: Double Wall Pipe
Pipe Primary Release Detection: Automatic Line Leak Detector (ALLD)
Pipe Second Release Detection: Interstitial Monitoring (or Sump Sensor)
Pipe Corrosion Protection: Corrosion Resistant
Pipe Pumping System: Pressurized System
Responsible Unit: NORTHWEST
Dispenser/Pump SFC Type: Not reported

Tank Name: ABM-1
Tag Number: A0299
Tank Status: Operational
Tank Status Date: 10/02/1996
Tank Install Date: 00/27/1994
Tank Closure Date: Not reported
Capacity Range: 1,101 to 2,000 Gallons
Tank Permit Expiration Date: 06/30/2016
Tank Upgrade Date: 02/19/1998
Tank Spill Prevention: Spill Bucket/Spill Box
Tank Overfill Prevention: Overfill Alarm
Tank Material: Dielectric Coated Steel
Tank Construction: Double Wall Tank
Tank Tightness Test: Not reported
Tank Corrosion Protection: Sacrificial Anode
Tank Manifold: Not reported
Tank Release Detection: Automatic Tank Gauging
Tank SFC Type: Not reported
Pipe Material: Fiberglass
Pipe Construction: Double Wall Pipe
Pipe Primary Release Detection: Interstitial Monitoring (or Sump Sensor)
Pipe Second Release Detection: Safe Suction (No Leak Detection)
Pipe Corrosion Protection: Corrosion Resistant
Pipe Pumping System: Product Removed by Reclaimer
Responsible Unit: NORTHWEST
Dispenser/Pump SFC Type: Not reported

Tank Name: COBFW-1
Tag Number: A0299
Tank Status: Removed
Tank Status Date: 08/06/1996
Tank Install Date: 00/01/1982
Tank Closure Date: Not reported
Capacity Range: 1,101 to 2,000 Gallons
Tank Permit Expiration Date: Not reported
Tank Upgrade Date: Not reported
Tank Spill Prevention: 25 Gallons or Less
Tank Overfill Prevention: 25 Gallons or less
Tank Material: Fiberglass Reinforced Plastic
Tank Construction: Single Wall Tank
Tank Tightness Test: Not reported
Tank Corrosion Protection: Corrosion Resistant
Tank Manifold: Not reported

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 11/07/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 11/07/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 10/09/2015
Number of Days to Update: 64	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Varies

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 11/23/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 03/07/2016
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy
Date Data Arrived at EDR: 05/29/2015	Telephone: 843-820-7326
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 11/13/2015
Number of Days to Update: 13	Next Scheduled EDR Contact: 02/29/2016
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695
Date Made Active in Reports: 11/03/2015	Last EDR Contact: 11/24/2015
Number of Days to Update: 53	Next Scheduled EDR Contact: 03/14/2016
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Elevation:	204 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	6005543 SEATTLE SOUTH, WA
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

SEATTLE SOUTH

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile SSW
Site Name:	CHROMIUM INC
Site EPA ID Number:	WAD053818340
Groundwater Flow Direction:	W
Inferred Depth to Water:	less than 20 feet
Hydraulic Connection:	The near-surface deposits at the site likely include clay, gravel, and sand layers.
Sole Source Aquifer:	A sole source aquifer is not present at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

A13	1/2 - 1 Mile West	SW
15	1/2 - 1 Mile NNE	Flat

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PILCHUCK
Soil Surface Texture: loamy sand
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class: Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.10
2	20 inches	38 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 5.60
3	38 inches	60 inches	gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 7.30 Min: 6.10
4	60 inches	70 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam
silt loam
gravelly - loam
silty clay loam
muck
gravelly - coarse sand
loam

Surficial Soil Types: fine sandy loam
silt loam
gravelly - loam
silty clay loam
muck
gravelly - coarse sand
loam

Shallow Soil Types: fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

silt loam
silty clay loam
peaty - silt loam
loam
sandy loam

Deeper Soil Types: silt loam
stratified
very gravelly - coarse sand
silty clay loam
loamy fine sand
very gravelly - sand
sapric material
sand
loamy sand
very gravelly - loamy sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Ecology

Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656
