Re: Request for Information on Status of VCP Project for the following Site:

- **Site Name:** Spic N Span Cleaners
- **Site Address:** 652 S Dearborn Street, Seattle, Washington 98134
- **Facility/Site No.:** 54766547
- **Cleanup Site ID No.:** 3502
- **VCP Project No.:** NW2564

Dear Richard Brody:

The Department of Ecology (Ecology) appreciates your decision to clean up the Spic N Span Cleaners facility (Site) independently. This letter is a reminder about the project and that Ecology is committed to assisting you in reaching site closure. In order to do that, we are requesting information on the status of your cleanup and your continued interest in the Voluntary Cleanup Program (VCP).

Due to the high volume of interest in the program, Ecology has made a few changes to ensure our resources are aligned with current VCP project needs. Ecology is requiring that VCP sites are actively conducting remedial actions and that a request for an opinion on current work is pending. Also, we are requiring that a schedule of planned Site cleanup milestones is submitted, showing a committed interest to remain in the VCP to continue receiving Ecology assistance in the near future.

Our records indicate that we have no information on remedial actions that were conducted during the past year at your Site. The last information Ecology received was on 2016 regarding a Sampling and Analysis Plan dated February 9, 2016. Ecology's most recent opinion letter was in response to that plan and was issued on July 19, 2016.

Request for Information

Please submit the following information to Ecology within 30 days of the date of this letter so we are able to continue to assist you on this project:

1. **Cleanup status report.**
2. **Any reports documenting the cleanup or other associated activities.** Please use Ecology's Remedial Investigation Checklist or other appropriate checklist for cleanup reports submitted. This ensures that all the required information will be included. The checklists are located at: <https://ecology.wa.gov/Spills-Cleanup/Contamination-cleanup/Cleanup-process/Cleanup-options/Voluntary-cleanup-program/Reporting-requirements>
3. **A work plan and schedule for completing the cleanup.** The schedule for completing cleanup actions must be included with your response and should include significant milestones, such as remedial investigation results, quarterly ground water compliance monitoring events, feasibility study evaluations, and anticipated submittal of documents and requests for Ecology opinions. Contingencies and alternative approaches should be identified if the cleanup is not progressing within the expected time frame.
4. **A VCP "Change of Contact Form" for each of the following VCP project contacts, if applicable:** project manager, project billing contact, project consultant, project attorney, or property owner. A dated form should be submitted for each contact for which these project roles has changed. The form is located at:
<https://fortress.wa.gov/ecy/publications/SummaryPages/ECY070218.html>

Please note that any change in the VCP Customer organization (a representative of which signs the VCP Agreement) requires termination of the existing Agreement and completion of a new VCP application and agreement.

Long-term ground water monitoring alone is not considered by Ecology to be a remedial activity and will not be used to determine that a Site is actively conducting cleanup. If monitoring is very close to completion, Ecology may allow the project to remain in the VCP for closure.

Next Steps

Based on your response, Ecology may contact you to discuss whether continuing participation in the VCP is warranted at this time. If the VCP is terminated, you can always re-apply in the future to the Pollution Liability Insurance Agency (PLIA) Petroleum Technical Assistance

Program (PTAP)] when more remedial activities have occurred or a request for opinion is needed. Ecology's decision to terminate participation will be provided in writing. **Please note that if no response is received within 30 days of the date of this letter, Ecology may close the VCP Agreement governing this project.**

Contact Information

We are committed to working with you to accomplish the prompt and effective cleanup of your Site. If you have any questions about this request, please contact me at (425) 649-7233 or by email at sofe461@ecy.wa.gov.

Sincerely,

Sonia Fernández
