RE: Comments on DRAFT RI/FS for Temple Distributing/Carson Oil Site

- **Site Name:** Temple Distributing Carson Oil Site
- **Site Address:** 808 South Columbus Avenue, Goldendale
- **Facility/Site ID No.:** 95474961
- **Cleanup Site ID No.:** 11985

Dear Timothy Bishop:

The Washington State Department of Ecology (Ecology) has reviewed the Draft Remedial Investigation/Feasibility Study (RI/FS) for the Former Temple Distributing Site and has the following comments:

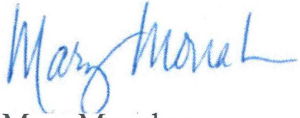

- The practical quantitation limit (PQL) for ethylene dibromide (EDB) was higher than our cleanup level for this contaminant of concern in soils. However, EDB was not detected in any of the groundwater samples at this Site. Given the characteristics of EDB and its transport and fate in soils and groundwater, Ecology feels confident that EDB would not be detected in soils even at a lower PQL. Therefore, Ecology will not require you to resubmit soil samples for EDB to a laboratory that can meet the PQL that is below the cleanup level.
- Ecology agrees with your assessment of the alternatives for cleanup at the site. The next step in the process is to allow for public comment on the Draft RI/FS before finalizing this document. Once the public comment period has ended, we will notify you of any changes to be made to the document and ask for delivery of final copies.

I have appreciated your work on this project, and thank you for a thorough report. If you have any questions regarding this communication, please contact Mary Monahan at (509) 454-7840 or by email at Mary.Monahan@ecy.wa.gov.
