Re: Notice of Periodic Review Conducted at the Following Hazardous Waste Site:

- Name: Kitsap County North Road Shop
- Address: 301 Bernt Road, Poulsbo, WA 98257
- Facility/Site No.: 65471731
- VCP: NW0074

Dear Mr. Brand:

Under the Model Toxics Control Act (MTCA), Chapter 70.105D RCW, which governs the cleanup of hazardous waste sites in Washington State, the Department of Ecology (Ecology) must conduct a periodic review of all sites where Ecology has conducted cleanup actions, or at sites with institutional controls and environmental covenants every five years. This letter serves to inform you that a periodic review has been conducted at the Kitsap County North Road Shop Site.

The periodic review process typically includes the following steps: confirmation that the environmental covenant (if used) is still active and recorded with the title to the property, a review of any monitoring data collected since the cleanup was completed or since the last review was conducted, and a site visit to confirm that the institutional controls and conditions of the environmental covenant are being followed. Enclosed you can find a copy of Ecology's periodic review report. You can also download the report from Ecology's web site at:
<https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=6465>.

Based on the information collected during this periodic review, the Kitsap County North Road Shop Site appears to meet the requirements of Chapter 173-340 WAC, and the selected remedy continues to be protective of human health and the environment.

A periodic review will continue to be required every five years as long as contamination remains at the Site or institutional controls and/or an environmental covenant are required to protect human health and the environment. The next periodic review will be due in July 30, 2017.

Mr. Jon Brand
