G-Logics File 01-0410-M

Washington State Department of Ecology, NW Region
Mr. Dale Myers
3190 160th Avenue SE
Bellevue, WA 98008

Subject: Progress Memo, May 1 to 31, 2018
Boeing Field Chevron
Ecology Facility-Site ID: 2551
Agreed Order: DE-10947
10805 East Marginal Way South
Tukwila, WA

Dear Mr. Myers:

This progress memo has been prepared per the Agreed Order requirements for the Boeing Field Chevron Site to document activities that have occurred since the previous progress memo dated May 22, 2018. This memo is understood to fulfill the reporting obligations established in the Agreed Order (No. DE 10947). Presented below is information for each of the eight Agreed Order Progress Memo topics.

1 – Actions Taken at the Property to Comply with Agreed Order No. DE 8072

G-Logics met with Ecology on May 24, 2018 to review comments on the Draft Feasibility Pilot Study Workplan. Groundwater sampling was performed on May 25 and May 29, 2018.

2 – Summary of Sampling and Testing

The analytical results from the second quarter groundwater sampling event are summarized in the attached Table 5. Overall, the analytical results were similar to recent sampling events. The thickness of free product (LNAPL) regularly found in monitoring well IP-7 is

recorded in the attached Table 6. Recorded water quality parameters are presented in the attached Table 7.

3 – Summary of Deviations from the Approved Workplan

There are currently no deviations from the approved workplans for this reporting period.

4 – Summary of Contacts with Representatives from Local Community, Public Interest Groups, Press, and Federal, State, and Tribal Governments

The PLPs met with Ecology on May 24, 2018 to discuss the Draft Feasibility Pilot Study Workplan, but did not meet with any other public or private groups during this time period.

5 – Summary of Problems or Anticipated Problems in Meeting the Schedule or Objectives

Ecology recently informed G-Logics that additional quarterly groundwater-sampling events will be required for the following monitoring wells: MW-24D, MW-29S, MW-29D, and MW-30. These sampling activities would extend the deliverable due date for Remedial Investigation Field Activities to March 31, 2019. On June 6, 2018 G-Logics sent a letter to Ecology requesting an extension of the schedule of deliverables to accommodate the additional groundwater monitoring events. Ecology responded in an email on June 11, 2018 that the request would be approved.

6 – Summary of Solutions Developed and Implemented or Planned to Address Problems

To address the schedule conflicts identified in Section 5 above, G-Logics submitted a request to Ecology on June 7, 2018 for the extension of the Remedial Investigation Field Activities deliverable completion date.

7 – Changes in Key Personnel

There are no personnel changes to report.

8 – Description of Work Planned for Next Reporting Period

G-Logics continues to revise the RI text and incorporate Ecology's comments on the Draft Feasibility Pilot Study Workplan.

Closing

Please contact us at your convenience with any questions regarding this progress memo.
Sincerely,

G-Logics, Inc.

(units in µg/L)

Notes:

(1) Refer to site diagram(s) for sampling locations. Refer to laboratory reports for analytical methods.

(2) Method A groundwater cleanup levels used as surface water cleanup levels per WAC 173-340-730(3)(b)(iii)(C).

(3) Gasoline Analyses by Method NWTPH-Gx, Diesel and Heavy Oil by NWTPH-Dx/Dx Ext., Lead by EPA 200.8, EDB by EPA 8011, PAH by 8270 (SIM), VOCs by 8260C.

a Benzene present in groundwater/site.

b Benzene not present in groundwater/site.

* Method B Cleanup Level.

** Not researched, no available data.

--- Sample not analyzed.

nd Not Detected (Data gathered from historical reports, lab analysis reporting limits not available).

NS Sample not collected (Undefined datum from Terracon's 2015 report).

NA Not Applicable (Undefined datum from Terracon's 2015 report).

NR** Water Level not reported, no available data.

Dup Duplicate Sample for QA/QC.

D The Sample was diluted. Detection Limits were raised nad surrogate recoveries my not be meaningful.

E Value above quantitation range.

J Analyte detected below reporting limit.

Q Analyte with an initial calibration that does not meet established acceptance criteria.

X The sample chromatographic pattern does not resemble the fuel standard used for quantification.

<50.0 Sample concentration below laboratory reporting limit.

27 Bold number(s) indicates contaminant detected, below cleanup level.

160 Bold number(s) and yellow shading indicates concentration exceeds MTCA Cleanup Level.

<250 Reporting limits exceeds cleanup level.

Peach shading indicates most recent sampling event data.

Notes:

(1) Refer to site diagrams for sample locations. Refer to laboratory reports for analytical methods.

** Data from PLS Inc. Topographic Survey

Enhanced Fluid Recovery event conducted 1/26/06.

Approximately 3,000 gallons gasoline-impacted water removed from MW-14 and MW-15.

First Peroxide Event conducted near MW-15 (IP-3, IP-4, IP-5, MW-15) on 5/2/06

Second Peroxide Event conducted near MW-15 on 6/13/06 at low tide after product measurements.

Third peroxide event conducted at IP6 & IP7 (330-gal 17% each) and 330-gal split amongst IP3, IP4, and IP5, 8/11/06

Fourth Peroxide event to IP6, IP4, and IP3 (1320 Gallons 17%) on 12/28 and 12/29/06

Fifth Peroxide event 2/9/07 using 11% (1,700 liters into IP-6, 1,000 liters into IP-7, 900L into MW-14)

FPR Extraction Wells EW-1 through EW-9 installed on 3/17/08 and 3/18/08.

* - Extraction well names assigned by G-Logics

Specific Gravity of Gasoline, SG = 0.739

nm = product was absent so no measurement available
