TECHNOLOGY PINPOINTS GUNFIRE

Seattle considers potential police aid

gunfire to a specific address, tell police how many shots were fired, whether they were fired from a large- or small-caliber weapon, and, in some cases, even what direction the shooter is heading. It does this by measuring tiny differences in the time it takes for the sound of the shot to reach a series of microphones, and then software is used to triangulate the point of origin.

On Thursday, Harrell's committee heard the presentation of one vendor, Shot-Spotter, of Mountain View, Calif., which has suggested setting up a trial system in three areas covering roughly 15-square miles in south and Southwest Seattle. The areas include Rainier Valley, parts White Center and West Se-

ShotSpotter would lease the equipment to the city for between \$40,000 and \$60,000 per square mile, with a minimum coverage of three square miles. The cost would include providing a manned dispatch center that would relay information when shots were fired to SPD dispatchers or directly to the

officers on the beat.

Ralph Clark, the company's president, told Harrell's committee that 70 cities currently use the system and that data from Oakland, Calif., and elsewhere have shown that as few as one in five incidents of gunfire is reported.

Over 30 days, he said the system was able to map more than 600 instances of gunfire in Oakland, when only a fraction of that number had been reported to police. The company says the system has a deterrent effect and can be used in prosecutions.

Another developer of gunshot-location technology,

Safety Dynamics, has a similar system that the city could purchase, rather than lease, at a cost of roughly \$192,000 per square mile.

Harrell acknowledged that with either system, installation throughout the entire city would be cost-prohibitive.

Los Angeles County, Clark said, has installed the technology in areas with high crime and low reporting rates.

Assistant Police Chief Paul McDonagh told Harrell's committee that data from the system could be used by the department to allocate resources to hot spots; however, he cautioned that it could also be a drain on those same resources as they respond to additional calls.

Deputy Police Chief Clark Kimerer said the department will also have to weigh the cost of such a system against other needs in a year when the city is facing a nearly \$30 million budget shortfall.

Ecology invites you to a Public Meeting for the Kenmore Industrial Park (Cleanup ID# 2134)

Documents can be viewed at:

City of Kenmore 18120 68th Ave. N.W. Kenmore WA 98028 Phone (425) 398-8900

Kenmore Public Library 6531 N.E. 181st St. Kenmore, WA 98028 Phone: (425) 486-8747

Washington State Department of Ecology N.W. Regional Office 3190 160th Ave SE. Bellevue, WA 98008 By appointment only: Call Sally Perkins

(425) 649-7190

The Kenmore Industrial Park site was a former demolition debris landfill that operated as a King County Landfill receiving primarily wood construction debris. This site is a

45-acre area, located at 6423 NE 175th Street, Kenmore WA 98028.

You will have an opportunity to talk to Ecology, City of Kenmore, Washington State Department of Transportation, Kiewit/General Manson (KGM), and Washington State Department of Health staff members to get answers to questions or concerns you may have regarding the site.

Kenmore Industrial Park Public Meeting July 18, 2012

5:30 - 7:00 pm Open House: Public Meeting: 7:00 - 8:00 pm

Status update at the Kenmore Industrial Park site, project schedule, and next steps. Also learn about neighboring

sites and Harbour Village Marina. Location: Kenmore City Hall 18120 68th Avenue Northwest Kenmore, Washington, 98028

For technical questions, please contact Site Manager Maura S. O'Brien, Washington State Department of Ecology, 3190 160th Ave. SE., Bellevue, WA 98008, or email maura.obrien@ecv.wa.gov, or call (425) 649-7249. For special accommodations for the public meeting or documents in alternate format, call (425) 425-7117, 711 (relay service), or (877) 833-6341 (TTY) prior to the meeting.
