## ENVIRONMENTAL PROFESSIONALS' STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as established in Part 312.10 of Title 40 of the Code of Federal Regulations (40 CFR 312.10) and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

## EXECUTIVE SUMMARY

Farallon Consulting, L.L.C. (Farallon) has prepared this Phase I Environmental Site Assessment (Phase I ESA) Report for the Bellevue South property at 200 116<sup>th</sup> Avenue Northeast in Bellevue, Washington (herein referred to as the Site). The Phase I ESA was conducted by Ms. Sara Haynes and was reviewed and approved by Ms. Tina Huff. Both are experienced Environmental Professionals in the field of Phase I ESAs and related environmental investigations.

This Phase I ESA Report was prepared for Virginia Mason Medical Center in accordance with the letter regarding Proposal for Phase I Environmental Site Assessment, Bellevue South, 200 116<sup>th</sup> Avenue Northeast, Bellevue, Washington dated August 25, 2017, from Mss. Sara Haynes and Tina Huff of Farallon to Mr. Donald Kunze of Opus Law Group PLLC. The scope of work for this Phase I ESA is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13). ASTM E1527-13 is intended to assist the user in satisfying one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes “all appropriate inquiry” into the previous ownership, uses, and environmental conditions of a property consistent with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

There were no deviations from ASTM E1527-13 during this Phase I ESA. Limiting conditions encountered during the Phase I ESA were the presence of vehicles parked on the northern portion of the Site and dense vegetation on the eastern portion of the Site that prevented Farallon from observing the entire ground surface. In addition, the far eastern boundary of the Site was not accessible due to a fence installed for security purposes. Based on information obtained from the Site representative, these limiting conditions are not expected to hinder the conclusions of this report.

The purpose of the Phase I ESA was to identify, as practicable, recognized environmental conditions on the Site or proximate to the Site that have caused and/or may cause an adverse environmental condition. This Phase I ESA Report provides the results of investigation into past and present ownership and uses of the Site, consistent with good commercial and/or customary practice.

The Site consists of King County Parcel No. 332505-9041, which totals approximately 4.98 acres. Two adjoining buildings formerly occupied the southern portion of the Site: a one-story, 9,216-square-foot auto dealership and auto repair facility constructed in 1960 (Former Auto Dealership); and a one-story, 21,840-square-foot auto service garage building constructed in 1965 (Former Service Building). The buildings were conjoined. At the time of Farallon’s site reconnaissance, the buildings had been demolished to grade. Remaining areas of the Site include a paved auto lot leased by AutoNation and vegetated areas. A retaining wall made of used tires and covered in blackberry bushes is north of the former buildings. Access to the Site is gained from 116<sup>th</sup> Avenue

Northeast, west of the Site. According to the King County Department of Assessments, the Site owner is Bellevue 116<sup>th</sup> Avenue South LLC.

At the time of the site reconnaissance, Farallon observed two 55-gallon drums used to store waste oil and debris accumulated during demolition of the former Site buildings. An empty 20-gallon drum was observed near the 55-gallon drums. No evidence of staining or releases was observed in the vicinity of the drums. An oil-water separator and various catch basins and drains were observed on the southern portion of the Site. According to the Site representative, oil remains in the below-grade oil-water separator. Farallon observed a hole/drain in the ground with piping and standing oil west of the oil-water separator. The Site representative was not familiar with the hole/drain or its purpose. In addition, Farallon observed trench drains, evidence of former hydraulic hoists, and heavy equipment and utility connections in the ground surface within the former footprint of the former Site buildings. No evidence of significant staining or releases was observed in the vicinity of these features; however, the flooring had recently been cleaned by the demolition contractor. Farallon observed several groundwater monitoring wells throughout the Site that were installed in connection with previous environmental investigations completed at the Site.

Historically, the Site appeared to be developed with a residence and appeared to be used for agricultural production from at least 1944. According to historical assessor records, a domestic water well supplied water to the historical residence, but Farallon was unable to locate a well log for the Site. The inconsistency in the date the residence was removed from the Site and the insufficient information regarding the well, including a decommissioning date, is a data gap for this report. By 1965, the residence remained on the northern portion of the Site and an auto dealership building and facility appeared on the southern portion of the Site. The dealership operation appeared to expand to the north by 1968 to include more vehicle parking and, by 1971, the northern portion of the Site appeared cleared of vegetation, the western portion appeared to be used for staging vehicles and the eastern portion of the Site appeared cleared of vegetation but unpaved. The Site appeared relatively unchanged from the early 1970s through 2007, when the Site appeared cleared of all vehicles and vacant. From 2007 through 2014, the Site appeared vacant and periodically used for vehicle parking. The northern portion of the Site appeared to be used to stage vehicles from 2014 through 2017. According to previous reports reviewed, the former Site buildings were unoccupied since 2009.

City directory listings for the Site address included Overlake Oldsmobile or Overlake Chrysler, Bellevue Chrysler Plymouth, Eastside Chrysler Jeep, and Eastside Jeep Eagle. Auto dealerships and maintenance facilities are known to store and generate hazardous substances and petroleum products. Based on historical operations of the Site and previous environmental investigations completed at the Site, the known and potential release of hazardous substances and/or petroleum products associated with former operations on the Site represents a recognized environmental condition in connection with the Site.

Farallon was provided with multiple previous environmental studies prepared for the Site and for the north-adjacent auto dealership property, including *Phase I Environmental Site Assessment*,

*Former Dodge of Belleue [sic] & Eastside Chrysler Jeep Property, 126 through 400 116<sup>th</sup> Avenue NE, Bellevue, Washington 98004* dated July 1, 2015, prepared by SCS Engineers (2015 Phase I report). According to the 2015 Phase I report, the Site buildings had been vacant since 2009 and outdoor areas of the Site had been periodically used for overflow parking of new vehicles. The 2015 Phase I report indicated that considerable environmental evaluation and cleanup had been completed on the north-adjacent property and on the Site since the late 1980s, including underground storage tank removals, soil and groundwater sampling, drainage system upgrades, contaminated soil excavation, oxygen release compound injection, and groundwater monitoring.

According to the 2015 Phase I report, approximately 1,000 cubic yards of petroleum-contaminated soil was suspected to be present beneath the vacant Site buildings despite a location-specific groundwater No Further Action (NFA) determination issued for a portion of the Site in 2000. The partial NFA determination was specific to contaminated soil and groundwater in the Former Service Building, and stipulated groundwater monitoring would have to continue for four consecutive quarters to assure the impacted groundwater did not pose a threat to human health or the environment. Groundwater sampling confirmed shallow groundwater beneath the Site buildings continued to contain diesel- and oil-fraction petroleum at concentrations exceeding cleanup standards. According to the 2015 Phase I ESA, the residual soil and groundwater petroleum contamination were considered to be controlled recognized environmental conditions in connection with the Site. Because of the recent demolition of the former Site buildings, the Washington State Department of Ecology (Ecology) likely will require the remediation and/or removal of impacted soil and groundwater that remaining on the Site. The known and potential release of hazardous substances and/or petroleum products associated with former operations on the Site represents a recognized environmental condition in connection with the Site.

Hazardous material surveys conducted for the Site buildings confirmed the presence of asbestos- and potentially lead-containing building materials that would need to be abated prior to the demolition of the structures. According to the demolition contractor, the materials were properly disposed of during demolition of the buildings.

Adjacent properties at the time of Farallon's site reconnaissance included an auto dealership to the south, 116<sup>th</sup> Avenue Northeast to the west, Northeast 4<sup>th</sup> Street to the north, and a ditch and railroad tracks to the east.

Historically, adjacent properties were largely developed with rural residential properties with some agricultural production from at least the mid-1940s to the mid-1960s. By at least 1965, the north-adjacent property appeared developed with an auto dealership building; properties west of the Site appeared to be a mix of commercial and residential buildings, and the property south of the Site appeared undeveloped and heavily vegetated. Properties west and northwest of the Site appeared developed by the 1970s and, by 1977, the south-adjacent property appeared developed with an auto dealership. Development of west-adjacent properties appeared from the early 1990s through 2002. Adjacent properties appeared unchanged from 2002 through 2014, when the west-adjacent property appeared redeveloped with a hotel and the north-adjacent Northeast 4<sup>th</sup> Street extension appeared under construction. Adjacent properties appeared similar to present by 2016, when the

north-adjacent property appeared developed with the current buildings. City directory listings for adjacent properties included auto dealerships, insurance companies, a construction company, a YWCA, a real estate company, a brewing company, restaurants, and residences.

The Environmental Data Resources, Inc. (EDR) database report prepared for the Site (EDR Report) identified the Site address in several databases. The Site operated as a historical auto dealership, and previous cleanups have been performed on the Site. The Site was listed on the hazardous waste facilities list in 1995, and an independent cleanup report was submitted to Ecology in 1998 regarding petroleum product and solvents contamination in groundwater. The Site entered the Ecology Voluntary Cleanup Program and received an NFA determination in 2000. Farallon searched the Ecology Toxics Cleanup Program database for the Site, which indicated the Site has operated under alternate names, including Bellevue Chrysler Plymouth, Eastside Chrysler Jeep, and Eastside Jeep Eagle. Contamination was reported in 1993 after LUST reports were received between 1989 and 1990. The Site had confirmed releases of halogenated organics, non-halogenated solvents, and petroleum products to groundwater and petroleum products to soil as well as remediated releases of halogenated organics and non-halogenated solvents to soil. Regulatory files for the Site were not reviewed due to the time and/or cost constraints of this Phase I ESA.

The EDR Report identified several facilities adjacent or proximate to the Site in the regulatory databases. Several of these facilities, including historical auto dealerships, have known or suspected releases of hazardous substances to soil and/or groundwater. Regulatory files for facilities in the vicinity of the Site were not reviewed due to the time and/or cost constraints of this Phase I ESA; additional information may be available at Ecology. Based on the current regulatory status of adjacent properties and the relative distance from the Site, these facilities do not represent recognized environmental conditions in connection with the Site.

Based on review of the Site history, interviews with persons knowledgeable about the Site, reconnaissance of the Site, and review of regulatory agency lists, this Phase I ESA identified the following recognized environmental condition in connection with the Site:

- The known and potential release of hazardous substances and/or petroleum products associated with former operations on the Site.

## **1.0 INTRODUCTION**

This Phase I Environmental Site Assessment (Phase I ESA) Report was prepared by Farallon Consulting, L.L.C. (Farallon) for the Bellevue South property at 200 116<sup>th</sup> Avenue Northeast in Bellevue, Washington (herein referred to as the Site) (Figure 1). This section discusses the project authorization, and the qualifications of the Environmental Professionals conducting and reviewing the Phase I ESA work. Also included in this section are the project purpose, objective, scope of services, deviations, limiting conditions, and data gaps.

### **1.1 PROJECT AUTHORIZATION**

This Phase I ESA Report was prepared for Virginia Mason Medical Center in accordance with the letter regarding Proposal for Phase I Environmental Site Assessment, Bellevue South, 200 116<sup>th</sup> Avenue Northeast, Bellevue, Washington dated August 25, 2017, from Mss. Sara Haynes and Tina Huff of Farallon to Mr. Donald Kunze of Opus Law Group PLLC. The scope of work for this Phase I ESA is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13).

### **1.2 PROFESSIONAL QUALIFICATIONS**

The Phase I ESA was conducted by Ms. Sara Haynes and was reviewed and approved by Ms. Tina Huff. Both have an understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions, and the ability to develop opinions regarding conditions indicative of a release or threatened release of hazardous substances and petroleum products. These Environmental Professionals have developed and performed all appropriate inquiry, in conformance with the standards and practices set forth in Part 312 of Title 40 of the Code of Federal Regulations. The professional qualifications of Mss. Haynes and Huff are provided in Appendix A.

### **1.3 PROJECT PURPOSE AND OBJECTIVE**

The purpose of the Phase I ESA was to identify, as practicable, recognized environmental conditions on the Site and within the appropriate study area that have caused and/or may cause an adverse environmental impact. ASTM E1527-13 is intended to permit a user to satisfy one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes “all appropriate inquiry” into the previous ownership, uses, and environmental conditions of a property consistent with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

The objective of the Phase I ESA was to perform an appropriate inquiry into past and present ownership and uses of the Site, consistent with good commercial and/or customary practice. This

Phase I ESA Report is to be used as a risk management tool to meet all appropriate inquiry requirements and the Comprehensive Environmental Response, Compensation, and Liability Act liability defense. The Phase I ESA does not guarantee that there are no impacts to the Site.

For the purpose of this Phase I ESA Report, the term “recognized environmental condition” is defined as the presence or likely presence of any hazardous substance or petroleum product in, on, or at the Site due to releases to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. The term is not intended to include “de minimis conditions” that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the applicable governmental agencies.

The term “controlled recognized environmental condition” is defined as a recognized environmental condition resulting from a past release of a hazardous substance or petroleum product that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in-place subject to implementation of required controls.

The term “historical recognized environmental condition” is defined as a past release of any hazardous substance or petroleum product that has occurred in connection with the Site and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the Site to any required controls.

## **1.4 PROJECT SCOPE OF WORK**

This Phase I ESA Report has been prepared in accordance with the scope of work presented in ASTM E1527-13 and the letter regarding Proposal for Phase I Environmental Site Assessment, Bellevue South, 200 116<sup>th</sup> Avenue Northeast, Bellevue, Washington dated August 25, 2017, from Mss. Sara Haynes and Tina Huff of Farallon to Mr. Donald Kunze of Opus Law Group PLLC. The scope of work for this Phase I ESA included a records review, literature research and review, a site reconnaissance, interviews with individuals familiar with the Site, interviews with local governmental officials, and preparation of this report.

## **1.5 DEVIATIONS**

There were no deviations from ASTM E1527-13 during this Phase I ESA.

## **1.6 LIMITING CONDITIONS**

Limiting conditions encountered during the Phase I ESA were the presence of vehicles parked on the northern portion of the Site and dense vegetation on the eastern portion of the Site that prevented Farallon from observing the entire ground surface. In addition, the far eastern boundary of the Site was not accessible due to a fence installed for security purposes. Based on information

obtained from the Site representative, these limiting conditions are not expected to hinder the conclusions of this report.

## **1.7 DATA GAPS**

Data gaps may affect the ability to identify recognized environmental conditions and Farallon's ability to render opinions and conclusions for presentation in the Phase I ESA Report. According to historical assessor records, a single-family residence was constructed on the Site in 1918 and removed in 1959, but the residence appeared on the 1968 aerial photograph and appeared removed from the Site by 1971. A domestic water well supplied water to the historical residence, but Farallon was unable to locate a well log for the Site. The inconsistency in the date the residence was removed from the Site and the insufficient information regarding the well, including a decommissioning date, is a data gap for this report.

## **2.0 SITE OVERVIEW**

This section includes an overview of the Site location, improvements, and operations. A description of adjacent and surrounding land use also is provided.

### **2.1 SITE LOCATION**

The Site is southeast of the intersection of 116<sup>th</sup> Avenue Northeast and Northeast 4<sup>th</sup> Street, at 200 116<sup>th</sup> Avenue Northeast in Bellevue, King County, Washington. The location is in a commercial area approximately 1 mile east of downtown Bellevue. The Site vicinity is shown on Figure 1.

### **2.2 SITE DESCRIPTION**

The Site consists of King County Parcel Nos. 332505-9041, which totals approximately 4.98 acres. Two adjoining buildings formerly occupied the southern portion of the Site: a one-story, 9,216-square-foot auto dealership and auto repair facility constructed in 1960 (Former Auto Dealership); and a one-story, 21,840-square-foot auto service garage building constructed in 1965 (Former Service Building). At the time of Farallon's site reconnaissance, the buildings had been demolished to grade. Remaining areas of the Site include a paved auto storage lot and vegetated areas. A retaining wall made of used tires and covered in blackberry bushes is north of the former buildings. Several drains, sumps, in-ground utility connections, and evidence of former hydraulic hoists were observed within the foot print of the former Site buildings. An oil-water separator was observed on the southern portion of the Site. In addition, several groundwater monitoring wells were observed throughout the Site that were installed in connection with previous environmental investigations completed at the Site, as discussed in Section 4.5, Previous Environmental Studies.

Figure 2 presents a plan map of the Site. Additional details pertaining to the Site are provided in Section 8.2, Site Reconnaissance Observations. Site photographs are presented in Appendix B.

### **2.3 SITE OPERATIONS**

At the time of Farallon's site reconnaissance, two adjoining buildings on the southern portion of the Site had been demolished to grade. The northern portion of the Site is leased to AutoNation for auto storage purposes. According to the King County Department of Assessments, the Site owner is Bellevue 116<sup>th</sup> Avenue South LLC.

### **2.4 ADJACENT AND SURROUNDING LAND USE**

Adjacent properties at the time of the site reconnaissance included an auto dealership to the south, 116<sup>th</sup> Avenue Northeast to the west, Northeast 4<sup>th</sup> Street to the north, and a ditch and railroad to the east. Farallon did not access adjacent properties, which were observed from public rights-of-way. No visual evidence of recognized environmental conditions was observed on abutting or nearby properties during the site reconnaissance. Observations were restricted to areas readily observable from the Site, and to public rights-of-way.

## **3.0 PHYSICAL SETTING**

The physical setting of the Site, including topography, geology, and hydrogeology, is described in this section. Farallon's assessment of sensitive receptors in the area also is discussed.

### **3.1 TOPOGRAPHY**

Farallon reviewed the U.S. Geological Survey (USGS) topographic map for Bellevue, Washington dated September 1, 2017 provided by Environmental Data Resources, Inc. (EDR). The map depicts the Site at an elevation of approximately 92 feet above mean sea level. The Site topography is relatively flat. Regional topography is generally flat, with a slight slope down to the east, and hills to the southeast and northeast.

### **3.2 GEOLOGY AND HYDROGEOLOGY**

The Site is approximately 1 mile east of downtown Bellevue, Washington, within the eastern portion of the Puget Lowland region. The surficial geology of the Puget Lowland region is characterized by Quaternary sediments deposited by numerous glacial advance and retreat episodes. Quaternary sediments consist primarily of interlayered and/or sequential deposits of alluvial clays, silts, sands, and organic matter that typically are situated over deposits of glacial till that consist of silty sand to sandy silt with gravel. According to The EDR Radius Map Report with GeoCheck prepared for the Site dated September 1, 2017 (EDR Report), the surface soil at the Site consists primarily of urban land and moderately well drained gravelly sandy loam.

Groundwater migration in the Puget Lowland region generally is confined to the most-recent alluvial deposits of sands and gravel. These materials are commonly underlain and occasionally overlain by relatively impermeable glacial till deposits. Lateral and vertical migration of groundwater is impeded by the dense and relatively impermeable nature of the till, and by the commonly laterally discontinuous nature of the aquifer-bearing materials. Perched and discontinuous zones of shallow groundwater may be present seasonally and locally above the impervious till. Shallow groundwater flow direction typically can be estimated by examining surface topography. Groundwater generally flows from areas of high elevation to areas of low elevation. Shallow groundwater flow usually parallels or migrates toward nearby surface water bodies. Surface features such as streets, utility trenches, and paved areas can locally alter the flow direction of shallow groundwater.

Based on previous environmental reports prepared for the Site and north-adjacent properties, groundwater flow is toward the southwest and is found approximately 1 to six feet below ground surface.

### **3.3 SENSITIVE RECEPTORS**

Farallon conducted a limited assessment of sensitive receptors on or in the vicinity of the Site that was confined to visually apparent features such as surface water bodies (e.g., low-lying wet areas,

streams, ponds) and residential and recreational areas. Farallon's assessment of sensitive receptors included a review of readily ascertainable information relating to the presence of private, semiprivate, public, and industrial water supply wells.

According to the EDR Report, the Site is not in a flood plain. The nearest federally designated wetlands are approximately 0.05 mile southwest of the Site. No public water supply wells are proximate to the Site. The water bodies nearest the Site were identified as Lake Bellevue approximately 0.5 mile north-northeast of the Site, Lake Washington approximately 1 mile west of the Site, and Lake Sammamish approximately 3.6 miles east of the Site.

## **4.0 USER-PROVIDED INFORMATION**

Farallon understands that the user of this report, Virginia Mason Medical Center, is seeking to follow the standards set forth in ASTM E1527-13 to complete an environmental assessment of the Site. The user has specific responsibilities for fulfilling ASTM E1527-13 requirements to help identify the possibility of recognized environmental conditions in connection with the Site. These responsibilities do not require the technical expertise of an Environmental Professional, and were not performed by the Environmental Professional who conducted the Phase I ESA at the Site.

To facilitate fulfillment of the ASTM E1527-13 requirements identified below, Farallon provided Virginia Mason Medical Center with a copy of the *Phase I ESA User Questionnaire* (User Questionnaire) to complete. The User Questionnaire is provided in Appendix C of this Phase I ESA Report.

### **4.1 TITLE AND LIEN RECORDS**

Virginia Mason Medical Center indicated that it was not aware of environmental liens against the Site.

### **4.2 EXPERIENCE AND SPECIALIZED KNOWLEDGE**

Virginia Mason Medical Center indicated that it has no experience or specialized knowledge regarding the Site.

### **4.3 COMMONLY KNOWN INFORMATION**

Virginia Mason Medical Center indicated that it is not aware of commonly known information that would lead to identification of recognized environmental conditions in connection with the Site.

### **4.4 PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT USERS**

Virginia Mason Medical Center will rely on this Phase I ESA Report.

### **4.5 PREVIOUS ENVIRONMENTAL STUDIES**

Farallon was provided with multiple previous environmental studies prepared for the Site and for the north-adjacent auto dealership property. Farallon was provided with the following documents prepared for the Site:

- *Phase I Environmental Site Assessment, Eastside Chrysler Jeep, 316 116<sup>th</sup> Avenue NE, Bellevue, Washington* dated July 21, 2000, prepared by Environmental Partners, Inc.;
- *Phase I Environmental Site Assessment for Dodge of Bellevue Property, 126 through 316 116<sup>th</sup> Avenue NE, Bellevue, WA* dated September 16, 2005, prepared by SCS Engineers;

- *Updated Phase I Environmental Site Assessment for Dodge of Bellevue Property, 126 through 316 116<sup>th</sup> Avenue NE, Bellevue, WA* dated April 28, 2006, prepared by SCS Engineers;
- *Phase I Environmental Site Assessment for the Former Dodge of Bellevue/Eastside Chrysler Jeep Property, 126 through 400 116<sup>th</sup> Avenue NE, Bellevue, Washington 98004* dated July 15, 2009, prepared by SCS Engineers;
- *Phase I Environmental Site Assessment, Former Dodge of Bellevue [sic] & Eastside Chrysler Jeep Property, 126 through 400 116<sup>th</sup> Avenue NE, Bellevue, Washington 98004* dated July 1, 2015, prepared by SCS Engineers (2015 Phase I report); and
- Letter regarding Remedial Cost Estimate Summary, Former Eastside Chrysler Jeep Property dated March 30, 2017, from Mr. Greg Helland of SCS Engineers to Mr. Andrew Coates of KG Investment Properties (2017 Cost Estimate letter).

The 2015 Phase I report summarized findings for the Site and the north-adjacent parcels from previous environmental investigations performed from 1987 to 2014. Northeast 4<sup>th</sup> Street Extension, north of the Site, was constructed in 2014 and bisected the parcel north-adjacent to the Site. Based on previous environmental reports prepared for the Site, a 1987 report reviewed in the 2015 Phase I report indicated significant spills were observed around the fill spout of a 275-gallon waste oil underground storage tank (UST), which was identified in the southern portion of the Former Service Building. In addition, observations from the 1987 report indicated free oil was present in both Site buildings, including in an open floor drain, floor trench drain, and a subgrade concrete-lined; records indicated floor drains flowed into the sewer system via a grease trap that reportedly had not been inspected or maintained. Other evidence of contamination observed in the 1987 investigation included burned vehicles and evidence of leaks, spills, and new fill material on the Site, which led to the recommendation of additional investigation at the Site.

An additional Site investigation performed in 1989 attempted to determine if solvents from a drum storage area in the southeastern exterior portion of the Former Service Building had contaminated groundwater. Benzene and toluene were detected at concentrations reported to be less than regulatory limits in soil below the drum storage area, and removal and disposal of the soil was not required. According to the 2015 Phase I report, the Washington State Department of Ecology (Ecology) was notified of the release. Four monitoring wells were installed in the drum storage area; total petroleum hydrocarbons (TPH) were detected at concentration exceeding the detection limit in one well sampled. The 1989 report also indicated a drum and debris pile consisting of burned vehicles, parts, and tires had been removed from the Site.

According to the 2015 Phase I report, an additional investigation performed in 1993 indicated that service operations at the Site had been discontinued; soil borings were advanced at the eastern Site property line and at the location of the former underground hoists in the Former Service Building. TPH, naphthalene, methylene chloride, toluene, xylenes, and 1,4-dichlorobenzene were detected in soil samples collected from the northeastern corner of the Former Service Building in the area of the former hoists, and groundwater was reported to have a strong odor of solvents, although no

groundwater sampling appears to have been conducted. Additional investigation was recommended in the area of the eastern portion of the Former Service Building. Information from the 1993 report indicated the 275-gallon waste oil UST was removed from the southeastern portion of the Site Former Service Building in 1988.

Additional subsurface investigation was performed in 1994, according to the 2015 Phase I report. Soil borings were advanced and monitoring wells were installed in areas near the Former Service Building and in an area south of the oil-water separator south of the Former Auto Dealership. Polychlorinated biphenyls (PCBs) were detected in oily sludge present in the bottom of a hoist lift pit, but according to the 2015 Phase I report, no additional discussion about potential PCB contamination was mentioned in the 1994 investigation. The hoist vault was pumped out and sealed with bentonite in 1994. The majority of soil contamination in the Former Service Building was discovered in the upper 1.5 feet of material beneath the concrete slab, but contamination was detected up to 10 feet below ground surface, estimated to be an approximate volume of 1,000 cubic yards of material, according to the 2015 Phase I report. Additional delineation of groundwater contamination conducted following the 1994 investigations indicated that groundwater flow to the monitoring wells may not have been from the most contaminated areas of the property, and groundwater data collected during the 1994 investigations was deemed inconclusive.

Based on structural integrity limitations of the Site building, remediation activities performed on the Site between 1994 and 1996 included placing an oxygen release compound in the northern end of the Former Service Building to enhance bioremediation and reduce contamination in groundwater. In 1998, when groundwater contamination was less than MTCA Level B cleanup levels, the oxygen release compound socks were removed from the groundwater monitoring wells. Additional soil sampling in areas of the Former Service Building indicated soil contamination did not represent a human health risk, and residual contamination would not result in groundwater impact in excess of the groundwater cleanup standards. Ecology issued a No Further Action (NFA) determination for the Site in 2000 specific to portions of the Site that underwent cleanup, based laboratory analytical results of quarterly groundwater monitoring for chlorinated and non-chlorinated solvents, which were less than applicable state standards. The monitoring wells were properly abandoned in 2001; however, Farallon observed the location of several monitoring wells on the Site during the site reconnaissance.

The 2005 and 2009 Phase I reports indicated approximately 1,000 cubic yards of petroleum-contaminated soil related to former hydraulic lifts and building drain pipes may be encountered during future development of the Site and that a limited quantity of contaminated groundwater may also need to be managed during future redevelopment activities. The 2009 Phase I report recommended further characterization and proper off-Site disposal of approximate a dozen 5- to 55-gallon containers of oil and chemical wastes that were observed to be stored inside containers present southeast of the Former Service Building. The 2015 Phase I report indicated a 2013 hazardous materials survey of the Site buildings was conducted, which identified asbestos containing building materials, fluorescent light ballasts, and soil waste materials in the Site buildings.

According to the 2015 Phase I report, Phase I and Phase II investigations were conducted on the Site in 2013, which identified the presence of diesel- and oil-range TPH-impacted soil in the area of existing and former sources, including the existing oil-water separator, the former location of two waste oil aboveground storage tanks (ASTs), and a former waste oil UST in the southern portion of the Former Service Building. According to the 2013 investigation, the former hydraulic hoists, floor drains, and associated piping that ran beneath each service bay area were also potential conduits for the transmission of contaminants from point source areas beneath the Site. Automotive-, fuel-, refrigerant-, and solvent-related VOCs (i.e., 1,3-butadiene, benzene, chloroform) were detected at concentrations exceeding the MTCA Method B soil gas screening levels in soil vapor samples. In addition, 1,3-butadiene was detected at concentrations exceeding MTCA Method C soil gas screening levels.

The 2013 investigation determined that, because of the NFA determination issued by Ecology in 2000 due to relatively low levels of TPH as gasoline-, diesel-, and oil-range organics detected at concentrations less than MTCA cleanup levels in groundwater at the time, TPH-impacted soil were allowed to be left on the Site. However, the presence of shallow groundwater beneath the Site resulted in TPH-impacted soil leaching into groundwater and resulted in 2013 levels of TPH that exceeded MTCA cleanup levels.

According to the 2015 Phase I report, the Site buildings were vacant since 2009, and outdoor areas of the Site were periodically used for overflow parking of new vehicles. The 2015 Phase I report indicated that considerable environmental evaluation and cleanup have been completed on the Site since the late 1980s, including UST removals, soil and groundwater sampling, drainage system upgrades, contaminated soil excavation, oxygen release compound injection, and groundwater monitoring.

According to the 2015 Phase I report, approximately 1,000 cubic yards of petroleum-contaminated soil was suspected to be present beneath the vacant Site buildings despite a location-specific NFA determination issued for a portion of the Site in 2000. Groundwater sampling confirmed shallow groundwater beneath the Site buildings continued to contain diesel- and oil-fraction petroleum at concentrations exceeding MTCA Method A standards. According to the 2015 Phase I report, the residual soil and groundwater petroleum contamination were considered to be controlled recognized environmental conditions in connection with the Site. Hazardous material surveys conducted for the Site buildings confirmed the presence of asbestos- and potentially lead-containing building materials that would need to be abated prior to the demolition of the structures.

According to the 2017 Cost Estimate letter, the primary contaminant at the Site is expected to be petroleum constituents. However, according to the 2017 Cost Estimate letter, information in previous environmental reports suggests there is the potential for other contaminants, such as metals, to be present in select areas of the Site. Although an NFA determination was issued for the Site in 2000 regarding groundwater impacts, no groundwater data have been collected since 2000 and, according to the 2017 Cost Estimate letter, there have been regulatory changes to the groundwater cleanup criteria since that time.

According to the 2017 Cost Estimate letter, there is uncertainty regarding the regulatory requirements for the Site since the former Eastside Chrysler Jeep Site property is a formerly listed contaminated property that received an NFA partially due to contaminated soil being isolated under the Site buildings. The 2017 Cost Estimate letter indicates a new Ecology Voluntary Cleanup Program (VCP) application will be required to re-enter the Site into the VCP, and a cleanup report will be required when the project is complete. Due to the Site history, there may be additional requirements under the current VCP, regardless of the cleanup activities conducted during redevelopment.

Because of the recent demolition of the former Site buildings, Ecology likely will require the remediation and/or removal of impacted soil and groundwater remaining on the Site. The known and potential release of hazardous substances and/or petroleum products associated with former operations on the Site represents a recognized environmental condition in connection with the Site.

## 5.0 SITE BACKGROUND AND HISTORY

Farallon reviewed the following historical sources as part of this Phase I ESA:

- Aerial photographs of the Bellevue, Washington area dated 1944, 1965, 1968, 1971, 1977, 1980, 1985, 1990, 2005, 2006, 2009, and 2011 obtained from EDR; and dated 1990, 2002 through 2007, and 2009 through 2017 obtained from Google Earth;
- Cole City Directories of Bellevue, Washington dated 1971, 1976, 1981, 1986, 1992, 1995, 1999, 2003, 2008, and 2013 obtained from EDR; and
- USGS topographic maps of Snohomish, Washington dated 1895 and 1897; of Seattle, Washington dated 1897; of Kirkland, Washington dated 1943, 1968, 1973, and 2014; of Mercer Island, Washington dated 1943, 1968, 1973, and 2014; and of Bellevue South, Washington dated 1983 obtained from EDR.

A search for Sanborn Fire Insurance Maps resulted in notification that there was no coverage for the Site.

Farallon is not responsible for the accuracy or completeness of the historical sources reviewed. The historical sources documented were reasonably ascertainable and practically reviewable during this Phase I ESA.

### 5.1 SITE

The Site appeared to be developed with a residence and appeared to be used for agricultural production, according to the 1944 aerial photograph. By 1965, the Site remained developed with the residence on the northern portion of the Site and a building appeared occupied by an auto dealership on the southern portion of the Site. The auto dealership appeared to consist of two adjoining buildings. The dealership operations appeared to expand to the north by 1968 to include more vehicle parking and, by 1971, the Site appeared cleared of vegetation and the western portion appeared to be used for staging vehicles. According to the 1971 aerial photograph, the eastern portion of the Site appeared cleared of vegetation but unpaved and the easternmost portion of the Site appeared to be a segregated gravel parking area. According to aerial photographs, the Site appeared relatively unchanged from the early 1970s through 2007. According to previous environmental reports prepared for the Site, the former Site buildings were vacant since 2009.

According to the 2007 aerial photograph, the Site appeared cleared of all vehicles and vacant. From 2007 through 2014, the Site appeared to be vacant and used for vehicle parking. From 2014 through 2017, the northern portion of the Site appeared to be used to stage vehicles. City directory listings for the Site address included Overlake Oldsmobile or Overlake Chrysler from 1971 to 1986, Bellevue Chrysler Plymouth from 1992 to 2003, Eastside Chrysler Jeep from 1995 to 2013, and Eastside Jeep Eagle in 1995. Additional information regarding the Site history is provided in Section 4.5, Previous Environmental Studies. The known and potential release of hazardous

substances and/or petroleum products associated with former operations on the Site represents a recognized environmental condition in connection with the Site.

## **5.2 ADJACENT PROPERTIES**

Adjacent properties were largely developed with rural residential properties with some agricultural production, according to the 1944 aerial photograph, and the Burlington Northern Railway appeared east-adjacent of the Site. By at least 1965, the north-adjacent property appeared developed with an auto dealership building, and the Interstate 405 freeway west of the Site appeared constructed. Properties west of the Site appeared to be a mix of commercial and residential buildings, and the property south of the Site appeared undeveloped and heavily vegetated. According to the 1968 aerial photograph, clearing of the property east of the railroad tracks appeared ongoing.

According to aerial photographs, the west- and northwest-adjacent properties appeared developed with the current buildings by the 1970s and, by 1977, the south-adjacent property appeared developed with an auto dealership. The southeast-adjacent property appeared developed with the current building by 1990 and development of the west-adjacent properties appeared from the early 1990s through 2002. Adjacent properties appeared unchanged from 2002 through 2014, when the west-adjacent property appeared redeveloped with a hotel and the north-adjacent Northeast 4<sup>th</sup> Street extension appeared under construction. Adjacent properties appeared similar to present by 2016, when the north-adjacent property appeared developed with the current buildings. City directory listings for adjacent properties included car dealerships, insurance companies, a construction company, a YWCA, a real estate company, a brewing company, restaurants, and residences. Additional information regarding adjacent properties is provided in Section 6.2, Adjacent and Other Facility Listings.

## **5.3 PUGET SOUND REGIONAL ARCHIVES**

Farallon reviewed historical records for the Site at the Puget Sound Regional Archives at Bellevue College in Bellevue, Washington. According to the historical assessor information reviewed by Farallon, the Site was previously part of the north-adjacent property and has gone through multiple boundary-line adjustments. A single-family residence constructed on the Site in 1918 and was torn down in 1959, but the residence appeared on the 1968 aerial photograph and appeared removed from the Site by 1971. A domestic water well supplied water to the historical residence, but Farallon was unable to locate a well log for the Site. The inconsistency in the date the residence was removed from the Site and the insufficient information regarding the well, including a decommissioning date, is a data gap for this report.

Overlake Oldsmobile Center, an auto dealership and repair facility, was constructed on the Site in 1960 and was remodeled from 1965 to 1969 to include expansions to the facility. The original one-story, 9,183-square-foot building was remodeled by 1969 to include a service area, a showroom, offices, and a 10,920-square-foot warehouse addition, a 2,400-square-foot carport addition, and a 3,330-square-foot carport shelter addition. The facility included four hydraulic hoists in the central

and eastern portion of the original building and a paint shop in the southeastern corner of the addition constructed in 1965. A 160-square-foot, one-story portable sales office was constructed in 1965.

## 6.0 REGULATORY REVIEW

EDR conducted a review of environmental regulatory agency database listings to identify reported environmental issues related to the Site and facilities in the Site vicinity. Farallon used the greater of each approximate minimum search distance from the Site for each of the referenced federal and state environmental databases, as specified in ASTM E1527-13.

Farallon reviewed the results from the EDR Report to note reported facilities in the vicinity of the Site that were considered to have a potential to adversely impact the Site (i.e., are known to have resulted in or are expected to result in a recognized environmental condition). Reported facilities identified in the EDR Report were evaluated with respect to the nature and extent of a given release, the distance of the reported facility from the Site, the stratigraphy of soils, the expected soil permeability, and the topographic position of a reported facility with respect to known or expected local and/or regional groundwater flow direction.

The descriptions of the databases searched, the complete database names for the abbreviations used in this Phase I ESA Report, and the associated search distances from the Site are provided in the EDR Report presented in Appendix D.

### 6.1 ON-SITE LISTINGS

**Overlake Chrysler-Plymouth Inc** at 126 116<sup>th</sup> Avenue Northeast, located on the Site, was identified in the Historical Auto database. According to the EDR Report, the facility operated as a new and used auto dealership in 1987.

**Bellevue Chrysler Plymouth** at 126 116<sup>th</sup> Avenue Northeast, located on the Site, was identified in the RGA LUST, UST, FINDS, ICR, VCP, ALLSITES, CSCSL NFA, and RGA HWS databases. According to the EDR Report, a UST was removed from the Site in 2001 after the Site had been included in the LUST database from 1995 to 1999. The Site was listed on the hazardous waste facilities list in 1995 and an independent cleanup report was submitted to the Washington State Department of Ecology in 1998 regarding petroleum product and solvents contamination in groundwater. The Site entered the VCP and received an NFA determination in 2000.

**Eastside Chrysler Jeep Bellevue** at 200 116<sup>th</sup> Avenue Northeast, located on the Site, was identified in the ALLSITES, RCRA NonGen/NLR, FINDS and ECHO databases. According to the EDR Report, the Site was a hazardous waste generator in 1985 and hazardous waste planner in 1993. The Site was listed as a large-quantity generator of hazardous waste in 1993 and 1994 with no violations noted and two compliance assistance visits in 1993 and 1997. The Site was identified as a handler of hazardous waste from 2003 to 2005 and noted as a non-generator.

Farallon searched the Ecology Toxics Cleanup Program database (Ecology database) for the Site addresses, which indicated the Site has operated under alternate names, including Bellevue Chrysler Plymouth, Eastside Chrysler Jeep, and Eastside Jeep Eagle. Contamination was reported in 1993 after LUST reports were received between 1989 and 1990. The Site had confirmed

releases of halogenated organics, non-halogenated solvents, and petroleum products to groundwater and petroleum products to soil as well as remediated releases of halogenated organics and non-halogenated solvents to soil. Regulatory files were not reviewed during completion of this report due to the time and/or cost constraints of this Phase I ESA; additional information may be available at Ecology. The known and potential release of hazardous substances and/or petroleum products associated with former operations on the Site represents a recognized environmental condition in connection with the Site. Additional information regarding the Site is provided in Section 4.5, Previous Environmental Studies.

## 6.2 ADJACENT AND OTHER FACILITY LISTINGS

Reported facilities within 0.25 mile up-gradient, 0.125 mile cross-gradient, or adjacent down-gradient of the Site are considered to have a potential to have impacted the Site. Facilities that were listed in the EDR Report but not identified as a reported facility (e.g., a facility listed as a hazardous waste generator but not as having had a release), and facilities that were listed as “Closed” were not considered to have a potential to have impacted the Site.

- **Dodge of Bellevue** at 316 116<sup>th</sup> Avenue Northeast, north-adjacent to the Site and at a lower topographic elevation, was identified in the CSCSL, LUST, UST, VCP, ALLSITES, RCRA NonGen/NLR, FINDS, ECHO, Historical Auto, and MANIFEST databases. According to the EDR Report, the facility has suspected releases of non-halogenated solvents to soil and confirmed releases of gasoline and diesel to soil and groundwater, with a status of “Cleanup Started.” A UST was reportedly installed at the facility in 1964 and removed as of 1988. The facility was included in the LUST database, but received an NFA determination as of 2004. According to the EDR Report, the facility was not listed as a hazardous waste generator in 2000 and 2003, but was listed as a large-quantity generator in 1993 and 1994, with no violations found. The facility operated as an automotive repair facility from 2005 to 2006. Farallon searched the Ecology database for the facility, which indicated the property was redeveloped for retail use in 2015 and 2016; during redevelopment, contamination on the facility was identified and removed. Monitoring wells installed on the facility were sampled in 2015. Benzene, toluene, ethylbenzene, and xylenes compounds, total petroleum hydrocarbons, and halogenated volatile organic compounds were not detected in groundwater samples collected from the monitoring wells. Furthermore, laboratory analysis of soil samples collected during the 2015 sampling event indicated that soil remaining on the facility met MTCA Method A cleanup standards. The facility was enrolled in the VCP in June 2017 in order to obtain an NFA designation for the facility and removal of the environmental covenant for a portion of the facility. Based on the current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **Eastside Chrysler Jeep and Eastside Jeep Eagle** at 400 116<sup>th</sup> Avenue Northeast, north-adjacent to the Former Dodge of Bellevue facility described above and north of the Site and at a lower topographic elevation, was identified in the RCRA-LQG, INST CONTROL, ALLSITES, CSCSL NFA, FINDS, ICR, and ECHO databases. According to the EDR Report, the facility received an NFA determination in 1999 after confirmed releases of

petroleum products and volatile organic compounds to soil and groundwater were cleaned up, and Ecology determined the contamination sources had been removed and groundwater contamination was limited to the southern portion of the facility. An environmental covenant was recorded for the facility in 1999 stipulating the contamination level exceedance in groundwater was a conditional point of compliance to allow a property transaction to proceed based on the rapidly improving results due to the successful soil cleanup. Based on the current regulatory status and relative distance from the Site, this facility does not represent a recognized environmental condition in connection with the Site.

- **Lincoln Mercury of Bellevue, Evered Lincoln-Mercury Inc, and Evered Motors** at 420 116<sup>th</sup> Avenue Northeast, 0.09 mile north and cross-gradient of the Site and at a higher topographic elevation, was identified in the Historical Auto, CSCSL, LUST, UST, ICR, RCRA NonGen/NLR, FINDS, ECHO, and ALLSITES databases. The facility was listed as an auto dealership in 1987. According to the EDR Report, the facility has confirmed releases of benzene, gasoline, and diesel to soil and groundwater, with a status of “Cleanup Started.” According to the EDR Report, the facility was not listed as a hazardous waste generator in 2003, but was listed as a large-quantity generator from 1990 to 1994, with no violations found. The facility was included in the LUST database as of 1995. According to the EDR Report, two USTs were installed in 1962 and 1964 at the facility; one UST was closed in-place and one UST was removed in 1996. Farallon searched the Ecology database for the facility, which indicated the facility is undergoing independent cleanup action. Interim cleanup reports were received by Ecology from 1994 to 1999. Based on the current regulatory status and relative distance from the Site, this listing does not represent a recognized environmental condition in connection with the Site.
- **Home Depot and Unicraft Printing**, approximately 0.14 mile east of the Site and at a higher topographic elevation, was identified in the ICR, CSCSL, RCRA NonGen/NLR, ALLSITES, FINDS, and ECHO databases. According to the EDR Report, contamination of halogenated organics, non-halogenated solvents, and petroleum products has been confirmed in groundwater at the facility and has been remediated from soil at the facility, and the facility has a status of “Cleanup Started.” The facility previously operated as a commercial printing facility. Home Depot currently occupies the facility for the purpose of retail sales, and has received multiple notices of violations regarding pre-transport, container use and management, state statutes or regulations, and general generator violations. The facility was able to achieve compliance with all noted violations. Home Depot reported a 2-gallon hydraulic oil spill in 2013 that reportedly spilled into impermeable containment. Farallon searched the Ecology database for the facility, which indicated no cleanup activities have occurred on the facility since 1999. Based on the relative distance from the Site, this facility does not represent a recognized environmental condition in connection with the Site.

### **6.3 HISTORICAL AUTO STATIONS**

Reported historical auto and gasoline stations within 250 feet of the Site are considered to have a potential to have impacted the Site. The EDR Report identified four historical auto stations less than 250 feet from the Site and at equal or higher elevations. The current and historical automobile dealerships have been investigated for Site impacts and are detailed above in Section 6.2, Adjacent and Other Facility Listings. These facilities do not represent a recognized environmental condition in connection with the Site.

### **6.4 HISTORICAL DRY CLEANING FACILITIES**

Reported historical dry cleaning facilities within 250 feet of the Site are considered to have a potential to have impacted the Site. The EDR Report did not identify historical dry cleaning facilities within 250 feet of the Site.

### **6.5 UNMAPPABLE LISTINGS**

EDR identified 11 facilities as “orphan sites” that EDR was unable to map due to inaccurate or inadequate address information. Farallon located these orphan sites and, according to the addresses provided by EDR, the facilities are not located within the respective search radii. The orphan sites located do not represent a recognized environmental condition in connection with the Site.

## **7.0 INTERVIEWS**

Farallon conducted interviews with individuals' familiar with the Site and contacted relevant local governmental agencies to obtain additional Site information. The responses from the parties contacted are provided below.

### **7.1 INTERVIEW WITH SITE REPRESENTATIVE**

During the site reconnaissance, Farallon interviewed Mr. Jeff Rocky, the Site demolition contractor and representative of the Site owner, on September 12, 2017. The following information was obtained from this interview:

- The former buildings on the Site were demolished to grade approximately one week ago.
- Two 55-gallon drums of waste oil and debris currently are stored on the Site, awaiting proper off-Site disposal.
- The oil-water separator on the southern portion of the Site contains oil and sludge.
- A former vehicle wash bay was in the vicinity of the oil-water separator.
- No drinking water wells were encountered during demolition of the buildings.
- Several drains and below-grade utility connections remain in place within the footprint of the former buildings.
- People were accessing the Site and camping in the vegetated areas prior to demolition of the buildings. A fence was installed to prevent people from entering the Site.
- The Former Service Building was used as a maintenance service bay.
- No reportable spills or releases were observed during demolition of the buildings.

Mr. Rocky stated that he had not been made aware of any pending, threatened, or past:

- Litigation relevant to hazardous substances or petroleum products in, on, or from the Site;
- Administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site; or
- Notices from a governmental entity regarding violations of environmental laws or liability relating to hazardous substances or petroleum products.

### **7.2 INTERVIEW WITH FIRE DEPARTMENT**

Farallon contacted the Bellevue Fire Department on September 5, 2017 regarding previous and current ASTs and USTs at the Site. A representative of the Bellevue Fire Department indicated that all public records requests should be routed through the City of Bellevue.

### **7.3 INTERVIEW WITH CITY**

Farallon contacted the City of Bellevue on September 1, 2017 to inquire whether notices of violations and/or reported hazardous spills at the Site were on file, and regarding previous and current ASTs and USTs at the Site. No response from the City of Bellevue was received prior to completion of this Phase I ESA Report.

### **7.4 INTERVIEW WITH HEALTH DEPARTMENT**

Farallon contacted Public Health—Seattle and King County on September 1, 2017 to inquire whether notices of violations and/or reported hazardous spills at the Site were on file. No response from Public Health—Seattle and King County was received prior to completion of this Phase I ESA Report.

## **8.0 SITE RECONNAISSANCE**

Farallon conducted a site reconnaissance on September 12, 2017 to observe the Site for physical evidence of recognized environmental conditions. The methodology used for the site reconnaissance and the observations made during the reconnaissance are discussed below. A description of the Site is provided in Section 2.2, Site Description. Photographs taken during the site reconnaissance are presented in Appendix B.

### **8.1 SITE RECONNAISSANCE METHODOLOGY**

Farallon completed a walk around accessible portions of the perimeter of the Site. There were no deviations from ASTM E1527-13 during the Phase I ESA. Limiting conditions encountered during the Phase I ESA were the presence of vehicles parked on the northern portion of the Site and dense vegetation on the eastern portion of the Site that prevented Farallon from observing the entire ground surface. In addition, the far eastern boundary of the Site was not accessible due to a fence installed for security purposes. Based on information obtained from the Site representative, these limiting conditions are not expected to hinder the conclusions of this report.

### **8.2 SITE RECONNAISSANCE OBSERVATIONS**

Weather conditions at the time of the reconnaissance were sunny, with a temperature of approximately 60 degrees Fahrenheit. No weather-related Site-access restrictions were encountered during the reconnaissance.

The Site consists of King County Parcel No. 332505-9041, which totals approximately 4.98 acres. Two adjoining buildings formerly occupied the southern portion of the Site: the Former Auto Dealership, a one-story, 9,216-square-foot auto dealership and auto repair facility constructed in 1960; and the Former Service Building, a one-story, 21,840-square-foot auto service garage building constructed in 1965. At the time of Farallon's site reconnaissance, the buildings had been demolished to grade. Remaining areas of the Site include a paved auto lot leased by AutoNation and vegetated areas. A retaining wall made of used tires and covered in blackberry bushes is north of the former buildings. Access to the Site is gained from 116<sup>th</sup> Avenue Northeast, west of the Site.

#### **8.2.1 Interior Observations**

No buildings were present on the Site. In general, the concrete slab of the former Site buildings remains in place. Farallon's observations of the area within the footprint of the former buildings during the site reconnaissance are documented in the table below. Comments pertaining to those observations follow in Section 8.2.2. Photographs taken during the site reconnaissance are provided in Appendix B.

<b>INTERIOR OBSERVATIONS</b>	<b>YES</b>	<b>NO</b>
Odor		X
Heating/Cooling System		X
Drain(s) and/or Sump(s)	X	
Staining and/or Corrosion		X
Storage Tank(s), Vent Pipe(s), Fuel Port(s), and/or Fill Pipes		X
Clarifier(s)		X
Discharge Area		X
Drum(s) and/or Other Container(s)		X
Pool(s) of Liquid		X
Automobile Lift(s)	X	
Monitoring Well(s)		X
Hazardous Material(s) and/or Petroleum Product(s)		X
Hazardous Waste		X

### **8.2.2 Interior Observation Comments**

#### **Drain(s) and/or Sump(s)**

Farallon observed drains, trench drains, and heavy equipment and utility connections in the ground surface within the former footprint of the former Site buildings. No evidence of significant staining or releases were observed in the vicinity of these features; however, the concrete slab had recently been cleaned by the demolition contractor.

#### **Automobile Lift(s)**

Farallon observed evidence of approximately 12 former below-grade hydraulic hoists in the eastern portion of the buildings' footprint, which were reportedly within the service bay in the Former Service Building. No evidence of significant staining or releases were observed in the vicinity of these features; however, the concrete slab had recently been cleaned by the demolition contractor.

### **8.2.3 Exterior Observations**

Farallon's observations of the exterior of the Site during the site reconnaissance are documented in the table below. Comments pertaining to notable exterior observations follow in Section 8.2.4. Photographs taken during the site reconnaissance are provided in Appendix B.

<b>EXTERIOR OBSERVATIONS</b>	<b>YES</b>	<b>NO</b>
Odor		X
Staining and/or Corrosion	X	
Storage Tank(s), Vent Pipe(s), and/or Fuel Port(s)		X
Drum(s) and/or Other Container(s)	X	
Pool(s) of Liquid		X
Hazardous Material(s) and/or Petroleum Product(s)		X
Hazardous Waste		X
Pit(s), Pond(s), and/or Lagoon(s)		X
Stressed Vegetation		X
Solid (Non-Hazardous) Waste—Evidence of Dumping	X	
Wastewater	X	
Domestic Water	X	
Water Well(s)	X	
Septic/Sewer System	X	
Stormwater	X	
Transformer(s)	X	
Significant Amount of Fill Material		X

## 8.2.4 Exterior Observation Comments

### Staining and/or Corrosion

Farallon observed de minimis petroleum staining throughout the Site that appeared to be from parked vehicles on the Site.

### Drum(s) and/or Other Container(s)

Farallon observed two 55-gallon drums used to store waste oil and debris accumulated during demolition of the former Site buildings. An empty 20-gallon drum was observed near the 55-gallon drums. No evidence of staining or releases was observed in the vicinity of the drums. An oil-water separator and various catch basins and drains were observed on the southern portion of the Site. According to the Site representative, oil remains in the below-grade oil-water separator. Farallon observed a hole/drain in the ground with piping and standing oil west of the oil-water separator. The Site representative was not familiar with the hole/drain or its purpose.

### **Solid (Non-Hazardous) Waste—Evidence of Dumping**

Farallon observed household debris along the eastern portion of the Site. According to the Site representative, people were accessing the Site and camping in the vegetated areas prior to demolition of the former Site buildings. A fence was installed to prevent people from entering the Site.

### **Wastewater**

An oil-water separator and various catch basins and drains were observed on the southern portion of the Site. According to the Site representative, oil remains in the below-grade oil-water separator. Farallon observed a hole/drain in the ground with piping and standing oil west of the oil-water separator. The Site representative was not familiar with the hole/drain or its purpose.

### **Domestic Water**

Domestic water lines were observed in the west-adjacent public rights-of-way.

### **Water Well(s)**

According to historical assessor records, a domestic water well supplied water to a historical residence on the Site, but Farallon was unable to locate a well during the site reconnaissance. The inconsistency in the date the residence was removed from the Site and the insufficient information regarding the well, including a decommissioning date, is a data gap for this report.

Farallon observed several groundwater monitoring wells throughout the Site that were installed in connection with previous environmental investigations completed at the Site, as discussed in Section 4.5, Previous Environmental Studies.

### **Septic/Sewer System**

Sanitary sewage formerly generated at the Site discharged to the municipal sanitary sewer system.

### **Stormwater**

Stormwater on the Site is directed into catch basins on the Site, which discharge to the municipal stormwater system.

### **Transformer(s)**

Farallon observed pad-mounted transformers throughout the Site. The transformers appeared to be in good condition, with no evidence of releases noted. The transformers are owned by Puget Sound Energy.

## 9.0 FINDINGS AND OPINIONS

Farallon observed de minimis petroleum staining throughout the Site that appeared to be from parked vehicles on the Site.

An oil-water separator and various catch basins and drains were observed on the southern portion of the Site. According to the Site representative, oil remains in the below-grade oil-water separator. Farallon observed a hole/drain in the ground with piping and standing oil west of the oil-water separator. The Site representative was not familiar with the hole/drain or its purpose. In addition, Farallon observed trench drains, evidence of former hydraulic hoists, and heavy equipment and utility connections in the ground surface within the former footprint of the former Site buildings. No evidence of significant staining or releases was observed in the vicinity of these features; however, the concrete slab had recently been cleaned by the demolition contractor. Farallon observed several groundwater monitoring wells throughout the Site that were installed in connection with previous environmental investigations completed at the Site.

Historically, the Site appeared to be developed with a residence and appeared to be used for agricultural production from at least 1944. According to historical assessor records, a domestic water well supplied water to the historical residence, but Farallon was unable to locate a well log for the Site. The inconsistency in the date the residence was removed from the Site and the insufficient information regarding the well, including a decommissioning date, is a data gap for this report. By 1965, the residence appeared on the northern portion of the Site and an auto dealership building and facility on the southern portion of the Site. City directory listings for the Site address included Overlake Oldsmobile or Overlake Chrysler, Bellevue Chrysler Plymouth, Eastside Chrysler Jeep, and Eastside Jeep Eagle. Auto dealerships and maintenance facilities are known to store and generate hazardous substances and petroleum products. Based on historical operations of the Site and previous environmental investigations completed at the Site, the known and potential release of hazardous substances and/or petroleum products associated with former operations on the Site represents a recognized environmental condition in connection with the Site.

Farallon was provided with multiple previous environmental studies prepared for the Site and for the north-adjacent auto dealership property, including the 2015 Phase I report. According to the 2015 Phase I report, the Site buildings had been vacant since 2009 and outdoor areas of the Site had been periodically used for overflow parking of new vehicles. The 2015 Phase I report indicated that considerable environmental evaluation and cleanup had been completed on the north-adjacent property and on the Site since the late 1980s, including underground storage tank removals, soil and groundwater sampling, drainage system upgrades, contaminated soil excavation, oxygen release compound injection, and groundwater monitoring.

According to the 2015 Phase I report, approximately 1,000 cubic yards of petroleum-contaminated soil was suspected to be present beneath the vacant Site buildings despite a location-specific groundwater NFA determination issued for a portion of the Site in 2000. The partial NFA determination was specific to contaminated soil and groundwater in the Former Service Building,

and stipulated groundwater monitoring would have to continue for four consecutive quarters to assure the impacted groundwater did not pose a threat to human health or the environment. Groundwater sampling confirmed shallow groundwater beneath the Site buildings continued to contain diesel- and oil-fraction petroleum at concentrations exceeding cleanup standards. According to the 2015 Phase I ESA, the residual soil and groundwater petroleum contamination were considered to be controlled recognized environmental conditions in connection with the Site. Because of the recent demolition of the former Site buildings, Ecology likely will require the remediation and/or removal of impacted soil and groundwater that remaining on the Site. The known and potential release of hazardous substances and/or petroleum products associated with former operations on the Site represents a recognized environmental condition in connection with the Site.

Hazardous material surveys conducted for the Site buildings confirmed the presence of asbestos- and potentially lead-containing building materials that would need to be abated prior to the demolition of the structures. According to the demolition contractor, the materials were properly disposed of during demolition of the buildings.

The EDR Report identified the Site address in several databases. The Site operated as a historical auto dealership, and previous cleanups have been performed on the Site. The Site was listed on the hazardous waste facilities list in 1995, and an independent cleanup report was submitted to Ecology in 1998 regarding petroleum product and solvents contamination in groundwater. The Site entered the Ecology VCP and received a NFA determination in 2000. Farallon searched the Ecology Toxics Cleanup Program database for the Site, which indicated the Site has operated under alternate names, including Bellevue Chrysler Plymouth, Eastside Chrysler Jeep, and Eastside Jeep Eagle. Contamination was reported in 1993 after LUST reports were received between 1989 and 1990. The Site had confirmed releases of halogenated organics, non-halogenated solvents, and petroleum products to groundwater and petroleum products to soil as well as remediated releases of halogenated organics and non-halogenated solvents to soil. Regulatory files for the Site were not reviewed due to the time and/or cost constraints of this Phase I ESA.

## 10.0 CONCLUSIONS

Farallon conducted a Phase I ESA for the Bellevue South property at 200 116<sup>th</sup> Avenue Northeast in Bellevue, Washington in conformance with the scope and limitations of ASTM E1527-13. Any exceptions to or deletions from this practice are described in Section 1.5, Deviations.

This assessment identified the following recognized environmental condition in connection with the Site:

- The known and potential release of hazardous substances and/or petroleum products associated with former operations on the Site.

## 12.0 LIMITATIONS

### 12.1 GENERAL LIMITATIONS

The conclusions contained in this report/assessment are based on professional opinions with regard to the subject matter. These opinions have been arrived at in accordance with currently accepted hydrogeologic and engineering standards and practices applicable to this location. The conclusions contained herein are subject to the following inherent limitations:

- **Accuracy of Information.** Farallon obtained, reviewed, and evaluated certain information used in this report/assessment from sources that were believed to be reliable. Farallon's conclusions, opinions, and recommendations are based in part on such information. Farallon's services did not include verification of its accuracy or authenticity. Should the information upon which Farallon relied prove to be inaccurate or unreliable, Farallon reserves the right to amend or revise its conclusions, opinions, and/or recommendations.
- **Reconnaissance and/or Characterization.** Farallon performed a reconnaissance and/or characterization of the Site that is the subject of this report/assessment to document current conditions. Farallon focused on areas deemed more likely to exhibit hazardous materials conditions. Contamination may exist in other areas of the Site that were not investigated or were inaccessible. Site activities beyond Farallon's control could change at any time after the completion of this report/assessment.

For the foregoing reasons, Farallon cannot and does not warrant or guarantee that the Site is free of hazardous or potentially hazardous substances or conditions, or that latent or undiscovered conditions will not become evident in the future. Farallon's observations, findings, and opinions can be considered valid only as of the date of the report.

This report/assessment has been prepared in accordance with the contract for services between Farallon and Virginia Mason Medical Center, and currently accepted industry standards. No other warranties, representations, or certifications are made.

### 12.2 LIMITATION ON RELIANCE BY THIRD PARTIES

**Reliance by third parties is prohibited.** This report/assessment has been prepared for the exclusive use of Virginia Mason Medical Center to address the unique needs of Virginia Mason Medical Center at the Site at a specific point in time.

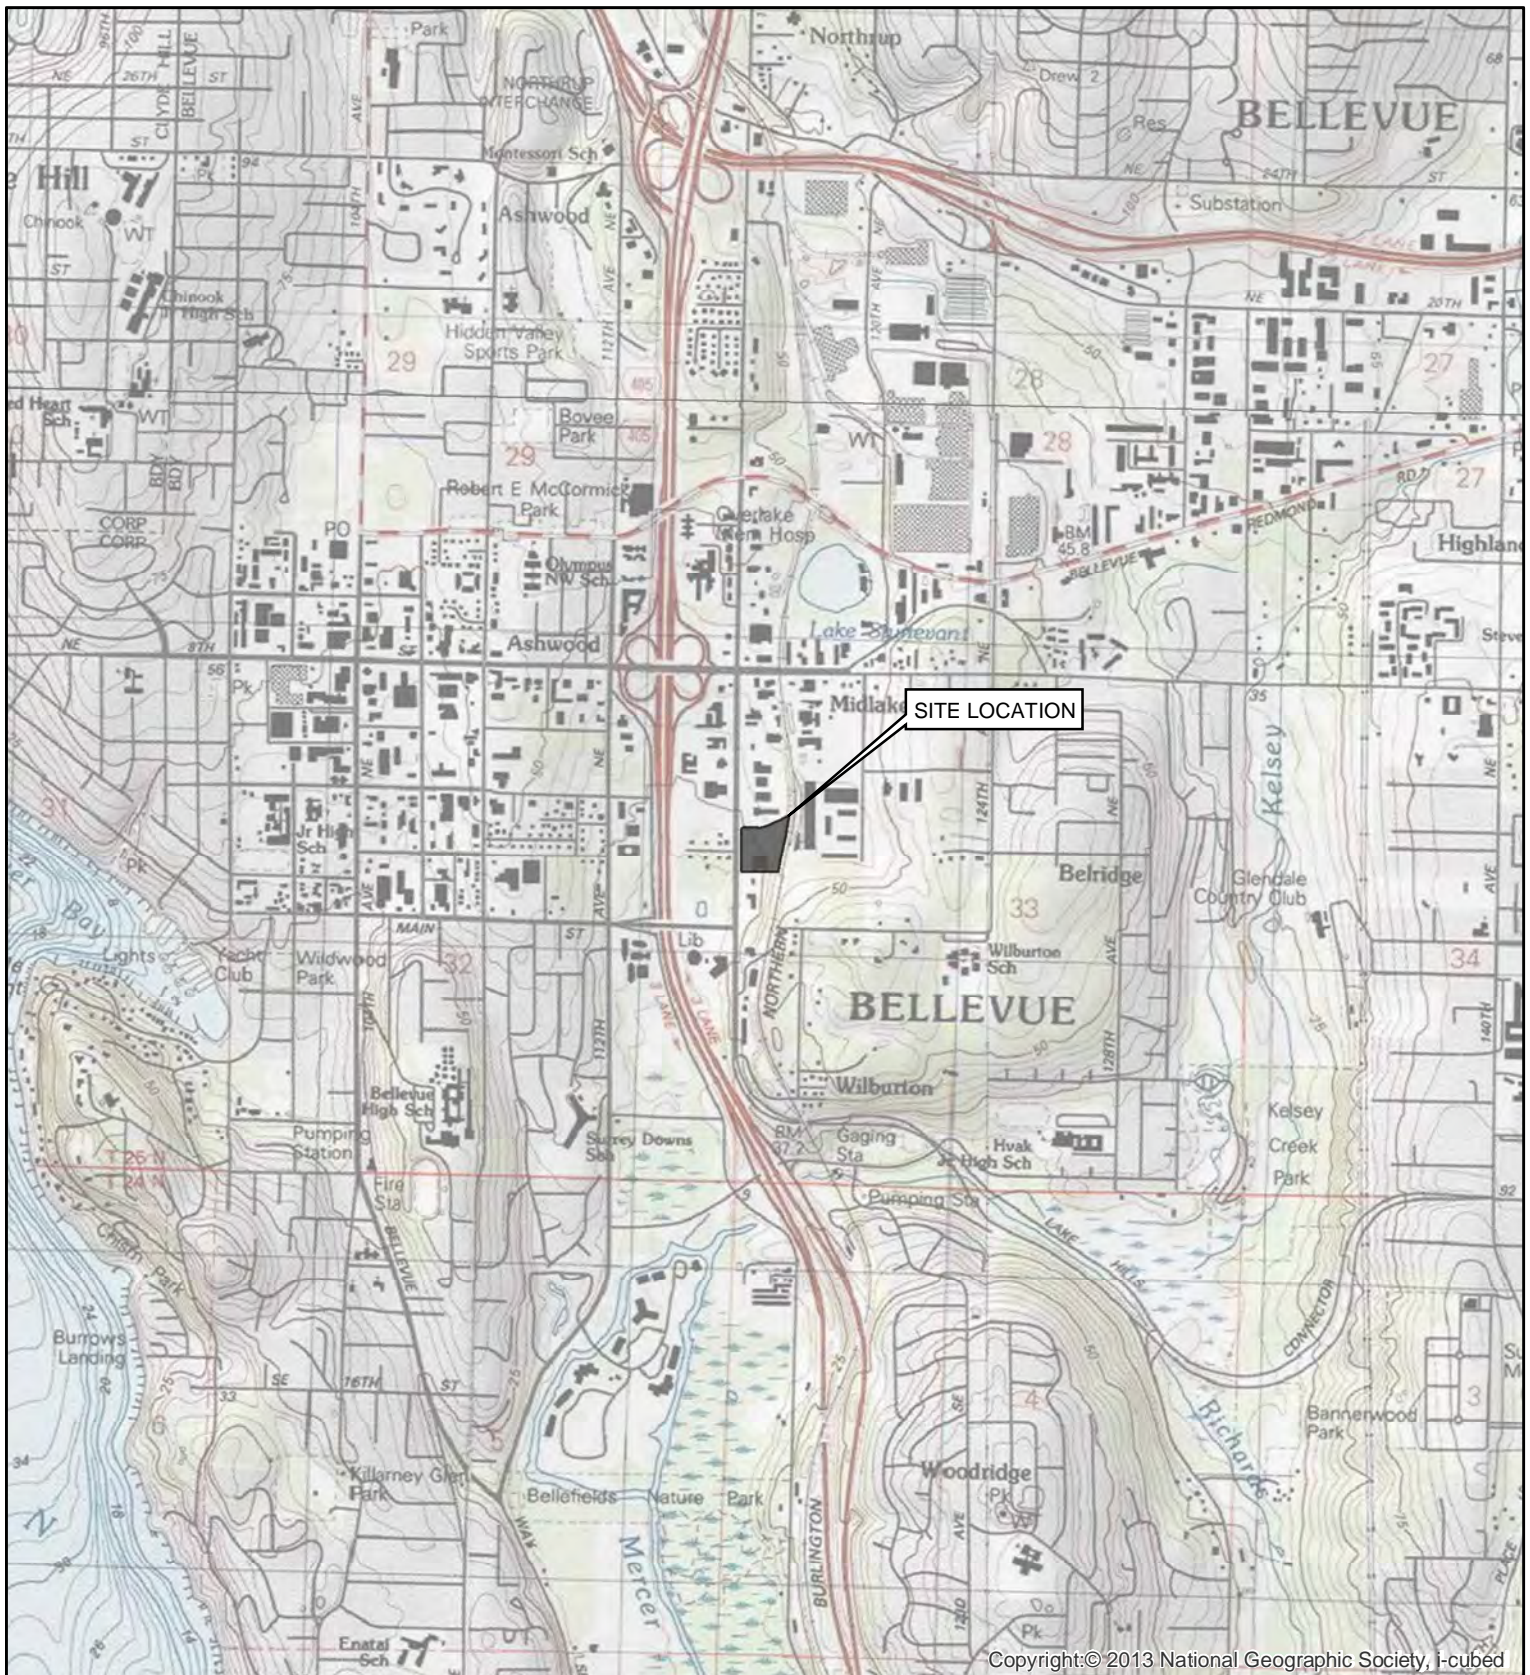

This is not a general grant of reliance. No one other than Virginia Mason Medical Center may rely on this report unless Farallon agrees in advance to such reliance in writing. Any unauthorized use, interpretation, or reliance on this report/assessment is at the sole risk of that party, and Farallon will have no liability for such unauthorized use, interpretation, or reliance.

**SARA HAYNES**    **BS Civil Engineering**  
Project Environmental Scientist/Engineer              11 years experience

Ms. Haynes has more than 11 years of professional experience in environmental consulting, construction engineering, and project management. Specialty areas include civil engineering, construction management, project quality control and quality assurance, land use and water rights regulatory permitting, ecological land analysis, and mapping. She provides natural resource, agriculture, and land use consulting services enabling clients to maintain regulatory compliance. Ms. Haynes has managed construction and natural resource projects for clients with interests in the Pacific Northwest, Alaska, Australia, and remote sites in Chile, Iceland, and Antarctica.

**TINA M. HUFF**    **BA Environmental Studies**  
Principal Regulatory Specialist    17 years experience

Ms. Huff has a broad range of experience with environmental due diligence and regulatory requirements. She manages and conducts environmental due diligence for property transactions, including Phase I ESAs, risk assessment audits, environmental compliance audits, and Phase II Site Investigations throughout the western United States. She is Asbestos Hazard Emergency Response Act-certified for asbestos, and has completed training for ASTM E1527-13 Phase I ESA protocol and for mold in construction. Ms. Huff has certificates in Dangerous Waste Management and Occupational Safety and Health Administration Compliance.

## PHASE I ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the Phase I Environmental Site Assessment (Phase I ESA) Report user must provide the following information (if available) to the environmental professional (Farallon Consulting, L.L.C.). Failure to provide this information could result in the determination that "all appropriate inquiry" has not been completed.

Date: 9-28-17

### ■ PROJECT/SITE INFORMATION

Client Name: Virginina Mason Medical Center Client Telephone: (888) 862-2737

Client Address: 1100 Ninth Avenue, R3-DCPM, Seattle, WA 98101

Asset #: Project/Site Name: Bellevue South

Project Street Address: 200 116th Avenue NE

City: Bellevue County: King County State: WA Zip: 98004

Why is this Phase I ESA required?

Property Transaction:

Sale  Purchase  Exchange  Other

Comments: Lease of commercial space

### ■ PROPERTY USE & SPECIFICATIONS

Single-Family Residential  Vacant or Undeveloped Land

Multi-Family Residential #Units:  Agricultural (Specify type):

Commercial Office  Industrial (Specify type):

Commercial Retail  Other (Specify type):

Provide a general Site description: Lease of space in shopping center to be developed and located at 200 116th Avenue NE in Bellevue, Washington.

Legal description/plat plan/boundary survey available?  Yes  No  Already provided

Current Property Status:  Vacant  Occupied  Improved  Unimproved

Total Property Size: 4.98 acres Original Construction Date: Unknown

Total # of Buildings: 0 Was Construction Phased?  Yes  No  Unknown

Total Sq. Ft. of Buildings: None Date(s) of Renovation(s)/Phases: Unknown

Does Site have an undeveloped area equal to 1 acre or more?  Yes  No

Are any bodies of water on or immediately adjacent to the Site?  Yes  No If Yes, describe:

Comments: Unknown

Potable water source at Site?  On-Site well  Utility (Specify provider) Unknown

Wastewater discharge at Site?  Septic Tank/Drainfield  Sanitary Sewer  Other (Specify):

Building plans available at the Site?  Yes  No  Unknown  Already provided

**■ OWNERS**

Current Owner(s): KG Investment Properties

Previous Owner(s): Unknown

**■ OCCUPANTS/TENANTS**

Current Occupant(s)/Tenant(s) and operations: Unknown

Previous Occupant(s)/Tenant(s) and operations: Unknown

**■ PREVIOUS PROPERTY USES**

Describe previous use(s) of the Site: Auto dealership, auto repair facility, auto service garage.

**■ PREVIOUS INVESTIGATIONS**

Has any previous environmental investigation been conducted at Site?  Yes  No  Unknown

If Yes, note type and describe:  Phase I ESA  Asbestos  Lead Paint  Lead in Water

Radon  Wetlands  Indoor Air  UST/AST  Other (*Specify type below*)

Comments:

**■ ON-SITE ENVIRONMENTAL CONDITIONS**

Are you aware of any of the following environmental conditions at the Site, either current or former?

<b>Environmental Condition/Issue</b>	<b>Response</b>	<b>Comment if Yes Response</b>
Aboveground Storage Tank	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Underground Storage Tank	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Historic/National Landmark	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Oil/Gas Well	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Water Well	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Environmental Cleanup	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Environmental Permit	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

**■ OFF-SITE ENVIRONMENTAL CONDITIONS**

On adjoining property, are there any: Gasoline Stations?  Yes  No Drycleaners?  Yes  No

Are you aware of any other environmental conditions or concerns on adjacent or nearby properties?  
 Yes  No

Comments Unknown whether there are gas stations or drycleaners on adjoining property.

**(1) Environmental cleanup liens that have been filed or recorded against the Site (Part 312.25 of Title 40 of the Code of Federal Regulations [40 CFR 312.25])**

Are you aware of any environmental cleanup liens against the Site that have been filed or recorded under federal, tribal, state, or local law? No

**(2) Activity and land use limitations that are in place at the Site or that have been filed or recorded in a registry (40 CFR 312.26)**

Are you aware of any activity and land use limitation (such as engineering controls, land use restrictions, or institutional controls) that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state, or local law? No

**(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)**

As the user of the Phase I ESA Report, do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupant(s) of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? No

**(4) Relationship of the purchase price to the fair market value of the Site if it were not contaminated (40 CFR 312.29)**

Does the purchase price being paid for this Site reasonably reflect the fair market value of the Site? If you conclude that there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Site? N/A

**(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the Site that would help Farallon Consulting, L.L.C. to identify conditions indicative of a chemical or other release or threatened release? For example, as user of the Phase I ESA Report:

Do you know the past use(s) of the Site? (If yes, please specify.) No

Do you know of a specific chemical(s) present at the Site, or present at one time? (If yes, please specify.) No

Do you know of a chemical and/or other spill(s) or release(s) that have taken place at the Site? (If yes, please specify.) No

Do you know of any environmental cleanup(s) that have taken place at the Site? (If yes, please specify.) No

**(6) The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**

As the user of the Phase I ESA Report, based on your knowledge and experience related to the Site, is there any obvious indicator(s) that point to the presence or likely presence of contamination at the Site? (If yes, please specify.) No

**Identify all parties who will rely on the Phase I ESA Report, including:**

Name of Business: Virginia Mason Medical Center

Name of Contact: Rich Mencil, Administrative Director, Facilities and Support Services

Address: 1100 Ninth Avenue, R3-DCPM, Seattle, WA 98101

Telephone Number: (206) 341-0949

E-mail Address: Rich.Mencil@virginiamason.org

**Has any party that will rely on the Phase I ESA Report required services beyond the standard ASTM E1527-13? (For example, an asbestos, lead-based paint, lead in drinking water, or wetlands investigation) (If yes, please specify.) No**

**Who is the Site contact, and how can the contact be reached?**

Name of Business: KG Investment Properties

Name of Contact: Andrew Coates, Managing Director

Address: 11225 SE 6th Street, Suite 215, Bellevue, WA 98004

Telephone Number: 425) 688-3906

E-mail Address: acoates@kgip.com

**Are there any special terms and conditions that must be agreed upon by Farallon Consulting, L.L.C.?**  
(If yes, please specify.) No

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

126-200 116TH AVE NE  
BELLEVUE, WA 98005

#### COORDINATES

Latitude (North): 47.6123670 - 47° 36' 44.52"  
Longitude (West): 122.1844100 - 122° 11' 3.87"  
Universal Transverse Mercator: Zone 10  
UTM X (Meters): 561295.4  
UTM Y (Meters): 5273321.5  
Elevation: 93 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 6005537 MERCER ISLAND, WA  
Version Date: 2014  
  
North Map: 6005535 KIRKLAND, WA  
Version Date: 2014

### AERIAL PHOTOGRAPHY IN THIS REPORT

Portions of Photo from: 20150825, 20150807

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b><i>Not reported</i></b>	<b><i>400 116TH AVE NE</i></b>	<b><i>SW 0 - 1/8 (0.021 mi.)</i></b>	<b><i>C14</i></b>	<b><i>16</i></b>

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### **State- and tribal - equivalent NPL**

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/21/2017 has revealed that there are 4 WA HSL sites within approximately 1 mile of the target property.

### **State- and tribal - equivalent CERCLIS**

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 04/18/2017 has revealed that there are 48 WA CSCSL sites within approximately 1 mile of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 04/18/2017 has revealed that there are 19 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that

## EXECUTIVE SUMMARY

there are 19 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

## EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

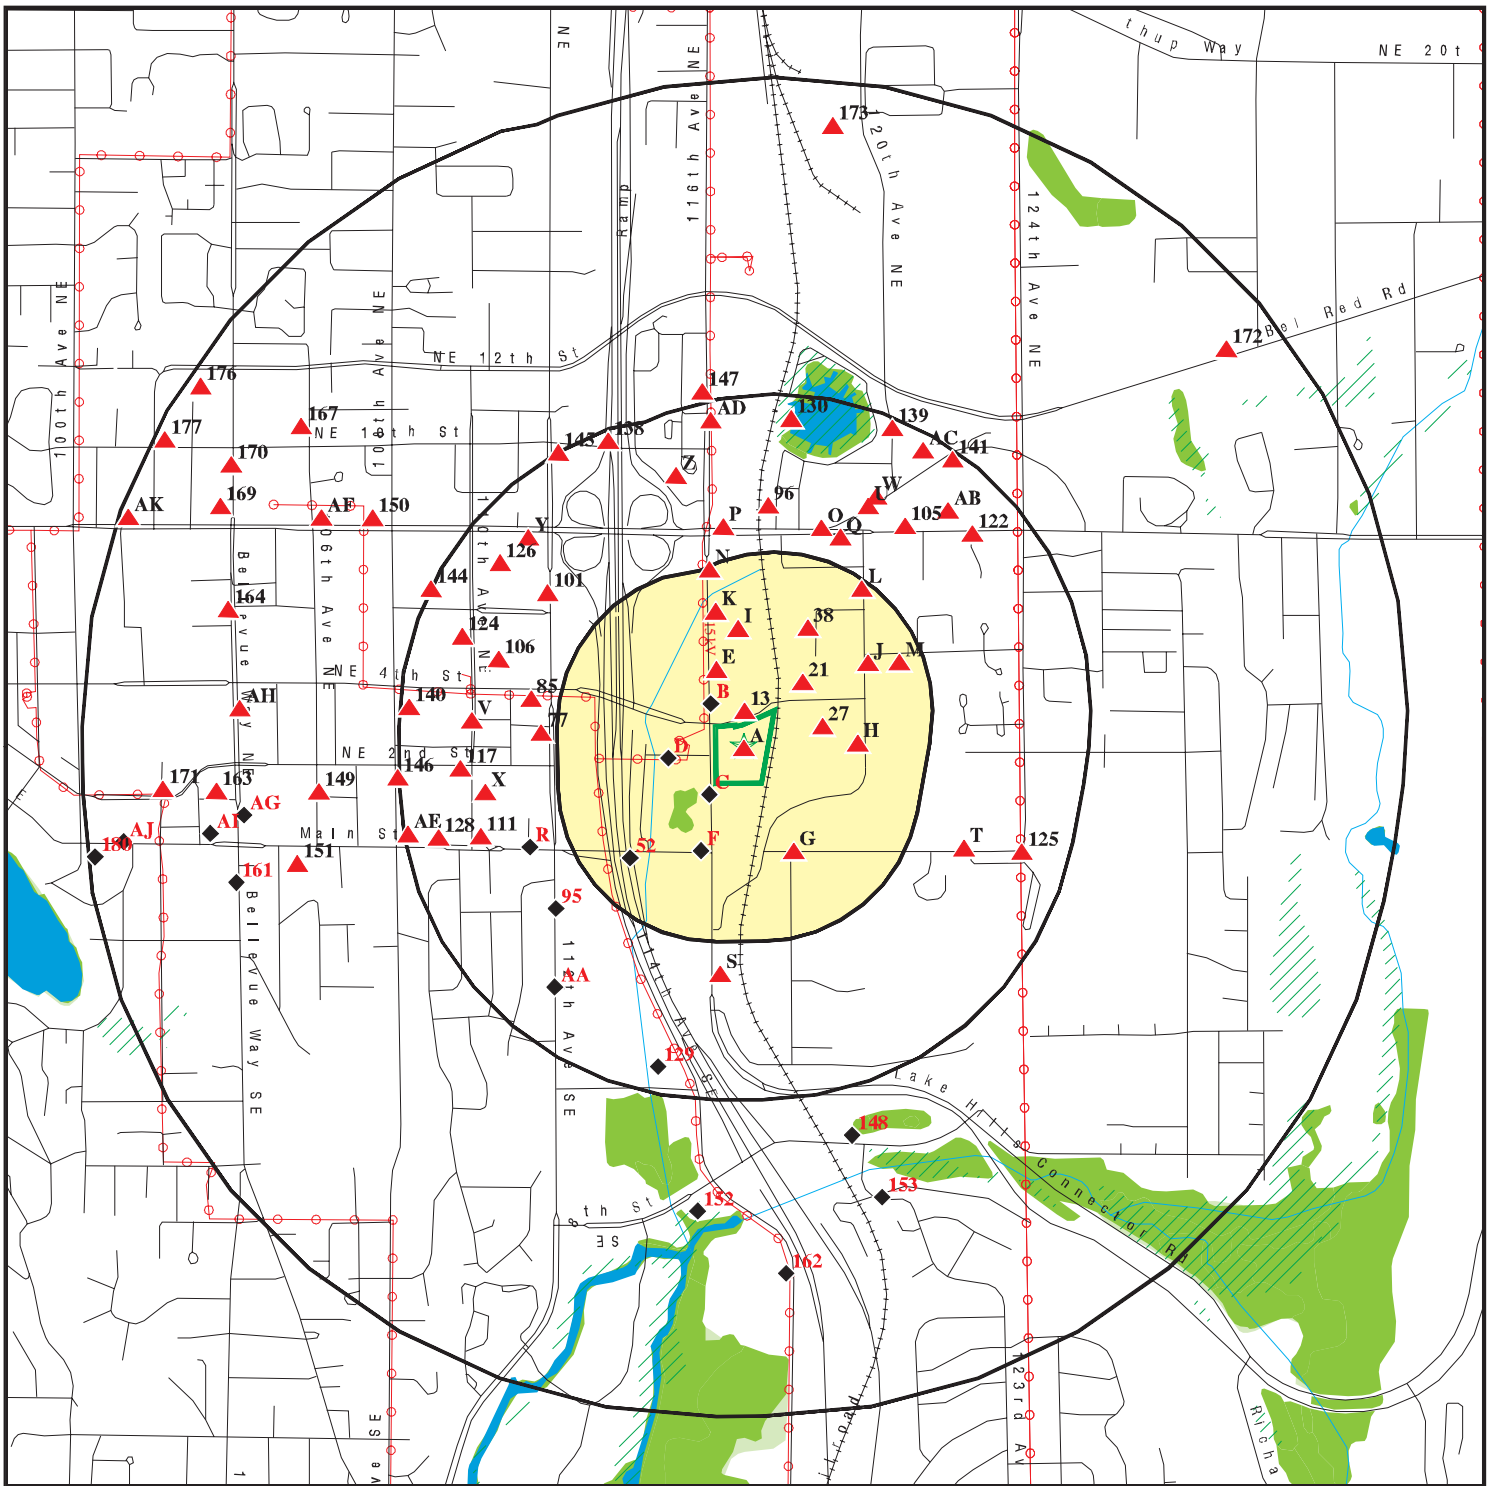

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110005324871

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110000827963

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Historical Generators:

Date form received by agency: 02/26/2010  
Site name: CAMP DRESSER & MCKEE  
Classification: Conditionally Exempt Small Quantity Generator

. Waste code: WSQG  
. Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

**FINDS:**

Registry ID: 110006859202

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility ID: 75565913  
Data Year: 2008  
Description: Soil samples contained with lead.  
Mix: False  
Reported Qty: 600 LB  
Kilo Qty: 272.16000468115209  
Density No: 0  
Density Qty: Not reported

Waste Stream Comments:

Facility ID: 75565913  
Data Year: 2008  
Comments: A-7.The soils were samples from different sites accumulated over several years in small quantity. The soils contained lead and were stabilized with cement. Analytical results of the soil samples after treatment showed lead concentration ND. The treatment happened at the end of 2008. The drum is currently on site awaiting for paper work that is in process. The drum will be picked up and disposed through Emerald Services, Inc. This waste has been discussed with Ecology as documented in an email from Susan Dier (Ecology) to Pat Evans (CDM) on January 20, 2009.

Waste Streams Generated:

Facility ID: 75565913  
Data Year: 2008  
Description: Soil samples contained with lead.  
Mix: False  
Reported Qty: 600 LB  
Kilo Qty: 272.16000468115209  
Density No: 0  
Density Qty: Not reported

Waste Stream Comments:

Facility ID: 75565913  
Data Year: 2008  
Comments: A-7.The soils were samples from different sites accumulated over several years in small quantity. The soils contained lead and were stabilized with cement. Analytical results of the soil samples after treatment showed lead concentration ND. The treatment happened at the end of 2008. The drum is currently on site awaiting for paper work that is in process. The drum will be picked up and disposed through Emerald Services, Inc. This waste has been discussed with Ecology as documented in an email from Susan Dier (Ecology) to Pat Evans (CDM) on January 20, 2009.

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Historical Generators:

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Classification: Conditionally Exempt Small Quantity Generator

. Waste code: D007  
. Waste name: CHROMIUM

. Waste code: D039  
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040  
. Waste name: TRICHLOROETHYLENE

. Waste code: F002  
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 06/12/2007  
Evaluation: COMPLIANCE ASSISTANCE VISIT  
Area of violation: Not reported  
Date achieved compliance: Not reported  
Evaluation lead agency: State

FINDS:

Registry ID: 110005357728

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110005398621

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110056981814

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Tank Status:	Removed
Tank Status Date:	08/06/1996
Tank Install Date:	00/15/1991
Tank Closure Date:	11/26/2001
Capacity Range:	111 TO 1,100 Gallons
Tank Permit Expiration Date:	09/30/2000
Tank Upgrade Date:	08/15/1991
Tank Spill Prevention:	Spill Bucket/Spill Box
Tank Overfill Prevention:	Ball Float Valve (vent line)
Tank Material:	Fiberglass Reinforced Plastic
Tank Construction:	Double Wall Tank
Tank Tightness Test:	Not reported
Tank Corrosion Protection:	Corrosion Resistant
Tank Manifold:	Not reported
Tank Release Detection:	Interstitial Monitoring
Tank SFC Type:	Not reported
Pipe Material:	Fiberglass
Pipe Construction:	Double Wall Pipe
Pipe Primary Release Detection:	Automatic Line Leak Detector (ALLD)
Pipe Second Release Detection:	Not reported
Pipe Corrosion Protection:	Corrosion Resistant
Pipe Pumping System:	Pressurized System
Responsible Unit:	NORTHWEST
Dispencer/Pump SFC Type:	Not reported
Tank Name:	5
Tag Number:	A0746
Tank Status:	Removed
Tank Status Date:	08/06/1996
Tank Install Date:	00/31/1964
Tank Closure Date:	Not reported
Capacity Range:	111 TO 1,100 Gallons

**FINDS:**

Registry ID: 110005321160

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**FINDS:**

Registry ID: 110005346526

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and

it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**FINDS:**

Registry ID: 110005392958

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**HAZARDOUS WASTE BIENNIAL REPORTER**

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Facility ID: 45225129  
Data Year: 2007  
Comments: This waste stream was a single bottle of sodium azide solution weighing 10 lbs, including the bottle and packaging. As an EHW, this shipment caused the hospital to designate as an LQG in 2007. However, because the hospital was an MQG in 2006 and expects to designate as an MQG in 2008, Overlake Hospital will continue to operate as an MQG.

Facility ID: 45225129  
Data Year: 2007  
Comments: This waste stream was a single bottle of sodium azide solution weighing 10 lbs, including the bottle and packaging. As an EHW, this shipment caused the hospital to designate as an LQG in 2007. However, because the hospital was an MQG in 2006 and expects to designate as an MQG in 2008, Overlake Hospital will continue to operate as an MQG.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

**FINDS:**

Registry ID: 110005344314

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**HAZARDOUS WASTE BIENNIAL REPORTER**

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

### Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Varies

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346
Date Made Active in Reports: 05/05/2017	Last EDR Contact: 07/21/2017
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/30/2017
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

### SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346

	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 08/11/2017

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 08/11/2017

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 08/11/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 10/09/2017
	Data Release Frequency: Quarterly

### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 08/11/2017

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/28/2016	Source: Department of the Navy
Date Data Arrived at EDR: 01/04/2017	Telephone: 843-820-7326
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 08/10/2017
Number of Days to Update: 93	Next Scheduled EDR Contact: 11/27/2017
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695
Date Made Active in Reports: 06/09/2017	Last EDR Contact: 08/30/2017
Number of Days to Update: 101	Next Scheduled EDR Contact: 12/11/2017
	Data Release Frequency: Varies

#### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695

Next Scheduled EDR Contact: 09/18/2017  
Data Release Frequency: Semi-Annually

## **State- and tribal - equivalent CERCLIS**

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/18/2017  
Date Data Arrived at EDR: 04/20/2017

## ***State and tribal Brownfields sites***

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

## ADDITIONAL ENVIRONMENTAL RECORDS

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

	Data Release Frequency: Semi-Annually

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/09/2017	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/08/2017	Telephone: 202-307-1000

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: Quarterly

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 08/30/2016	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 09/08/2016	Telephone: 301-415-7169
Date Made Active in Reports: 10/21/2016	Last EDR Contact: 08/01/2017
Number of Days to Update: 43	Next Scheduled EDR Contact: 11/20/2017
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## COAL ASH DOE: Steam-Electric Plant Operation Data

A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2005	Source: Department of Energy
Date Data Arrived at EDR: 08/07/2009	Telephone: 202-586-8719
Date Made Active in Reports: 10/22/2009	Last EDR Contact: 06/05/2017
Number of Days to Update: 76	Next Scheduled EDR Contact: 09/18/2017
	Data Release Frequency: Varies

## COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 07/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/10/2014	Telephone: N/A
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 06/05/2017
Number of Days to Update: 40	Next Scheduled EDR Contact: 09/18/2017
	Data Release Frequency: Varies

## PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 02/01/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/19/2011	Telephone: 202-566-0517
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 07/28/2017
Number of Days to Update: 83	Next Scheduled EDR Contact: 11/08/2017
	Data Release Frequency: Varies

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/04/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/06/2017	Telephone: 202-343-9775
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 07/12/2017
Number of Days to Update: 35	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## COUNTY RECORDS

### KING COUNTY:

#### Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985

## TACOMA/PIERCE COUNTY:

### Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services  
Telephone: 253-383-1735

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

BELLEVUE SOUTH  
126-200 116TH AVE NE  
BELLEVUE, WA 98005

### TARGET PROPERTY COORDINATES

Latitude (North):	47.612367 - 47° 36' 44.52"
Longitude (West):	122.18441 - 122° 11' 3.88"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	561295.4
UTM Y (Meters):	5273321.5
Elevation:	93 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	6005537 MERCER ISLAND, WA
Version Date:	2014
North Map:	6005535 KIRKLAND, WA
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
53033C0656F	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
53033C0365F	FEMA Q3 Flood data
53033C0368F	FEMA Q3 Flood data
53033C0652F	FEMA Q3 Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
MERCER ISLAND	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles NE
Site Name:	BELLEVUE PLATING CO INC
Site EPA ID Number:	WAD078194107
Groundwater Flow Direction:	NOT AVAILABLE
Inferred Depth to Water:	15 feet to 25 feet
Hydraulic Connection:	The uppermost water-bearing strata is a glacial drift composed of sands, gravel, and clay with lenses of consolidated till.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
---------------	-------------------------	---

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
A3	1/8 - 1/4 Mile NNW	Not Reported

35	1/2 - 1 Mile West	ENE
1G	1/2 - 1 Mile NE	E
2G	1/2 - 1 Mile WNW	SE
3G	1/8 - 1/4 Mile NNW	Varies
4G	1/8 - 1/4 Mile NNW	Not Reported
5G	1/8 - 1/4 Mile East	NW
6G	1/2 - 1 Mile West	ENE

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

---

#### Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:  
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:  
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

---

#### Soil Map ID: 2

Soil Component Name: Alderwood

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 42 Min: 14	Max: 6 Min: 5.1
2	11 inches	26 inches	very gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 42 Min: 14	Max: 6 Min: 5.1
3	26 inches	59 inches	very gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6 Min: 5.1

### Soil Map ID: 3

Soil Component Name: Norma

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 5.6
2	9 inches	29 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 5.6
3	29 inches	59 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 5.6

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Ecology

Telephone: 360-407-6121

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

#### Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

### RADON

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey
