**RE: Site Hazard Assessment Completion**  
**Ecology Facility Site ID: 17952115**

Dear Mr. and Mrs. Burton:

The Washington State Department of Ecology (Ecology) has completed the Site Hazard Assessment (SHA) of the **Western Timber Salvage** site, located at 2030 Boone Street in Aberdeen. The action was under the authority of Ecology as required by the Model Toxics Control Act (Chapter 70.1 05D RCW).

Based on this work, a hazard ranking of **5** has been assigned to this site. The hazard ranking is an estimation of the potential threat to human health and/or the environment, relative to all other Washington State sites assessed at this time. The ranking scale is 1 to 5, with 1 representing the highest relative risk and 5 the lowest relative risk. The site will be placed on Ecology's Hazardous Sites List, a compilation of these rankings updated twice a year. Ecology will publish the ranking of this and other recently assessed sites in the February 2016 Site Register Special Issue (Hazardous Sites List). The site hazard ranking will be used in addition to other site-specific considerations in determining Ecology's priority for future actions.

Please contact me at (360) 407-6246 if you have any questions regarding the SHA of this site, the ranking process, or further activities at the site related to this listing.

Sincerely,

A handwritten signature in black ink, appearing to read "Kirsten Alvarez".
