

South State Street MGP Site Legal Document Ready for Review

The Department of Ecology invites you to review an amendment to a legal agreement. The amendment requires development of a cleanup action plan and design documents to address contamination at the South State Street Manufactured Gas Plant (MGP) site on the Bellingham waterfront.

South State Street MGP Site Legal Document Ready for Review

The Department of Ecology invites you to review an amendment to a legal agreement with the City of Bellingham and Puget Sound Energy. The amendment requires development of a cleanup action plan and design documents to address contamination at the South State Street MGP site.

In January 2019, under the existing legal agreement, the City and PSE completed a report describing the results of environmental investigations and evaluating cleanup options. The next step in the cleanup process is to develop a cleanup action plan. After public review of the cleanup action plan, the City and PSE will develop design documents.
