**Re: Notice of Periodic Review Conducted at the Following Hazardous Waste Site:**

- Site Name: Continental Airlines Hydrant System
- Site Address: SeaTac International Airport, SeaTac, WA 98158
- Facility/Site No.: 77676343

Dear Mr. Agid:

Under the Model Toxics Control Act (MTCA), Chapter 70.105D RCW, which governs the cleanup of hazardous waste sites in Washington State, the Department of Ecology (Ecology) must conduct a periodic review of all sites where Ecology has conducted cleanup actions, or at sites with institutional controls and environmental covenants every five years. This letter serves to inform you that a periodic review has been conducted at the Continental Airlines Hydrant System Site.

The periodic review process typically includes the following steps: confirmation that the environmental covenant (if used) is still active and recorded with the title to the property, a review of any monitoring data collected since the cleanup was completed or since the last review was conducted, and a site visit to confirm the institutional controls and conditions of the environmental covenant are being followed. Ecology conducted a periodic review on this Site and published a draft periodic review report in April 2011. Based on a review of the new information Ecology received in January 2012 regarding the closure of the fuel hydrant system, Ecology finalized the periodic review report. Enclosed you can find a copy of the report. You can also download the report from Ecology's web site at:  
<https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=1902>.

Based on the information collected during this periodic review, the Continental Airlines Hydrant System Site appears to meet the requirements of Chapter 173-340 WAC, and the selected remedy continues to be protective of human health and the environment.

A periodic review will continue to be required every five years as long as contamination remains at the Site or institutional controls and/or an environmental covenant are required to protect human health and the environment. The next periodic review will be due in July 2017.

Mr. Agid
