Re: Old Machine Shop
Weyerhaeuser Lumber Mill "E" Site
#N-31-5003-000

Dear Ms. Burt:

Enclosed is a copy of the legal description of the approximate area of concern at the subject site. Weyerhaeuser is still searching their records for the legal description of the land leased to Koppers Company. I apologize for taking so long to get this to you.

I have enclosed portions of environmental assessment which is the basis for listing Koppers Company as a potentially liable party. If you wish to have a complete copy of this report, I would recommend that you contact Mr. John Gross of Weyerhaeuser. If Mr. Gross cannot supply you with a copy, the Department of Ecology can forward a copy at a cost of \$0.20 per page.

I have also enclosed a copy of Washington's superfund law and the draft regulations. The Model Toxics Control Act was passed as a citizens initiative which became effective last March. The regulations I have enclosed are presently out for public comment. As such, there may be some changes to the enclosed.

As I told you, John Williams has taken another position in the Department of Ecology. Please direct any further questions and correspondence to his replacement, Rachel Friedman-Thomas at (206) 867-7135.

Ms. Suzanne M. Burt

page 2

As discussed in our phone conversation, you have 14 days from the date you receive this letter to respond to the notice as a potentially liable party. We look forward to any information or comments you may have.

Sincerely,

Dan Cargill
Unit Leader, Urban Bay Action Teams
Department of Ecology
Northwest Regional Office
