Proposal to remove the Country Store from Hazardous Sites List

Public comment period August 12 – September 11, 2019

The Washington State Department of Ecology (Ecology) invites you to comment on our proposal to remove the Country Store site from the Hazardous Sites List (HSL). The HSL includes all contaminated sites that have had their hazard ranked relative to other known contaminated sites in Washington. Sites are ranked on a scale of 1 to 5 with 1 presenting the highest risk. This site, located at 4421 Prichard Road in Moses Lake, was ranked a 4 due to petroleum contamination in soil and groundwater.

In 1990, seven underground storage tanks and 700 cubic yards of petroleum-contaminated soil were excavated. The soil was treated to destroy contamination and placed back in the excavation. Groundwater quality was monitored from 1993 to 2009, when three of four wells were clean. In June 2019, the fourth well met cleanup standards. You may review our draft no further action letter, advising that cleanup is complete, online: <https://apps.ecology.wa.gov/gsp/CleanupSiteDocuments.aspx?csid=1065>
