

Background Information for Terrestrial Ecological Evaluations

Terrestrial Ecological Evaluation Process- Simplified or Site-Specific Evaluation?

Documentation Form

	Terrestrial Concern	Response (Circle One)
*1	Is the site is located on or directly adjacent to an area where management or land use plans will maintain or restore <u>native</u> or <u>semi-native</u> vegetation?	Yes / <input checked="" type="radio"/> No
*2a	Is the site used by a <u>threatened</u> or <u>endangered</u> species?	Yes / <input checked="" type="radio"/> No
*2b	Is the site used by a <u>wildlife species</u> classified by the state department of fish and wildlife as a " <u>priority species</u> " or " <u>species of concern</u> " under Title 77 RCW?	Yes / <input checked="" type="radio"/> No
*2c	Is the site used by a <u>plant species</u> classified by the Washington state department of Natural Resources <u>natural heritage program</u> as " <u>endangered</u> ," " <u>threatened</u> ," or " <u>sensitive</u> " under Title 79 RCW.	Yes / <input checked="" type="radio"/> No
*3	Is the site (area where the contamination is located) located on a property that contains at least ten acres of <u>native vegetation</u> within 500 feet of the area where the contamination is located?	Yes / <input checked="" type="radio"/> No
4	Has the department determined that the site may present a risk to <u>significant wildlife populations</u> ?	Yes / <input checked="" type="radio"/> No

*1 This includes for example, green-belts, protected wetlands, forestlands, locally designated environmentally sensitive areas, open space areas managed for wildlife, and some parks or outdoor recreation areas. This does not include park areas used for intensive sport activities such as baseball or football.

*2a What are the threatened or endangered species in Washington state?

*2b Which plant species are classified as threatened, endangered, or sensitive? Where can I find out more information about this topic?

*2c For plants, "used" means that a plant species grows at the site or has been found growing at the site. For animals, "used" means that individuals of a species have been observed to live, feed or breed at the site.

*3 For this analysis, do not include native vegetation beyond the property boundary.

The following sources shall be used in making this determination: *Natural Vegetation of Oregon and Washington*, J.F. Franklin and C.T. Dymess, Oregon State University Press, 1988, and L.C. Hitchcock, C.L. Hitchcock, J.W. Thompson and A. Cronquist, 1955-1969, *Vascular Plants of the Pacific Northwest* (5 volumes). Areas planted with native species for ornamental or landscaping purposes shall not be considered to be native vegetation. [WAC 173-340-7491(2)(c)(i)]

(Here's a link to the [Seattle Public Library](#) and the [Washington State Library](#) to borrow a copy of *Natural Vegetation of Oregon and Washington*, J.F. Franklin and C.T. Dyness, Oregon State University Press, 1988, or you may purchase it through your favorite bookseller. Here's an additional link to a useful online [Field Guide to Selected Rare Plants of Washington](#) developed by the Washington State Department of Natural Resources' Natural Heritage Program (WNHP) and the Spokane District of the U.S.D.I. Bureau of Land Management (BLM) which contains fact sheets for 139 vascular plant species and one lichen species.

Here is an aid to calculating area and an aerial photo depicting a site, its 500 foot boundary and several labeled circles identifying various areas for reference in judging the area of native vegetation within the 500 foot radius.

WASHINGTON DEPARTMENT OF FISH AND WILDLIFE

Species of Concern

State Species of Concern

Include those species listed as State Endangered, State Threatened, State Sensitive, or State Candidate, as well as species listed or proposed for listing by the U.S. Fish and Wildlife Service or the National Marine Fisheries Service.

Status Codes:

FE: Federal Endangered
 FT: Federal Threatened
 FC: Federal Candidate
 FCo: Federal Species of Concern
 SE: State Endangered
 ST: State Threatened
 SC: State Candidate
 SS: State Sensitive

Mapping Criteria Codes:

(listed in order of decreasing specificity)
 B: Breeding Location (Nest or Den)
 CR: Communal Roost
 RC,RLC,RSC: Regular (Large or Small) Concentration
 RI: Regular Individual
 IO: Individual Occurrence
 (If a less specific criterion is listed,

Species of Concern in Washington State

Current through January 25, 2007

COMMON NAME	SCIENTIFIC NAME	ANIMAL TYPE	FEDERAL STATUS
PACIFIC LAMPREY	LAMPETRA TRIDENTATA	Fish	FCo
RIVER LAMPREY	LAMPETRA AYRESI	Fish	FCo

WASHINGTON DEPARTMENT OF FISH AND WILDLIFE

Species of Concern

State Candidate Species

"Include fish and wildlife species that the Department will review for possible listing as State Endangered, Threatened, or Sensitive. A species will be considered for designation as a State Candidate if sufficient evidence suggests that its status may meet the listing criteria defined for State Endangered, Threatened, or Sensitive."

WDFW Policy M-6001
