Subject: **Progress Report – July 2019**
Newman’s Chevron
2021 6th Street
Bremerton, Washington

Dear Mr. Myers:

On behalf of Chevron Environmental Management Company, Nordic Properties, Inc., and Victory Business Park, LLC (the PLPs), Leidos, Inc. (Leidos) is providing this progress report to document activities performed to satisfy the requirements of Agreed Order No. DE 14246 for the above-referenced site (the Site), located at 2021 6th Street in Bremerton, Washington. This report summarizes activities completed from July 1 through July 31, 2019.

ACTIONS TAKEN TO COMPLY WITH THE AGREED ORDER

- Between July 22 and July 25, 2019, Leidos completed soil sampling at 11 soil boring locations on or adjacent to the former service station property. Boring locations included the nine borings (SB-10 through SB-18) proposed in the RIWP Addendum 1, as well as two step-out borings that were advanced to the north of the undocumented UST basin in the western portion of the Site. The RI field activities also included sampling the contents of one of the three undocumented USTs. Sampling of the two remaining undocumented USTs is expected to be completed in the next reporting period.

SUMMARY OF SAMPLING/TESTING AND OTHER DATA REPORTS

- No sampling, testing, or other data reports were received during this reporting period. Laboratory analysis reports for the July 2019 RI field activities are expected to be received during the next reporting period.

DEVIATIONS FROM THE APPROVED WORK PLAN

- None during this reporting period.

SUMMARY OF CONTACTS WITH PUBLIC STAKEHOLDERS

- Leidos did not engage with representatives of the local community, public interest groups, press, or federal, state, or tribal governments during this reporting period.

PROBLEMS OR ANTICIPATED PROBLEMS IN MEETING THE SCHEDULE OR OBJECTIVES OF AGREED ORDER OR RIWP

- Laboratory analysis reports for the July 2019 RI field activities have not been received to date. However, field screening results for soil samples collected from borings SB-11, SB-13, and SB-16 (see attached draft figure) suggest that additional investigation may be necessary to adequately define the lateral extent of petroleum impacted soil at the Site. If the laboratory results confirm these suspected impacts, an additional schedule extension will be necessary to complete the RI field activities.

CHANGES IN KEY PERSONNEL

- None during the current reporting period; however, the Project Coordinator role for Chevron Environmental Management Company and the Primary Project Coordinator role for the PLPs will transition from Eric Hetrick to James Kiernan in August.

ACTIVITIES ANTICIPATED FOR THE NEXT REPORTING PERIOD

- Leidos will complete sampling of the contents of two of the undocumented USTs present in the western portion of the Site.
- Leidos will review the laboratory results for soil samples collected during the July 2019 RI field activities and determine whether additional investigation is necessary to complete the RI.
- Soil and UST contents sampling results will be submitted to EcoChem for third-party data validation.

If you have any questions or comments regarding the information presented in this report, please contact me at (425) 482-3323 or via email at russell.s.shropshire@leidos.com.

Sincerely,

Leidos, Inc.

Russell S. Shropshire, PE
Principal Engineer
